Things and stuff have been coming along purty well down hyar in good ole' Magneto Valley, 'Course there ain't been much excitement lately. "Abner" Kroeger hasn't broken anymore records, and there ain't been anymore fires, but we've been gittin along, sure 'nouf . . . By cracky, says Burvilles Shuler, "Them thar rain making machines ain't got nothin' on me. Everytime I sprinkle the lawn, I know right well it's gonna rain the next day. . . . Tsk, tsk, it shore is mighty funny the way Clarence Schieman blushes everytime someone asks who his friend is, we mean the one on his arm. . . . We hear tell, by the never failing grapevine system 'course o' 'course, how Mrs. Wilbur Stocks is ill with a lame arm, and Wilbur has been filling the role of chief cook, and bottle washer. Our most heartfelt sympathies to you, Mrs. Stocks. . . . We reckon we're right smart ashamed of ourselves for not having put Mr. Auman in our colyum before now, but you know, Elmer is such a good little boy, we just can't git a thing on him. 'Course we might mention the way he affectionately calls everyone "Snookiepuss", and the time he "picked" a lock to open a cabinet, and then discovered he didn't have a way to lock it back up. . . . That purty glow which Mildred McKarns is sporting these days, is there because that thar fellow of hers from Noo York calls her long distance every few days. Shore looks like a mighty expensive courtin 'to us . . . Those glamour gal debutantes of Magneto Valley, Virginia Boulware, Evelyn Heche, Irene Schaadt, and Irene Schultz are feelin' all "perked up" on account of the new arrival of that city slicker Paul Bangert to our fair portals. Paul apparently thinks the feeling is mutual 'cause he says, quote: "This hyar place just don't seem a valley to me—it's more like heaven" . . . And with such an appreciation of our dear Magneto Valley, yours truly shall bid you all a fond—G'Bye Now.

Betty Perry, Bldg. 12-1, has decided that someone played a horrible joke on her. After sleeping on a piece of wedding cake for three weeks and dreaming nary a dream she figures someone switched cake.

We have another bride in Bldg. 12-1. Betty Walker is the gal.

That cloud of dust seen rolling from Leo toward Fort Wayne was Berniece Bucher, Bldg. 12-1, in her new gas eater. Howz about a ride, Berniece?

Vaughn Hiser, Bldg. 19-2, may know how to open barn doors—but when it comes to garage doors it requires a woman's skill. How about it, Vaughn?

Sunbeams From 17-4

Again we are fooled, it wasn't wedding candy that LaDonna Ayers was passing, but birthday treat.

Frieda Hyde has her own styling in hose, they are Nylon part way up and lace the rest of the way.

Irene Meyers of Bldg. 21, in trying to tell Frank Mathews about her parking space, calls it her sparking place; now we are all wondering.

Jerry Pierce, the new papa of Bldg. 17-4, has a clothes line stretched above his bench on which he is practicing how to take care of clothing worn by the little man in the three cornered pants.

June Martin firmly believes in wishes coming true, she just wishes that the boy friend would come back to her, and presto, back he comes.

Just in case no one has told you, and so that you all can see it, we want you to know that Mazie Greek has a new diamond ring, to which, she is going to add the mate, this fall.

Bldg. 17-4 is very proud to be represented in Uncle Sam's army. The young man carrying our banner is George Soule, who was presented with a Parker pen and pencil set and also some smokes from we stay-at-homes, who can only say, good luck till we meet again.

Thought For The Week: Don't try to be the other fellow—be yourself.

Granny—Bldg. 17-4.

Thisa And Thata 19-5

From what we hear, Dorothy Kasner, Margaret Bennett, Dorothy Craig, Margaret Feaster, Jenny Frazier, Hilda Bearman, Bernice Schieman, Mildred Werling, and Evelyn Archbald had a rip-roaring good time at Thelma Pond's home the other night. The party was for Evelyn and what between making records and playing them again everybody had a good time. Why not pass the records around? . . . We are becoming quite worried about Ed Dunlap. He consumed one full bottle of cough syrup without getting relief and then tried a second. We feel a change of brand is in order. . . . Can you imagine Louise Beamer not sitting or walking with perfect posture? We can't

---

Florence Peters, Bldg. 12-1, says those aren't Shirley Temple dresses she's wearing but her own idea of what the well dressed moulder will be wearing, come hot weather.

Memo of the day. Ask Carmelita Faugh, Bldg. 12-1, why she changed her calf's name from Belle to Bill.

Why is Dan Hughes, Bldg. 12-1, so upset when ye reporter mentions the cousin from Ohio?

26-5 Tool Bits

Any of the fair sex trying to reduce their weight should get in touch with Herb Thiele who has a safe and sound method. Herb claims he lost sixteen pounds in one day. . . . Henry Wittber, the boy from Maumee Avenue, continues today as of yore. He follows the fire department out Broadway and assists the firemen. However, he regrets the loss of his old job—holding the horses. . . . Carey Baker to Earl Lenz: "You sure burn me up." Earl to Carey—"Yes, but there's very little smoke." . . . George Glenn has received his professorship. He hurriedly shed his pajamas and dressed for work. A coolness caused an inspection and he discovered that he had put on the pajama pants in place of his work trousers. . . . Here's a chance for prize money. "I am 47 years old. Have some grey hair and a fly skating rink in the middle of my crown. I have a sports mustache, and have influence with the management to get your picture in the NEWS. I can tell you the price of bananas and the fare from Fort Wayne to Waterloo, Iowa. I am an expert on the filing machine, and my wife wants a new red automobile. What's my name?" . . . There is the old saying "let sleeping dogs lie" but we must mention that some years ago Ross Cohagen built a rabbit coop in his basement and later couldn't get it out . . . It seems that Schoenefeld was so interested in the wedding he attended a couple of weeks ago that he has become familiar with the routine and now plans to conduct an agency to give his friends advice on how to successfully plan a wedding. . . . Betty Larimore has been seen lately polishing the floor. After all there should be a clear space for Stanley to flop. . . . The rotor die group suggests that Rufus Niblic and Christ Kaiser get a certified appraiser to settle the difference in opinion of a certain car deal involved. . . . After one hour of mathematics Earl Lenz finally convinced himself that he had not been short changed in the recent wage adjustment.

Deaths

Leroy F. Rinard, of the blue print department in Bldg. 18-5, and an employee since 1925, died of injuries received in an automobile accident on Sunday, May 11. Funeral services were held Thursday with burial at Dunkirk.

John C. McNulty, who retired in 1932 after thirty years of service, died of heart disease at the St. Joseph Hospital. Funeral services were held Tuesday at the residence and at the St. Andrew Church with burial in the Catholic Cemetery.

Slips And Chips

By Sir Vis, 4-4

While vacationing from writing this bit of nonsensical bit of chatter, I learned that three besides me read it. We are well on our way through May, the month of spring flowers, romance, house cleaning, and everything including the horse races. The main horse races are over but romance still lingers on for some. Mildred Brown baked some cup cakes the other day and brought some in for Al Schonheinz. Al also stays with Carl Klepper in the winding section. I wonder if Carl is chaperoning Al. Ange is wishing and praying that she too could learn to cook and bake. She wants to bring something in for Walter and she doesn't want to make him sick. Try Jello, Ange, maybe he can catch it as he zips by. I don't know whether romance is bothering Gee or he is becoming absent minded. Gee started home the other evening leaving his hat, coat and dinner pail.

For all those interested or rather conscripted to, this menace to men, that thing called house cleaning, see Wm. (Bill) Johnson. Bill will advise you to read the instructions on paint cans carefully or else you will be hunting all over town trying to buy more and it may be Sunday.

Herman Lepper discovered the Newton milling machine does not require as much oil after the drain plugs are put back in place.

Winter Street "Worse"

Oh Joy! Oh Ecstacy! Oh Nuts!
Just imagine my surprise and glee
Last week's "Winter Street News" to see.
But oh, alas, and oh dismay!
We didn't have one line in "The News" today.
Just as I thought "Too good to last"
Yes, our Editors wear out fast.
They now must recuperate and rest,
Till maybe in July your paper'll be blest
With another paragraph or two
Of Pointless Puns and Gleeless Goo
About us folks at Winter Street.
And once again 'twill be a treat
To see our names in "The News" once more,
Just like it was in the "Days of Yore".

—Frigid Freddie.

For hot tips on what horses not to bet on see Jim Fleming, Bldg. 12-1. Jim says that he was framed when Porters Cap failed to win the Derby. He's still waiting for him to finish.

Life is a maize. Baby ear of corn: "Mommy, where did I come from?" Mama ear of corn: "Darling, the stalk brought you."

Winter Street News

No, that wasn't a smoke screen laid down in the Winter Street office last week. That smoke was from them there stogies Herman Norr passed around for Wesley. Incidentally Wesley is his new son. Congratulations, Herman.

P. S.—The candy and cigars you left in your desk drawer are all gone. Will you please refill the boxes.

Anyone wishing to have their screen doors hung and fitted, just see Harvey Petty. He kinda backs away and "squints" at the opening takes screen door to basement, saws it to "squint" dimensions and returns to door and hangs it. Fit? Sure it fits, there haven't been any big cats or small dogs got through yet.

Joyce Harwood and Liz Schwartz took a week end dash up to see the Kentucky Derby. They must have had a swell time judging from the whispers and sly giggling going on. Liz says she hung around the track and a lot of horsemen knew her.

Walter Stoopenhagen is having a sale on golf clubs for shooting around trees and other perpendicular impedimenta. He got his wood shafted clubs out, soaked them overnight and played a very enjoyable game and then put the clubs away in the trunk compartment and forgot them. That's why we're having this sale, gentlemen, and please save that real crooked one for "In the Rough Sunier." He plays some of the darn—oh, let's don't get started on that.

Since Ray Klotz got his new Chevy car he's looking for excuses to add a little mileage. Anyone wishing to go any place just see Ray. We're sure arrangements can be made.

Charlie Lammiman is a firm believer in the potential luck possibilities of a two dollar bill. He carries his all the time but Charlie says his luck has been extra bad lately and he now carries two $2 bills. If Mrs. Lammiman reads this perhaps his luck will get a little worse, especially when she "confiscates" the luck bills. Better get a rabbit foot, Harlow.

Congratulations to Herman Ebel, Bldg. 6-2. Herman has become the father of a baby boy. From what we hear pop has been taking lessons from Dagwood. We hope he didn't ruin any property in making the run for a first inspection of the new arrival.

It must have just happened so. At any rate when it came time to pay the check in the Works Restaurant, Reba Boyer, Bldg. 19-5 started getting the hiccoughs.

Why did Kathryn Hepburn, Bldg. 19-5, drive way down to Hicksville to get a five cent hatpin,

News Around

Motor Generator Static

Skating and Stuff

The Bldg. 19-3 office group held a skating party at Lincolndale last Friday evening.

It was a very enjoyable evening to all who attended though some were sore and stiff for several days. Special accomplishments should be recognized; so honorable mention is given to Florence Krebs, Eileen Porter, Elmer Wagner, Agnes Freiberger, Bob Byers and Geraldine Tilbury because "they faw down and go boom."

Sara Jones required at least two stalwart men to transport her around the floor. She calculates those four little wheels on each foot were "the most uneasy critters."

Jack Toole wore skates, but did very little skating. Perhaps remembering, "he ain't what he used to be."

Eileen Porter's lament was, "I bruise so easy."

Wagner was perhaps the most outstanding star of the evening, his versatility was remarkable. How any one person could wear skates on his feet, yet spend so much time siting on the floor, had all the folks wondering. Seemed like some of the fight reports we have heard—"he's down, he's up, he's down, he's up, such stamina, such grit. How long can this keep up? What this boy lacks in skill he makes up in courage and ability to absorb punishment, etc., etc."

Best excuse of the week is offered by Louie Fox, Bldg. 19-3. On Friday evening, Louie is observed rushing up to Crooked Lake—for some reason that particular pool of water fascinates him. The boys of Bldg. 19-3 were unable to understand this rush, he couldn't fish, didn't work, so why? But Louie pulled a "whizzer" on them last Friday night. One of the boys had an appointment to meet Louie at the Sheets Hotel for an evening's discussion of current affairs? ? ? ?, but the evening wore away and no Fox materialized.

When asked for an explanation, Louie remarked, "he purchased a beef roast and had to rush home to place it in the refrigerator." Fast thinking we calls it.

That popular song, "The biggest mistake of my life" should be a theme melody for LeRoy Cook, Bldg. 19-3. The boys say he recently went to a lake, expecting to get the limit; but fate was against him. It was a closed season. As a consequence, he was robbed of that opportunity, to glory in the spoils of victory and returned home a sadder and wiser man.

Better luck next time, we all know how you feel (or do we?).

What You Hear In Bldg. 19-3

Frank Archbald—"Whatever it is—no."
Jim Stouder—"You Buzzards"
Mary Zimmerman—"It makes me s-o mad"
Phyllis Geller—"And don't call me Red"
Virginia Shidler—"Hi Johnny"
Jack Toole—"Say"
Florence Teeter—"Now listen"
Elmer Wagner—"Now let's see"
Ruth Schafenacker — "Now what's wrong?"
Dwight Myers—"Any news?"

Ray Kierspe, Bldg. 16-3, would like to know why the cigars Pauline sells him are never quite the same as those sold other men around here. They seem to have automatic ash knocker-offers.

Has Bing Engelbrecht, Bldg. 16-3, ever told you about the time Mary washed his chair cushion for him? He always comes up with a smile.

Veterans Among Safety Shoes

Safety shoes were being worn seven years ago, but nevertheless there was far from what might be termed a general use of this means of protecting the toes. The shoes pictured above may well, therefore be placed in the veteran's class. They were purchased by Robert A. Daring, Bldg. 17-1, seven years ago and have been in steady use ever since. Mr. Daring has had four pairs of half soles applied but otherwise the shoes have refused to wear out.

M. B. A. PATIENTS

General Purpose Motor: Margaret Brickel, 932 Grace Ave.; Lucile Coleman, R. No. 4, City; Edith Farrell, 1102½ Maumee Ave.; Virginia Morand, 829 W. Creighton Ave.; Marcile Martin, Methodist Hospital; Virginia Myers, 1049 Northwood Dr.; Grace Nichols, St. Joe Hospital; Merle Wright, 1117 Garden St.; Edward Willey, 801 Grace Ave.; Alvin Myers, 2726 Lafayette St.; Betty Coffelt, 516 Lavina St.

Transformer: Marcia Agerter, 825 Eckart St.; Dale Drake, 1931 Eby Ave.; Robert Houser, R. No. 1, Rabus Dr.; Ruby Igny, Medical Center Hospital; June Lambert, Medical Center Hospital; Helen Rarick Walker, 429 Poplar; Thelma Roberts, 736½ Huffman St.; Bernice Rodemund, 937 Eckart St.; J. Klopfenstein, 2205 Broadway; E. Smith, Harlan, Ind.

Apparatus: Michael Hamilton, Waynedale; John Smeltzer, 1212 Huron St.; Gerald Mickley, Huntington, Ind.; Raymond Schmidt, 1229 Winter St.

Apprentice School: Arthur Walcutt, St. Joe Hospital.

Shipping: William Closson, 1607 E. Wayne St.

Series & Specialty: Hazel Parker, 1338½ E. Lewis St.

Office: Kathleen Schafer, St. Joe Hospital; Jeanette Adams, Methodist Hospital.

Left the Hospital: Raymond Bailey, Frona Witsche, Olive Waters, Helen Rarrick.

Returned to work: Beulah Wooley, Dorothy Wilson, Paul Groh, Kathleen Meyer, Bertha McLaughlin, Virginia Ostrowski, Manford Lee, Irma Antoine, Wilma Schameloh, Rosemary Bender, Clifford Schwarz, Bess Chapman, Carl Rietdorf, Mary Markewith.

Flash: The many friends of Mr. and Mrs. Harry Witherow, who went east with the meter department, will be pleased to learn that twin daughters were born to the Witherows on Sunday, May 4. Congratulations.

Gossip From 20-1

Harvey Sigler passed out cigars. Congratulations Mr. and Mrs. Sigler. . . . Many of our fellows in the General Service are using their spare time decorating and beautifying their kitchens at home. John Bendel has some attractive color schemes in mind. . . . Boys prepare for some excellent fish stories. Paul Eastes purchased a fast outboard motor and judging from that determined look on his face he really intends going out after the big ones. Erv Huth, upstairs, can give you some advice, Paul. . . . In closing I cannot help but comment on the fine spirit of co-operation shown hy the various tradesmen in General Service in working together on various jobs. Production workers too are to be commended.

A Lover of "Light Work."

Helen Forst, Bldg. 4-6, was so excited when she received her check last Friday that she tore it up into bits and had to get a duplicate from Payroll.

Congratulations to Mr. and Mrs. J. C. Cochran, Bldg. 4-6, and Mr. and Mrs. J. H. Anderson, Bldg. 4-6, for adopting baby girls. Best of luck to you both.

We wondered why Bruce Curley, Bldg. 4-6, didn't take his toy snake home with him, but after investigating, we found that Denton Manecke, Bldg. 4-6, was having so much fun teasing the girls, Bruce couldn't bring himself to the task of telling Denton the snake had to go home.

We, the people, are wondering what caused all the excitement the other day when Alma Ladig, Bldg. 4-3, got a permanent and just couldn't wait to see if she had some curls.

Harry Parker and Sam Allmandinger, Bldg. 4-3, are practicing up on their two gun shooting so they can match the rest of the boys at Big Long Lake this summer.

Freda Bunnell, Bldg. 4-3, gets all excited when she sees a News reporter looking for some one working on the second shift.

News On The Nose From 4-5

As usual, the Bldg. 4-5 working element has been too busy to be caught in many informal moments. However, "Frenchy" LaGras was snapped in an off minute as he stood with a threatening fist placed against your reporter's nose. To quote his exact words when he heard her asking what was news—"Remember—nothing ever happens to me, you female Walter Winchell!" Ha-ha-ha, laughs the villainess, does he think we are afraid of threats? . . . Can it be love? We are forever trying to discover a romance in bachelor Jim McGill's life and here's one time when it looked mighty suspicious. What else would cause a man to wear some one else's double breasted suit coat home when his own is a single breasted model? Not only that, Gene O'Keefe, the victim, went home this last cold Monday noon in his vest rather than go off with another's coat. . . . And then there is the sad, saa-d story related by Ed Glusenkamp who went cheerfully home last weekend with visions of a fishing trip to the lakes. And did friend Wifey meet him at the door with rod and reel? She did not—'twas with step ladder and wall paper cleaner that hooked poor Eddie to the home fires all week end. . . . And while we are on the subject, Harry Anderson was showing pictures of his lady friends to the fair element in Bldg. 4-5. When he drew out a picture of a fish, they all agreed it was a fine likeness. What's the matter, Harry, do the girls play you for a sucker? . . . We overheard Rodney Stair, handsome Lothario that he is, telling Ray Schwartzel that his girl was like some fair goddess. "And what does she call you—Apollo?" inquired our witty inspector, Ray. . . . Wearing a diamond of very recent newness is our lovely belle of the office, Jeannette Saunders, Bldg. 4-5 typist. Best wishes lovely lady, and also to Lydia Thieme who recently became Mrs. Herman Kleinschmidt. . . . Perhaps we sound like a license bureau, but can we help it if love is in the air and everyone is getting engaged? So we take a deep breath and here goes. . . . Irene Bobay and Louis Kline will become Mr. and Mrs., June 28th, and Helen Ries and Gaylord Turner have chosen the same day. Marceline Manier will make her vows to Austin Helser, June 5th, while Dorothy Hetz and Clarence Meyer have named June 14th as the day never to be forgotten. Adelle Johnson announces no date for her wedding with Harold Thompson, but we sniff orange blossoms in the air. . . . There now —if it's contagious, bachelors be careful, and bachelor ladies, here's your chance. . . . What's happened to Elmer, the Field Mouse? Has he lost the old fightin' spirit? Perhaps he got scared when we challenged him to a feud. Or is he in love? Better men than Elmer have been scared into hiding by that . . . . Now take Mark Staker for instance. He waited 'till his wife took a vacation before he decided to throw a stag-party Saturday night. It's the same old story, when the cat's away—you know the rest.

Thought we had a new watchman just taking lessons when "Jimmy" Buckles was seen hanging around the Main Gate, but after a very charming lady drove up and handed him something which he showed to the watchman, he proceeded to his daily tasks in the Wire Department.

Due to conditions beyond our control, Marie Laramore, Bldg. 4-3, is slightly off her diet again.

The employees of Bldg. 4-5 wish to express their sympathy to Mary Felber in the death of her brother Ralph Barnes.

"The Painters"

(Any similarity to persons living is absolutely intentional).

This is the story of two guys, who wished to paint, it's true,
Of old Jack Toole, that artist rare, and Walter Histed, too.
"My house needs paint," Boyd Fisher said, "so very much I fear,
"I'll have to hire some craftsmen soon, to paint two coats this year."
When Toole and Histed heard of this, they murmured "this is fate,"
And soon an offer made to Bud, far below the standard rate.
His interest rose, "The time has come to talk of things," they said.
"Of pigment, oil and turpentine and shall we paint it red?"
"For first coat thinner we'll use oil," quoth Histed feeling fine.
And Toole replied, "Ah, no we won't my jobs need turpentine."
Their anger rose, the words they used, flew to and fro quite fast.
Bud stood and listened, losing faith, until he said at last,
"The deal is off, you can't agree, it is very plain to see,
"I'll hire some painters who know how, to do the job for me."

Glen Billman, Bldg. 19-2, is looking for some good softball players. We know he don't need a shortstop, all Glen would need to do is to get in the outfield and no ball could get past him.

Short Story

Harold Bohde, Bldg. 19-3, inventor—takes fruit jar, pipe, heaters, fans, and stuff—makes gas economizer—gas flows through weird contraption—expands—gets lost—returns to tank—engine thinks it's getting gas—runs on imagination—sells gas to filling stations—drove 5,000 miles—used no gas—sold 5 barrels gas—clear profit—be millionaire in two years—boon to humanity.

WE DON'T BELIEVE IT!

Must be the weather or something. H. C. Smith, welding foreman was observed coming to work recently holding a black teddy bear trimmed with yellow. Cute—sure, but I still don't get it. Do you?

The saying of the week—by Jerry Frye, Bldg. 19-3: "Love is a dream, but marriage is the alarm clock that wakes you up."

Annabelle Haines, Bldg. 19-3, was reading a card on some costs of various items. Suddenly she said to Mary Francis Lauer also of Bldg. 19-3: "You don't happen to have a bearing out do you, Mary?"

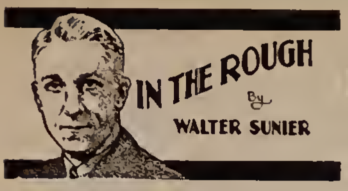
To which Mary replied, "No, but I have a couple screws loose."

A Modern Sir Walter Raleigh

The other afternoon when Wilma Crim and Don Schutz, of Bldg. 19-3 were on their way to his car in the parking lot, a small dog, a very cute little creature that wouldn't harm a flea, playfully jumped out and began yipping at tbem. Incidently the little "purp" had quietly passed all others up, apparently just waiting for any suspicious characters to come along. Suddenly he seemed to take particular dislike to Wilma and barged out at her with fire in his eyes. Wilma dashed out into the street, and by this time there was a gleam of fear and anger in her pretty eyes. For a moment Don was dazed and panic-stricken, wondering how best to tackle the tragic and dangerous situation. He might have gone to the nearest Ford dealer for help, but he didn't. Wildly swinging a large club he drove the savage beast away and saved Wilma.

Why don't you pick on somebody your own size, Don?

Clarice Fryock, Bldg. 19-5, is in the market for an apron. Mebbe a chain letter would bring her one.



It is definitely settled that something must be done about moving Orchard Ridge to Brookwood or vice versa and combining the two courses in order to have one course that can accommodate Billy Wehrs. He finally got out to play and his first drive from No. 1 tee at Brookwood went over the green about three yards. His second shot landed in the cup. Even though the first hole is 501 yards long, we know the story is true because Billy told us about it himself. Since it is evident that the course is too small for him, Orchard Ridge and Brookwood must be combined to make one course that will be big enough for Mr. Wehrs.

Edgar Waldschmidt shot a 43 on the second nine at Brookwood the first time out. Apparently the course should be made tougher for him also.

We are beginning to see most of the golfers although it seems that there are many who do not slug around on Saturdays. We have seen Holmes, Hamilton, Elder, Bridges, Beatty, Tobias and Wickliffe. The warm weather will finally thaw out all the golfers and bring them out of hibernation, provided, of course, that the storm windows are down, the screens up and the lawns mowed.

Sandy writes a good column. He is a bright man. There can be no question about that when he refers to us as the No. 1 columnist. Thanks, Sandy. Hae ye any mair goud things ta sae, begorra, we kin tike it.

There are some golfers working on the second and third shifts. If there are enough, perhaps some method of play can be worked out whereby these players can play in the golf league. Will all such golfers, please send their names, factory address, foreman's name and working hours at once to the writer in Bldg. 18-4?

The G-E Club Golf League starts into action next Monday, May 19th and will, no doubt, be opened with prayer during the very first match.

Horse Shoe Courts Officially Opened

The horse shoe courts in McCulloch park were officially opened this week. Plans are under way for the formation of a horse shoe league if plans mature for a city-wide organization. As in previous years the courts will be open at all times for General Electric employees.

Baseball Loop To Open May 27

The G-E Club will enter a team in the Y.M.C.A. Industrial baseball league which will open on Tuesday evening, May 27. Six teams are entered in the league and two more will be added. The games will open at 6:00 o'clock and after the initial engagements, will be played on Thursday evenings.

The openers will send International Harvester No. 2 against Rea Magnet Wire; Post Office against the G-E Club and the Wayne Company against International Harvester No. 1.

NEWS THROUGH THE PLANTS

(Continued from Page 7)

Borings From 4-4 Office

Due to facilities beyond my control, I was unable to bring you the oddities in the news and the daily happenings of our office last week. However, will try to make up for lost time this week. So here goes nothing.

C. Mike O'Grady has no excuse for being late since he has purchased a new electric alarm clock. One of those super jobs put out by G. E., and the alarm awakens every one for miles around.

Emmy Stock recently purchased a new set of tires for the Buick (no commercial intended). He was tired of running the wheel into the ground. Yes, Emmy, it does sound a lot better.

After 23 years of working in and out of the G. E., a certain production chaser has purchased a new car. Now all he needs is some one to teach him the finer arts in driving the thing. We all know he is a good back seat driver, but all that is not enough to make it safe for the other guy on the road.

LaVon Price lost her badge the other week. But that isn't enough, so did Virginia Plummer. Both were given new badges plus the advancement of 50c. However, Virginia has forgotten her's twice since the losing of the badge. Last Monday morning she had to go all the way to Huntington to get hers. She was a little late too.

Talk about Christmas coming in May. You should see the new duds in the office. Don Niles came to work all decked out in a handsome grey suit, also Cliff Uncapher in a new grey suit and new shoes. Marge Brown bought a new pink blouse—it's a dandy.

Mary Hakes and Bob Klingel went to a dance at Orchard Ridge last Saturday night, and while looking for golf balls, Mary lost her purse.

Jean Bugert was operated on for appendicitis at St. Joseph's Hospital Tuesday morning and is getting along just fine. We are all hoping for a speedy recovery.

Pauline Young, LaVon Price and Virginia Plummer are now members or future members of the Benevolent order of Draftees' Widows.

'Tis plenty for now, except I know I won't pass my exam (I got my draft papers) 'cause I got flat feet. Won't my girl in Bldg. 26-3 be proud of me now? ? ?

Sincerely as ever,
Elmer, the Field Mouse,
(The Rat To You).

Big Long Lake is fast becoming a mecca for our co-workers of Bldg. 4-3. Over the last week end there was much activity there among our clan. Harry Mumma made an early morning call upon Sam Allmandinger and found him partaking of a breakfast of Mexican hot pepper stew, pickles and sour kraut, and washing it down with big gulps of Tarantula juice. As Harry put it, Sam is one tough hombre. Carl "Pudge" Clevenger called upon Art Brandenburger. The first thing Art did was to introduce Carl to the lawn mower, and told him to make it snappy. Upon finishing the lawn, Carl was served Chili A La Lake. Art refused to take Carl boating because he did not want to get the boat wet. Buck Adams had some of the boys helping him with his eagle pens. After the pens were taken care of, Buck had some of the gang exercise a few of his eagles. You see, he is going in for the ancient sport of falconry, and is training some of his birds to snap ducks out of the sky and return them to him.

The girls in Bldg. 12-3, wonder how long Evelyn Reiling thinks a week-end is.

Betty Snyder, Bldg. 4-3, is becoming quite a vocalist. She can be heard vocalizing most any time of the day. At present her favorite song seems to be "Oh, Johnny, Oh." Nice going, Betty, some day we may be hearing you at the Metropolitan.

Don Voorhees, Bldg. 4-3, enlisted the aid of John James, Bldg. 4-3, to put his lawn-mower in shape for the summer. John gave it a complete overhauling. Don's wife said that she was very glad that it has been fixed. Now she will be able to keep the lawn in first-class condition during the warm months.

Art Brandenburger, Bldg. 4-3, our "Gay '90 Romeo", has a strict set of rules governing his place at Big Long Lake. All guests must observe these rules. One rule is that all guests must be in bed by 10:00 P. M., and the radio must not be played after that time. If this rule is disobeyed, said radio will be promptly turned off from a switch in the host's room. Another is that nothing stronger than sarsaparilla will be allowed on the premises. Also the host, at all times, will take care of refilling the oil stove, and lastly, guests must not disturb his hogs. As he puts it, they must have complete undisturbed rest, so as to be sleek fat porkers.

A farewell pot-luck dinner was held Friday evening in Bldg. 4-2, by the finishers and welders, in honor of Velma Neumann who is leaving to join her husband Lieutenant Paul M. Neumann, at Camp Shelby. Velma will make her home at 934 34th Avenue, Gulfport, Miss. Those present included Ruth Nuttle, Vicki Fuhrmann, Bonnie Meyers, Helen Berghorn, Janet Maxson, Eva Leverton, Helen Denig, Luella Peters, Helen Philips, Blanche Mulligan, Eileen Ginther, Millicent Farrell, Mary Yost, Lois Sible, Olga Kuzeff, Imogene Beemer, Mary Laughlin, Dorothy Zurbach, Lorene Foltz, Erma Heine, Catherine Hite, Ray Brown and Harry Spahr.

Edith Baker, Bldg. 26-2, surprised the girls by announcing her marriage to Floyd Legendre on September 7, 1940. Best wishes.

Anyone wishing to see Alice Friedman's face, Bldg. 12-3, turn a lovely lip-stick red, just ask her how she got the singed eyebrows. A lighted match and day dreaming don't mix very well for you, eh, Alice? Well, it saves plucking 'em, though it might be a bit more uncomfortable.

"Tailspin" Bosserman, Bldg. 12-B, was the "proud" possessor of a beautiful coat of mud as the result of a neatly executed three point landing in a puddle he took too great a fancy to just outside of Bldg. 12, one evening last week. His humor wasn't improved any when the model "T" refused to budge from the parking lot and finally had to be gently urged all the way home by a neighbor's car. We'd sure would have hated to get in Gerald's way that night.

We've heard often enough of wearing bathing suits at the beach and never going near the water, but being afraid to get a rain coat wet, is a new one on us. Lois Hagemann, Bldg. 12-B, was seen carrying her brand new raincoat home in a box in that heavy downpour last week. Saving it for a rainy day, Lois?

A Correction

It was incorrectly stated in last week's issue that the oldest mother attending the Elex mothers-daughters party was Mrs. Emma Rickey. The name should have been Mrs. Emma Reiling.

To And From

Dear Girl Upstairs:

Have you ever noticed how much the girls in Bldg. 17-2 like to eat? How much and how often! Helen Wayer is always on the lookout for a handout. She says the only thing she doesn't like is oysters.

Last week the girls on wire raising had a potluck to celebrate Virginia Doty's birthday. Those who attended were: Arline Gaskill, Helen Grunewald, Joan Young, Esther Remenschnieder, Mary Hoffman, and Mabel Schaaf. Virginia received a lovely gift from the girls and did they ever eat.

Ruth Seyfert was very generous with those pretzels—until she confessed they belonged to Audrey Schuler. Then we realized why she was filling up her own pockets, as well as everyone else's. Last Sunday, Shirley Ohneck suffered her initation into the Pillon Club. You should have seen her try to preserve her hair-do.

Talking so much about food is making me hungry. Guess I'll go down and see what Maxine Root and Leona Weller have to eat. If you ever get hungry, come down and see us.

—The Hermit.

Dear Hermit:

Things are sure happening fast and furious this week. Over a yummy piece of chocolate I discovered our own Arnola Brindle had very quietly become the "sedate" Mrs. Kenneth Williams, Sunday. Thought it was to be in June, Arnola! We all wish you the very best.

The cafeteria serves us the best of meals, but Irene Meyer had to finish her lunch off with a great big dish of jello the other night. It sure looked good, Irene, and were we envious.

Did you know Grace Nichols was off work, due to an injury to her leg. She is at the St. Joseph Hospital. We hope she will soon be OK and back among us.

The other day I was talking very seriously to one of the Drewett twins, but I'm still a little worried. The truth is, I don't know whether I was pouring wisdom into the ears of Madelyn or Vera. This twin situation is confusing, don't you think?

Last Wednesday evening, Merlin Duffy decided it would be fun to discover whether or not here really was gold in "them thar hills", so he took a little trip to Southern Indiana. Well, how about it. Did you find gold, Merlin?

Our three musketeers, Max, Benny, and Marvin are immune to kidding. We razz them to death and it just goes in one ear and out the other. That's swell, boys. Wish I had your fortitude.

Well, there you are, dear hermit, take it in the spirit it is given, and I'll see you next week.

The Girl From Upstairs.

Regional Warehouse News

On May 6 the Regional Parts Warehouse Organization held a chicken dinner at the Club House of the Veterans of Foreign Wars Jim Eby Post 857 on West Main Street, at which time the following officers were elected for the ensuing year:

President—Fred W. Gerhard.
Secretary—Mary E. Kellogg.
Treasurer—Henry Reidenbach.
Ass't Treasurers—Thomas Fox, Doris Gettys.
Board of Directors—G. R. Plummer, Charles Lahrman, Ruth Stier.

Pete Kuttner, Bldg. 18-3, really has the remedy for a persistent cough; what say, Annette?

Apparatus Duckers Continue Schedule

The Apparatus Duck Pin league continued its schedule with the Cores still in the driver's seat with six straight games to their credit. High games were Paul Larenitis, 160; Bob Voltz, 153; Carl Dicke, 151; and Frank Schlink, 140. It is reported that Gene Egts still keeps the No. 1 alley polished.

« «It's a Joke» »

Prospect: "Has this dog a good pedigree?"

Salesman: "Say, if he could talk, he wouldn't speak to either of us."

* * *

"Why do you go with Mary Jones? Everybody says she is a horse's neck. She laughts like a hyena, is as big as an elephant, and treats all boys like dogs. Why are you so interested in her?"

"I don't know. I guess it is because she appeals to the animal in me."

FORT WAYNE WORKS

Volume 24 FORT WAYNE, INDIANA, FRIDAY, MAY 23, 1941 Number 66

Father Welcomes Son To Quarter Century Club

When Charles Miller, General Service Division, became a member of the Quarter Century Club this week, he was welcomed into the organization by his father, Wm. G. Miller who has been a member of the Club for the past sixteen years. Mr. Miller, Sr., retired in 1930 after thirty years of service.

Hold Memorial Program In Park Wednesday Noon

All Employees Invited To G-E World War Veterans Observances At 12:15

All employees are invited to attend the Memorial Day program sponsored by the General Electric World War Veterans Association to be held on next Wednesday, May 28 in McCulloch Park. Fort Wayne Works employees who served during the World War will be honored in the program and tribute will be paid to those who died in this country's service.

Speaker on the program will be The Rev. Charles M. Houser of the Plymouth Congregational Church. The musical part of the program will be by the G-E Club Band under the direction of Perry Shober with H. Pilcher as soloist.

The complete program, which will start at 12:15, will be as follows:

America The Beautiful..G-E Club Band
Posting of Colors..Carl Rehling, Commander
Colors........Bugler Tony Naumcheff
Introductory..Wm. Walt, President
God Bless America ....Solo
H. Pilcher accompanied by G-E Club Band
Address..The Rev. Chas. M. Houser
Placing of Wreath at Memorial Flag Pole
C. Rehling and E. Spiker
My Buddy....................................Solo
H. Pilcher accompanied by G-E Club Band
Salute ....Firing Squad
Carl Shugg, Commander
Taps............Bugler Tony Naumcheff
National Anthem....G-E Club Band

The program Wednesday will be the second annual observance under

BULLETIN

In general, the Fort Wayne and Decatur Works will be closed on Friday, May 30, in observance of Memorial Day.

With the exception of continuous operation such as Power House, Patrol Service, etc., the Works will remain closed on Saturday, May 31, and will resume operations on Monday, June 2.

M. E. LORD
Works Manager.

Fathers Of Elex Members Will Be Guests At Party

Annual Affair Will Be Held At Turners on June 9

A party for the fathers of Elex Club members will be held on Monday, June 9, it is announced by the Club's social committee. The affair will be at the Turners and will start at 8:00 o'clock with a Dutch lunch.

Prizes will be awarded to the oldest father in attendance, to the youngest father and to the father coming the greatest distance. Reservations must be made on or before June 6.

Following luncheon an old fashioned minstrel show will be presented.

Last Chance To Buy Defense Bonds By Payroll Deductions

Employees are reminded that authorizations for the purchase of United States Defense Savings Bonds for 1941 on the installment plan will be accepted only during the month of May.

The first weekly installment will be payable during the week ending June 13, the first semi-monthly installment will be payable on June 15 and the first monthly installment will be payable on June 15 or June 30, 1941.

Authorization forms may be obtained from department heads, foremen or the payroll department and must be filed not later than May 31, 1941 to be accepted under the installment-purchase plan for 1941.

Employees may purchase United States Defense Savings Bonds for cash at any time. Payment may be made at payroll departments at works and offices where employed or at the Bond Office, Schenectady.

New G-E Radio News Program

"News of the Week In Industry" To Be Heard On Thursday Evenings

A new series of 15-minute business and industrial news broadcasts, entitled "News of the Week in Industry" and sponsored by the General Electric Company as a contribution to the national defense program, has been started Thursday nights at 7:30 p. m., C.D.S.T., over a selected list of NBC Blue Network stations, it has been announced by Charles E. Wilson, president of the Company.

"Our objective in sponsoring this series of broadcasts," Mr. Wilson said in announcing the program, "is to make available each week, to the people of the United States, an up-to-the-minute, authoritative report on what the industries of America are doing to meet the vital responsibilities reverting to them under the national defense program."

The broadcasts will be based on information gathered through the co-operation of Business Week, a publication with facilities for obtaining news of business and industry throughout the country. Commentator on the new series, which is to be devoted entirely to news reports and to include no commercials, will be John McIntyre, with Ed Herlihy acting as announcer.

The programs will be carried every Thursday evening from 7:30

(Continued on Page 2)

Large Defense Orders Subcontracted By G-E

The General Electric Company is employing hundreds of subcontractors in an effort to expedite its defense contracts and is seeking additional concerns able to handle precision work of the type required by Army and Navy specifications, President Charles E. Wilson has announced.

"In order to speed our own defense work and advance our schedules, we are endeavoring to locate more and more manufacturers willing to co-operate on this program. Such plants may have suitable facilities not now fully employed, or may be capable of expanding to handle work of the type demanded by defense specifications," said Mr. Wilson.

• With The Aid Of Mirrors

"It looks like half of the nation is planning on improving aircraft," the aviation editor of a daily newspaper declared recently, referring to the many defense inventions and suggestions that have been pouring into the United States Patent Office lately. These inspirations, many of them useful, are the work of free men using their own free minds, and are typical of the whole country's approach to the big problem of defense.

Industry is exhibiting the same initiative displayed by these inventors in connection with defense. Particularly interesting was the recent account of the airplane factory which through research magic is doing tricks with mirrors to turn out better planes.

Mechanics are using tiny mirrors, dentist style, to poke into tiny cavities of the plane and engine to make sure that there are no imperfections. Then, too, in order to photograph instruments while the ship is in flight, mirrors are installed; the flight records can be photographed by reflection in these without the cameras getting in the way of the pilot. A third use—when tools have been made by a skilled toolmaker, they are now photographed after being placed in a box which has mirrors on all four sides. This does away with time-consuming drawings and blueprints.

Many are the ways in which America's research knowledge is meeting the test of defense. Some of the stories are as interesting as the one above. Others are a little too technical for general interest, but equally important. But all have one trait in common—all show that free men are ingenious enough, and able enough, to meet the challenge that presents itself whenever the "workability" of a free way of life is called into question!

" 'Sock the successful' seems to be the slogan that is popular with those who have not the ability or the application to succeed."—*The Louis Allis Messenger.*

A French philosopher said it was the prerogative of great men to have great defects. Greatness consists not in absence of defect but in an abundance of strength.—*Raymond Clapper.*

• The "Brooklyn" Spirit

The way the Brooklyn Dodgers can win baseball games with plays that aren't even on the books often puzzles sport writers.

Recently, when asked how they do it, Manager Larry McPhail pointed to the grandstands and said, "It's because it's *their* team, not just baseball. Listen to the support they give the team."

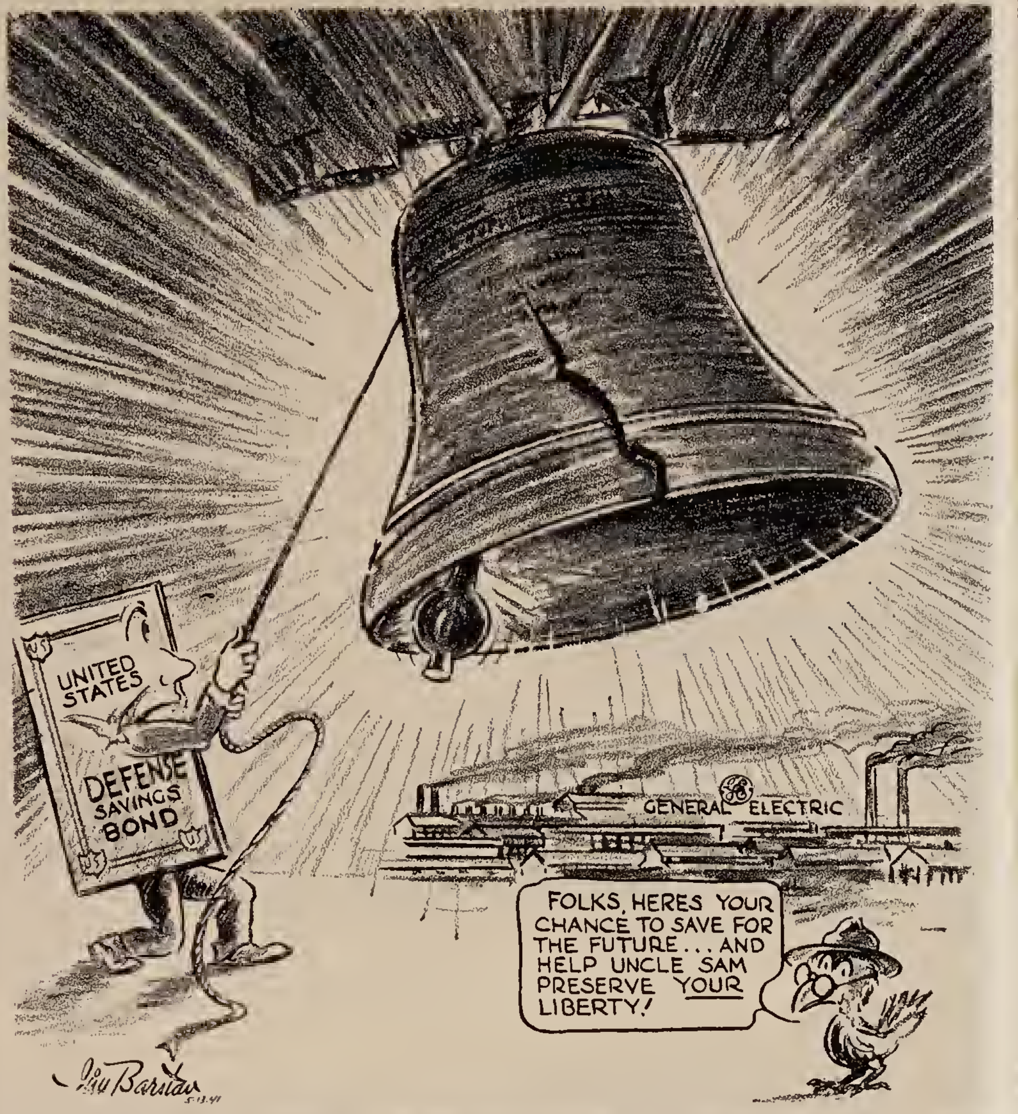
That same kind of spirit of pulling together, helps make winners in any field. And—don't all of us want to work for a company that's a winner?

Getting the other fellow's customers away from him is not nearly so important as keeping your own customers safe and satisfied.—*Selected.*

Close your book of complaints against the management of the universe, and look around you for a place where you can sow a few seeds of happiness.—*Henry Van Dyke.*

In the long run, digging for truth has always proved not only more interesting but more profitable than digging for gold.—*George R. Harrison.*

ALL OUT FOR AMERICA!



UNITED STATES
DEFENSE SAVINGS BOND
GENERAL ELECTRIC
FOLKS, HERES YOUR CHANCE TO SAVE FOR THE FUTURE . . . AND HELP UNCLE SAM PRESERVE YOUR LIBERTY!
Lou Barlow 5.13.41

Orders Subcontracted

(Continued from Page 1)

Citing specific examples of how defense work has been spread throughout industry, he explained that finished parts are being supplied to General Electric's Erie, Penna. plant by more than 100 subcontractors; to the River Works at Lynn, Mass. by at least 65 vendors; to the West Lynn plant by another 26, and so on. The Company's Schenectady plant is the focal point for the production of 95 manufacturers.

Altogether, more than 350 concerns are helping to manufacture the products called for in defense orders for which General Electric is the primary contractor.

"A large part of our personnel and much of our manufacturing facilities are now employed on Defense projects," stated Mr. Wilson. "Many new factory buildings have been erected at our plants, and both longer working hours and two or three shift operation are in effect. Still, however, the production program has called for, and will continue to call for, additional subcontracting in order to expedite deliveries.

"The types of work we are anxious to subcontract include: designing and making tools, dies, jigs, fixtures; making screw machine parts, metal stampings, wood and metal patterns, forgings castings (cast iron, steel, aluminum and other nonferrous metals) and gears of all sizes and types. We also have miscellaneous machine work such as shaft turning, horizontal and vertical boring, planing, broaching, milling, grinding, drilling, and tapping; electroplating; medium and heavy sheet-metal fabricating by the arc—, atomic hydrogen—, or resistance-welding process; and subassembly work.

"By this time many manufacturers are familiar with the very close tolerances required by the Army and Navy as well as the less precise requirements of miscellaneous machine work, and no doubt some of these have the facilities to take on additional work."

General Electric is seeking qualified subcontractors both by circular letters and advertising in trade publications. These ask that all replies be addressed to Purchasing Department, Room 133, General Electric, Schenectady, N. Y.; stating the types and quantities of work which applicants are fitted to undertake, together with tolerances that can be held on a production basis.

WITH THE COLORS

The following employees have entered the military service of the United States under the Selective Training and Service Act, and have been given advantage of the provisions made by the General Electric Company which include a year's leave of absence, plus a 40-day period for re-employment and one month's full pay for those employees who have one year or more of continuous service.

VERNE DeLOYD MARBAUGH, General Purpose Fr. H. P. Motor, selective service. Residence, 309 East Masterson Avenue.

MONROE BEACK FUHRMAN, Decatur Works, selective service. Residence, Decatur.

PATRICK PAUL MURPHY, Decatur Works, selective service. Residence, Decatur.

LOWELL BERNARD NOLL, Decatur Works, selective service. Residence, Pleasant Mills.

ALBERT LOUIS NIEMOLLER, Refrigeration Division, reserve officer in Coast Artillery. Residence, Y.M.C.A.

HARRY ROBERT HEDGLIN, Bldg. 4-3, selective service. Residence, 811 West Washington.

ROBERT WALTER KNOCHE, General Purpose Fr. H.P. Motor, selective service. Residence, 2803 Abbott Street.

Funny Pans By Day Speak For New Radio

The facile and funny pen of Robert Day, cartoonist of "New Yorker" fame, has been mobilized by General Electric to highspot the announcements of the new G-E self-charging battery portable radio currently running in national magazines of special character during the warm weather months. The publications being used include Field and Stream, Yachting, Motorboating, and Boys Life, and have been picked by Harry Deines, G-E radio advertising manager, because of the associations they hold for their readership.

The new receiver, billed as the "most practical" of portables because it employs a rechargeable airplane type storage battery for power supply instead of the usual dry cells, will play from 15 to 20 hours on its battery charge alone, can be plugged into an AC outlet and still be enjoyed while the battery is being recharged, or can be recharged quickly by just plugging in. It can also be renewed from an automobile battery by means of a special cable connection. These features make the set a natural for hunters, fishermen, Boy Scouts, motorists, and other recreation-hunters.

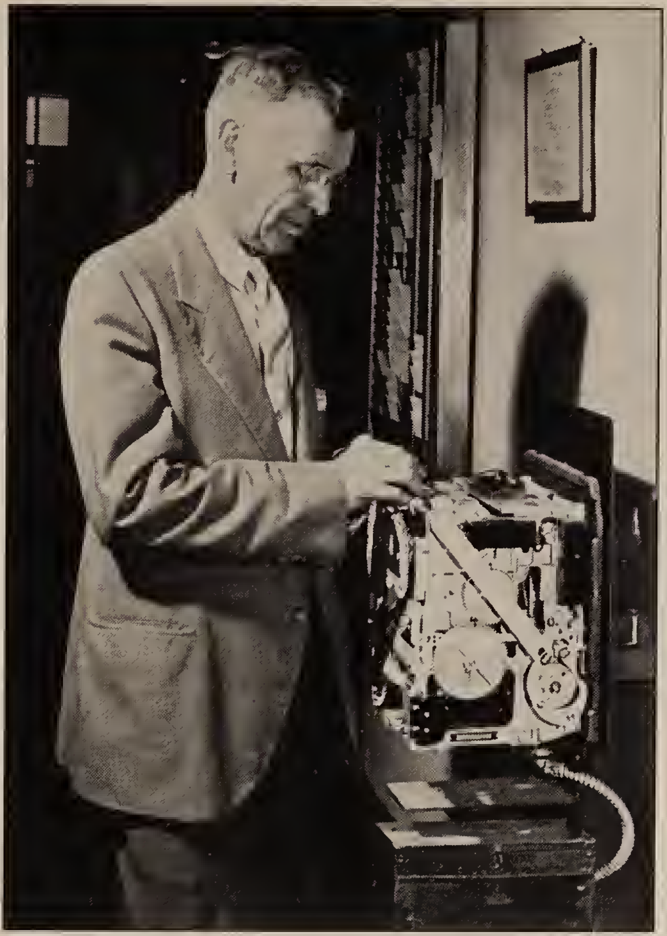
In Boys Life in May and June, Day's cartoons depict small fry around campfires, flanked by numerous wild life, and confined to tents during a downpour, while in Field and Stream for the same months fishermen and hunters cast aside rods, nets, guns, and decoys as regiments of trout and ducks advance upon them voluntarily. The two nautical magazines have Day cartoon ads depicting the effect of the new type of receiver on schools of mermaids and assorted harbor craft. Other copy in the same vein will carry through August according to present plans. This is in addition to the regular G-E radio advertising in Life, Look, and Saturday Evening Post, which carried announcements of the new receiver, bringing national magazines used to seven.

The trade announcements on the self-charging portable led off with a series in Retailing-Home Furnishing, consisting of three insertions spaced a week apart and beginning April 28. Trade copy emphasized the national magazine advertising to follow and the exclusive features of the new set which are not found in conventional portables. Other trade magazines carrying announcements on this model are: Radio & Television Journal, Radio Today, Radio Retailing and Radio & Television Weekly.

Most attractive of the special window displays on this receiver is one in eight colors which displays both front and back of the actual set, with the plastic storage battery case and charge indicator plainly marked. Copy stresses "no dry batteries to buy" and "self-charging."

SAFETY'S REWARD
for CAREFUL MEN:
A FULL LIFE SPAN
of 3-SCORE, TEN!

Familiar Works Figure Retires



Joe H. Fox, who in the course of his duties as telephone and control service maintenance man, has become a familiar figure throughout the Fort Wayne Works, retired this week on pension after completing twenty-eight years of service.

Joe began his service in April, 1913, when the headquarters for the telephone and control service maintenance department was in the basement of Bldg. 16. Later it was moved to Bldg. 18-B and finally to Bldg. 20-2 when the automatic telephone service was installed in 1925.

Joe began "shooting" clock trouble on the first time recorders installed in the Works in 1913. He has always been an ardent safety man and served for years as secretary and vice-chairman of the General Service safety committee.

The members of Joe's department gathered at his home, 311 West Superior Street on Thursday evening and surprised him with an elaborately engraved smoking set. On Friday noon members of the General Service Division held an informal reception for Joe and presented him with a G. E. Radio. In the evening the group held a "Joe Fox" party at the Turner Hall.

OUT OF THE PAST

From the February, 1922, issue of the WORKS NEWS.

Herbert Wilding has been selected as chairman for the G-E A. A. dance to be held at Minuet Hall.

Howard Miller gave a talk on the testing laboratory at the annual meeting of the Apprentice Alumni Association. Newly elected officers are N. F. Ehinger, president; R. Beal, vice-president; H. F. Braun, secretary-treasurer, and H. Klingenberger, M. Glenn, C. F. Roemke and L. Wellbaum, directors.

The G-E Band held its annual banquet in Bldg. 16-2, with Jim Sivits in charge of the cuisine. Toastmaster was Perry Shober, and talks were given by William Doan, past president; Louis Schroeder, business manager; John Verweire, director, and E. A. Barnes.

George Platts and Richard Engleking are new members of the Quarter Century Club.

The Production Club met this week in Bldg. 16-2. O. B. Rinehart acted as toastmaster and a talk was given by J. J. Kline.

Memorial Program

(Continued from Page 1)

the direction of the World War Veterans Association. J. L. James, Bldg. 4-3, is general chairman and Carl Bobay, Winter Street and Jacob Sappington, Bldg. 4-B, are members of the general committee. A. R. Vegalues is chairman of the speakers committee with Robert Loveland, Bldg. 19-5 and Elmer Hauck, Bldg. 18-2, as members of the committee. The color guard and firing squad committee includes Carl Rehling, Wm. Smith and Louis Witte with Mr. Rehling chairman. H. L. Smith, Bldg. 21, and Howard Orr, Bldg. 28-2 are members of the publicity committee.

Six Die In Service

Six Fort Wayne Works employees died in the service during the World War. They are Cleo M. Woods, who died in training at Camp Green; Walter L. Hibbins, who died at Camp Hancock; Roy Maxson, killed in action in the Battle of the Argonne; William R. Hilgeman, who died at the Great Lakes Naval Training Station; Harold T. Adams, who died at Fortress Monroe and Daniel B. Slentz, who died of wounds received in action on the Western Front.

Associated Press Correspondent Features Wilson Identity Crisis

Gives Interesting Story On General Electric And General Motors Presidents

Charles E. Harner, Associated Press feature writer, recently summed up the facts concerning the identity crisis which resulted from the near simultaneous selection of Charles E. Wilson to be president of the General Electric Company and Charles E. Wilson to be president of General Motors Corporation. Readers of the WORKS NEWS are of course familiar with the story but Mr. Harner brings out some further interesting points about the careers of the two men.

The story as published under New York date line follows:

"For the benefit of people who confuse easily, let it be stated that this will end, once and for all, (we hope) the national industrial bottleneck over the identity of Charles E. Wilson, president of General Electric, or president of General Motors, as the case may be.

"Some there are, among the more flippant, who for a full year have obfuscated the public on this subject. The facts are these:

"Charles E. Wilson is president of General Motors and Charles E. Wilson (no relation) is president of General Electric (also no relation).

"The identity crisis developed last year when the boards of directors of the two giant companies did severally and separately, without paying any attention to each other, each elect a man named Charles E. Wilson to its respective presidency, domiciling the same in New York.

They're Friends

"But the General Electric and Motors are no competitors and the two Wilsons are friends, so they exchange their various receipts of misdirected letters and telegrams without friction, although it gives mailmen and messengers a lot of extra work.

"It might be much simpler if the General Motors head would sign himself Charles Erwin Wilson and if General Electric's chief would specify himself as Charles Edward Wilson. Those are, after all, their baptismal handles and easy to spell.

"But then there's also the Charles E. Wilson who is a vice president of Worthington Pump & Machinery Corp., and something of an industrial success himself. He never signs his name Charles Eben Wilson, although he has a perfect right so to do.

"Briefly, the two Generals Wilson may be distinguished by the following traits and histories:

How They Differ

"Wilson of Motors, medium sized, white-haired, and 50 years old, is a small town boy who made good. Wilson of Electric, six feet two, weighing 210 pounds, brown-haired, and 54 years old, is a New Yorker who made good even though born here.

"Motors Wilson started out July 18, 1890, in Minerva, Ohio, and entered industry when he was 19 years old by way of Carnegie Institute of Technology which gave him a degree in electrical engineering in 1909. His first job was that of student apprentice in Westinghouse Electric & Manufacturing Company. Ten years with that firm and he joined General Motors.

"Electric Wilson began life November 18, 1886, right on Manhattan island and went to work when he was 12 as an office boy for Sprague Electric Company. He has been with that firm ever since, for Sprague early became an integral part of General Electric. Until last June, when three colleges awarded him honorary degrees simultaneously, he never owned a school diploma. The men with whom he learned the business still call him "Charlie" when he visits around the plants (including the Bridgeport Works where he was located before becoming president).

Both Indulge in Athletics

"Both the Wilsons run their personal work days to 12 and 18 hours when under pressure and each relaxes with strenuous athletics.

"Motors' Wilson keeps a stable of thoroughbreds and rides in hunts. His chief worry today is that a broken hip, suffered while ice skating two weeks ago, may curb future hell-for-leather riding.

"Electric Wilson has given up boxing, but indulges in three-hour sessions of handball. He likes deep sea fishing and recently bowled a 299 game (a 300 would have put him in bowling's hall of fame) at his Scarsdale, N. Y. club.

"Motors' Wilson has a wife, six children and two granddaughters. Electric Wilson is married but childless."

A New Use

(Continued from Page 1)

a heavy flow of water—approximately 25,000 gallons per minute at first, and then around 10,000 gallons per minute. This water caused some commutation difficulties by getting inside the motor housings.

In order to circumvent this difficulty, the contractor made up a steel frame using 10-inch I-beams. This was mounted on top of the locomotive, with the battery on top of this. In addition, he raised the motors by rotating the motor and gear assembly around the shafts of the locomotives and extending the links that hold the outer ends of the motors to an upward position, rather than a downward position. This resulted in the motors having a ten-inch clearance above the rails, rather than their former three-inch clearance. Even with these innovations, however, there was trouble from the water getting into the motors.

S. J. Kester of the Denver Office of the General Electric Company suggested the use of a small air compressor, piped to each of the motor casings to give a positive pressure on the inside of the motor. Since no compressors were available, a vacuum cleaner was connected by means of a one-inch air hose to one end of each of the two motors. The locomotive then worked in the tunnel with perfect results.

NEWS THROUGH THE PLANTS

SANDY SAYS

"They laughed when I sat down, but when I began to play . . . ," and how we have laughed at the various comic versions of this statement o' accomplishment. We didn't laugh, though, at the extreme self-confidence of the young man who wasn't afraid of the jeers of his friends.

Ye might say that he had a lot of nerve. Weel, nerve or self-confidence, or whatever ye call it, he had it. If my Uncle Douglass, in Scotland, could read this, he'd probably send me a cable, (collect), that the Scotch version o' it is now, "They laughed when I sat down . . . but when I began to fold up my parachute . . . ."

But we started to talk about self-confidence, which ye must think I've got a lot of to keep on writing this stuff, anyway. Weel, for instance, Robert Fulton had a lot. He struggled for years to raise money to build the "Claremont", and then had to "take" all the jeers and hoots o' the dudes along the waterfront when he steamed her up for her maiden voyage.

We could also talk about Edison, Ford, Charles E. Coffin, J. J. Wood, Gus Kayser, and others too numerous to mention. One big lesson we could learn, even without going to night school, from all these men is that to have self-confidence, ye must have something on the ball. Here's how. First, be sure ye have something good. Second, check it, test it, and improve it till ye KNOW it's O. K. Then you'll have no trouble in pushing it, and you'll have all the self-confidence in the world.

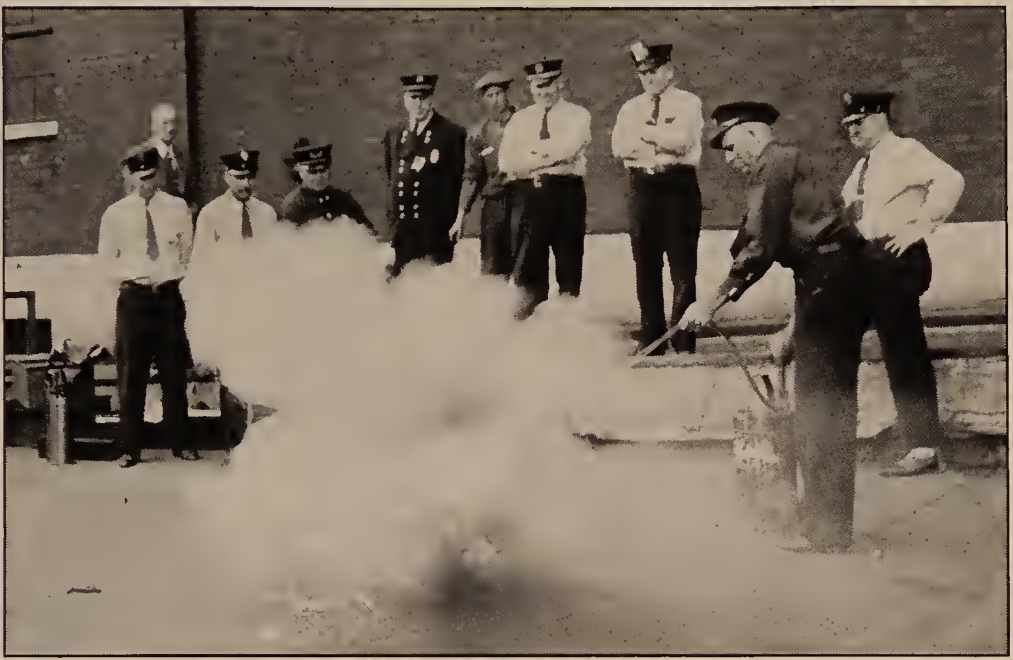
In fact, I'm beginning to think even my relatives are showing more self-confidence than they used to. Here, just the other day, a new one shows up with his Scotch uncanny bargaining powers. So Uncle Robert McLoveland is getting serious about a new car. It reminds me o' Cousin Colin when he bought his model T. I never saw a car with such Scotch springs, (they won't give) and such hard seats. And such a low price.

Ah Yus, Colin drives a HARD BARGAIN.

We have all noticed that Alma Ladig, Bldg. 4-3, has gone back on her Pepsi Cola diet. Nothing like keeping your girlish figure, Alma.

Dorothy Goshorn, Bldg. 4-3, has been doing some interior decorating in her home, but it seems as though she got the turpentine misplaced. Just ask Dorothy, or maybe the cat could tell you what she did with it.

Demonstrations For Safety In Handling Magnesium



Although used here for a considerable period, the increased use of magnesium, commonly called "Dow Metal" is proving of considerable interest. The metal has peculiar characteristics in that smaller "shavings" are easily ignited and burn with intense heat and during the burning crackle and spurt endangering a considerable area. One fire which fortunately did little damage was started by magnesium shavings recently in Bldg. 26-5.

Under the direction of George Doehla, fire and patrol chief, a number of demonstrations for both employees and members of the city fire department have been held during the past weeks. In the above picture a member of the Plant Protection Department is shown extinguishing a magnesium fire before a group of city firemen from the No. 1 engine house.

It is pointed out that employees who are required to machine or otherwise handle magnesium castings have been furnished information as to safe practice by their foremen. Persons who are not familiar with the safety rules governing the use of Dow metal should not machine, grind or handle Dow metal in any form.

Hermetic Office 17-2

If you've noticed "Pop" Castle looking thin and overworked it's because he had to harvest the crop of hay he grew in the front yard of his lake cottage. He did it all by himself too. . . . The turkey dinner the girls in the office had Saturday might be called "Thanksgiving"—Remember the raise? . . . Pennies from heaven wasn't the reason George Hahn had four waste paper baskets on his desk, just a leak in the ceiling. . . . Isn't the telephone a wonderful invention? It saves Bob Wefel four and one-half steps when he wants to talk to Castle. . . . From George Langenberg we get another broken promise. Seems to us the production department is slipping again. For some time we've been looking for some carmel corn but so far George has come empty handed every morning. He always has a different excuse, and this time—imagine it—it's housecleaning.

Suzy Sleuth.

Sunbeams From 17-4

The men in Bldg. 17-4 are really giving the girls the old ha ha, now that they have nice new benches to sit on and smoke.

Gladys Balyeat says that just because she gets low score in casting is no sign she doesn't practice, in fact we hear that she was fishing in her cherry tree the other night.

Mabel Vizard has named July 28th as the day for her walk up the aisle, and we all wish her lots of luck.

There is just no holding Bess Geller down, for this week the boy friend is home from camp and we are all helping Bess celebrate.

(Whitey) Whitehurst just naturally likes pumping up his auto tires, or does he?

Thought for the week:

Tain't what we have, but what we give
Tain't where we are, but how we live
Tain't what we do, but how we do it
That makes this life worth going through it.

Granny.

A Most Embarrassing Moment

Last Friday noon Paul Horstmeyer, Bldg. 4-6, and Max Tritch, Bldg. 4-6, ate lunch together. After they had eaten their lunch, they found that they did not have enough money to pay for it. Although they had their checks, they did not have enough cash to pay for at least one meal. Paul had to give his wrist watch and Max his rain coat as security.

Everyone is wondering what has happened to those famous "Butterscotch Pies" Alice Pfleuger's, Bldg. 4-3, husband bakes. We haven't heard her bragging about them lately.

G.E. Employees At Camp Shelby, Miss.

ing exercise. Third picture—Lieutenant Donald R. Thompson, command-officer 3rd Bn. Hq. detachment. The picture shows the effects of a cold bite of ice cream. Lieutenant Thompson was officer of the day when the picture was made, which accounts for the fact that he is wearing a hat. Fourth picture; Corporal Wm. Kronk, hand 152nd Inf. Fifth picture—Privates Vern Edrington, Monroe Fuhrman and Darrell Klinker, all new recruits to Co. I, 152nd Inf. The picture was taken in front of the orderly tent.

Bottom row—Lieutenant Vern Pray behind the bar of "Pray's Honkey Tonk." Second picture—Private George Knoll, a new recruit assigned to the medical detachment is shown reading the Company bulletin board. Third picture—Private First Class Walter Clendenen, armorer Company M is shown doing repair work on a Browning automatic rifle. Fourth picture—Private Alvin W. Cofer, recruit in Co. M seems to have had a satisfactory meal even though it means washing his mess gear. A section of the mess hall where 201 men eat three times a day is shown in the hackground.

From The Feminine Viewpoint

By Irene Perry and Hilda Barthold

Whenever we think of the early days of the United States, we inevitably recall a certain woman's name. She has a birthday this month, and to whom do we refer? Why to Dolly Madison, of course. And why is she remembered, not because of beauty, for according to our modern standards Dolly wasn't very pretty, nor for her learning. Dolly liked to be found with the latest work of literature, but whether she was well-read is debatable. Dolly Madison is remembered above all things, for her charm.

Dolly Madison was born Dorothea Payne, and was married to John Todd of Philadelphia when a young woman. Within a few short years she was left a widow with one little son, and it was while she lived quietly with her mother that James Madison saw her and asked to be presented. They were married after a brief courtship and were supremely happy. She called him Jemmy and he called her Dolly.

James Madison was Secretary of State during the administrations of Thomas Jefferson, and as Jefferson was a widower Dolly Madison was his official hostess. She brought to official Washington a delightful social life and was known far and wide for the elegance of her dress. It is said that she never forgot a name or the face of a person who had been presented to her, and this of course added to her popularity.

Dolly Madison is credited with the invention, or at any rate the introduction into the United States, of ice cream. We feel that she should be remembered for this, even if all her other accomplishments were forgotten.

Dolly proved herself something of a heroine during the War of 1812 when Washington was invaded by the British, she remained at the White House directing the servants in packing and sending to safety official documents, and delayed so long having the portrait of George Washington removed from its frame and sent to a place of safety that the gentleman who impatiently waited to escort her from the city is said to have told her exasperatedly "to put on your bonnet, Mrs. Madison, and stop talking!"

Dolly Madison lived to be an old lady, and for many years through many administrations it was the custom for the great folk of the country, after paying their respects to the President of the United States on New Years Day, to cross the square to the small house where Mrs. Madison lived during her latter years and greet her.

Possibly the world wasn't better for Dolly Madison having lived in it, but certainly it was a pleasanter place while she lived.

There is a deep mystery within the confines of the small lot section on Bldg. 4-3. Margaret Ray and Helen Lord are very much incensed over the fact that their lunch hour has been changed. We overheard them saying that now they would not be able to make their usuat noon hour contacts. We are wondering what these contacts are. Won't you please enlighten us girls?

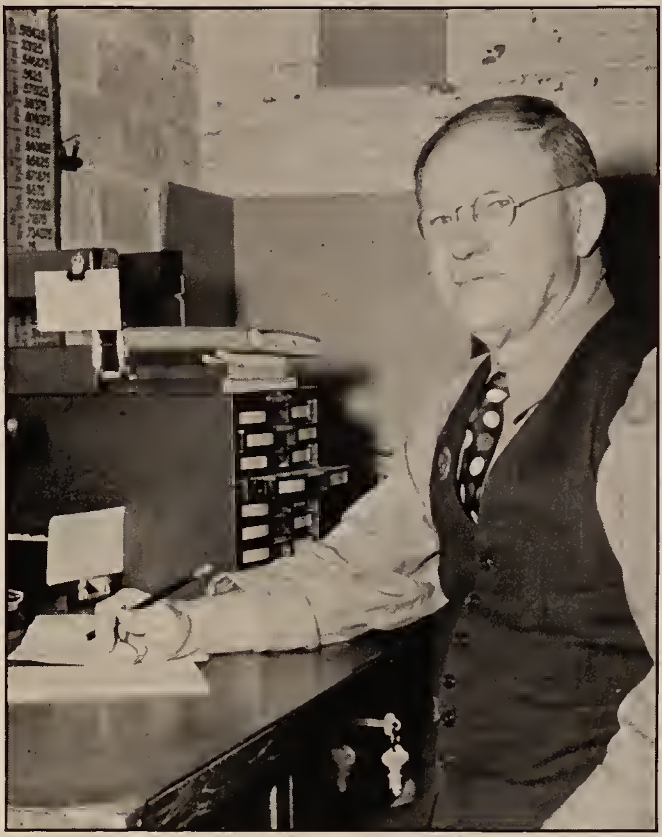
»» NEWS THROUGH THE PLANTS ««

Borings From 4-4 Office

'Tis another week and almost too hot to work, let alone write for the WORKS NEWS. My mental condition isn't so hot either, so before I get that low-down feeling, I'll try to express some of my unspoken thoughts. . . . Believe it or not, but we now have with us another product from Purdue — Wilma Robb. Now Mike Brayer won't feel so badly 'cause now he can talk to some one from his own Alma Mater, and to think they run me down because I went to good old Indiana. . . . Last Friday afternoon at almost the close of the day we thought the southwest corner of our office was falling through. However, after a careful examination, we found Cliff Uncapher on the floor. His chair leg slid right out from under him—Ca'bang. (The author wishes to express this is the second time in a week that this happend, and thanks to Ike Brayer, he really fixed it) . . . Pauline Young received a letter from Fort Pine, New York — and a picture too. Do you suppose that is where her one and only draftee is? . . . Vacations are coming up, but I think I'll take mine over the weed-ends. Next week will find me in St. Paul, Minn., where I'll see my little Swede. Esther is going to shuffle off to Buffalo the same week-end . . . I just wonder when the girls in Bldg. 4-4 Office are going to wear shorts and slacks. You know, start something different. LaVon Price came to work the other day decked out in a new ruffle blouse. I bet it would be a swell thing to wash and iron. It looks very nice, and may I say chic. . . . Estel Grier was found using a girls compact the other night, and was caught using it. Now they say about girls, "Vanity all is Vanity." Now what about it Estel? . . . Mike O'Grady is dressed for the summer. Pants rolled up to his knees, no tie, and certainly looks cool. Maybe I should try that. Perhaps if he would open the windows, since he is in the drafting department, he wouldn't have to go around the way he is. . . . Bob Klingel is in the dog house. . . . Ask Cliff Bowman about raising gourds. It seems that one buys a quarter's worth of gourd seeds and $6.50 worth of trellis. . . . Virginia Plummer has spent part of her vacation in Kentucky already. Ask her for personal details. . . . Jean Bugert is getting along just fine at St. Joseph's Hospital and will be home sometime in the next couple of days. . . . Well, 'tis plenty for now, so will next hear from me when I am in Minnesota. Sincerely as ever,

Elmer, the Field Mouse,
with the Help of Minnie.
(The Rat to You.)

C. A. Schweizer Retires



Charles A. Schweizer, an employee for the last twenty-seven and a half years, has retired on pension. Mr. Schweizer joined the General Electric organization in 1913, coming here from the Yale & Towne Manufacturing Company. He was employed as a stock record clerk in the old frame receiving department, which was then headed by George Anderson. In 1916 he was transferred to Bldg. 6-2 in charge of the R. C. office. The following year he was placed in the Order and Stores Department in Bldg. 18 and was placed in charge of ordering and following up raw materials such as brass, copper, steel and wire.

In 1936 Mr. Schweizer was transferred to the Stationery Department and he continued in this department to the time of his retirement. He was engaged during his entire period of service under the supervision of the Order and Stores Department, originally under R. F. Harding and in later years under N. S. Tilman.

To The Question Mark

Yeah, it's so! We will all miss the interesting column in our WORKS NEWS covering the happenings in Bldg. 17-1 which has been headed "Is Zat So" and signed "The Question Mark." We are all in hopes that you will be back with us again soon. Undoubtedly, Mr. Question Mark, you derived just as much pleasure out of writing the happenings as we found in reading them.

So hurry back, we all want you with us again, and as Jimmie Fidler says on the radio "We do mean you."

Keith Benward, Bldg. 26-2, is getting a reputation as the life of the party with the people on the smoking bench during the noon hour. Just one laugh after another. Look him up girls if you feel in the dumps.

The girls of Bldg. 26-2, are glad to have Bessie Chapman back again after her absence due to illness.

Hilda Benzinger, Bldg. 26-2, was married to Donald Rebber of New Haven on May 18.

Julia Schumann, Bldg. 26-2, is a bride of May 10. She is now Mrs. Harry Heuer.

Famous last words: Velma Meads, Bldg. 26-2, "Don't put it in the WORKS NEWS."

Slips And Chips

By Sir Vis. 4-4

We have but one more week of this beautiful month to enjoy. It has been so much like a banquet dinner to me. First a Derby Cocktail, followed by the main plate filled with sunshine, flowers, birds singing, and a dash of chilliness. Concluding the dinner with the choicest of desserts, mementos or the speed classic. What a perfect dinner for the budding of romance which, in many cases, will become permanent in June. . . . The speed classic draws considerable attention, and because of the defense work, E. A. Martin did not get to Indianapolis for the tryouts. However, Ed made his own trial run last Monday morning when he forgot his badge. What was your clocked speed Ed? . . . As Ewald was speeding out for lunch, he grabbed a coat from the hanger and continued to the elevator. While waiting for the elevator, he discovered the coat not only didn't fit, it didn't match his trousers. . . . From a very reliable source I learned that Mildred Brown has pet cats. Al, maybe you can arrange a party for yours and Mildred's cats. . . . Louie Hinen came to work a week or so ago with a shiner. He guarded it very carefully so that I wouldn't know about it. Today the story came out that he was building a fire and a little innocent piece of wood struck him in the eye. I personally believe he was talking when he should have been listening. . . . Mr. and Mrs. Arthur (Breezy) Stoll have adopted an addition to the family. This new member to the Stoll household is a toy terrier and Breezy is the chambermaid for it. . . . Walter Habelet, a champion in the making. Yes, Walter is going to play soft ball under the personal direction of "the great one." "The one and only Weber." We'll always remember you Walter. . . . You have all heard of many different concoctions used in sandwiches, but did you ever hear of soaking the bun in beer. Marie Wickleman with a friend decided to stop in a tavern for a sandwich and a bottle of beer. Having been served the sandwiches and beer, Marie (busily talking) picked up what she thought to be catsup and poured it on the sandwich.

Can you imagine any girl running around with a new diamond just waiting for the girls to notice it instead of showing it to them? Congratulations Betty Snook, Bldg. 18-2, and we will watch a little closer from now on for the mate.

Most any day now we can expect to hear further news on the party for the reporters from Bill Rohe. He must have the signs nearly posted by this time giving directions.

Sleuthing In 4-6

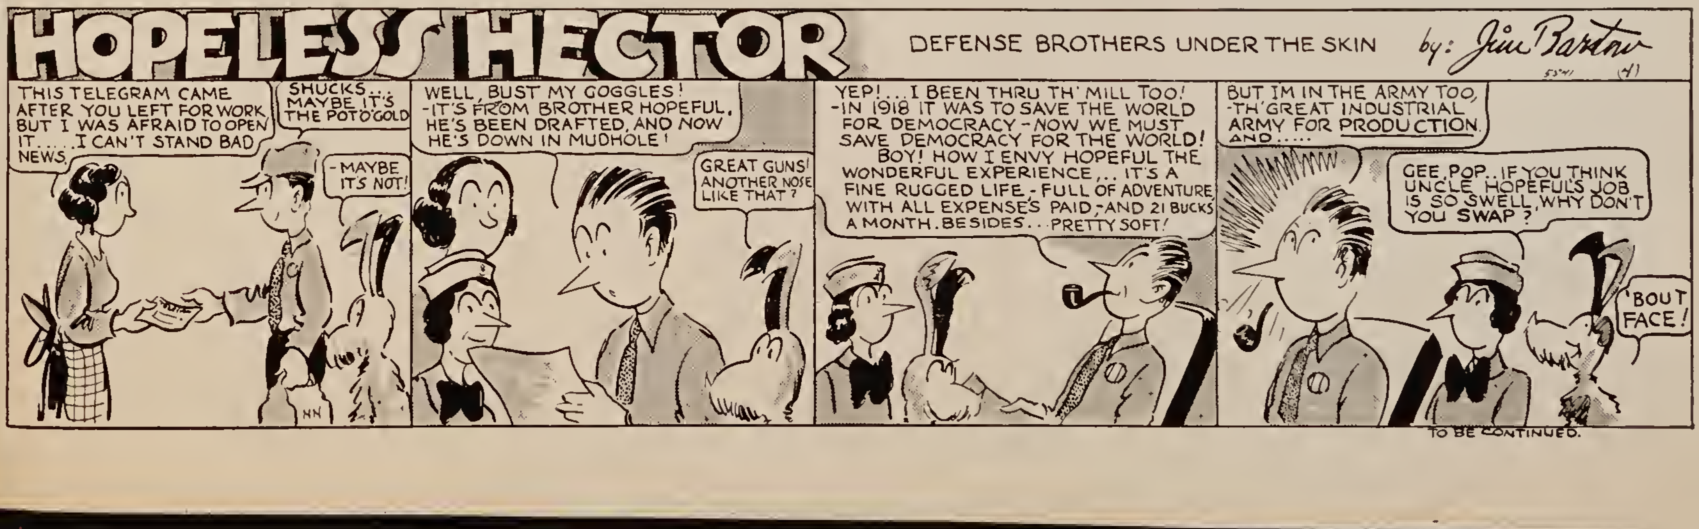
We are happy to welcome our Wilma McKay back to the happy hunting ground of Bldg. 4-6. . . . If you want to know how a goldfish singing would sound, contact Glen Seabold and ask for a demonstration. . . . Jack Cockran is as proud as anyone these days. He brought pictures of his baby girl to work and will show them to anyone who is the least bit interested. (She really does look cute, Jack). . . . A party was held May 14th at the Hotel Keenan in honor of Mary Heilig, whose marriage to Paul Gimmell was solemnized May 17th at St. Peter's Church. She was presented with a corsage and two lovely gifts. To the bride and groom, we extend our best wishes for many years of happiness together. . . . Looking at Dwight Willits Monday, your sleuthing reporter thought he certainly looked like he plowed one of his "square grounds." . . . Spring is here and Elsie "Daisy Mae" Swank is getting absent minded. She forgot to put the cap on her bottle of hand lotion when she put it in her purse. Her purse is now " the skin you love to touch." . . . All that was lacking in the back rows of the Small Lot Section to have a real "Kid Day" was short pants, hair ribbons, short dresses, teddy bears and dolls. The gang, Lloyd Grodrian, Bruce Curley, Helen Forst, Virginia Whipple and Al Willits reverted to childhood and ate lollypops.

The Sleuth.

Bldg. 4-4

It was very easy one night last week for the winders to find Clarence Gladieux. He was wearing Pinx perfume which he loves very much. . . . It is said that Betty Beery (Queen Elizabeth) has been supplying the WC winders with some very interesting reading matter of late. . . . Phyllis (Mammy) Tyndall wears that head scarf so often that some people are under the impression her hair is blue. . . . Martha Johnson was seen recently indulging in a game of pick up. (Those wedges are so easily spilled). . . . Bonnie Jetmore has announced that she is going to wear a bright red slack suit. Just call her Scarlett O'Jetmore in the future. . . . Bldg. 4-4 workers wish to extend their sympathy and good wishes to Grace Nichols who was formerly on this floor. Grace is now a patient at the St. Joseph's Hospital recovering from a leg injury. . . . Anyone wishing to order a new flower box see Zella Sheehan. Zella has taken up the carpenter's trade in her spare time.

Roy Dierstein, Bldg. 26-2, thinks Ray Kierspe's jokes are becoming quite mousey.



HOPELESS HECTOR
DEFENSE BROTHERS UNDER THE SKIN
by: Jim Barton
5-3-41 (4)
THIS TELEGRAM CAME AFTER YOU LEFT FOR WORK BUT I WAS AFRAID TO OPEN IT.....I CAN'T STAND BAD NEWS.
SHUCKS... MAYBE IT'S THE POT O'GOLD
- MAYBE IT'S NOT!
WELL, BUST MY GOGGLES! -IT'S FROM BROTHER HOPEFUL. HE'S BEEN DRAFTED, AND NOW HE'S DOWN IN MUDHOLE!
GREAT GUNS! ANOTHER NOSE LIKE THAT?
YEP!...I BEEN THRU TH' MILL TOO! -IN 1918 IT WAS TO SAVE THE WORLD FOR DEMOCRACY - NOW WE MUST SAVE DEMOCRACY FOR THE WORLD! BOY! HOW I ENVY HOPEFUL THE WONDERFUL EXPERIENCE,.. IT'S A FINE RUGGED LIFE - FULL OF ADVENTURE WITH ALL EXPENSE'S PAID - AND 21 BUCKS A MONTH. BESIDES... PRETTY SOFT!
BUT IM IN THE ARMY TOO, -TH' GREAT INDUSTRIAL ARMY FOR PRODUCTION. AND.....
GEE, POP.. IF YOU THINK UNCLE HOPEFUL'S JOB IS SO SWELL, WHY DON'T YOU SWAP?
'BOUT FACE!

Motor Generator Static

"Peep Before You Leap"

Just as a warning, this story is printed, no names are mentioned —if you care to guess, that's OK. One of the young girls in Bldg. 19-3 office worked overtime recently and expected her brother to come after her as was his usual custom. Now this young lady is very shy (which is why she blushes so charmingly) (blushes do go very nice with blond hair) but to go on with the story—This young lady saw what she thought was her brother's car out in front of the works, so opening the door she accompanied it with this remark, "Going to take me along?" Then, horrors, she saw a total stranger was the driver.

Out heroine was so flustered she forgot about her brother coming and took a street car home.

As at the start we say, "Peep before you leap."

"Double Cross"

Dick Gentis and Bob Hagerman, gay young blades of Bldg. 19-3 are really peeved at Bob Hawkins, Bldg. 19-1. It seems Bob had set himself up as a dyed in the wool bachelor, and after explaining the error in seeing girls as wasting time and money going places with them, finally won the boys to his proposition, that men should lead a life far removed from feminine wiles, a sort of male paradise.

Imagine their surprise when he was suddenly smitten and had four dates in one week. Disheartening, they claims.

"Hot Stuff"

The other day Donald Fisher, son of the famous "Dagwood" Fisher of Bldg. 19-3, upon arising from a sound night's sleep, turned on the cold water faucet to get his early morning drink, but instead of water, he was greeted by a cloud of steam. He hurriedly awakened his dad, who after some profound meditation arrived at the conclusion, that he (Dagwood) had left the water heater on all night.

After the gas was shut off and all faucets opened, Fisher's residence resembled a Turkish bath for the next four hours. "Dagwood" confided to a friend that the family lost from two to seven pounds per person due to the steam treatment or a total of twenty-eight pounds. "Hot Stuff" he sez.

"How to Shave" by Walter Histed

"Put soap on face, rub, rub razor on one side, then wipe off. Come to work with half face shaved." It gives the impression of "school girl complexion" on one side and "nature in the raw" on the other. Almost two faces.

Heard in Bldg. 19-3 . . .

Walter Histed—"Hope you don't hear about . . . "

Lavern Engelbrecht—"Don't give me that line."

Vic Rump—"Say mister."

H. S. Garton—"Well."

Gerry Michaels — "How much this month?"

Margie Oddou—"It was only a corner."

Mary Thornberg — "Now what could this be?"

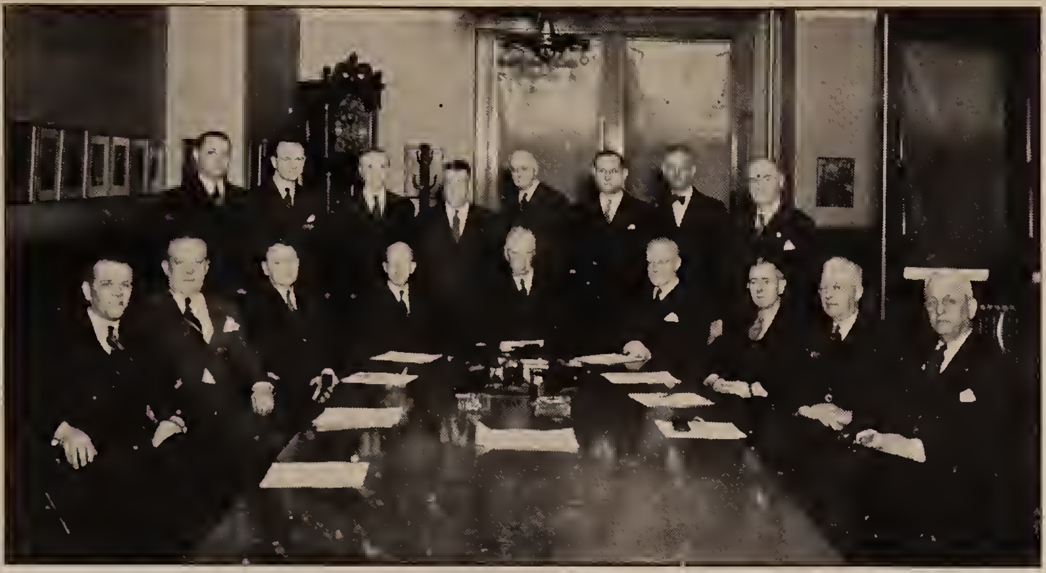
Boyd Fisher—"Wait, Wait."

John Rogers—"Not necessarily."

Saying of the week, by Jerry Frye, Bldg. 19-3: "A sit down strike is when the batter swings at a ball and falls down."

Clara Zemper, Bldg. 4-3, is very much interested in the new equipment installed on Viola Grover's bench, also the manipulation of same. She was very much put out when a shield was installed between her and said bench. She is planning on getting a periscope so as to be able to continue to watch the operation of this equipment.

G-E Employees Securities Corporation Officials



Officials elected at the recent meeting of the G. E. Employees Securities Corporation are shown above. They are:

Seated, left to right: O. E. Carlson, Bridgeport; J. L. Lee, Jr., Bloomfield; G. G. Calvert, vice-president, Lynn River; W. O. Hay, Jr., president; C. N. Mason, chairman of the board; J. W. Lewis, treasurer; W. M. Grady, West Lynn; J. L. Preo, Philadelphia Works and C. W. Matthews, vice-president, Schenectady.

Standing, left to right: H. R. Munro, Erie; E. G. Kinlock, O. M. Corrigan; L. W. Osborn, vice-president and assistant secretary; C. P. Hamilton, vice-president; E. G. Sauerwein, Fort Wayne; F. O. Reinhart, assistant treasurer and secretary and D. E. Peck.

News On The Nose From 4-5

It's more fun when the circus comes to town. . . . Mamie Allen enjoyed herself immensely. Especially when one of the clowns put his arms around her—she said he was dusting her chair. . . . Ed Gephart wasn't too dignified to have a good time either. . . . Maybe we shouldn't tell this one but a frequent visitor on Bldg. 4-5, Henry Raehling from the Bldg. 4-6 Engineering Department had as great a time as his small grandson whom he took to the big show. . . . Floyd Saylor is a proud papa these days. His little daughter Gloria took second place in a baby contest with 188 other children competing. . . . Chuckle of the week: Irv Koehlinger in a telephone conversation last week when the power went off. "Hold the line just a minute, I can't see to talk!" . . . We wonder why Jeanette Saunders blushed so rosily when Mark Staker asked her to tend bar at his stag party. But we're beginning to think he was kidding for he made the rounds of the Bldg. 4-5 office and even went over to Bldg. 6-4 and asked that cute little red-head, er-uh, blonde, Virginia McCormick. Incidentally, Ginny is the only one who insists she doesn't have red hair. . . . Helen Rumbaugh is happily displaying a diamond on her "third finger, left hand" as is Regina Krasienko. And Lula Badle became Mrs. Frank McCague over last week-end. . . . Leo Nyboer, Bldg. 4-5 and Jim Mitchell, Bldg. 26-5, have been wondering when Jessie Filler is going to have them over for the oyster stew she has been promising them for a year and a half. Big oysters from little fellows grow, boys—just be patient. . . . This may not be the place for reminding certain people that there is such a thing as telephone courtesy, but our pet-peeve is to inform certain people that they are wanted on the telephone and then have them either forget to call or to ignore it so long the other person hangs up. We are all busy, so let's remember that the other fellow may not like to balance a silent 'phone up to his ear some five or ten minutes until you are ready to answer him, or until he realizes you have forgotten the call. Are you a tele-phony?

Winter Street News

Everyone at Winter Street really enjoyed "Frigid Freddies" little dissertation except the Winter Street editor who was, in the vernacular "plenty burned up." He is now taking up a stiff course in journalism and upon graduation will be able to guarantee more and better news each week. Of course, a little cooperation is required, especially from "Frigid Freddie."

The Planning department would like to know if Ed Ehrman is waiting for them to buy him a can of tobacco or if he gets a kick out of just chewing the stem of his pipe. Maybe if he'd hint a little stronger.

Quite a few of Jean Culuus "friends" called her attention to a little slip that was showing. Yessir, she had "gaposis."

Rush Lesh reports that this man's army can't get the best of her. She goes to camp to get her man. She travelled clear to Mississippi to get permanently hitched and is now back in Fort Wayne. The boys believe her, but speaking of cigars—everybody is—whatever happened to those Margaret Stillwell said she had home three weeks ago but forgot to bring in. If she don't hurry the darn things will be too dry to smoke.

Herm Morr sort of lost his composure last Friday. After waiting patiently for the boss to come in, he nonchalantly walks over to get his clock card OK'd and stumbled over a chair on the way. He says the shock temporarily made him lose his alibi. He got it OK'd anyway.

While eating her noon lunch, Gloria Wiebke just couldn't get enough catsup on her sandwich. While gabbing with her friends she blindly reaches out for the catsup, aims it over her bun and lo and behold, she got the Pepsi-Cola. She didn't like it and she couldn't even get a refund.

Short story in two parts:

Part 1: Dorothy Crawford enters office contentedly chawing a healthy bite of candy.

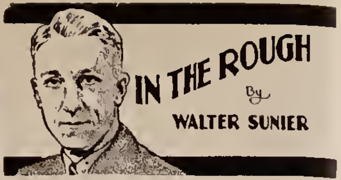
Part 2: All at once, very excited, "Hey! You know what? I forgot to pay for this." Exit Dorothy, chewing very excitedly.

Bldg. 4-4 extends sympathy to Lulu Heine on the death of her brother.

26-5 Tool Bits

Warning. Do not loan Gordon McDougal tools for we learn that he returns the handle only. For verification see Walter Eliot. . . . Plans are progressing nicely for Paul Doell's balcony at the west end of Bldg. 26-5 to give him more head room. Preliminary sketches have been made by various contestants. . . . Elmer Sauerwein was in a daze the other day. He wore someone else's sweater home, and when he got to his car he could not find the keys. After running through his pockets he noticed them in the car with the ignition turned on. He tried the door and found it locked. Problem: How did he get into the car? . . . Dutch Marquette started wearing his pants cuffs almost midway between his knees and his ankles. When he rolled them down to normal he found sugar in his shoes. Volunteers wanted to solve the mystery. . . . Walter Wolf is the latest victim of the Bldg. 26-5 painted heel fad. It wasn't until Walter was ready to leave that he discovered the heels. Frank Hoffman apologized for the culprit but Walter said "That's all right, although I did think everyone was admiring my new spring suit. . . . Herb Menniwisch is in the market for some rhubarb, but you'll have to hurry. . . . Jim Ehrman is sporting a new car but he doesn't use it. He lives so close to work and he's spending lots of driving time at work. . . . Gordon Diver received an emergency call from Mrs. Diver reporting that she was stuck in the country with two flat tires. A little telephoning sent a tire crew to the rescue but the next morning Gordon discovered a third tire flat. Gordon must be making short cuts through alleys. . . . Naturally many of our young blades are itching to ride in Irma Wyneken's new convertible. Irma can certainly afford to be choosey. . . . The Tool Department party held at the Mannerchoir Hall was an outstanding success. Ask those that were there. . . .

Was Delores Loveall, Bldg. 12-B, practicing for a wild west show, or was she pinch hitting for the Lone Ranger? It is reported that Delores was seen galloping over the countryside in true wild west fashion, even scorning the use of a saddle.



IN THE ROUGH

By WALTER SUNIER

Les Didier, Winter Street, sent us an advertisement for a Golfer's Liability Policy. These policies relieve the golfer of financial responsibility in case some one is hit by the golfer's golf club or by a ball driven by him. The cost is $7.70 for three years, in case you are interested. Several insurance companies write this policy.

Since we are not loathe to mention any nice things that are said about us, we also mention the other kind. Ed Misegades, Winter Street, says that he is going to ask Editor Baade to stop the column because it may start him playing golf. Claude Kelly cancelled his subscription to the WORKS NEWS the week we were cartooned. He said one picture a week was bad enough but two were unbearable.

Bob Hanna birdied No. 17 and No. 18 at Brookwood a couple weeks ago when we were playing with him. That is nice poking. He is to be congratulated. Let him have his birdies. We don't care how many he gets. If he wants to get two in a row on the last two holes, let him go ahead and do it. We don't want to stop him. We would like to have had them ourselves but we don't begrudge them to him. If he wants to gang up on his opponents that way on the last two holes, it is all right with us. It is peculiar that a man can be down and then get birdies on the last two holes. More power to him if he can do this. After all it is his game. We hope it doesn't, but perhaps two birdies in a row may puff him up and affect his game —not, of course, that we hope or expect that it will. We know that it would make us over-confident and ruin our game. We are still glad, therefore, that he got them and not us. We wouldn't care if he got a dozen birdies. The more, the merrier. But why in the devil did he have to get them on the last two holes? And why did we have to be playing with him and why do birdies pay double? Not that we care a hoot how many birdies the man gets.

Rod-Gun Club To Shoot Opening

The first outdoor match of the Rod-Gun Club will be held Sunday morning, May 25. Many old rivals will be on the range with the Waynedale Conservation Club rifle team as contestant. The course will be fired on the fifty yard range and will consist of ten shots prone and ten shots standing.

The Waynedale club will present a strong team with C. Vogt as range officer and a line-up including Thurber, McCoy, Trapp and others. The G-E Club team will be headed by H. Hyndman with a combination that will probably include E. Pion, L. May, G. Raymond, Paul Tillman, C. Morrolf and H. Murphy. It is planned to have as many shooters in the club as possible shoot the course with a selection of the five highest for the team.

In addition to the fifty yard rifle range the club offers pistol shooting, and a 100 yard rifle range. The entire range is open for shooting on each Thursday evening and on Sunday mornings, with a special session for shooters on the second and third shifts to shoot Thursday mornings.

G-E Board Chairman Speaks On Strategic Material Needs In U. S. Defense Program

Coolness And Comfort Are The Thing • • • •

Slacks, once the vogue for recreation, have found a place in the factory as evidenced by the above sextette of second shift employees. The girls, who kindly paused for the WORKS NEWS photographer, as they came through the main gate are left to right: Betty Turley, Jeanne Beucler, Sally Martin, Marie Amber, Caroline White and Willo Deane Mitchell. We are looking for an unprecedented rush of requests for transfers to the second shift.

Cincinnati Excursion Is Planned By Elex Club

One Day All-Expense Tour Open To Employees Will Include Coney Island River Trip

A one day all-expense outing to Cincinnati on Sunday, June 15, has been arranged by the Elex Club and is open to all members and their friends. The trip will be patterned after the many successful Elex excursions held in the past, and will offer many advantages in actual cost over a similar trip made by individuals.

The special train, air-conditioned, will leave Fort Wayne over the Pennsylvania at 6:45 a.m. Daylight Time and will arrive in Cincinnati at 10:30 a.m. On the return trip the train will leave Cincinnati at 7:45 p.m. Eastern Time and arrive in Fort Wayne at 11:30 Daylight Time.

The cost to members will be $7.25 with a slight additional charge for non-members. This price includes the round trip rail ticket, a two-hour bus sight-seeing trip, a special luncheon at one of the world's most renowned hotels—the Netherland-Plaza, transportation to the Ohio river pier for embarkment on the "Island Queen", a round trip on the boat to Coney Island and return, and the return transportation from the pier to the railroad station.

Luncheon at the Netherland-Plaza will be in the beautiful Hall of Mirrors and the state meal tax and tips are included in the general price for the tour. Although admission is not included in the general price, those who prefer may attend the double header ball game between the New York Giants and Cincinnati.

Plan Advanced Class In First Aid

Employees Who Hold A Standard First Aid Card Will Be Eligible

Announcement is made by Dr. H. W. Garton, Works Physician, that a class in advanced first aid will be held on Tuesdays and Thursdays from 1:00 p.m. to 3:00 p.m. starting next Tuesday, June 3.

The classes will be held in Bldg. 16-3 and will run for five class periods or ten hours instructions. Any employee who has passed the standard first aid course within the past three years and holds a standard card will be eligible for this class.

Those who desire this instruction may report directly to Hoy Bastian, instructor, at 1:00 p.m. next Tuesday in Room C, Bldg. 16-3.

Classes in first aid instruction have been conducted at the Fort

Points Out Adjustment Of Nondefense Industries Is Necessary At This Time

Non-defense industries must plan for "a period not of months but of years" to get along with much less than their requirements in a long list of strategic materials, Philip D. Reed, chairman of the board of the Company, said in a talk at the 25th annual meeting of the National Industrial Conference Board at the Waldorf-Astoria Hotel.

Mr. Reed has been Senior Consultant to the Director of Priorities of the Office of Production Management in Washington for the past three months. He was expressing "a few personal observations on several points that must be considered in charting the course of any business."

Prime emphasis will be placed on military products for five or more years, he said, and added that "the sooner we accept the fact, for purposes of planning, that we face a long period of enormous production for defense, with a consequent shortage, rationing and allocation of strategic materials, the more quickly will non-defense industries adjust themselves to the new conditions and undertake the great task of maintaining maximum production for civilian needs without interfer-

G-E Club Band On Patriotic Program

A new radio program, in which the G-E Club Band will play an important part will be launched on Thursday evening, June 5, over station WOWO at 9:30 and will be heard for an indefinite period at that time, it is announced by K. W. McOmber, business manager of the band. The program will be termed "Tempo of the Times," and is intended to consolidate in the minds of the listeners, life of those enrolled in Government service.

Speakers familiar with camp environment will be heard each week with a considerable portion of the program devoted to martial music by the Club Band.

Insurance Payments $67,670 In April

Two Claims Totaling $15,000 Paid At Fort Wayne—Grand Total Reaches $18,632,612

Beneficiaries of 20 employees in the major apparatus Works who died during the month of April received a total of $67,670 under terms of the Group Life Insurance Plans of the Company, according to the monthly report compiled in the office of the secretary. The claims were paid under the Free and Additional provisions of the Group Life Insurance Plans.

In Schenectady Works there were nine claims for a total of $25,950. River Works at Lynn had five claims for a total of $12,720, and Pittsfield Works had two claims for a total of $7,000. Fort Wayne Works also had two claims for a total of $15,000. There was one claim at Erie for a total of $3,500, and likewise one claim at Bloomfield also for a total of $3,500.

The total of all death claims paid throughout the Company during the

• Worthwhile Ideas

An idea is only as valuable as the thought it is made of. In other words the world is made of ideas but not many of them are worth much because the people who talked about them didn't think about them. As a result many an idea is tossed out of the window and many an individual has decided that thinking isn't worth much and has gone along, drifting with the tide and taking the easiest way.

Nothing in the world was ever gained through sitting down on the curbstone of life's highway and doing nothing except waiting for a ride. It takes effort to get along. Thinking requires effort. Mental effort is the hardest kind and the fruit of mental effort is ideas. Ideas worthwhile, ideas adopted for example through the Suggestion System are ideas worthwhile. They are ideas that someone has thought hard about, has given some time to, has really put some effort into.

The Suggestion System is ever on the look out for ideas, of course. But, it wants good ideas, ideas that can be adopted and used in the business. So, put on your thinking cap and turn loose a little extra mental effort. Remember always, that an idea is only as valuable as the thought it is made of.

—Bloomfield Works News

• Little Things

It's the little things in life that count. If you done' believe it, just forget to mail that letter your wife gave you this morning and let her find out about it. As it is in life, so it is with accidents. It's the little one, the bumped head, the scratched finger, the burned spot, the "something-in-the-eye", in short the things most of us don't like to make a fuss over. Every day throughout the Works there are scores of these little accidents occurring. A chap scratches his finger today. Next week he bobs up at the hospital with a badly infected hand. If he had reported the day he was scratched and had the wound dressed he would have spared himself much suffering and trouble.

Little things have their place. Let's keep them there.

• Silver Dollars

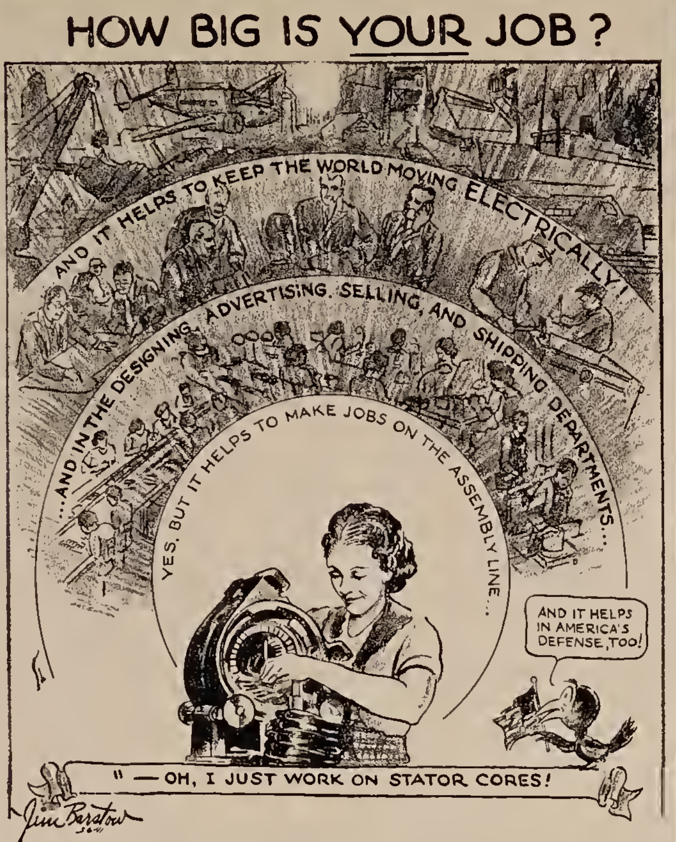
A short time ago, a company in the Midwest took care of one of its payrolls in silver dollars. It was more than just a "stunt"—it represented a vivid demonstration of what the industrial dollar actually means to the community in which busy factories are situated.

As these silver dollars passed over store counters, and from hand to hand throughout the town, the community could not help but realize how important industry was to its welfare. Thus in a new way, something was emphasized that we all realize in the abstract, but are all too inclined to forget most of the time.

It's been reliably estimated that a factory employing 150 men will have located around it, and largely depending upon it, a community that stacks up as follows: a population of 1650 persons, 33 retail stores and retail sales of over half a million dollars, sales and service for 320 automobiles, 393 occupied homes, and opportunities for two dozen professional men.

In short, when the factory pays its wages in silver dollars, the rest of the community is surprised and delighted at the amount of silver that passes through its hands. But no matter whether paid in silver or paper, the money circulates just as rapidly and just as thoroughly through the town. . . .

The industrial payroll's an absolute necessity to the average community in which a factory is located—but we don't usually realize it till it's brought home to us.



HOW BIG IS YOUR JOB?
AND IT HELPS TO KEEP THE WORLD MOVING ELECTRICALLY!

AND IT HELPS IN AMERICA'S DEFENSE, TOO!
"—OH, I JUST WORK ON STATOR CORES!
Jim Barstow

Strategic Material Needs

(Continued from Page 1)

ence with defense output."

"From every standpoint—social, economic and political—we must put and keep all of America at work," Mr. Reed said. He suggested "the redesigning of peace-time products wherever possible, and where impossible the preparation for defense manufacture" to prevent shutdowns and unemployment.

Mr. Reed predicted that engineers, chemists and designers will develop new products to help absorb the increased purchasing power, allay inflationary pressures, support our standard of living, and keep the country at work. One of the benefits of a larger national income, he said, would be an increased ability to pay for a large part of the defense program as we go.

Under present conditions, Mr. Reed said, "unnecessary accumulation of scarce materials, in raw, fabricated or scrap form, either by defense or non-defense manufacturers or dealers, is seriously hurtful to the national program and must be recognized as undesirable, unpatriotic and ultimately profitless. I am confident that no more is required than to call this matter to the attention of industry and business, as we are now doing."

"Manufacturers now engaged in making civilian products," Mr. Reed said, "will do well in their own interests to convert part or all of their operations to defense manufacture."

Thirty-two field officers of the O.P.M., he added, are prepared to help in the selection of defense products suitable for manufacture in various kinds of plants.

The post-war decade will resemble neither the 1920's nor the 1930's, said Mr. Reed, and "I suspect that the war will advance by several decades the twentieth century trend away from laissez-faire and toward economic integration and industry-wide planning under government supervision."

He summed up the following points to be expected in the future:

A mature, consolidated, national labor organization, led by able and understanding men, who will negotiate all questions pertaining to wages, hours, and conditions of work, with business leaders acting in concert through associations of employers on an industry basis.

A continuation of the trend toward centralized control of money and credit.

Large and gradually declining government spending for previously planned and generally desirable public projects, for several years after the war, in order to cushion the devastating effect of an almost vertically declining demand for armaments.

Great emphasis placed on production and a deep determination to take whatever steps are necessary, however drastic to avoid a recurrence of mass unemployment. To this end we may expect to see the government gradually relinquishing its ownership of defense plant facilities on terms and conditions that will provide the purchaser with a strong incentive to maintain production and employment.

Subject to these changes, a sincere attempt to preserve the elements and incentives of the enterprise system.

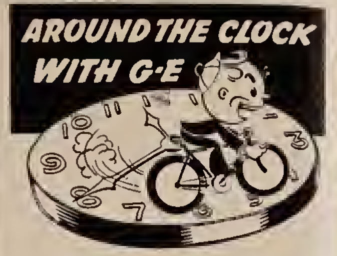
Whether under these conditions, and with profit margins generally lower than in the past there will be enough confidence to create a broad flow of private savings into new and existing enterprises will be the factor that determines whether more drastic experiments in government borrowing and spending will be resorted to.

Elex Excursion

Continued from Page 1)

Reservations

Vivian Hitchcock, Bldg. 21, has been named tour chairman and will accept reservations which must be made on or before Thursday, June 10. Reservations may also be made with Irene Meyers, Eva Lynn and Eileen Morris Fore at the Broadway plant, or Helen Bleeke and Louise Schwartz at the Winter Street Plant.



AROUND THE CLOCK WITH G-E

New home builders among employees today, and their number is growing, face an opportunity unequalled in history, to obtain for themselves an adequately wired house. House wiring in this electrical age is of fundamental importance and whether you plan to have a completely electrified home from the start or plan to add appliances as you go along, it is essential in either case that you provide the right wires and enough circuits to do the job. General Electric is a leader in this field and you can get the last word about it all through your Employees Store.

And then too, don't forget the kitchen planning service, available to all employees. Carefully planned steel cabinets with places for everything can help make life a real pleasure. If you are planning to build this spring or later, don't fail to find out about this service. It is pretty well worthwhile as many employees have already found out.

Delivery Delay Of Certain Refrigerators Is Being Anticipated

Employees who may be in the market for refrigerators may expect delays in receiving certain models, according to information received from the Employees' Stores. Although the Company is making and selling more refrigerators than at any time in its history, the deliveries on certain models take longer than others and the employee sales management suggests that prospective purchasers consult with them and their dealers when placing orders. In some instances satisfactory models can be substituted for models which may be desired but which will take a much longer time to procure. Co-operation on the part of employees will assist in keeping delays on deliveries to an absolute minimum.

First Aid Class

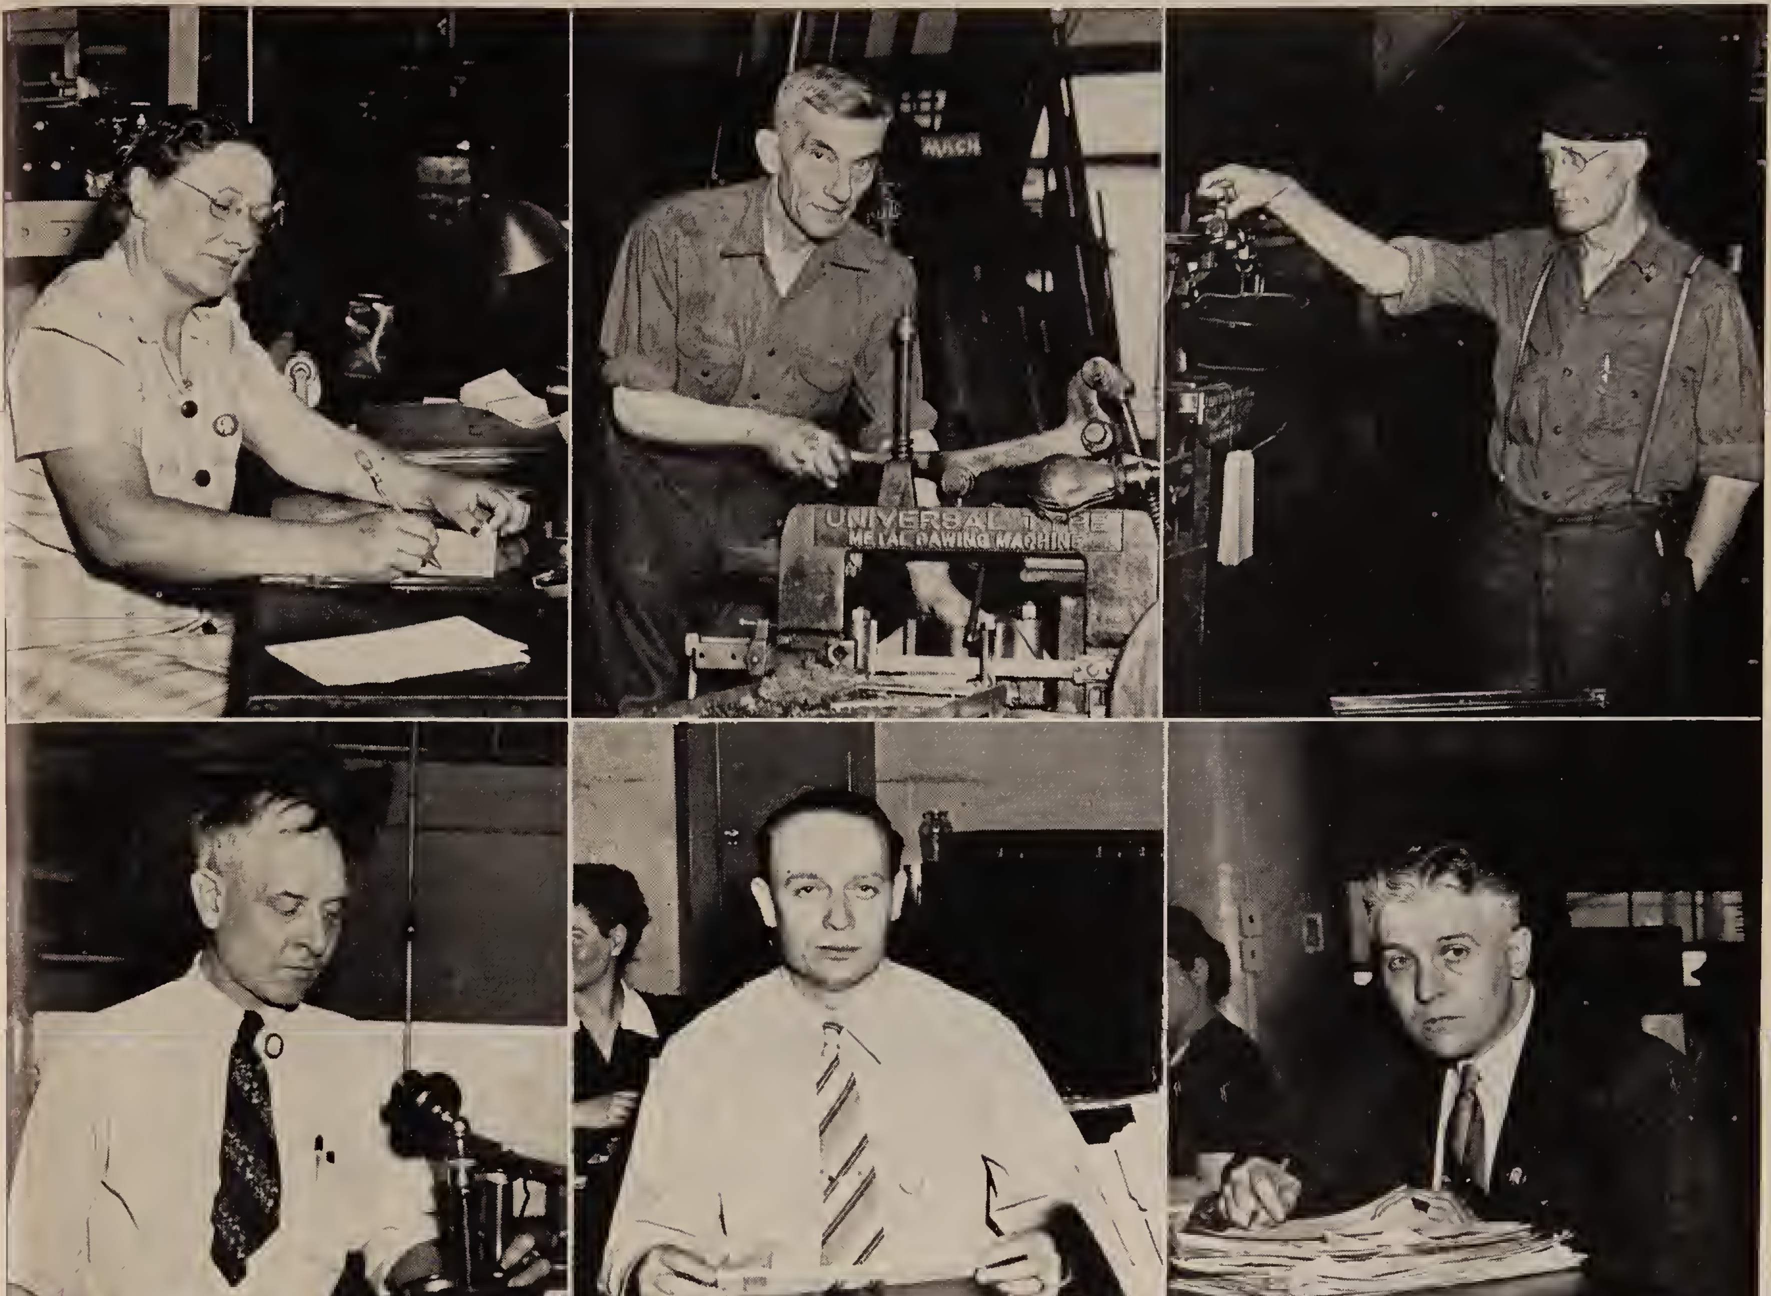
Continued from Page 1)

Wayne Works for a considerable number of years, and there have been several instances where the lives of persons were saved because of the knowledge gained in the classes by G-E employees.

G-E Science Forum Anniversary Observed

General Electric's Science Forum, for the past five years a feature of WGY at Schenectady, observed its fifth birthday, Tuesday, May 20, with a party for about 300 high school pupils, which was also attended by several prominent scientists. The Science Forum, a regular feature of all the Works News in which questions about science are answered by L. A. Hawkins, executive engineer of the Research Laboratory at Schenectady, is directed by G. Emerson Markham. It is a weekly program with talks by scientists with special events and a question and answer period.

New Members Of General Electric Honor Organization



Completing twenty-five years of service, nine employees became members of the Fort Wayne Chapter of the General Electric Quarter Century Club during the past week. They are, top, left to right: Golda Mentzer, Bldg. 26-2; Albert Berger, Bldg. 26-5 and Daniel Johnson, Bldg. 17-1.

Second row, left to right: Roland J. Fawcett, Bldg. 26-2; Elmer J. Wagner, Bldg. 19-3; and Paul E. Bohn, Bldg. 19-3. Bottom row, left to right: Ralph Valentine, Bldg. 26-2; John S. Sowers, Bldg. 26-1 and Harry M. Lietz, Bldg. 19-2.

»» NEWS THROUGH THE PLANTS ««

From The *Feminine Viewpoint*

By Irene Perry and Hilda Barthold

One of our male readers has evidently decided to show his interest in our own little column. Girls, we'll leave it to you to answer him.

Dear Feminine Viewpointers:

I stopped in for a quick trim at the neighborhood barber shop and beauty parlor the other day, and because a pair of size 8½ "dusty rose" nylons had carried off Life I picked up the current L. H. Journal to occupy the time I had to wait. Tucked in the back pages where only the smart girls could find it, they had printed an old Gallic proverb that contends "there are only three types of men that do not understand women—young men, old men, and middle aged ones." I would like to argue the truth of that, but it's another story. The thing that impressed me is the fact that it is printed at this time of the year. It's open season all year 'round, but to get a man to the altar in June a girl has to start her campaign about now. A publication contains only material that its readers are interested in and the inclusion of this quotation is pretty good evidence that the summer campaign is uppermost in the minds of most girls. It must be more than coincidence that the fishing season opens at about the same time the new drive for meal tickets starts and that brings me around to the thing I wanted to write you about. You could do a wonderful service if you would devote one week's column to a plea for more sportsmanship in this game.

Very few girls who fish would have the nerve to come home from a vacation with a picture of a string of three-inch bass as proof of their ability as nimrods, and yet a great many girls proudly exhibit a vacation caught husband that was snared only because he was too ignorant of the game to know better. Taking a long range view of this "monkey business," think how much the sport would improve in a few years if men like this instead of having their heads nailed to a charge account could play around on a barbless hook to learn a few rules of the game and then when the going became dangerous could slip back into the swim.

It's good practice to let a fish run until it is worn out before hauling it in, but it's certainly poor sportsmanship to keep a man on the go eighteen or twenty hours a day until he is in a coma and then when the poor fish answers your remark about nothing in particular that "it is too bad that this can't go on forever" with something half way between a snore and a "yea" to blandly ask if he would rather get married that day or the next.

This change of pace business should be touched on too. It should be made a crime for a girl to be a tomboy pal for an entire week and then quite suddenly under the influence of a moonbeam, a waltz, or a peanut vendor's whistle to melt down in a man's arms, just an itty-bitty lump of helpless femininity that needs a two-inch square of cambric edged with lace to catch the salt tears that cruel memory of past wrongs have caused. What would you think of a fisherman that right in the middle of a beautifully game fight suddenly dropped the pole and slugged the fish with an anchor as it came near the boat?

No one can condemn the fisherman for using the bait he knows will attract the fish he's interested in, but the practice of putting on an act to make the poor fish you are trying to hook believe you are just his type can hardly be considered fair play.

Just a friendly word of warning before I close, all girls would do well to shun that "you're wonderful" line. The only men that it goes across with anymore are those who already believe that about themselves and after the organ music dies away, the bride is sure to ask herself if being married to an engineer isn't too high a price to pay.

OLD TIMER.

News On The Nose From 4-5

Oh happy tomorrow comes Decoration Day, emancipation for three days and a chance to acquire one beautiful sunburn, and speaking of beauties, Harold Hilsmier, Bldg. 4-5 office, is sporting a pair of sun glasses permanently printed on his face after an afternoon at the air show last Sunday had left the exposed part of his face a luscious strawberry red. . . . We're almost sure of it now. "Bachelor Jim McGill" must be in love. The other morning as he and Maurice Petgen entered the grounds, Jim cheerfully displayed his street car pass for the watchman's O. K. However, they still demand a look at our badges, Jim. . . . Vern Robinson lost his badge and found, to his dismay, that fifteen years of service with the company still will not influence the watchman to let him in. . . . We don't suppose he'll tell you, but ask Cleon Oyer, Bldg. 4-1, where he lost his "Chevy" keys and why he couldn't possibly retrieve them. . . . Darrel "Ben" Franklin has set himself up as an authority on how to win your man and keep him, or marry now or forever be a maiden-lady. Could be that his daughter, Betty June, is keeping him well on the alert. . . . Helen Rumbaugh got a new bicycle for her birthday last week. That's really keeping one's youth. . . . And so to all you happy people—safe driving and joyous holidaying in the only country where people can still laugh and love and live as they please.

Bldg. 4-4

August Zollinger is feeling very upset these days. It seems Hilda Rodenbeck borrowed his newspaper the other morning and when she returned it, it was minus half the comic sheet, which August hadn't read. Tch-tch, such manners.

Virgil Foland is viewing his 14-year-old son with more respect now-a-days. The Folands visited Chicago a week ago and while there Virgil had a little argument with a traffic cop. The upshot being that said cop told Virgil to let his son drive if he expected to get through Chicago.

We wonder if Lowell Arnold is going to be a volunteer fireman. Well, you did very good Lowell.

Wonder why Harold Amstutz seems so tired on Mondays when he comes to work.

Phyllis High is going to leave us in a few weeks. Wonder if her new home is going to be in Muncie.

Mary Kleber was seen buying some new furniture. When is the date, Mary?

Tom Freeman took quite a chill at the show the other night. He thought he was sitting in a draft, but the people around him weren't cold so we conclude that perhaps he was just scared. The picture was called "The Ghost Buster."

Borings From 4-4 Office

Vacation time—oh wonderful vacations. Nothing to do but eat, sleep and be merry. But, however, the most of us come back to work in a worse condition than when we started. Now please notice when I come back from mine, I'll be all pepped up. Oh Minnesota, the state of 10,000 lakes, it is so beautiful, but I just can't get Indiana off my mind. . . . Getting back to the material things, something plenty staple in life, we find our Aunt Lena sitting on Esther Allar's chair and she fell down and went boom. It wasn't because she was or is getting too fat, but the chair just decided to break. We find this to be a daily occurrence in our office though . . . Nate Porter is contemplating the sale of his calf. He hates like everything to part with it but if he sees a suitable buyer he will sell. . . . Mike O'Grady doesn't like publicity 'cause even the newsboys kid him about his home life. . . . Pauline Young is going to Waterbury, N. Y. It is near Camp Pine. . . . We hear ever so often from Angie in Gary that she still reads the WORKS NEWS. Too bad she isn't here now, perhaps we could write about her. . . . Say, has anyone heard from Mary Hile, ex-G. E. coed. We often hear from Ardeth Hemp and she lives in Sidney, and Mary lives right in our fair city. . . . Mary Hakes asked Pappas Yeller the other day who discovered America. We can't figure out whether it is a joke or if she really wanted to know. . . . Doris Roe recently had a tooth extracted and you should see the place that's left. I'll let you know Doris thought it hurt. . . . Mel Warner was seen chaperoning at a Central Prom last Saturday night. He was really on his good behavior since his daughter was a queen's attendant. Pappy, aint 'cha proud? . . . Art Wedler looks like a Red Top cab since he was caught in the drift out on the lake Sunday. 'Tis plenty for now. Sincerely as ever,

ELMER, the field mouse,
the rat to you.

19-4 Flashes

Heartiest congratulations to Mr. and Mrs. C. Schlotter upon the birth of a baby boy. Mrs. Schlotter is a former G. E. employee. . . . Gladys Truby thought of something new when she made the cutest little vegetable hat. She used real lettuce and radishes. . . . Fern Brown forgot her button the other day. It was way back in Yoder. . . . It seems that even the policeman on the transfer corner appreciates our Alberta, Mary, Ruth and Irene of the second shift. . . . Lots of jealousy on the part of the fellows in the small lot section. Otherwise why do they make that terrible noise when the second shift duo sings. . . . Edythe Roller and Peggy Brandt have a bank and every time either one of them says a naughty word a penny goes into the bank. In a couple of years they will have enough for an ice cream cone, we betcha. . . . Will someone please tell those fellows in Bldg. 19-4 how to manipulate those blinds?

The assembly girls of the fan motor belt in Bldg. 19-4 held a weiner bake recently in Foster Park. It was up to Eleanor Kester to bring the food and everyone dismissed the responsibility. After the fire was going and everybody was getting set a boy rode up and asked if anything was missing. Sure enough the package under the boy's arm were the weiners for the party. He saved the meal.

Plastic Flashes

We wonder what it was about Erma Nead that attracted the hosses at the circus. She was nearly trampled to death. . . . We wonder if Bill Swartz was thinking of Pauline when he had that accident. . . . Carl Sleppy says the reason for his school girl complexion is the wonderful potatoes his wife fries. He says they're different — she doesn't use a skillet.

Famous last words:
Lillian Hatfield: "Le Moyn."
Joy Stucky: "Say,—listen."
Cecil Young: "Why?"
Jim Fleming: "What do you want to bet?"
Viola Yanney: "Oh happy day."

Special notice to Adelma Meece: If you want to know who the reporter is, look under the nearest press. . . . We wonder if the A.T.P.B. Bureau has gone out of business—We haven't heard Zola Hetrick calling "Cecil" lately. . . . Bldg. 12-3 has two new brides—Vera Knuth became Mrs. Robert Arter on May 10 and Rosemary Fiechter became Mrs. Prentice Hoop on May 14. Best of luck girls. . . . Getty Adams is flashing a new diamond on the third finger of the left hand. She says it's a gift from her mother. . . . It seems that new car owners in Bldg. 12-3 believe in breaking in cars the right way. Carl Saaf and Evelyn Demler have added some beautiful dents to their 1941 models. . . . Fred John, Bldg. 12-3, does not comment on why he has taken to flying. Could it be that he is looking forward to the Army Air Corps? . . . Since we understand that the prices of "joy juice" were enormous at the Kentucky Derby, we wonder how much of it Ed Fogel, Bldg. 12-3, consumed.

"The Tillies."

Slips And Chips

By Sir Vis, 4-4

Here we are on the precipice of May, ready to be shoved off into the abyss of June. Where the roses are blooming and the humming birds are busily sucking the nectar from the honeysuckle. The brides in their trousseaus parade the boulevards every day. The parks, cities, lakes and other amusement places are filled with honeymooners. It is a beautiful and wonderful month, truly the month of happiness. . . . Chris Delagrange was late for work the other evening. His alibi is that he stopped to get his hair cut. Are you sure it was your hair he cut, Chris? I cannot see how a barber could spend 20 minutes on that horse show of hair you have. . . . Charles (Flash) Meyers and Carl Klepper were out fishing the other evening, and Flash became so excited that he tangled his line in a knot. Flash worked diligently for 45 minutes in straightening out his line, and by that time the fish had moved up the stream. Too bad, Flash, but I still think Ed was right when he said, "Charley is so slow that he can't stop quick." By the way, you know Charley was interested in purchasing a farm. Well he has now turned to defense and is in the market for a duplex. He hopes to convert a duplex into a triplex because of his daughters. Just as a matter of defense.

Art Brandenburger, Bldg. 4-3, has turned inventor. He has perfected a super efficient device which will be of great benefit to wearers of false teeth. It is a device similar to a muzzle which fits over the mouth and prevents the teeth from flying out. His name will probably go down in history as a great benefactor of mankind.

SANDY SAYS

Tomorrow being Memorial Day, and we all being Hoosiers, this column had better be about the 500 at Indpls. if any o' us read it.

What a contest! My cousin Colin says that if he were to drive his model T 500 miles with her ears knocked together it wouldn't be a race, it would be an endurance contest between him and it. But he couldn't race it tomorrow if he wanted to. All the cars in the race must have engines within certain limits, gas tanks a certain size, etc., and each car and driver must pass a qualification test. All are evenly matched.

And referees and judges will watch the contest from start to finish to see that each driver gets a fair chance.

Now, in our contest (everyday life, I mean, o' course) there are no referees. No judge watches the race. Only if ye get too far outside the rules do ye have to appear before him.

A sort o' contest is going on between the works o' our Company, too. Safety records o' each works are listed, with one first, another second, etc. Every so often ye see the listing in the WORKS NEWS.

I stumbled across another contest the other day, too. It was a list o' the "Cost Reductions" made in the different works. If I saw right, we aren't out in front (as yet). O' course, the eastern Works are closer to Scotland, and besides, we Hoosiers will win eventually, as we always do, if they just give us time. And the proper incentive.

Hoosiers were racers back in the horse and buggy days. Two "sports" with their "rigs" couldn't drive down the road without racing each other. Their "incentive" usually sat beside them on the narrow seat.

About that time Cousin Colin and I were racing broom stick horses around the yard. When we left the brooms on the sticks, we called it a sweep-stakes. And speaking about incentives, one day we were running through the woods when I challenged him to a "horse race." We grabbed what looked like a couple o' likely looking "stick horses." Weel, he beat me so badly that I said, "How could ye do it? My horse was a piece o' poplar, the lightest wood around here."

"Weel, little cousin," he said, "What I grabbed turned out to be the tail o' a blue racer."

Alva Biggs, Bldg. 4-3, is delving into the technique of radio. He has installed what he calls a high frequency super modulated aerial in his road rumbler. He tells us that it is so efficient that when turned on full blast the volume of music coming from the speaker fairly blows you off your seat.

Gilbert Brown, Bldg. 4-3, has a phenomenal auto. It runs without gas or oil and it has no end of speed and endurance. He tells us that one day last week during the noon hour he drove to Rome City, caught three bass, and was back before the 1 o'clock whistle. Some one did tip us off to the fact that Gilbert did run out of gas in his own driveway.

Carl Borchert promises to beat Ray Kierspe's record. He is assured of bringing all his clothes back from Schenectady with him. His wife sewed his pajamas on him.

NEWS THROUGH THE PLANTS

Sleuthing In 4-6

Vera Berning sighed deeply last Wednesday and reportedly said, "Oh, me, the army is in town and I would have to work today." . . . I'm wondering what kind of trouble Rhiney Hoffmann and Carl Kable are in that they were heard singing, "Let's take a boat to Bermuda, let's take a plane to St. Paul." Could it be that Bermuda and St. Paul have something Fort Wayne doesn't have? Goodness gracious! . . . Art Nickerson certainly must have seen the picture Snow White and the Seven Dwarfs, for he almost always whistles while he works. . . . Our super deluxe champion golfer, Dubanowich, claims he played 18 holes in 45. Let's pool our excess money and send him to the National Open Golf Tournament this year. . . . Oink! Oink! Little Gerry Grim took a mud bath Friday morning on the way to work. We have heard that mud packs help to beautify, but who wants to make their clothes beautiful in this manner. Tsk-tsk. . . . We wonder if our little "Why" girl, Ruth Kaiser, will ever learn the answers to all the questions she asks. . . . Heard a new one recently. Some people aren't satisfied with the way Cupid is doing, so Pauline Gehrlich and Helen Merkey are thinking of taking up archery. Better beware, you single unattached men of archery age. . . . We have to hand it to our dark haired belle, Toni Kennedy, for getting a head start on the rest of the girls with the new apprentices. . . . A thank you to Walter Brake and Chester Smith for their kindness in taking a group of girls through the display room and courteously explaining it and answering our questions. . . . I understand that Clyde Barnes got bit by a great big brown dog the other day. Next time he gets hungry and tries to take a poor dog's bone away, he better pick on a smaller dog. The dog is still alive and hasn't gone mad yet.

THE SLEUTH.

Winter Street "Worse"

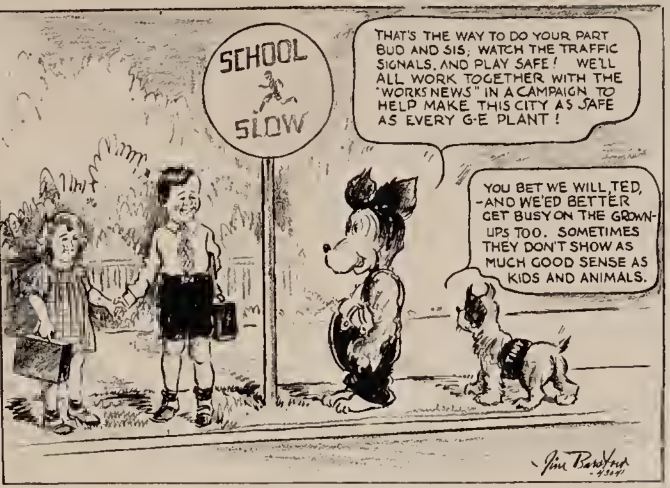
Dear Editor and your assistants who
Write the Winter Street "Gleeless Goo".
I'm glad you liked my attempted wit
And hope you'll pardon my bragging a bit,
But I do seem to have done some good
For otherwise I doubt if you would
Have roused yourselves and taken pen in hand
To write the stuff where we all get "panned",
For the things you imagine we might have done.
ut I suppose you must have your fun
So congratulations and my best wishes to you
For I guess today's column is the best you can do.

—Frigid Freddie

It is suggested that Don Travis and Oscar Reitdorf, Bldg. 26-B, place a red flag on their car so that ey can find it. Honest the boys had exactly one bottle of red pop.

Ray Adams, Bldg. 26-2, has an awful time with his window mop dog. He has to tie him to the house to keep the flees from dragging him away. Not much stamina to these Pekes even if they are sassy.

Art Wedler, Bldg. 4-4, was seen rushing around the office last week changing Labor Day to Sept. 8. Strange how so many calendars could be wrong.



SCHOOL
SLOW
THAT'S THE WAY TO DO YOUR PART BUD AND SIS; WATCH THE TRAFFIC SIGNALS, AND PLAY SAFE! WE'LL ALL WORK TOGETHER WITH THE "WORKS NEWS" IN A CAMPAIGN TO HELP MAKE THIS CITY AS SAFE AS EVERY G-E PLANT!
YOU BET WE WILL, TED, -AND WE'ED BETTER GET BUSY ON THE GROWN-UPS TOO. SOMETIMES THEY DON'T SHOW AS MUCH GOOD SENSE AS KIDS AND ANIMALS.
TINY
Jim Barstow -4-30-41

Is Zat So?

One of my worthy co-workers was kind and thoughtful enough to express regrets at the discontinuing of this column in last week's issue of the WORKS NEWS. I am indeed grateful and deeply impressed so I have decided to give a return engagement. . . . A small fire in Bldg. 17-1 was the means of discovering a new way to remove the fire extinguisher from the bracket on the wall. In the excitement "Superman" Red Gitter tried to remove the extinguisher but he was too strong and the bracket came along with it. "Red" had the extinguisher on the floor with a toe hold when Harry McKee came along and showed "Red" how to easily remove the extinguisher from the board. No damage was done except to the wall and to "Red's" feelings, to think that McKee was just a little bit smarter in the methods of fire-fighting. . . . The gang was glad to hear from Private Walter Nix, who is now stationed at Camp Shelby, Miss. . . . Hoy "Pop" Bastian will have to change his nickname from "Pop" to "Grandpa" since his son John, Bldg. 19-3, is now a proud papa. Mrs. John Bastian, who will be remembered as the former Maxine Kryder, Bldg. 18-5, gave birth to a daughter last Thursday. Judith Ann will probably follow in the footsteps of her grandpa and her dad and join the Scout troops in several years. . . . Henry Papenbrock has joined the rest of the "Toothless Mikes" on Bldg. 17-1, as he had his last 14 teeth pulled Friday. We wonder why so many of our co-workers are sans teeth. We might suggest that they change their brand of chewing tobacco. . . . Bernard Gausepohl was proudly displaying recent snapshots of his twin daughters, Jean and Joan. We don't blame him, as they certainly made a pretty picture in their new military spring outfits. . . . "Joe" Sible still has us wondering what occasion he was celebrating Monday when he came to work all dressed up! . . . George Mosshammer really is inventive, although he can't make us believe that he hasn't had some experience at milking a cow! . . . The days have been too hot for Darl Wilson, so he finally shaved off his mustache. We wonder if he feels any cooler? I have enjoyed writing this column and I hope you don't regret reading it. Good-bye.

THE QUESTION MARK.

We understand Ray White, Bldg. 18-5, is taking the young 'un down into Kentucky over the week-end to teach him a little feudin'. Ray, Jr. is just a little rusty on handling a squirrel rifle and needs about a week's end brushing up.

Sunbeams From 17-4

Well, if it isn't one thing it's another that we hear tall tales about these days, and it takes Bob Bennett, Wayne Worman and Mart Guandt to really give out the information about army life.

Love does funny things to people and it isn't the least expensive thing on earth either, it cost Dorothy Wilhelm four dollars to call her boy friend, then she was so excited that she forgot what he said.

The tears were really flowing the other day, and you couldn't tell whether it was Beryl Kolkman or Mabel Murray that had lost a dog.

And why is Doris Lontz standing up to eat this week? Well it seems that she had a birthday and wouldn't tell her age, so the gang gave her plenty of whacks for good measure.

And talking about birthdays, is that why Ethel Byrd was seen giving Vick Nahrwold a good paddling?

Anna Rentschler has moved into her new home in Waynedale. How about a housewarming, Ann, we'll bring the chicken.

Thought for the week: Self-criticism is always good for the soul.

GRANNY.

Carl Borchert claims he found Ray Kierspe's pajamas while in Schenectady last week, but he too forgot to bring them back.

To And From

Dear Hermit,

Last week you told me about all the hungry people on Bldg. 17-2—well let me tell you, we have the same problem on Bldg. 17-4. We had a potluck Wednesday night. Those present were Murl Hedglin, Irene Witham, Jane Gulden, Dianna Scott, Irene Meyer, Betta Henny, Edith Uennick and Frank Calkins. Now I know there is nothing unusual about that, but the catch is, there was a big hunk of chocolate cake left over. Murl and Irene M. had to divide it among Merlin, Marvin, Nick and Benny (poor boys).

Ruthie Carl thought she could get a job watering the elephants the night of the circus, but by the time she got there the elephants were all tucked in and not a bit thirsty, so she didn't even get a pass to the wild west show.

Thursday night when the power went on a spree, your "Roving Reporter" saw Madelyn and Vera Drewett, Lu Nau, Grace Koch, Jo Bassamo and Geneva Smith coming out of the Emboyd. She went on a little farther west and lo and behold, there were Ruth Hess and Mary Ellen Heddon riding (of all things) a motorcycle. The next stop was a "local confectionary" outaround Winter Street plant, where she found Dorothy Henselman and Alice Slater. She then dropped in at Fourth and Wells to congratulate Norma and Ed on their marriage. It seems everyone took advantage of the vacation.

And now I must leave you for another week.

The Girl From Upstairs.

Dear Girl From Upstairs,

The girls on wire-raising had another birthday potluck planned for "the day the lights went out." This time Mary Hoffman was the guest of honor. On my way out I saw the gang gathered around Charlie's desk eating the lunch. Is that going to be the new picnic table?

Last Saturday the girls on insulating-between had a potluck which was super-colossal. Nearly everyone on the floor shared the potato salad and ice cream 'n cake. Charlie Rice dished up the ice cream, so you know how big the helpings were!

The Hermit.

P. S. to Suzy Sleuth—

Why didn't you spot Karl Geller the day he wore his house slippers to work? Are you going to let him get away with that?

H.

19-4 Spot Jottings

Herb "Big" Buck, as the result of his recent financial betterment, has written to the Petoskey Indians telling them that he can finance at least two more little Indians this year. . . . Everybody in Bldg. 19-4 and Bldg. 19-5 can relax now since Leo Didier is wearing suspenders—or should we call them braces, old chappie? . . . Ruby Stoops is in Arizona attending the graduation exercises of her daughter.

We all thought that Virginia Lutz, Bldg. 19-4 winder, liked ice cream, but we did not appreciate that Virginia can take it better by the bucket than by the bite.

Cecilia Smith, Bldg. 26-2, was married to Edwin Pranger on May 24.

Loretta Halt, Bldg. 26-2, would drive anyone's car if the key fit, and of course, she didn't discover she was in the wrong car. How would you have felt Loretta if the owner would have walked up?

26-5 Tool Bits

Well the boys in Bldg. 26-5 agree that it would be good practice to follow Charles Ueber's favorite slang expression "We oughto commence to start to do something about it." . . . Just like Dagwood's car driving down the street without a driver, Glenn Ramsey's car radio played on and on the other day without a listener. The battery went dead at the thirteenth hour. . . . George Karns helped out the lamp bulb business the other evening. George evidently was making a test for he turned on every light in the house and then sat down and went to sleep. At 4 a.m. he woke up and the lights were still going. Methinks he is in the dog house for he did not attend parties on the two succeeding nights. . . . Earl Lenz decided to do something about the barrels of gas he is saving so he bought some baseball tickets—at least so we are told. . . . Otto Rodenbeck is still puzzling over the personal evaluation recording he received from his friends. . . . Jack Ebert evidently doesn't think much of the new cars as far as durability is concerned. At least he has all his fenders taped together and carries an extra roll of tape with him. . . . The defectives—just a little play on the word detective—of Bldg. 26-5, think they should do something about the painted heel fad. After all you can wear a gag to death. . . . Christ Kaiser is setting a hot pace with the purchase of a 1941 Buick. Rufus Niblick is following close in Christ's footsteps. . . . The party at Red Smith's cottage at Crooked Lake was a success. Someone must have spiked Baker's pop for he was the only one who left his hat. . . . We have found a juggler but he needs a little practice. Dick Wagner tried his juggling act with a full bottle of milk, and—you guessed it. He missed . . . La Mar Brant borrowed a car to make a hurried trip home after his badge only to discover it pinned to his suspenders where he always has worn it. It seemed the suspenders stretched a little allowing the badge to slip over his shoulder. Anyhow he got another cup of coffee out of it.

Today, people who have natural talent in some field are gaining more and more recognition. Marcel Gaut, Bldg. 4-3, is one of these people. Just the other day Marcel had one of his "brain storms." He claimed that if an automatic "oink" horn were attached to hogs, the said specie would have more time to grow, consequently more weight, and last but not least, more money to the raiser of said specie. That is what one can call real talent. Ladies and gentlemen, let's bring forth this shining character in all the blaze of existing glory. As Gaut says, "Know anybody that's got a few thousand that would like to finance something?"

Effie Wyatt, Bldg. 4-3, would like to buy a good hound as she wants to keep up with her best friend and neighbor who has four dogs of different breeds, cat, canary bird, and gold fish. Now the reason Effie wants a hound is that she says they can talk louder and longer than any dog she knows of. But some of her friends suggest that Effie buy an elephant as she won't have to buy flea powder. If any of you have a suggestion, please consult Effie.

Sympathy

Sympathy is extended to R. Fowler, Bldg. 18-5, in the death of his mother.

NEWS THROUGH THE PLANTS

(Continued from Page 5)

Thisa And Thata 19-5

From what we hear Alma Lehrman has turned back the years. When the lady with whom Alma stays cleaned Alma's room she found an "all-day sucker," and without further ado ditched it. When Alma got ready for bed she couldn't find her sucker and she put up such an awful howl that another had to be secured before she could go to sleep.

We must start the week with congratulations to Rita Buchtman and Vera Joyce Yearling, both of whom are wearing diamonds. A special congratulations to Rosie Lauer who has set the date of June 21 for her big day, and another one to Evelyn Meier who changed her name to Lytle on May 1.

Did Butch Vegalues get excited or did he fall asleep at the police training school? How else can you account for the back of Butch's chair suddenly parting from the rest of the chair?

Better Come Back

Looks as if Joe Fox, who retired on pension last week, better come back to work. The very first Friday that Joe was off of the job, the morning whistle blew one-half minute late. If Joe wants to leave he ought to at least leave his faithful watch with the gang.

George Collins, Bldg. 4-3, is now busy practicing the rural art of hog calling. He tells us that he is going to enter the contests to be held this fall at Art's Hoggerie on Big Long Lake. George has developed a technique that is beyond reproach. In closing all that we have to say is that we are sure that the championship is in the bag for George.

Frequently we enjoy many sports when we reach our second childhood. If you don't believe it ask Peggy Quinn, Bldg. 4-3. She was recently seen riding the toot-toot-train at Trier's Park one evening and was having a grand time.

Sergeant Frank Martin, of Plant Protection Dept., didn't do a bad job of riding a bicycle down College Street the other evening. Yep, Frank them were the good old days.

Dear Editor,

George Henschen is wearing that satisfied look on his face, he is back with his old love—telephones and switchboards, attaboy George. Keep up the good work, and give 'em service.

Willie Travis is whistling a new tune entitled, "The Man on the Flying Trapeze", yes, he is completely sold, on "floating power" and "fluid drive."

Famous last words, quoting Walter Bileer: "Darn my big feet."

Oh, we forgot to mention, Walter is a recent addition to our volunteer firefighters. Attaboy, Walt.

Sincerely yours,
A lover of "light" work.

We Apologize

Our apologies to Wm. Miller, of Bldg. 20-1, who appeared in last week's Works News as Charles Miller. Bill, you have heard that old one about typographical errors. We are using it in this case until we find something better.

Insurance Payments

(Continued from Page 1)

month of April was $129,387. The total of death and disability claims paid since January 1, 1920, when the Group Life Insurance Plans were inaugurated, now stands at $18,632,612.

19-5 Office Chatter

The recent hail storm really did great damage to George Zollars. At least it is reported that the storm gave George that penitentiary haircut. . . . To think that we have neglected to mention the fact that Francis Richards has a new daughter—Linda Lee. . . . Carl Rietdorf insists that those weeks he was off were spent at the hospital. Mebbe so but where did that sun tan come from? . . . Sorry to see Wilma "Southern Sunshine" McKay go to the east side, but we hope to see her often. . . . If you have any good suggestions don't forget Gorden Smith, he loves them. . . . We are beginning to believe that Hugh Neely is a regular "want to bet guy." . . . Extra. Dottie Ross has blossomed forth with a new sparkler.

William "Mouse" Bailey, Bldg. 4-3, could hardly keep his eyes open the other day. When asked what the difficulty was he explained to us that the two hens he has setting are a source of great worry to him. It is about time for the young chicks to hatch and Bill has been staying up nights in order to be on the job when the blessed event transpires.

Anyone not wishing to loom in the "public eye" better steer clear of Fred "super-sleuth" Zehender. Fred is rapidly developing into a human bloodhound, and has been turning in so much dirt to the Works News about the Bldg. 12-B gang that we thought it about his turn to get his name in the paper.

We are told that Howard Opliger, Bldg. 12-B, turned a neat crimson at the recent skating party when his flying leap ended in a heap on the floor.

Have You Lost A Key?

Employees who have lost keys in recent weeks are asked to apply at the reception desk in Bldg. 18-1. A large number of unclaimed keys are on hand at the present time.

Dick Miller, Bldg. 26-2, is known better as the hot dog king. After all Dick, eleven hot dogs are a lot when the girls are furnishing them.

It seems your sins will find you out. It is reported that for nearly a year and a half, Jessie Filler, Bldg. 4-5, has put Jim Nyboer and Jim Mitchell, Bldg. 26-5, off on a promise to give them an oyster feed. According to last week's Works News someone has taken up their battle. Too bad the "R" months are a long time off.

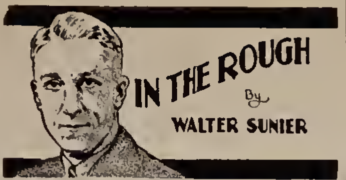
« «It's a Joke» »

Second (to boxer) — "Well, old man, I'm afraid you're licked now."

Boxer (gazing dizzily across to opposite corner)—"Yeah, I should have got him in the first round when he was alone."

Three men visited a bar. "I'll have a Coca-Cola," said the first. The bartender turned to the second one. "I'll have an orangeade," was the order. The bartender turned to the third—who said: "And I'll just have a glass of water. You see, I'm driving."

"Hello," said a voice over the telephone, "is that Jake?"
"Sure, it's him."
"Doesn't sound like Jake."
"It's me, all right."
"Can you lend me $10, Jake?"
"I'll tell him as soon as he comes in."



The Golf League started on the 19th and for once was not rained out.

The Monday Evening Group came out thusly:

Turf Toppers won from the Rough Riders by forfeit.

Plastics won from the Slapsticks —194 to 195.

Divot Diggers won from the Ice Cubes—185 to 195.

Low scorers were: Schwanz 41, Saaf 42, Hanna 42. Brice Hamilton shot a 35 with a card that read 4 4 4 4 4 3 4 4 4. However, this score does not count in his average because it was shot in the forfeited match.

The Tuesday Evening Group came out thusly:

Optimists won from the Slicers—182 to 211.

Billy Goats won from Bldg. 4-3—194 to 195.

The All Stars won from the Dubs by forfeit.

The low score, 42, was shot by Ludeman.

The Wednesday Evening Group came out thusly:

The Hookers won from the Fluorescents—188 to 192.

The Apprentices won from the Trappers—185 to 201.

The Sharpshooters won from the Cro-Flites by forfeit.

Gitter was low man with a 38. Motter and Adams both had 40 but these were shot in the forfeited match.

Saaf rose right up on May 17th and caught onto an eagle on No. 18 at Brookwood. His second shot was about two feet from the pin and he downed it for an eagle 3.

Charley Harris is beginning to get warmer than the weather. After having some good rounds except for one hole in each, he finally left out the bad hole last Saturday and got a 38 on the second nine at Brookwood.

Jim Townsend had a hot putter for at least nine holes last Sunday. He had seven one-putt greens. The heat from the putter was so intense we couldn't follow him another nine. If he wants to keep his friends he had putter cool off his putter.

NOTICE
Tennis Players

Plans are under way for forming an inter-department tennis league which will operate in addition to the regular industrial tennis league. Anyone interested is asked to forward their name and location as well as home telephone number to R. J. Barnes, Bldg. 19-3.

A minister was asked by one of his least respectable members to say prayers on Sunday for Anna Bell. The clergyman did so. A few days later the pastor asked the church member if he desired the prayers for Anna Bell to be repeated. "No, thank you kindly," replied the church member. "She won last Wednesday at seven to one."

"Does she know much about cars?"

"No. She thinks you cool the motor by stripping the gears."

G-E Short Wave Radio Station Honored For Public Service

The only short-wave station to be honored in the first annual awards by University of Georgia in the George Foster Peabody awards for meritorious public service was General Electric's station WGEO in Schenectady. This station was cited for its service to the U. S. Antarctic Service expedition, which consisted of a radio program every other Friday night, sponsored by some prominent newspaper, followed by the reading of 150 to 200 letters from relatives and friends back home, known as the "Byrd Mail Bag." Occasionally some relative came to Schenectady to have a personal two-way chat over WGEO with her husband or son at the South Pole.

The Little America service was inaugurated in December, 1939, and continued until May 1, when the men of the expedition were back within "calling distance" of the United States. The newspaper-sponsored programs, which were carried over a coast-to-coast NBC network, were concluded on January 31, 1941. Twenty-six newspapers participated in this series, each furnishing a half-hour show.

The importance of radio and the WGEO mail bag program to the snow-bound explorers in Little America is graphically described by Rear Admiral Richard E. Byrd, as follows:

"Antartica is in effect another world, so different is it from the land of civilization, where one's waking hours are filled with one urgency after another and innumerable distractions and noise and infinite digression; where there is not much chance to get really lonely or even to think without interruption. Whereas in Antarctica, during the long night there are few diversions except those you make yourselves. The sun stays below the horizon. There is little change and much silence and a great, nerve-wracking evenness.

"Your homesickness becomes a nostalgia. Actually to hear the voice of your friend, your brother or sister or father or wife brings sunshine to the long, dark night."

The "Byrd Mail Bag" was inaugurated during the first Antarctic expedition from 1928 to 1930. General Electric's short-wave station was then known as W2XAF; and it was at that time that Dr. E. F. W. Alexanderson designed the short wave directional antenna, which had the effect of increasing the signal strength of the station in the direction of the South Pole about 10 times. It became known as the Byrd antenna and is very much the same type as used by the company in short-waving programs to Europe and South America today.

When the second Byrd expedition left for the Antarctic in 1933, the mail bag program was again resumed. It proved the one short-wave station heard consistently down at Little America. The third or present expedition has enjoyed the benefits of an increase in the station's power from 40 to 100 kilowatts.

SCIENCE FORUM – by L. A. Hawkins

Q. Can a dog or man see in a pitch-dark room after remaining there a period of time?

A. If the room is totally dark so that absolutely no light is present, neither man nor beast can see. It may seem as if the dog can see when he finds his way to his master in total darkness, but this is due to his keen sense of smell and not his vision.

Q. Does sound travel faster in moist air than it does in dry air?

A. There is a very small increase in speed in moist air. Accurate tests have shown that sound travels through perfectly dry air at 10 degrees C at the rate of 337.16 meters per second; and through air of average humidity at the same temperature at 337.60 meters per second.

Q. Does the changing from broadcast to shortwave bands cause any injury to the tube filaments in a radio receiving set?

A. Normally the tube filaments are not affected when the set is switched from one band to the other. This involves changing coils and condensers, but the filaments of the tubes are not disturbed. Of course, one could injure the filaments by an improper connection, but commercial receivers are not designed that way.

Q. What is the time of rotation of the sun on its own axis?

A. That question brings up a remarkable fact, one which relatively few people realize. The sun is actually rotating faster at its equator than it is near its poles. There are several independent means of determining the period of rotation of a given spot on the sun's surface; these methods give results in fairly close agreement with each other, and they all show the same thing: the closer a spot on the sun's surface is to its equator, the faster it travels. For example, a spot on the sun's surface 90 degrees from the equator will rotate around the sun's axis in 35.4 days; but a spot at the equator will make one revolution in only 25.3 days. By days, of course, is meant the length of one of our days.

Q. If there were no atmosphere with its attendant dust particles, would there not be but one straight beam of light from luminous bodies such as the sun, moon, and stars?

A. Yes. Light from the sun, moon and stars would travel in straight paths and there would not be any scattering of light such as there is in our atmosphere. If the atmosphere were taken away, all living things on earth would perish.

Increased M.B.A. Benefits Proposed

Impressive Ceremonies Mark Memorial Program

Impressive ceremonies marked the Memorial Day program held in McCulloch park under the sponsorship of the G. E. World War Veterans Association. At the close of the program a wreathe was placed at the base of the Memorial Flag Pole facing Broadway. In the above picture Carl Rehling, Bldg. 20-2, left, and E. K. Spiker, Bldg. 19-3, have just completed placing the wreath and are standing at attention during the volleys from the firing squad.

Hundred Seventy-Three Earn $1,333 For Ideas

Given awards of $35.00 Donald B. Poland, Bldg. 26-3, and Calvin W. Marhenke, Bldg. 19-1, lead the latest suggestion award list which includes one hunder and seventy-three suggestions on which awards totaling $1,333 were paid. Mr. Poland's award was on his suggestion for stocking strip numbers for coil markings and Mr. Marhenke's on providing simpler test report forms.

Close seconds on the list are F. H. Lemper, Bldg. 4-1, and Louis Scherer, Bldg. 19-4, each having received $30.00 for their suggestions. Mr. Lemper's suggestion led to the adoption of special dogs to eliminate tool wells and Mr. Scherer's to the salvaging of aluminum scrap.

Three awards of $25.00 each were made as follows: Amos Schladenhauffen, Bldg. 19-3, providing fixtures for coil support rings; George Fields, Bldg. 27, suggesting changes to oil ring slots in bearings, and George C. Braun, Bldg. 17-3, suggesting changes to flanges. One award of $22.00 was made to Eldon Walker, Bldg. 26-3, and two awards of $20.00 to Rohland O. Fowler, Bldg. 4-5, and Dale F. Stuckey, Bldg. 26-3. An award of $15.00 was made to Wr[illegible]he, Bldg. 7-1.

Other awards ranging from $5.00 to $12.00 were made to the following employees.

Fred A. Burkett, Bldg. 20-1; Alfonso D. Hellwig, Bldg. 26-1; James J. Neuman, Bldg. 17-1; Harry A. Freeman, Bldg. 26-2; Doyle Miller, Bldg. 22-1; Lovine H. Witte, Bldg. 26-3; Rose Mary Bender, Bldg. 26-3; E. H. Leitz, Bldg. 26-2; Ellis M. Nelson, Bldg. 26-2.

Ronald McPherson, Bldg. 26-3;

Ruling Regarding Employees' Purchases

Attention of employees is again called by the Employees' Store to the ruling of purchases made through the store by employees.

Employees' discounts on purchases of major appliances, such as G-E refrigerators, water heaters, washers, ironers, dishwashers, sinks, radios, etc., are made with the distinct understanding that these appliances are for the exclusive use of employee purchasers in their homes.

The employee sales certificates, which employees sign, plainly state this condition of sales.

There can he no deviation from the ahove ruling.

Appliances with list prices of less than $25.00, may he purchased at the Employees' Store as a hona-fide gift.

G-E Stages First U. S. Blackout Demonstrations

Specially Designed Luminaires Permit Traffic Flow Without Being Visible From The Air

Blackout lighting, which facilitates the flow of auto and pedestrian traffic without being visible from the air, was demonstrated in this country for the first time at Lynn, Mass., the night of May 14 before a crowd of 7,000, including prominent officials from 50 electric utility companies, the army, and numerous city governments.

Arranged by General Electric engineers, the demonstration consisted of the lighting of twelve specially designed blackout luminaires spaced 100 feet apart along Parkland avenue. As the regular lights were turned off, airplanes droned overhead, adding a realistic note. With the blackout lights of

(Continued on Page 2)

KINDLING AVAILABLE

A supply of kindling is again available for employees. Orders may be placed with the personnel Office in Bldg. 21. No charge is made for the kindling but a handling charge of $1.00 for a full load and 50 cents for a half load must he paid at the time the order is placed.

Membership To Vote On Changing By-Laws

Five Cent Increase In Dues Will Offer Worthwhile Additional Benefits In Hospital, Sickness and Accident Payments

Proposed changes in the constitution and by-laws of the Mutual Benefit Association of the Fort Wayne Works which, if adopted, will result in increased benefits to the membership have been announced and are being submitted for action of all members.

The primary purpose of the proposed changes is to increase the hospital benefits from $3.50 per day to $4.00 per day. To accomplish this it will be necessary to increase the dues five cents per week for members in all classes. However, this increase will not only

(Continued on Page 8)

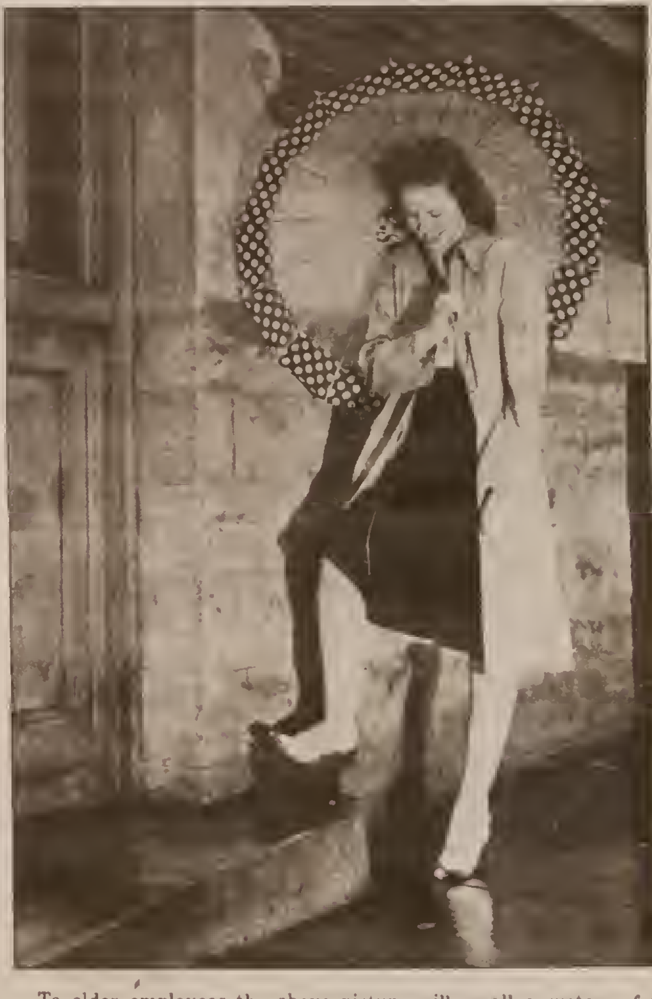
NOTICE

Attention of employees is called to the ruling prohibiting the bringing of cameras, by other than authorized persons, onto Company property. This ruling has heen in effect for a considerable period but its strict enforcement is even more important at the present time than ever hefore.

Violators of this rule will be required to turn over their cameras to this department.

Plant Protection Dept.

The Old — And The New



To older employees the above picture will recall a custom of the "good old days" when unpaved streets and muddy paths were one of the pet peeves of the exacting housewife. To the younger employees we will explain that the object attracting Pauline Sinnegan's attention is a shoe scraper, probably enjoying its first use for "lo these

Have We Forgotten?

The lessons of our childhood days which told us that all in this country have a chance to make something of their lives, unhindered and unhampered by any government of ?

THAT the history of our country has always been marked a progressive march away from the chains of any dictator?

THAT thousands upon thousands of the best men our coun- ever raised, have laid down their lives so that the principle nation was founded upon, might live and be enjoyed by and our children and their children?

THAT America is fundamentally made up of people who here to escape the very things now being imposed upon ope?

THAT it is up to each of us to pitch in and help the best ment in all the world do the job it must do, if our coun- is to stand and lead all nations in preserving the right of beings to live as men and women, and not abject slaves?

Books are the negative pictures of thought, and the more tive the mind that receives their images, the more nicely finest lines are reproduced. —O. W. Holmes

The man who knows how you can make a lot of money in time at all is usually broke.

When a man begins to realize the truth about himself, it frequently retards his program for reforming his neighbors.

An open mind is all very well in its way, but it ought not to so open that there is no keeping anything in or out of it. It ld be capable of shutting its doors sometimes, or it may be and a little draughty. —Samuel Butler.

Accumulation Plan On Defense Bonds

A new and amended Income Accumulation Plan for the purchase of United States Defense Savings Bonds, Series E, was placed in effect for all employees of the Company on June 2, it was announced this week. The plan enables employees owning G. E. Employees Securities Corporation bonds to accumulate the fixed interest and additional interest payments on such bonds and also to accumulate General Profit Sharing payments.

Under terms of the plan, income from G. E. Employees Securities Bonds and from General Profit Sharing will be kept separate from the general funds of the Company and no interest will he allowed the participant, as none will be earned by the Company.

Employees desiring to participate in the Income Accumulation Plan should fill in and sign an Income Accumulation Order, Form TD-171-A, which may be obtained from department heads, foremen, payroll departments, or from J. W. Lewis, treasurer of the Company at Schenectady, and deliver it to any of the foregoing.

An account will be maintained for each participating employee to which will be credited the above mentioned bond income and/or General Profit Sharing accumulations.

As of June 1 and December 1, a United States Defense Savings Bond—Series E, with a maturity value of $25 or multiples thereof, will be delivered to each participating employee for each $18.75 or multiples thereof, in his account, and any balance will remain to his credit.

Further information about the plan may be obtained from department heads, foremen, payroll departments or from the office of the treasurer at Schenectady.

Beauty And The Blackout

Judy Sivelle, holding one of General Electric's new blackout luminaires, demonstrated for the first time in the United States before one hundred utility experts and municipal and Army officials from many parts of the country. The demonstration took place in Lynn. The luminaire is shaped like an admiral's hat and burns a 2½-watt argon lamp. This combination produces about one candlepower of light, or roughly compared with 4,000 candlepower of light from a modern street lamp. Twelve luminaires were installed 100 feet apart, 22 feet high, along Parkland Avenue in Lynn for the demonstration.

New Investment For The Additional Pension Trust

Since the inception of the Additional Pension Plan, the greater part of the assets of the Additional Pension Trust have consisted of obligations of the G. E. Employees Securities Corporation. These assets are now represented by participating notes of the G. E. Employees Securities Corporation bearing the same rate of income as G. E. Employees bonds. For the year 1940, this was 5.6%, consisting of the fixed rate of 4% and additional interest of 1.6%.

In conformity with the General Electric Defense Savings Plan, whereby the sale of G. E. Employees bonds has been suspended so that such sales may not interfere with the sale by the Government, of United States Savings Bonds, consideration was given to the desirability of investing new money coming into the trust in these Defense Savings Bonds, but the United States Treasury Department regulations prohibit the acquisition by this type of Trust of more than $50,000 of such bonds in any calendar year, and as the amount available for investment each year is many times this sum, the Trustees had to find other channels for its investments. After surveying the field, it was decided to accept an offer of G. E. Employees Securities Corporation to take new money for investment at an annual rate of 3% as the most attractive investment available.

For the remainder of 1941 it is estimated that these investments will amount to about $1,600,000, and will represent less than 9% of the assets of the Trust. This money will he invested from time to time during the remaining months of the year, and it will, therefore, be seen that the effect on the average rate of income of the Trust for 1941 will be slight.

Total assets of the Trust on April 30, 1941 amounted to $16,988,028 and there were approximately 44,000 employees of General Electric Company and its affiliated companies participating in the Plan.

First Blackout

(Continued from Page 1)

about one candlepower each replacing the 4,000-candlepower street lights, it was possible to see persons or objects at a distance of about 25 feet. The crowd had been cautioned not to light matches or smoke cigarettes during the demonstration inasmuch as it takes about 15 to 20 minutes for the eyes to become adjusted to the low level of illumination.

The blackout luminaires are shaped like an admiral's hat and use a 2½-watt Argon (gaseous) lamp. The light they give off cannot be seen at more than a few hundred feet above the ground. Thus a whole city lighted with it would be invisible to bombers or observation planes which usually operate at about 20,000 feet to be outside the range of anti-aircraft fire.

The Argon lamp also gives off invisible light in the form of ultraviolet rays. It was demonstrated that fence posts covered with fluorescent paint glowed when activated by the rays. Sign posts, curhs, and perhaps even vehicles could be painted in the same way to increase ground visibility with the blackout lighting, it was explained.

Notables witnessing the demonstration included Dr. H. E. Ives, Chairman of the Illuminating Division of the National Research Council; Captain Warren Everett, traffic control expert of the Army engineers board from Fort Belvoir, Va.; A. D. Cameron, Chairman of the Illuminating Engineering Society; N. J. Kelly, Chief Engineer of Water and Light of the Department of Water Supply, Gas and Electricity, New York City; and A. F. Dickerson, Manager of the G-E Lighting Division at Schenectady, N. Y.

Fathers Guests Of Daughters Monday

Reservations will close today for the fathers and daughters party to be held by the Elex Club next Monday evening. The affair will start at 8 o'clock and will be held at the Turners. Prizes will be awarded to the fathers.

The program includes a "Dutch" lunch followed by an old-fashioned minstrel show.

Tilting Panel Features New Line Of Printing Press Controllers

A tilting panel that may be dropped 90 degrees is an outstanding feature of a new General Electric line of preset speed and remote preset-speed job-printing press controllers in which are emphasized accessibility, low maintenance cost, and ease of installation.

Applicable to many types of presses in the book and job printing industries, the new controllers are available in ratings from 3 to 40 horsepower, with preset speed points ranging from 16 to 27 speeds. They may be operated on either alternating or direct current, and on two- or three-phase power systems.

The tilting panel is one of the design features incorporated in the new line to provide maximum accessibility for inspection and maintenance. This feature provides easy access to all wiring, studs, and resistors behind the panel simply by removing two holding bolts and lowering the panel. The controller's deep door is so designed that the panel is flush with its enclosing case—thus making the contactors and relays on the front of the panel accessible from all sides when the door is open.

Attractive styling contributes to the modern design of the new line of controllers.

What the Present "Business Boom" Means to All of Us

MOST of us think of periods of rapidly expanding business activity as "good imes"– orders pouring into factories, new buildings going up, lots of work, thousands f new jobs –a period of general prosperity. We think of 1929– two chickens in every ot two cars in every garage.

So it's not surprising that we've been optimistic lately. The curve of business activity has been jumping by leaps and bounds, new actory buildings *are* going up, thousands of new employees *are* being hired. From this we might gather that we're heading into at east three or four years of the best "good imes" we've ever had.

But are we? Maybe we're kidding ourselves n some respects. Perhaps we ought to examine our present "boom" a little more closely, to see the kind of stuff it's made of.

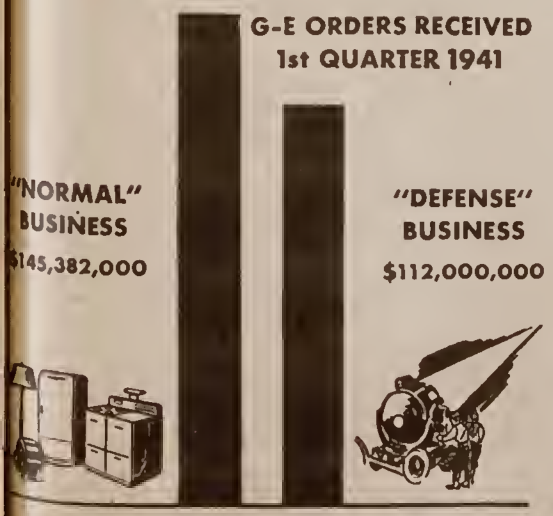
BIG DEFENSE ORDERS

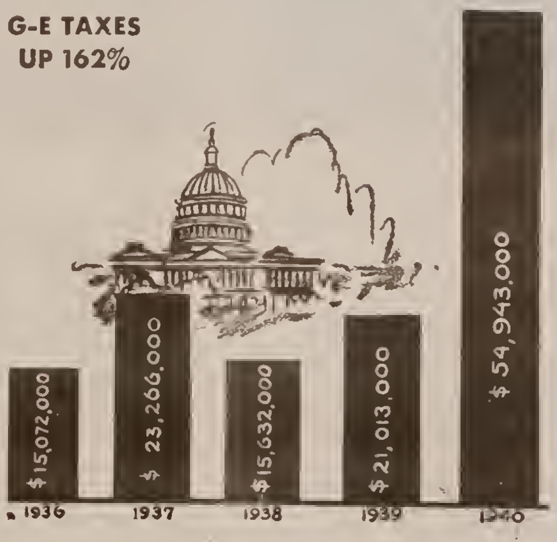
ORDERS received by our Company last year were up 81% over 1939. In the first quarter f this year orders received were 164% over the orresponding quarter in 1940. Seems like ample vidence that a business boom is under way—ut let's look further. Thirty-eight per cent of ur orders received last year were for defense. Of the orders received during the first quarter of 941, 44% were for defense. President Charles E. Wilson recently announced that our Company ow has a backlog of business amounting to 500 illion dollars, and that three-quarters of it is or defense work. Without doubt a large part of ur "normal" business is also to be used indirectly n some phase of the defense program.

hese big defense orders added very little to G.E.'s rofits in 1940. Our defense contracts are being ndertaken without regard for profit, and we shall e lucky if we break even on much of our defense ork. The Company is willingly devoting a large nd constantly increasing portion of its facilities o the needs of our armed forces, even though we re finding it necessary to cut down on our production of regular products to fill defense orders. The present emergency demands nothing less than this.

Since the beginning of 1940 employment has taken a big upswing. Starting the year off with 70,000 employees, G-E employment rose to 88,600 by the end of the year. Since the beginning of this year, we have been adding to our payrolls at the rate of about 1000 a week, and the total employment now stands close to 105,000, largest number in Company history. And most of these new employees have either gone to work on defense projects or into training for defense work. During the last year contracts have been let for construction of many new buildings at several G-E plants. The total cost of this expansion program is more than $50,000,000. And these new buildings have one purpose: the production of defense materials.

THIS IS TYPICAL of what is happening to business throughout the country today. Industry is working at top speed, but a large and growing proportion of our national effort is being devoted to vital defense needs. Production for defense must have first call on raw materials, on manufacturing facilities, on the nation's manpower. The output of nonvital peacetime goods must be subordinated to the needs of our armed forces.





PAYING FOR DEFENSE

ANOTHER factor which must not be overlooked in appraising our present "boom" is the problem of paying for this rearmament program. To be sure, the government can borrow part of the money required, but it's only good sense to pay for as much as possible as we go along. Present plans are to pay for two-thirds of it and borrow one-third.

New and more stringent taxes that affected all of us were levied last year. The introduction of the amusement tax has forced us to pay extra pennies when attending movies, sports events, dances. More inclusive excise taxes are forcing us to pay more for automobiles, perfume, cigarettes, and other luxury items.

Income taxes were increased last year. Exemptions for individuals were lowered so that approximately a million people had to contribute who had never paid income taxes before. Corporation taxes were also greatly increased during 1940. The amount G. E. provided out of income for 1940 direct taxes—$54,943,000—was more than two and a half times as much as for the year before.

And almost certainly our national tax bill for 1941 will be much higher. A three and one-half billion dollar increase in individual, corporation, and excise taxes has been proposed to the House Ways and Means Committee.

OUR PRESENT "BOOM" IS DIFFERENT

LOOKING back at 1929, we realize that it was a boom year because we turned out more automobiles, electric refrigerators, radios than ever before. Half a million new homes were built, thousands of furnaces replaced parlor stoves, thousands of homes were wired for electricity, thousands of new telephones were installed. Because we built more automobiles, radios, refrigerators, telephones, furnaces, and other things, people had more of these goods than ever before—and so we had prosperity.

Today the picture is different. The new factories we're building, the new employees we're hiring, the overtime we're working, is all for the purpose of producing, not consumer goods, but guns, tanks, battleships, warplanes. These devices will help to protect our present living standards, of course, but they won't raise our standard of living one bit. We don't drive tanks on pleasure trips, use battleships for apartment houses, bake cakes out of gunpowder, nor heat our homes with aviation gasoline. The armaments we're turning out, like life insurance, are essential to security, but we've got to pay for them. Buying more life insurance may mean that we can't buy that new car we wanted.

SECURITY MEANS SACRIFICE

THE years immediately ahead promise to bring blessings in the form of increased employment. As one business man put it recently, "The (business) problems we are facing today are more difficult than those we faced in 1933, but they are far more pleasant to deal with."

But they will be years, too, of sacrifice, not years of rapidly rising living standards. As individual citizens we shall all be called upon to make real personal sacrifices to insure national security.

And whether the part we are called upon to play consists of leaving our jobs for military training, or whether we stay on the job to produce the armaments that are just as vital to America's defense, the road ahead will call for courage and the determination to put our shoulder to the wheel as never before.

Leaders In Latest Suggestion Award List

Leaders in the latest suggestion award list which netted one hundred and seventy-three employees a total of $1,333 are shown above. They are, top row, left to right—F. H. Lemper, Bldg. 4-1; Geo. I. Fields, Bldg. 27; Louis Scherer, Bldg. 19-4 and Donald Poland, Bldg. 26-3. Second row, left to right—Amos Schladenhauffen, Bldg. 19-3; C. W. Marhenke, Bldg. 19-1 and George C. Braun, Bldg. 17-3.

Reservations For Elex Excursion Close June 10

With much interest being displayed in the Elex one-day excursion to Cincinnati on Sunday, June 15, it is anticipated that reservations will run exceedingly high. All reservations must be in by June 10 and may be made by both men and women employees.

The excursion is being planned to permit those participating to see as many points of interest as possible. The charge is $7.25 for members of the Elex Club with a small additional charge for non-members. The charge will include round-trip railroad fare in air conditioned coaches, a sight seeing tour, dinner at the Netherland-Plaza, transportation to and from the "Island Queen" for a trip on the boat to Coney Island and return.

Baseball fans, who prefer, may attend the double header scheduled between the New York Giants and Cincinnati at a slight additional cost. Reservations for the game must be made not later than Monday.

The special train will leave Fort Wayne over the Pennsylvania at 6:45 a. m. Daylight Time and arrive in Cincinnati at 10:30 a. m. the return trip the train will leave Cincinnati Union Station at :45 p. m. Eastern Time and arrive Fort Wayne at 11:30 p. m. Daylight Time. Reservations may be made with Irene Meyers, Eva Lynn or Eileen Morris Fore at the Broadway plant or with Helen Bleke and Louise Schwartz at the Winter Street Plant.

4 Magneto Mumblings

By The Eavesdropper

We wonder why—

Ivan Osterman came to work the her morning all decked out in w summer togs. Could it be that ose pretty girls on the second ift have you interested, Ivan?

James S. Woodward keeps insistg that all the little rivers that n into the Nile are called Juvenes.

Mid McKarns arrived in the office minutes late the other afteron. Now we wouldn't want it reated, mind you, but a little fine athered friend told us she forgot r button. Why, Mildred!

Nola Dinger was having such a onderful time riding the Merry-o-Round, of all things, out at est' Swinney last week.

Burville's "Jitterbug" Shuler s feeling not so very happy last onday morning. The story goes, Bill tells it, that his pet cat ratched him on the face, and he els sooooh abused. Pahdon me, t yours truly feels sooooh nused.

Howard Timmis is always runng out of matches. Even when arold Kroeger and Bill Shuler, e generous souls, brought him a hole carton one day, he misplaced em, and started back on the failiar wail of, "Brother can you are a match?"

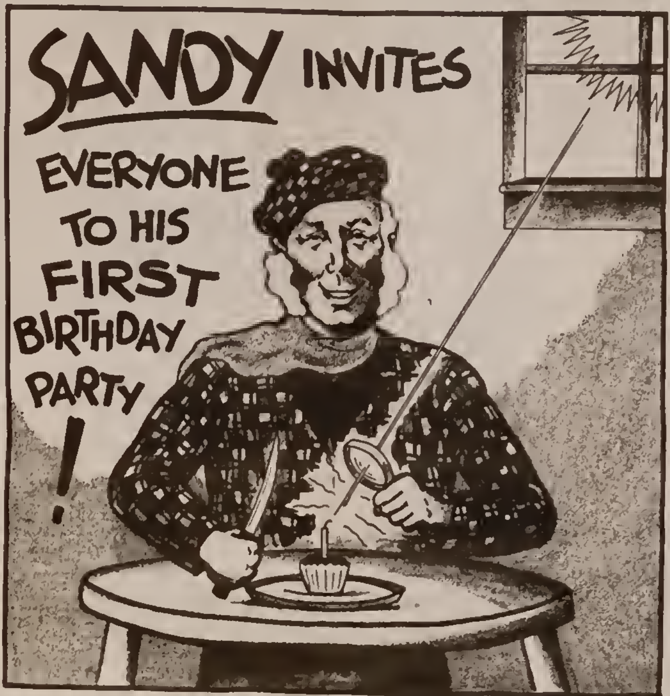
Harold Kroeger is continually eaking things. It wasn't enough en he broke a record or two, but w he has added to his collection broken pieces (and hearts ?) o ash trays, and a beautiful 5 ot by 3 foot mirror. Would you l a person like that a "breakaniac?"

eventeenfore Splurges

Henry Roembke invested in a w summer outfit. Shoes, shirt, users, etc. After touring the ole town to get the best barins, he finally was satisfied. Lo d behold when Monday morning me, in comes Henry strutting e a proud peacock. But upon ening the gate, he could not find identification button. He rembered then that he had left it his old reliables at home. After king a 40 mile jaunt to get the ch prized button, he finally rted the day. The only remark could get from Henry was, here goes all the savings on my outfit." . . . Fred Stauffer, our twhile Swiss Yodeler, was overrd trying to organize a school yodeling. He has been consultour former school teacher, rley Talbot, as to the fine points education. Why not hire Shirley principal, Fred? . . . No doubt, week-end Ed. Schneider will ke his yearly jaunt to Grand ven, Mich., and says the only g to make the trip more of a cess would be to have his old dy Dick Seidel with him. What he main attraction there, Ed? It sure was good to see our old nd Leona Scheuman again. She been doing some work in the artment lately and wonders the boys don't buy her a piece andy now and then if they are lad to see her. . . . Frank Koziol finally made up his mind to get w car. He is now baffled as to t color to get, but thinks he make it red because he likes ollow the fire department.

hroughout the world there are 000 miles of railroad, of which y per cent is in the United tes.

SANDY SAYS . . . . .



SANDY INVITES
EVERYONE TO HIS FIRST BIRTHDAY PARTY
!

Hoot Mon! This column is getting tae be a habit. One year ago this week the first one slipped out—so that makes this one an anniversary number. O' COURSE ye ALL have the habit o' reading it, probably better than I hai that o' writing it. I never can seem tae get into that habit.

I hope I do. Habits grow on a lad. I had tae give up the gum chewing habit, because it got too oxpensive. It got so I wasn't satisfied with less than a whole stick at a time—and had to have a fresh one every Monday.

If gum would only last like "In The Rough", (6 years), or even 2 years, like "From the Feminine Viewpoint". Old Sandy takes his tam off tae Hilda, Irene, and Walter. They're all still fresh as a new stick o' Spearmint — when they have a right tae be swelled up like bubblemint.

Even in one year I figure that somewheres around 20,000 words have been used in this column. Now, If those words were laid end to end —they'd reach lots farther if I knew more two-syllable ones. My Cousin Colin tried ta teach me some big words tae spring on ye this time.

"Now Sandy", he said, "Ye better start wi' the meanings o' them. First, do ye ken what a mongoose is?"

"Sure", I said, "A mongoose is a goose that don't lay eggs, so ye sell him."

"No, that's a gander. A mongoose drives away snakes".

"No, that's St. Patrick, and this is June. I wrote about him in March."

"Ah yus," said Colin, "A lot o' water has gone over the dam since then. In fact, it's rained catfish and dogfish since then." (He's a loyal member o' the Rod and Gun Club.)

But, alas, if I don't write something deep in this column, it might not "make" the W. N. So I'll have tae say something. Lets consider that great labor-saving device, The Steam Whistle on the locomotive. Now, some poor, misguided souls say that it just makes a lot o' noise, and doesn't do any work. But ye never saw one o' these whistle whiffers that knew how many bushels o' steam it takes per toot, or how many lumps o' coal. Now, the Whistle has its place, like all the rest o' us, and if they put the fireman out on the cowcatcher and let him try to attract our attention, instead o' using the Whistle, he'd probably use more lumps o' coal, and ruin the pitching arm o' the round house rounders to boot. O' course the first lump he threw would be new,—but the rest would be carbon copies.

Elex Rummage Sale To Be Held Two Days

The Elex Club will hold a rummage sale on July 11 and 12. The second shift girls will be in charge on Friday, July 11 and the day shift girls on Saturday, July 12. Chairmen for the sale are Evelyn Blakey, Betty Minard and Dorothy Dissinger.

Teacher (lecturing on perseverance): "He drove straight to his goal. He looked neither to the right nor to the left, but pressed forward, moved by a definite purpose. Neither friend nor foe could delay him, nor turn him from his course. All who crossed his path did so at their own peril. What would you call such a man?"

Graduate (quickly): "A truck driver."

Thisa And Thata 19-5

Did everyone enjoy their vacation? It sounds as if. Avinell Gailey spent the week-end resting and cooking. . . . Ruth Reed found the three days swell for cleaning the cottage. . . . Betty Lang also did a little cottage cleaning but filled in with dancing. . . . Thelma Pond states she did absolutely nothing and enjoyed herself immensely. . . . Esther Ehle enjoyed the Memorial Day parade. . . . Margaret Hilgeman went to Illinois to see an old friend of ours, Pauline Petty. . . . All in all it seems that everyone enjoyed the holiday. Here's best wishes to Hazel Martz and Margaret Fiester who are on a week's vacation.

Sophomore. "Were you ever bothered with athlete's foot?"

Frosh: "Yes, once when the captain of the football team caught me dating hls girl."

Winter Street News

Harold Hartman went to the circus and had an old fashioned tummy ache the next day from eating too many peanuts. He should have taken off the shells. . . . Eddie Heemsoth got his hair cut short to make it grow, and believe it or not that is what happened. It used to remind us of heaven "there is no parting there" but not any more. . . . Famous last words: "I want a man from Texas"—Jeannie. . . . The Tool Room boys are wondering if the Walden brothers know enough to get out of the rain. They were seen playing catch during a recent downpour. Just a couple of wet smacks. . . . Having two summer suits does have its disadvantages, especially when you have to go home to get your badge from the one you are not wearing. Sure ask Wayne Cook. . . . Al Ralston has been looking at new cars lately and sure enough he got caught. He's driving a nice new blue job but judging from his "tomato" tan he must have done a lot of pushing over the week-end. . . . Three hundred and sixty-five days a year and Marcella Johnston and Mary Jane Minehart pick the same date for getting married. They even work in the same department. Oh, boy. Two cigars coming. . . . Genial Bill Kelsey is recovering nicely after a recent operation. Keep it up Bill and be back soon. . . . Barbara Curtis really seems to see red when they call her "blue eyes". There must be some story here but we can't dig it out. . . . Mr. Kelly, Everett to his friends, dished out the cigars last week. Yes, sir, he went and got hitched.

Hermetic Office 17-2

Wonder what's wrong with the "Windy City" that makes Luella Franke cut her vacation in Chicago and return a day early? Can it be the breeze, no. . . . We wouldn't look as happy as Red Smith if we had spent a three-day vacation fishing in Michigan and caught only one fish. Maybe his expectations weren't as great as the fish stories he told before he went. . . . If just the thought of talking over the telephone to Merl Kirkpatrick gets the man in the stationery department so confused he has to call three times before he gets the order straight, what would happen if we had television? . . . Figure this out: Helen Buuck bought a brand new coupe to drive to St. Louis and see her "flying heart beat", and then acquired so many passengers she had to borrow a larger car!

SUZY SLEUTH.

From The
Feminine Viewpoint

By Irene Perry and Hilda Barthold

It's June once more—has been for several days. We all know what June means, brides, graduates, and even Dad has been honored by a June Sunday. It really wasn't fair to Dad to set his day during a month when it's almost certain to be over-shadowed by weddings, graduations, college, high school and eighth grade. But then Dad mostly wants to be unassuming and avoid the spotlight. We know he's in there swinging, and we can always count on him!

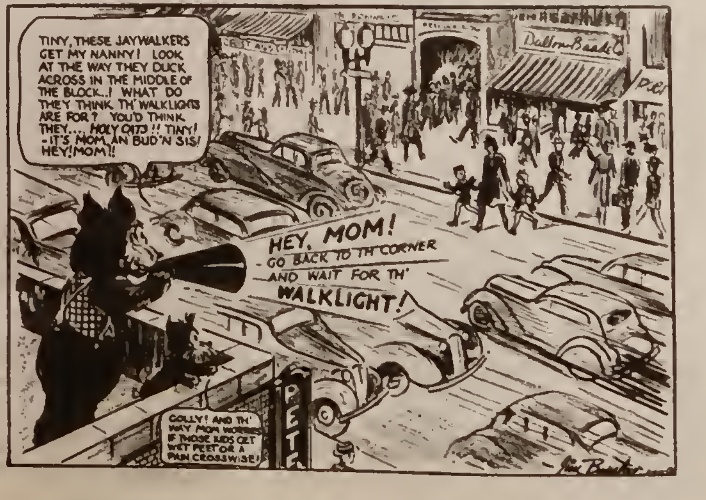
With these gala occasions, all of which call for gift-giving, June runs December a close second for shopping for presents and agonized perplexity as to what gifts are the most appropriate.

Gifts for the bride should receive the most careful consideration. It's always a good idea to do a little refined snooping and learn a little of the newlyweds' plans for the future, then select your gift accordingly. People who expect to begin their housekeeping in a small apartment won't be able to use as many things as those who are moving into a house of several rooms. Wedding gifts that have to be stored away for several years perhaps, may prove to be out of style, or quite out-moded by the time they are used. Of course good quality linens are always in fashion.

Then there is the question of quantity. We mean by this, how many of a certain article has the bride received and how many can she reasonably expect to use? For example, we knew a bride who received four casseroles and a dozen or fourteen pairs of salt and pepper shakers. In this case, we played safe and gave her an electric iron. What make did you say? Well, the initials were G-E, and any G-E appliance makes a superlative gift.

Marjorie Kavanaugh, Bldg. 4-3, really had her troubles the other day when everybody was so generous as to keep her three water buckets full of water. The trouble was that Marjorie was wearing them as a dress ornament.

What's this we hear of Golda Mentzer and Velma Meads of Bldg. 26-2, appearing in Waterloo wearing grass skirts. Even if Golda did go into a dance it's a long way from Waterloo to Honolulu.



TINY, THESE JAYWALKERS GET MY NANNY! LOOK AT THE WAY THEY DUCK ACROSS IN THE MIDDLE OF THE BLOCK..! WHAT DO THEY THINK TH' WALKLIGHTS ARE FOR? YOU'D THINK THEY.... HOLY CATS!! TINY! -IT'S MOM AN BUD'N SIS! HEY! MOM!!
HEY, MOM! - GO BACK TO TH' CORNER - AND WAIT FOR TH' WALKLIGHT!
GOLLY! AND TH' WAY MOM WORRIES IF THOSE KIDS GET WET FEET OR A PAN CROSSWISE!
PETS
Dalton-Baake

Motor Generator Static

Big Bizness.

Bob Archbold and Jerry Frye, two enterprising young men of the Planning Department, attempted engineering a business deal that would shame Shylock, Wall Street, and all financial wizards into the deep background. These two boys collected an assortment of tobacco, which when mixed together was called a "blend" and set a price of either one penny, one box of matches, or three paper folders of matches per pipe full—that was too much. "Pappy" Archbald was heard to remark, "They should pay to have that stuff taken away, not try to charge for it."

Story of the Week.

"Outboard motor for sale", reads a sign on Bill Grover's cottage at Lake James. Bill was never inclined to stretch the truth or misrepresent (much), so we all accept the explanation, that he has a large catfish trained to pull his boat around the lake, thus eliminating the need of a motor. But it does sound fishy.

Expose.

For years the Motor Generator Division has stood in fear of Dwight Myers, Bldg. 19-3, who represents the power of the press in this section.

He has exercised almost absolute control of what has or has not appeared on the pages of the WORKS NEWS concerning this group and while he did many things that warrented publication—nary a line passed by his watchful eye.

About this time each year, our hero has a hankering to carry into work, great bunches of posies, and if unrestricted, the Cost Department would resemble and smell like a florist's convention.

However, this seasonal mania only lasts a few weeks and then lies dormant 'till the next spring. Meanwhile, fellows, for Pete's sake, don't call him "Buttercup"—I don't think he likes it.

Frank "Arkie" Ruesewald, Bldg. 19-3, was observed one noon last week cutting out paper dolls; could it be that all the live ones have turned our Arkansas traveler down, and rather than live alone, he has resorted to paper dolls? Woe is me if such be the case.

Maynard Spade of Bldg. 19-3, reported to the Detail Dept. for work Monday after a week of wrestling with measles. Just can't think a man of Maynard's age would cheat some kid out of the measles.

Joe Burton of Bldg. 19-3, went to Toledo, Saturday, to measure the depth of the Maumee river. Joe seems to have had an argument about the amount of water in the Maumee so he journeyed to Toledo to prove his point.

Jerry Frye has heard so many nice remarks concerning his saying of the week that he feels like the fire-fly that flew into the electric fan and lost its tail—"De-lighted, no end."

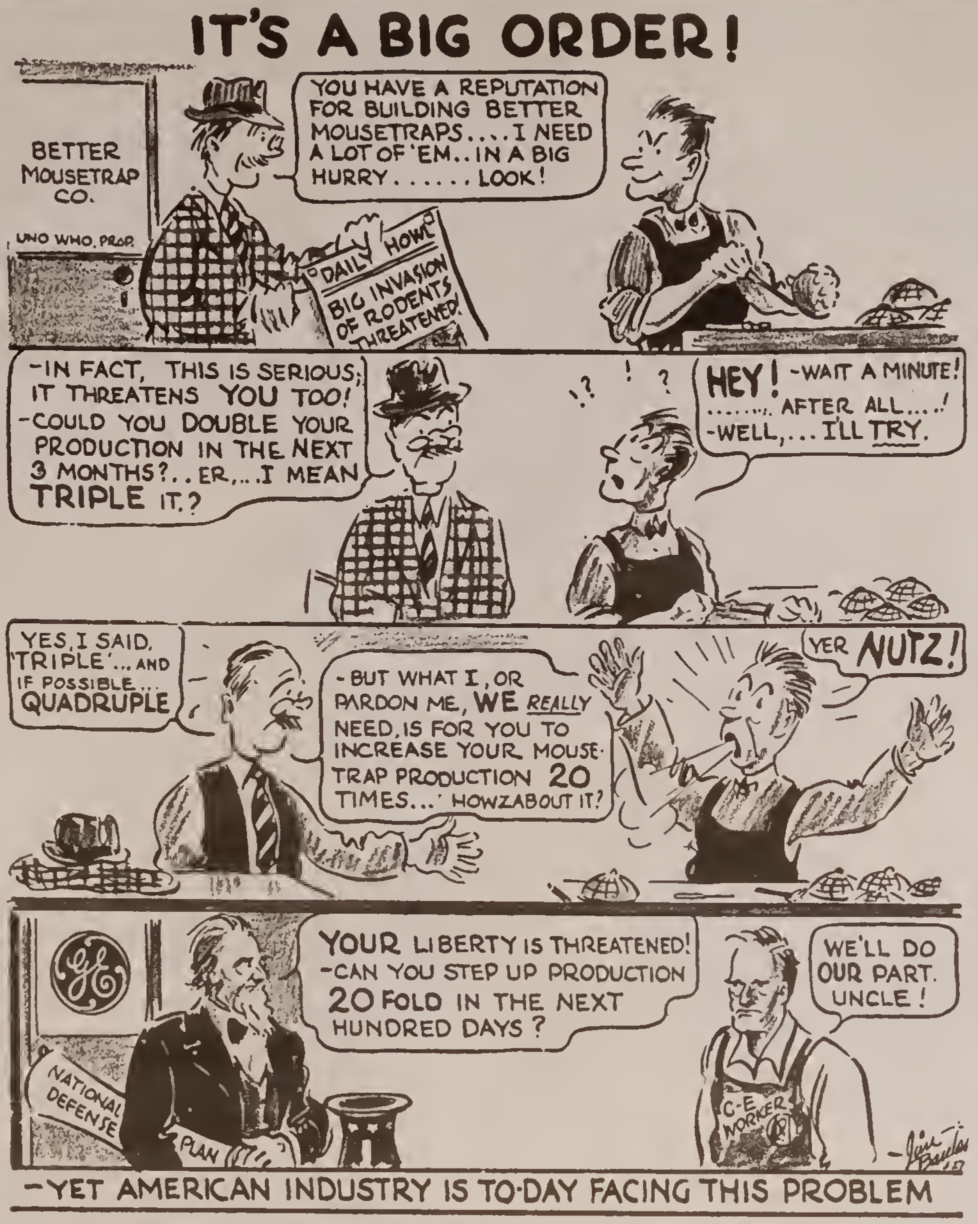
Notice in Scotch church: "Those in the habit of putting buttons instead of coins in the collection plate will please put in their own buttons and not buttons from the cushions on the pews."

Employer: "Surely, Miss Jenks, you know the King's English?"

Typist: "Of course he is. Whoever said he wasn't?"

"John, I'm sure I heard a mouse squeak."

"Well, do you want me to get up and oil it?"



IT'S A BIG ORDER!
BETTER MOUSETRAP CO.
UNO WHO, PROP.
YOU HAVE A REPUTATION FOR BUILDING BETTER MOUSETRAPS.... I NEED A LOT OF 'EM.. IN A BIG HURRY...... LOOK!

-YET AMERICAN INDUSTRY IS TO-DAY FACING THIS PROBLEM

West End Of 17-2

Fashion Flash! The newest in June Bridal gear will be modeled by Evelyn Taggartt and Dorothy Burkhart, gliding to the tune of Lohengrin Wedding March and the dates will be June 7 and June 24. Good luck to both and lots of happiness. The same goes for Lois Munich, who heard, and answered "I do" a week ago Saturday.

Height of Ambition Achieved! Ralph Solt, (in all his glory now) reports that he found a mushroom that is ten inches high and ten inches around. Anyone caring to doubt this, please see Ralph, who has the actual pictures. This is no fish story.

Ghost Story! Did you see the outstretched glove floating around on the conveyer, with "Hi Ye, Babe" tacked on it? Sh! Looks to me as though Ruth De Haven had a hand in it. Am I right?

For quick dry-cleaning-while-you-wear-'em, I refer you to Violet Brower who has taken it up as a hobby.

The Old - And The New

(Continued from Page 1)

many years." Of the thousands of persons who annually pass through the doors of the Main Office building, probably very few have noticed the scrapers which were reported to us by a particularly observant employee. Miss Sinnegan, who kindly consented to pose for this picture is a new employee in the payroll department.

M.B.A. PATIENTS

General Purpose Motor: Louise Walker, 2245 Pittsburgh St.; William Russell, 320 E. Wildwood Ave.; Roy Pflueger, 1125 Kinnaird Ave.; Verdella Neuhouser, Markle, Ind.; Ruth Maloy, 1219 E. Washington St.; Inez Hatfield, New Haven, Ind.; Gay Huey, 1918 Kinsmoor Ave.; Martin Blakley, 1620 California Ave.; Doris Mae Anderberg, 1436 Taylor St.; Harry Ecenbarger, St. Joe Hospital; Erma Barry, Methodist Hospital.

Transformer: Ellen Curley, 4810 South Weisser Park Ave.; Robert Aulbach, R. No. 2, City; Max Lawrence, Columbia City, Ind.; Thomas Ryan, 722½ Barr St.; Bernitta Sander, 825 W. Berry St.

Series & Specialty: Frederick Roebke, 1219 Huestis Ave.; Mary Greer, 435 East Wayne St.; Bertha Noble, St. Joe Hospital.

Winter Street: Wm. Kelsey, 1902 Drexel Blvd.; Bernard Lauer, 1816 Luther St.

Motor Generator: Charles Close, 1022 Schick St.

General Service: Ferman Polland, Bluffton Road; Charles Taylor, Uniondale, Ind.

Plastic: Geraldine Pickett, 1525 Howell St.

Tool: Scott Click, 2449½ Broadway.

Left the Hospital: Ethel Perry, Grace Nicholes, Kathleen Schafer, Doris Lankenau, Betty Fleming, Edward Hohman.

Returned to work: Esther Rapp, Mareeil Martin, Lela Brudi, Evelyn Smith, Evelyn Halter, Bernard Aseis, Arthur Walcutt, Robert Hutson, Louis Gage, Clifford Balyeat, Alberta Bultermier, Riley Maynard, Mary Bishop, John Marks, Margaret Reinhold, Marian Stuckey, Lowell Melser, Jeanette Lortee, Margaret Brickel, Ray Lahrman, Lucile Werling, Lucile Coleman, Luella Peters, Lucile Niermeyer, Calvin Zuercher.

We wish to congratulate Rudy Alexander of the Specialty Motor Drafting who is now traveling in double harness. If Rudy meets all of life's troubles with the same fortitude and serenity he displayed this week in absorbing all the wise cracks, his marital adventure is an assured success.

The Specialty Motor office was honored by a visit from Captain Wilbur K. Boltz, late of the drafting department and now with the Quartermaster Corps at Fort Benning. Captain Boltz had many interesting incidents to relate and we gather the U. S. Army now has the situation well in hand. Captain Boltz will return to camp after a short visit in Ohio.

Marie Griffin, Bldg. 19-5, said from now on she is going to use the east stairway instead of the west stairway, the west is wearing her heels on her shoes crooked, now she is going to wear the other side off going down the east stairway.

The fair sex of Bldg. 4-3 are wondering how Art Brandenburger and Jimmie James would look without their bow ties.

Plastic Flashes

The gals of Bldg. 12 really scattered over Decoration Day. Berneice Bucher went to Michigan, Joy Stoeky to West Virginia, Carmelita Fough to Ohio, Erma Nead to Monroeville, Grace Funk to Dayton and Betty Perry and Phyllis Guillot to Chicago.

We wonder why Jim Fleming, Bldg. 12-1, cut short his "Pappy Yokum" bath Sunday?

Whose size fourteens were heard pitter pattering through the mud puddles on West Creighton Avenue the other evening? Some people just can't learn to wear shoes, can they G. and B.?

Wanted to Trade: One pair of riding breeches for a mantel to eat off of. Olive Meyers will tell anybody what she thinks of horses. For further details see Olive.

What was in that cute little package that Lillian Hatfield gave Kenny Henschy that made him blush like a June bride?

What was that uneaten part of his lunch that Bill Meiners took home Thursday night?

Marguerite Hullinger, Bldg. 12-1, who was injured while horseback riding is able to be up. We wish you would hurry back Marguerite.

Anita Alspach, Bldg. 12-1, had the time of her life over Decoration Day. She went to Fort Shelby, Miss., to see her little army lad.

Anyone desiring to know the latest steps similar to "Huckleberry duck" should contact E. R. Summers of Bldg. 12-3 office.

Wayne Pribbles', Bldg. 12-3, curly hair is the result of his constant "twirling" of his sunny locks.

"Grandpa" Tony D'Agostino, Bldg. 12-3, is as spry as a spring chicken since he has recovered from the recent leg operation.

J. D. Milne, Bldg. 12-3, must be looking forward to the 1941 golf championship since he recently purchased a set of clubs.

Evelyn Demler, Bldg. 12-3, is wondering how the news concerning her 1941 car got around. Surely, Evelyn, you didn't expect it to be a secret, did you?

Anyone wanting lessons on hacking a car should ask Celeste Burns of Bldg. 12-1. She should know all about it.

Two more diamonds are flashing around in Bldg. 12-1. They are Clara Knoll and Esther Faus.

We wonder why Clara Knoll of Bldg. 12-1 got off of her horse in the center of Foster Park and led him back to the barn. She said it was a horse fly on the horse's nose.

"THE TILLIES."

Clark Essig, Bldg. 26-2, says there was plenty of traffic in Michigan over the holidays. What's the matter, you can buy almost any brand right over the state line.

Ginny McCormick, the sweet little redhead of Bldg. 6-4, just loves to wear dark glasses. She is sure people don't know her with them on as she is "inmagneto".

Margaret Lytle, Bldg. 19-5, and James Reed were married Saturday, May 31, in the rectory of St. John's Catholic Church at Toledo, Ohio.

Deaths

Max E. Brand, employed in Bldg. 19-5, died unexpectedly on Tuesday at his residence, 3207 Lafayette Street. Funeral services were held Thursday with burial in Concordia Cemetery. Mr. Brand would have completed a thirty-year service record in December this year.

Seven Employees Complete Quarter Century Of Service

Seven additional employees completed twenty-five years of service this month and be- me members of the Quarter Century Club. They are top row, left to right—Harley J. Beery, Edward W. Bailey, Benj. W. J. Putt and Wm. F. Knuth. Bottom row, left to right—Herman F. Braun, Claire Voirol and Paul J. Johnson.

News Around

(Continued from Page 6)

Sunbeams From 17-4

What everyone is asking about the new footwear fad Alma ary has started, and is that the ason she walks to work after buy- g a new car.

Edith Farrell sure believes in be- g prepared for any kind of ather, she carries an umbrella work, even on nice days.

Is it spring fever that makes tty Harpel so dreamy, or is it at good looking husband, whose cture she is always displaying.

And why doesn't Mary O'Brien k any more?

E Soderquist never did like red, d since getting a pretty little d card on his car he is going to k the police department to change e color.

Anyone wishing to have their tle sons cared for, see Johnnie les. Only requirement is a leash, herwise they are very apt to get st.

Mabel Murray was listening for e whistle of the streamline train e other day so Eileen Morris very igingly whistled for her.

George Walsh has a clock in every corner of the house, but they don't mean a thing when it comes time to get up.

It must be nice to be popular and get a corsage every day, but then we wouldn't know about that, better ask Charlene Orn who really gets them.

Thought for the week: Service is the window through which we view the world.

GRANNY.

The question of the week is "What became of that beautiful hair wave that Phil Tilford, Bldg. 4-3 displayed for a few days?

Passing through Angola Saturday afternoon we spied Hazel O'Brien, Bldg. 4-3, in a beautiful pair of slacks lying face down on the pavement with her heels in the air. We wonder what kind of a game she was playing.

Anyone interested in "Birds in a Gilded Cage" see Sylvia Bowers, Bldg. 4-3. She got in one recently and could not get out without a lot of help.

Fireman: "Can I have the afternoon off to go shopping witb my wife?"

Chief: "No."

Fireman: "Thanks."

Motor Generator Static

Brother Ed Tipton of Bldg. 19-3, said to motor cycle officer on Sherman Street last Thursday night, "Now Officer, please let me go as I have 25 little orphaned calves out on the farm that's waiting for me to give them their supper, and further more, I don't think my car can go 38 miles per hour. Please Mr. Officer let me go home just this once? I'll never do it again".

And at that the officer told Brother Ed to go home and feed the orphaned calves and Mr. Tipton said, "Was my face red?"

Anyone having any old bouquets or last year's "world war poppies" can dispose of them by sale to Lewis (Charlie McCarthy) Fox, Bldg. 19-3, who makes a collection of them.

Notice: Sara Jean Jones, Bldg. 19-3, wishes to announce in this column that a new set of golf clubs have arrived and that she is able and willing (Yea, even anxious) to accept invitations to play with—you lucky men.

(Scratching): "How do you get rid of these awful cooties?"

"That's easy. Take a bath in sand and rub down in alcohol. The cooties get drunk and kill each other throwing rocks."

Saying of the week: by Jerry Frye, Bldg. 19-3, "Some folks are not chips off the old block, they are the old block itself".

Harry Parker, Bldg. 4-3, was certainly surprised on his recent visit to "Big Long Lake Hoggery" as first of all he was greeted by a colored footman, then a maid and finally the eats and drinks were so good that poor Harry just could not take it.

A lovely wedding of last Saturday was when Rachael Beach, Bldg. 4-3, became Mrs. Everett Kelly. And, oh, what a nice time the girls of the mechanism section had at the occasion, All join in wishing the couple good health and happiness.

It might do well for Bill Grover of Bldg. 19-3 to consult Emily Post on one form of etiquette pertaining to the embarrassment of guests at his cottage at Lake James. As a host, he was perfect, omitting one item. Why did he have to make a trip down town Sunday morning? Of course as usual lately he had a good alibi of raiding the ice box but that can hardly be accepted, for it is a known fact that the clocks were particularly consulted.

Division Editor Is Married At Camp

Announcement is made of the marriage of Katherine [illegible] Distribution Division, to Arthur Maxham, formerly also of that division but now in training at Camp [illegible] Art who was former division editor and covered G-E Club news for this paper gave his "I do" on Friday, May 30. Best of luck "Scoop" on your new assignment of trotting along in double harness.

Alice Pflueger, Bldg. 4-[illegible], received as a gift from Chicago for Easter a hat, latest creation from Hollywood. Now Alice is wondering if she can wear that hat all the year round. We will give you a description of it and maybe some one can be of help. It is a large brimmed hat of pink and orchid silk edged with wide lace, large peony on each side, roses in center front with baby chicks between several large [illegible] feathers up back with bows of ribbon around crown and a tie under-chin veil.

We'd like to have seen Charlie Rice at Friers last Sunday—hear he took a trip on the miniature railway. I guess the urge to travel was too much for him to resist.

News Around

(Continued from Page 7)

To And From

Dear Girl Upstairs.

There's nothing like hot weather to break down the inhibitions of our fellow workers. Ed Barkle broke down and parted his hair in the middle, which didn't make him feel one bit cooler. And besides, he had to take plenty of razzing, too.

Earl Dennis gave us a treat (?) by rolling his pants up to his knees, such calves!

Saw some of our gals out in the park Monday playing "catch," Oh, what it is to be so young!

Bea Spilter has been holding out on us since the third of May. Her name is now Mrs. McCrory.

Dorothy Hanselman was very thrilled to see her name in the paper. We should have put in the picture, "How to get on a horse—if you don't want to ride anyway"!

Just about everyone in Bldg. 17-2 went to Chicago for the holiday week-end, except Pauline Corbat, who went east to Dayton.

Even the Hermit "went places" —the place being Battle Creek, where the streets were laid out by a cross-eyed man on a merry-go-round! I only got lost three times.

I'm still hungry—got a cup of coffee in your pocket?

The Hermit.

Dear Hermit.

After a long lazy week-end, we are all ready to come back to work and relate our adventures. At the Indianapolis Speedway, were Rosemary Burns and Mary Jane Eckert. Murl Hedgin went to Wabash and Hudson, Indiana. The lakes claimed Marvin, and Irene Miller went swimming. Merlin Duff wanted to see some more hills, so he went to Cincinnati.

Edith told me that she was going to just stay home and rest, but I'll bet she didn't, because she mentioned later that she was going to see Grace Nichols, who is just out of the hospital. We're all so glad to hear that and hope Grace will soon be back to work.

Say, have you seen that beautiful diamond Helen Shaffer is flashing these days. It surely is a pretty ring, and we wish you happiness, Helen.

Well until next week I'll leave you hoping you had as nice a week-end as we did.

The Girl From Upstairs.

Mary Guilliff, Bldg. 4-3, has a new way of closing the doors in her home late at night so they do not make any noise. But, of boy, we feel so sorry for her poor finger.

The gang in Bldg. 12-B were treated to some excitement one day last week, when Bertha Keitsch and Johnny Kirchenbauer staged an old fashioned "water battle" in front of the drinking fountain. Tch, Tch, children, can't you settle your disputes in a little more dignified manner?

Hear tell Bill Glenn, Bldg. 12-B, brings his electric razor into work with him in order to catch up with his shaving during his lunch hour. What's the idea, Bill, does somebody beat you to the bathroom or are you just bent on showing off your new razor?

For trade only: Good tool box in exchange for Soap Box by Johnnie Driver, Bldg. 4-3. Needed badly to make his campaign speeches.

Famous Last Words: "Get out of my way—some one has to work around here"—Berle Miller, Bldg. 4-3.

Jesse Green, Marcella Noll and Evelyn Orr of Bldg. 26-2 won't talk. That's why they don't get their names into the WORKS NEWS.

When is an ink pad not an ink pad? Why, when Dick Miller, Bldg. 26-2, is around. Then it becomes a compact.

The three days vacation was hard on some of the Bldg. 26-2 gang. Ask Lester Hoch, John Leith and Bernard Adams.

Apprentice And S. M. Office Take Softball Openers

Stators Lose Lopsided Contest 1 to 24 Score With Dent Pitching a No-Hit Game for S.M.

In the opening games of the Inter-department Softball League of 1941 the Apprentices defeated the Messengers by the close score of 7 to 5, while Small Motor Office scored a tremendously lopsided victory over the Sleepy Stators, the score of that game being 24 to 1.

The hitting of Goodwin and Miller paced the Apprentices to their win. Goodwin scored two runs, had a single, double, and triple for a perfect day at bat. Miller lashed out two home runs that proved very effective, coming late in the game. Jack Barney also homered for the Messengers.

Apprentices—	AB.	R.	H.
Eggiman	3	1	1
Garton	3	1	1
Mesing	2	0	0
Kahlenbeck	3	0	0
Pequignot	3	1	1
Goodwin	3	2	3
Miller	3	2	2
Engle	3	0	0
Nichter	2	0	0
Shects	2	0	0
Totals	30	7	8

Messengers—	AB.	R.	H.
Bailey	4	0	3
Barney	3	1	1
Madden	4	0	0
Lauer	1	0	0
Petgen	2	1	1
Turner	4	0	1
Borcherding	3	0	0
Haas	3	2	1
Edgar	3	0	0
Boehm	3	1	1
Totals	29	5	8

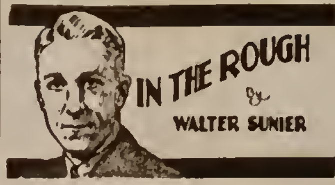
Two-base hits, Goodwin and Turner; three-base hits, Eggiman and Goodwin; home runs, Garton, Miller 2, and Barney.

Behind the hitting and no-hit pitching of Bob Dent the Small Motor Office walloped the Sleepy Stators by the score of 24 to 1. Dent hit a homer, two doubles and a single to aid his own cause. The Motors scored almost at will against the shoddy play of their rivals. Don Scherer was the big gun in the Motor offense, securing five hits and scoring four runs, besides playing a steady game at third base.

Small Motor Office—	AB.	R.	H.
Clawson	6	1	3
Scherer	6	4	5
Langenberg	6	4	4
Dent	6	4	4
Turner	5	1	4
Leakey	4	2	3
Daley	4	2	3
Hoffman	5	2	3
Hessert	4	2	2
Wilt	5	2	4
Totals	51	24	35

Sleepy Stators—	AB.	R.	H.
Brase	3	0	0
Brandt	4	0	0
Baales	2	1	0
Johns	2	0	0
Stauffer	3	0	0
High	2	0	0
Carey	2	0	0
Roehling	2	0	0
Druley	2	0	0
Nelson	3	0	0
Totals	25	1	0

Two-base hits, Clawson, Langenberg, Dent 2, Turner, Leakey 2, and Wilt; three-base hits, Scherer, Langenberg, Turner and Wilt; home runs, Dent.



The Golf League battles on with nary a rain yet to rain it out. Either it is going to be a long dry season or rain will come every Monday, Tuesday and Wednesday soon.

Results in the Monday Evening Group were:

Turf Toppers defeated Ice Cubes 194 to 203.

Plastics defeated Divot Diggers 201 to 209.

Slapsticks defeated Rough Riders by forfeit.

The low scorers were: W. Kirke 43, Ottenweiler 45, Leegard 45.

Results in the Tuesday Evening Group were:

All Stars defeated Bldg. 4-4 Slicers 173 to 194.

Bldg. 4-3 defeated Dubs 192 to 203.

Billy Goats and Optimists tied at 197 each.

The low scorers were: Elder and Hocket, Jr., with 41 each.

Results in the Wednesday Evening Group were:

Sharpshooters defeated Apprentices 176 to 196.

Fluorescents defeated Cro-Flites bv forfeit.

Hookers defeated Trappers 207 to 220.

Motter was the low scorer with 39.

It is funny how during this time of the year poetry oozes out and goes flying around. The following verse was found blowing down the hall.

There was a golfer named Wehrs,
Whose game drove his partners to tears.
He would tee in the rough
And all that kind of stuff,
If he did not have three overseers.

We thank the writers of "From the Feminine Viewpoint," Irene Perry and Hilda Barthold, very much for the statement in the May 19th issue of the WORKS NEWS that we deserve a medal for filling a column for six long years. We extend our congratulations to them on celebrating the second year of their column. They also stated that after the expiration of two years they are exhausted. We would like to drop the thought that it is not so exhausing if one is slightly cracked. You just put down the things that pop into your mind and you have to run the risk of having people think you are rattle-brained. Girls, take your hair down and you are all set.

We regret to say that the response of those on the second and third shifts who are interested in a golf league was so small that evidently there is no demand.

Horseshoers To Open League On Thursday Night

Formation of a Y.M.C.A. Industrial Horseshoe League was completed at a meeting held last Tuesday evening. The following teams will be represented: G-E Club, George Hahn, manager; International Harvester, Pat Pallone, manager; Zollners, Earl Rickey, manager, and Pennsylvania, E. C. Knox, manager.

The G-E Club should again have one of the strongest teams in the league, although it is the Club's first entrance in a horseshoe league since 1938. The Club will have such well-known players as Walt and Oscar Rietdorf, two of the city's best pitchers, as well as Harold Hartman, Jule Cochoit, Joe Trentadue and Charles Abbott.

There are still positions for additional players and any employees interested are asked to contact Manager Hahn, Bldg. 4-1, between 12:30 and 1:00 o'clock noons at the McCulloch park courts any time next week.

« «It's a Joke» »

The civilian who wasn't quite equal to the task of distinguishing officers' rank by their insignia, was conversing with a colonel. Several times he called him captain, then, as if not sure, he asked: "You are a captain, aren't you?"

"Well," said the colonel, slightly amused. "I am not any more, although I once was."

"That's too bad," consoled the civilian. "Drink I suppose."

Salesman: "I represent the Mountain Wool Company, ma'am. Would you be interested in some coarse yarns?"

She: "Gosh, yes! Tell me a couple."

Smith: "Why on earth did you encourage your wife to quit playing the piano and take up the clarinet?"

Jones: "Because when she's playing the clarinet she can't sing too."

A census enumerator approached a lounging Negro dandy. He asked and learned the man's name, age, place of residence; then inquired, "What's your business?"

The answer came superciliously. "I owns a hand laundry, I does."

"Where is it located?"

"Dar she comes now!"

"You can't arrest me. I came from one of the best families in Virginia."

"That's O. K. buddy. We're arresting you for speeding, not breeding."

Visitor: "My, what a large skating rink!"

Instructor: "Yes. It has a seating capacity of 5,000."

Visitor (to host's little girl): "How do you know that it's the first of the month?"

Child: " 'Cause all Daddy's letters have got front windows in them."

"So you complain of finding sand in your soup?"

"Yes, sir."

"Did you join the Army to serve your country, or complain about the soup?"

"To serve my country, sir—not to eat it."

G-E Rod-Gun Club Enters Pistol Match

Participation in the Allen County Pistol League match on next Sunday morning, June 8, is announced by officers of the G-E Rod and Gun Club. The meet will be held on the Three Rivers Rifle Club range.

All pistol shooters who are members of the G-E Rod and Gun Club are eligible to participate in the contest and are invited to attend. Entry can be made with Club officers or by reporting at the Three Rivers Club range.

The contest will consist of slow, timed, and rapid fire at twenty-five yards.

G-E Club Wins Opener In Baseball League

The G-E Club baseball team defeated the Post Office nine in the opening game of the season in the Y. M. C. A. Industrial League by a score of 1 to 8. The games are played on the G-E Taylor Street diamonds.

M. B. A. Benefits

(Continued from Page 1)

permit the more favorable hospital benefits but will also add to weekly benefits for sickness and accidents in all classes.

Other minor changes such as adding another hospital to the approved hospital list are proposed for action at the same time.

A condensed but concise resume of the proposed changes is set forth as follows:

ARTICLE VI—GENERAL FUND

Assessments:

It is proposed to increase the maximum General Fund to an equivalent of $8.00 per member instead of $7.00 at which time assessments shall cease until the General Fund has been reduced to $5 per member

This change will strengthen the solvency of the organization.

ARTICLE VI

Duties of Special Committees:

At present the special committee has a fixed weekly meeting scheduled which it is proposed to change so that the committee will be at the call of the General Chairman as conditions require.

ARTICLE XII—CLASSES OF MEMBERSHIP

It is proposed to increase the weekly dues of each of the three classes by 5c per week to 20c, 30c and 40c respectively to increase the weekly sick and accident benefits by $1.50 per week to $7.50, $13.50 and $19.50 per week and to increase the weekly hospital benefits by $3.50 per week to $28.00 per week for all three classes.

ARTICLE XII

It is proposed to raise the limits (average weekly earnings) for class 2 and class 3 membership by $3.00 per week to $18 and $26.

ARTICLE XII—SECTION 7

Hospital Benefits

Increases the daily hospital benefit from $3.50 to $4.00.

APPROVED HOSPITALS

The Medical Center hospital of Fort Wayne is proposed as an addition to the approved hospitals.

This Is Madalyne And This Is Vera — Or Vice Versa

(*Pictures on Page 3*)

No, this is not trick photography. There are really two of them, Vera and Madalyne Drewett, employed in Bldg. 17-3. We have been assured that Vera is to the right and Madalyne to the left—could be. The twins, cooperating with our feminine viewpointers, present a series of safety pictures on page three of this issue which portray some of the more common safety hazards.

Dr. McEachron Is Honored At Purdue

Dr. Karl B. McEachron of Pittsfield, Mass., high-voltage engineer of the General Electric Company, was one of five persons receiving honorary degrees at the Purdue University commencement at Lafayette, Ind., June 8. The degree of Doctor of Science was conferred.

He was cited as "a master of science and sometime member of the School of Electrical Engineering of Purdue University; stimulating teacher and ingenious deviser of methods and instruments for the increase of basic knowledge of high-voltage phenomena."

Dr. McEachron was a member of the Purdue faculty for four years before joining the General Electric high-voltage laboratory at Pittsfield in 1922. He has been head of the laboratory since 1933.

The 10,000,000-volt artificial lightning generator, used in the Pittsfield laboratory to test electrical protective devices, was built under his direction and the crashing bolts of a duplicate device were a feature of the G-E exhibit at the New York World's Fair. His research in natural lightning has included supervision of a five-year

NOTICE

United States Defense Savings Bonds and Defense Postal Savings Stamps may be purchased for cash at any time at the Payroll department.

New Plastics Safety Guard Developed

The first installation has been made in General Electric's lamp factory at Nela Park, Cleveland O., of a plastics safety guard which the G-E plastics department believes can be adapted to a wide variety of applications. The safety guard now in use on a coil winding machine replaces a guard formerly made of aluminum with a small glass window to enable the operator to watch the operation. The new plastics guard is transparent, making it possible for the operator to watch the entire operation where formerly he could see only a part of it through the small window. It is made of methyl methacrylate plastics, weighs about half as much as the 3-pound metal and glass guard it replaces. A further advantage of the plastics guard is that it is made all in one piece.

Large Enrollment Is Made For Elex Trip

Many Employees To Participate In One-Day Excursion to Cincinnati Next Sunday

More than three hundred employees had registered early this week for the Elex one-day excursion to Cincinnati next Sunday, and it is anticipated that a far greater number will have registered before close of work today. Vivian Hitchcock, Bldg. 21, is tour chairman and reports that all arrangements have been completed to permit those participating in the excursion to do so with the greatest of comfort and with a minimum of inconvenience.

A special train with air-conditioned coaches will take the excursionists to and from Cincinnati. The train will leave the Pennsylvania depot at 6:45 a.m. daylight time and the excursionists are asked to be at the station in ample time to permit seating arrangements.

Highlights of the trip will include a boat trip on the "Island Queen," familiar to many through

Points Out How Research Helps To Create Jobs

Vice-President E. O. Shreve In Address Emphasizes The Great Progress Made By The Electrical Manufacturing Industry

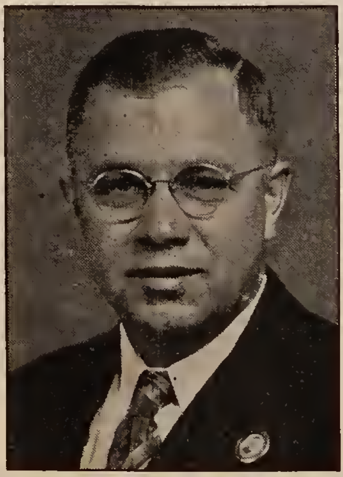
As a result of research and invention, 15 million American men and women are working in jobs that did not exist in 1900, E. O. Shreve, General Electric vice-president in charge of sales and president of the National Electrical Manufacturers Association, declared in a report on the electrical manufacturing industry's contribution to industrial, economic and social progress.

(Continued on Page 2)

WHERE ARE THEY?

The Works News desires very much to have the addresses of Fort Wayne Works employees now in the government service. Employees knowing the addresses of any of these men are asked to send them to the Works News editor, Bldg. 16-3.

Become Foremen In General Service



F. A. Burkett

R. E. Clark

R. E. Clark and F. A. Burkett have been promoted to foremanships in the General Service Department, it is announced by J. B. Greer, superintendent of the department. Mr. Burkett assumes the duties of foreman of all third shift activities, and Mr. Clark the duties of foreman in charge of moving, carpenters (outside), painters, masons, and common labor.

Volume 24 Friday, June 13, 1941 No. 69

• Take A Good Look!!!

The Flag of the United States of America, whose 164th birthday we observe tomorrow, is now, more than ever before in the history of the Nation, a symbol of freedom and light in a world afflicted with trouble.

Toward our Flag today, the eyes of millions of people throughout the world are turned with deep longing.

Toward our Flag today, the hearts of millions of people throughout the world are yearning.

Throughout the world, no Flag has greater meaning. No Flag expresses more completely the ideals of a brave and free people, than our Flag . . . the Flag of the United States of America!

The Flag is a potent, vibrant, living token of the fact that America today is awake and alive as never before!

Let not a man, woman or child in all the land, go to bed tomorrow night without having stopped during the day to take a good, long, hard look at that Flag and remember once more what it really means!

• It's Like The Mississippi

The editor of the "employees news" in one great automobile plant recently had this to say about his outfit's dependence on smaller companies in handling defense orders:

"We're really a sort of Mississippi River that wouldn't be much more than a trickle without a lot of Red and Arkansas and Missouri and Ohio Rivers doing their bit upstream."

Upon the small companies of America there is today resting much of the burden of defense work. As in the case of the small cogs in a giant piece of machinery, they could not be removed without disrupting the whole effort.

When the defense program first started about a year ago, the necessity for speed was so great that big orders went to companies which were equipped—in machines, workmen, and a sufficient supply of managerial skill—to handle them most efficiently.

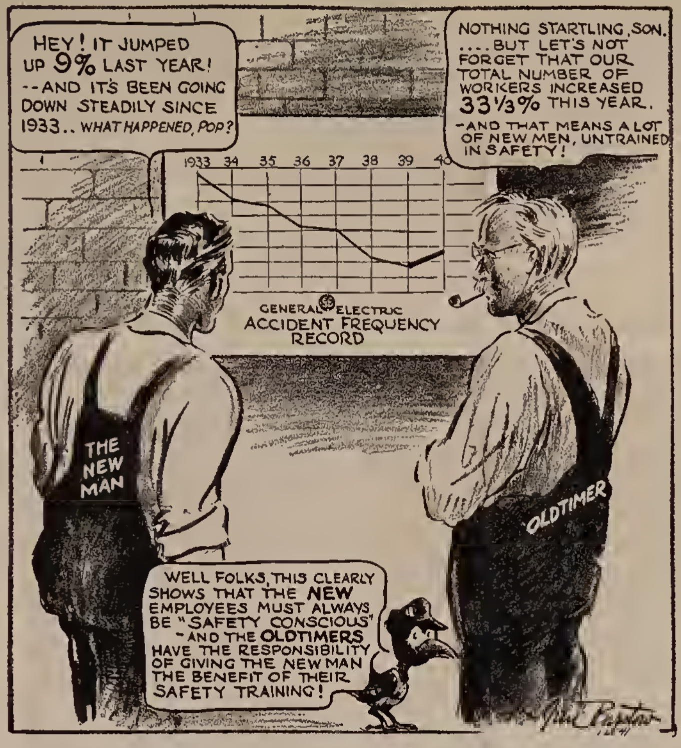
But that didn't mean that these companies were going to fill these orders unaided. More and more sub-contracting, more and more "farming out" of parts work to smaller plants, has been increasingly the order of the day ever since.

As a result, the Army-Navy Munitions Board, in a recent check, found that 4,750 direct contractors were using some 28,000 subcontractors and sub-subcontractors, which is an average of nearly six establishments at work on some operation of each order. And another study of a group of prime contractors, this time by the National Association of Manufacturers, showed their average number of subcontracts increased 25 per cent in two months' time.

The small companies are tremendously active in defense right now. Those currently engaged will be even busier, and those not now taking part will be called into service in increasing numbers, as the work moves along. The truth of that is as plain as the nose on anyone's face.

Everybody is helping to do this big job—no doubt about it!

ANALYZING THE NEWS



HEY! IT JUMPED UP 9% LAST YEAR! --AND IT'S BEEN GOING DOWN STEADILY SINCE 1933.. WHAT HAPPENED, POP?
NOTHING STARTLING, SON. ....BUT LET'S NOT FORGET THAT OUR TOTAL NUMBER OF WORKERS INCREASED 33 1/3% THIS YEAR. -AND THAT MEANS A LOT OF NEW MEN, UNTRAINED IN SAFETY!
1933 34 35 36 37 38 39 40
GENERAL ELECTRIC ACCIDENT FREQUENCY RECORD
THE NEW MAN
OLDTIMER
WELL FOLKS, THIS CLEARLY SHOWS THAT THE NEW EMPLOYEES MUST ALWAYS BE "SAFETY CONSCIOUS" -AND THE OLDTIMERS HAVE THE RESPONSIBILITY OF GIVING THE NEW MAN THE BENEFIT OF THEIR SAFETY TRAINING!

Power Of G-E Short Wave Stations Being Increased

General Electric's three short-wave stations, already among the most powerful in the world, will be made even more effective by new transmitting equipment now being installed in Schenectady and San Francisco, according to R. S. Peare, G-E manager of broadcasting.

WGEA, Schenectady, and KGEI San Francisco, formerly operating at 25,000 and 20,000 watts respectively, are both being increased to 50,000-watt power. WGEO, Schenectady, licensed for 100,000 watts and long famous as the most powerful shortwave broadcasting station in the Western Hemisphere, is also receiving new equipment to increase further its effectiveness.

"With the new WGEO and WGEA equipment in operation," Mr. Peare said, "the world-wide listening audience of the General Electric stations may expect to obtain, before the summer of 1941 is over, a degree of reliability of signals never before experienced by short-wave radio."

It is expected that the new WGEA transmitter in South Schenectady will be put in operation about July 1, after devoting the month of June to the testing of equipment. Many important innovations are included in the transmitter, one of which is its twin GL-880's—a new type of vacuum tube designed and manufactured by General Electric—which, due to its unique construction, will permit the generation of large amounts of power on very high frequencies. A complete set of spare parts to meet any contingency will be available at all times.

In addition, the construction of the transmitter as a whole will make possible rapid switching from one frequency to another, and its efficiency will be such that it will need little more power to operate at 50 kilowatts than was necessary for an output of 20 kilowatts with the old equipment.

The restyled transmitter of KGEI, incorporating like WGEA two of the newly-designed vacuum tubes, will be housed in a new building constructed especially for this purpose at Belmont, California. New offices and studios for the station, which has been broadcasting since early in 1939 from Treasure Island, are located in San Francisco's Fairmont Hotel, occupying 3000 square feet of floor space. KGEI's new equipment is also expected to begin operating on July 1.

The new 100,000-watt WEGO is scheduled to go into operation late in August. Essentially on the same design as WGEA, it has one important difference—the fact that, since it will operate at 100 kilowatts as against the smaller station's 50, the two GL-880's are increased to four in WGEO's circuit.

An attractive light grey color will streamline the appearance of the new equipment, which will be further enhanced by striking horizontal bars bearing the call letters of the stations. For the protection of personnel, every entry door to each of the three transmitters has been equipped with a special circuit which will permit the door to be opened only if all dangerous voltages have been removed and circuits grounded.

The remarkable increase in the stations' effective power is due to the use of special directional antennas, designed by Dr. E. F. W. Alexanderson. The twelve-element type antenna, used in the transmitters of WGEO and KGEI, increases their signal strength to at least ten times that of equally powered stations operating with ordinary antennas, and WGEA's twenty-four-element type develops a single strength of more than 20 times original power. This means that KGEI's effective power will be equal to 500 kilowatts, and that of WGEO and WGEA equal to one million watts each.

M.B.A. Members Receive Ballots

Ballots have been distributed to all members of the MBA for the purpose of determining the desire of the membership in connection with changes proposed in the constitution and by-laws of the organization to permit increased benefits.

It is anticipated that all ballots will be returned by the first of next week and that the result of the balloting will be announced during the week.

How Research Helps

(Continued from Page 1)

Addressing the Pacific Coast Electrical Association convention, Mr. Shreve said that all industry, including the electrical, has contributed far more toward the social and economic advance of our country than the general public understands or recognizes.

"The great progress made in the electrical manufacturing industry has been the result of fine co-operation on the part of all branches of the electrical industry," he pointed out, "and has been motivated only by the ideals of wishing to conduct businesslike commercial enterprise and to serve well the interests of the public."

Mr. Shreve then told his audience about the progress made by the electrical manufacturing industry in the fields of power generation, distribution, and industrial and consumer utilization.

With regard to having put more electrical horsepower at the command of the shop worker, he said, "We have increased labor's compensation and, by a larger and better application of electric power, we have helped to produce material and equipment on a lower cost basis, thus increasing the field of application and making it possible to increase employment when industry is taken as a whole."

(Continued on Page 4)

G-E Sponsors Program

(Continued from Page 1)

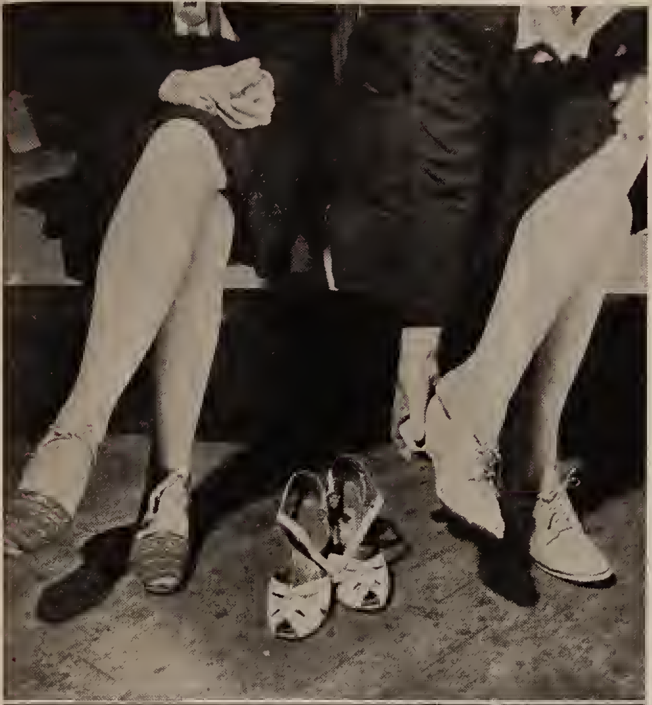
series of broadcasts," said Charles E. Wilson, president of the company, "is to make available each week to the people of the United States an up-to-the-minute, authoritative report on what the industries of America are doing to meet the vital responsibilities reverting to them under the national defense program."

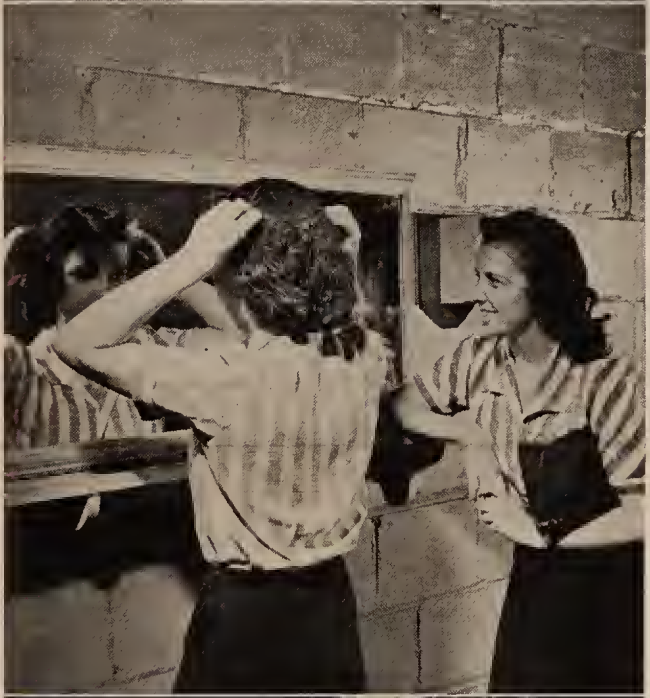
Information for the broadcasts is gathered through the cooperation of Business Week magazine. John McIntyre is the commentator, and Ed Herlihy the announcer. The agency is Maxon, Inc.

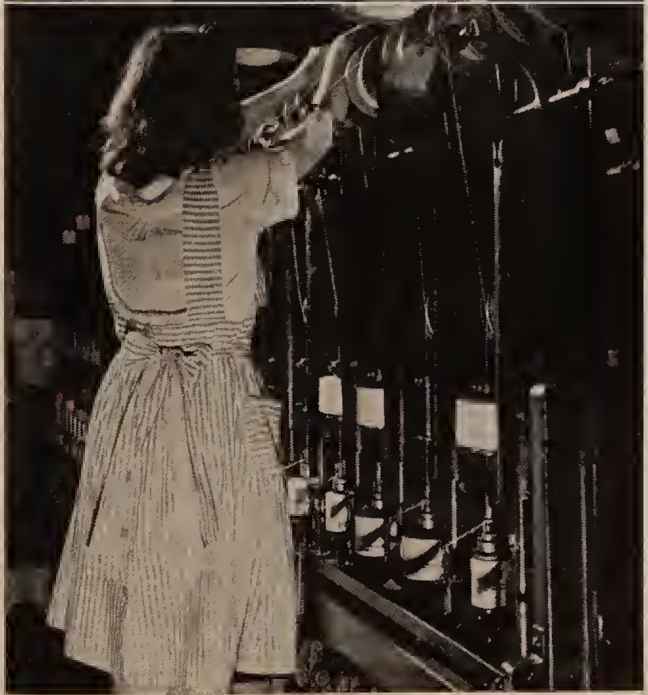
VARIETY'S radio reviewer calls this program "a ray of sunshine in a morbid world" and "an ideal program for this particular point in business—and world history—giving Americans factual dope on the one question they want to know about—how about that national defense job?"

The stations include: WBZ, Boston; WBZA, Springfield, Mass.; WAGA, Atlanta; WLS, Chicago; WHK, Cleveland; WJZ, New York; W M A L, Washington; K D K A, Pittsburgh; WFIL, Philadelphia; WXYZ, Detroit; WKIP, Poughkeepsie, N. Y.; WMFF, Plattsburgh, N. Y.; WTRY, Troy, N. Y.; KXOK, St. Louis; KFRU, Columbia, Mo.; KGKO, Dallas- Fort Worth; WMVA, Wheeling, W. Va.

Vera And Madalyne Give A Few Hints On Do And Don't In Safety







By The Feminine Viewpointers

Our good friend "Sandy" is always snooping around to see what he can pick on us for (i.e. Suggestions), so we thought we would get the jump on him this time and brush up some of the safety hazards that are more pronounced among we girls. Madalyn and Vera Drewett, Bldg. 17-3—yes they are twins—kindly consented to pose to show some of the hazards, with Vera taking the part of "Hopeless."

If it is actual figures you want—50% of the accidents which happened during May were foot accidents. There is no particular safety shoe sponsored by the G. E. but there are several recommended brands on the market.

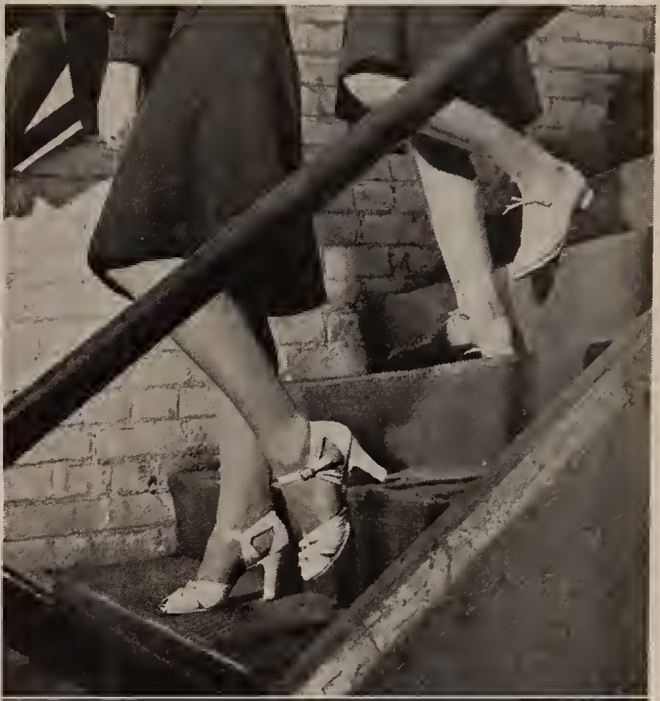
How many times, as one of your tools start to fall, have you jumped back so that it won't hit your foot? That applies to office tools as well as factory. A closed-toe shoe may not save your toes if several pounds come tumbling down, but it will help and it will probably prevent a darn sore toe if it is only a small article following the laws of gravity. Take your pick in the upper left hand corner.

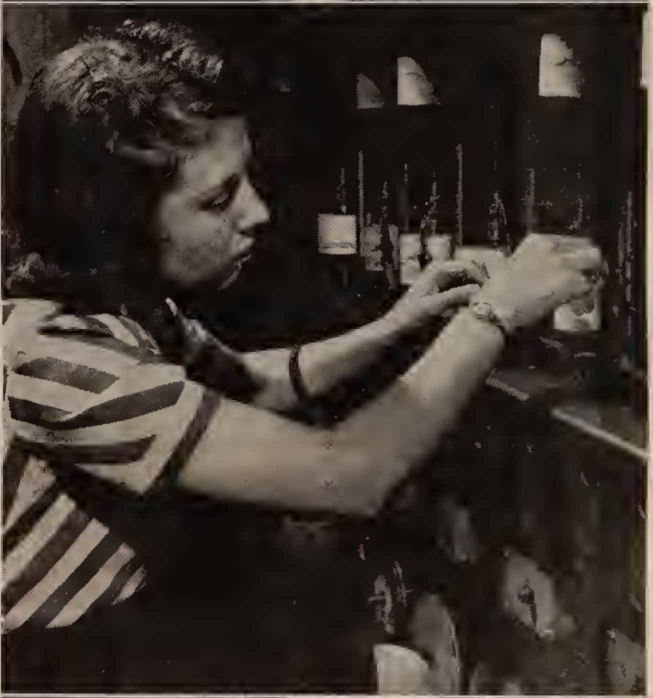
Closed-toes aren't enough to be considered safe shoes. All too often we hear of one of you girls getting a nasty tumble because you misjudged where your spike was going to land on the stair. Steps are bad enough without you daring them to trip you. And by the way, did you ever try walking across the parking lot with spikes? They just don't have any respect at all for your ankles (upper right).

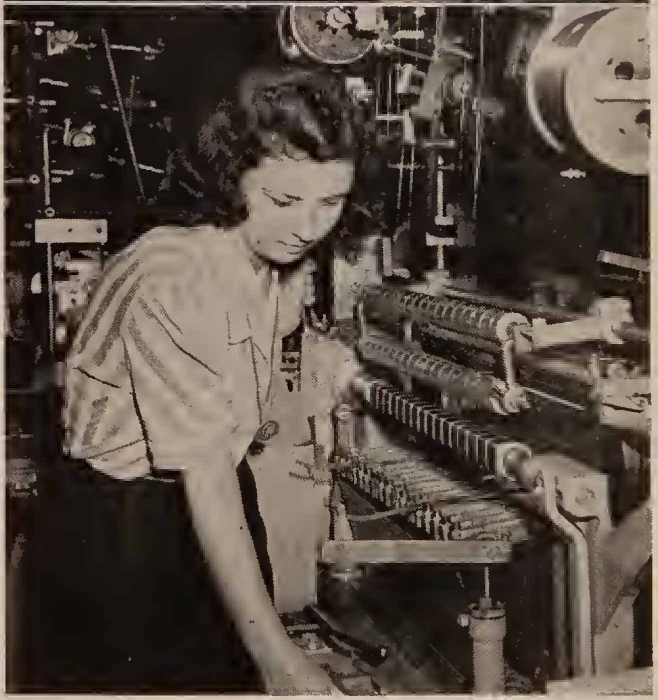
A hazard which has been brought home quite forcibly recently is flying hair. We know that it is much easier just to run a comb through your locks and let it go at that. Besides it feels so good just to let it blow with the breeze. Perhaps it would be best to remember that it is much easier to let one's own hair blow when you are out in the wide open spaces than it would be a wig. You often pay fifty or seventy-five cents to make your hair attractive so why not waste five or ten cents to make sure you keep that hair. Madalyne shows how it should be done (center left).

Some girls have very pretty hands which need no decorations, but some of us think that jewelry will keep people from looking at the hands themselves. No matter what your hands look like—they still look better with ten fingers on than eight or nine fingers. And it sure can hurt when a machine tries to tear a watch from your arm without waiting for you to unfasten it. Vera (center right) looks as if she may be in a bad spot.

We have had a little taste of summer and it will probably be here in full force very soon. It is nice to wear (like Vera, lower left) dresses that have plenty of room for ventilation and look so "summery," but it won't be any cooler for you when some of those loose pieces catch in the moving parts of a machine. Let's be sensible about the thing and remember that we look just as good and feel just as well in something tailored and SAFE. Let's save the bows and frills for the B. F.







There's that BADGE again (lower right). There is a place for it and it isn't inside the machine. It is terribly embarrassing to be sent home for your forgotten badge, but it feels worse to have it grabbed from your neck by a ruthless piece of machinery or the corner of a desk or cabinet drawer. Besides—think of the poor watchman. If everyone would wear it near their left shoulder, the watchman could pass the mad rushing mobs much quicker.

Girls—let's show the men that we can make the place SAFE for women and maybe they will follow our example.

These Fathers Given Special Recognition At Elex Party

The oldest and the youngest fathers and the father coming the greatest distance were given special honors at the Elex Club Fathers and Daughters party held Monday. At the top left is Donald Tirney, the youngest father with his daughter Nadyne. Lower left is the father who came the greatest distance, T. J. Brady with his daughter Dorothy.

Top right are the three oldest fathers with their daughters. Left to right, fathers and daughters are: George Brudi, 71 and daughter Lela, Winfield Scott, 84 and daughter Clara and Ira Desler, 89 and daughter Alma.

How Research Helps

(Continued from Page 2)

Today there is not a single industry which is not materially dependent upon the electrical industry for its operation, according to Mr. Shreve.

"Therefore," he continued, "it is easy to comprehend that the electrical manufacturing industry must form a very vital part of the defense program. We not only contribute in a direct way very substantially, but we are called upon indirectly to help every other industry do its job for defense.

"We in the electrical manufacturing industry are taking our responsibilities very seriously in relation to preparedness. We have already undertaken to produce well over a billion dollars worth of material direct for defense. We have added thousands of men, and we will add and train thousands more. We are adding millions of feet to our plants at a cost of between 100 and 200 million dollars."

Mr. Shreve mentioned the following equipment that is being produced by the electrical manufacturing industry for defense: turbines and gears for ship propulsion, electric drives for submarines and combat tanks, naval gun mounts and ammunition hoists, searchlights for aircraft and anti-aircraft lighting systems—some of them 60 inches in diameter, delivering 800,000,000 candlepower — radio transmitting and receiving apparatus, turbo-superchargers which permit airplanes to operate with full power at high altitudes, propeller pitch control devices, motors and special generators for airplane service, many instruments for air service, ordnance control equipment of many sizes and varieties, guns, shells, switchgear, wire and cable, and many other devices and types of equipment.

The spirit, as Mr. Shreve sees it, is "to do the job regardless of profit and to do it as quickly as it can be done."

"Like an individual's advancement in business, as the electrical industry got more and more important," he said, "it has had to assume greater and greater responsibilities, with the result today that if the electrical industry (and in this I include all branches) has not and does not successfully do its part in the National Defense program, the entire program will fall. Defense is counting on industry and industry is counting on electricity! I know our industry will meet the challenge!

"But eventually war and defense efforts will end and life will go on. Where will we be in that picture? Our contribution to industrial, economic and social progress has been great, and we must plan as well as we can for our part in the postwar period. I am sure we will contribute our full share then."

Electrical development has been so rapid that even people in the business are likely to take for granted many of the contributions which have been startling in their nature, according to Mr. Shreve.

"This advance in greater knowledge, better application, better equipment, lower prices and lower power rates," he concluded, "has served to almost black out the recollections of the gay nineties; and is a performance of which the whole industry can well be proud. With such a heritage and with the determination to continue to go forward, I am confident the history yet to be written will be equally important in its contribution to industrial, economic and social progress as has the past."

Work Progressing On Bldg. 8 Addition

Work was started last Friday on an addition to Bldg. 8, which houses the Wire and Insulation Department. The addition which will hinge onto the present building, will be two stories in height and will include approximately 15,000 square feet. The general contract is held by the Indiana Engineering & Construction Company and it is anticipated that the structure will be completed by July 15.

McEachron Honored

(Continued from Page 1)

program of photographing and recording with special instruments and equipment the strength of lightning bolts striking the Empire State Building in New York.

He received a Coffin award from General Electric and the Longstreth Medal of the Franklin Institute for his part in developing Thyrite, a material used for lightning arresters and in other applications. Ohio Northern University, which he attended as a student, gave him an honorary degree of doctor of engineering in 1938. Last year he received the B. F. Goodrich award for distinguished public service and his book, "Playing With Lightning," was published.

SCIENCE FORUM – by L. A. Hawkins

Q. What is the substance inside the ordinary weather thermometers?

A. The material commonly used in such thermometers is alcohol with a little coloring matter in it. Mercury is used in clinical or maximum registering thermometers.

Q. How are the atomic numbers chosen for chemical elements?

A. All chemical elements have been assigned numbers: Hydrogen 1, Oxygen 8, Copper 29, Mercury 80, and so on. These numbers actually represent the number of free positive charges in the nucleus of the atom.

Q. What is the most powerful explosive?

A. Picric acid and Trinitrotoluene, commonly known as T.N.T., are two of the most powerful explosives used during the last war. T.N.T. is used more extensively than the more violent Picric acid because it is more stable and easier to handle.

Q. Is there any difference in the weight of an article before and after freezing; that is, if the article will freeze rapidly enough so that there is no loss in moisture?

A. There is no loss in weight when a given quantity of matter changes state. For instance, if a pound of ice is melted in a closed container so that none of it is lost by evaporation, it will change into a pound of water. The water will take up less room, but it will weigh the same.

Q. If high compression gasoline engines are more efficient than low compression engines, is the efficiency doubled when the compression ratio is doubled?

A. No. It certainly would be ideal if we could increase the engine efficiency at that rate, but the gain is not that much. For example, if a 4-to-1 compression ratio engine is changed into an 8-to-1 engine, the efficiency will go up about 35 to 40 per cent. Of course, a lower grade of fuel could be used in the 4-to-1 engine; in that case the gain in efficiency would be partly balanced by the difference in fuel costs.

Q. How long can fresh orange juice stand before its Vitamin C content deteriorates?

A. The Vitamin C in orange juice deteriorates when it comes in contact with oxygen. Therefore, the moment an orange is cut open it begins to lose its Vitamin C. Of course, the longer it is allowed to stand, the greater the deterioration —in 24 hours' time the Vitamin C content will have decreased considerably.

Q. What effect would gravity have on a man if he were in a hole in the exact center of the earth?

A. As far as the gravity of the earth is concerned, its forces would be balanced and as a result the man would weigh

Q. What is the difference between a fluorescent lamp and an incandescent lamp?

A. The chief difference is that the first is a gaseous discharge type lamp, while the incandescent lamp is a filament type. Both are conductors of electricity. In the case of the incandescent lamp, the electricity is conducted through a tungsten filament which heats up and emits light. The fluorescent lamp, on the other hand, contains a small amount of mercury vapor which conducts the current from a heated filament at one end of a cylindrical tube to a similar filament at the other end. The current ionizes the mercury vapor and causes it to emit light and ultraviolet. The inside of the enclosing tube is coated with fluorescent material which absorbs the ultraviolet and transforms it into visible light.

SANDY SAYS

Once ye get the spending habit it's vura hard tae break—so they tell me, even tho Cousin Colin didn't believe there was such a habit.

But most of us Americans must have it, the way de-fence materials are being used in everyday goods—up to now. Soon it will be hard for some o' us to get along without some o' them.

Now, with defense materials getting more important every day, we may find that aluminum, nickel and other metals are completely taboo for "luxury" goods. Ye hear right and left o' plastic auto bodies, wood or plastic washing machines and refrigerators, and also o' making your last year's model do another year.

So, the next thing to do is to find substitutes for all these important materials. And don't ye ever pass up a chance to suggest one. The next thing ye know, these substitutes will be so good that they'll be using them tae make airplanes, or tanks or ships. So we'll have to start finding substitutes for the substitutes. And then, when they start using the sub-substitutes—but that's another story—and a long one.

But as I started tae say, breaking the spending habit may be one o' the ways you and I can help. I know that check every Friday starts tae burn the bags in your leg-sleeves, though it doesn't bother a Scotsman in the least. But here's one good way tae handle the situation. Just salt it in Series E, F, or G, and when old Mr. Depression sticks his ugly head around the corner again, ye'll have "stuff" that'll buy lots more than it will today.

O' course, wc can do a lot when we hai' a mind to. Uncle Angus' boy Douglass, who's in college, says that if worse comes to worst, he can start wearing pants and coat o' the same material.

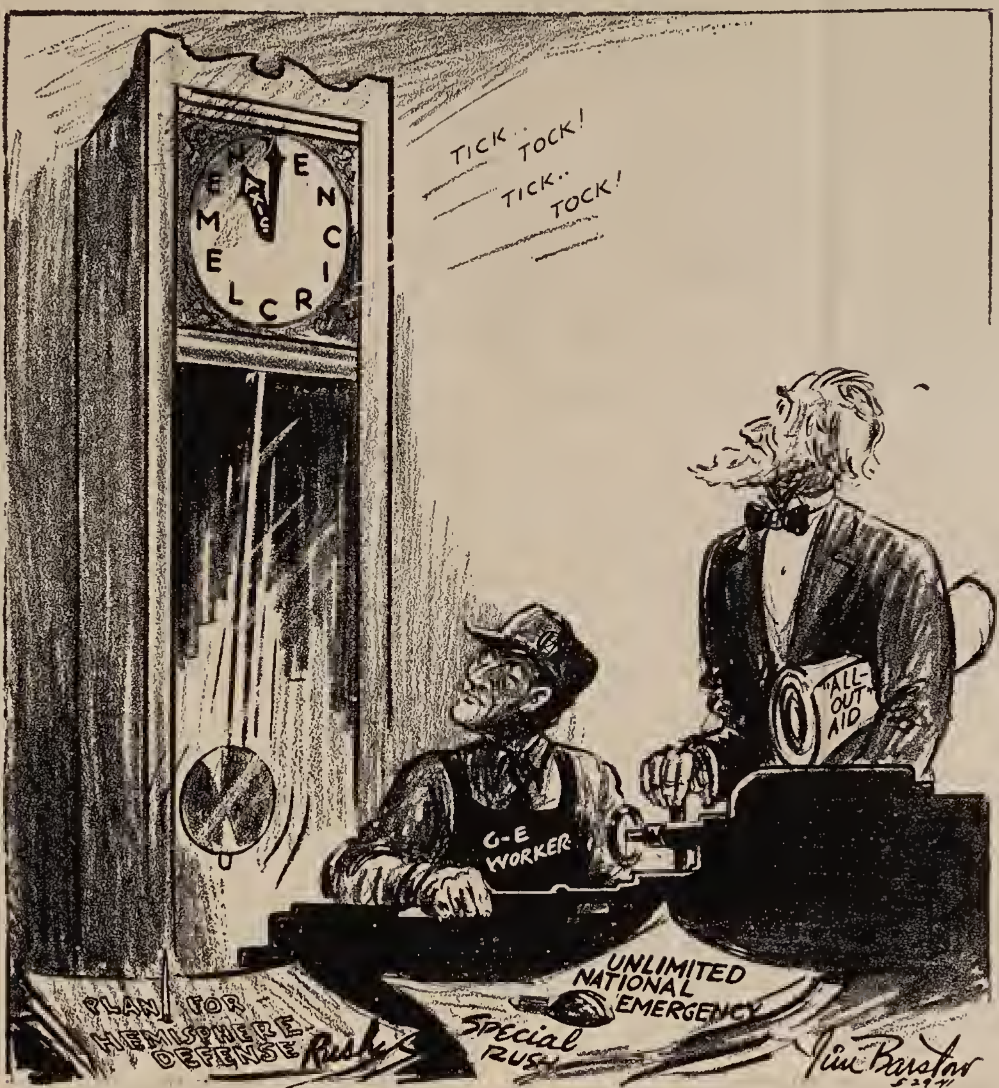
Thisa And Thata 19-5

Chicago had a treat Sunday when Frieda Knoche, Alma Lahrman and Edna Rohrbach visited that city. From all reports they did Chicago up right. . . . Alfred Hertel should be thanked by Elex for advertising the club's trip to Cincinnati in such an outstanding manner. . . . Congratulations to Rita Buchman who changed her name to Mrs. Raymond Barwilder on Saturday, June 7 at St. Peter's church. . . . Serena Slater entertained with a kitchen shower in honor of Rosie Lauer, a bride of June 21. Those present were Connie Zollinger, Elaine Goodman, Thelma Pond, Evelyn Archibald, Joan Kleber, Ruby Younghaus, Doris Fuelling, Helen Myers, Irene Benner, Maxine Ake, Esther Oliver and the honor guest.

Ask "Shorty" Lawson, Bldg. 4-5, what happened to his motor to cause Lillian Browne, Bldg. 19-2 and Gus Wiedeman, Bldg. 26-5, to paddle back from a boat ride.

Somebody could have bought that car of Lester Parish, Bldg. 26-2, for a nickel the other night. The horn got stuck and while Lester feverishly worked to still its blaring every person that he knew in the G. E. drove by. Some fun with each car exchanging blare for blare.

IT IS LATER THAN WE THINK!



Time does not stand still. Artist Barstow in this forceful cartoon has admirably caught the spirit of the times. The cry for production of vital war materials has never been louder, has never been more insistent than it is today. As the nation is committed to an "all out" effort to aid Great Britain and the democracies, so is the General Electric Company, through its tremendous productive resources and vast government contracts, committed to push itself to the utmost . . . in order that the direly needed materials are ready on time.

Every employee of the Company has a responsibility to carry out. From the humblest task to that of the highest ranking officer of the organization there are crying jobs to be done. America today remains as one of the few places on the face of the globe where the roar of enemy bombers laden with deadly cargoes has not yet been heard. America today remains one of the few places on the face of the globe where helpless women and children have not been slaughtered.

We are a brave, free people and right now is our chance to SHOW that bravery and PRESERVE that freedom. We can do it by putting everything we have into our daily jobs.

Let's go!

Is Zat So?

Do you have your fishing paraphernalia in good condition? Are you all packed and ready to open the fishing season in the manner accustomed of the sons of Izaak Walton? I wonder who will have the best fish story to tell next week? . . . The publicity for Bldg. 17-1 for the past week was taken care of by "Dan" Johnson, who was admitted to the Quarter Century Club. Congratulations, "Dan"! . . . Harry Kessler still has us wondering where he got that hat that he has been wearing at work. Harry says that it is imported, but he doesn't say where from! Your guess is as good as mine! . . . Argend Denny is taking care of the correspondence from Bldg. 17-1 gang to Private Walter Nix at Camp Shelby, Mississippi. Anyone having any contributions or additions to the letter please see "Denny," so that we can keep Walter informed of all the news at home! . . . Henry Papenbrock is just wishing his life away! He wishes this was next week so he would have his new set of teeth. "Pat" is sure tired of his liquid diet and says he is going to initiate his new teeth on a nice big juicy steak! . . . Evidently Jack Leonard visited the circus as he brought one of those little stuffed monkeys in to work the next morning. Jack still doesn't know where it disappeared! . . . A "quiet zone" has been established around Ed Brosche's work bench since someone posted a large sign reading, "Silence—Genius at Work." Ed says he is glad that at last his talent is being shown some consideration! . . . It seems so different in Bldg. 17-1 since Oscar Schelper left our gang and went to work in Bldg. 6-4 Magneto Department. We wish you all the luck in the world Oscar, but if you ever get lonesome for a good argument, come back and visit our gang! . . . We wish to extend our sympathy to Victor Hall on the death of his wife, who was the sister of Roe Ormiston, to whom we also wish to express our sympathy. As ever,

The Question Mark.

26-5 Tool Bits

Bill Greiner is in the market for a new car we understand. Probably can't trust the old bus to take him to his favorite fishing grounds. . . . Bill Stetzer is getting quite nimble with that sprained ankle of his. He could probably do just as well with one leg. . . . Kurt Martin seems to have the best solution to the east-end pinochle gang's trouble. He advises shooting kibitzers like they do in New York. . . . The Memorial Day holiday caused Fred Fitch considerable confusion. He was hunting all over the radio dial on Friday for his favorite Sunday program. . . . We know positive that Frank Presbindowski is a good and thoughtful husband for we learned that he bought his wife a tractor to do the farming. . . . Christ Kayser is planning a real vacation. A trip to California to visit his daughter.

Congratulations to Carl Alter from his friends in Bldg. 19-5. Carl was married to Lucille Bornkamp on May 31 at St. Patrick's.

Here 'Tis From 17-1

Yes we have proof that Jack Neuman lives up to what he says. About ten days ago Jack said he was going to retire because he didn't care to wait until he got too old to enjoy it. Asked last week why he hadn't retired Jack replied that he had—he bought a whole new set of tires for his car. Duck, everybody. . . . Anyone in doubt as to what the well dressed man or woman should wear could have received some pointers at the airport during the recent plane maneuvers, by following Wally McKay and his two charming lady friends about. Beg pardon, one of the ladies wasn't a friend, it was the wife. . . . We hear our friend "Shookie," capable machinist in Bldg. 17-1, doesn't mind at all paying 75 cents for a haircut, because the barber is alleged to always use a lot of bay rum on Shookie's hair. Suppose the barber really puts it on his head? . . . We have been wondering if you have to have your hair cut round in the back in order to be a farmer, or are farmers different from us city slickers? Probably Howard Eastman can tell us. . . . We wonder who our friend Alfred Nix was referring to in his letter to the gang in Bldg. 17-1 when he mentioned a couple of boys. Could he have meant Bill Fisher and Oscar Schelper? The rest of the Bldg. 17-1 gang are all men. . . . Have you noticed the elderly look Henry Pappenbrock has been carrying around the last few days? He claims he got tired of the boys calling him "Pappy" so he decided to have his teeth yanked in order to look the part. . . . Ernie Riley explains his sunburn as the effects of a coon chase. The question arises, did Ernie chase the coons or did the coons chase Ernie out of their territory. . . . Johnnie Junk explains his switch from a six cylinder car to an eight by saying that when he had three children he had a six or two cylinders apiece. Not to slight the fourth offspring Johnnie had to provide two more cylinders so he bought an eight. He may own a twelve someday, for if we remember correctly, there aren't any ten cylinder cars. . . .

That's It.

Hermetic Office 17-2

We all enjoyed our first regular Saturday vacation. The few who did work insist that George Langenberg finally came through with that long promised popcorn. We don't doubt there was a lot of corn around the office, but not popcorn. . . . Merle Kirkpatrick returned from her brother's wedding in Michigan, a blushing bride's maid. She even favored us with a bouquet of wedding flowers. Doesn't that give you any ideas "Termite"? Remember that questionnaire!

Suzy Sleuth.

We don't know which is the worst of the two but when Walter Seidel and Janice Stute of Bldg. 4-2 go to Crooked Lake again they are going to take a suction pump to bail the boat. It seems, that after motoring (?) all over the lake Walter discovered that the live box was half full of water and became so excited that he gave Janice the job of bailing it out. After Janice got a few blisters on her hands she gave it up at a bad job and Walter says it was comical. We think it was brutal of Walter to give a poor, hardworking girl like Janice, a job that can never be finished.

NEWS THROUGH THE PLANTS

News On The Nose From 4-5

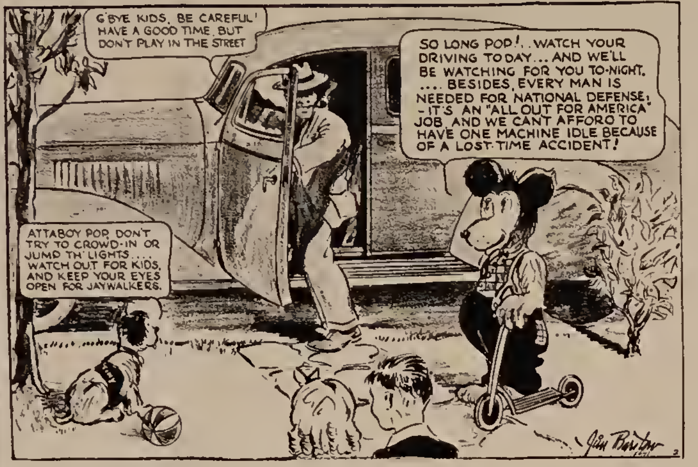
Here 'tis, the month of June with picnics and honeymoons and vacations (we hope). The Elex girls are all excited over their trip to Cincinnati and Ervin Hott is disappointed because Myrtle Rauner wouldn't take him to the Elex Father and Daughter banquet so he could drink all the free bergh--or uh, soda-pop he wanted. . . . They are telling a good story on Erv. Hott and Frank Gamec, Bldg. 17-2, it seems that Erv. slept while Frank was driving home from Minneapolis, Decoration Day. When he awoke he found that Gamec had driven back to where they had started from, some 142 miles out of the way. . . . Elaine Altheon of Bldg. 4-5 stockroom is a very happy gal. Every Wednesday and Friday the lad who will some day make her Mrs. sends a bouquet of flowers to brighten her desk. . . . Although she always looks pretty, blonde Gloria Hormann looks especially dazzling on Wednesdays—she confessed that Wednesday night was date night, but she blushed and denied that she dressed up special for him. . . . Irv. Koehlinger keeps the telephone hot, but not from too frequent talking. He keeps it under his desk lamp then when he or Maury Reed pick it up they burn their hands—he also keeps his new tractor hot over the week-end, plowing spuds. . . . When asked why he talked so loudly over the telephone Ted Hicks replied, "Well I have to so they can hear me clean down stairs." . . . Ed Klomp's new pet animal aroused quite a furor in the Bldg. 4-5 winding section of girls recently.

Winter Street News

John Thomas is having quite a time wearing his shoes since returning from a visit with some of his hillbilly friends in the Blue Ridge mountains. Yep, he convinced them he was city broke. . . . Mable Essig joins our class of eccentrics who forget to pull in their feet before slamming the car door. It does hurt. . . . This younger generation. Imagine having to get excused to attend one's own graduation exercises. Such was the case of Gloria Wiebke and Dick Stresser. Good luck to both of you.

Congratulations to Arnold White, Bldg. 18-2, who reports the arrival of a baby girl. No cigars please.

Nina Andrews of Bldg. 4-6, Eva Lynn of the Cafeteria, and Hazel O'Brien, visited the most talked of cottage on Big Long Lake late Saturday night. They enjoyed a boat ride in the moonlight, the only trouble was that Eva said the ride did not last long enough.



G'BYE KIDS, BE CAREFUL! HAVE A GOOD TIME, BUT DON'T PLAY IN THE STREET
SO LONG POP!..WATCH YOUR DRIVING TODAY...AND WE'LL BE WATCHING FOR YOU TO-NIGHT. .... BESIDES, EVERY MAN IS NEEDED FOR NATIONAL DEFENSE; -IT'S AN "ALL OUT FOR AMERICA" JOB, AND WE CAN'T AFFORD TO HAVE ONE MACHINE IDLE BECAUSE OF A LOST-TIME ACCIDENT!
ATTABOY POP, DON'T TRY TO CROWD-IN OR JUMP TH' LIGHTS.... WATCH OUT FOR KIDS, AND KEEP YOUR EYES OPEN FOR JAYWALKERS.

26-5 Tool Bits

The height of insomnia was reached the other day by James McFeeley, our wild dreamer, when he stopped his car, stepped out, and slammed the door without shutting off his motor. With the car locked and the hood securely fastened Jim had to borrow another car to rush home and get duplicate keys. In the meanwhile the engine purred softly and contentedly. No wonder there's talk of a gasoline shortage. . . . Margaret Ryan and Henry Gick did a "Sadie Hawkins Day" in reverse while running for the time clock. Henry was a close second. . . . We understand Henry Wittber has got his seasons mixed to the extent of opening windows in the winter and keeping them closed in the summer. . . . Chester Reynolds is holding tight to his reputation as a fashion stylist in cars. His latest creation is a doozy. . . . Ross Cohagen's trip to Waterloo, Iowa was a flop. He shut off the alarm clock while in a daze, missed his train, arrived five hours late, missed his appointment and returned home a day early. Too bad. . . . Wanted: A sock to store my money in. Must not have holes—E. Lenz. . . . Fred Fitch was seen back-tracking to Roanoke. Was it rabbits he was after and why did he sit in his car radioing for half an hour. . . . R. Mayer has been wanting his name in this column for some time and he finally broke into the limelight by means of a broken window. A ball game, an ill-advised hit, a kitchen window, a crash and there you have the story. As a sequel when Bob attempted to install the new pane, "old lady luck" nudged him and the new pane went the way of its predecessor.

Who is the watchman that likes tomato juice so well that he ought to buy a grocery so he could get it wholesale?

Sunbeams From 17-4

Well, the first thing this blundering reporter must do is to apologize, it seems that Bob Bennet was not in the army or the marines, but the navy. Well, three cheers for all three—them's my sentiments.

Hester Lacy was seen carrying a very large box, if that was a hat, whoops my dear.

Aurelia Bubb bought a new car and we are all wondering if it was more for herself or a mysterious "Mr. Miller."

Is that a new kind of lipstick that Esther Ryder is wearing or is that the way a new car effects one?

If Angeline Bibbo isn't careful she is going to lose that lovely girlish figure by sitting still.

Just to prove that she has two pairs of shoes, Blanche Griffith wears one of each pair at one time.

Edith Farrel brings enough sandwiches for the girls working with her. Could it be that they have a hungry look?

The girls of the department gave a surprise luncheon at the Berghoff Gardens Saturday for Mabel Vizard who is being married June 28. The bride elect was presented with a lovely linen table service. Those present were Charlene Orn, Carol Huntine, Mabel Murray, Dorothy Wilhelm, Bonnie Shoner, June Martin, Ruth Barrick, Frances Odle, Beryl Kolkman and Belle Buchan.

Thought for the week: Because I had no shoes, I complained, until I met a man who had no feet.

Granny.

19-4 Spot Jottings

Ilo Dinger was married on May 24 and Josephine Offerle on June 9. Best wishes to both of you. . . . Clair Gigher has just returned from a flying trip to Florida. Ruth Tutweiler and Herb Buck received a partnership card from him—a very scenic card too.

Plastic Flashes

We wish to congratulate Fred John of Bldg. 12-3 office who no longer is the ideal eligible bachelor. The old adages, "True Love Never Dies" and "Absence Makes the Heart Grow Fonder" have proven themselves in Fred's case. He has courted and won Alma Williams, a former Pittsfield belle. Best of Luck, Mr. and Mrs. John, from all of us.

Lillian Hatfield wishes it known that she went to Ossian, while Florence Peters' trekked to New Haven over Decoration Day. Sorry we missed you last week girls.

Ralph Greider, Bldg. 12-3, claims he can see 100 per cent better since he has his new glasses. Do you mean girls, Ralph?

For never fail baking recipes see the "Bldg. 12-3 professional baker" Bertha Poole. Why don't you let us be your samplers?

Golf ball business has increased since the season has opened. If some dark night you see Louise Stevenson, Bldg. 12-3, covering every inch of the fairway with a flashlight, do not be astonished. She really is not looking for "night crawlers" but for those lost golf balls.

We all hope that since Crystal Waterman's, (Bldg. 12-3) cow is completely recovered, it will be the end of all of her troubles and things will be on the brighter side.

Jim Fleming, the masculinestyle adviser for our floor, has started a new fad. Jim advocates wearing ladies' anklets to work.

The reason for the broad smile on Arba Kurtz's face is the new daughter-in-law she is going to get on June 29.

No first aid kit is complete without some of Erma Nead's snake bite medicine. Erma says you will get your money hack if you're not satisfied with the results.

It does seem a bit "fishy" that Wilma Rebber, Bldg. 12-3, should receive a refrigerator as a birthday gift from her "boyfriend". Could this mean wedding bells???

Adelma Meice has the latest thing in burglar alarms. A baby Boston Bull Terrier. Guaranteed to sleep through anything.

The Tillies have an awful urge to trip someone by the deep trench in front of Bldg. 12. We'll sell tickets for China when they reach the Orient.

"The Tillies."

Mattie Lou Coats and Betty Hawk, Bldg. 26-2, seem to have gone back to their kid days for they are very active with the bubble gum.

Two friends in need arc two friends indeed. Ask Lawrence Rickert and Lawrence Schuster, Bldg. 26-2.

M. B. A. PATIENTS

General Purpose Motor: Vera Shaffer, Route No. 7, Wildrose Addition; Louise Walker, Lutheran Hospital; Hugh Johnson, 2321 Ebey Ave.; Vera Fisher, 1130 College St.; Margaret Diehl, 405 E. Main St.; Dorothy Bentz, 1126 Jones St.; Lucile Baker, 1911½ Broadway; Margaret Bates, 530 W. Berry St.; Ross Hingman, Waynedale; Lloyd Oberholtzer, 624 Hendricks St.; James Umphrey, 624 W. Main St.

19-4 Spot Jottings

Best wishes to Maxine Pelz, a recent bride. . . . True Sheets is getting worried. First he is advised that this forehead is getting higher, and now he is being called Blondie. . . . Where was Noreen Skevington going the other night. She kept right on going after reaching the first floor and probably ended up in the basement. . . . The all-day sucker craze seems to have hit the second shift winders. Well we all like to be young again. . . . Well at least Jack White gets off at the right floor now.

It is reported that John Figley, Bldg. 19-5, cannot go to the Punch Press stag because the washing machine broke down. Come on boys, anyone with spare parts give him a lift.

NEWS THROUGH THE PLANTS

Motor Generator Static

Important Notice—Johnnie Reardon of Bldg. 19-3 wishes, in this way, to invite all friends and acquaintances to visit him and see his Certificate for Proficiency at Snap Switches. Besides, this is a good way to see his name in the paper. What some people will do to appear in print!

Musical Appreciation—"Pappy" Archbald, Bldg. 19-3, has been leaning toward western tunes in his latest musical moments. After hearing his rendition of "Bury Me Out on the Lone Prairie," Bud Fisher remarked, "Sometimes I wish they would." Disheartening, eh, what?

Practice and Stuff—Sara Jean Jones, Bldg. 19-3, announces that she has taken her first golf lesson from a local "pro" and soon will be playing a championship game. Look out, you men!

Saying of the Week—(Being a regular reader of Walter Sunier's column, "In the Rough") Jerry Frye remarks, "Sunier or later we all get in the rough."

Quiet, Please — We feel that Frank Archbald and John Rogers should not have told about Henry Lojek tacking wall paper on the walls at home instead of using paste. After all, if Henry has found a faster and easier way of applying his paper, it is in keeping with the modern trend toward speed and efficiency. But we imagine stud studded walls and ceilings do remind one of the good old medieval days when men were men and women were glad.

Quiz—When questioned about their recent trip to Columbus, Annabelle Haines and June DeWitt have no ready answer, as do the "Quiz Kids"—rather their reply is "Never heard of it." Why?

Re-inforcement — Jeanette Van-Buskirk, good humor girl of Bldg. 19-3, has a new heavy duty chair. It seems that of late every time she moved a part of the old chair fell off, hence the hurried replacement.

Help—Helene Blauvelt and Phyllis Wright recently saw an advertisement which they interpreted as meaning that for a certain number of wrappers from a particular kind of ice cream cones, one would obtain the "Lone Ranger." The girls entered into a contest to see which one would gain this prize. Helene had all the youngsters in Monroeville, her home town, collecting wrappers for her and soon had forty while Phyllis was only able to consume twenty cones without aid. Imagine their disappointment when they learned that the "Lone Ranger" in person was not the prize—only a "Lone Ranger" ring or bracelet. They remarked (quote) "A gal just can't win."

Carl Rutledge of Bldg. 19-3 sure was angry with himself one day last week. Why? Well if you must know, he hit his nose with a hammer. Then he looked around so innocently to see if anyone had seen him. Would suggest you use a soft hammer in the future, Carl.

Do I Worry?—Last week some knave wrote an article concerning Dwight Myers (Motor Generator Division Editor) and his hobby of bringing flowers to the office. "Old Poison Pen" has discovered that Dwight is very much upset over this publicity, because people might gain the impression that he (Dwight) wrote the literary gem, also because it invited (in a negative sort of way) folks to call him "Buttercup." It seems that back in Myers history there existed a Jersey cow, pride and joy of the family, that answered to the call of "Buttercup." "Poison Pen" wishes to assure all people that he is certain that Dwight did not write the article (Dwight said so himself) and that any relation between "Buttercup," the cow, and "Buttercup" Dwight was only a matter of family history. We trust this will clear up the matter once and for all.

Some people are sure lucky. Amos Schladenhauffen, Bldg. 19-3, whose good looking puss graced the WORKS NEWS last week as one of the leading suggestion reward receivers was so pleased to see his photo in the paper, he is asking all his friends to cut the picture out, and now we find Amos was intending to present all his relatives with his picture. Lucky Amos.

We wonder why Fred Geisler, Bldg. 19-3, forgot his button last Monday morning. Was it because of the bluegills or was it because of the story of the key the wind blew away.

The Gold Star Fisherman is Joe Burton, Bldg. 19-3, who practices at Reservoir Park. One night last week he got a bird's nest so big it will take past the opening of the season to untangle it.

Eddie Gambrell of Bldg. 19-3 missed his calling. He should have been a story writer. One day last week, June, mind you, he wore a sheep lined coat to work. Must have a good imagination. Better start writing, Eddie.

Mercury Lamp A Mighty Midget

In this picture F. M. Spaugh, and E. H. Powell, G-E lighting specialists are seen studying the new mercury searchlight which produces 20,000,000 beam candlepower. The new searchlight is 24 inches in diameter, has a silvered glass reflector, and operates a 1,000 watt water-cooled mercury lamp, smaller than a cigarette in size. A water circulating system is used to cool the lamp. A gallon of water a minute is pumped through a glass water jacket surrounding the lamp, thus carrying away much of the heat.

It's Major Houck Now

Congratulations are extended to John F. Houck who has been commissioned a Major at Camp Shelby, Miss. Major Houck left here as a Captain with Company K, 152 Inf. of the National Guard during January of this year.

To And From

Dear Hermit:

Shirley Ohneck has been seen lately wearing a novel pair of earrings. We are all wondering if those little gold trumpets that adorn her ears will really play a tune. By the way, did you know Shirley had a new nickname? We've heard people calling her "Heaven Eyes."

Katie Hazelett surely likes thrills and chills. When she isn't running up to Indian Lake to ride the roller-coaster, she can be found at a carnival at the ferris wheel (or is it the merry-go-round).

I for one, am surely glad that Dorothy Herdrich likes potato chips and that Margaret Corbat goes for pretzels. They are just the thing to fill up that empty space in the pit of your stomach about an hour before supper.

The other night Scotty let her hair down, and what do you think, it changed her looks so that we thought she was a stranger for a second.

Well, dear Hermit, I will be looking for a nice, long, newsy reply, so act accordingly.

The Girl Upstairs.

Dear Girl Upstairs:

Lum McDowell got his hair cut. Enuf' said.

The Hermit.

26-5 Tool Bits

For bigger and better stories about fires, see Herb Thiele and Arnold Korte. They sure have a couple of whoppers this week.

Bert Telley, of the slotter gang, must be practicing for the coming football season as he was seen dodging traffic in the middle of Broadway and using his hips like an all-American fullback.

The "Dugout" 6-B

Clare Fryer must come from a very aristocratic family if the print of a certain girl's dress in Bldg. office reminds him of their wall paper at home.

Say girls, did you ever see Bob Wilson smoke a cigarette? I declare, I don't believe he even knows which end to light.

Well folks, we're losing our tall blonde and handsome boy friend from Bldg. 6-B office this week. Henry Brandt has been called into the service of Uncle Sam.

Can you feature a certain elderly gentleman in Bldg. 6-B office without that cute little curl on top of his head and his jaws doing 60 per with a wad of chewing gum? I can't.

James Johnson has a part interest in Masterson's Studio now. Have you seen the pictures of his baby? Cute too.

The Cellar Rat.

Edna Crow, Bldg. 4-3, has been trying her skill on different things, as Edna says, it is nice to be able to do more than one thing. The other week she built a back porch on her home, but when she saw Clyde Beatty's show decided that would be an easy way of making money, so she went home and thought she would train with her pet dog. Well, the way things turned out you had better not try any lions or tigers, Edna.

Now it seems that the winders on the third trick are very thankful to Josephine Faulkner, Bldg. 4-3, for coming in at six in the morning to oil their machines, but they say they could work better if she could arrange to come in and oil them at midnight instead of six in the morning.

Sleuthing In 4-6

A potluck dinner was held Thursday noon for all the girls in the Production, Engineering Requisition and Drafting departments, Bldg. 4-6.

The special guests were Helen Tieman, Celeste Moran, Anna Marie Kestner, Kathryn Rectanus, Doleen Geary, Olive Armey, Flossie Davis and Edna Hassinger who had all been transferred out of one of these departments. Food and laughter were plentiful. The tables were attractively decorated with colored fans made of the napkins, flowers and plenty of food. Many thanks should be given to the Committee for the splendid work which they did to make this a swell get-together. The Committee was composed of Wilma McKay and Georgia Garrett, co-chairmen, Catherine O'Conner, Ruth Kaiser, Dorothy Mueller and Florence Sutorious.

Vera Berning, Esther Selzer and Dorothy Mueller were supposed to have attended a convention in Louisville last week. They arrived in Louisville but not at the convention, some soldier boys delayed them. (That's their story and they are stuck with it). . . . Our little school girl, Rosemary Pond, is going to become a school marm. She says she is going to tutor a boy in something. We're all betting it won't be one of the three "R's" unless they mean a new one called Romance. . . . Who is the blonde girl that Robert Kirby was seen with at the Airport the other day? He insists it's his sister. What do you think? . . . Gerry Grim, our little "oink oink" girl did it again. She really fell for that fellow—in the mud. . . . Sorry indeed we are to lose such a good scout as Helen Tieman, but we wish her lots of luck in her new job in Bldg. 4-2.

A "thank you" from all the girls to C. B. Smith, Paul Berghorn and M. G. Norris for their cooperation with the members of the Potluck Committee last week. We all realize that without your approval we could not have had this get-together. We also want to thank the fellows who so kindly helped us by carrying the heavy packages and dishes for the committee. Thanks a lot to Herb Reitz, Ed Whipple, Wally McKay, Glen Seabold, Al Willits and Bill Pape. We do appreciate what you did. . . . Our best wishes for many long years of happiness are extended from the Bldg. 4-6 gang to our own Glen Seabold, and the new Mrs. Glen Seabold. We wish you the best of luck Glen and Virginia. . . . What has happened to "Papa" Own Hower to make him an eccentric person? Now most of us, if we forget our identification button, do it in the morning; but not "Papa", he forgets his at noon. . . . Somebody wanted to know the other night where Herb Reitz got that straw hat he was displaying. We think it was an inmate of a museum, for as one of the gang said, "It's turning yellow with old age." . . . A shower was given by Helen Tieman and Virginia Whipple last Friday night in honor of the approaching marriage of Miss Margery Hagerfeld to Mr. Dick Szink. The bride was presented three lovely gifts from the Secret Sister Club and her co-workers.

The Sleuth.

It seems that Marie Martz and Anna Pearson, Bldg. 19-5, have a little trouble distinguishing their right hand from the left. At least it is reported that they had to have lessons on how to put on gloves.

Zollners Nose Out G-E Club By Scant One Run Victory

Softballers Finish Major Loop In Second Place With Three Wins And Four Losses

The highly publicized and imported Zollner ten barely nosed out the G. E. squad by a count of three to two, with the aid of the umpires, at Memorial Park Tuesday night.

From the outset the game resolved itself into a battle between the moundsmen with now and then a spurt of commendable fielding.

The local softballers stepped to the plate 38 times to garner six hits and tally two runs.

The nimbleness of left fielder, R. Schuster stopped a possible rally at various times during the eight and a half inning thriller.

Things began to pop at the end of the fifth when Piston's Baker hit a home run to tie the score garnered in the first inning by the G. E.

Fireworks blazed in the sixth when technicalities halted the game on three occasions. Armstrong was halted at the plate with the count three to two when the tape was noticed missing from the bat handle.

The second disturbance arose when the Piston manager made Gruntel change shirts because of lettering on the front, which was claimed to hinder the batter.

The final parley occurred when the Piston runner, Burgette, interfered with short fielder, Eckenbarg, as the latter attempted to catch a fly. The umpires ruled non-interference which allowed Armstrong to bring in the tying tally.

The seventh inning retired both sides without any increase in score. The G. E. ten failed to connect in the first of the eighth although Scherer gained first after an error by Lipa.

A low skimming fly by a Piston man and an error by Eckenbarg allowed the lead-off man, Armstrong, to tally the clinching run.

The first of the ninth ended when Huth struck out, Huber hitting an easy fly, Gruntel being walked, and substitute Clawson making an easy out.

The loss Tuesday evening leaves the G. E. softballers finishing the Major loop in second place with three wins and four losses. This leaves the Zollner Pistons in first place and still unbeaten.

Summary

	A.B.	H.	R.	E.
Holmes, ss	4	1	1	0
Scherer, 2b	4	0	0	0
Schuster, lf	4	1	0	0
Nahrwold, 1b	4	0	0	0
Huth, cf	4	1	1	1
Huber, c	4	2	0	0
Gruntel, p	4	1	0	0
Eckenbarg, sf	3	0	0	1
*Clawson	1	0	0	0
Kreig, rf	3	0	0	0
Stellhorn, 3b	3	0	0	0
Totals	38	6	2	2

*Batted for Eckenbarg in ninth.

Strikeouts—G. E., 2; Zollners, 16.

Walks—G. E., 4; Zollners, 4.

Winning Pitcher — Lipa; C.—Kampschmidt.

Losing Pitcher—Gruntel; C.—Huber.

NEWS THROUGH THE PLANTS

(Continued from Page 7)

Mr. and Mrs. Arthur Gertz (Ye Editor Mildred Gertz, Bldg. 4-6, to you) left for a two weeks' jaunt to San Francisco and other points west. The first tidings from Salt Lake City are favorable for a pleasant journey.

We thought that we had come upon a big mystery at Big Long Lake but it turned out otherwise. We noticed that Sam Allmandinger's car (Bldg. 4-3) was backed into the lake with the trunk open. Sam was no where around. As we entered the Manor house we heard a radio playing and a bright fire was burning in the fireplace and before it was Sam stretched out like a Great Dane dog sound asleep. He explained to us that he became so exhausted shoveling fish into the trunk of his car that he decided to take a nice snooze to restore his former pep.

Last Monday A. M. there was much hilarity in the south end of Bldg. 4-3. Kenney Betts was all hopped up and in high glee, the reason for this was that Kenney's son, Neal, went out to the Rod and Gun Club shoot and shot a 96 score. Most excellent we say. We can appreciate enthusiasm and we are wondering if he could do that good himself.

Harry Mumma, Bldg. 4-3, wishes to take this opportunity to announce to the general public that he now has all the equipment necessary for any land clearing project. He will remove trees, stumps, boulders, dilapidated buildings, or what have you. He tells us that his new stump cutterouter is a doozie.

Forrest "What Size" Whonsettler, Bldg. 4-3, in order to increase his weekly income has entered the selling game on the side. In his stock and trade are included such necessary items as trousers, shirts, ties, hats and caps. He also carries a line of high grade "lingerie." His official slogan is "What Size Whonsettler, the man who fits you without a fit."

Virginia Whipple, Bldg. 4-6, went wading on Tuesday noon—which may have been quite all right, except, for the fact that she failed to take off her shoes. Since we know she isn't in her second childhood, we are wondering if it could be the after effects of the "kid" party which was held at her house recently.

Nellie Williamson of Bldg. 4-3 is a very clever girl, but she isn't appreciated by the world in general. She has been thinking of opening an Entertainment Bureau. Any suggestions for programs will be greatly appreciated. You really should hear her latest rendition of "The Hut-sut Song." It's okey-doke (as she would say.)

Herman Hake (Bldg. 4-3) went to Indianapolis for the races. When asked who went with him the truth came out. Herman had a blind date. She lived there and was he thrilled. She wears high (10 button) type shoes. Herman claimed she had freckles so big that they reminded him of Swiss cheese. Now what we can't figure out is why he had to go so far to meet such a handsome girl. Better luck next time Herman.

Wonder who the fair gentleman was that serenaded Sylvia Baughman (Bldg. 4-3) from her front porch late one night last week.

For Sale—By Effie Wyatt, Bldg. 4-3, 100 feet of good garden hose. She has installed an automatic sprinkler.

Doris McGinley, Bldg. 4-3, spent the week-end at Mammouth Cave.

Eva Gault, Bldg. 4-3, visited "House of David" Men of whiskers. They all look alike, said Eva.

Everyone is wondering if Johnnie Deahl, Bldg. 4-3, had a very busy time over the week end as he spent his lunch hour sleeping or could it be that he had charge of that new fire truck? A number of people were passing through Waynedale the other week when a large crowd was gathered in an open field. There in the middle was a Model "T" Ford, on the back of which they were tying an extension ladder. Some one asked what was going on and they said that is the new fire truck Johnnie is going to run during his spare time.

We'll bet Russell Flaugh, Bldg. 12-B, doesn't find fault with his wife's pie crust since sinking his teeth into that tin one he bought from the candy wagon last week. After checking carefully, Russell reports no missing teeth, but says he certainly got his full quota of iron in that raisin pie!

We wonder how Suzy Sleuth's badge got into the pantry. Was she getting a midnight snack or was it for safe-keeping while she went out of town?

Attention: Anyone wishing to spend a quiet, pleasant week-end and wish to have baby brother taken care of call for Fern Truelove, Bldg. 4-3, and for references ask Leora Carpenter of the same floor.

Ted Mullins and Everett McKee of Bldg. 4-3 did a good business selling row boats last Saturday at Big Long Lake. Better luck next week-end, boys.

Famous Last Words

Glyda Yoder, Bldg. 4-3: "Let's get out of here."

Erma (Cobina) Linder, Bldg. 4-3: "That old chicken."

Florence Shaffer, Bldg. 4-3: "It belongs to my sister."

Ruth McCuaig, Bldg. 4-3: "Oh, Yeah?"

Betty Sabo, Bldg. 4-3: "Maybe."

Bea Grobis, Bldg. 4-3: "I suppose so."

Muriel Berg, Bldg. 4-3: "Pretty soon."

Mildred Hoffman, Bldg. 4-3, has just returned from New York, where she spent the week-end with her son who is in U. S. training there.

We have heard and read of the harrowing experiences of people being lost on the desert or at sea, but Kate Shaeffer sure had one awful happening last week. Well, we will let Kate tell you how she was marooned on the second floor of her own garage, as it is a long, long story. All we want to know is—did you get the trunk down?

There seems to be a great number of girls who have talent that could easily be classed with some of our great picture stars, but we have only been able to find one, Shirley Temple. She happens to be Ethel Gardner, Bldg. 4-3.

It appears from all reports that a drove of hogs took the center of the stage at the picnic held by the punch press boys of Bldg. 19-5. We learn that the hogs were satisfied with the limburger cheese sandwiches until Otto Helmrich hove into view, but that from that time on they wanted Otto or nothing. Our correspondent further states that after Otto got restless and tried to break away from the porkers they followed him to his car and one of the largest ones managed to get in. Our correspondent concludes with "the last we could see of Otto, he was going up the hill with the drove of hogs still following his automobile."

Robinson—"Do you know what are the seven wonders of the world?"

White—"I only know one and that's my wife's first husband."

Inportance Of Factories Stressed By G-E Official

Factories and industries—not armies—are the important factors in the present war, H. A. Winne, staff assistant to the vice-president in charge of engineering for General Electric and a member of the company's defense committee, declared in a recent speech at Saratoga Springs, N. Y.

"We have a big advantage through our industrial development," said he, "but we must concentrate our productive efforts to the defense program. We must not hope to do 'business as usual.' Every citizen must realize that he will have to make personal sacrifices in the interest of the all-important task."

Strikes are hindering our production to some extent, according to Mr. Winne.

"Through strikes, it is reported that ten million man-days have been lost so far this year," he said. "At 75 cents an hour for an eight-hour day, this means that $60,000,000 worth of labor has been lost.

"This is equivalent to the cost of one battleship or 200 bombers or 1200 fighter airplanes," he continued. "Unfortunate stoppages resulting from disagreements between employees and employer should be eliminated."

He emphasized the point that "American factories have a tremendous job to do."

Only through willingness, desire and determination to do the job, on the part of everyone concerned, will industry attain its goal, according to Mr. Winne.

"Industry in this country developed mass production methods when time was money," he asserted, "and now these same methods can and will be used to save time, which is now life."

G-E Club Nine Takes Harvester By One Run

The G-E Club baseball team nosed out a 5 to 4 decision over the International Harvester Club Thursday night at the G-E diamond in a well-played game.

Harvester outhit G-E, but two costly errors spelled defeat for the truckmakers. The line score:

		R.	H.	E.
Harvester	011 110	4	10	4
G-E Club	100 13x	5	7	1

Batteries — Belzinski, Stafford and Ellenwood; Lowe, Max Miller and Steinhauser.

RESTAURANT RECORD

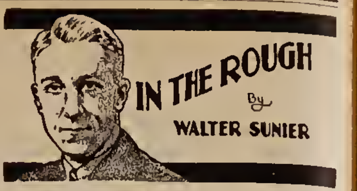
A new record for noon meal patronage was set at the Works Restaurant last Wednesday when 1,343 employees were served noon meals. The normal heavy noon day patronage was augmented by the downpour of rain at the noon hour.

Elex Excursion

(Continued from Page 1)

radio broadcasts, an outing at the famous Coney Island Park and dinner in the sumptious Hall of Mirrors at the Netherland-Plaza Hotel. Also of interest will be the two hour sight-seeing tour in the city of Cincinnati.

On the return trip the special train will leave the Cincinnati Union Station at 8 p.m. Eastern time and will arrive in Fort Wayne at 11:45 daylight saving time.



IN THE ROUGH

By WALTER SUNIER

Those two have a circus and they are not Hagenback and Wallace. They are Johnson and Wallace. Wallace had a circus a week ago Sunday when he had a 40 on the second nine at Brookwood. Johnson thought he had Hagen back.

How would you and your partner both like to get pars on No. 1 at Brookwood and be three strokes down to your opponents? Neither did we. In League play, Smoley and "us" had pars but Coy Brown had an eagle and Johnny Schwanz had a birdie. Brown's second shot was perfect, having just enough hook to make it pull onto the green in line with the pin. The putt was fairly long but Coy sank it easily.

If you want to hit shots like that you should see a pro. Who knows best? You or the pro? Oh, no you don't.

In the Monday Evening Group in the League, the Turf Toppers defeated the Slapsticks, 208 to 211; the Divot Diggers defeated the Rough Riders, 163 to 168; and the Ice Cubes defeated the Plastics, 200 to 202. The low score was shot by Coy Brown who had a 37. Brice Hamilton and Bob Hanna each had 40. The Turf Toppers lead in the Group with the Plastics and the Divot Diggers in a tie for second place.

In the Tuesday Evening Group, the Bldg. 4-4 team defeated the Dubs, 195 to 201; the Billy Goats defeated the All Stars, 179 to 203; and the Bldg. 4-3 team defeated the Optimists by an unknown score. Daseler was low scorer with 39. Merrill, Hackett, Jr. and Reynolds all had 42. There is a four way tie for first place in this group between Bldg. 4-3, Billy Goats, Optimists and All Stars.

In the Wednesday Evening Group, the Fluorescents defeated the Sharpshooters, 174 to 182; the Trappers defeated the Cro-Flites, by forfeit. The match between the Hookers and the Apprentices was postponed. The low score was Kronmiller's 41. So far the Hookers are leading and the Sharpshooters and the Fluorescents are tied for second place.

Become Foremen

(Continued from Page 1)

Mr. Clark entered the employ of the General Electric Company in September, 1922, working under W. Pence. After working with the moving crew for two years he was transferred to painting operations and he continued in this work for three years. He was then made a leading operator over painting, moving and other operations of that nature and continued in this capacity up to the time of his present appointment. Mr. Clark is married and resides at 1832 Purdue Drive.

Mr. Burkett became a General Electric employee in 1917 when he took employment under Fred Duryee, then in charge of the electrical maintenance department. He continued in the electrical trade until the time of his present appointment and qualified as a master craftsman. Mr. Burkett is married and lives in New Haven, Ind.

FORT WAYNE WORKS

Volume 24 FORT WAYNE, INDIANA, FRIDAY, JUNE 20, 1941 Number 70

A Carload Of Elex Excursionists

More than three hundred Fort Wayne Works employees took advantage of the Elex excursion to Cincinnati last Sunday. A view of the interior of one of the coaches on the special train is shown above.

Pictures on Pages 4 and 5

Insurance Payments In May Are $36,305

Claims At Fort Wayne Are $3,500. Grand Total Reaches $18,717,305

Beneficiaries of 17 employees in the apparatus works of the Company who died during May received a total of $36,305 under the group insurance plans, according to the monthly report issued by the office of the secretary. Schenectady Works had five claims of $15,000.

Lynn River Works had two claims for a total of $4,650 and West Lynn also had two for a total of $4,855. There were two claims in Bridgeport Works for a total of $2,000.

In five works there was one claim each as follows: Pittsfield $650; Erie $1,000; Fort Wayne $3500; Bloomfield $1150; and Philadelphia $3500.

In the Pittsfield settlement, the claim was paid on the death of a

Traffic Light Buttons Installed At Broadway

The attention of employees crossing Broadway in front of our Works is called to the installation of push buttons to regulate the traffic light. Four buttons have been installed, one on each corner of the crossing on lamp posts. The light after changing to green east and west will hold this color for ten seconds. After the light has again changed green north and south it will hold this color fifty seconds until it again responds to the push buttons. If the push buttons are not used,

11,891 Subscribe For U. S. Defense Bonds

During May 1941, 11,891 employees authorized payroll deductions under the G. E. Defense Savings Plan for the purchase of United States Defense Savings Bonds amounting to $897,300 maturity value. This is an average subscription of $75.

It should be remembered that while these Defense Bonds are being paid for, upwards of 21,000 employees will, at the same time, be paying for $3,800,000 of G. E. Employees Bonds under the payroll deduction plan, subscribed for last December.

The Defense Savings Bonds and the G. E. Employees Bonds now under subscription will all be fully paid some time in December.

Cash sales of United States Defense Savings Bonds under the plan during the month of May were made to 502 purchasers in the amount of $87,325 maturity value. Cash sales of Postal Savings Stamps during the month of May amounted to $1,693.20.

Recruits From Colleges Set A New Record

Two Hundred And Fifty Graduates To Enter G. E. Business Training Course

College seniors hired this year by the Company ,to enter the Business Training Course, number the highest on record in the 23 years that the department has been in operation, according to M. L. Frederick, in charge of recruiting men for the course. The 1941 record total will be more than 250, topping the previous high of 230 in 1937. These men have been selected from 2300 interviewed at 87 colleges throughout the country.

Of the new B.T.C. men, more than 50 have already gone to work, and 198 are to report from the June graduating classes.

Mr. Frederick, who has been in charge of the Business Training Course since 1922, and has personally interviewed more than 12,000 college seniors during his years in that position, stated that General Electric was able to obtain all the men needed in his department this year, in spite of the increasing number of jobs open to college graduates.

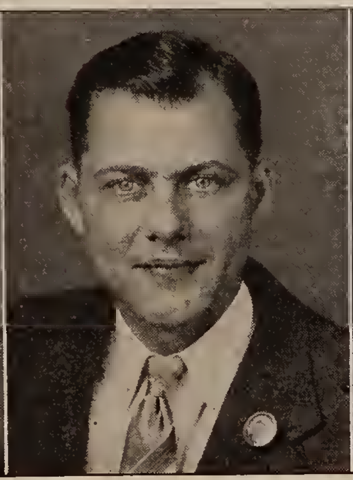
(Continued on Page 2)

NOTICE

In accordance with the regulations of the Group Insurance Plan, the regular semi-annual revision of group insurance rates is being made by the Payroll department. Any increase in insurance deductions will be effective in pay received June 27, 1941.

Five Employees Are Promoted To Positions Of Foremen

W. H. Hanke



R. W. Esterline

C. F. McCormick

G. Stripe

C. M. Griffith

The advancement of five employees to the positions of foremen are announced. R. M. Hartigan, superintendent of the Motor-Generator Division announces the appointment of W. H. Hanke as foreman of second shift assembly; C. F. McCormick as foreman second shift and C. M. Griffith as foreman third shift. R. C. Dennison, superintendent of the Magneto Division announces the appointment of G. Stripe as foreman second shift and Lisle Hodell, superintendent of Bldgs. 17-2, 17-3, 17-4 and 2-2, announces the appointment of R. W. Esterline as foreman third shift.

Mr. Griffith, who resides at 247 East Pontiac Street, was first employed in May, 1920, as a boring mill operator. He has worked continuously in the same department up to the time of his present appointment. Mr. Hanke took employ-

• Suggestions And Defense

We are indebted this week to S. W. Sullivan and Earl Noyes of Erie Works for the idea carried out by Artist Barstow in the cartoon to the right. While no particular campaign is in progress for ideas for national defense, the opportunity to use the well established Suggestion System was never more bright than at present.

As every General Electric Employee knows, the Suggestion System has been and is a prolific source of ideas for the conduct of the business in more normal times. The Company and its employees have benefited through its operations. With a national emergency facing the nation, is it not entirely in order to believe that a third party, Uncle Sam might also join the family, and receive the benefit of our thinking?

Throughout the ranks of more than 100,000 employees there are many who have ideas on national defense. It only takes one idea to set in motion, forces which could win a war. Remember, it was only an idea that gave birth to the automobile, to the airplane, to the telephone, to the radio and to all the miracles of modern life. Our country today is rich in ideas, rich in imagination. If we have the vision to use those ideas plus the imagination . . . there is no limit to what we may yet accomplish.

So let's have your ideas . . . be they for war or peace. Send them in through the Suggestion System. Who knows what they may do?

• We're In The Army Now

Where is the fellow who, nowadays, hasn't had a friend, a member of his family, a neighbor, or one of his fellow workers, answer the "call to the colors" and march off to a military camp to serve in Uncle Sam's Army?

Yes, many of the young men we know have donned the army uniform and are "falling in" to the blare of a bugle in some far-off training camp.

Those of us left behind in our jobs in mill and factory are in the army, too . . . the Army of Production for National Defense! We make the equipment that makes an army strong.

Military officials estimate that for each soldier, sailor or aviator in the service, 17 men of industry—soldiers without uniforms—are necessary.

The Men in the Mills . . . the Men in the Camps . . . all have a vital job to do for National Defense. We are proud of each other and proud we are Americans. We will all do our bit!

—Youngstown Bulletin

U. S. Defense Bonds

(Continued from Page 1)

Subscriptions at the various works and offices were as follows:

Works	Number	Maturity Value	Cost Price

College Recruits

(Continued from Page 1)

"Due to our policy of continuing to contact and hire men from these schools during bad as well as good years,"he said, "we have built up goodwill for General Electric among faculty members and placement directors with influence among the students. We have the reputation of being one of the largest and most regular employers of statistical, financial, and accounting workers in the country.

"We offer our boys the advantage of taking at G. E. extra-curricular classes in accounting, business law and company organization. In addition, if they develop particular talents in lines other than accounting, they have the opportunity of transferring into such work as commercial, publicity, market research, production, and distribution.

"Our class in company organization," he said, "which also includes engineers in the 'test' course, has increased to such an extent this year that we have no classrooms large enough to accommodate it. Our plans at the moment are to hold the class in the G-E Athletic Association gym."

The B.T.C. selects college seniors from a list of schools visited regularly each year. Mr. Frederick handles a large part of the recruiting himself, although men in other departments frequently interview boys at colleges where they have personal contacts. A certain number of business school men, or high school graduates with business training, are also hired by Mr. Frederick's department, for stenographic or business machine work. After they have had, at General Electric, training equivalent to that of the college graduates, they become eligible for proportionate positions.

It was announced earlier that 706 of this year's college seniors are being employed as "test" engineers, breaking the record of 667 set for that course in 1930.

NOTICE

United States Defense Savings Bonds and Defense Postal Savings Stamps may be purchased for cash at any time at the Payroll department.

Foremen Appointed

(Continued from Page 1)

ment in 1926 under Fred Pembleton in apparatus assembly. He continued in this work up to the present time. Mr. Hanke is a resident of Waynedale.

Mr. Esterline, who resides on Route 2, took his first job with General Electric in 1926 when he was employed as a stock boy in the radio department in Bldg. 26-2. Later he was employed in casting rotor in Bldg. 17-2 and in 1937 he was made an assistant foreman. Mr. McCormick was first employed in 1925 and worked for C. Eickel. Fifteen years ago he was assigned to sheet metal work and he continued in this work up to the time of his present appointment. Mr. McCormick resides at 717 Home Ave.

Mr. Stripe, who resides at 3322 Robinwood Drive, was employed in 1927 and worked under Ray Refrew until 1937 when he was made assistant foreman under W. Franke. From 1938 up to his present appointment he worked in the Tool Maintenance Department.

Committee Named For Nomination Of Club Candidates

August 4 and 5 Are Set As Tentative Dates for Annual Election

Tentative dates for the annual G-E Club election as well as members of the nominating committee are announced by George Waldschmidt, Club president. The tentative election dates are August 4 and 5 at which time the membership, which includes all employees, will vote for president, first and second vice-presidents, secretary and one director.

The nominating committee which will announce its slate of candidates within the next few days consists of Wm. Doehrman, Bldg. 20-1, chairman; Helen Chapin, Bldg. 26-2; Joe Fagan, Bldg. 18-5; Sam Baumgartner, Bldg. 27 and Harold B. Carter, Bldg. 4-6. Alternates are Irene Perry, Bldg. 16-3 and Ed Misegades, Winter Street.

Insurance Benefits

(Continued from Page 1)

young woman employee, killed in an automobile accident. She had been employed by the Company one year and had just signed up for her additional insurance when she met death.

Throughout the entire Company, death claims paid during May totaled $82,792. Since the group life insurance plans were started in 1920 a grand total of $18,717,305 has been paid in death and disability claims.

Fractional Engineers Turn Out For Annual Good Times Party

By H. B. Carter

Members of the Fractional H. P. Motor Engineering Department enjoyed their annual good times party over last week end at Hamilton Lake. The highlights are too numerous to narrate. It must be mentioned, however, that Boss Noble never sleeps in his assigned room for some unknown reason; that Frank Suhr, in charge of arrangements, finally wore his bow tie and that the lake dunking party got a late start but made good by giving the works to Allen, Schlund, Roebel, Voss, Graham and Clarkson, all of whom needed a change of clothing.

In the picture above the top row left to right shows M. L. Schmidt and R. H. Chadwick losing to W. J. Morrill and J. H. Behm at shuffle board; Ed Schaefer determined to win the dart game from C. J. Herman, Paul Schaffer, and D. Maneke; early arrivals including Dag Hanson, L. Wightman and J. O. Bentley. Center row, Works Manager M. E. Lord doing a little relaxing; Rear Admiral Pepper taking L. Nelson for a wet ride; Fred Suhr telling Ray Lindemuth a thing or two. Bottom row—Sid Catsiff raising the ante; "Baldy" Voss at his favorite pastime and Guiding Light P. O. Noble happy over the whole affair.

News Around

We would like to remind Hildabelle Warren, Bldg. 4-3, that the 4th of July isn't far off. For those who don't know the history of this case, Hilda wanted to go to Foster Park on Decoration Day to see the fireworks. We decided she had her holidays a bit mixed up.

Margaret McMaken, Bldg. 4-2, spent Saturday in Chicago where she met her friend Mr. Hill, an officer in the U. S. Navy who just returned from Bermuda and is leaving for Seattle, Washington.

Virginia Klopfenstein, Bldg. 19-5 was seen giving Ann Pressler a detailed explanation of a turn-table using what she thought was one for the demonstration. It later developed the alleged turn-table was the disk that fits on the bottom of the telephone.

Ralph Ecenbarger, Bldg. 4-3, and his wife were observed eating their Sunday dinner in a down town lunch room. Now there is nothing extraordinary about this, but towards evening Ralph's wife became chilly and it was then that she discovered that she had left her coat hanging in the lunch room. Whereupon Ralphie, the retriever, dashed madly down to the lunch room and there, much to his surprise, hung the coat. He heaved a big sigh of relief and returned the coat safely to mamma.

and the arrival at the Island. Pictures 19, 20, 21, 22, and 23, "Doing" the Island from "A" to "Z". Yes that is Irene Meyers in picture 20 looking as if her stomach was feeling a little squeemish. Pictures 24 and 25. It's trite but it fits—"Tired but happy."

NEWS THROUGH THE PLANTS

SANDY SAYS

When my Cousin Colin saw the cartoon o' the birthday cake, celebrating the first year o' this column, he was as surprised as I was.

"Hoot Mon, Sandy", he said, "before ye started tae light the candle with the burning glass, did ye use it as a mognifying glass tae find the cake?"

"Weel", I said, "Ye should ha been tae the party. The crumb I had was delicious".

Colin said he wanted tae help me get off tae a gude start for the second year, so he set out in quest o' a story. He took his 5 gallon car around to the filling stations, gathered up 5 gallons used oil, filled his gas tank and spare cans with Third Grade—Special—Tank Car To You—gasoline, packed the family into the remaining space in the model T, cranked up, and headed south.

He appointed himself ambassador without portfolio or cash, from Indiana to The United States. A week ago Saturday he chugged forth to view conditions.

Later I got cards from him (postage due—1c) as follows:

Kentucky—"I'm still proud o' the old Model "T". Every time there's a line o' cars chugging up a hill, ye can bet my Model "T" is at the head o' it."

Tennessee—"I found out how tae save a dollar per day and get free board and room besides.—It sure beats paying the fine."

Back in Fort Wayne, weary and sore (not foot-sore—that wasn't where the model "T" got him) he reported that the one thing he saw in every town in every state was the answer to all our shortage o' materials. Every factory seemed tae be putting up new buildings. Every town had a building boom.

"How about traffic conditions?" I asked.

"Weel," he answered, "I wanted tae count all the cars that passed a given point, but I got scared out."

"Why? Afraid o' all the cars rushing by?"

"No, I just couldn't bear the thought o' a GIVEN point."

Edna Crow, Bldg. 4-3, has given up animal training and gone into tree trimming. Anyone wanting to know about the kind of work she does, just ask her neighbor whose cherry tree she trimmed. Edna also is going back to carpenter work. Her neighbor has a barn he wants Edna to rebuild into a garage. We wonder if that is where she is spending her time as no one has seen her for several days.

Famous Last Words

Phil Tilford, Bldg. 4-3, "I will have to check."

George App, Bldg. 4-3, "I'll have that fixed Saturday."

Byrl Miller, Bldg. 4-3, "I just work here."

Traffic Light Buttons

(Continued from Page 1)

the light will remain green north and south.

During the rush hours the light will be operated manually by members of the city police department or of our own Plant Protection Department. In connection with the use of the light, employees are asked to please use the yellow marked traffic lanes in crossing the street.

"They're In The Army Now"

Five employees of the Fort Wayne Works were included in the last group in this community inducted into service with Uncle Sam. Donald August, Bldg. 19-2 was absent when the above picture was taken. The other four men are left to right—Wm. L. Bierbaum, Bldg. 19-B; Richard K. Hoppingarner, Bldg. 26-1; Paul Rowan, Bldg. 26-B and Wm. C. Doell, Bldg. 4-2.

M.B.A. PATIENTS

General Purpose Motor: George Knott, Lutheran Hospital; Helen Hiser, Lutheran Hospital; Valentine Walzer, 303 Lexington Court; Pauline Poorman, 162 E. State, Mary Ogg, 223 E. Superior St.; Lloyd Oberholtzer, Harlan, Ind.; Millicent Farrell, 1328 Sinclair St.; Peggy Brandberry, 1428 Broadway; Harland Beaman, 826 Madison St.; George Aiken, Route No. 1, City; Sam Andorfer, Route No. 4, City; Byron Neumann, 326 E. Pontiac St.; Charles Schroeder, St. Joseph Hospital.

Transformer: Ellen Curley, Methodist Hospital; Eillen Fuelling, 2448 John St.; Maxine Leary, 125 E. Dewald St.; Bernice Scheuman, Hoagland, Ind.; Raymond Trumbauer, 1817 College St.; Ralph Campbell, 1616 E. Pontiac St.; Hazel Wise, 2422 Thompson Avenue.

Series and Specialty: Edward Snaman, New Haven, Ind.; Mildred Werling, 2919 Weisser Park; Ruth Reed, Zanesville, Ind.; Marjorie Green, Ossian, Ind.; Marie Griffin, 1311½ Scott Ave.; Annabelle Hose, 1209 Scott Ave.; William Wollman, 1113 Scott Ave.

Apparatus: George Reiz, St. Joseph Hospital; Floyd Hansel, 4310 Drury Lane; Wilmer Wiebke, 2520 Weisser Park Ave.; Ford Burnau, 2405 Brooklyn Ave.

Tool Dept.: Elmer Sauerwein, 4234 Beaver Ave.; Allison Van Wormer, Medical Center.

General Service: Charles Poe, Churubusco, Ind.

Left the hospital: Harry Ecenbarger; Virginia Myers.

Returned to work: Doris Anderberg, Mary Applegate, Florence Hindman, Marjorie Lee, Clarence Mentzer, Betty Sunday, Helen Walker, Estelline Ford, Harold Moore, Dorothy Bentz, Ross Hindman, Eldon Burns, Ruth Fredrick, Wayne Garton, Thomas Ryan, Kathryn Walter, Alice Lasher, Mary Layton, Wanda Highler, Hugh Johnson.

Slips And Chips

Sir Viss Bldg. 4-4

After two weeks vacation from writing this column, I learned that Clarence Shanebeck is a novice at sewing and dress making. At least he was seen putting the finishing stitches to Ethel Poorman's apron. And Orval Young is raising a soup strainer on his upper lip. We haven't figured out who he is trying to look like, but he will tell us one of these days . . . L. Uncle Louie Guissinger (Baby Snook's Uncle Louie) went fishing in the St. Joe river last Monday with his son. As usual, the big one got away. It broke the 18 lb. leader Uncle Louie had on his line. He said the river was muddy or he would have told us how long it was . . . John (Red) Rarrick was really surprised the other morning when he started to put on his shoes to find them half full of water. He claims the roof leaked, but I believe it was sabotage . . . Bob Till is now one of the gang. He was recently transferred from Bldg. 26-5 to us. We are glad to have you with us, Bob.

Andy Nichter, Bldg. 4-2, couldn't find the church he was invited to for a wedding. However, he did get to the house for the refreshments. The church he was to go to is just around the corner from his regular church.

WHERE ARE THEY?

The Works News desires very much to have the addresses of Fort Wayne Works employees now in the government service. Employees knowing the addresses of any of these men are asked to send them to the Works News editor, Bldg. 16-3.

Wilson Lindsey, Bldg. 26-2, will be able to apply for an undertaker's license soon. Last week he presided at the burial of two sparrows—both of them quite dead.

Sunbeams From 17-4

Humpty Dumpty had nothing on Dorothy Kintz, only it wasn't a wall she fell from, it was a poor tired horse who took her for Buck Benny.

Cookie, cookie, who has the cookies. Well, we all go for the large sugar ones that Dorothy Gardner so willingly supplies.

Was Harold Gillom's face red the other morning, when after losing almost an hour at the gate looking for his button, he at last found the darned thing, only that isn't what he said.

Questions and answers: by Frank Calkins, can one keep his pet dog in his rabbit pen? Ans. Definitely not.

A paper was passed for Aurelia Fortman, not because she was sick and not because she was married, but, of all things, for an alarm clock, now maybe she can get to work on time.

We did enjoy seeing Floyd Moreland, our genial photographer having himself a good time all by his lonesome on the "roller coaster" at Cincinnati last Sunday. He should, however, wear a hair net for safety's sake.

June Beaver and Don McCoy were married at Huntington June 14th. Mr. McCoy is an employee of the Bowser Co. The young people will be at home with the parents of the bridegroom near Churubusco.

Thought for the week: Hope inspires, work wins, success rewards.

—Granny

Elma Berber, Bldg. 26-2, decided to save on hose by wearing "bobbie" socks. However, when Elma saves, she really saves for when she came to work she was wearing just one sock—and that one a bright red. No wonder people kept looking.

Question of the week is, "Since when did Ruth Fuller, Bldg. 4-3, turn Hi-lander?

Bertha Gruber, Bldg. 26-2, certainly enjoyed the barren hills in Cincinnati. She thought they were tall buildings with fuzz on the tops.

From The
Feminine Viewpoint

By Irene Perry and Hilda Barthold

Guest Writer—Veora Habig

After a send off by Mr. Lord and Mr. Freeman, over 300 Elex girls and friends departed by train on the Elex excursion to Cincinnati, Ohio, early last Sunday morning. The train ride was full of fun and laughs, as all of you who have gone on former Elex excursions will recall. This trip was high-lighted by the dancing of Dottie Krick and Ceal Romary, who presided as Madam Lazonga. We wonder when Irene Meyers is going to take her sixth lesson? Dorothy Carrier and Marjorie Wyss were the song leaders accompanied by Golda Mentzer on her bazooka. We arrived in Cincinnati on schedule and walked through the mammoth Union Station. As yet, I have not determined whether all the exclamations were about the beautiful station or about the large delegation of sailors who greeted us. The bus tour gave us a very good view of some of the magnificent estates and homes and left us very much impressed by the irregularity of Cincinnati sky-line. The jolly, chattering group was awed and silenced by the splendor of the Netherland Plaza Hotel where we were served luncheon in the Pavilion Caprice. After partaking of delicious refreshments and exclaiming over the grandeur of the dining room the group aroused again to a care-free, chattering group having a good time. Evelyn Blakley says she enjoyed the luncheon very much with the exception of what the waiter did behind her back. We were transported by bus to the docks on the Ohio River where we boarded the Island Queen for a boat trip to Coney Island. A dance floor covered one entire deck of the boat, and here the jitterbugs reigned. We were able to get a good view of Cincinnati's skyline from the upper decks of the boat. When we arrived at Coney Island we were allowed to do as we pleased.

Irene Meyers proved that she enjoyed the roller-coaster by riding it twelve times. The girls seemed to be very lucky at the games of chance. Wilda Click was fortunate enough to win a stuffed Scotty dog. Ask Edith Mennewish why she was in such a hurry to get off the airplane swings. "Pappy" Moreland wasn't missing anything even though he did have to take pictures of everything and everybody.

After a busy afternoon we boarded the Island Queen for the return boat trip. The train was at the docks to meet us and after displaying their souvenirs and discussing their various experiences at Coney Island, one might think the group would settle down to rest, but not on an Elex excursion. A large majority of the group had a snake dance through the train to the baggage coach ahead where they proceeded to have a grand party which was the climax of the trip. The train stopped at Decatur to let the Gecode girls off and it was then that we realized that our day of fun was almost over. We arrived in Fort Wayne tired but happy. We who participated in this trip wish to express our thanks and appreciation to Irene Meyers, Eva Lynn, Vivian Hitchcock and the committees who made this trip so enjoyable. We are looking forward with anticipation to the next excursion.

NEWS THROUGH THE PLANTS

Motor Generator Static

Just in Fun—Among the presents, Mary (Lankenau) Hartman, Bldg. 19-3, received at the time of the wedding was an ironing outfit. Mary was so happy about the whole thing, she approached a group of boys in the planning section and offered to iron one shirt for each man. John (all time, make big joke) Rogers remarked, "Bob Archbald only has one shirt, can't you make it a handkerchief for him? Was Mary fussed? Was Bob red and was John happy?

Nize guy, we sez. . . .

Call of the Wild—"Pappy" Archbald, who dotes on cowboy songs and on occasion writes sparkling articles for the WORKS NEWS, (two of which are in this week's issue), was observed standing in a local 5 and 10 cent store, with a rapt expression on his beaming countenance, listening to a recording of western tunes. When the last note of the 47 records was played for him "Pappy" snapped out of his reverie and purchased a five cent package of phonograph needles. Authentic reports are that after wandering from store to store he finally broke down and purchased one record. Ever since Pappy fell on his head as a mere lad he has learned to play cowboy, which may account in part for the fact, that the wild and unbridled tempo of western music inspires the fire, fervor and literary perfection which dominates his writings—Phooie.

Accordian Pleats—Mary (Butch to you) Lauer, recently appeared before the public in a shiny coupe of the variety we are supposed to watch go by.

After three weeks, three fenders took an appearance of a seamstress' handiwork — beautiful pleats in each. Wonder what Dad said?

Remember—When Bob (I never forget) Barnes left home last Friday morning, the little wife handed him a collection of "Father's Day" greetings, with instructions to mail them that morning. Monday morning came along, "Father's Day" had passed and the greetings still reposed in one of Bob's pockets. Now, Bob has two worries, one, what will the little lady say when she finds the greetings were not mailed, and the other, will they be all right for next year? An elephant is very lucky, people claim they never forget.

Lightning Strikes Twice—When I was just a kid and something unpleasant happened, the folks would say, "don't worry, it won't happen again, lightning never strikes in the same place." But as I grew older and events tended to cause me to doubt, I saw a large elm in the neighborhood blasted twice by lightning. This proved to me, the saying was in error. Whether it be lightning or Ray Bowman, things do re-occur. Ray recently gained notice by leaving his car in the parking lot with engine running. Now he has "gone and done it again", same car, same lot, same engine. Whether he is forgetful, other matters occupied his mind or perhaps the engine is so quiet he can't hear it—nevertheless lightning did strike twice—Ray forgot again.

Ask Jeanny O'Connor, Bldg. 19-3, where she got her black knees. It might be from praying too much, but if you ask me, I think it is from falling off her chair. During working hours at that.

Franklyn MacInerney, Bldg. 9-3, seems to have turned domestic all of a sudden. It seems that he was seen moving a small file cabinet to the top of a large one. That is not so odd, but the thing is there is a new girl whose desk was directly behind the cabinet. Now Mac can see good and doesn't have to look around the corner.

Winter Street News

Friday, the Thirteenth, carried no jinx for Carl Speckman, Tool Room, who was all smiles in the alleged ill-fated day. The reason? He received news of his first grand-child and it was a boy at that. Congratulations grandpa.

Laverne Madden must have been bored with her company the other night for she kept squeezing her lipstick through the evening and made such a mess of it she had to buy a new one.

It seems that Robert Herber always carries an extra gasoline can for emergency, but always forgets to put gasoline in it. Bob also accused the boys of taking his lunch one day and then discovered later that he had neglected to bring it to work with him. That's what you call a poor memory or perhaps he has too many other things on his mind.

Thanks for information to Jack Wolf, Bob Herber's confidential secretary. If anyone would like further details on Bob's pranks call Jack.

Barbara Curtis is who she is or wants to be when she answers the telephone. A call came in the office Friday for Barbara, and Barbara answering the phone announced "Just a moment I'll see if she is here."

Clyde Coffield found another unique service for a G-E sweeper. He was faced with the unpleasant task of removing some wall paper and upon thinking seriously of how to get it off without working he hit upon the idea of filling up the spray can which comes with each sweeper and spraying the paper with it. He claims the paper peeled off like a banana skin. This should sell a few extra sweepers.

19-4 Spot Jottings

What Harry Haberkorn thought were safety matches proved to be those little sticks used by the ladies to stop runners in their stockings. No use Harry, they simply won't light your pipe. . . . We suggest the next time Clair Geigher wears a new suit he removes the price tags. And on his vacation in a strange city too. My, my. . . . Mr. and Mrs. Castor were seen perched high in the bleachers last Sunday at the municipal beach taking in a softball game, and trying to make Fred's coat keep both of them warm. Well, how could the missus know it was going to turn cold. . . . Those of you who missed seeing Herb Braun wearing a cute little yellow ribbon in his long curly locks missed a real treat. Herb decided to get a haircut over the week-end. . . . Delores Smith's complexion matched her hair after relaying a message from Herb to Ray.

Hugh Neely, Bldg. 19-5, on coming to Fort Wayne from the sunny south was rather lonesome one evening, so he proceeded to see if he had any relatives listed in the phone book. He called the only one, and the gentleman had the real southern accent. After talking for a spell, the gentleman asked "Say are you colored?" Finis Hugh.

Betty Hawk and Ruth Lahman of Bldg. 26-2 and Irene Meyers were sure taken for a ride at Cincinnati. They spent almost their entire allowance on the "roller coaster".

Borings From 4-4 Office

Now is the time for all good men to dig up the dirt and start spreading. That's to say if it is worth spreading. Believe it or not, but at last I am back from my vacation and am all rested up. The Swedes are all right, take it from me who knows. The new Hut-Sut song is very true with my gal and me. We spent many an hour on the Mississippi in smelly old St. Paul. It was wonderful and I'm going back Xmas to get some good cheese made by the Swedes. . . . For the past two weeks yours truly hasn't caught any one—So here goes, now, be prepared. . . . Pauline Young and her high cost of loving spent a week end in New York recently. Ask her about details of the train rides—it's good. . . . Clayton Culver has opened his summer cottage at the lake. I should say five rooms and a path. We should have a house warming soon. . . . Don Niles is back to work after a siege with the measles. I always thought that it was a kids disease, or is it that Don is in his second childhood? . . . Bob Spitler was caught unaware the other noon when he was tossed off his feet by Virginia Plummer and was caught by Charlene Snyder. For further information, see Emmy Stock. . . . Mike Brayer was caught the other day in the position to pick up a snipe and some one stepped on his finger. So now he has it all bandaged up. He says he has been eating at a boarding house, and Bill Skevington said he got hurt making screens for him. What to believe? That is the question. . . . Walter Holloway was bragging the other day that his son has put on 50,000 miles on his new Buick (no commercials intended). Me thinks Walter should tell sonny boy to get his own car. . . . Mel Warner played hooky last week, but he did go to the doctors. . . . Marge Brown and Virginia Sanders visited friends in Chicago a week ago. They think Chi is certainly a windy city. They both like to shop in Marshall Fields. . . . Doris Roe celebrated her first wedding anniversary at the Stevens Hotel in Chicago. Congratulations Doris and many more. . . . Well 'tis plenty for now, I remain, Sincerely as ever,

Elmer, the Field Mouse,
(The Rat to You.)

FIRST AID PARTY

The members of the first aid classes in the Refrigeration Division gave vent to their longing for a party at the cottage of W. Michelfelders Tri-Lake cottage last Friday evening. After looking over the gathering the first aiders decided to make a patient out of "Pee-wee" Easterday. Evidently they wanted someone they could handle and they certainly fixed him up. An entertaining program was concluded with a motion picture presentation. Those present were Mr. and Mrs. Jacquay, Mr. and Mrs. Easterday, Mr. and Mrs. H. Chism, Mr. and Mrs. Ed Kiester, Joe Zikgraf, Loring Gottschall, Ben Lake, Dale Thompson, Barbara Curtis, Millie Atherton, Dorothy Crawford, Edna Koester, Gladys Smith and Mr. and Mrs. Michelfelder. Mr. Chism, instructor in first aid, was presented a gift.

Sympathy

Sympathy is extended to Martha Scherzinger, Bldg. 19-5 in the death of her mother and to Helen Clendenin, Bldg. 19-5 in the death of her grandfather.

Plastic Flashes

The Tillies are rather short on news this week. Everyone seems to be behaving themselves lately.

Dan Hughes' Ohio cousin was seen in Fort Wayne. Our town certainly does hold an attraction for her.

We are going to miss Duane Duff, Bldg. 12-3, third shift, who is going to be one of Uncle Sam's boys for a year. Joe Haller, Bldg. 12-3, follows him shortly.

North Clinton Street is all atwitter cause they have a new resident—Grace Funk.

Since this cold wave, Jim Fleming, Bldg. 12-1, our fashion expert, has discarded his inner-outer (mostly outer) shirt in favor of a Lana Turner sweater.

Betty Perry, Bldg. 12-1, is singing the blues because her Jimmy left for the south for two weeks.

The Tillies are green with envy at Lillian Hatfield. Where did she get that "gorjuss" turban?

We are sorry to hear of Helen Houser's serious illness and operation. Hope you will be back with us soon, Helen.

Bill Schwartz, Bldg. 12-1, has certainly become a ray of sunshine since he got his two new teeth. They're lovely, Bill. But why didn't you get gold? They would shine so much "purtier."

Anyone wishing to meet a real opponent in a game of tennis should see Bob Davis, Bldg. 12-3. We understand he's a whizz.

What was the explanation Ray Snyder, Bldg. 12-1, gave his wife when he arrived home smelling like petunias? Personally, we think lilacs are more fragrant.

Delores Wiesie, Bldg. 12-3, is going to take the "fatal" step Saturday, June 21. Good luck, Delores.

Clarence Favourite, Bldg. 12-1, should keep a closer watch on his socks when he hangs them by the ovens to dry. The heavy rains last week gave Clarence a nicely drowned pair of feet. Although he decorated the ovens with his socks and hoped that they would dry quickly, at each visit to see if they were wearable, his feet warmers seemed to get wetter. Clarence, do you suppose the roof leaks?

Thisa And Thata 19-5

We have another member of the "Forgotten Badge Club". Gretchen Webb forgot her button and when she arrived home found the doors locked, forcing her to use a ladder to crawl through a window. Who wants to bet it will never happen again. . . . Hazel Heron is enjoying a vacation this week. . . . We're going to take up a collection to buy an ear trumpet for Bill Wickliffe. He can't hear the wistle when it blows. Remember Bill one whistle blows five minutes before the other one. . . . Ruth Harsch and husband gave Chicago a treat last Sunday. . . . Sarah Chelf parted with an old friend the other day. It was her pet tooth.

COMMERCIAL STAG

The annual Commercial Department stag party will be held next Saturday, June 21 at the cottage of H. E. Stephens, Big Cedar Lake. As in previous years the days activities will be dedicated to having a good time with golfing, swimming, fishing and card games as the center of attraction.

Hermetic Office 17-2

"Wrong Way Gamec" didn't show up Monday. Do you suppose he came home from Michigan by the way of Indianapolis again and couldn't make it in time. . . . Have you heard about Bob Wefel burning the midnight oil designing a stove for the G. E. that is "lightning proof". He isn't taking any chances of going without his supper again. . . . Lisle Hodell has had an eventful week. First he was sure he lost his pet cuff buttons in Fort Wayne, but he found them in Hanover, Indiana, and the very insignificant piece of glass he found and carried in his pocket (thought it would amuse the children) proved to be the missing diamond out of an engagement ring; but he capped the climax when he hung his desk barometer out of the window to see if it would register "rain" outside as well as in, forgot about it and went away, but returned to find the barometer, his desk pad and his desk wet—with rain! . . . There must be more than we realized to saving pennies because after depositing a bushel of them at the bank, Walt Sommers', Bldg. 19-5, engagement was announced. . . . Jack Clarkson complains that because of shortages in various material the Engineering Department is becoming known as the "Substitution" Department. . . . Who could have George Hahn been talking to that shocked him so he fell out of his chair, landed on the floor, amid loud crashes of breaking furniture, still holding the telephone and carrying on a conversation.

Note to Luella Franke: To get the outside line dial 9 not 0. We give you this information in hopes of saving your shoe leather and the wear and tear on the office phones.

Suzy Sleuth.

Here 'Tis From 17-1

Believe it or not but in our department we have a;—Prince who lives up to his name. Mosshammer who has none in his tool crib. Fisher, who doesn't know how to fish. Frenchy who never saw France. Doctor who never had a patient. Angel without wings. Bear who's always dressed. Newman who's been here for years. Kessler who doesn't make whiskey. Two Henrys who have no chickens. Hoover who has never been in the White House. Eastman, who came from the west. Bernie who lets fire alone. Gitter who could if he wanted to. Junk who's work is just the opposite. Gale but never windy. Riley who often gets rylie. Lahman who does lots of walking. Smith who doesn't like cough drops. Hickman who does not live on a farm. Tickle who does a little bit. Lawyer who never defended a client. Silk who is pretty smooth. Grayless who never worries. Combes whose hair is always neat. Deck who has some cards up his sleeve. And—more next week.

Patricia Burgoon of the Specialty Motor Drafting is mighty proud these days, and with good reason. Her brother has just been awarded the Griffin scholarship at Yale.

Urchins and a tree full of green apples usually spell bad news for somebody. Now Glen "master mind" Stapleton knows what the expression "apple of my eye" means because that is how he stopped a flying apple.

Maurine Luedeke, blond angel of Bldg. 8 will change her name on June 28. The best of wishes to you, Maurine from all of us, including the swarm of secret admirers.

NEWS THROUGH THE PLANTS

(Continued from Page 7)

Hermetic Motors 17-2 And 17-4

Dear Girl Upstairs,

Now that you've seen Lums' hair-cut you know why I couldn't see anything else last week. He certainly got his money's worth, didn't he?

Dorothy Hanselman has herself quite a time with all the whistles that blow in Bldg. 17-2 between seven and eight o'clock. She's taking her title, "The Second Flying Dutchman" seriously. Speaking of whistles, Roy Blessing had better start giving us the "high sign" again.

I hear there was quite a discussion a few weeks ago as to which Drewett was which Drewett. As long as Vera, or was it Madelyn, had a bandage on her leg it was comparatively easy to distinguish Vera from Madelyn—if you knew who had the bandage! I'm sure Vera was the one. (Or was it Madelyn?)

Marceil Martin is back at work again, after her accident. We're glad to see you, Marceil.

S'long now,
The Hermit.

Dear Hermit,

June is certainly the month for brides. Irene Miller said "I do" to Kenneth Miller, Saturday. I wish her happiness and the best.

I discovered a secret the other day! When Charlie Abbott, (Nick to you) goes home after a hard days work, does he stretch out in an easy chair, yawn and read his newspaper—he does not! He puts on his old straw hat, grabs a hoe and heads for his miniature garden (he's really a farmer at heart) and when I say miniature, I mean that he seems to grow things on a small scale. For instance, he brought a couple of his prize turnips to work. They were of the small red variety, the kind most people call "radishes". Well, you learn something new every day.

Since last week's WORKS NEWS came out, Bldg. 17-4 has been boasting of its two celebrities, Vera and Madelyn. They are seriously considering posing for a Pepsodent ad. However, I wonder who it was that broke off her heel on the steps last Friday night (tut-tut, Vera, after all that safety advice, too.)

Edith Venrick was busy planning a gay week end. She went to Cincinnati with the Elex Girls and had a grand time.

Irene Meyer tells us that those red strings on Duffys' apron means that he has always had a yen to be a fireman, and that he is saving money to buy a big red tin hat. I bet he'd look elegant on the end of a bucket brigade.

Frank says he likes turnips better every day (especially the kind Nick grows) so I wouldn't be a bit surprised to see him in overalls some of these days.

Girl Upstairs.

It seems as though Wanda Penpul, Bldg. 4-3, has gone back to her school days of writing notes. Wonder who the fair gentleman could be. John Trim seems to be the messenger boy.

Kenny Betts, Bldg. 4-3, has taken leave of us to accept a job in another department. We all have enjoyed his association while with us, and regret his leaving. All of us wish to take this opportunity to wish him the best of luck in his new field.

We hear that horses are being trained for the U. S. army, but there's one famous horse that will be deferred from the draft. "The old gray mare" belonging to Byrl Miller, Bldg. 4-3, "She ain't what she used to be" as Byrl sings.

6-4 Magneto Mumblings

"Great Oaks from Little Acorns Grow"—This well-worn phrase can very well be applied to the steady progress of the Magneto Department. It was not so many months ago that yours truly, fresh from Business College and full of ambition for a successful business career, first entered the portals of the then newly organized Magneto Department. Surprising indeed, it was to find that instead of a mentally pictured office of typewriters humming, men talking, telephones clanging, etc., it was a room consisting of two desks, a table, a filing cabinet, and an empty stationery cabinet. One of the desks was mine, and it contained a beautiful new electromatic typewriter. Upon first sight, my fingers itched to touch it, so it was not long until I was using it as if I had possessed it for a lifetime. Everything was exciting because it was new and different. There were files to be set up, a stationery cabinet to be filled, besides all of the other numerous tasks which a stenographer is required to do. And then, after a few weeks, the personnel of the Magneto Department began to increase, and the office began to acquire the atmosphere of my first mental picture of an office. It was a thrilling day, several months later, when the Magneto Department moved from its now crowded office room, to a large newly decorated factory office. Following this exciting event, machines were being delivered on the factory floor, and people were being hired to operate them. A new sound was now added in accompaniment with the clang of the telephones and the hum of typewriters and other office machines—the roar of factory machines. Today, we find the Magneto Department an efficient, well developed organization, which has made great progress in a comparatively short time, and is steadfastly growing. So we say, "Full Speed Ahead", Magnetoites!

Mr. and Mrs. Claude Kelly entertained last Saturday evening at their home east of the city in honor of their wedding anniversary and also Herbert Jesse's birthday. Hot dogs with all the trimmings were served, also a large kettle of steaming hot fried chicken, the surprise of the menu by Mrs. Kelly. After Miss Kruge had eaten most of the chicken, Kelly and Al Buchheit challenged Ralph Menniwisch and Floyd Platt to horseshoe, two best out of three. Each had won a game and the score of the third was 18 all. Platt, having the first pitch, threw a ringer, the first one of the evening. Kelly, using all his science and luck, failed, as usual, in the pinch. The party then retired to the living room where a splendid entertainment of music was enjoyed, given by Messrs Kelly and Menniwisch, piano and banjo respectively. The party broke up at a late hour, all wish the Kelly's and Mr. Jesse many happy returns of the day. Those present were: Mr. and Mrs. Harry Kruge, Herbert Jesse and family, Mr. and Mrs. Kenneth Redding and family, Albert Buchheit, Mr. and Mrs. Lloyd Platt and daughter Barbara Ann, Vera Kruge, and the host and hostess, Mr. and Mrs. Claude Kelly.

Henry Bubb, Bldg. 4-3, was seen washing down his front porch last Saturday morning. Now some of the boys are worried and wish that he had not done this. They are afraid that this might put the same idea in their wives' heads. They suggest that Henry do these kind of jobs under cover of darkness.

News On The Nose 4-5

Oh happy day when the tables were turned on Andy "Red" Lee. He was purty surprised to reach down into his coat pockets and find them down nearer the region of his knees, while his sleeves flapped some six inches below his hands. His only retort to the owner, Darrel Franklin, was, "Say, did I split the shoulders when I flexed my muscles? . . . Ed Glusenkamp, Bldg. 4-5, was recently presented with a rather decrepit old gate labeled, "The Doorway to Opportunity." We only hope that his ladder to success will not be as rickety . . . Sailor Davis is back wearing his gum-boots again. Must be he's ready any time to catch some of those big fish he hasn't snagged yet this season—Or else it's getting too deep for him out in the commutator section . . . And Helen Papenbrock, Bldg. 4-5 office, was very seriously asking Irv Koehlinger if potatoes didn't take seed from the blossoms as they fell to earth . . . And were the young blades much disappointed to find out that Harriet Storm, blonde lovely who recently came to Bldg. 4-5, is engaged to the young man who has recently stopped to pick her up and bring her to work each day. But alas, he goes back to college in a week, unhappy day . . . Did you know that Vern Robinson used to play cupid in the army? It was his job to take care of transportation and checking in and out the young ladies who came to dance with the soldier boys at camp. We'll wager he enjoyed the job immensely, playing guardian to a bevy of young beauties . . . We've discovered why so many people keep the telephone busy at the Bldg. 4-5 blue print desk. It's because they like to hear that sweet Southern drawl belonging to Lena Maxfield, newly acquired lassie from Texas. Or maybe it's that voice with a sigh in it belonging to Betty Williams who answers the same phone. Maybe you wouldn't sigh if the B. F. were way down in Bloomington for twelve weeks of summer school . . . Ask Jessie Filler how she drives to the Indiana Hotel when her husband has the car out for an afternoon of golf, and we don't mean a bicycle. . . . Mary Blair, Bldg. 4-5 winding section, should be a proud little gal. Her very ardent admirer drives sixty miles 3 and 4 time a week in order to see her. We'd call that devotion . . . We promised not to mention his name in this column for a month, so we'll just tell this story about Bachelor J. McG without mentioning any names. As he and Bob Merrill were crossing the parking lot, Bob stepped over a foot-high cable. You-know-who decided to jump it and landed in a spread wing position, biting the cinders. . . . Now that's all for this week, people, and remember that he who threatens violence to Snoopin' Sal is asking for a reprint, not a retraction.

We wish to liken Harry Mumma, Bldg. 4-3, to the man who sits on a limb of a tree then saws between himself and the trunk. It seems that Harry is building a garage on his place and his father is helping him. Harry was tearing around like a mad Russian and pounding nails like an expert lather, not paying a whole lot of attention as to where he was pounding said nails. It was at this point that he decided he wanted the ladder at the other end of the garage and asked his father to bring it to him. The elderly gentleman could not budge it for Harry had nailed it securely to the opposite end of the garage.

Attention—Is there a Physical Geography teacher or a good student on Bldg. 4-3? We are wondering what Mary Guilliff meant by "Magnetic pull."

Kuhners Win Game From G-E Club In One Sided Score

By Paul Schwehn, Bldg. 4-3

Joe Bolenbaucher's diamond men were nipped in the bud by the Kuhner meat men Tuesday night at Memorial park by a count of six to nothing.

The razzle-dazzle ball handling of the Packers kept the tallying of the weak G-E team to a minimum.

Without too much life from the infield, and with faulty outfielding the G-E pitcher didn't stand a chance.

Numerous times the General boys were in scoring position, but they lacked that final punch for the runners on second and third.

It wasn't until the first of the third that the Meaters gathered in the first tally. The quick action of center fielder Huth, put a stop to this possible rally in the third.

The slaughtering of the Meat-Packers came in the seventh when they garnered five runs, two of them being homers.

The leading of the lambs to slaughter would have been a wholesale massacre had it not been for the quick action of the third baseman. With the count two to three, and the bases loaded a wild pitch by Nahrwald finally found seclusion at third base—Stellhorn shot the ball to first and caught Nelson napping, retiring the side and saving a possible run-away.

Although the G-E boys kept plugging to the final inning, their weak batting average and the helter-skelter all-over-the-field playing of the Kuhner softballers was just a mite too much.

The loss Tuesday night leaves the Joe-men finishing the first half of the Main Auto Major League with a count of three wins and five defeats, with a possible chance of second place.

IN THE ROUGH

By WALTER SUNIER

Funny weather if you ask us. Funny even if you don't ask us. Under Motor Generator Static it is stated that Jerry Frye remarks, Sunier or later we all get in the rough." With the present weather, Sunier or later we will all get wet. We knew if we waited long enough one of the league groups would be rained out. The Wednesday Group was rained out last week.

Bob Worth, Bldg. 4-6, after laying off the game for several years, is refurbishing his clubs and polishing up his cussing to again take up the gentle art of slogging a golf ball.

A. L. Johnson, Bldg. 4-6 has also taken up again the proposition of being nurse maid to a golf ball and has been very successful. The first game in the League he had a 65 and in the second game a 48. This is a decrease of 17 strokes. At that rate he will have a 31 the next time.

At the Orchard Ridge Stag last Saturday, everyone had to drive from the first tee with an extra big driver and all the cups except one were placed in gosh-awful places on greens. It was common to putt off slopes close to the edge of the green several times on each hole. No. 14 was the worst. One golfer had 22 putts there.

In the Monday Evening Group, the Turf Toppers defeated the Plastics, 187 to 200; the Divot Diggers defeated the Slapsticks, score unknown; and the Rough Riders defeated the Ice Cubes, 168 to 186. The low score was Brice Hamilton's 37. The Turf Toppers hold first place and the Divot Diggers second place.

In the Tuesday Evening Group, Bldg. 3-4 defeated the All Stars, 173 to 189; the Optimists defeated the Dubs, 187 to 205, and the Billy Goats defeated Bldg. 4-4, 194 to 200. The low score was Elder's 39. There is a three-way tie for first place in this group between Bldg. 4-3, the Billy Goats and the Optimists.

The Wednesday Evening Group was rained out.

Rod-Gun Club To Compete At F.O.P.

The Rod and Gun Club will shoot pistol matches next Sunday morning, June 22, on the Fraternal Order of Police range. It is desired to have a good number of shooters as the matches are open to all club members, and a 22 calibre and center fire team will be entered.

Rifle shooting will continue as usual at the Rod and Gun Club range on Sunday morning and Thursday evenings with second shift men shooting on Thursday mornings.

Work is progressing on the shelter house at the Club range and a formal opening will be held in the near future.

YOUR SAFETY DEPENDS on HOW CAREFUL YOU ARE not how LUCKY!

Volume 24 FORT WAYNE, INDIANA, FRIDAY, JUNE 27, 1941 Number 71

Increased M. B. A. Benefits Favored

"Welcome Into The Quarter Century Club, Son"

A uniquie distinction was afforded Clarence A. Brenner, superintendent of the Tool Division, when he was welcomed into the ranks of the Quarter Century Club by his father Charles F. Brenner, a member of the Club for many years. Mr. Brenner, Sr., retired in 1937 after a service record of 41 years.

All Sections Vote In Favor Of Amendments

Changes to By-Laws And Constitution to Be Effective on June 30

With all sections reporting acceptance of the proposed changes in the constitution and by-laws of the Mutual Benefit Association of the Fort Wayne Works to give increased benefits to the membership, the new regulations will go into effect on June 30 it is announced. With practically every eligible employee a mem of the association the changes are of widespread interest.

Primarily the changes were proposed to increase the hospital benefits and by increasing the dues five cents a week not only could this be made possible but it also provided for additional benefits for sickness and accidents in all classes.

A resume of the proposed changes adopted is as follows:

(Continued on Page 2)

WHERE ARE THEY?

The Works News desires very much to have the addresses of Fort Wayne Works employees now in the government service. Employees knowing the addresses of any of these men are asked to send them to the Works News editor, Bldg. 16-3.

Two Join Rank Of Company's Fifty Year Men

Vice-President W. R. Burrows and F. P. Wilson, Contract Service Manager, Are Honored

William R. Burrows, vice-president in charge of manufacturing and Frederick P. Wilson, manager of the Contract Service department were awarded diamond-studded pins Monday marking their completion of 50 years of service with the Company. R. C. Muir, vice-president in charge of engineers made the presentation. At the same time 150 Schenectady works employees became members of the Quarter Century club and were given club pins by J. M. Howell, Schenectady Works manager.

Mr. Wilson is a native of Albany, N. Y. He entered the employ of Edison General Electric on June 1, 1891, as a student on the Test Course. In 1892 he was transferred to the Thomas A. Edison organization, and was employed for approx-

(Continued on Page 4)

United Effort For Better Safety Record Necessary

An appeal to every employee for a sincere and energetic effort to help cut down the lost time accident toll is issued simultaneously with the announcement that the number of lost time accidents for May at the Fort Wayne Works were the greatest for any one month since September, 1930. A total of sixteen accidents occurred during the month, six of them resulting in injuries to the feet. It is pointed out that so fa rthis year, thirty-six per cent of our lost time accidents have involved foot injuries and that a little caution plus the wearing of safety shoes would have prevented nearly all of them.

Safety Record

Bright spots in the safety report include the announcement of F. C. Graffe, committeeman from the General Purpose Fr. H. P. Motor Division, to the effect that employees of Bldg. 4-1 and Bldg. 4-5 have completed approximately one million and a half man hours without a lost time accident. Two other departments have had no lost time accidents during the first five

Nominations Made For G-E Club

George Waldschmidt And Joe Fagan Presidential Candidates—Election To Be Held August 4 and 5

George Waldschmidt, Bldg. 18-2, present president, and Joe Fagan, Bldg. 18-5, were nominated for the office of president of the G-E Club at a meeting of the nomination committee held this week. The announcement is made by Wm. Doehrman, chairman of the committee.

Candidates for the other club offices are announced as follows: First Vice-president—Joe Henry, Bldg. 22 and K. W. McOmber, Bldg. 18-1. Second Vice-President—Helen Bleke, Winter Street and Loretta Bloom, Bldg. 26-2. Secretary—Jerry Duryee, Bldg. 4-6 and Harold Carter, Bldg. 4-6. Director—L. Wallace, Bldg. 19-3 and Gaile Griffith, Winter Street.

NOTICE

The Bldg. 2-1 Dispensary will operate with full facilities tomorrow, Saturday, June 28.

Vice-President W. R. Burrows Honored At Meeting

W. R. Burrows, vice-president in charge of manufacturing, is shown receiving a fifty year certificate from R. C. Muir, vice-president in charge of engineering. He also received a diamond studded pin. The presentation was made Monday in Schenectady before a large group of employees.

• Lines Of Defense

What do military men mean when they speak of "lines of defense"?

The first line may be an ocean, a channel, a barrier of mountains. Sometimes it's an allied country; sometimes a distant naval or air base.

Behind this far-flung line is a second—our coast and frontier fortifications, harbors, landing fields. These two defense lines are the job of the State department and the Army and the Navy.

But there is a third line, too. That one is our line, the civilian's line. We call it the home front line. It is not made of concrete, or steel, or engines of war. But it is the most vital of all, because, without it, the first and second lines could not exist.

In this war, it is the home front which is first attacked. What it this third line of ours made of? It is many things—national spirit, the will to sacrifice and work and fight. It is unconquerable hopes and convictions and courage.

You can get some of these for a little while by propaganda and machine guns. But you get all of them by the things that endure and make nations strong—by social and economic progress, by good food, adequate homes, and above all, by active participation of everyone in democracy.

We are busy building our first and second lines of defense. We must build them better by building our home front at the same time. In offices, workshops, schools and field, all of us can forge a bright new weapon of democracy made of the same tough steel we use to make our first-line weapons of defense.

We have the power to make a permanent third line of defense that will strengthen the first line of ships and tanks and guns . . . that will outlast them. Our home front fight is not somewhere else . . . it is here!

We can defend ourselves better by having something better to defend.—BLOOMFIELD WORKS NEWS.

• Help Sell Safety

What the more experienced employees of a company do and how they do it largely determines the attitude of most men starting on a new job.

That's why it's twice as important for each of us to do his or her work safely. It demonstrates that we earnestly want to prevent accidents and sells the newcomer on safety in a practical way!

"He who is false to present duty breaks a thread in the loom, and will find the flaw when he may have forgotten the cause."—*Henry Ward Beecher.*

Employees Store Notice

A limited quantity of two conductor rubber covered electric cord is being offered employees at an attractive price. The cord may be secured through the Employees Store.

The Employees Store will be closed for inventory on Monday, June 30. Regular store hours of from 10:00 a. m. to 4:00 p. m. will be resumed on Tuesday, July 1.

QUIET PLEASE

Employees leaving work late at night or during the early morning hours, and using automobiles or motorcycles are asked to make every effort to avoid unnecessary noise. Complaints have been received from residents in the neighborhood of the Works that their sleep has been disturbed through employees riding motorcycles with mufflers open or the racing of automobile motors.

M. B. A. Benefits

(Continued from Page 1)

Assessments:

The maximum General Fund is increased to an equivalent of $8.00 per member instead of $7.00 at which time assessments shall cease until the General Fund has been reduced to $5 per member.

This change will strengthen the solvency of the organization.

Duties of Special Committees:

The special committee meeting will be at the call of the General Chairman as conditions require.

Membership

The weekly dues of each of the three classes are increased by 5c per week to 20c, 30c and 40c respectively to increase the weekly sick and accident benefits by $1.50 per week to $7.50, $13.50 and $19.50 per week and to increase the weekly hospital benefits by $3.50 per week for all three classes.

The limits (average weekly earnings) for class 2 and class 3 memberships are raised by $3.00 per week to $18 and $26.

Hospital Benefits

The changes increase the daily hospital benefits from $3.50 to $4.00.

Approved Hospitals

The Medical Center hospital of Fort Wayne is adopted as an addition to the approved hospitals.

Have you visited the Employees' Store recently? You will be interested in the many offerings. Store hours 10:00 A.M. to 4:00 P.M. Monday through Fridays.

NOTICE

United States Defense Savings Bonds and Defense Postal Savings Stamps may be purchased for cash at any time at the Payroll department.

Safety Record

(Continued from Page 1)

months of 1941. They are Bldg. 4-4 and the Wire-Insulation Division.

New Employees

It is felt that creditable showing is being made by new employees in safety practices since that but 28.6 percent of the lost time accidents during the first quarter of the year affected new employees. A report covering all Works of the Company sets the percent of accidents to new employees at 46.6 during the period. Lower standings than that of the Fort Wayne Works among the major apparatus works were achieved only by Philadelphia and West Lynn.

Standing of the various divisions in both frequency and severity at the close of fifth month of 1941 are as follows:

	Freq.	Sev.
Wire-Insul.	0.0	0.0
Miscellaneous	1.00	.03

DEFENSE . . . Our Key To Freedom ! ! !

FROM THE FROZEN WASTES OF ANTARCTICA

These selected official photographs tell a quick story of the U. S. Antarctic Expedition. General Electric received the Peabody award for its fortnightly mail bag to members of the expedition. This award is given annually to the organization doing the most outstanding work in the radio field. The Company maintained shortwave radio contact, through its station WGEO at Schenectady, with the expedition during the nearly 18 months it was in operation. Every two weeks letters were read from families and friends of the expedition members.

Sizing Up the Defense Savings Bonds

FOR DEFENSE
BUY
UNITED STATES SAVINGS BONDS
ON SALE UNDER G-E DEFENSE SAVINGS PLAN

MUCH DEPENDS upon the success of the Defense Savings Bonds. Unless we purchase them liberally the Government has only two alternatives in raising money for the Rearmament Program. It can levy much higher taxes, or it can resort to borrowing from the banks. The effect of higher taxes is obvious—the effect of bank borrowing not so obvious. But of these two alternatives, bank borrowing is the more dangerous. It can lead to inflation—greatly increasing the cost of everything we buy.

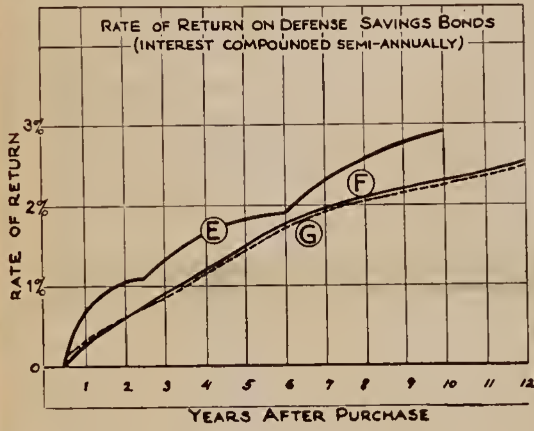
Thus, in the present emergency, buying Defense Savings Bonds is not only patriotic, it is good sense. It's a case of either loaning our money voluntarily or paying it out for higher taxes and higher living costs. And when that inevitable "rainy day" comes, the Defense Savings Bonds we've laid away will help to see us through.

FOR DEFENSE
BUY
UNITED STATES SAVINGS BONDS
ON SALE UNDER G-E DEFENSE SAVINGS PLAN

THE SERIES E BONDS appear to be the best investment for most of us, as shown by the outline below.

Rate of Interest

The rate of interest depends on how long you keep the bonds. The longer you hold the bonds before cashing them in, the higher the rate of interest they'll earn. If held to maturity, Series E bonds yield 2.9%, as compared to 2.53% for Series F, and 2.5% for Series G.



Life

Series E bonds mature in 10 years; the other two series mature in 12 years.

Nonredeemable Period

Series E bonds may be redeemed at any time after 60 days from date of issue. The other series cannot be redeemed until six months after issue date.

Method of Redemption

After the nonredeemable period has elapsed, Series E bonds may be cashed on demand. The other two series require one month's written notice for redemption.

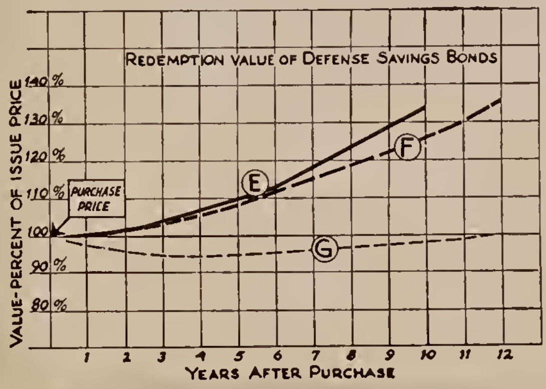
Denominations Available

Small amounts can be invested in Series E bonds.

Series E					
Maturity Value	$25.00	$50.00	$ 100	$ 500	$1000
Issue Price	$18.75	$37.50	$ 75	$ 375	$ 750
Series F					
Maturity Value	$100	$500	$1000	$5000	$10,000
Issue Price	$ 74	$370	$740	$3700	$7400
Series G					
Maturity Value	$100	$500	$1000	$5000	$10,000
Issue Price	$100	$500	$1000	$5000	$10,000

Redemption Value

Because the interest on both Series E and Series F bonds is left to accumulate and is not withdrawn, these bonds increase in value during their life. Series G bonds can be redeemed before maturity only at a discount (see chart below).



Limitation on Yearly Purchases

Each owner may purchase up to $5000 (maturity value) of Series E bonds in any one calendar year. Annual purchases of bonds in the F and G Series are limited to a total of $50,000 (cost price) for both combined.

Registration

Series E bonds must be registered in the name of either

(1) one individual

(2) two individuals as co-owners

(3) one individual and a beneficiary

Series F and G bonds may also be registered in the name of an association, partnership, trustee, or corporation (banks accepting demand deposits are excluded).

Interest Payments

Of the three series, G is the only one that provides current interest payments. These semi-annual payments are at the rate of 2½% per annum. The interest on Series E and F bonds is left to accumulate, thus the value of these bonds increases periodically.

ALL DEFENSE BONDS ARE REGISTERED

ALL Defense Savings Bonds are registered in the name of the owner, or owners, giving protection against loss or theft. They are also nontransferable, which prevents their being used as security for a bank loan. They may, however, be redeemed in part. Thus the owner of a $100 Series E bond could, at any time after the initial 60-day period, exchange it for one or more $25 bonds and receive cash for the redemption value of the portion redeemed.

DEFENSE BONDS ARE NOT TAX-EXEMPT

The Defense Bonds are not exempt from Federal Income Tax. Owners of Series G bonds must report the interest they receive as income each year in their income tax statements. When owners of Series E and Series F bonds cash them, either at maturity or before, they receive more for their bonds than they paid for them. The difference between the cost of the bond and the amount they receive for it must be reported as "income" for the year in which the bonds are cashed.

INTEREST RATES ARE LIBERAL

Compared with the other Government bonds on the market today, the Defense Savings Bonds yield a more liberal rate of interest. There are three other non-tax-exempt Treasury bonds on the market. The Treasury 2% 1950-48 bonds are currently selling to yield 1.54% to call date, the Treasury 2½% 1954-52 bonds are selling at a price which will yield a 2.03% return to call date, and the Treasury 2½% 1958-56 bonds yield 2.22% to call date, at current prices. In addition, the Defense Savings Bonds do not fluctuate in value as do other securities listed on the stock exchange.

BONDS MAY BE EXCHANGED

Some employees who have authorized purchase of Series F bonds on the installment plan have asked how they may switch to Series E. This can be done if new application is filed at once at your Payroll Department.

Announcements Made Of Foremanship Promotions

Forest Z. Bunner

Fred L. Pyle

Edwin G. Johnson

H. W. Fruechtenicht

Virgil Asher

Five employees were appointed to foremanships during the past week. R. C. Dennison, superintendent of the Magneto Division announces the appointment of Virgil Asher to foreman of the first shift and H. Siebold section superintendent in the General Purpose Fr. H. P. Motor Division announces the appointment of H. W. Fruechtenicht as foreman of machining on the second shift in Bldg. 4-1; E. G. Johnson as foreman of shafts and brush holders in Bldg. 4-1; Forest Z. Bunner as foreman of winding and assembly, second shift and Fred L. Pyle as foreman of finishing in Bldg. 4-1.

Mr. Asher, who resides on R. R. 7 was first employed in 1914. He is a graduate of the Apprentice School and for some time has been employed in the Service Section in Bldg. 4-4. Mr. Fruechtenicht is also a graduate of the Apprentice School having completed the machinist-toolmaker course in 1932. He did developmental work at Winter Street for some time and has since been employed in tool planning in Bldg. 26-5 and production planning and wage rate in Bldg. 19-3. He resides at 38 West Packard Avenue.

Mr. Johnson began his work with the Company in 1912 in the General Purpose Fr. H.P. Motor Department and after serving as a leading operator was made assistant foreman in 1937. He continued in this capacity until the time of his present appointment. He resides at 1341 Home Aveune. Mr. Bunner, who lives at 3526 Smith Street, joined the General Electric in 1920 and was assigned as an assembler in the Motor-Generator Division. Later he was transferred to the General Purpose Fr. H. P. Motor Division as a leading operator and then promoted to assistant foreman.

Mr. Pyle took employment at the Fort Wayne Works in 1929 and was assigned to the Refrigeration Division. He remained in this Division until 1935 when he was transfered to the General Purpose Fr. H. P. Motor Division as a leading operator. Mr. Pyle, who lives at 201 Lexington Court, spent two years at Ball State College at Muncie.

Two Join Ranks

(Continued from Page 1)

imately a year in the concentrating plant at Edison, N. J. He then returned to the G-E Test department at Schenectady, and in 1899 was transferred to the Construction department as a complaint engineer.

In 1907 Mr. Wilson was transferred to the Switchboard department. Later in the same year he returned to the Construction department as assistant superintendent of construction.

When the name of the Construction department was changed to the Contract Service department, Mr. Wilson became assistant manager, and on W. G. Ely's retirement in 1927 he was appointed manager of that department.

Mr. Burrows, whose boyhood home was in Lynn, Mass., studied for a year at the Massachusetts Institute of Technology. On July 1, 1891, he joined the Thomas-Houston Electric Company, which merged a year later with Edison General Electric to form the General Electric Company.

Having worked a few years in the lamp department of the Thomson-Houston plant—now known as the River works of General Electric—Mr. Burrows, in 1894, went to Harrison, N. J., where he was given employment in the photometer department of the Edison Lamp works there. S. E. Doane, formerly of Lynn, was superintendent at the Harrison plant. After a short time Mr. Burrows was promoted to supervising inspector of the various steps in the manufacture of incandescent electric lamps.

At this point he became interested in the development of manufacturing processes. He introduced a number of such improvements, notably the tray method of bulb washing, the tray method of coil testing for vacuum, and the automatic dipping process during the phosphorus method of evacuating lamp bulbs.

Mr. Burrows was foreman of the mercury exhaust department for a year and later worked on waste and spoilage for George F. Morrison, then superintendent of the Edison Lamp works.

In 1897 he was transferred at his own request to the engineering department, under the direction of John W. Howell, engineer of the lamp works and a pioneer in electrical manufacturing. Mr. Burrows was attracted by engineering as applied to incandescent lamps to such a degree that he told Howell he would be willing to work for three months without pay for the opportunity to train himself in that branch.

Both men thereafter did some important work in improving the methods of manufacturing, and Mr. Burrows made a number of other contributions alone. These developments comprised principally the first stem machine, carbon-filament treating machine; the tubulating, automatic lead-wire welding, combination stem and flare and automatic exhaust machine, also the rotary clamping machine for mounting carbon filaments.

When George F. Morrison was elected a vice-president of General Electric in 1917, Mr. Burrows was appointed manager of the Edison Lamp works. While in this position he conceived and directed the development of the single-unit method in lamp manufacturing, resulting in great savings and increased manufacturing efficiency. In 1925, when the Edison Lamp works at Harrison and the National Lamp works at Cleveland were merged, Mr. Burrows was appointed associate manager with T. W. Frech of the General Electric incandescent lamp department.

In May, 1927, Mr. Burrows was elected vice-president, associated with Vice-Presidents C. E. Eveleth and C. C. Chesney in the administration of the Manufacturing department. On July 1, 1930, Mr. Burrows was also appointed chairman of the company's manufacturing committee to succeed Mr. Chesney who retired from active service.

Of the 23 G-E employees who have passed the half-century mark in length of service, six besides Mr. Wilson and Mr. Burrows are still working. They are Charles S. Jameson of the River works at Lynn, Mass., and John D. Myers, David D. Homan, August Wassman, Earl Clowe and James H. McGowan of the Schenectady plant.

BULLETIN

In general, the Fort Wayne and Decatur Works will be closed on Friday, July 4, in observance of Independence Day.

With the exception of continuous operation such as Power House, Patrol Service, etc., the Works will remain closed on Saturday, July 5, and will resume operations on Monday, July 7.

M. E. LORD
Works Manager

Congratulates On Safety Record

In the above picture Adolph Foellinger, general foreman in Bldg. 4-5 and chairman of the safety committee is shown congratulating Charles Thornhill, Brice Hamilton and Floyd Loraine on the excellent safety record made by the employees of Bldg. 4-5. The three men served as secretaries of the safety committees during the time the no-accident record was being established.

Plastic Mold In Use 46 Years At G-E Plant

The plastics industry is popularly regarded as a development of recent years but one mold at the General Electric plastics plant has been in use for 46 years and is still going strong.

It is a mold for an end insulation ring for a commutator. When the mold was first used in 1895, this was made from a combination of rubber, asbestos and sulphur and was produced by pre-forming in a cold mold and then by finishing in a hot mold hydraulic press.

Today parts are still being made from the same mold. A phenolic plastic material is now used in a regular compression molding press. General Electric is the largest plastics molder in the country.

Attention Called To Use Of Salt Tablets During Hot Weather

Attention is called to salt dispensers which are provided at drinking fountains. Whenever there is an excessive amount of body fluid lost through perspiration there is also lost with the fluid a large amount of the body's supply of salt. The result is a deficiency in the salt level, and this has been found to be the chief contributing cause of heat cramps and heat exhaustion. These heat effects can be prevented to a large extent by replacing the salt as well as the water.

One tablet taken with each drink of water, on very hot days, or when the work room is excessively hot, is sufficient for replacing lost salt. For those who have difficulty in taking the salt tablets, try crushing them in the mouth before swallowing, and rinse with plenty of water.

Dr. H. W. Garton,
Works Physician.

Seen At The Annual Commercial Stag Party

A large group attended the annual Commercial stag party held last Saturday at the cottage of H. E. Stephens at Tri-Lakes. Top row, left to right—at the end of a hard day. Center—Wm. Wehrs and E. W. Lankenau doing justice to hand-out. Right—Ed Reese and Charlie Slater doing nothing. Bottom, left—The gentleman in the engineer's uniform is Ray Lindemuth. Filling the inner man are A. W. Bartling and N. Blankenship. Center—Mert Edgar did not find the golf ball. Right—Time out

Hoot Mon! The fishing season is here and here I am, casting about for something to write. Noo, wi' everybody out fishing over the week-end, ye wouldn't oxpect any one tae waste time reading this unless it has some gude fishing advice and at least one fish story.

Weel, here is the advice. Always go to where the fish are, and use the bait they want. If ye do both, ye'll have gude fisherman's luck.

Some people say they are always unlucky. Others hunt for the right spot and use the right equipment, whether it's fishing or turning in a suggestion. And they usually make a "catch" in either case.

O' course there IS such a thing as LUCK, and we all hai our unlucky breaks, both economically and piscatorially, but if we just keep trying in the right places, and use the right kind o' tackle, we're bound tae oxpose ourselves tae GOOD luck.

And any fisherman can tell you that it takes a lot more work tae catch a bass than a small bluegill. The bigger the fish (or suggestion) the harder it is to land, but the more meat on the table (in either case).

I hope that's enough advice. Now for the fish story. My cousin Colin and I went fishing over the week-end. It surely hurt him tae "pay" out line, but it hurt worse tae pay out for bait. So we dug our own. And o' course, it's a shame tae waste a whole worm on a five inch bluegill, so we went down after the big ones. But even then we still caught five inchers. (Ye never heard o' anyone catching one LESS than five inches).

At last Colin figured out "The Better Way." He took a clear glass bottle and broke the bottom out o' it, put the line thru the neck, and tied it so that the worm and hook hung inside.

"Noo," he said, "It will take a big fish tae nose that bottle up high enough tae get the worm."

But, sad tae say, all he caught was a sucker, and it had the neck o' the bottle in it's mouth. I still say that that sucker could read, because Colin had forgotten tae remove the "Duggins Dew—Scotch" label off the bottle.

Slips And Chips

Sir Viss Bldg. 4-4

Knowledge comes high for some people, Eh! Carl. But Carl (one of the Kloepper boys) will, without charge, tell anyone interested where the cold rolled steel stock is kept. This is a bargain because Carl recently paid one dollar for this information. . . . Leo (the Blair boy) has in his possession the last Plymouth so he says. You had better keep watch on that car because Smithsonian Institute will be out looking for it when they hear that it is the last one. . . . Mart (the self-styled Hardwick boy) realizes that you cannot bank on all advertisements. The safety steel top is rigid but it won't hold out baled paper. This is what Mart found out when a bale rolled from a passing truck on the top of his parked car. . . . Dallas (Dave Powers to us) will soon be furnishing gasoline for service stations. Dallas' Packard has an over-drive and the gasoline savings are tremendous. He is dickering for Leo's old car so he can get the over-drive and install it on the Packard. . . . Hermy (that Lepper guy) has been sporting a pair of red suspenders of late. Hermy says they are sometimes a nuisance, especially when they hang up when you need to move. . . . Some of the boys have returned from their week's vacation, but no fish stories. However, one little leak came trickling to me about Douglas (our Blessing) and his eldest son and their fishing trip. The son caught the fish, much to pop's displeasure.

Decatur News

Chet Kleinknight, Chet McIntosh, Wm. Lindemann and Ira Huber attended the ball game at Cincinnati, Ohio.

A. Buffenbarger, foreman of the Maintenance Department is recuperating at home following an operation at the Adams County Hospital.

R. Owens is on a short leave of absence due to sickness.

Mr. and Mrs. Carl Smith of Decatur attended the ball game at Cincinnati, Ohio, on Sunday.

While it is not customary to run advertisements in the WORKS NEWS—Hubert Omlor has proven so proficient at shearing dogs that his hobby is mentioned here.

Hubert Cochran, spending his vacation at Lake George, was assured of having fish while at the lake. Fellow employees and well-wishers sent him a can of sardines. He is still looking for his friend.

Peggy Gaunt spent Sunday at Lake James with friends.

Vivian Lynch has returned to work after attending the Delta Theta Tau Convention at Edgewater Beach Hotel, Chicago, Illinois, last week.

Deaths

Oscar F. Schmidt, Bldg. 19-1, an employee of the Company since 1914 died Sunday, June 22, after a brief illness. Funeral services were held Wednesday afternoon at the home, 2326 Fox Avenue, and at the Emmaus Lutheran Church. Burial was in the Greenlawn Memorial Cemetery.

Ellen Frances Curley, Bldg. 26-3, died on June 18. Miss Curley had been an employee for approximately one year. Funeral services were held Saturday afternoon with burial in Prairie Grove cemetery.

We are told that Earl Fusselman, patrolman at the main gate was successful in winning an award involving skill, ingenuity and lots of brains. Earl is planning on a super deluxe addition to his home.

From The *Feminine Viewpoint*

By Irene Perry and Hilda Barthold

Sometimes our quest for beauty, knowledge, mild adventure, those things for which we seek while on vacation or week-end trips, lead us far afield and we overlook the possibilities for all these that lie within the borders of our own state. The State Parks of Indiana, from The Dunes on Lake Michigan to Clifty Falls Park on the Ohio River, and scattered throughout the state, there are at least ten more, have been set aside for the enjoyment of the people. Each park preserves some natural beauty, and most of them have some feature peculiar to itself.

Brown County State Park is widely known for its natural rustic charm, and here as an added attraction is the artists' colony at Nashville, as well as the various handicrafts which are made and sold in the shops there.

Clifty Falls Park is on the high wooded plateau overlooking the Ohio, here are deep ravines, the waterfalls from which the park takes its name, wooded hillsides, a water-power mill and a never-used railroad tunnel. At nearby Madison is a stately old mansion with pillared portico which overlooks the old-fashioned garden and lawn which sweeps down to the Ohio River. This mansion is the Lanier Memorial, and has been refurnished with original possessions of the Lanier family to give an authentic picture of middle nineteenth century life, complete to the dolls and toys in the nursery.

A re-created pioneer village, grouped around a water-power saw and grist mill is one of the attractions which make Spring Mill park a favorite vacation spot. Another feature is the underground caverns with their hidden streams; Donaldson and Twin caves are noted for their stalactite formations and the blind fish found in their underground streams.

Turkey Run state park delights the visitor with its attractions whether he is a naturalist, geologist, or merely an admirer of natural beauty. The park is in a setting of scenic splendor, amid a virgin forest, a tangle of rocky gorges and twisting canyons. It was this area that inspired Indiana's series of state parks.

Indiana Dunes state park has a background of sand mountains, the rustle of a forest and beating waves. The bathing beach is famous for its white sand and cleanliness, and within the park are some of the finest remaining dunes which once bordered the southern shore of Lake Michigan.

These are a few of the highlights from five of the best-known state parks of Indiana; all of the parks are well-provided with picnic or camping areas, trails and bridle paths. With their diversity of setting and comfortable accommodations the parks are ideal outing places. Anyone wishing information regarding any of the parks may secure it from the Indiana Department of Conservation, Division of State Parks, Lands and Waters, at Indianapolis, Indiana.

Marriages

Beth Garman and Irvin Menchy were married June 15th at Grabill where the groom is employed with the Sauder and Shaw Produce Co. The young couple will be at home in Grabill for the present.

The Insulation Department extends their sympathy to Claude Curley, 12-B, in the death of his daughter.

Ray Kierspe, 16-3, comes along with that age-old fishing story about the hole in the sack.

Glad to see Helen and Paul Gellert, Bldg. 18, back from their vacations even if they did bring poor excuses instead of fish.

NEWS THROUGH THE PLANTS

19-4 Spot Jottings

Seems as though Wilmer "Whitey" Finger has taken up interior and exterior decorating on his vacation. Ah ha! An artist in our midst. . . . Someone should make a color chart for Pat, Roe and Ballard in the small back lot. Red is an easy color to see. . . . **Bldg. 19-4** lost two more girls when Nelda Branzinger and Fern Brown left. Good luck girls. . . . Now who just did have their shoes off. Jack White or Maxine Pelz, 'Smatter girls is the heat getting you? . . . Congratulations to Margaret Steward who was married on June 15. . . . Edythe Roller says she misses her candy every Friday. The lady seems to have a weakness for spearmint leaves. . . . Peggy Bandt has a brand-new permanent and Ruth Church has the duckiest hat. . . . Florence Robinson is worried about her memory. Every time she came back to wind she went to the wrong machine. . . . Bob Haslup is on the black list. He brought Lorene Hahn an ice cream cup and when Lorene opened it—well . . . there was no ice cream. . . .

26-5 Tool Bits

Art Dicke down on his knees certainly had Frank Hoffman puzzled until closer observation revealed Art taking care of a pigeon under bench. . . . Henry Wittber was hard to get along with after he attended the movies and discovered that no Mickey Mouse film was billed. . . . "Is there a doctor in the house?" Rufus Niblic is the new D.D.N. of Bldg. 26-5 and Bert Telley thinks he is O. K. . . . Why was Walt Greiner wearing such a worried look during the heavy storm on Friday the Thirteenth. Maybe he was afraid the paint would wash off of his new gas buggy. . . . Rotorstator has a problem to offer. If a man travelled to Clear Lake on a two-weeks' vacation last year, how far will he get this year on one-half day. . . . Yep, you sure can tell the fellows in the west end of Bldg. 26-5 who own farms. Ed Schafenacher, R. Platt, F. Fitch and F. Przebindowski are always talking about their tractors and the like. We must not forget Carey Baker who got a tractor for his three-lot farm on North Clinton Street. . . . If you want to know how to keep your wife from learning to cast, see Art Dicke. Art says he used an old 1887 model reel, a trout line and a whale hook. . . .

Dick Miller, Bldg. 26-2, better known as "Smokey" sure knows how to put out fires. He pours the water on himself first.

Among our newly married couples we report Elsie Brown, Bldg. 26-2, who promised to—skip it—Harley France, Bldg. 26-2 and Ruth Swank, Bldg. 26-1, who is trotting in double harness with Lloyd Grotian, Bldg. 4-6. Congratulations and best wishes.

Joe Koble, Bldg. 26-2, sure knows how to park his car. Joe drives along until he sees a nice new car to park in back of and then feels certain that people won't look at his car. Unfortunately he had to unhook bumpers in a recent adventure—and that attracts attention.

The boys of Bldg. 19-5 were given a scare recently when smoke burst from the O. G. screw machine department. On investigation we found it was merely Lawrence Duke in a heated argument. Remember the temperature and your blood pressure, Duke.

In The Good Old Summer Time

Swimming was the main attraction for this group of Bldg. 18 girls who spent the day at Mildred Whitmer's cottage. In the top group are, left to right—Leona Menze, Mildred Whitmer, Irene Perry, Mildred Quackenbush, Edna Knight, Jean Smith, Evelyn Smith and Dorothy Franke. Believe it or not two of the girls fell for the old gag of trying to bail out the livebox. Busy at work on the job in the lower picture are Mildred Quackenbush and Jean Smith.

26-5 Tool Bits

Richard Lenz and Kenny Doell went down to play a euchre game with the Aircraft with the two Mikes Thursday noon. They received a rough reception. The double "Mike" combination scored 15 points before the visitors could score.

After listening to a conversation between W. Elliott and another native of Wabash, we are convinced that Walter is just a hill-billy at heart. The discussion seemed to follow the line of the best way to walk on hills and still act like you were on the level.

Farmer Roscoe Platt must have been misinformed on the color of seeds to plant by his associates of Bldg. 26-5 for he planted a field for alfalfa and a bountiful crop of sweet clover has made its appearance. Roscoe doesn't mind because he wanted to plant sweet clover all the time but the boys talked him out of it or did they.

Our prize of the week goes to Bob Klingel, Bldg. 4-3, for being brave enough to sport a new pair of kennels for his rovers of a very large and peculiar design. He said they are known as Stradivarius shoes. Anyone wishing further information and explanation, contact Bob.

Sunbeams From 17-4

Donating on papers that are passed gets to be a habit with most of we oldsters, in fact it was such a habit with Herb Winters that he even tossed out two bits for his own going-away gift. Herb is leaving for camp Wednesday, and we all wish him lots of luck with his new pen and pencil set, also the camera.

We are all going around these hot days with next to nothing on, but Helen Miller has gone us one better, she even dances without her shoes.

Question: Is water wet? Answer by Clara Nahrwold: It certainly is, especially on the seat of one's chair.

The employees of the department wish in this manner to extend their sympathy to Marjorie Morrison in the death of her brother.

Thought for the week: Do today's duty, fight today's temptation, and do not weaken and distract yourself by looking forward to things you cannot see, and would not understand if you saw them.—Charles Kingsley.

Granny.

Edna Crow, Bldg. 4-3, couldn't talk for days last week so, of course, the gang is far behind on their latest scandals.

Left the Hospital: Charles Schroeder, Robert Moore, Allison Van Warmer, Lucile Baker, Thelma Johnson.

Returned to work: Marjorie Macke; Maxine Leary; Mary Brown, Wm. Kelsey, Donna Roe, Mildred Snyder, Ervin Becker, Alvin Myers, Raymond Trumbauer, Bret Young, Chris Doings, Pauline Poorman, Lloyd Oberholtzer, Vera Fisher, James Umphrey, Annabelle Hose, William Russell, Dorothy Brecht, Virginia Morand, Peggy Brandberry, Edward Hohman, Francine Remel, Bernice Scheiman.

We have all been wondering why Frieda Ramm, Bldg. 4-3, has been looking so blue these days. As you know, Frieda is a great lover of cats. A stray one came to her home, took sick, and she walked over to the other end of town for some medicine that cost her a dollar. The next day the cat was gone. Another cat was hit by a car. Well, she put it on a pillow, laid it out to die, and said she couldn't sleep all night worrying about the cat. Next morning she hurried to see how it was and the cat was gone. If any of you are looking for a good home for a cat just send it to Frieda.

Famous Last Words:

Marcel Gaut, "Just three ahead."

Phil Tilford, "You can't do that."

Could it be possible that Irene Hake, Bldg. 4-3, was playing Cinderella by leaving her slipper in a stack of stators?

Anyone hearing Harry Zimmerman of the Cafeteria talk about dough, could it be the biscuit dough he had his fingers caught in last Friday? An alarm was sent out and after an hour's work they finally gave up as Harry was so wrapped up in the dough they couldn't tell the difference between him and the biscuits. Better luck next time, Harry.

Has anyone seen Dale Meyer's portable doghouse? It is a wonderful piece of handiwork. But Dale, there is one thing that puzzles most of us, from which window does the friendly hand with the platter appear?

6-4 Magneto Mumblings

By The Eavesdropper

In the good ole' summertime," Dad goes fishin', little brother sneaks away to that ole' swimmin' hole, and the gals of the Magneto Department, First Shift, have a weiner bake after work 'pon a simmery summery afternoon. Yes sir, and yes mam, a gala time was had by all and especially by Virginia Boulware who won a unanimous vote as the World's Greatest Hot Dog Eater, having consumed all of five before the rest of us had even started. . . . Her "most embarassing moment" could be no other than the time several days ago, when she nonchalantly sat on a park bench at McCulloch Park for a few minutes, only to discover, upon walking away, that the fresh green paint left a clear print of the bench seat on her purty dress. Mah goodness, Betty White, I'll bet your face was a beautiful red contrast to that Kelly green paint! . . . And speaking of embarassing moments, we know most assuredly that Betty Freimuth was none too happy about her sorry plight the other day, when she gayly tripped on the floor, only to slide nicely, ooops, into a graceful sprawl upon that same floor. It was the last straw when all on the floor wholeheartedly enjoyed the sight of Betty as she scampered back up in a frenzied effort to regain her (ahem) dignity. . . . If you should happen to call Annette Perry and Frances Gillie a couple of buggy girls, we think they'd understand. It all began when Frances told Annette her pet diversion was "bugs," and then was horrified the next day at lunch when Annette brought forth a tiny jar of lady bugs. Did you furnish pepper and salt, too, Annette. . . . "Well, hush mah mouth, and call me dumbfounded," exclaimed the former Mary Huntine, as the girls on second shift happily presented her with a lovely wedding gift. . . .. Friendship, fun, surprises—they all make this world a pretty happy place to live in, don't they? And with this inspiring thought, I'll bid you all adieu until next week. G'Bye Now.

Thisa And Thata 19-5

Someone tells me that Edna Rohrbach likes to go fishing and that she also likes kittens. There seems to be no connection and yet why does "anxious subscriber" want to know why she had to discard her new fishing outfit. . . . Luella Schroeder will either have to get her glasses changed or else get a brighter colored coat. We still can't see how she mistook someone's tan colored garment for her own rose colored one. . . . Ruth Money seems to go in for new things. Instead of having an animal pet she has made a pet of her new freckle.

All farmers around the Northern Indiana lakes are requested to feed their dogs and keep their pigs penned up. Why? Because Margrite Teboe and her band from Bldg. 19-4 are going fishing, and they would like to keep what they catch, if any.

Pat Chapin, Bldg. 26-1, knows her golf but she is having a little trouble locating the pill after she socks it. The other day she discovered the ball shyly nestling among the heather but decided it was not her's so she hunted and hunted and hunted until she came back to the original ball still shyly nestling and discovered by gosh it was hers.

NEWS THROUGH THE PLANTS

Motor Generator Static

Geo. Clancy of 19-3 who, by the way, has been increasing in weight by about two pounds per week for several months has reached such a large waist line that when doing some repair work on his auto, he became fastened so securely in the car it was necessary to call on the family to release him. Now George has gone on a milk and banana diet to reduce, adding some rye toast for a filler. We would suggest, George, that you refrain from sandwiches, candy, milk, cake and other tid-bits on the candy wagon and do some road work.

Ed. Schacker, 19-3, visited a foot doctor recently, who put Ed on a banana diet. Now Ed had some trouble consuming enough bananas to satisfy the inner man so he resorted to several botles of milk to wash them down. Some of the boys in 19-2 think Ed should start a fruit stand, due to the quantity of bananas he carries into the shop for lunch, but Ed says. "No fruit stand for me, just enough bananas to cure the feet."

June sure left its mark on 19-3 this year. There were four weddings in two weeks. Congratulations are due Beverly Moring, who is now Mrs. Jack Motherwell; Dorothy Lindenberg who is now Mrs. Richard Kent; Nadine VanHorn who is now Mrs. Wallace Moorhead; and Mary Louise Lankenau who is now Mrs. Carl Hartman. We hope you are all very happy.

The Apparatus Cost Department, of 19-3, had a shower on the new bride, Nadine Moorhead and Irene Benanti, who left to become housewives. The party was held at the home of Dorothy DeHaven and the following were present: Raydeen Miller, Rachel Luellen, Mary Alice Lempke, June DeWitt, Irene Benanti, Nadine Moorhead, Sara Jean Herber, Jean O'Connor, Miriam Jones, Mary Frances Lauer, Annabelle Haines, Mary Rottman, LaVerne Englebrecht and Dorothy DeHaven.

To those in Bldg. 19-3 who have been wondering as to the identity of the tall stranger in the Planning Section, we volunteer the information that it is none other than Don Shultz, who, in the interests of national defense, has taken up the study of camouflage. The first lesson being "Disguises and how to apply them," which will explain the appearance, this week, of a few sparsely located hairs which some day may blossom forth into a full-grown mustache.

Another story, which the writer does not doubt, is that Don has sent to a well-known mail order house for a new electric razor and has been holding off on the purchase of new blades, thereby aiding in conserving the nation's steel supply.

Going Native

Shades of the South Sea Islands, what next? Charley Rodenbeck, Bldg. 19-1, surprised all the boys and girls by working in what appeared to be a bright red sarong. Nice going, but I still prefer seeing Dorothy Lamour in one.

Tales of the Week

Fish do grow large in Lake James according to Bill Grover who tells the best fish stories in Bldg. 19-1. It is a practice of the Grover family to take one pound of meat to Bill's pet catfish (the one that pulls his boat around the lake) every week-end. On one occasion when Bill forgot this meat the fish became very angry and lashed the water with its tail, creating such a wave that Bill was washed off the dock and darn near drowned. "Yes, we grow 'em big," says our hero. "Once a feller hooked a small pike and after a five hour fight, the fish became disgusted with foolin' around and bit the bottom and part of the side out of a steel boat." To which we may say "Foo goodness sake."

Ever try getting up real early in the morning to see a sun rise? Well it is a wonderful sight, if you had a night's sleep before; then you can enjoy the beauty of a sunrise and hear the bird chorus, all nature seems to be in tune. But if you are real sleepy and need rest, well that's a different story and for further proof ask Goldie Draggoo, of Bldg. 4-3, her version of a sunrise over Lakeside.

Sayings of the Week

Jerry Frye, Bldg. 19-3, remarks, "Some folks complain so loudly about never having a chance, they can't hear opportunity when it does knock."

Often when carpenters construct a building, nails slip from their fingers and fall to earth, there to remain unnoted, lost to humanity. But our pal, Walter Histed, decided to make history by salvaging these little bits of metal so each night he tracked over to their new home, now under construction, bearing a coffee pot (or was it a tea kettle) in which to place the spoils of his hunt. After a search that lasted for hours, Walter returned home with a pot full of nails, tired but satisfied. Now comes the lament, when Walter, exhausted from his labors, succumbed to the arms of Morpheus, it was with the expressed purpose of gaining all the rest possible. But fate was against him—one of the neighbors has an electric alarm clock which peals forth at 6:00 a. m. and often rings for fifteen minutes before being shut off, thus disturbing Walter's rest.

Now our hero is trying to decide if this neighbor is just an "old meanie" or whether he, too, was out hunting nails. "It's Mutiny—."

News On The Nose 4-5

There are lake parties and stag affairs, but the notable outing of a Bldg. 4-5 delegation is still being talked about, mainly by Herb Cook, Harry Anderson, Paul Hapner, Ralph Reinking, Walter Mossman and Merlin Roussey. That man from Zulu, Roussey, was elected cook but refused to even pickle a cucumber, Anderson's favorite dessert. And nary a fish bit on young Mossman's line, but the love bug bit him, making his chief topic of conversation one of the Bldg. 4-5 belles. It is said that it'll be a cold winter at the Reinking home as Ralph forgot to bring his wife's best blanket home from the lake. They all had to come home to eat, otherwise "a good time was had by all." . . . Floyd "Wild Rose" Saylor is happily passing out cigars and chocolates in celebration of a new beauty contest winner into the family. Congratulations, Pappy. . . . Gert Reinking, Bldg. 4-5 office, receives daily inspiration from a snap-shot of you-should-know-who on her desk. . . . We don't see how Ellen Heidbrink keeps that gay sparkle in her eyes, what with all this country-clubbing—we mean dancing at the Country Club, etc.

Sympathy

Sympathy is extended to Louis Maier, Bldg. 8, in the death of his father.

First Of The Season

Among the first catches of the season were those made by F. E. Thomas, Bldg. 20-2, E. R. Summers, Bldg. 12 and F. M. Gibson, Bldg. 20-2. The men are displaying part of their catch of Great Northern Pike taken during a fishing expedition on Drummonds Island in Michigan.

Sleuthing In 4-6

Just can't get over the way that Lloyd Grodrian put it over on us by marrying Ruth Swank on May 17th and keeping it a secret. Here we have been wondering what we could do to make him ask Ruth to name the day and all the time he has been married. Anyhow, we wish the best of luck to both of you. . . . Congratulations to "Mamma" and "Papa" Yager on the arrival of little Mary Elizabeth. The "Diaper Club" got together and gave the usual useful gift. . . . Little Pauline Gehrlich wins prizes in a little way. She won booby prize in "Indoor Golf" by throwing so many "3's" . . . Anita Rump finally returned to Indiana after bowling in a tournament and vacationing in California. Her biggest disappointment was in not finding her romantic heart throb, Mickey Rooney, at home. . . . Orval Doherty discovered a new way of eating hard ice cream "Sky-rockets." You simply drop them up on your desk, leave them there for an hour, and return to eat—I mean drink it. . . . What will happen next? "Pa" Hower and an unidentified (as yet) engineer from 4-6 were seen walking down the hall holding hands. Can it be that Spring has got them? . . . Sympathy is extended Bruce Curley and family in the death of his sister.

The Sleuth.

Margaret Walter, Bldg. 16-3, tells how to make your old typewriter practically noiseless. Just move it near any open window in 16-3, or thereabouts, so as to get the full benefits of the air drills, etc., at work on the new addition to Bldg. 8.

Over the past week-end a big rodeo was held at Art Brandenburger's, Bldg. 4-3, "Flaming Arrow Ranch" on Big Long Lake. Art displayed his masterful technique at steer bulldogging, Don Voorhees gave a wonderful exhibition of bronc busting and roping. In the evening the guests amused themselves by shooting out the lights in the ranch house.

Borings From 4-4 Office

Once again the rat is in swing to catch a few in the trap again this week. I just don't know if it's worth all that—it's just too hot right now—So here goes nothing. . . . We have on our list this week a recipe to simplify duplicating. First, get a sheet metal for writing surface, one piece of duplicating carbon and one plain white paper. Lay the carbon face down on the sheet metal, top with plain paper and write. Impression will be made on sheet metal: Throw used carbon and original away and wrap sheet metal around duplicator drum. Proceed as paper master duplicating. Simple isn't it? For further information see Don Niles. . . . Doris in her back yard. Bu twas every Roe recently tossed a steak bake one fooled when they all arrived. The steak turned into hamburger. Now every one is going to get even with Doris for not keeping her word. However, much chattering, clowning, cluttering, clutching was prevalent throughout the evening. . . . Art Wedler wasn't very thoughtful with his fellow workers last week. He cluttered up the aisle with file trays and chairs, and to top off the day he tried to set Doris Roe on fire. Now Arthur you had better be careful or I'll expose you in the WORKS NEWS. . . . Clayton Culver is recovering at his home with a sore throat. . . . The girls in the office certainly are very complimentary to each other. Each and every one of them thinking that one is better looking than the other, conceited, eh, what? Well, LaVon Price is still thinking of a come back to give the unknown for a letter she received recently. Mel Warner is now purchasing two for 25 cents cigars, but you can bet your last dime he waits for 20 cents change. Wilma Robb spent the week-end in Logansport visiting relatives. That is what she said, relatives. 'Bye now, I remain, Sincerely as ever,

Elmer, the Field Mouse,
The Rat to You.

Winter Street News

Short flashes from the production department stag party at Crooked lake:

H. Amaed won the potato chip eating contest. He very neatly tucked away a three pound can. How come they are calling Lichty "Lucky." Did he take you boys again. K. Huyette is going to cut his other 6 cylinders in on his Zephyr since we hear it could never catch Flash Rosenberger. The boys that rode with him recommend him as a test driver for Uncle Sam's new tanks. C. Shied sure loves his early morning dips in the lakes, especially after he's in and all wet. W. Bock is a firm believer in tipping when he is out, but after leaving the waitress with that impression, he then tells her she forgot to bring him his change. The next time Mr. Myler gets hold of a flashlight the boys hope his arm doesn't get paralyzed again. Mac, how could you? Anyway everybody had a good time.

Things sure happen fast to Rita Wagner. She found her drums along the Maumee. She has a birthday and proud of it and best of all she's sporting a "sparkler." If Tommy doesn't look out he's going out of circulation.

Millie Atherton spent the week-end in Michigan City. As to her interests there, you'll have to get the details direct from her.

Leo Miller of the Water Cooler section is bewailing the fact that this modern machine age is keeping men out of work but then he goes down town to buy his lawnmower and the salesman sells him one of those extra wide ones, telling him that he can now mow his lawn in half the time it used to take him.

Gladys Smith has been taking first aid and she was driving nails through some boards when L. Gotchallk asked her what she'd do if she hit her finger and saw red blood spurting from it. "Well, I'd swear," she told him.

Frankie Mason pulled a fast return job this morning. After nonchalantly walking to the gate he felt for his badge and lo and behold, he put it in high and made the return trip and still was only seven minutes late.

Max Farrell, Bldg. 4-3, our rider of the kitchen range, is a very versatile fellow. He is an ardent candy wagon enthusiast, also a great lover of horses. When the candy wagon arrives on the floor, Max makes a dive for it as if a famine had been in progress, and to see him buy food, one would think he was buying his week's supply of groceries, and to see girls riding horseback intrigues him wonderfully. Max tells us that he would like very much to take up horseback riding but has to forego this because of his height. His feet drag on the ground.

Mischa Elman and Jascha Heifetz were lunching together. The waiter handed Mr. Heifetz a letter addressed "To the World's Greatest Violinist."

"This must be for you, Mischa," Heifetz said, passing the letter.

Elman shook his head. "No, it's yours, Jascha."

Whereupon they decided to have the waiter read it. He opened it and began: "Dear Fritz—"

Footer: "Wanna buy an engagement ring?"

Legger: "Wassa matter, yer girl throw ya over?"

Footer: "Naw, we got married."

News Around

Plastic Flashes

Betty Perry, Bldg. 12-1, decided her little "Bessie" was lonesome so she bought her a playmate christened "Tessie." Them's a lot of hamburgers on the hoof, Betty.

We're glad to see Marguerite Hullinger, Bldg. 12-1, back to work despite the fact that her ankle is still swollen.

Jerry Pickett, who is on a leave of absence, wishes to be remembered to her co-workers. Don't worry, Jerry, we won't forget you.

We wish people wouldn't shut up like clams when the Tillies come near them.

All we've been hearing lately are plans for our tbree-day vacation over the Fourth. Most everyone is going to some camp or other.

Why can't Tom Cameron make up his mind whether he likes blondes or brunettes? The Tillies are going m-a-a-d watching his romances.

Did you ever notice the shine in Anita Alspach's eyes when you mention Hattiesburg?

Jim Fleming, the Kentucky Terror, has a guaranteed method of not losing on the horses. Just bet on a horse that isn't running.

Congratulations to Don McAllister, who was married to Petra Hardy last Saturday. Best of luck Mr. and Mrs. McAllister.

The next time Ferne Franz, Bldg. 12-3, takes her boy friend's car for a spin, she should take along a half dozen cans of assorted colors of paint.

Marie Norr is displaying a bright twinkler on the correct hand.

The Tillies were very sorry to hear that Marie Erickson had an accident last week end. We hope that Marie will have a speedy recovery and will come back to work soon.

Bayless Swift, the Bldg. 12-1 Casanova looks like a dandy when he smokes those mile-long cigars. The Tillies saw Bayless when he was leisurely sitting in a car enjoying one of those oversize "La-Palinas." We doubt if there was two inches of space between the end of his cigar and the windshield. We thought from the smoke that billowed from the automobile that it was on fire. However, it was Bayless's cigar causing such a smoke screen. For goodness sake, Bayless, tell us in advance when you intend to puff one of those "doozies" so we won't haul out the fire extinguisher.

"The Tillies"

Only one casualty occurred during the big birthday dinner in the Small Lot Section, Bldg. 4-3, celebrating the birthdays of Marjorie Hargrave and Margaret Ray. It was when Irene Roberts dropped the bowl of baked beans, however, most of the beans were salvaged and the dinner went on to a successful conclusion. Ernie Close played the dog and licked all plates and bowls clean.

Max Farrell, Bldg. 4-3, spent Sunday evening in Payne, Ohio, Marcel Gaut's home town and can't get over talking about the girls parading up and down the streets in formals. But what a surprise the girls had when they saw a handsome chap (Max) driving into town in an auto all dressed up in a "Paul Revere" outfit. What they would like to know is "Where did he leave the horse?"

Page the man with the lantern. We have found an honest man. Lawrence Rickert, Bldg. 26-2, says he cannot tell a lie. He fished and he fished all day Sunday and got twelve minnows.

Rod-Gun To Shoot Qualification Course

Under authorization of the director of civilian markmanship, the G-E Rod and Gun club will start shooting the outdoor qualification course on Sunday, June 29. This course is open to all club members and is conducted according to U. S. Army regulations. However, no member is placed under military obligation by participating.

The prescribed shoot consists of slow and rapid fire on the outdoor 100 yard range in prone and sitting positions. The entire course will be supervised by club officers to assure as many members as possible to qualify. All persons completing the shoot and making a qualifying grade will be awarded a silver medal issued by the U. S. War Department.

It is urged that all club members interested in rifle shooting be at the range next Sunday as the Club's next year's supply of guns, ammunition and targets will be prorated on the number of persons qualifying in the course.

Horseshoe Throwers Will Form A League

All employees interested in the organization of a horseshoe league are requested to contact Joe Burton, Bldg. 19-3, phone 476. The horseshoe courts in McCulloch Park have been overhauled and placed in the best of condition and all addicts or novices in the ancient sport of "Barn Yard Golf" will be welcome.

Hermetic Office 17-2

George Langenburg is at it again. This time he promised us a movie. It will probably feature the "Invisible Man" in "The Little Movie That Wasn't There." . . . Ted Bedecki said the only thing he lacked to equal the experiences of "Hurricane" was Dorothy Lamour. It seems he was stranded on an island during the storm at Rome City Sunday. . . . The girls in the office had a birthday dinner on Helen Buuck Tuesday and were very glad to have Emma back with them again. . . . Correction: Mildred Spuhler was the one who had the telephone trouble last week instead of Luella Franke. After reading some of the letters from those who loved and lost we can understand why "Termite" might be in a daze. . . . Earnie Bailey has confided his three most important wishes. Yes, there's a girl, and to avoid a lot of broken hearts we'll say she must be a brunette or maybe a red head or blonde.

Suzy Sleuth.

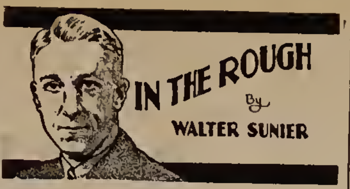
Dear Girl Upstairs,

Charlie Rice isn't content with having his name in the WORKS NEWS every week—he even gets it in the daily papers too.

"Sammy Bradtmiller wants to know "who puts all that stuff about us in the paper?" (I do Sammy and I would like to know when you became so interested in motorcycles!)

Those girls who complained about how broke they were after the Cincinnati trip should follow Gracie Kocks' example; she saw everything and only spent $1.25!

Till next week,
The Hermit.



IN THE ROUGH

By
WALTER SUNIER

At the Fractional Horsepower Motor Commercial Department's annual party last Saturday (which has headquarters at H. E. Stephen's cottage at Tri-Lakes), most of the participants played golf. Bartling had a little trouble on No. 9 fairway. Some of the boys played the hidden ball trick by submerging his ball in a hole in the fairway and covering it with a bit of sod. With a little help he finally found it. He was cheered later by the nickel he won from Wehrs which he thinks he will frame—the nickel, not Wehrs. Wehrs put a spoon shot on the green on the same hole. He insists that this course is also too small for him and that he had to hold back on every shot. There is no water on the course except one small pond which is not close to any fairway. Still Mert Edgar by some kind of a prodigious shot put a ball into it.

At the Engineer's party the preceding week, Mert got into the rough at Auburn to the extent of 65 shots for nine holes. Those thunderous flying shots of his must have strayed.

Jim Townsend is now the skipper, having made his shot at No. 14 at Brookwood take three skips on the water. His second shot was of the garden variety and plunked in. He should have skipped the hole entirely.

Mait Smith can make a 5 without being on the fairway or on the green. On No. 15 at Brookwood he was in the trap on the right and went from there to the rough. Next he whiffed one and then went into the trap on the left of the fairway. From there he knocked the ball bang into the cup.

George Waldschmidt played his annual game at Auburn and we understand played one hole in 2's —2 into the water, 2 into the rough and 2 into the trees.

Les Didier made his first trip into the 70's by shooting a 78 last week. The phrase, "Even Didier beat me," is losing its sting.

In the Monday Evening Group, the Rough Riders defeated the Plastics, 181 to 185; the Turf Toppers defeated the Divot Diggers, 185 to 190; and the Ice Cubes defeated the Slapsticks, 197 to 201. Hanna shot the low score for the evening and for the whole league so far—a 34. His team, the Turf Toppers, won the first half in the Monday Group. This team is the only one of all the eighteen teams to go through the first half without a defeat.

In the Tuesday Evening Group, a three way tie resulted between the Optimists, the Billy Goats and 4-3. In the play-off, the Optimists won, making them the winner of the first half.

In the Wednesday Evening Group, a three-way tie resulted between the Hookers, the Sharpshooters and the Fluorescents. In the last matches the Fluorescents defeated the Trappers, 196 to 201; the Sharpshooters defeated the Hookers, 174 to 189, and the Apprentices defeated the Cro-Flites by forfeit. The three-way tie had not been played off up to the time of this writing.

G-E Club Looses To Kuhners By A Two To One Score

By Paul Schwehn, Bldg. 4-3

It took a lucky home run and a wild pitch by the G-E hurler for the Kuhner Packers to ease over the G-E diamondmen 2 to 1 in an overtime game Tuesday night at Memorial park.

Laudable fielding accompanied the first game of the second half action in the city's top-notch league, the Main Auto Major league, before a large attendance Tuesday night.

The Meat Packers, who virtually slaughtered the Joe men last Tuesday, returned to meet a stronger more highly polished ball club that butted them around like a dashing ram.

The butting Electricians tallied in the sixth when Holmes, the lead-off man, snagged a pitch for a two-bagger. Romary, a new member to the squad slapped a high fly into right field for the first out. Dependable Schusted equalled Holmes attempt and eased in a two-base hit accounting for the first tally.

Bob Cowan, North Side's stellar cinder sprinter, broke another record at the ball game when he lopped out a long high fly over the center fielders head. Bob was hitting third base before the ball touched mother earth. The time, a new unofficial record for base running.

Another burst of speed was displayed in the ninth when the Packer right fielder covered territory to catch a high fly, although he retained the ball after several barrell-rolls on terra firma.

The fielding of the G-E boys in the last of the ninth won great applause from the largest attendance of fans at the ball diamond this season, when they stifled a possible rally with acrobatic fielding.

Rightfielder Anderson began the first of tbe tenth with a two base hit, followed by a strike out by "Whimpy" Stellhorn, a surprise unbeaten bunt by newcomer Hudson and a low infield fly by Huth, which retired the sides.

Kessler, agile third baseman for the Packers, slapped the ball for a two bagger only to be followed by E. Cowan, who couldn't beat a bunt. Stanski was walked and Nelson popped an easy fly making it two away.

Joe Bolenbaucher's diamond men were eased out of a ball game Friday when they were taken by the Napoleon Roofers with the count 6 to 4.

A rally in the sixth, garnered by walks, bunts and solid hits by Schuster and Huth accounted for the tallies.

Eickenbarger and Hemsoth were the losing pitchers.

Friday evening at 8:30 the G-E varsity will take on the Waynedale AA diamondmen at the suburb.

Club Defeats Rea In Baseball League

The G-E Club baseball team defeated the Rea Nine last Thursday by a score of 10 to 5 on the G-E Club diamonds.

Rea's ace pitcher Hall held the Club down until the fifth inning when a walk, two errors and six hits sent six runs across the plate and sewed the game for the G-E Club.

Max Miller pitched a steady game for tbe Club and kept Rea's hits well scattered. The score by innings.

	1	2	3	4	5	6	7	R.	H.	E.
G-E	0	1	1	0	6	1	1	10	15	2
Rea	1	0	1	3	0	0	0	5	7	3

Horseshoe Pitchers Swamp International

The G-E Club team defeated the International Harvester thirteen games to three in the Y.M.C.A. league last Thursday. Pennsylvania defeated Zollners by fourteen games to two.

The standings at the present time are:

	Won	Lost
Pennsylvania	14	2
G-E Club	13	3
Harvester	3	13
Zollners	2	14

Kilgore was high for Harvester winning three out of four games while George Hahn was high for the locals with four out of four.

The standings of G-E Club pitchers are as follows:

	Won	Lost
George Hahn	4	0
Walter Rietdorf	3	1
Harold Hartman	3	1
Jules Cochoit	2	1
Jack Brinkley	1	0
Joe Trentadue	0	0
A. Kraft	0	0

Production Of Magnetos Under Way

And The First Shipment Is On It's Way

Meeting commitments is no small matter when the manufacture of an entirely new product is involved. Reason enough then for the smiles on the faces in the above group as the first shipment of magnetos comes off the finishing line on schedule time. Wm. Wehrs, superintendent of the General Purpose Fr. H.P. Motor department is shown congratulating Ralph Dennison, superintendent of the Magneto Department. In the background left to right are Harold Kroeger, Mort Pugh and Elmer Auman. (Pictures on Pages 4 and 5).

$1,167 Paid Suggestors During The Past Month

Frank Bohnke, Decatur, And George Huber, Bldg. 12-B, Head List With $80.00 Awards

One hundred and forty suggestions from employees during a period of four weeks brought awards amounting to $1,167. Leading the list are Frank E. Bohnke, Decatur, and George F. Huber, Bldg. 12-B, whose ideas netted them $80.00 each. Mr. Huber gained his award on the suggestion to order certain insulating material in rolls, and Mr. Bohnke by suggesting changes to position of stator leads.

Two fifty dollar awards were made during the period. They were to Donald H. Voorhies, Winter Street, who suggested the use of self tapping screws in cooler cabinets, and Ronald G. Tobias, Bldg. 19-5, who suggested improvements to shaft undercutting operations.

A thirty dollar award was made to Clarence Gardt, Bldg. 12-3, who suggested improvements in forming certain mica angles, and awards of twenty-five dollars each were made to Mildred I. Balliet, Bldg. 17-4, who conceived the idea to omit certain anchor stitches at stators, and to Fletcher Cumbey, Bldg. 26-1, whose idea resulted in salvaging paper cartons. Anna Ivetich, Decatur, received an award of $20.00 for suggesting improvements at contact of welding machines.

Other awards ranging from $5.00 to $15.00 were made to the following employees:

Donald B. Poland, Bldg. 26-3; Lula Mae Kline, Bldg. 4-4; William R. Kizer, Bldg. 4-4; Robert J. Arnett, Bldg. 4-4; Dorothy A. Jensen, Bldg. 4-4; Clair A. Wiebke, Bldg. 26-B; Edmund A. Klausing, Bldg. 4-4; Ernest J. Cutter, Bldg. 4-4; Homer S. Hahn, Decatur; Raymond S. Feller, Bldg. 26-2.

Leona L. Scheumann, Bldg. 4-3; Gerald C. Holdgrave, Bldg. 17-4; John A. Baumann, Decatur; Hans W. Moehle, Bldg. 26-2; Max H. Farrell, Bldg. 4-3; Albert N. Gallmeier, Bldg. 4-6; Raymond Saul, Bldg. 4-3; Ruth J. Lauer, Bldg. 4-3; E. H. Leitz, Bldg. 26-2; Chas. Strong, Bldg. 6-1.

E. Close, Bldg. 4-3; Wm. J. Hunt, Decatur; Ray Ankenbruck, Bldg. 4-2; Vernon A. Keesler, Bldg. 4-3; Ray F. Bowers, Bldg. 17-2; Emma Reiling, Bldg. 17-4; R. Ecenbarger, Bldg. 4-3; Harold Camp, Bldg. 4-3; Ida F. Sinn, Bldg. 17-2; Russell L.

New Automatic Toaster Has Silent Timer; New Styling

A greatly simplified and silent timing device and new exterior styling are incorporated in a new automatic toaster announced by the General Electric Company.

Externally, the toaster is entirely new in appearance and design, and there is a choice of three colors in the Textolite base which is brought up high on the sides to form part of the outside structure.

Replacing the old ticking clock timer is a silent thermal timer, a greatly simplified mechanism with no moving parts, nothing to wear out, and requiring no oiling. The only sound heard is a slight click about half a minute before the end of the toasting cycle. The operating lever which lowers the toasting racks into the toaster pushes down and releases with a minimum of effort.

The simple but graceful lines of the toaster are enhanced by a turret top type of shell. A one-piece drawn shell is used for the first time on a toaster. The shell is etched with a regency motif. Brought up high on the sides, the Textolite base becomes more than a mere footing or ornament and offers a color choice of black, mottled brown or cream.

Make First Shipment Of Latest Product

To most of us 3:00 o'clock Monday afternoon was just that—3:00 o'clock Monday afternoon. But the time and date will always remain in the memory of employees of our youngest department, the Magneto Department for at that time the first shipment of magnetos passed inspection and were on their way to the Shipping Department, on schedule and with all requirements fulfilled even though a few short months ago there were no designs, no machines in fact nothing but the potential capabilities of people in our organization to build anything and everything in the electrical line that may be required of us.

Magnetos to many of us, including the writer, merely represented a name of some electrical object, but after a visit to the new Magneto Department the word assumes definite proportions of something very important. A magneto may well be likened in the operation of a gasoline motor to the heart in the human body. It supplies the spark that keeps the motor humming and when it fails the motor stops.

Ordinarily this would be of no particular consequence but the magnetos we are manufacturing are built for airplanes—airplanes constructed for the defense of our country. Failure might mean the loss of life as well as the destruction of the plane, and that is why our new department requires more precision work than any department in the Fort Wayne Works. Limits of three tenths of a thousandths are not uncommon in the manufacture of magnetos. In fact so rigid are the requirements that an even temperature is maintained at all times in certain quarters of the department to insure that materials and tools are not affected.

Of outstanding interest in our new department is, what is termed, an "iron lung". Magnetos are tested in the "iron lung" under exactly the same conditions they will be subjected to when in service. Atmospheric pressure is applied while the tester watches an altitude meter. Temperature is varied and humidity is supplied by a fan blowing

Construction Of Two Plants Is Announced

New Buildings For Turbines And Reduction Gears At Erie And Lynn

Plans for the construction of two new plants for the manufacture of propulsion equipment for merchant ships have been announced by Charles E. Wilson, president of the General Electric Company. The plants, doing related work, will be situated in Erie, Pa., and Lynn, Mass., and will be financed by the Defense Plant Corporation under a lease agreement at a total cost of between twenty and twenty-five million dollars.

Turbines will be manufactured in the Erie plant and reduction gears in the Lynn plant. The Erie plant is scheduled to produce 100 turbines a year and the Lynn plant 50 gear equipments a year, starting in 1942, under a contract with the Maritime Commission.

The work of the two plants, because of the immediate and vital need for more merchant shipping, was characterized as a tremendously important part of the defense program by C. H. Lang, chairman of the G-E Defense Planning Committee which began functioning in May, 1940. The turbines will be for the Maritime Commission's C-2 and C-3 cargo vessels.

The larger of the two plants will be in Erie. Together they will add some 475,000 square feet of floor space for defense manufacture and will employ a total of about 2000 persons. They are in addition to space already used for the manu-

Home Cooling Units At Employees' Store

Home cooling units, a product of the Company are available through the Employees' Stores. These units are scientific in design and are planned as an economical way of cooling and circulating air during the summer months. There are types available for home owners and home renters and there are five different sizes. Complete details are obtainable in the Employees' Stores.

NOTICE

United States Defense Savings Bonds and Defense Postal Savings Stamps may be purchased for cash at any time at the Payroll department.

• Our Blueprint

For 165 years we have lived in a land free from tyranny. We have ably governed ourselves and no one man has had the complete power to tell us what to do. Our system of government, with its checks and balances has stood the test of time . . . despite all its critics may have to say about it.

We are now engaged in a great effort to make doubly sure that this land of ours remains free from tyranny. We were slow to believe that the world could change as it has within the all too recent months. We were slow to believe that the instruments we designed and built as free men would ever be used for the terrible purposes we have seen and are seeing them used for. These tools, the airplane, the telephone, the radio, the automobile and all the rest, we chose to use for peaceful means. But . . . we too know their other uses and we now prepare to use them as the times indicate.

But with all this before us . . . our plan of 165 years ago as expressed in the Declaration of Independence remains unchanged. We still believe in freedom of speech, freedom of religion, freedom from fear and freedom from want. That's why we are Americans . . . still the freest people on earth!

"There is a great moving power in keeping on learning about what you are doing."—*Dr. Thos. Tapper.*

• Sound Foundation

Suppose a group of carpenters were building a house that looked as though it was going to be a pretty good finished job, and suddenly someone came along and said: "They forgot the foundation."

You wouldn't be much impressed with the idea of buying the house, would you?

Well, not alone is our defense program beginning to look like a real edifice—in the years before it was started, industry was preparing a good foundation for it!

The fact of that can be established by looking at the way industry, in spite of a period of depression, made a better record for itself in 1940 than it had in prosperous 1929.

A series of charts in *Modern Industry* magazine point out this record of progress:

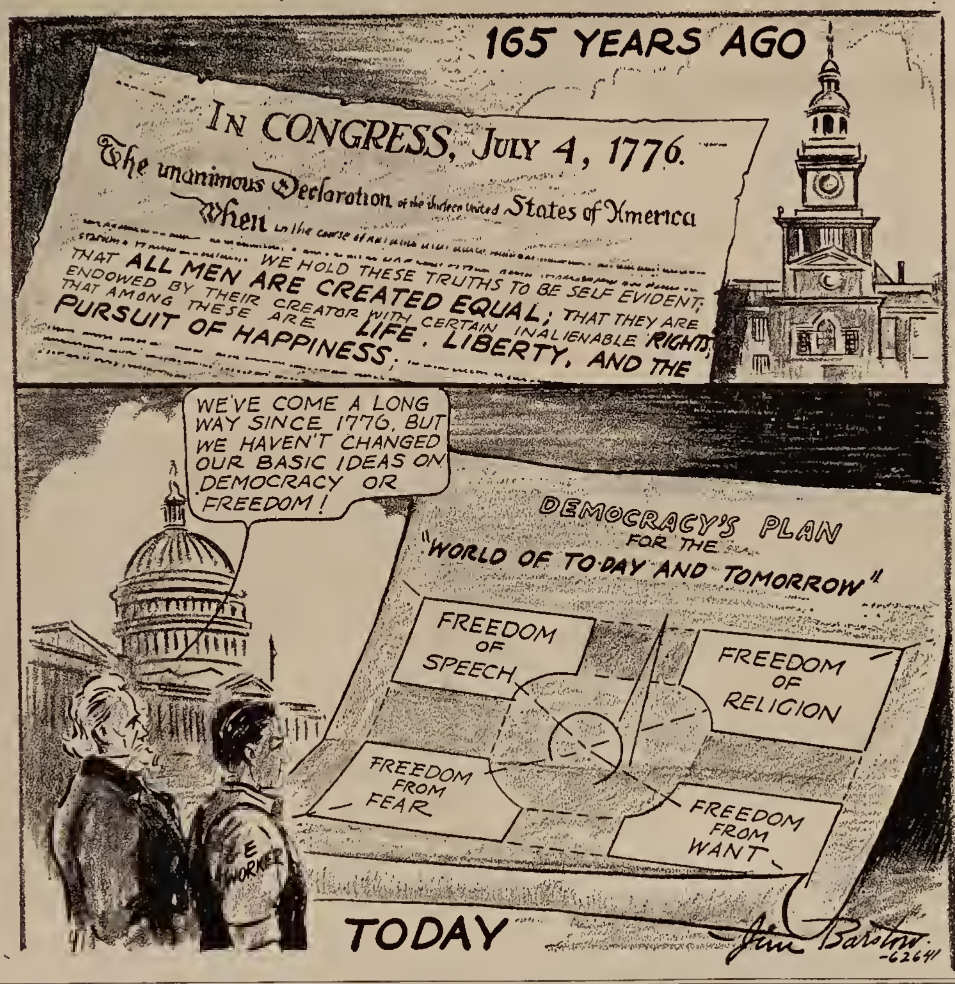
In 1940, America's consumers got more goods than in 1929 and paid less for them; labor worked fewer hours, and got more real pay. And this was accomplished hand-in-hand with increased output per man-hour—more goods produced by one man working one hour—which seems to be the secret for distributing the benefits of industrial production more widely! The only way in which the later year suffers by comparison is in the matter of industrial earnings, which were considerably lower than in 1929.

In 1940, *Modern Industry* further reminds us, government was getting far more in taxes than in 1929.

It is surely encouraging to know that we have this sound industrial foundation, this record of progress, upon which, in this time of exceptional national need, we can and must build the greatest "house" of production in all our national history!

"The conscientious plodder is nearly always outdistanced by the fellow who stops occasionally to analyze and plan."—*W. J. Cameron.*

OUR BLUEPRINT-THEN AND NOW



165 YEARS AGO
IN CONGRESS, JULY 4, 1776.
The unanimous Declaration of the thirteen united States of America
When in the course of human events
WE HOLD THESE TRUTHS TO BE SELF EVIDENT; THAT ALL MEN ARE CREATED EQUAL; THAT THEY ARE ENDOWED BY THEIR CREATOR WITH CERTAIN INALIENABLE RIGHTS; THAT AMONG THESE ARE LIFE, LIBERTY, AND THE PURSUIT OF HAPPINESS;
WE'VE COME A LONG WAY SINCE 1776, BUT WE HAVEN'T CHANGED OUR BASIC IDEAS ON DEMOCRACY OR FREEDOM!
DEMOCRACY'S PLAN FOR THE "WORLD OF TO-DAY AND TOMORROW"
FREEDOM OF SPEECH
FREEDOM OF RELIGION
FREEDOM FROM FEAR
FREEDOM FROM WANT
G-E WORKER
TODAY

Construction

(Continued from Page 1)

facture of turbines in Erie and Schenectady for Navy turbines and gears and turbine-electric drives for merchant ships and tankers in Lynn.

With plant expansion already completed or under construction, the new plants will make a total of 2,675,000 square feet of floor space for expansion of General Electric's production. This expansion is more than one-third of the former size of the main G-E plant in Schenectady, N. Y., known as the "world's largest electrical workshop." The greatest expansion is taking place in Schenectady itself, where 830,000 square feet of floor space will have been added to the former 6,500,000 square feet.

Rats Are X-Rayed To Check Vitamin D Content In Food

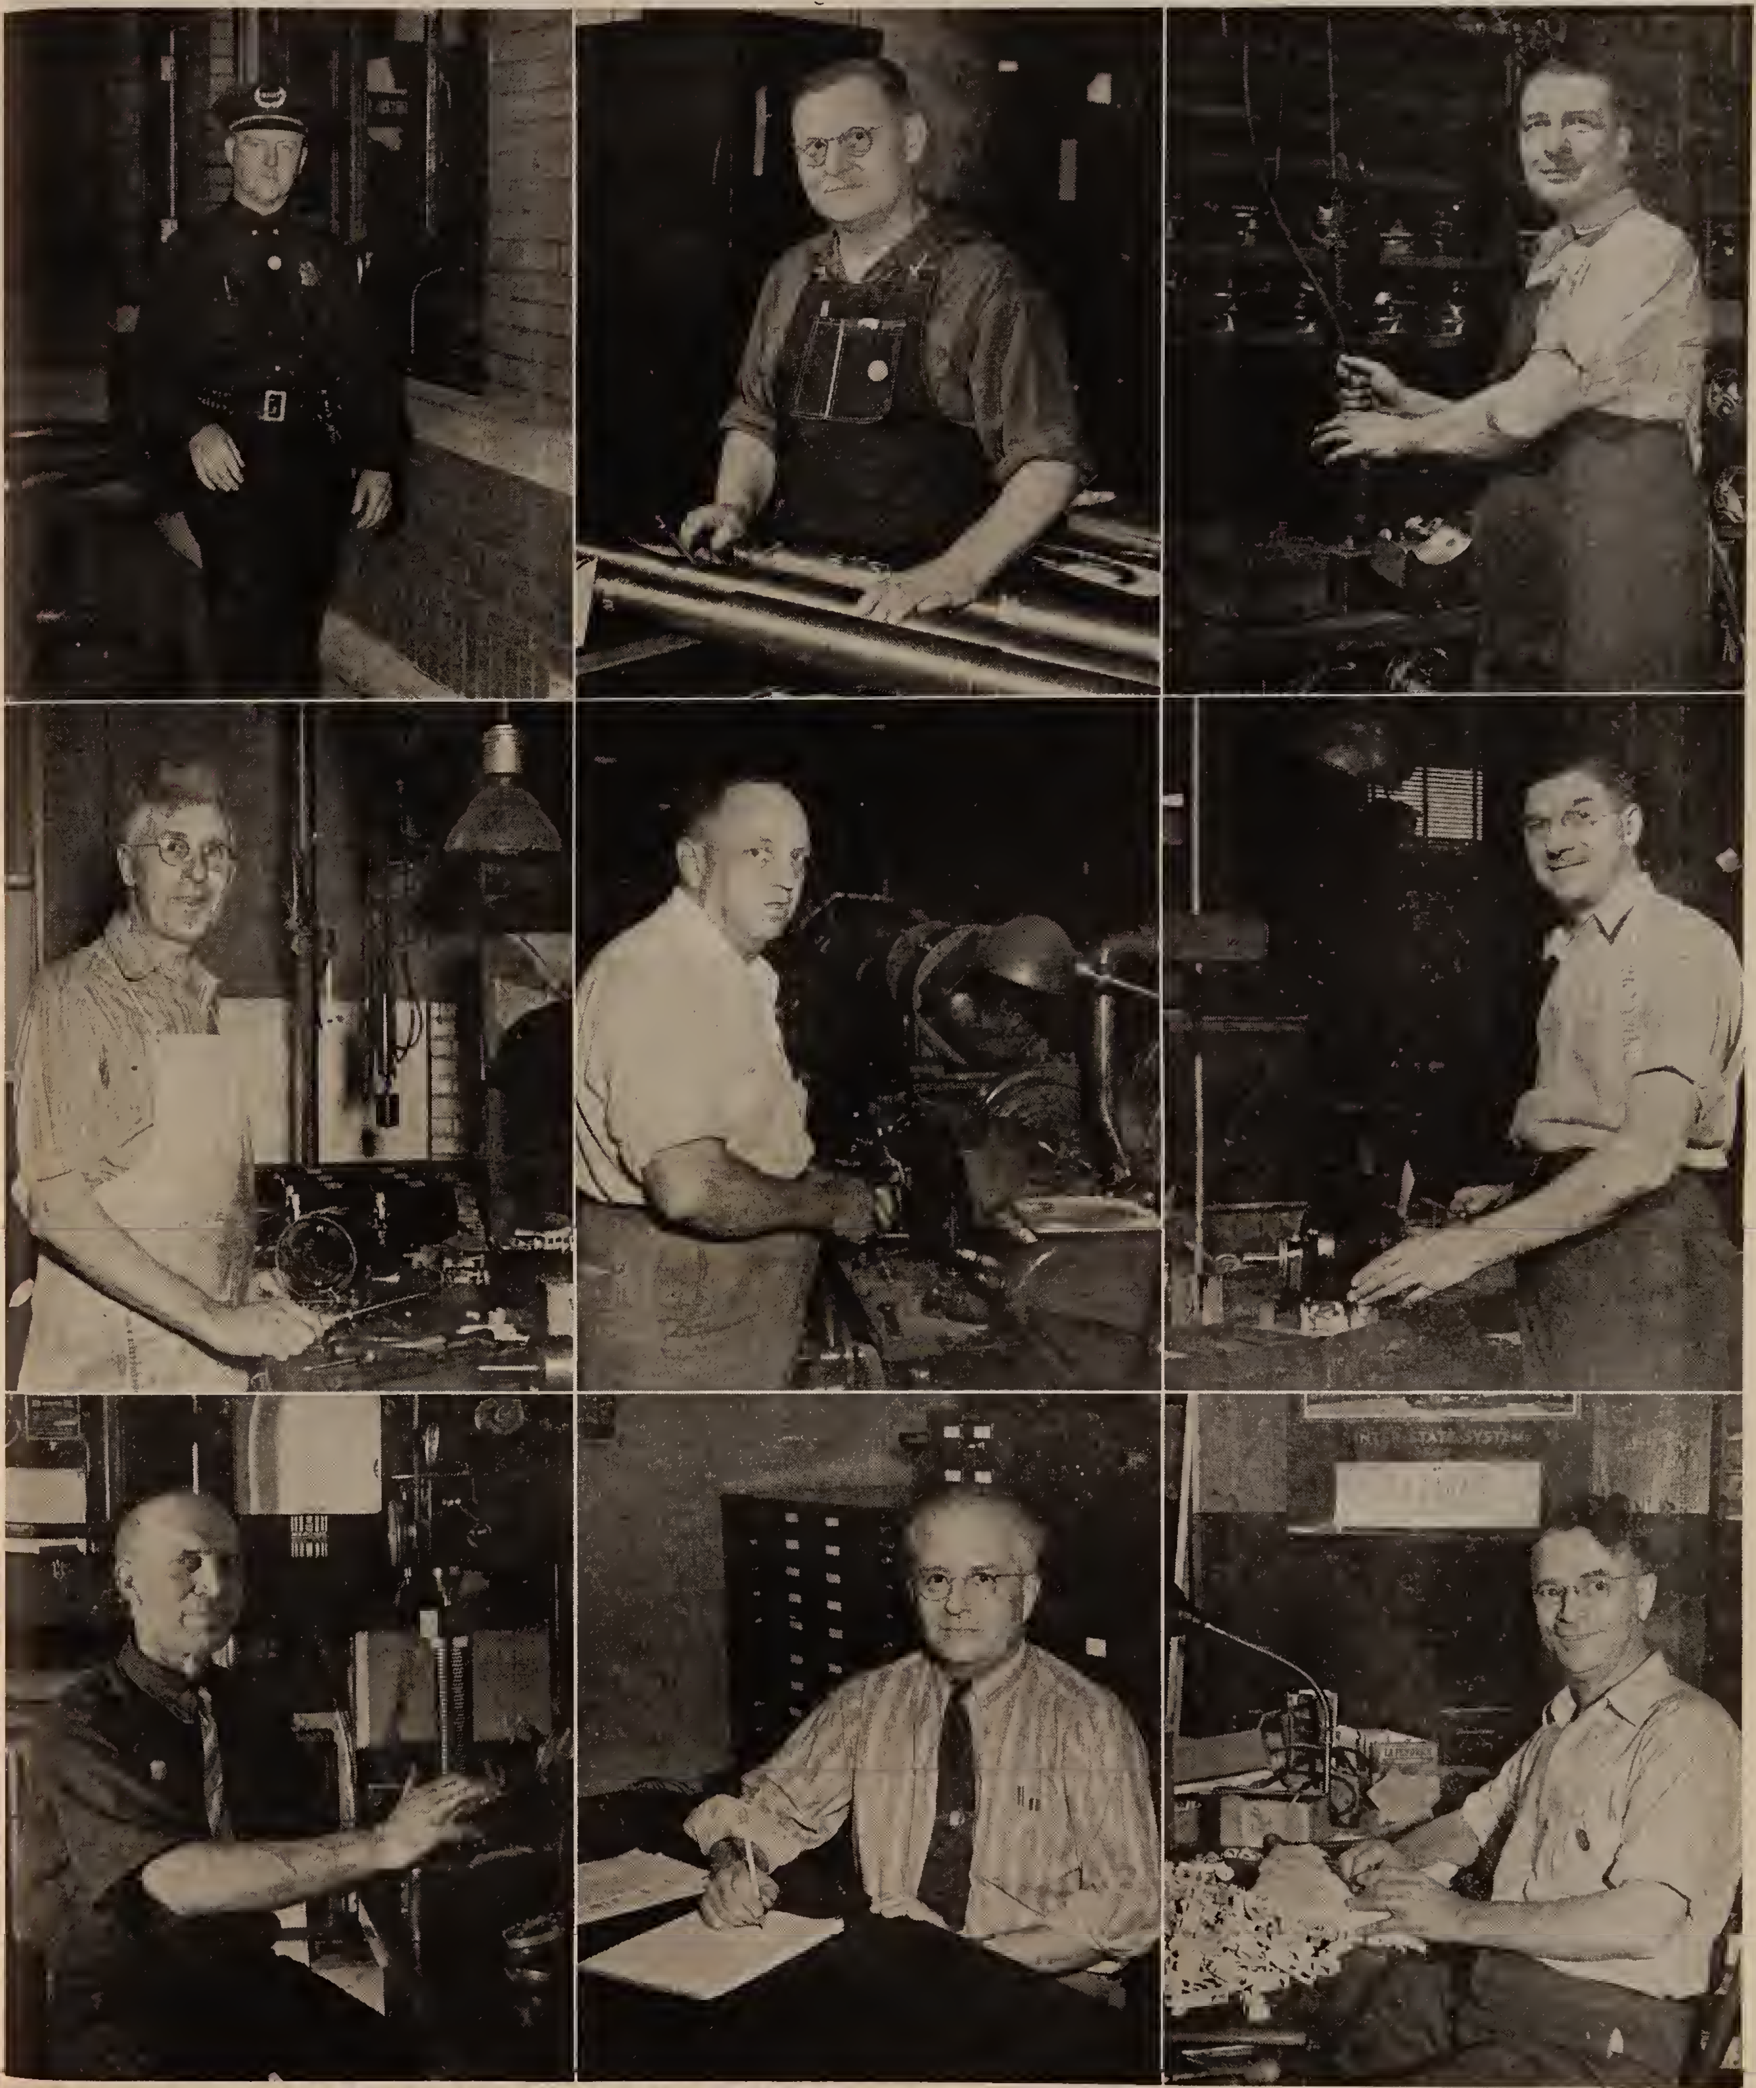
Rats are X-rayed as a step in making Vitamin D determinations of food and pharmaceuticals at the Vitamin Technology Laboratory, headed by Dr. Howard J. Cannon, Chicago. Special midget equipment is used.

Lack of Vitamin D causes the disease of rickets, symptoms of which are deformed bones, particularly enlarged ends of bones. The apparatus permits quick detection by X-ray of these developments in rats under observation.

The apparatus, designed by the General Electric X-Ray Corporation, is mounted in a lead-lined case on a bracket which holds the special fluoroscopic viewing tunnel in exact alignment with a small X-ray tube. Between the cabinet and the fluoroscopic screen, there is just enough room for a rat to be held in position for a periodic examination. Lead shields protect the operator.

The fact that rats eat the same sort of food as humans, as well as their small size and rapid growth, make the animals particularly suited for research of this kind.

A Quarter Century Of Service With The General Electric



Nine new members are added to the steadily increasing ranks of the Quarter Century Club. The newest members pictured above are—top row, left to right: Harry Feaser, Plant Protection Department; Elmer J. Warner, Bldg. 19-3, and Orval J. Stanton, Bldg. 4-3. Second row: Charles E. Trey, Bldg. 4-5; Clarence Hatfield, Bldg. 4-3 and Fred H. Schultz, Bldg. 4-2. Bottom row: Bernard C. Weber, Bldg. 26-5; Dorsey Merchant, Bldg. 26-2, and James J. Valentine, Bldg. 19-3.

Magneto Production

(Continued from Page 1)

across a pan of water. In the meanwhile vibration is also closely being watched. When the magneto leaves the "iron lung" it has passed every chore that will be required of it when in actual operation in a plane. There are, of course, dozens of other tests, but all of them aimed at one thing and one thing only—"reliability"—the right for the instrument to carry the G-E monogram.

The possibility of our manufacturing magnetos at the Fort Wayne Works was first announced in November, 1940. Ralph Dennison, now superintendent of the Department was placed in charge of planning and Elmer Davidson in charge of machine tools. Elmer Auman, now general foreman, was placed in charge of planning and purchase of tools and equipment and James Woodward, from the Schenectady Works Aeronautic and Marine Division was assigned to the engineering job. Howard Timms, of the Fort Wayne Works was appointed as assistant in the engineering department and Harold Kroeger was placed in charge of production supervising, with Oscar Meyer as assistant in procurement work and detail planning. Other early members of the department are Wilbur Stocks, Mort Pugh and Bervilles Schuler.

The pioneer staff functioned in an office in Bldg. 16-3 until the middle of March of this year when quarters were established in Bldg. 6-4 where the department is now operating. As equipment arrived, manufacturing personnel was added until at the present time two shifts are in operation. Starting from scratch, it is a credit to the department that up to date all commitments have been met as per schedule.

It is, of course, impossible to give a detailed description of our youngest department but pictures on pages 4 and 5 of this issue of the WORKS NEWS will give some idea of the nature of the work performed.

NEWS THROUGH THE PLANTS

From The Feminine Viewpoint

By Irene Perry and Hilda Barthold

We once heard of a man whose philosphy of life was, "If you can't be cheerful, be as cheerful as you can," and this seems to be a good motto to adopt for the hot weather, that is, if you can't be cool, be as cool as possible.

With this idea in mind we've been searching for ideas for looking and feeling cool during these summer days and nights. Of course, a bath is practically the most cooling thing there is, and there are several extras which add to the effectiveness of a bath as a cooler-offer. A mildly warm bath is better for cooling than an extremely hot or cold one; pine-scented bath salts or oil are soothing and their woodsy smell help to create an illusion of freshness. Don't follow the bath by a brisk rubbing with a towel and cologne slapped on; a gentle patting or blotting method is better and spray the cologne or toilet water on. Finish off with your favorite dusting powder. Did you know there is a difference between body powder and talcum powder? We didn't until we read it in a favorite magazine; body powder clings while talcum is made to disappear quickly.

The cooler you appear, really the cooler you feel, so let's keep the deep red lipsticks, likewise the dark nail polish for the rest of the year and experiment with the softer tints for the summer. Clever women have long since recognized that perfumes in light floral odors, either single flower or blends, are more appropriate for summer use than the heavy scents.

Cologne is not expensive and may be secured in endless variety of perfume, so use it freely. A bit of cotton dampened with cologne rubbed along the hairline removes any makeup that has gotten out of bounds; sprayed into the crown of a hat, or rubbed along the inner band, sprayed lightly on gloves, stockings, or into shoes, all these help in the cause of summer well-being.

—Hilda.

Personal Mention

Congratulations to Gordon Smith, our new boss in Bldg. 19-4. . . . A dinner party was held last Thursday noon at the 113 honoring Fern Brown, who is leaving our Company. . . . Does anyone know why fire departments are red? Just ask Olive Coovert, but be prepared to stay all day. . . . Louise Sinn can't decide whether Mickey Mouse is a cat or a dog.

Anyone who knows what a "gliding stop" is, please get the information to Gerry Foerster, Bldg. 16-3. In exchange for said information he will tell you how to fix things up with these men in uniforms who work for the state.

Neal Hench has the unique distinction of finding it difficult not only to get to work but to leave. Neal had a little button trouble and couldn't get to work on the original trip. After he got to work he couldn't leave because the elevator stuck and kept him a prisoner for half hour. Bet the fellow he was going to meet at the Fairfield Avenue gate got tired.

Motor Generator Static

It's a gyp—or is it? Why doesn't someone tell Bill Grover these things. Bill, as you know, is one of the most innocent individuals in so far as playing practical jokes or taking advantage of them. So, when Maynard Spade remarked, "Bill, gimme a nickel," our hero dug deep into his pocket and pulled forth the requested coin without question or argument. But when Maynard handed Bill a piece of cake in return for the money Bill's indignation arose. He didn't like cake, the cake wasn't very good, he had been betrayed, etc., etc. His laments were finally stilled when Maynard sent Bill an express money order for five cents.

Jimerson Creek News: While fishing last week-end we were amazed to see what we took to be two Indians paddling along in a canoe and singing the old Indian canoe song. After watching them awhile we were startled to see the two braves start manipulating fly rods, and then of course, we knew they were not Indians. After a few casts the lines became entangled and during the argument that followed we rushed to the scene only to find George Clancy and Charles Strodel of Bldg. 19-3 trying to fish from Chauncey's new canoe.

Anticipation: Frank Archbold claims that his name has appeared in the WORKS NEWS so often of late that when he brings home the paper, the kids just gaze at him and murmur, "What page is it on Pop?" Pappy remarks, "Why do I always do things that warrant publication?"

Dog Daze: Harold Federspiel, Bldg. 19-3, has pulled the unexpected. Authentic reports are that Harold has rigged up some sort of air conditioning system in his car trunk so that his pooch, Patricia Marie, may ride in comfort these hot days. Some dogs have all the luck.

Stuart Head of Bldg. 19-1 sure takes all the gold medals when it comes to fishing. Stuart just returned from a week's vacation at Lake George. He was advised, before taking a cottage, that Lake George should be drained, plowed up, and planted in corn; but Stuart proved to the world that that would be the wrong thing to do, for when he wanted some two to four pound bass he could go out any time and bring in his limit. He had eye-witnesses to show he could do it, too. He had plenty of fish to give to the neighbors and all his friends who came up to visit him.

Mr. Head made quite a hit with all the neighbors, for he not only proved to be a real good all-around sport, he was also accommodating and very observing. In one case a lady fell and broke her arm, and it was Mr. Head who was the first one to jump in his car and rush her to the doctor.

In another case, he raised the lid of the live box of one of his neighbor's boat—please don't misjudge him for this was merely an inspection tour. Here he found that his neighbor, who had gone and wasn't to return for a few days, had left several bait with pork chunk and slice on them in a can of water. Thinking the bait would spoil in the water, he told his neighbor's wife that her husband was getting reckless with his fishing tackle and that they had better hang the bait up to dry until he came back, which they did. Well, outside of the pork being baked to a crisp, the rest of the bait was still intact.

All we can say is, even though the pork was well done, Stuart's intentions were very good.

Borings From 4-4 Office

It certainly is cool right now after a luke warm coke, so feel right pert to go along in this hot sultry day—just too hot.

Vacations are in full swing this week, especially over the 4th of July. LaVon Price is going to Adams Lake to do a little fishing and swimming. She also wants to get a nice sunburn on her legs so she can wear bobby socks. Some excuse. 'Tis better than none at all.

Virginia Sanders is spending part of this week at the lake and then the week-end she is going to jaunt up to Chi.

Betty Mougin is going to spend the 4th in Detroit. Perhaps she will look up Boit and his skoit gait who works in the shirt factory.

Ewald Stinsmuehlen spent last week-end in his back yard trying to get a tan so that when he goes to the lake this week he won't look so anemic.

Pauline Young will be found in Watertown, N. Y. You see that is the closest city to Camp Pine. By the way did you know he is now a first-class private. Before long our Johnny will be a sergeant. From what I heard last week he got a product of the G. E. It was the most beautiful picture frame, of course, there was a picture too but that doesn't count.

Doris Roe entertained the girls at a steak bake last Thursday evening in her back yard. With the aid of Neal Hench, Bldg. 4-6, the party was a success. I came to the conclusion that all the girls are jitterbugs and Doris' house was just about wrecked before the party broke up. Thanks to Virginia Plummer, Wilma Robb and Marge Brown, the party was wonderful. The ping pong champs are Mary Hakes and Evey Meyers, and Esther Allar is the champion eater. Ha.

Carl Alter, Bldg. 19-5's bridegroom has left for a year's service. We hope he doesn't have trouble with his feet.

Carl Reitdorf, Bldg. 19-5, has a new paint job on that old worn-out buggy of his. He must have hit something for it seems to ride lower and looks longer.

Huey Meyers, Bldg. 19-5, is in the market for a cheap saddle. Either Western or English will do.

Ray Fisher, Bldg. 26-2, set up the candy for the girls. They thought it was something real important but discovered that it only celebrated the arrival of a new calf at the Fisher estate.

Sylvester McBride, Bldg. 26-2, admits he knows when he leaves the brakes on his car but he can't tell when a wheel is off of the wagon he is pulling. Yes, it was loaded too. What a man. What strength.

At least Loretta Bloom, Bldg. 26-2, follows her own advice. She recommended a certain anti-sunburn preparation to the girls. Loretta came back with a burn as did Velma Meads, Stephany Hilker and Bertha Gruber.

BOOM
SNAP
SNAP
GETTING A BANG OUT OF A SANE FOURTH IS A SNAP FOR A SCOTSMAN

26-5 Tool Bits

Frank Prezbindowski, trying to decide between buying a battery for his car or driving the tractor to work, was definitely aided in his decision by the person driving the tractor. He bought a battery. . . . Adeline Meyer is among our brides. Married June 29 at the Concordia Lutheran church. . . . Roscoe Platt after missing the 5:03 bus home is making plans to install a pole like they have in fire houses so that he can get downstairs in time. . . . Henry Wittber has the keenest eyes. When he sees lightning strike in the offing he can pick the lightning rod involved. (Don't tell Henry but the pole involved was a light pole two blocks off.) . . . Claude Kelly got his Gee and Haws mixed after leaving the drinking fountain. Of course it was embarrassing. . . . John Chuckhart rushed to the dentist and indicated the tooth he definitely wanted yanked out. Two days later he went back and humbly asked the dentist to pull the right one which was some spaces over to the left. . . . George Skinnell found that generosity pays. Dave Lewis took up a collection for him and gathered ten pennies from well wishers. . . . We have just learned that this was not Christ Kaiser's first trip to California. Confidentially the first one was his honeymoon. . . . What was this Doris Windhorst presented to Christ Kaiser? Could it have been a "wishing you a good trip" present from Art Thieme's group. . . .

The gang from Aircraft enjoyed a little celebration last Friday at Elmer Fritz's cottage at Rome City. The fishermen reported many bites but no fish. Jim Mitchell says the mosquitoes even carried landing lights. Clarence Mussell collected sixty-three pennies while learning to play the game. Others present were Frank Fann, Mike Schmidt, Mike Lowe, Hilbert Nahrwald, Al Rondot, Paul Berlien, Orval Doherty, and of course the host. Mike Lowe shows his ability as an oarsman by pulling the boat through a patch of weeds in three strokes. No kidding.

Sunbeams From 17-4

Well, well, the old fish stories are flying thick and fast, but it takes Claude Birely to tell them and make them stick.

After getting Mabel Murray out of bed to listen to a radio program, Beryl Kolkman decided it wasn't such a good one at that, and promptly went back to bed.

Button, button, who's got my shoes, LaDonna Ayers, Clara Gehring and Helen Maxon were nearly in a frenzy the other day when they couldn't find theirs, but after much distress they found them, scrambled in a heap.

The girls of the department honored Beth Garman Menshy with a bridal shower at the home of Mrs. Flora Smith; the new bride received many lovely gifts, those present were Helen Klotz, Helen Krauss, Doris Hauter, Ruth Lemert, Irma Frosch, Margaret Fechner, Dorothy Gardner, Dorothy Kintz, Wilma Bailey, Ilene Menshy, Betty Garman, Barbara Garman, Irma Shankster, Gladys Balliet, Eleanor Brown, Belle Buchan and the hostess, Mrs. Smith.

Thought for the week: A man should never be ashamed to own he has been in the wrong, which is but saying, in other words, that he is wiser today than he was yesterday. —Pope.

Granny.

They laughed when he sat down—they didn't know the firecracker under the chair would set off the ones in his hip pocket.

Now, that wasn't my cousin Colin. In the first place, ye never saw him with anything so dangerous—or unnecessarily oxpensive, in his pocket. And even if he did shoot off firecrackers, ye'd never see him with more than one at a time. He'd never risk shooting up a whole bunch—and a pair o' pants—at one sitting.

Weel, ye ken how I start writing about any subject under the sun—and end up with "Cost Reduction", so ye can well guess that Independence Day in this Land o' the FREE is no exception. And speaking o' cost reduction, the elimination o' firecrackers in Indiana is gude news tae ony Scotsman. It isn't the ten cents for "lady fingers" but the arms, legs, and eyes that he's always wanted tae save.

Ah, yus, cost reduction means more than just money. It takes a lot o' the filthy stuff (ye call it filthy, but my relatives should call it musty) to make up for one eye or arm, not tae mention the hospital bill ye swap for it.

Another thing I like about these modern Fourth's is that there are sae mony community fireworks displays. In no other way could ye have sae many people enjoy the same fireworks.

"Hoot mon", said Cousin Colin the other day, "I wish the international date line passed between Fort Wayne and Columbia City, so I could take in the displays o' both. Ah yus, there's nothing I like better than tae celebrate the Independence Day o' a FREE country wi' the same kind o' fireworks."

Thisa And Thata 19-5

Well all of our brides have returned. Congratulations to Janice Thrush who now goes by the name of Mrs. Theodore Deck and Rosalie Lauer who is Mrs. Paul Vogeding. . . . By the looks of Avinell Gailey's coat of tan she must have done quite a bit of fishing last week while on her vacation. . . . We hope Annabelle Dunlap catches quite a mess of fish this week. . . . And to all the rest who are on their vacations this week, we hope you have a very nice time and not too much sunburn.

19-4 Spot Jottings

On his way to work Wilbur Zook stumbled on the railroad tracks. His pals were amazed the way he scrambled to his feet and made tracks getting off of the tracks. However, it was not due to his peppiness but on account of a fast approaching train. . . . Famous last words—"Herb, I need a box of collars", Mae Lambright. . . . Delores Smith did the almost impossible by getting ready the Sunday chicken dinner. She cut three fingers on one hand and two on the other. It is done with mirrors. . . . Josephine Budd is supposed to go to lunch. She was surprised on discovering at 11:45 that she was all alone. Joe recently has her mind on her work or is it because she recently added Mrs. to her name.

Here 'Tis From 17-1

We wonder if our pal "Shookie" is thinking about using his tool box cart in the soap-box derby this year. He was seen using an oil can on all four wheels lately. Surely it couldn't be that he wants to speed up on his trips between jobs. How about it "Shookie?"

A sure sign that hot weather is really here was proven recently by Bernie Gausepohl. Usually, Bernie can take it, but he simply had to remove his tie to keep going the other day. Don't blame you, Bernie, it sure was a scorcher.

We understand that Gale, ace sleuth of Bldg. 17-1, production department has laid aside his dignity by coming to work in a polo shirt the other day. That's OK Gale, comfort first in this kind of weather, or did the Chinaman forget to deliver your other shirt?

Can anyone tell us why "Junior" Crabil came to work in house slippers, then exchanged them for regular work shoes which "Dad" Crabil of Bldg. 17-1 had on? What's wrong boys? Only one pair between you?

Button, button, whose got the button? One thing is sure, Wally McKay, Bldg. 17-1, didn't have it, at least not last Saturday morning. After getting an early start for work, Wally got as far as the G-E gate and not a step further. Reason, NO BUTTON.

We haven't found out yet how Wally got back home as he bummed his way to work in the first place.

Anyone wanting a couple of good used cherry trees for next year, see Henry Wichern of the Screw Machine, Bldg. 17-1. "Heinie" said he picked so many cherries this year for canning that he got, not blue, but red in the face. Why not knock the cherries off with a clothes-prop, Heinie and then scoop them off the ground with a shovel. They'll already be mashed by falling, add a little sugar and you'll have jam.

We were always under the impression that vacation time was for relaxation and rest. But not so with our pal Ernie Barr who spent last week at his cottage at Lake James working pretty hard just in order to save shoe leather and a few steps in the future. Hope it works, Ernie.

Have you noticed the new style head band Ernie Riley is wearing lately? We are all at a loss, not knowing whether it's to keep Ernie's hair out of his eyes or whether the rest of the gang is giving Ernie a headache. Let us know, will you, pal?

Too bad vaudeville isn't the vogue these days. If it was, Jack Leonard and Walter Prince sure could put on a good act singing a duet about "Casey".

We wonder if Fred Reese in the punch press department wouldn't rather have Mike or Pete for his first name. In that way two gentlemen by the name of Ed couldn't claim his chair after removing the letters F and R from Fred which he had printed on the back.

That's It!

Chicago will attract many visitors from Fort Wayne over the Fourth. It seems that Joan Voors, Bldg. 19-3, is going to Chicago to see a certain Bob.

Alberta Bultemeyer, Bldg. 19-3, was chairman of the fire committee, but was "Walkin' by the River" but with whom?

Edlen Hutchison, Bldg. 19-3, did a very good job of making lemonade in spite of lack of equipment.

Sleuthing In 4-6

We would like to express the thanks of the office workers to F. C. Duryee and Chief Doehla for the watchman and signs at the parking lot. . . . Guess Wade Tyler must have meant it when he remarked that maybe he would pass candy soon. He has a new car, recently bought a new house, and was overheard asking who a certain girl in a green dress was. For her name see Alice Reuille. . . . We would like to know who won all the money in the game that Cronin, Richard and Schwandt were playing the other day. . . . Charlie "I Can Get it Wholesale" Wilt is in business again. This time the sale is on raincoats. Anyone desiring a good bargain ought to see Charlie. . . . The Drafting and Requisition Engineering Departments certainly feasted again this week as we welcomed back our two most recently married men. Candy and cigars were passed out by our former bachelors "Chris" Flanigan and Wade Phillpot. "Chris" was married to Mary Evelyn Hall of Ossian on June 21st, and Wade was married to Myra Given of Ohio on June 28th. Good luck to both couples and we sincerely hope you will be very happy.

The Sleuth.

The Indiana Dunes State Park has a background of sand mountains but Bldg. 4-6 employees do not go to the state park for sand. Jim Johnson and Wm. Franke furnish plenty of sand. Now we are looking for some one to furnish us a Lake Michigan.

Art Brandenburger, Bldg. 4-3, wandered away from his hog menage at Big Long Lake last Sunday. He finally appeared on the beach at Pretty Lake for a swim. He cannot use the lake in front of his cottage as this is reserved for his porkers. While there he became very much intrigued over a lavendar colored velvet bathing suit. We understand that Art is going to get himself one, also he is considering a contract with one of our famous soap manufacturers whose slogan is "A Skin You Love to Touch."

Harry Bailey, Bldg. 4-3, has us all worried. His gum chewing is becoming terrific. We are afraid we will have to drill and tap his jaws and install oilers to keep them from running hot. His slogan is "The more flanges, the more gum, the faster the chew."

Sam Allmandinger, Bldg. 4-3, tells us that he now is the undisputed admiral of Big Long Lake. He has acquired an old conductor's uniform, a natty yachting cap with a gold eagle on the front of it, and an official admiral's flag. He tells us that he will now show the natives of that vicinity some plain and fancy boat maneuvering on the waters of this lake. He plans to get a small cannon to mount in the prow of his trusty scow, as Sam puts it, to make it look realistic.

Richard "Linseed" Craighead, Bldg. 4-3, was observed wandering aimlessly about on Dayton Avenue the other evening. He has us all guessing as to his motives. Perhaps he is obtaining local color for another of his thrilling novels.

Some time ago you read of the hazardous experiences of Kate Sheaffer, Bldg. 4-3. Well it seems as though her troubles aren't over. Now we suggest a revolving stairway to her basement and attic of garage, a bodyguard so that when she arrives in the heart of the big city in which she lives, and last but not least, not to say "Hello" to peddlers passing her on the streets. If you try all this, Kate, maybe you will have better luck, we hope, but what we all want to know is, did you burn those eggs?

Scenes in Bldg. 4-3: Every day at lunch time, Alma Ladig, with her bottle of Pepsi-Cola, and Frieda Ramm with her bananas.

Famous Last Words:

Marcel Gaut, Bldg. 4-3, "I've got a meeting to go to."

Dorothy Goshorn, Bldg. 4-3, "I'll think."

Alta Rybolt, Bldg. 4-3, "Not a thing."

Herman Hake, Bldg. 4-3, "What ta you want?"

Well if Margaret Woodard, Bldg. 4-3, isn't wearing one of those Hilander hats now.

There seems to be a great number of Bldg. 4-3 employees taking their vacations next week so we, the news reporters of Bldg. 4-3, wish every one a pleasant and safe vacation with plenty of "News" when they return.

Bldg. 4-3 extends their best wishes for a speedy recovery to Margaret Cummins who is a patient at the Lutheran Hospital.

Could it be that Dorothy Goshorn, Bldg. 4-3, was trying to take a shower, or was it just an accident the water spilled.

The dear vicar's wife had just died, and in consequence he wished to be relieved of his duties for the week-end, so he sent the following message to his bishop:

"I regret to inform you that my wife has just died, and I should be obliged if you would send me a substitute for the week-end."

Warning

If you take a trip with Lawrence Schuster, Bldg. 26-2, be sure to keep one foot on the running board at all stops. It is reported that Lawrence drove up for gas and then departed minus one of his passengers.

From Here To There

Dear Girl Upstairs:

Since Gracie Koch's birthday is on the Fourth of July, the girls are going to start the celebration tonight by having a potluck in her honor. The girls who will attend are Esther Remenschneider, Eileen Goeglein, Helen Grunewald, Rosamond Schooley, Helen Wayer, Esther Saylor, Dorothy Hanselman, Ruth Seifert, Lois Burry, Virginia Doty, Anna Bendele, Josephine Balsamo, Geneva Smith, Ruth Hess, Edythe Yoder, Dorothy Bixby, Mary Ellen Heddon. It is hard to figure out whether Grace is so peppy because she was born on the Fourth. . . . Lois Burry has a new angle. She brings the postcards home and delivers them personally because "she just didn't have time to mail them." I hear she got lost again. . . . Just heard a story about Daisy Mae Sweet—it's an old one but a good one. Seems she stuck her head in the oven and scorched her neck. Maybe I'd better ask her why she did it. Do you know?

The Hermit.

Dear Hermit:

With the thermometer registering in the vicinity of 90° in the shade, I take pen in one hand and lemonade in the other and endeavor to tell you the news from good old Bldg. 17-4.

Lois Doyle isn't suffering much from the heat—she is basking in the cool shade of that brand new diamond that adorns her left hand, third finger.

We were all glad to hear that Helen Heiser was getting along so well after her operation and hope to see her soon back at work.

Nick Abbott has been promising to bring me some small red "turnips" from his garden for a couple of weeks now, but the nearest I have come to receiving any were some very spicy tasting ones that Irene Miller had—they really had punch behind them.

Helen Klinker sure was excited when I saw her last. She was going to Cincinnati with Grace Koch and Geneva (Sadie) Smith of Bldg. 17-2. I hope it wasn't too hot for the girls to enjoy themselves, for they certainly planned on a good time.

With every one looking forward to a long week-end this week, I expect next week I'll be able to tell you of exciting events that marked our friends' vacations. As for me, I'm going to Michigan where it's cool and enjoy the breeze!

The Girl From Upstairs.

Swinging The Hickory

By PAUL SCHWEHN, Bldg. 4-3

Here are a few highlights in the inter-department softball tourney which is played every Wednesday night at the General Electric's Taylor street diamonds.

Hundreds of cars and bleacher fans gather 'round the old ball park to join in the yelling for their favorite teams at 6:30 every Wednesday.

Amusing incidents occur nightly, such as Garton, the catcher for the Apprentice ten, who squatted a mite too low and ripped the seat of his trotters (pants to the men and trousers to the ladies) making a hasty exit and breaking all existing dash records.

The decisions for the last week teams gave the Small Motors Office a decided walk-away from the Messengers with a tally of ten to two. The West Side diamondmen were nosed out by the Apprentices with the count of six to five, while the Sleepy Stators barely nosed out the Winter street softballers with a score of 15 to 14.

In the Messenger, Small Motor game the page boys got an early lead in the first inning by tallying two runs against the one run for the chug-chug boys.

After one run had been scored in the second inning, the put-put lads loaded the bases and then left the rest up to Scherer. Not being one to disappoint the boys, Scherer slapped a home run making it five runs for the inning.

Try as they would the Messy boys could not add a single tally to the first inning spurt. However, the put-put ballers garnered four more tallies, two being accounted for by a homer from Huth.

Dahman, the winning hurler, struck out five and walked two with Daley doing the receiving. Boehm, the losing pitcher struck out five and walked six with Madden behind the bat.

Small Motor Office	150 040 x
Messengers	200 000 0

Good fielding exhibited itself in the West Side-Apprentice game last Wednesday when the Westerners bore down in the sixth to garner two runs and give able fielding in the seventh to hold their one run margin.

Strikeouts and walks were kept at a minimum as the hurlers pitched consistent ball. The pitchers were ably assisted by the retrievers of the grown-up baseball gone soft.

West Side	011 102 0
Apprentices	200 310 x

A phenomena occurred in the game of Sleepy Stators versus Winter street. The only two strikeouts in the entire ball game were evenly divided.

Augsburger, the first batter up in the lineup for the Sleepy Stators, and also the first to step to the plate in the game was struck out by Dawson.

B. Walden, last man to bat for the Winter Streeters and last batter for the game was struck out by Fisher.

The Winter Street softballers garnered four runs in the first inning while the Sleepy Stators began to rouse themselvs out of the arms of Morpheus.

In the second inning the Rip Van Winkle team had slept its sleep and came to the plate to bat the round and account for ten tallies.

Not to be outdone the South Anthony diamondmen also batted the round, bringing in eight runs.

NEWS THROUGH THE PLANTS

(Continued from Page 7)

Station 6-B Reports That:

The "love bug" seems to have bitten two of our Bldg. 6-B members of the fair sex. We wonder why Luella "Dimples" Archbold tried to hide her new diamond under her handkerchief and why Ruth Jimmerson wore hers on her right hand for a while? The girls certainly are modest! Who is going to be the next victim of the "love bug"? . . . Here is a little tip on how to get in the good graces of Howard Brooks. Just bring him some gum drops as he admits they are his favorite candy . . . "Bert" Herman is one of Bldg. 6-B's well-dressed men since he wears that straw hat to work. . . . Evidently Jim Johnson enjoys chewing gum and believes in getting his money's worth. While standing in line at the cafeteria Jim chews hard and fast and never discards his gum until the last minute. I'll bet he used to park his gum on the bedpost when he was young! . . . "Bonnie" Gorrell really was fit to be tied after her experience in the cage recently. We thought she was just practicing so that she might join a circus as a side-show attraction. . . . Ray "Grandpa" Eberly says that he has a good reason for his hunched position and it isn't age. See Ray for details of that reason. . . . From all appearances Martha Fogwell's husband won't be hen-pecked as Martha is willing to go out to the parking lot to meet him instead of making him drive around front after her the way her father does! . . . Bob Nible seems to enjoy playing pick-up alone. . . Virgil "Frenchy" Bon Jure finally kept his promise and brought the girls a large bunch of bananas the other day. We wonder if he thinks the saying, "The way to a man's heart is through his stomach" holds true in regard to women? . . . Carl Steinbacher doesn't talk much since his recent marriage and we wonder whether it is because he has discovered that "silence is golden" . . . Lora Haifley, the Belle of Ossian, has been having nightmares lately. We wonder if too much square dancing during this hot weather may not be the cause of it! . . . Station 6-B signing off.

G-E Shoe Tossers Now In The Lead

In the matches played last Thursday night in the Y.M.C.A. Industrial Horseshoe league the G-E Club won over the Pennsy to the tune of 10 to 6 and International defeated Zollners 11 to 4.

League standings now are:

	Won	Lost
G-E Club	23	9
Pennsy	20	12
Harvester	15	17
Zollner	6	26

It is anticipated that the G-E Club team should have little trouble with its last game of the first round with Zollners and there is every probability that the Club will come out the winner of the first round.

The standings of the G-E Club pitchers are as follows:

	Won	Lost
George Hahn	8	0
W. Rietdorf	6	2
Jules Cochoit	4	3
Jack Binkley	2	1
H. Hartman	3	3
	23	9

Winter Street News

Every time Ann Adams reaches for a control these days, she gets a little nervous since she found a 1-inch long mouse in the container. She finally got help to remove the "monster" only to have June Fisher decide to make a pet of it. After getting a small box with a screen and the necessary water and eats she felt so sorry for it she released it in a field at noon. Be careful, Ann, it may be back.

Ray Klotz just got back from his vacation trip to Florida, and he being an ardent fisherman, we were all set for some wonderful fish stories, but all he told us was how big the roasting ears were, what lovely water they had and such nice potatoes. Sounds like he went for the eats instead of fish. Anyway he's back safe and sound and on the job.

Yes sir, the heat wave is really on, the indubitable and incontrovertible evidence comes to light when Joe Gruber removes his straw hat and William Mueller removes his suit coat. They both did last week.

Marge Kohlmeyer is back from her vacation, looking fit as a fiddle. Ditto Al Ralston, who went to them thar Kentucky hills. Even the little colored folks singing "My Old Kentucky Home" failed to melt his heart of stone. It's just a graft, he reports.

The planning department held its annual party last week at Frankie. Mason's palatial summer residence at Lake Wawasee. At dinner the table was set with lovely appointments of plenty of baked beans, baked beef and other stuff like that there.

Murray, Norr and White, as usual, went fishing, and as usual were practically skunked. Norr says he got 25 but they were cleaned and iced and nobody saw them. We suspect they were too small to be seen. Some of the boys started a "genteel" poker game in which "red dog" predominated. It seems Mait Smith and Neal Hench were slightly bitten by the above "red dog." Peden and Mueller must have a little training at home on washing and wiping dishes. They were so good at it that all the fellows just sat back and relaxed. It was a pleasure just to watch these two experts and it seems everybody did. We want to thank Frank for the use of his cottage and we are all looking forward to next year's party.

Neal Hench gave a wonderful new excuse for being late when the Winter Street boys picked him up at work last Saturday noon. He was about 30 minutes late and he said the elevator got stuck between floors and he just couldn't get there on time. After considerable razzing it was discovered that he actually was stuck between floors.

Hermetic Office 17-2

Do butterflies prefer blondes, too, or was it the sweet things that Luella Franke was saying that made our new office pet light on the end of her nose? After the screaming reception he got he's probably changed his mind anyway. . . . Amelika (Ernie) Bailey, Hawaiian guitarist, is sponsored every Sunday, but what we want to know is "who sponsors his Monday through Friday broadcast?" . . . Helen Buuck forgot her badge and keys Monday morning, of course the fact she just returned from visiting her B. F. in St. Louis didn't have a thing to do with it. . . . Another crash, and this time George Shoner picks himself off the floor. We think George is O. K. but we aren't so sure about the chair. . . . Karl Geller fixed a stapler but he's sorry now, because when he went to demonstrate his handiwork he ran a staple through his finger. . . . "We Three" went to see Vern Castle and are glad to report he is better and will be back soon, although he and the doctor seem to disagree a little as to just when. . . . Here's what we've been waiting to say! George Langenburg entertained the girls from the office Monday evening. It's the only movie theater in town that serves coke at intermission and ice cream and cake at the end. From now on we believe all his fish stories 'cause he really catches 'em and he proves it, too. Many thanks, George, for a grand evening.

Suzy Sleuth.

IN THE ROUGH

By WALTER SUNIER

Even though Noah Tilman has taken several apoplectic strokes by trying to get material for the factory, he has taken several strokes from his golf score. He had an 84 at Orchard Ridge even with a ball in the pond.

The Motor-Generator crew is back at their game of astonishing the natives with their headgear. Several years ago, Moffatt sallied forth with his helmet and became known as General Bing. Now he sallies forth with a monstrous hat in gaudy colors he bought in Haiti. It was reported at first that he was wearing one of Mrs. Moffatt's hats. Charley Johnson, of the same crew, appeared with one of those headgears that has a strap which allows adjustment for head size. Wallace thinks that he lost through adjustments. Charley had to keep adjusting the head piece. When he made a bad shot his head shrunk and he had to make an adjustment and when he made a good shot his head swelled and he had to readjust.

Solnica shot a smooth 36 in the Golf League last week. His putting was excellent as he had only eleven putts in nine holes. He was hotter than old Sol.

In the Monday Evening Group, the Rough Riders rode over the Turf Toppers, 164 to 183; the Ice Cubes froze out the Divot Diggers, 170 to 174; and the Slapsticks slapped down the Plastics, 188 to 195. The low score was Solnica's 36. Brice Hamilton had a 38 and Bob Hanna had a 40.

In the Tuesday evening group, Bldg. 4-3 butted the Billy Goats, 171 to 186; the Dubs defeated the All Stars, 190 to 194; and the Optimists defeated Bldg. 4-4, 175 to 180. The low scorers were Von Whearly, with a 37 and Ludeman with a 38.

The winner of the first half in the Wednesday Evening Group has not been decided yet because the play-off ended in a tie. In the three-way play-off, the Fluorescents and the Sharpshooters both ended up with 193 and the Hookers with 195. Another play-off will be tried.

In the regular play in the Wednesday Evening Group, the Fluorescents hooked the Hookers, 172 to 181; the Trappers trapped the Apprentices by forfeit; and the Sharpshooters killed the Cro-Flites by forfeit.

G-E Club Takes Game From The Berghoffs

In the best ball played this season the Joe men entertained the fans when they walked away from Berghoff with a tally of eight to three at Memorial park Tuesday night.

Consistent hurling and able support from the fielders gave the Electricians the impetus needed to mount the rungs in the Main Auto Major League.

The Bolenbaucher boys got the ball rolling in the first inning when "Buzz" Romary put the heat on with a high right field fly for a good homer.

A double and triple in the third accounted for two of the maltmen's runs. Good ball handling of fast grounders stopped a possible rally for the beer boys.

The only other run garnered by the Berghoff group was accounted for in the sixth when Schuster caught a fly in left field which allowed the runner on third to tally.

A wild pitch by Krauss to the first baseman in the sixth allowed Huth to gain second after he had accomplished a back flip over Bartel' to avoid a crash. With one away, Schaffer walked. After an easy fly out, the pitcher, Greider, got a two-bagger bringing in Huth and Schaffer. Holmes, lead-off man, got his first hit of the evening, a two bagger which brought in Greider, tying up the ball game.

Winning pitcher—Greider; allowed two singles, two doubles and one triple; hurled three walks and garnered five strike outs with Schaffer doing the receiving. Losing pitcher—MacDonald, allowed five singles, three doubles and two home-runs; struck out twelve and walked eight.

Berghoff	002 001 000
General Electric	100 102 130

Umpires—Cleary at plate; Stewart, 1b, Wolf 3b.

A warm-up game with the Waynedale AA, Inc. diamondmen boosted the Electricians batting average when they swamped the suburb softballers twelve to four Friday night.

It was bingo-night for Huth, Hemsoth and "Wimpy" Stellhorn as they clipped Houser, the losing pitcher, for home runs.

In the fifth, of the seven-inning game, the Sweet men ran rampant when they garnered one single, two doubles and topped it off with two homers.

The show was on in the seventh, when Joe Bolenbaucher, manager, took the mound amid shouts of "let 'er go" with "Wimpy's" brother on the receiving end. Joe gave the dust weary G boys a workout when he allowed two walks and the same number of hits.

The winning pitchers were Bubb, Nahrwold and Bolenbaucher, with Huber and E. Stellhorn behind the bat. The moundmen for the suburb were Houser and Greider with Denus catching.

Waynedale AA, Inc.	100 010 2
General Electric	004 080 0

Sympathy

Sincere sympathy to Wm. Demsey, Shipping Department in the recent death of his wife.

Employees of Bldgs. 4-B and 6-B extend their sympathies to Gerald Scott in the death of his mother.

Credit Union Purchases $10,000 Of Defense Bonds

Combining patriotism and thrift the Credit Union this week purchased $10,000 worth of United States Defense Bonds. Above Edgar L. Harris, bank representative, delivers the bonds to Lee Cupp, Credit Union treasurer. Others left to right are F. H. Lemper, president; Irene Meyers, director; Ruth Raidy, assistant treasurer and Helen Lemper, Clerk.

Boat Trip To Milwaukee To Be Sponsored By Elex

One Day Excursion Will Be Open To All G-E Employees On Saturday, July 26

A one day excursion to Milwaukee including passage by boat from Chicago to that point is planned by the Elex Club for Saturday, July 26 and is open to all Fort Wayne Works employees. Subject to minor changes, the program has been arranged as follows:

A special train will leave Fort Wayne at 7:00 a. m. arriving in Chicago at 9:45. Taxis will be provided to take the excursionists from the train to the Navy Pier where they will embark on a steamer for Milwaukee. The boat will pass historic Fort Sheridan and the Great Lakes Naval Training Station as well as many other points of interest. Dancing and other entertainment will be provided on the boat.

Arriving in Milwaukee at 2:45 p. m. the excursionists will be provided with sightseeing busses for a tour of Milwaukee and will leave that city by boat for Chicago at 4:45 p. m. A charge of $6.85 for Elex members, not including meals, has been arranged. The charge for non-members will be $7.00.

Reservations are open at the present time and may be made with Vivian Hitchock, Bldg. 21 or with contact girls. All reservations must be made not later than Tuesday, July 22.

Death Summons Company Official

John William Savage, 49, assistant to President Charles E. Wilson, of the General Electric Company, died Wednesday, July 9, in Rockefeller Medical Center, New York City, following a short illness. A native of Springfield, Mass., Mr. Savage first became associated with General Electric in 1921 with the transfer of wiring device manufacture from Schenectady to the newly

(Continued on Page 3)

New Plant To Be Erected To Build Superchargers

Announcement has been made that the Fort Wayne Works of the General Electric Company will undertake the manufacture of turbo-superchargers for the U. S. Air Corps for use in airplane engines. For that purpose a new plant will be erected on the Taylor Street property now owned by the Company. Tentative plans provide for a large special purpose single story building which, with its accompanying office and service buildings, parking area, etc., will occupy substantially all of the property.

This property is located adjacent to and west of the St. Mary's River and has readily available the services of two railroads; namely, the main line of the Pennsylvania Railroad and also the Nickel Plate Railroad.

NOTICE

United States Defense Savings Bonds and Defense Postal Savings Stamps may be purchased for cash at any time at the Payroll department.

G-E Club Band On Weekly Program

Employees will be interested to learn that the G-E Club Band has been scheduled for a weekly broadcast over station WOWO. The band plays on Thursday nights on the new "Tempo of Times" program.

Keller Is Named President Of The Decatur G-E Club

Succeeds Elmer Chase As Head of Social Organization for Coming Year

Charles Keller has been elected president of the Decatur G-E Club to succeed Elmer Chase, it is announced by the election committee. Other officers elected were Milton Brown, vice-president; Ruth Borne, secretary and Frank Gillig, director for three years. The new officers will be installed during the first week in August.

The newly elected president will name committees during the next few days and meetings will be held soon thereafter to formulate the Club's program.

Maintain High Membership First Half 1941

More Than $1,500 Per Week Is Paid During First Six Months

(Pictures on Page 4)

Having a membership including practically every eligible employee in the Fort Wayne Works our Mutual Benefit Association should be one of the best known organizations operated in our plants. However, like the old saying "you never miss the water until the well runs dry" our real appreciation of the MBA begins when we stand in need of its aid.

The important part played by the MBA at the Fort Wayne and Decatur Works in protecting its members during periods of sickness and disability is emphasized by the records for the first six months of this year which show that a total

Propulsion Equipment For Three More Atlantic Tankers

Propulsion equipment for three more sister ships to the S.S. "W. C. Yeager" launched by the Atlantic Refining Company at Chester, Pa., July 7 is being manufactured by the General Electric Company. The "W. C. Yeager" is the sixth in the fleet of all-welded, turbine-electrically propelled vessels.

The propulsion equipment consists of a turbine-generator which supplies power for a 5000-shp, 90-rpm synchronous motor. The turbine uses 600 lb., 900 F steam, the highest pressure and temperature employed today for marine propulsion in this country. Generator and motor are connected through conventional control equipment.

Cargo oil-pumping equipment may be operated either from the main propulsion generator or from two 430-kw generators which also

(Continued on Page 8)

WHERE ARE THEY?

The Works News is offered to all employees who have entered government service. In many instances addresses left at the time the employee entered service were indefinite. It is asked, therefore, that anyone knowing the addresses of employees in service send them to the Works News editor, Bldg. 16-3.

Volume 24 Friday, July 11, 1941 No. 73

• Equally Important

American slang has no more apt expression than "throwing a monkey wrench into the machinery", to denote interference with the normal course of events. In General Electric we have lots of monkey wrenches. They are used daily in a score of ways to keep the wheels turning. We don't want them tossed into the wheels.

Artist Barstow in the cartoon to the right, has caught the grim spirit of the idea of tossing a monkey wrench into the machinery. It is symbolical of what can happen . . . symbolical of an always present danger more prevalent now than ever before. The work this Company is doing for national defense must not suffer. It will not suffer if everyone is alert . . . if everyone is eager to see it through.

We feel that everyone in the organization is aware of the seriousness of the situation and is doing what is expected and more. Through this cartoon and these few words we simply call attention again to the dangers of the times and again caution everyone to exercise intelligent vigilance against any disloyal acts. Remember, we want no monkey wrenches in our machinery.

• Everybody Helps!

It's been said that "woman's work is never done." Looking at the present record of the sex in helping out on national defense, there seems to be a lot of truth in the old adage.

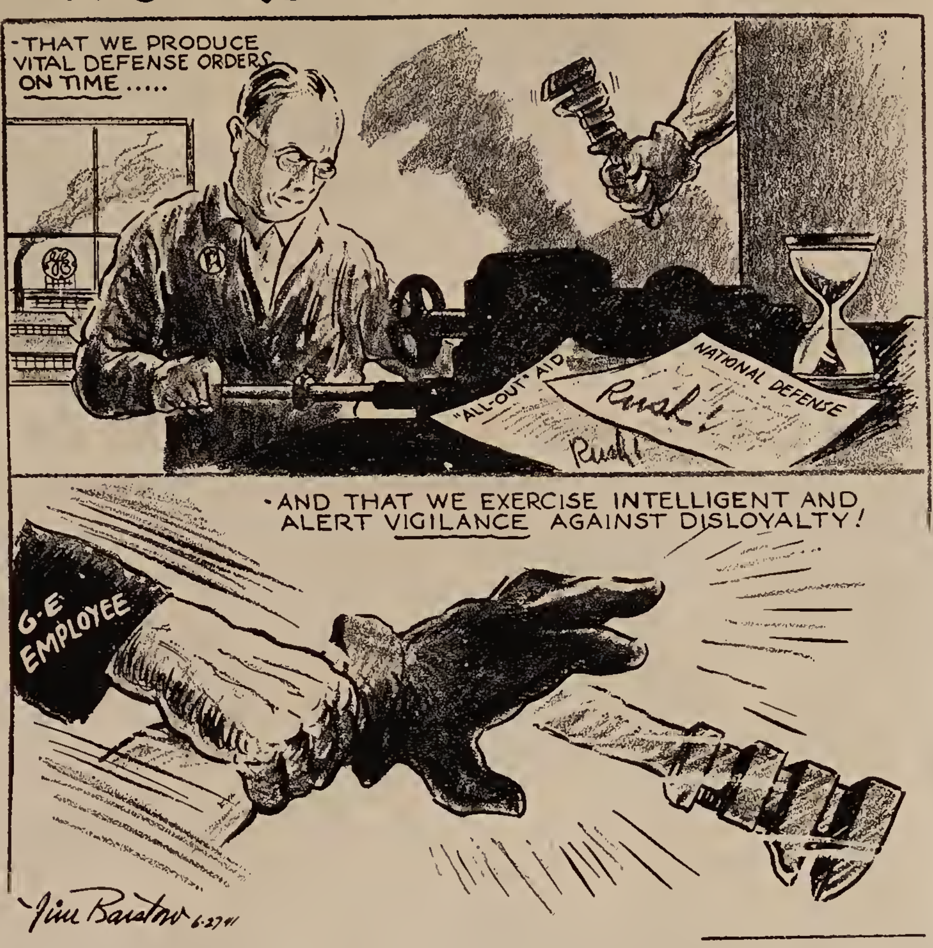
Through research, women scientists are today playing their part in defense. A woman is one of the world's greatest authorities on the basic structure of aluminum, vital material in airplanes and other military equipment. Another has designed turbines and power plants for Navy destroyers. Still a third, who years ago invented the "invisible glass" you see in many store windows, is now devoting all her ingenuity to defense research.

But the record doesn't end with these scientific efforts. Women are by nature particularly skilled at performing certain "fine" work. Hence, many of them are today found assembling tiny motors for use in communications and other fields, while others are sewing parachutes and barrage balloons, or passing final inspection on particularly delicate defense products.

Women are making a splendid record in the manufacturing effort for national security. This fact is of unusual importance when it is remembered that in modern military theory 16 or 17 civilians are needed to "back up" each man in uniform. Not only are America's women proving that they intend our way of life in this country to be preserved, but they are actively demonstrating that every ounce of the nation's skill is ready and eager to serve the purposes of national defense.

And so—here's hats off to our "battalions" of women in defense!

IT'S EQUALLY IMPORTANT



-THAT WE PRODUCE VITAL DEFENSE ORDERS ON TIME .....
"ALL-OUT" AID
NATIONAL DEFENSE
Rush!
Rush!
-AND THAT WE EXERCISE INTELLIGENT AND ALERT VIGILANCE AGAINST DISLOYALTY!
G-E EMPLOYEE
Jim Barstow 6-27-41

Apprentice Graduate

Charles A. Lauer is a recent graduate of the Apprentice Training School, having completed the machinist-toolmaker course. Mr. Lauer is a graduate of Elmhurst High School.

M.B.A. Benefits

(Continued from Page 1)

of $40,255—more than an average of $1,500 per week—was distributed to employee members.

Sick benefits during the period totaled $21,044. Accident claims amounted to $6,701, hospitalization, $7,779, and payments to beneficiaries upon the death of association members totaled $4,600.

The Mutual Benefit Association is definitely an employees organization and is operated by officers elected by the membership. The many advantages of membership have made the organization a popular one at both the Fort Wayne and Decatur Works, and the fact that all money collected in dues is paid back to members as benefits makes the association a most inexpensive form of protection.

Foremen's Association To Hold Stag Picnic On Aug. 16

The first large social affair of the newly organized General Electric Foremen's Association of the Fort Wayne and Decatur Works will be held on Saturday, August 16, it is announced by Florian Korte, president of the association. The affair will be in the form of a stag picnic and will be held at the Log Cabin.

A program of outdoor sports as well as an entertainment program is being planned at the present time. There will be no charge for members and the affair will continue throughout the afternoon and evening.

Arrangements are in charge of the entertainment and Banquet committees. Carl Steinbacher is chairman of the Entertainment committee with Wm. Walt, J. V. Johnson and Paul Buell as committee members. Ed Schafenacker is chairman of the Banquet committee and he will be assisted by Joe Mougin, Glenn McAfee and Vic Boutwell.

Fort Wayne To Share In Large Defense Order

Largest Single Contract For Merchant Marine Ship Equipment Is Placed With G. E.

An approximately $16,000,000 order for national defense, the largest single contract for merchant-marine ship equipment ever placed with one manufacturer, has been received by the General Electric Company from Sun Shipbuilding & Dry Dock Company.

Equipment to be supplied under the huge order includes main propulsion and auxiliary power-generating units, along with complete control and protective devices for 45 turbine-electric oil tankers to be laid down at the shipbuilder's Chester, Pa., yard under the U. S. Maritime Commission program.

At least six of General Electric's plants will participate in filling the order, with the major portion of the equipment being manufactured at Lynn, Schenectady, and Philadelphia.

The company's Lynn Works will produce the propulsion and auxiliary motors; Schenectady will provide the main motors and propulsion control; and switchboards for the vessels will come from Philadelphia. In addition, the Pittsfield Works will contribute power transformers; Fort Wayne, generators; and Bloomfield, control equipment.

The 45 oil tankers, which will each cost approximately $2,700,000 to build, are expected to be completed in two years. The keel of the first vessel is to be laid this month (July) with the completion schedule for nine months later.

The vessels will be of the single-screw type, each developing a maximum of 6,600 horsepower at the shaft. In terms of kilowatts, the combined capacity of the propulsion and auxiliary turbine-generators for the 45 ships is equal to that of a power-generating station large enough to supply all the electricity normally used by almost 900,000 homes. The main propulsion equipment represents a combined capacity of 243,000 kilowatts, and the auxiliary equipment another 47,000 kilowatts.

Five Appointed To New Supervisory Positions

Great Increase Shown In Defense Materials

Most Commitments Are Being Met Although Company Is About Fifty Per Cent From Peak

According to the current issue of The Monogram, General Electric's publication for district sales offices and other staff divisions of the Company, production of direct defense materials has increased by leaps and bounds. However the Company has not yet reached the peak of defense production, being about 50 per cent from that point. On most lines, however, commitments are being met. It is expected that production, according to government requirements, will get into full swing about the first of next year.

High Building Month

June was the high month for completion of new buildings. Total by July 1 was estimated to be about 800,000 square feet of new floor space, which means that last month the total jumped about 220 per cent. Another 800,000 square feet is still under construction for completion this year.

Of the machine tools required expanding defense facilities, about 50 per cent have now been received, with about 1500 yet to come.

The subcontracting program is well under way. So far there have been contacted about 1500 possible subcontractors (estimated for July 1). Over 300 of these are producing equipment at a rate of over $16,000,000 per year. Equipment involved includes patterns, castings, tools, dies, jigs, fixtures, gears, shafts, forgings, screw machine parts, stampings, molded parts, machine work, etc.

To relieve the oil shortage on the eastern seaboard, the U. S. Maritime Commission has ordered 72 new oil tankers, 45 of which will be driven by G-E turbine-electric propulsion. This is the largest order the Company has ever received for propulsion equipment.

Generating Increases

In the 40 years since it started, the central station industry has built up in this country an active steam generating capacity of about 41,500,000 hp. Now the Company is asked to deliver in something over three years' time an additional quantity of steam turbines for all purposes amounting to more than a third of this installed horsepower. Over 80 per cent of this business is for national defense.

Launched last month, four months ahead of schedule, was another new battleship, the "South Dakota." Now in service are the "Washington" and the "North Carolina"; the "Massachusetts" is scheduled for early launching. These, the first four first-line battleships of our country's new fleet, all have G-E propulsion equipment, as well as switchgear and certain auxiliary equipment.

Diesel-electric locomotives made at the Erie Works are playing an important part in defense. During the 12 to 15 months prior to September, 1940, the selling rate had been about one a week. By the end of the next 30 days the rates had jumped to about 120 a year; 23 were sold in the last 13 weeks of 1940, and more than 100 were sold in the first five months of this year.

The Navy Department has a score of G-E diesel-electric switchers operating in widely separated locations. The Army has about 25 in service at arsenals, proving grounds, and other locations. Our diesel-electrics are also finding widespread use in ordnance plants—by contractors during construction and for switching after completion. A number of shipbuilding plants are among other users.

As many are aware from newspaper reports, the Company is likely to receive soon an important assignment to expand greatly its facilities for the production of turbines and gears for the Maritime Commission's shipping program covering ships principally of the C-2 and C-4 classes.

To Aid The Work

In order to further activities in the supplying of electric apparatus for national defense and other purposes, R. C. Sogge of the Central Station Department, Schenectady, was designated May 29 by the Sales Committee to act for the apparatus sales departments in a liaison capacity with the Purchasing, Distribution, and Manufacturing departments. Matters involving priorities, procurement, or production, in so far as they affect sales activities, should be brought to Mr. Sogge's attention.

Five employees have been appointed to new supervisory positions. G. W. Auer, superintendent of Bldgs. 4-2 and 4-3 announces the appointment of C. N. Hatfield as third shift foreman in Bldg. 4-3 and D. M. Arnold as third shift foreman in Bldg. 4-2. T. L. Staley, superintendent of Bldg. 4-4 announces the appointment of G. K. Crabill as third shift foreman and O. J. Mettler, superintendent of the Specialty FHP Motor Division announces the appointment of George Prince as general foreman and G. L. Smith as foreman of field winding.

Mr. Prince, who resides at 1252 West Lexington Avenue started working for the Company in 1913. His first assignment was in the Fractional HP Motor Department where he performed production work for four years. Later he was made assistant foreman in the winding department and four years later was named foreman. He continued in this capacity for eighteen years when he was transferred to the Specialty Motor Division. Mr. Prince is a member of the Quarter Century Club having joined that organization in 1938.

Mr. Smith began employment in 1927 on assembly. After a year he was transferred to the production office at Winter Street on scheduling and ordering raw materials. In 1935 he was transferred to Bldg. 4-2 and later to Bldg. 17-3 as production dispatcher. Early this year he was transferred to the Specialty Motor Department and worked on material calculations, tool requests, etc. Mr. Smith resides at 3726 Arlington Avenue.

Mr. Arnold joined the G-E organization in 1928 following graduation from the Huntertown High School. He was employed in the Meter Department and later transferred to the Fr. H.P. Motor Division where he has served in various capacities. Mr. Arnold resides at 1617 Bowell Street

Mr. Crabill, 1838 Lindley Avenue, started with the Company in 1922 and graduated from the Apprentice School after completing the electrical tester course. He was assigned to the apparatus drafting department and during the succeeding years was employed at Winter Street and in the Fr. H.P. Motor Division. Prior to his new appointment he worked in the service section in Bldg. 4-4.

Mr. Hatfield began his service in 1916 when he was employed in the screw machine department as a grinder. He became a leading operator in 1932 and continued in this capacity until 1937 when he was appointed an assistant foreman. Since 1939 he has been employed in the Rotor Group in Bldg. 4-3. Mr. Hatfield resides on R. R. 2.
at 1617 Howell Street.

Record Established In Orders Received

Increase of 145 Percent Is Shown. Much of Volume Due To Defense Work

Establishing a record for a six months' period, orders received by General Electric Company during the first half of this year amounted to $521,139,000 compared with $212,653,000 for the same period last year, an increase of 145 per cent, President Charles E. Wilson announced this week.

Orders received during the three months, ended June 30, amounted to $263,757,000, a record volume for a quarterly period, and were equivalent to an increase of 128 per cent over the $115,163,000 of new business booked in the corresponding period a year ago.

The Company's orders definitely known to cover equipment for national defense purposes amounted to approximately $216,000,000 in the first six months this year, including $104,000,000 received in the three months ended June 30, thus making a total of about $466,000,000 of such orders received since the defense program was instituted last year.

By quarters, orders received have been as follows:

	Total Orders			Excluding Known Defense Items		
	1941	1940	% Inc.	1941	1940	% Inc.
1st quarter	$257,382,000	$ 97,490,000	164%	$145,382,000	$ 86,490,000	68%
2nd quarter	263,757,000	115,163,000	129	159,757,000	102,163,000	56
1st 6 months	$521,139,000	$212,653,000	145%	$305,139,000	$188,653,000	62%

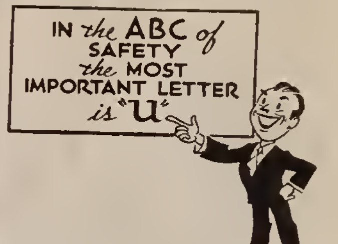
M.B.A. Benefits

(Continued from Page 2)

There are no operating expenses and long periods of non-payment of dues are enjoyed each year.

The Association had its beginning back in 1896 when only 350 were employed at the local plant. Known at that time as the Fort Wayne Electric Relief Union it later became our present Mutual Benefit Association.

Benefits are paid with the greatest dispatch possible and those confined through accidents or illness are visited regularly, more than 3,600 calls of this nature having been made last year by representatives of the Personnel Department.



IN the ABC of SAFETY the MOST IMPORTANT LETTER is "U"

Company Official Dies

(Continued from Page 1)

established Bridgeport works of the company. Previously he had been connected with the Wason Manufacturing Company in Springfield, a subsidiary of the J. G. Brill Company, railway car builders, and with Harvey Hubbell, Inc., wiring device manufacturers in Bridgeport. He served the latter organization for nine years in accounting sales and production activities.

In 1929 Mr. Savage was appointed assistant to the sales manager of the General Electric merchandise department with special duties in the promotion of rural electrification. In 1930 he became manager of the department's commercial research division and two years later was appointed assistant to Mr. Wilson, when the latter was manager of the merchandise department.

In 1939 when Mr. Wilson became executive vice-president and in 1940 when Mr. Wilson became president, Mr. Savage continued as his assistant. He had also been chairman of the company's commercial research committee, composed of representatives from several departments interested in marketing studies. He was a director of the Monowatt Electric Corporation, a General Electric affiliated company.

The survivors include his mother, Mrs. Ellen Savage, and his wife.

M. B. A. Proves Popular Benefit Organization Among Works Employees

Top, left—Irene Meyers, personnel department, explains the filling out of a benefit application. Top, right—A section committee meets to act on benefit applications. Left to right—Carrie Green, Bertha Gruber, Goldie Mentzer, Clifford Schwartz and Lawrence Schuster.

Second row, left to right—Annette Thomas, section committee secretary, writes the warrant for a benefit check. Center—The special committee meets to pass on special cases. Left to right—Sam Baumgartner, Bldg. 27; Leo Wallace, Bldg. 19-3; Ed Gebert, Bldg. 4-5; E. Zollinger, Bldg. 17-4; W. J. Hockett, chairman; Clarence Hueber, Winter Street, and Alvin Powell, Bldg. 19-4. Center, right—Lester Shroyer draws MBA benefits while recuperating from an appendix operation at the hospital.

Third row, left—Wm. Wright, Bldg. 2-2, a hospital patient, knows the advantages of MBA membership. Right—Daniel Yoder, Winter Street, is doing a good job of recuperating.

Bottom row, left—Dorothy Heinzelman, Bldg. 19-5, is finishing her recuperating at home as is Audrey Metcalfe, Bldg. 4-4, pictured at the right. All owe much of their peace of mind during a period of trouble to the operation of the MBA.

»» NEWS THROUGH THE PLANTS ««

From The *Feminine Viewpoint*

By Irene Perry and Hilda Barthold

Have had several answers to the column written by a man in the May 29 issue. We have had so many other things to get in during this rush season that we kinda let the matter drop for awhile. We will try to make a summary of all the letters and give them to you.

Life has become quite a complicated affair and men actually expect a poor girl to keep up the home as well as do all the work in the home. There once was a time when girls would be asked to marry a man and then get his meals and mend his clothes but were never allowed to make the living as this was considered the man's work. If women are going to help support men why shouldn't they pick out the men they want to support—it seems that that is the way men were in the habit of doing.

Then of course, there is that little matter of comparing men to fish. It seems that women (like most men) hate to throw back a fish even if it isn't quite up to the mark. It's true that a fish must be played until he's worn out before hauling it in and who wouldn't hit a pike over the head with an anchor if it is very large before removing the hook; but most girls prefer men who haven't been played too much. If men insist on being played with, they will be caught in the end.

Girls can't play around for a few years and have a little innocent fun without expecting to pay for it, so why should men enjoy all the good things in life with no consequences?

Anyway, we would say that when men get to the place where they can tell you the color of "nylons" a girl is wearing it can only mean that they are ready to be taken in by a trim looking pair of legs. So if good looking legs, skirts to the knees, the right make-up in the right places, and a come-hither look in the eyes can land your man —more power to you, girls.

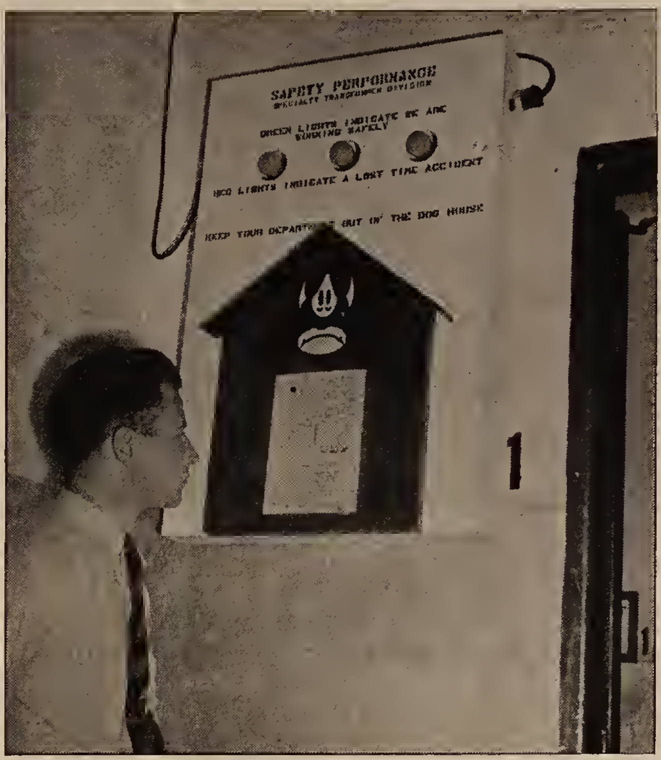
Slips And Chips

Sir Viss Bldg. 4-4

Breezy Stoll always inspects his lunch, especially his sandwich thoroughly, so he is sure Mitzi (his dog) is not hiding some where in it. Really Mitzi is so small that he hides in the grass at the edge of the sidewalk when Breezy takes him out for exercise. And say Breezy, aren't you afraid Mitzi might break the lead strap and get away. The strap looks small enough for leading a Great Dane. . . . Mart Hardwich at last has moved into his new house. Mart spent his holiday week-end cleaning up, etc., getting everything in readiness to move in. Mart says, "We're in and all cleaned, yes, we cleaned out the dirt while the builders cleaned my purse." Au Revoir to Ralph Hardy. We sure will miss you and wish you the best of luck. We hope army life agrees with you.

Kate Sheaffer, Bldg. 4-3, or Catherine as we should say, doesn't care a thing about expenses of late. She paid a fine for overtime parking, then bought herself a new pair of hose, went home and put them in the furnace, but she didn't say whether they warmed up the house or not.

How To Get In The Dog House



SAFETY PERFORMANCE
SPECIALTY TRANSFORMER DIVISION
GREEN LIGHTS INDICATE WE ARE WORKING SAFELY
RED LIGHTS INDICATE A LOST TIME ACCIDENT
KEEP YOUR DEPAR
OUT OF THE DOG HOUSE
1

A unique safety display was recently installed in the Transformer Division which is attracting considerable attention. It's sponsor, Lane Breidenstein, who is shown with the "dog house" explains that the display is a means of calling attention to a department in the division where a lost time accident occurs. The name of the foreman and the department appear in the dog house for a few days immediately following the accident.

Green and red lights at the safety display board indicate the safety progress of the division. A red light indicates an accident and a green light indicates no accident for the month.

Plastic Flashes

We're a happy sunburned bunch after our three-day vacation.

Grace Funk celebrated the Fourth by going to Detroit and Canada.

Florence Peters and Annette Alspach went to Camp Shelby; Florence to see her brothers, and Annette to gaze at her one and only.

Why is Mary Ward no longer interested in the Scale Room?

Erma Nead had a wonderful time. She took a trip to New Haven and points east.

There seems to be a little sabotage in the office of the A.P.B. Inc., C.O.D., what with Clarence Favourite telling the girls they would be much better off as bachelor women.

Carl Sleppy refuses to tell what he did over the Fourth, but it must have been good—he has a banged up hand.

It seems Betty Perry has been holding out on us. Who is the lad from Camp Shelby who consoled you last week, Betty?

The Tillies are very glad to see that everyone had a sane, safe, and happy Fourth.

Jean Barve's left hand is weighted down with a sparkling sparkler.

Ralph Foust, Bldg. 12-3, is really a card shark and seems always to win. We think it's just luck, Ralph.

—The Tillies

Alice Pflueger, Bldg. 4-3, and husband visited the Smoky mountains over the holiday. Alice said when she returned to work, "Hope I don't get a job sitting down as I had to ride in that back seat all the way." Now what we would like to know, was it the back seat or was she riding some of those southern mules?

Sunbeams From 17-4

And why is Glenn Burns going around with a sore toe? Well it was this way, it seems that Glenn and a chair had a fight and the chair won.

Bob Bennet is digging for worms these days, but they aren't the kind you fish with, they are little red ones just under the skin, commonly known as jiggers.

Well, well, we are all back from our three-day vacation, some got married and some of us got sunburned, but old Sol really did a good job on LeVern Tumbleson.

The employees of the department wish in this manner to extend their sympathies to Esther Hawks in the death of her sister.

Thought for the week:There is no royal road to anything. One thing at a time, and all things in succession. That which grows slowly endures—Holland.

Deaths

James A. Stover, Bldg. 4-2, an employee since 1925 died Saturday at his home, 2104 Hoagland Avenue. Funeral services were held Tuesday with burial in Lindenwood cemetery.

Seems as though Kenneth Miller, Bldg. 4-3, just couldn't remember how to write his own name after a three-day vacation. Better not take a long vacation, Kenneth, or you might have a complete lapse of memory.

Wm. "Beezer" Burke, Bldg. 4-3 tells us that he is very glad that vacations are now in order. This, he said, will enable him to attend the big Cherokee pow-wow to be held the middle of August at Tulsa, Okla., also will enable him to renew old acquaintances.

26-5 Tool Bits

Christ Kaiser is now learning to eat oranges the California way. Instead of tediously peeling an orange he just picks the fruit off of the tree, bites a hole in it, sucks the juice and throws the rest away. The Bldg. 26-5 gang are all envious of you Christ. . . . Henry Wittber traveled to the Arlington race track at Chicago over the Fourth. No betting and did that complimentary ticket come in handy. Henry says "I always bring home the difference." . . . Carey Baker is proudly displaying a picture of his long lost brother who is now located in Cheyenne. . . . Earl Lenz is back from Sandusky. Again there is an odor of fish in the air. . . . Ross Cohagen has practically refurnished his home and it is reported that things point to a house warming. . . . Otto Backman ate so many fish on his vacation that it is not likely he will bite into another for a year. . . . Art Dicke returned from vacation with the longest tale yet told. It took all of one day and is yet incomplete. . . . Ask Redding and Berlien about the rain in Smoky Mountains. . . . Henry Wittber's boyish pranks have reasserted themselves. He was seen putting flowers in the hair ribbons of Jeanie with the light brown hair.

Sleuthing In 4-6

We are glad to welcome Harold Buck back to our Bldg. 4-6 office. You have been missed by all of us and the gang joins me in wishing you good luck . . . Harry Richardson took his radio apart over the Fourth of July, but had to take it to the garage to get it put back together . . . Harriet White is proudly displaying a pearl engagement ring on her left hand. It sure is a beauty. Best wishes from the gang . . . Why does Bill Ryan gladly offer to "take it up to the duplicator for you"? Can it be that Bonnie is the cause of his willingness to oblige? . . . The gang is watching Jerry Zehender these days to see if he breaks out with the measles. His wife has them now . . . We understand that Esther Selzer's father is having difficulty getting all the plowing done. It was bad enough with Esther riding the horse, Ned, several hours every evening, but when Harold Fremion came out and started riding Ned too, the poor horse just wasn't worth much during the day . . . If you really want to have a swell birthday dinner, just ask Rosemary Pond what to have. She had an elegant dinner consisting of the following: pork and beans, ice cream, ice cream, pork and beans, etc. . . . It is rumored that Bob Pfeiffer has found the way to maintain a "young mannish" figure. For further details ask Bob how he does it. He will soon be parading his streamlined figure in a uniform as he is leaving for camp on July 16th. So long Bob and best wishes.

The Sleuth

Genevieve Nuttle, Bldg. 4-3, and husband spent a week through the south and Smoky Mountains.

Mr. R. Kelley, of Winter St., and Mrs. R. Kelley, Bldg. 4-3, had a lovely airplane ride at Indianapolis last Sunday, but the real trouble is that Mrs. Kelley is still very much frightened of airplanes.

Eileen Stemmler and Ruth Lauer, Bldg. 4-3, went to Misomie Camp to see the boys and the girls forgot to come back. What do you suppose the attraction could be?

SANDY SAYS

While my Cousin Colin watched the FREE fireworks last Friday night thru a pair o' field glasses tae make them look bigger, so he would get more for his money (?) I got to wondering about the length o' time it took to make them compared to the time it took tae shoot them off. To the man who made them, a minute more or less didn't make any difference, but to the guy who lit the fuse and ran, a few seconds made a whale of a lot of difference —just then.

Time may therefore be said to be a very changeable thing. But slow or fast, once it's gone—ye can't get it back again. Ye can lose your shirt, and live to get another one. Ye can lose your money—and live off your relatives. Ye can lose your wife—and sew on your own buttons—ye probably do anyway. But if ye lose time, lad, it's gone!

Now, if time is such a precious thing, how can we (who are all Scotsmen at heart) get the most out o' it? Ye canna put it in your pocketbook like a dime, and save it forever, like a Scotsman. Ye must spend it, but ye might as well get the most out of it.

As ye work at your job, do ye dream about that fishing trip ye are planning for next Saturday? If ye do, ye may be getting double duty out o' your precious hours. BUT if ye should spoil the piece ye were working on, ye might have to do it over, and lose the fishing trip tae boot, so ye'd be "out" all around.

If ye pay close attention to your work, on the other hand, and think o' nothing but making your hands go thru the right motions, ye may not be getting the most for your time.

If ye pay close attention, but keep wondering how ye could improve the method (and get some o' Sandy's gude ould cost reduction) ye might end up with a $50.00 suggestion. Now THAT'S what I call time well spent.

Speaking o' time reminds me o' my cousin Colin the day he started tae overhaul his model T. I noticed that he kept mumbling tae himself. So I asked him what was on his mind, if any, and he replied, "Foosh, me lad, if I dinna get this job done in TIME, I'll nae get tae drive it onny more. Some o' these days they're bound to pass an anti-smoke ordinance."

19-5 Office Chatter

Congratulations to Virginia Klopfenstein, our newest bride. She now goes by the name of Winegart. . . . Our ranks were rather depleted by things and stuff during the past week. Francis Richards and Elmer Sible got the lake fever. Art Knoll kinda wanted to see the boy so he headed for Camp Shelby. Martha Engler is taking things easy and Lester Logan is somewhere in the wilds of Southern Indiana. Rea Kuhn is headed for points west—including Denver. Carl Reitdorf insists the old saying "Comes in like a lamb" applies to the month of July.

Donald Metter, Bldg. 4-3, started north last Friday evening with his Austin. He reports he had no difficulty in letting cars pass him or overtake his as they went right over the little Austin.

NEWS THROUGH THE PLANTS

Motor Generator Static

Saying of the week: Jerry Frye remarks, "A man is measured by what he does, not by what he says he can do. Even a parrot can talk about itself."

Romance and stuff: When Louise Henderson, Bulg. 19-1, came to work last Thursday noon with that new diamond ring, it was very much of a surprise and shock to some of the young men about Bldg. 19. The poor girl was so excited about the whole thing, that when she started home in the evening, she missed the door entirely and ran into the door frame. "Ain't love grand?"

Information please: Will someone please tell Rachel Luellan, Bldg. 19-1, at what age a gal becomes an old maid? The poor kid is really worried so—"information please."

Dirty Work: During the past several weeks, workers in the Motor-Generator office, Bldg. 19-3, have been privileged to witness one of the finest cases of deceit and dirty work ever pulled on an unsuspecting man by one who has been trusted as a friend.

Some time ago, an article appeared in the WORKS NEWS in which Dwight Myers, ye editor from Bldg. 19-3, was referred to as a "Buttercup." Naturally, he tried to locate the culprit but to no avail. "Poison Pen" Schultz denied any authorship and with him eliminated where else could Dwight look?

Later, "Poison Pen" Schultz sprouted and has since cultivated a —shall we call it a mustache on his upper lip—color, red—maybe gray, and possibly two black hairs. Mention of said mustache was daily reported to Dwight and written up in touching style by "Pappy" Archbold.

Imagine "Pappy's" chagrin when for two weeks in a row not a word of his article has adorned "Motor Generator Static." It appears to us now that "Poison Pen" and "Buttercup" work in "cahoots" to suppress any mention of Don's mustache in print. Come, now, Dwight, "Poison Pen" certainly named you "Buttercup."

When you need your watch repaired, just hand it to Louis (Charlie McCarthy) Fox of Bldg. 19-3, who will wash in in naphtha gas, then dip in machine oil, which sure gums up the works. Then you take it to a repair shop who will charge you a cleaning fee and then maybe it will keep good time. Well, maybe.

Jesse Batchelder, Bldg. 19-3, should get a pair of green goggles when he drives his car down Broadway so people won't know him and draw his attention from the driving of his auto. Maybe he wouldn't hit the car parked along the street.

Service Bureau Steak Fry: All eligible bachelors form a line to the right at the Service Bureau, Bldg. 19-3. Helene Blauvelt has proven herself a pretty good cook in spite of the fact that she burned the potatoes at the steak fry the girls in the Service Bureau had last week at Foster Park.

Nadyne Tierney, Bldg. 19-3, submits the following recipe for lettuce and tomato salad: Don't bother with a bowl or spoon, especially at a picnic, just use wax paper and break your lettuce and tomatoes in small pieces, dump the mayonnaise from the jar into this, then put it in a paper sack and shake until sack breaks. Garnish with ants and serve to six.

Pitching was also enjoyed by Mary Zimmerman, Bldg. 19-3, Service Bureau. Pitching what? Horseshoes of course!

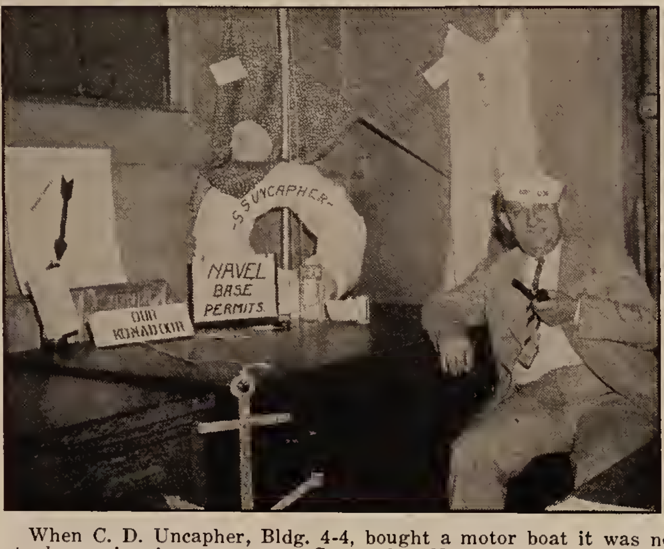
Hermetic Office 17-2

The holidays produced the usual amount of sunburned faces and fish stories. Bob Wefel has the prize story so far, but out of respect for the few conscientious fishermen we won't print it. . . . The house fever seem to be catching, five new homes under way in the last few weeks; however, Ted Budecki is the only one who has been singing "Home Sweet Home" ever since they started work on his. . . . Charlie probably hasn't told a soul, so we will announce the arrival of Robert Charles Rice. Congratulations, Charlie. . . . Even though Bill Wiedelman, Bldg. 20-1 insists the large new addition he is building to his cottage is a sun porch, we hear he is really making it for a dance hall and will hold square dances as soon as it is finished. From the way Verne Castle is promoting the idea we suspect he has been promised the job of "calling" . . . Question of the week: "How many?"

Suzy Sleuth

We understand that John Figley, Bldg. 19-5, has just one bit of advice to offer the boys, and that is don't leave a party until it is over. It is a good thing John has roomy wardrobes.

He's A Commodore Or Something



When C. D. Uncapher, Bldg. 4-4, bought a motor boat it was not just a happening, it was an event. Commodore Uncapher found that most of Bldg. 4-4 was interested to the extent of giving him the marine reception as indicated in the above picture.

Winter Street News

A group of girls from Winter Street enjoyed a potluck dinner in the Production Office. The only drawback was that the girls had a hard time trying to work on full stomachs that afternoon. Those present were: Catherine Lauer, Mary Prezbindowski, Ruth Needham, Gloria Wiebke, Jeannie Culver, Joyce Harwood, Dorothy Crawford, Laverne Madden, Betty Rose, Louise Schwartz and Irene Mestamaker. . . . Margaret Kohlmeyer spent a few days of her vacation in Lafayette. . . . For two weeks Lawrence Kromer has been boasting about going south on his vacation. We discovered Monday, when he returned, that as far south as he got was the first block north of Rudisill. A rather strenuous trip wasn't it Lawrence. We'd sure like to know how you made all of it in two weeks.

Harry Kaehr is the proud father of a baby boy. Congratulations Harry and may the boy be as proud of you as you are of him.

Eddie Ehrman finally discovered he is not as young as he used to be. He filled in on the neighborhood kids football game and one of the mighty mites tackled Ed and Ed's been limping ever since. The boys at the office are taking up a collection of old canes and crutches for his use.

Ruth Needham and Gloria Wiebke spent a week end at the Dunes. They say they put up a tent but that they actually slept on the sand. Gloria says she realizes it now since she itches so much. Maybe she's never heard of sand fleas.

Jack and Edna Henry went to Smalley lake for some of those monster bluegills and really bragged to the boys about it. He went up full of expectations but came back full of steak, as they caught no fish, absolutely none.

What we would like to know is just who the baby is that Martha Ruhl, Bldg. 4-3, is so interested in?

Sylvia Bowers, Bldg. 4-3, had such a good time on her vacation that she will mail out the post cards next Sunday from her home.

Margaret Niblick, Bldg. 4-3, wore a checker board dress to work the other day. No more of that unless she brings the checkers along too.

19-4 Spot Jottings

We are much alarmed about Mildred Carpenter, and we think the heat's got her. The other day Mildred jumped out of the back door of a street car and rushed around to the front and got back on. Not only that but on arriving at the gatehouse she tried to get in by showing her street car pass. Now we ask you does any of that make sense. . . . After a good deal of buzzing about the advance scouts for a swarm of bees decided the post on Adele Weitfeldt's front porch would make an ideal home. After installing the queen they dashed away to inform the gang and Sunday P. M. the whole swarm moved in. Adele left them in complete possession but figures she got stung since it cost her $7.00 to have them dispossessed.

We have heard of people being chased by dogs and different animals, but Edna Crow, Bldg. 4-3, says her lawn mower chased her down her back steps and down the yard. That night her pet dog took sick. She got up and made it a hot punch, wrapped it in a blanket and put it on the bed. Awakened a few hours later, Edna heard something go boom and the poor dog was on the floor. Could it be she gave him too much punch?

There seems to be some misunderstanding between Alta Rybolt and Frieda Ramm, Bldg. 4-3. Alta has promised Frieda a kitten which she has not received and doesn't understand why. So now Frieda we will tell you why you haven't received it as yet. Alta says being you are so choosy about color you will have to wait until she goes to the country where they have yellow cats as their's just don't come in that color.

Now that the contest has closed on pictures taken at picnics, we wish to announce Ray Saul, Bldg. 4-3, best picture photographed with George App, Bldg. 4-3, coming up for second prize.

Eleanor Carpenter, Bldg. 4-3, reports that her dog's nose is getting blacker every day. Well why shouldn't it with so many kisses from Eleanor.

Do the bosses in Bldg. 4-5 keep Jean Fox so busy that she's gone batty or is she limping around because of a softball batty. Our advice to you, Jean, is play the field and you won't get hurt.

Borings From 4-4 Office

The theme now is "Do I worry over that sun-burned back." Boy you can bet your life we all do. Some people just don't have a lick of sense. . . . Virginia Plummer is on her vacation this week and everything is plenty dead around here now. I just can't keep awake. . . . Last Thursday afternoon the office in general gave Cliff Uncapher a surprise party. It seems as if Cliff is now Commodore of a young boat. He received all necessary equipment for good and healthy sailing including hat, sailor pants fashioned and created by Wolf Tent Co., flag, stars and stripes and even something for snake bite. The compass, anchor and life saver were all added attractions which were donated by different men in our office. Right now he is a swell land lubber, but he was a real sailor over the week-end. . . . . Art Wedler answered the call of many, "Go west, young man, go west." He got as far as his car could take him and that was St. Louis and he did get back to Fort Wayne safe and sound. . . . Clayton Culver hasn't asked us up to that 5-room cottage and a path so one of these week-ends the whole bunch of us are going to surprise him and drop in for the week-end. . . . Melvin Warner came to work with his daughters' pictures. Here's where I go see the Warner's regular now. They are really keen girls. . . . LaVon Price had a wonderful ride in a sailboat last Saturday night, and the moon was just beautiful 'cause I was cramping my style in the old canoe. Some fun, but oh the moon. . . . Bud Smith, N.S.C., is ribbing Mike O'Grady, so Mike is going to let the cat out of the bag by announcing that he is now on a milk diet after a certain Saturday night. . . . One of the girls in our office asked another where she had spent her vacation. The other replied "Well don'tcha read the WORKS NEWS?" . . . Now you jitterbugs here's your chance. Glenn Miller is coming to Waco at Wawasee. I can hardly wait. Me and my best girl are going to trip the light fantastic or even the heavy down beat.

Art Wedler challenges anyone to a game of golf. He has beaten every one in our office. Now he is taking bigger stakes by giving you all a chance. Walter Holloway made the same challenge but he is so backward that he is just satisfied beating me.

Mike O'Grady is the only one that keeps cool. You should see him with his pants rolled up to his knees. His motto is, "Keep Kool—men—Keep Kool."

Ivan Butler is on his vacation this week so the service section can act up all they want to now—I mean this week only. 'Tis plenty for now. I remain, sincerely as ever.

Elmer, the field mouse
The Rat to you.

Congratulations to Keith Beuward, Bldg. 26-2 and Ernastine Grimm who were married on July 5.

Vic Boutwell, Bldg. 26-1, is in Chicago on vacation and trying to pull the Cubs out of their slump. Good luck Vic but it looks hopeless.

Anyone driving out West Wayne Street should stop and see that rose garden of Velma Meads, Bldg. 26-2, before she picks the other rose.

Farmer: "Do you guarantee these clover seeds to grow?"

Clerk: "Absolutely. If these seeds don't grow just bring them back and we'll refund your money any day."

NEWS THROUGH THE PLANTS

Motor Generator Static

Yes or No?

When Mathias Smith, Bldg. 19-1, received his birth certificate from Michigan, on the bottom was typed these words: "registered as a female, is this you?" Now the boys in Bldg. 19-1 are trying to decide whether to tip their hats or not—"confusing, isn't it?"

Down to Earth

No, dear people, what you saw while passing the Fairview golf course was not an enlarged earth worm coming out of the ground, neither was it one of the goon sisters—just Rus Blackburn, production man de lux, arising after taking a swan dive in a two-inch deep mud puddle. It happened this way —Rus and his pals had gone to the course to enjoy one of their subpar or sub-normal games (we are not sure which) and while rain had fallen earlier in the day the sky was clear, birds were atwitter, even the boys had a few twitts in them. Rus was playing his usual "here I come, there I go game" when some one sliced a ball in his direction. To avoid a cracked pate, our hero dove toward earth and landed in the afore mentioned mud. When he arose, he so resembled Al Jolson in makeup, his chums expected him to drop to his knees and sing "Mammy" or "Sonny Boy."

We Feel Bad

No, sis, the cold weather did not kill off all the varmints. Jim Stouder recently installed a pencil sharpener on the front of Jerry Frye's desk (Jerry sits directly back of Jim) and Jerry talked Jim into charging one cent per pencil for each pencil sharpened. Innocent, unsuspecting, Henry Lojek was the first victim—he sharpened a pencil and was forced to pay his penny to these two mercenary individuals. But the joke seems to be on Jim—the split is to be 50-50 and while Jim furnishes the sharpener, cleans and keeps it in condition, Jerry does nothing, donates nothing, but makes his claim because it is fastened to his desk. This is just by way of warning all folks to keep away from this sharpener and to extend our sympathy to Jim—We feel he was taken in by Jerry.

Flash!

The firm of Stouder and Frye "Pencil Sharpeners Supreme" announces their retirement from business. Some person or persons, unknown, removed the sharpener from Frye's desk, thus a "modus vivendi" exists for the present.

Improving?

Boyd Fisher believes in improving his mind during spare moments. He was recently observed browsing through the pages of "Life's Romances." Better stick to the "American Boy" or "Good Housekeeping," Bud. This other stuff is sure to get you down.

Co-operation

When Bert Spencer came to work the other morning he absent-mindedly left his "button" on the other suit. As he approached the gate his thoughts were far away from buttons and kindred subjects until "John" (who runs a candy cart at the west gate) called to the watchman "Dis man has got no button" Bert awakened from his reverie and beat a hasty retreat for home and the missing "button". Now he says, "I'm against all foreign alliances."

Genius at Work

Everett Keese who recently attracted attention with his Kitchen shower, produced by driving nails through the bath room water pipes while applying a new floor, comes forth with another masterpiece. Our hero recently installed a new chandelier in the dining room of his home and after fastening it in place, went upstairs to make the necessary connections. For some reason, Everett did not stop at the second floor but continued to the attic where for hours he poked around trying to find the wires and make the necessary connections. Finally, he remembered it was the second floor where the connections should be made, and crept down stairs in a very sheepish manner. Could it have been the heat?

Saying of the Week

Jerry Frye remarks: "Some guys are such deep thinkers their thoughts never get to the surface."

Decatur G-E Club Elects Officers

Officers of the Decatur Works G-E Club are shown above, back row, left to right—Milton Brown, vice president; Hubert Cochran, director; E. W. Lankenau, director; and Frank Gillig, director. Front row—Ethel Cookie, director; Charles Keller, president; Elmer Chase, past president and Ruth Borne, secretary. Ray Leitz, club treasurer, is absent from the group.

Hermetic Motors

Dear Girl Upstairs,

All of those red faces to be seen around Bldg. 17-2 aren't attributable to embarrassment, but to the morning expeditions that the girls have been taking to the nearby lakes. Ginny Dotys' sunburn turned to a nice tan overnight while Jo Ann Youngs' burn resulted in a few blisters. Ginny Ramsa had to "eat off the mantel", just because she fell asleep for a few hours.

"Gracie" certainly gave the girls a scare last Thursday when she made a dash for the stairs and two girls had to sprint after her to bring her back to her birthday party. Miss Koch was so surprised and excited that she couldn't eat—and when Gracie can't eat—!

It seems that the arrival of the Rice heir has had no effect on papa Charlies' appetite!

The girls "back in the corner" had a pot luck, just for the fun of it. Cathleen (Button, button, who's got a button?) Cairn, Margaret Falls, Betty Maloney, Max Root, Frances Oberholtzer, and Leona Weller were the invited guests, but Leona very kindly shared her dill pickles with Ann Gombert, Pauline Corbat, Lois Burry and Dorothy Hanselman.

Say, have you heard about "Blondie" Hanselmans' toys? She has a doll named "Izzy Stinkey" and a lamb called "Willie Fleecer". By the way, don't ever call Dorothy a redhead.

You never answered my question. "Have you got a cuppa coffee in your pocket?" Well, have you?

The Hermit.

Dear Hermit,

Well, the holiday has passed and what a grand one it was. I spent most of my time swimming in Lake Huron at Bay City, Michigan. I watched the grandest fire works display of them all, The Northern Lights and all in all, had a grand, cool time.

Cletus and Ben went up to the Straits and I hope that theirs wasn't one of the 6,000 cars waiting to cross into Canada on the morning of the 4th.

Ruth Carl pulled a fast one on us all, and said "I do" the day after Maxine got married. Honestly so many of our girls are getting married that I'm afraid I'll gain back that pound and a half I lost.

The Girl Upstairs.

Any persons interested in diets or exercises for that excess weight, just ask Beatrice Roach or George Ann Mahat. They will gladly inform one, even give you books on that very important subject.

We noticed the other afternoon an unusual sparkle in Arline Gaskills' eyes, upon inquiring we learned she had an eventful lunch hour. She received that sparkler for her left hand. We are now trying to find out where she eats, thought we might have a little luck.

Goodness! La Veda Bowman certainly has been having trouble with her voice. We find she in an ardent base ball fan. Guess she is The Teams' moral support.

Famous last words for Hallie Hasler, "I'll never forget my badge again!"

We hear that Elsie Shannon Mattews is very busy moving these days. We hope you will find a lot of happiness in your new home, Elsie.

We see that Irene Ducy Walker and Louise Conners Watts are sailing on the sea of matrimony. We want to wish you gals a lot of happiness.

Ervin Benzinger is still talking about that new boy. A good candidate for president in a few years we think.

Cloyce Shady, who used to be with us before he started working for Uncle Sam, came up to see the old gang the other day while he was home on leave. It was nice to see that he had not forgotten us. Good luck, Cloyce.

Just We Two.

Among the vacationists at lakes on the Fourth of July were Helen Gerke and Louis Webert, spending the day at Indian Lake.

"Mac" McNamara, Bldg. 19-4, who always comes back with the same fish story of twenty-five blue gills and six bass changed his story for the first time this year. He modestly claims one dog fish.

That manly figure rushing around the corner of Taylor and Broadway in the wee hours the other night was not superman. It was merely Bill Rohe, Bldg. 8-1, dressed in pajamas and sport coat waiting for the firemen to put out the blaze in the building under his flat.

George Zollors turned carpenter over the week-end, and we learn that as a result iodine production has been greatly increased.

Hubert Cochran, Decatur, has at last found the benefactor who presented him with the can of sardines. Arsie Owens, owner of the cottage that Hez used at the lake knew from experience there was a scarcity of fish having taken sardines to the lake himself for lo these many years.

Do you have a good story you would like someone to bite on? Just try it out on Ray Kierspe, Bldg. 16-3.

What would you think of a guy who would spend his week's vacation sick in bed? Anyway, we are truly sorry you had such a rotten vacation, Bing Englebrecht.

At last the Wire and Insulation Division has the man they have been looking for. It certainly gives moral support to the office to have someone there who refuses to swear or be sworn to. We will take more like Aaron Schoenefeld anytime you have them.

Laziness travels so slowly that poverty soon overtakes him—Benjamin Franklin.

From the razzing Neal Hench, Bldg. 4-6, got in the WORKS NEWS last week it is quite evident the Winter Street boys don't have any idea it is almost a daily occurrence to be late by riding the elevator in Building 4 of the Broadway Works.

We wonder why Helen Crabill, Bldg. 17-2 Office, got all prettied up before she hurried away the other night. Do you suppose it could have been because her coast guard man was waiting for her?

Archie "Snap, Snap" Boren, Bldb. 4-3, is a very versatile fellow. Besides being Mayor of Huntertown, he is an expert horseman. He shoes all of his plugs, makes his own horse shoers aprons, and even wears said apron while operating his pet punch press.

Decatur News

It comes to our attention that Milton Brown, newly elected vice-president of the Decatur G-E Club has not expanded properly. When a picture of the club officers was taken it was only with the aid of a footstool that Milt appeared in the picture.

Ray Leitz and family spent the Independence Day holiday in Kankakee, Illinois, visiting relatives.

Mildred Acker, Mary Jane Fritzinger, Donald Gage and Melvin Collier visited Mackinac Island over the Fourth.

Lucille Hudson visited with friends in Owensburg over the week end.

Not wishing in any way to violate the Indiana anti-firecracker law, but still desiring to celebrate the Fourth, Ann Murtaugh with her supply of firecrackers journeyed to Van Wert, Ohio, to stage her own celebration.

It is rumored that Tony DeLaGrange and some fair companion visited friends in Tiffin, Ohio. How about an introduction, Tony?

Ray McDougal and family spent the Fourth of July week end at Adams Lake. Are there any fish left, Mickey?

Fern Passwater, while spending the Fourth at Celina found that net dresses have a tendency to permit sunburn through the small openings.

Monroe Fuhrman, Joe Krick and Pat Murphy, former employees of the Decatur Works now inducted into selective service were home for short furloughs over the Fourth of July.

Mr. and Mrs. Gordon Acheson, Hildred Schum and Mr. and Mrs. Paul Hancher traveled to Chicago on July 4 to see the St. Louis, Chicago baseball game.

Bob MacKay, Bldg. 4-6, and a cute brunette from Lake James had a little accident last week end. Their sailboat overturned and the young lady lost her shoe. Now Prince Charming has to find a pair of shoes to fit his Cinderella. You better learn how to handle a sailboat before you go out in one again, Bob. It might save you a little money.

Any persons who may be interested in listening to a top flight conversational battle and witnessing a terrible exhibition of euchre are invited to drop in the inspection office, Bldg. 18-1, any noon hour except Fridays. Kibitzers are required to furnish their own ammunition and the players will not be liable for prostrations occuring from overheated arguments.

There seemed to be quite a bit of excitement around the Ledbetter cottage the other day. Gracie, standing on the pier, looked out and thought some one had fallen in. She thought this would be her chance to play the "Heroine" of the day so Gracie plunged into the water and made one desperate dive for what she thought was a body in the water, but instead turned out to be a red hat floating on the water. Better luck next time, Gracie.

A gala event took place on July 4th at Big Long Lake. The Brandenburger Steamship lines launched their latest vessel "Big Snort XIV". She is a worthy addition to their great fleet as she slid down the ways. It was a sight to behold. She is as beautiful a piece of ship craft as one ever had the privilege of viewing. The president of the lines, Sir Arthur Brandenburger, Bldg. 4-3, christened the new ship using a bottle of canal water to break over over the prow.

SCIENCE FORUM

by L. A. Hawkins

Q. What is the difference between long-wave, short-wave, and ultra-short-wave broadcasting?

A. The various bands of radio waves used in this country are more or less arbitrarily chosen; there is no exact line of demarcation between them. Usually radio waves above 100 meters are considered long waves. The band from 10 to 100 meters is short wave, or medium wave as they are sometimes called, and anything below 10 meters is considered ultra high frequency. Those radio waves that are only a few inches long are sometimes spoken of as micro-waves.

Q. Why does a small block of wood floating in a small container tend to go to the side of the vessel?

A. The phenomenon is due to capillary action. If the block of wood is not exactly in the center, it will have a greater force on one side of it than on the other.

Q. What is a coronagraph?

A. An astronomer's instrument. It is a special type of telescope, with a screen of just the right size to mask out the bright image of the sun. This gives the astronomer a sort of artificial eclipse of the sun, so that he can study the atmosphere immediately surrounding it.

Q. If food is left in a can an hour or so after opening it, will the food become poisoned?

A. No. In fact, it is much safer to leave food in the can. It will not spoil as quickly that way. Of course, after canned food is opened, it must be kept cool if you are to keep it any length of time; but leave the unused portion in the can. It is by far the best place to keep it.

Q. What improvements have made today's phonograph records so much better than they used to be?

A. The big change is in the electrical cutting of the records. Years ago the stylus that cut the groove on the master record was actuated by the actual sound pressure acting through a diaphragm upon it. Nowadays, the sound is picked up with a sensitive microphone, electrically amplified. This electric energy is used to move the cutting stylus. What also is an improvement on the modern phonograph is the master electric "pick up" working through a good amplifier and loudspeaker; this "pick up" is necessary to get the most out of the records.

Q. What is laughing gas? Is it harmful to human beings?

A. What we usually call laughing gas is nitrous oxide, N_2O, which is a gas used often for anaesthesia, usually in combination with oxygen. It requires knowledge and training to administer it properly, but, in the hands of a person who has such experience, it is not harmful to human beings.

Q. Are sponges plants or animals?

A. Originally they were considered plants, because of their irregular and plant-like habits of growth, but their animal nature was finally established about 1857, and they are now generally classed with the many-celled animals. The ordinary bath sponge is the skeleton of one of these animals.

Q. Can ordinary commercial oxygen—such as that supplied to garages for welding, cutting, etc.—be used, in an emergency, for an inhalator in place of the regular inhalator oxygen?

A. Yes, this can be done. The commercial oxygen may contain small quantities of such gases as nitrogen and carbon dioxide, but the amount will be very small, and the gases themselves will not have any bad effects.

Q. What is the difference between a crocodile and an alligator?

A. They are very similar. The crocodile has a triangular head, becoming very narrow toward the snout; while the alligator has a broad, blunt snout, and is stouter, less active, and less vicious than the crocodile. There are nine different types of crocodiles, but only two different species of alligators.

News Around

(Continued from Page 7)

Move the membership of the "Absent Minded Club" up two more notches to take care of Ed Schaefer and Looie Gocke of Bldg. 4-2. Eddie came in recently sans button and had to go home to retrieve it, and on the same morning Looie appeared in his house slippers. It must be the heat.

Congratulations to Ralph Craig, Power House, who is strutting because he is a grandfather.

Bob Pence, Bldg. 4-3, is in a quandary. The other day he had his lot surveyed and found, much to his horror, that his garage is four feet on his neighbor's lot. Now what to do, is the burning question. We suggest that he obtain the services of Harry Mumma and his patent stump remover and yank said garage over where it belongs.

« «It's a Joke» »

The rich Mr. Van Casterbuilt had just bought another new car. "I say, Van," asked a friend, "you just got a new limousine last week, why buy another?"

"Aw, the bloomin' thing was headed the wrong way."

Two workmen sat down to eat their lunch and one began unwrapping a parcel about 18 or 20 inches long.

"What's that?" asked his friend.

"Well, my wife is away, so I made a pie for myself."

"A bit long, ain't it?"

"Of course it's long. It's rhubarb."

Dot: "Mother, may I go out to play?"

Mother: "Yes, daughter, but not with little boys; they're too rough."

Dot: "Mother, if I find a nice smooth little boy, can I play with him?"

"Did you post those two letters I gave you, Norah?"

"Yes'm; at the postoffice. But I noticed that you'd put the two-cent stamp on the foreign letter and the five-cent stamp on the city one."

"Oh, dear, what a blunder!"

"But I fixed it all right, ma'am. I just changed the addresses on the envelopes."

IN THE ROUGH
By
WALTER SUNIER

Sower, Winter Street, hit one into the creek last week at No. 15 at Brookwood. He went wading and found four balls—none of them his. His sour shot did not turn out so sour for him although it really was a Sower shot.

You have heard of Paul Bunyan, the famous legendary huge lumberman of the Minnesota timber section. His companion is his mammoth blue ox, Babe, an animal measuring forty-two axe handles and a plug of tobacco from horn to horn. Bunyan's wheat cakes were prepared in a pan so large that negro boys were required to skate upon its surface to spread the grease.

The Pine Beach Golf Course on Gull Lake, Minnesota is in Paul Bunyan's country. Paul is supposed to have played there and at each tee except one, there is a verse telling something about Paul. Charley Harris, Bldg. 12-3, played there and copied the verses. Paul played the 73 par course in about 20. To show you what can be done, we are giving some of the verses.

No. 3

Paul's back swing was terrific
He created such a draft,
That boys out sailing on the lake
Could not control their craft.

No. 6

"A long one, eh"? mused Paul at 6.
"I'll have to take a wider stance".
He swung the club around so far
He nearly lost his—trousers.

No. 10

On No. 10 Paul got a drink
He filled the cup and held it high.
He drank and drank and never stopped
Until the whole darn well was dry.

No. 13

To beat his record here, my Fran,
You can't be such a poke,
He stepped up to the tee with ease,
And shot the hole in half a stroke!

No. 14

Blue Babe was grazing in a field.
A couple of miles away.
Paul's golf ball hit him in the head—
He grazed no more that day.

There was no verse at No. 8, a short 108 yard hole. This hole was evidently too short for Paul to even hit a ball. He probably blew the ball into the cup.

In the Monday Evening Group in the League, the Slapsticks slapped down the Rough Riders, 171 to 177; the Plastics plastered the Divot Diggers, 190 to 196; and the Ice Cubes froze out the Turf Toppers, 188 to 191. Low scorer was Sunier with a 39.

In the Tuesday Evening Group, Bldg. 4-4 wow-wowed the All Stars by forfeit, the Dubs drubbed Bldg. 4-3, 174 to 180; and the Billy Goats butted the Optimists, 179 to 189. Low scorer was Von Whearley with a 41.

In the Wednesday Evening Group, the Hookers hooked the Trappers, 200 to 212; the Sharpshooters shot the Apprentices by forfeit; and the Fluorescents floored the Cro-Flites by forfeit.

Swinging The Hickory

By Paul Schwehn, Bldg. 4-3

Oh, happy day, this column has A reader! Notes, letters or personal comment, whether criticism or praise are always welcome to any writer.

Last Tuesday, first via messenger boy then by foreman came the anonymous note from the well-meaning peruser of the paper.

The writer believes in the ancient adage of Honest "Abe" Lincoln, "I don't think much of a man who is not wiser today than he was yesterday."

The columnist did learn a few new nouns and extends open-house to any who wish to comute any additional information — perhaps the pen is mightier than the sword.

The inter-department ball closed shop last Wednesday until July 16, when the postponed games will be played.

The old ball park on Taylor street resounded with yells and more yells when the West Side aggregation took the Messenger softballers eleven to four and the Sleepy Stators walked over the Small Motor Factory ten with a final count of eight to four.

In the West Side-Messenger game the commendable fielding of the Westerners kept the scoring of the page boys to a minimum.

The heaviest slugger of the evening was Penkul, the catcher for the West Side, he accounted for four runs, two of which were homers. Holmes, lead-off man, also clipped Boehm for two home runs.

Cowan, hurling for the Westerners, allowed three hits, two of them good for homers.

Boehm, on the mound for the Messengers, allowed 11 hits which also netted the West squad the same number of runs.

West Side	105 040	1
Messengers	001 200	1

The Sleepy Stators continued their winning streak when they took the Small Motor factorymen to the cleaners with a count of eight to four.

Fielding became the question in this second ring as the pitchers did their best to hold down the hits.

Zuber, the Rip Van Winkle pitcher, allowed seven hits, one being a home run by Kestner.

Sleepy Stators	001 131	2
Small Motor Factory	200 011	0

Team	Won	Lost	Games to play
West Side	3	1	2
Sleepy Stators	3	1	2
Small Mot. Office	3	1	2
Apprentice	2	1	3
Small Motor F'ty	2	2	2
Winter Street	1	3	2
Messengers	0	5	1

Propulsion Equipment

(Continued from Page 1)

provide power for auxiliaries in lighting.

The nine vessels, all G-E equipped, will be duplicates in all essentials. They measure 520 by 70 by 40 feet and have a dead weight of about 18,000 tons. Displacement is 23,898 tons. Each ship will carry 154,000 barrels of crude oil at a speed of better than 13.25 knots.

The five vessels already commissioned are the "E. H. Blum," "J. W. Van Dyke," "Robert H. Colley," "E. J. Henry," and "Robert C. Tuttle."

Decatur Club To Sponsor Tennis

Play began last Monday in the Men's Tennis League which is being sponsored by the Decatur G-E Club. The league is open to all Decatur Works employees.

The second shift girls have formed a league and began play Tuesday at the Worthman Field courts.

The results of the opening rounds were:

Round No. 1

H. Blyth defeated R. Schafer 6-4, P. Hancher defeated H. Gehrig 6-1, D. Macklin defeated G. Laurent 6-3 and A. Heller defeated W. Smith 7-5.

Round No. 2

P. Hancher defeated R. Schafer 6-1, H. Blythe defeated H. Gehrig 6-0, G. Laurent defeated W. Smith 6-0. The match between D. Macklin and A. Heller was postponed until later in the week.

The standings of the league following the first weeks' play is:

	W	L	Pct.
H. Blythe	2	0	.1000
P. Hancher	2	0	.1000
D. Macklin	1	0	.1000
A. Heller	1	0	.1000
G. Laurent	1	1	.500
W. Smith	0	2	.000
H. Gehrig	0	2	.000
R. Schafer	0	2	.000

The schedule for next weeks' matches on July 14 starting at 6:00 P. M. will be:

H. Blythe vs P. Hancher, D. Macklin vs W. Smith, A. Heller vs G. Laurent, H. Gehrig vs R. Schafer, H. Blythe vs W. Smith, P. Hancher vs D. Macklin, A. Heller vs R. Schafer and G. Laurent vs H. Gehrig.

G-E Shoe Team Wins 1st Round

The G-E won the first round honors in the Y.M.C.A. Industrial horseshoe league with a record of 36 wins and 12 defeats. Pennsy was second with 29 and 19, Harvester third with 22 and 26, and Zollner fourth with 9 and 39.

The second round got under way Thursday night, July 10, at Swinney park at 6 o'clock with Harvester meeting G-E, and Zollner engaging Pennsy.

The team standings:

	W	L	R	Pct.
G-E	36	12	1196	43.2
Pennsy R. R.	29	19	1114	40.2
Harvester	22	26	995	35.8
Zollner	9	39	777	29.7
Individual standings:				
Hahn	8	1	279	49.8
Rietdorf	10	2	334	48.2
Binkley	3	1	92	42.2
Saylor	10	2	343	49.7
Beckman	8	4	274	42.1
Marquart	2	2	102	41.2
Kilgore	10	2	348	51.6
Rickey	6	3	246	51.2
Kammer	2	2	105	40.7

NOTICE

Rod and Gun Club members are to continue shooting for D.C.M. qualification awards on Sunday morning, July 13. As pointed out previously it is of vital interest to the Club to have all enrolled members shoot the course. It is urged therefore that all members report at the outdoor range as soon as possible.

President Wilson Announces Employees' Share First Six Months' Profits $2,373,000

Busy In The Daytime — How About Evenings?

The above picture of Sergeant Paul V. Noble, Fort Wayne Works employee, giving instructions in machine gun fire to a group of men in the service at Camp Shelby offers food for thought in connection with the USO program to which we all are asked to subscribe. Of course the boys are kept busy at camp—it is the problem of the men away from camp that the USO is interested in. After Sergeant Noble dismisses his class and they are free for the evening what will they do? We built our camps quickly—because we had to. The towns adjacent to them were caught unprepared. They were not ready to play host to multitudes of soldiers and sailors off duty.

Quoting: "The men stand idly around on street corners; they walk up the railroad tracks; they search for such amusements as the community may offer. And if they happen to get into trouble, it isn't from devilment but from sheer boredom."

That is where the USO will enter the picture. In service clubs built by and leased from the Government in more than 360 points adjacent to military and naval centers through the country and in the overseas bases, the USO will carry forward the necessary welfare, religious, educational and social services. Can we AFFORD not to support the USO? It ranks with the most important defense contributions we can offer our country.

Help Serve The Boys Through The U. S. O.

Wholehearted Participation In City-Wide Campaign To Raise Funds Is Asked Of All Fort Wayne Works Employees

A united effort to solve one of the greatest problems involved in the training of thousands of additional men for the Army, Navy and Air Corps—that of maintaining morale, providing wholesome recreation and amusement outside of the military atmosphere of the training camps will be started in Fort Wayne next Thursday, July 24, when the drive for funds for the USO—United Service Organizations will get under way.

As in all other projects of this nature much of the success of the drive will depend upon the generosity of Fort Wayne Works employees who represent a substantial group in the civic minded body in this community.

On the opening day of the drive solicitors will be stationed at the various gates and employees are asked to do their part to the best of their ability in giving contributions.

The solicitors will include the following girls from our Works: Broadway—Pat Chapin, Bldg. 26-2; Mary Jane Wilkie, Bldg. 26-2; Margaret McMaken, Bldg. 4-3; Jean Doan, Bldg. 19-5; Roxie Drewitt, Bldg. 17-2; Lily Dunlap, Bldg. 6-4; Virginia McCormick, Bldg. 6-4; Pauline Baker, Bldg. 26-2; Agnes Sorg, Bldg. 19-4; Esta Greiner, Bldg. 6-4; Margaret Bostic, Bldg. 18-2; Vivian Hitchcock, Bldg. 21; Helen Wagner, Bldg. 26-3; Sue Cameron, Bldg. 17-4; Bonnie K. De Alzana, Bldg. 26-3; Mazie Greek, Bldg. 17-4; Mabel Bacon, Bldg. 26-2; Lois Miller, Bldg. 26-3; Elizabeth Buecher, Bldg. 17-2; Betty Meyer, Bldg. 26-2; Ruth Hess, Bldg. 17-2; Annette Nix, Bldg. 18-3; Martha Reilley, Bldg. 18-2; Esther Klemm, Bldg. 16-3.

Winter Street—Louise Schwartz, Evangelin Robinson, June Fisher and Barbara Curtis.

Many of our employees are veterans of the last World War and many others of us remember the service organizations worked to provide recreational facilities. To a certain extent these organizations

Assistant Works Accountant Named

Forrest E. Baker, General Electric traveling auditor for the last seven years, has been appointed assistant works accountant for the Schenectady works, it has been announced by I. D. LeFevre, comptroller of the company. Mr. Baker succeeds George I. Coons.

To Be Paid Early In August With Five-Year Employees To Receive 3% Of Earnings

The following statement, addressed to all employees, was made today by Charles E. Wilson, president of the Company:

"Early in August a General Profit Sharing payment of approximately $2,373,000 will be made to about 68,000 eligible employees, consisting of $2,000,000 of estimated earnings under the Plan for the first six months of this year, the same as for the corresponding period last year, plus $373,000 of undistributed earnings under the Plan for the year 1940. In August last year a payment of about $2,232,000 was made to some 60,000 eligible employees.

"Under the Defense Savings Plan, many employees have already elected to receive payment of General Profit Sharing in the form of United States Defense Savings Bonds, and I earnestly recommend to those who will be paid in cash that they buy such bonds with the amount they re-

Howitzers Are Now Made On Machines Used For Motors

Production Under Way By Men Who Formerly Made Street Car Motors

The latest 75-millimeter pack howitzers for the United States Army are being produced at the General Electric plant at Erie largely on machines previously used for making electric motors for street cars and locomotives.

Originally designed for mule transport, howitzers of this type are now towed on pneumatic tires by motorized troops. Some batteries have been carried by airplane in maneuvers. The weapon hurls a 15-pound shell nearly three inches in diameter more than five miles.

The fact that the howitzer is only 47 inches long permitted boring operations to be performed on turret lathes already in the plant and, with some changes, other tools on

• Partners In Defense

We are all partners in defense. Being a partner in any enterprise implies certain qualifications. It implies that everyone work together and in harmony to the end that the goal set for accomplishment may be reached. In a business enterprise, partners share the glory and the grief alike. Success crowns the efforts of partners who pull together.

In this present national emergency, we of General Electric are partners with Uncle Sam. Right now, it is the big job of the industrial partners in the firm of Uncle Sam to provide the sinews of defense . . . the million and one things which a nation needs to make itself strong.

We are going forward with our job. As partners in the greatest industrial and military expansion, the United States has ever seen, we are doing our part daily with as little fuss and feathers as possible.

We are all partners in defense!

They Saw What They Wanted

Imagine for a moment a group of experienced newspaper reporters who wanted to find out the truth about manufacturing conditions in a totalitarian country in these times of emergency. To say that they would "get the run-around" would be putting the matter mildly!

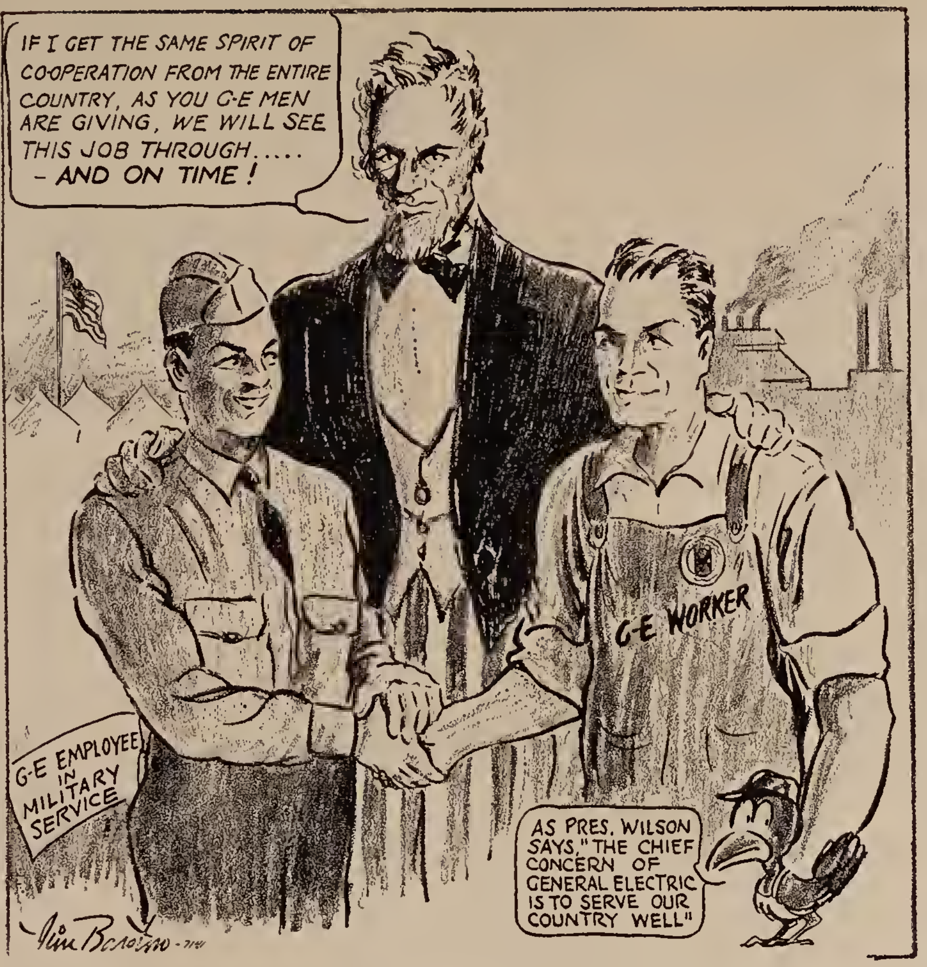
This, however, is America. So recently, knowing that the whole nation wants to know the real facts concerning defense, the National Association of Manufacturers arranged to have eleven leading foreign correspondents, many of them recently returned from abroad, make a comprehensive tour of the country's defense plants.

These men heard "Boss" Kettering, research genius who propelled the automobile industry forward by inventing the self-starter, inform them that a new submarine detector that would very nearly sweep the underseas threat from the high seas was near perfection. They got the inside story of an American bomber that is nearly as fast as foreign pursuit planes. And they saw many other defense triumphs of industry that have given them a new conception of, and a justifiable pride in, the efforts now being achieved to make America strong.

But, equally important, they were allowed to see the difficulties and the delays and the mistakes that are part of any human effort. As one former foreign correspondent put it: "We are being shown democracy girding on its armor with some fumbling and a good deal of friction. But we were allowed to see that side as well as the encouraging . . . Any restraint on what we write is self-imposed . . . It is a dignified, honest press trip for the purpose of letting correspondents qualified by war experience see for themselves what is going on. . . . And we are being shown things worth seeing and worth reporting."

Thus industry, part of the pattern of our free American way of life, is willing and proud to let the real facts speak for themselves. It is this kind of comparison between freedom and totalitarianism that not only shows the human quality of the former but will demonstrate its superiority in any kind of test.

PARTNERS IN AMERICA'S DEFENSE.



IF I GET THE SAME SPIRIT OF CO-OPERATION FROM THE ENTIRE COUNTRY, AS YOU G-E MEN ARE GIVING, WE WILL SEE THIS JOB THROUGH..... - AND ON TIME!
G-E EMPLOYEE IN MILITARY SERVICE
G-E WORKER
AS PRES. WILSON SAYS, "THE CHIEF CONCERN OF GENERAL ELECTRIC IS TO SERVE OUR COUNTRY WELL"

Reservations For Trip To Milwaukee Close Tuesday

Reservations by employees who wish to participate in the excursion to Milwaukee on Saturday, July 26 are advised that they must be made not later than next Tuesday, July 22. The charge of $7.00 for non-members of the Elex Club will include rail fare to and from Chicago; boat transportation to and from Milwaukee and a two hour sight-seeing tour in Milwaukee.

The feature of the trip will, of course, be the boat trip which will permit views of Chicago's famous "Gold Coast" shore line, historic Fort Sheridan, the Great Lakes Naval Training Station, Evanston, Waukegan, Kenosha, Racine Reef Light and many other points of interest. Entertainment will also be provided on the boat.

The excursion party will leave Fort Wayne at 6:15 a.m. Daylight Time and arrive at Chicago at 8:50. Leaving Chicago at 9:30 by boat the excursionists will arrive at Milwaukee at 2:45. The return trip from Milwaukee by steamer will start at 4:45 reaching Chicago at 10:15. The special train will leave Chicago for Fort Wayne at 10:15 p.m. and reach this city at 12:30 a.m.

Serve The Boys

(Continued from Page 1)

worked under a definite handicap and it is proposed through the excellent plan of the USO to overcome these handicaps. With a full understanding of just what the USO will mean to the men in the service it is anticipated that the response will be most generous.

Widely Endorsed

The USO has received nationwide endorsement. It is supported by the president, Secretary Stimson, Secretary Knox and Federal Security Administrator McNutt.

Its national campaign chairman is Thomas E. Dewey and it's honorary chairman is Gen. John H. Pershing.

What Is The U. S. O.?

The United Service Organizations for National Defense, Inc., is a non-profit corporation which brings together six national agencies in a common program of service to our defenders. These agencies are: the Young Men's Christian Association, the National Catholic Community Service, the Salvation Army, the Young Women's Christian Association, the Jewish Welfare Board and the National Travelers Aid Association.

Who Will The U. S. O. Serve?

The U. S. O. will serve soldiers, sailors, and marines and men in camps and bases where there are no adequate resources in nearby communities for recreation and welfare activities.

Our folks in the service cannot be left to their own resources when off duty because it has been found that areas surrounding camps are inadequate in their resources for men who come to town by the thousands, find themselves without proper recreational facilities, without friends and with little to do but to stand on street corners or to be importuned by those who seek to exploit service men commercially or viciously.

The U. S. O. will establish more than 300 service clubs outside of camps, naval stations, and over seas bases. The Government will provide the buildings, and the U. S. O. will have to find the funds to operate these clubs and their programs.

The U. S. O. has a complete program to serve the religious, spiritual, welfare, educational and social needs in the armed forces and defense industries of the United States, and in general to contribute to the morale of our defense forces and the communities in which they are based.

To attain these ends, each club will have its own program designed to meet its peculiar local needs. They may include such projects as:

Religious service for those of varying faiths, in cooperation with

(Continued on Page 3)

Pension Deductions

In accordance with the terms and provisions of the Additional Pension Plan, deductions are based on earnings. The deductions for the second half of 1941 will be based on earnings for the first half of 1941.

These deductions are now undergoing semi-annual revisions, and the revised rates will become effective with pay received July 25, 1941.

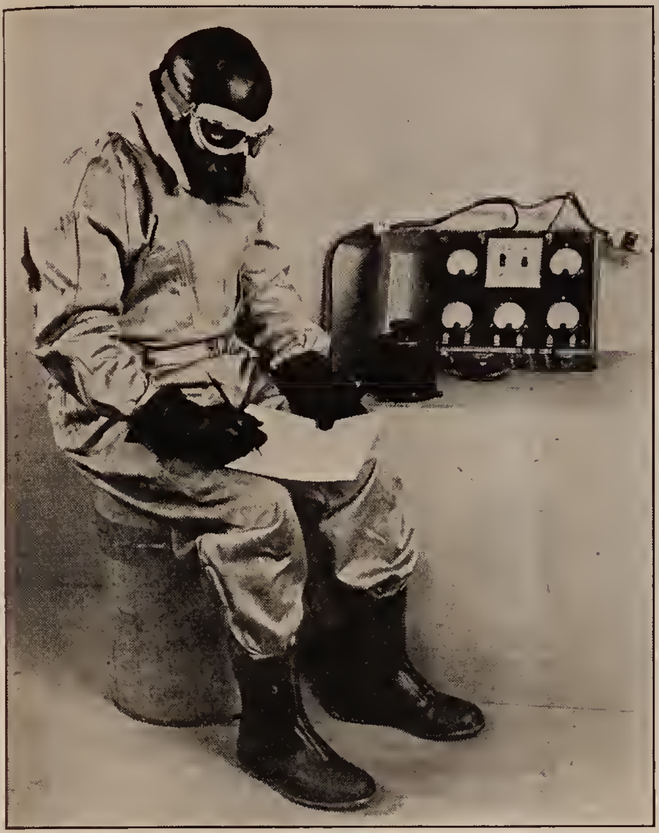
G-E To Make Electrically Heated Suits For Flyers



The first large-scale contract for a newly perfected electrically heated flying suit to keep aviators warm at high altitudes has been awarded to the General Electric Company, Bridgeport, Conn., by the U. S. Army Air Corps. The order includes 12,000 suits.

Designed to keep an aviator comfortable through a 130 degree range of temperatures from 70 degrees above zero to 60 degrees below zero, the new flying suit is wired throughout and the amount of heat supplied electrically is controlled to adjust for changes in temperature.

The new suits are many pounds lighter than the sheepskin-lined garments they replace—an advantage in itself in flying—and will give the aviators far more facility in manipulating instruments, controls, and armaments. And the whole outfit will be supplied at less cost to the government.

General Electric has been working for months with Army technicians in developing and improving the suit. While development work has gone on, factory space and facilities have been made ready, and the suits will begin to come off the production line in six weeks. Valuable background knowledge in making the suit was gained through General Electric's several years of experimentation and testing in the development of its electric blankets.

The advice of Arctic explorers, physicians, and laboratory scientists, as well as that of flying men, contributed to the final design of the flying suit. Exhaustive laboratory tests were followed by flying tests by test pilots at Patterson Field throughout the winter. One bomber crew flew to Alaska in electrically heated underwear.

During the investigations the electrically heated uniform of a German aviator shot down over England was analyzed by the General Electric research laboratory and was found to be so inadequate in the amount of heat it applied as to be almost worthless.

The first design produced by G. E. was an adaptation of the Army's standard summer flying suit, into which wires were sewed in parallel lines. Fine leather gloves, wired on the back and at the wrists, plugged into the sleeves of the garment. They were made of a material and design commonly used in ladies' dress gloves. This construction assured convenient operation of gun triggers, camera shutters, and instruments where a delicate sense of touch is important.

The original boots were heated by means of an insert shaped like a clover leaf. Wires were cemented between layers of the insert and a connecting cord plugged into the legs of the suit. When the clover leaf was inserted into a standard intermediate flying boot, the center leaf became a heated innersole and the other two leaves folded over the ankles.

Electrically, the complete assembly consisted of two circuits for the suit, one circuit for gloves and one for boot inserts. The four circuits were connected to a switchbox at the waist which permitted independent use of heat in shoes, gloves or suit. From the switchbox a short pigtail connection provided means for connecting the assembly to the control box which in turn was mounted on the ship and connected with the source of power, the ship's batteries.

Frank G. Manson, equipment engineer at Wright Field, Dayton, Ohio, directed exhaustive tests of the original development. The fundamental design was enthustically endorsed, but a number of improvements were suggested to be included in a new flying suit to be tested on an experimental flight of bombers in Alaska.

Part of a tremendous job was a search for better material for every part of the suit. On one item alone 50 supplies were contacted. All materials had to be made of raw materials readily available in the United States. Nothing could be used that deteriorated or changed its properties in hot or subzero temperatures. Assisting in the problems involved were Dr. W. D. Coolidge, director of the G-E research laboratory and a member of the National Inventors Council for Defense, and W. K. Kearsley, inventor of the automatic electric blanket.

In the new flying suit, heavy woolen union suits were selected for the garment because wool was elastic and a good insulator to keep in the heat. The wires were sewed in parallel waves to give an accordion effect which would stretch with the wool to conform with movements of the body. The switchbox was eliminated and the pigtail connection improved to permit a quick break in the event the wearer had to bail out of the plane.

After the bomber tests in Alaska new improvements were suggested. The final design resulted in a garment consisting of an outer shell of all wool cut on the bias for elasticity. The wires were sewed on the inside of the outer shell. The lining was made of 100 per cent cotton cloth. The cotton lining permits radiation of heat to the body, while the outer woolen shell reduces heat loss to the air. The cloverleaf shoe insert was supplanted by a wired cloth boot of olive drab overcoating with molded rubber soles. This electrified boot is worn inside standard light aviation boots.

An outgrowth of preliminary studies by Manson and D. C. Spooner, Jr., manager of the G-E pioneer product section, was Manson's suggestion that the automatic electric blanket could be adapted for use in ambulances. Spooner pointed out that the flying suits were designed to provide more heat than was needed for maximum comfort to protect the wearer in case he was injured in action. An injury or operation is generally followed by shock and the patient is likely to suffer chills that frequently develop into pneumonia. Spooner reasoned that an injured flyer could call on the excess heating capacity to lessen the incidence of shock and pneumonia.

As a result of Manson's suggestion, several ambulances are being equipped with automatic electric blankets on an experimental basis for the British-American Ambulance Corps.

Aid to transient service men.

Contacts between soldiers and their homes when necessary.

NEWS FROM THE CAMPS

We publish herewith with great pleasure extracts of letters sent to us by G-E employees now in government service. Address all communications for this column to the WORKS NEWS editor.

Private Robt. Knoche, Co. A. 80th Armored Regiment (M), Pine Camp, N. Y., writes in the following vein: . . . "Except for being tough at first, the eight weeks I have spent in the army have been most interesting. The first few weeks of learning discipline and the manner in which the army does things were the toughest. He continued with the statement that his outfit is a medium (28-ton) tank regiment and that in addition to driving instructions he is being taught the care and operation of machine guns and small weapons.

"The most fun we have had so far is driving these tanks, and I have taken a great liking to such. July 8 was the date for the beginning of company and regimental schools for all those qualified for training. The instruction period will last until August 15, when those who have made good will be given ratings and transferred to regular units. The schools attended are for appointments as non-commissioned officers, radio, truck and tank driving. I qualified for radio so I spend four days a week learning the Morse code.

"The chow they feed us is swell. In fact our mess hall has the reputation of being one of the best in the division. Have gained several pounds but charge that to having beans and eggs practically every other meal. The climate is inclined to the wet and coldish side but is not bad. However, this ankle deep sand is everywhere. We grind it between our teeth at meals and sleep on it at nights."

THOMAS J. CONROY

Private First Class Thomas J. Conroy was the first man to be inducted into service from the Fort Wayne Works. He writes that up to date he has completed eight months of extensive army training and at the present time is on detached service at Fort Knox, Ky., where he is taking a special merited radio operator's course. When the course is completed Private Knox will return to his Company at Pine Camp, New York. Regarding the service, he says "It's really swell, boys, lots to eat, all the time in the world to sleep, and boy if you think you're a man now, wait until you complete your year's training. Plenty of hard work and hundreds of hikes. You bet I miss my girl and my family."

* * *

From Private Sam Schladenhauffen, Co. B. 113 Med. Regt., 38th Div. at Camp Shelby, Miss., we hear: "I received the WORKS NEWS and appreciate it very much, and it will be a pleasure to receive the paper each week. Letters and news from home are the gem of the day to every soldier. The joker is to get letters you must write letters and that gets to be quite a chore at times, added to other spare time duties. I expect to be on furlough July 23.

G-E Announces New Lightweight, Compact Travel Iron

A new smartly styled, compact and lightweight travel iron has been designed by the General Electric heating device section in Bridgeport, Conn.

The Textolite handle of the iron folds against the iron top in a jiffy, and the whole thing slips into a neat little zipper travelling case. The overall weight is less than two pounds and the iron can be tucked away in space less than that required by a week-end's readying.

But the versatility of the new little iron doesn't stop there. Its cool Textolite handle is molded for comfort, has thumb rests (for both right and left hand) to relieve muscular strain. The Textolite heater plug is also reversible for right or left hand use.

On top of the iron is a thermometer to show the correct soleplate temperature for safe ironing. Built for long life, the heating unit is a nickel chromium resistance ribbon wound on sturdy sheet mica core.

All set for week-ends at the seashore, the iron is heavily plated to resist corrosion from salt water air. The General Electric cord is equipped with a rubber wall plug with anchor loop prongs to hold tight to the electrical outlet. It operates on either alternating or direct current, 500 watts, 115 volts.

Profit Sharing

(Continued from Page 1)

ceive as General Profit Sharing, thus saving for the future and, at the same time, helping provide for National Defense.

"The amount to be distributed in August is equivalent to the following percentages of earnings of participating employees for the first half of this year: 3 per cent for employees with five or more years of service; 2 per cent for employees with three or more but less than five years of service; and 1 per cent for employees with one or more but less than three years of service. These percentages are not as large as the corresponding percentages a year ago because the Company's payroll is substantially higher, due both to increases in the regular earnings of employees and to the addition of many more employees who have become eligible to share in the distribution, whereas the amount of General Profit Sharing to be distributed, in keeping with the Company's earnings as shown below, is approximately the same as for the first six

(Continued on Page 4)

G-E Building At Everett To Be Windowless

Fluorescent Lamps And Air-Conditioning To Take Place Of Openings

To meet the requirements you have specified, you will need a building without windows. That was the consensus of opinion of five architectural firms which had been asked to submit plans for a new single-unit factory for the Simonds Saw & Steel Company.

"Why windows? They are only something to keep clean," replied G. K. Simonds, president of the company. "Go ahead without them."

And thus the first windowless factory in the United States was built in 1931.

Little did anyone realize then a factory of that type would be of such vital importance in the defense program of today. No one 10 years ago could have foreseen its inherent "blackout" advantages. It was not this feature which caused Mr. Simonds to act. He saw in such a plant, uniform illumination 24 hours of the day; controlled atmosphere, including both humidity and temperature; less noise and, as a result of all these, fewer mistakes by workmen, less accidents and greater all around efficiency in achieved results.

However, before the Simonds plant was fully completed and ready for occupancy, the depression came and it was not until 1939 that the first windowless factory was actually put into operation. Now with the vast defense program under way, industry being called upon and subsidized by the government to erect more buildings, seven or eight plants of the windowless type are being erected or have been completed within the year, including huge new structures for Douglas Aircraft, General Motors, North American Aviation, Consolidated Aviation and General Electric. One of the largest now being built in the East is the new plant of the General Electric Company at Everett, Mass. This huge brick structure, one story in height and providing more than five acres of production factory space under one roof, will be used for the manufacture of superchargers — devices which permit airplanes to fly at altitudes of 25,000 or 30,000 feet, or at much greater heights than is possible by planes not so equipped.

The entire manufacturing area will be uniformly lighted by the newest of fluorescent lamps, which come nearest to duplicating daylight, and air-conditioned so that on the hottest days of summer the temperature will be at least 12 degrees cooler inside. 100,000 cubic feet of fresh air per minute, four times the amount required by the state health authorities, will be circulated by means of large ducts to all corners every hour. Reflectors extending the entire length of the building, housing at frequent intervals two 100-watt fluorescent tubes, will spread 50 foot candles of light uniformly and without shadows throughout the plant. This will be double the average light in present-day factories. It will be better than most school rooms under artificial light. Interior facing of the walls will be of buff-colored tile, glazed and therefore easy to keep clean; and the roof will consist of a steel deck, serving also as an accoustical ceiling and dampener of noise.

"Continued progressive advances in the science of air-conditioning and lighting have made possible the creation of desirable controlled working conditions in this type of windowless plant," J. G. Trudinger, plant engineer in charge of design and construction, points out. "It is now possible to maintain 24-hour operation of a factory under conditions favorable to all of the working shifts, a highly important factor in these days when every individual organization is striving toward maximum output.

"The temperature in the buildings, where machine parts are finished to limits of one ten-thousandths of an inch, and where sudden changes in outside temperature occur (particularly noticeable on the New England coast where an east wind is apt suddenly to spring into action) is perfectly controlled with air-conditioning. The absence of windows plus good insulation and internal heat liberation from manufacturing processes provide all the heating necessary until the outdoor temperature drops below 15 degrees above zero. Thus heating costs will be reduced considerably.

"It is interesting to note that progress has not been confined to air-conditioning and lighting; new ventilating, insulating and accoustical control devices are all making their contribution. We must not overlook the fact, too, that in addition to the complete elimination of dirt, dust, and draft in 'windowless' buildings, substantial savings may be effected in window maintenance.

"Of special importance, of course, is the fact that the building is completely 'blacked out' and invisible at night from the air. The roof treatment lends itself to easy camouflage.

"When the present emergency ends and the story of present-day building progress is written, the place assumed by the 'windowless' factory during this critical period in our history may hold a deservedly conspicuous position."

Reaction of workmen to this new type of building has been most favorable in the Simonds plant, according to R. C. Hill, factory engineer. This plant is now operating on two full and one part time shifts. Many of the machines never stop. As the workmen of one shift complete their eight hours, they step aside and the new gang takes over. Most of the employees are on day work, so it makes little difference if a particular job is but half finished when the whistle blows.

NO OTHER PLACE TO SIT

This picture, taken recently, is said by U. S. O. officials to illustrate conditions near many training camps. The nightly and weekend influx of service men has overwhelmed small neighboring communities. Boys on leave can't get into the movies or decent hotels, restaurants or dance-spots. Some can't even find a place to sit. The United Service Organizations will maintain more than 360 spacious clubhouses to relieve tbis demoralizing situation.

New Department

(Continued from Page 1)

ordnance for the U. S. Navy. Other departments of the Works as well as other plants of the Company will provide special parts for use by the new department, which will also draw upon the facilities of the Naval Ordinance Department.

The product of this new department is something new to the Fort Wayne Works, and there is much to be done in the way of securing equipment and materials before initial production can be undertaken.

Mr. Weitzman began his service with the Company in September, 1906, when he enrolled as an apprentice. Later he was transferred to the Tool Division, and in June, 1922, was made assistant foreman of the Apprentice Department, succeeding to the foremanship soon after.

Some years later he was assigned to tool design work in the Refrigeration Department, and in July, 1935, he was named superintendent of the Tool Division. He continued in this capacity until 1938, when he was named superintendent of the Refrigeration Division.

Mr. Knaus joined the General Electric test course in 1930 after graduating in electrical engineering from Washington University, St. Louis. He remained in Schenectady until the fall of 1934, during which time he was on test for one year, a member of the Engineering Department for three years. He completed the course in advanced engineering in 1933 and came to Fort Wayne in the fall of 1934 to join the Engineering Department at the Winter Street plant. Up to the time of his present assignment he was in charge of the Developmental Engineering section of the Winter Street plant.

Profit Sharing

(Continued from Page 3)

months of last year.

"As you know, General Profit Sharing has been distributed semi-annually in recent years and such payments have necessarily been based upon estimated figures. However, due to the uncertainties of the times, it is becoming more and more difficult to make accurate estimates. For example, there are frequent changes in the revenue laws, usually effective retroactively, which necessitate steadily increasing the provision for taxes, thus reducing both the Company's earnings and the amount available as General Profit Sharing. Therefore, notice is hereby given that for 1942 and subsequent years, any General Profit Sharing distribution will be based upon the Company's actual earnings for the full year and will be paid annually, in accordance with the provisions of the original Plan, on or about April 1 of the year following that for which such payments are made. Accordingly, any payment of General Profit Sharing for the last half of the current year will be made on or about April 1, 1942.

"Net sales billed by the Company during the first six months of this year amounted to $300,332,085 compared with $191,619,132 for the same period last year, an increase of 57 per cent.

"Profit available for dividends for the first half of this year amounted to $26,003,665 compared with $25,981,572 for the same period last year. These earnings, which were equivalent in each case to 90 cents a share of common stock, were after provision for federal income and excess profits taxes of approximately $52,000,000 for the six months' period this year compared with $19,000,000 for the same period a year earlier.

"A dividend of 35 cents a share of common stock is payable on July 25, making a total of 70 cents a share in dividends to stockholders for the first half of this year, the same as was paid for the corresponding period of 1940."

Make Howitzers

hand were adapted for the work. Special rifling equipment had to be installed. Assembly line production has been under way for some months with the men who formerly made motors now making howitzers.

Maximum portability, striking power for its weight and complete interchangeability of parts are features of the pack howitzers. It can be quickly disassembled into parts small enough to be moved on mules and reassembled with interchangeable parts. The heaviest part is the gun tube, which, with its muzzle and breech hoops, weighs only 221 pounds. A feature of the howitzer is its ability to drop its projectiles accurately behind hills, buildings or other obstructions.

All through production, from the time the carbon steel forging for the tube is received rough-bored and turned, constant inspections are in order. Parts must be made to exact measurements as the howitzers must be assembled in the field with few or no tools. Parts must have definite fits and enormous stresses must be withstood in firing.

After individual parts are finished by the machinists and have been checked by the Army inspectors, they are sent to the assembly where hand operations are in order. There the machining burrs are removed and the parts given their final polish. Tungsten carbide tools are employed in the turning operations.

At one point the bore of the tube is inspected with a "bore-scope." This is a tube which extends into the bore and carries a mirror at the far end which reflects an image of the surface into a microscope. The surface is illuminated by an electric lamp and is magnified 20 times in order that any defects in the surface may be detected.

Individual parts are inspected, then assembled and reassembled at random to prove their interchangeability, and three rounds of primers in empty shell cases are then fired in each howitzer to check the breech mechanism. A final inspection is then made and packing cases receive the howitzers, ready to be shipped out for their mountings, recoil mechanisms, and other parts not made at Erie.

Increase Is Shown In Stockholders

General Electric stockholders on June 27 totaled 217,340, an increase of 6,223 over a year ago, it was announced this week by W. W. Trench, secretary of the company. The present number to whom the July 25 dividend will be paid is an increase of 1,782 over the last record date, March 14, 1941.

»» NEWS THROUGH THE PLANTS ««

'Twas a sad day when they moved the Employees' Store over next to the "Scrap Shed." At least sad for my cousin Colin, Uncle Angus, my niece Bonny, nephew Douglass, and all the rest o' the Scotsmen who work here.

Ye might not believe it, but we Scotsmen are sae horrified at the sight o' waste, and are sae broken hearted when ever we see a scrap pile that they have tae blindfold us tae get us tae the Employees' Store.

I can't think o' anything sadder than the thoughts o' the thwarted lives and happiness o' some o' the scrap in that derelect's graveyard. Imagine a bright and shining aluminum sheet or coil o' copper wire, well made, of good material, and ready to take its place in service to humanity or in defense o' its country. Then, some ruthless engineer comes along and spoils the design, or some stumbling workman bungles its shape. Gone is that happy prospect of a bright future—nothing left but a sorrowful trip to the scrap shed.

Now, if this scrap didn't cost anybody anything, it wouldna' be quite sae bad.

But it does cost something. A whole lot, in fact. And it's costing US (and I do mean you and me). Some o' us pay for part o' it directly, and ALL o' us pay for it indirectly, both in wages we don't get, and in higher prices we pay for goods.

Weel, o' all the people I ken who can't bear tae see onnything wasted, I think my cousin Colin is the most allergic. One day it took him two hours tae get home from Transfer Corner because o' it.

"Sandy", he told me later, "For a while I thought I'd never find anybody wi' a tronsfer they weren't going tae use."

Residents of East Rudisill Boulevard thought they were being treated to an automobile parade Monday night, but it happened to be about 30 members of the Receiving Department gang, Bldg. 6-1, going out to say goodbye to Joe Rygowski who is going into the services of Uncle Sam. And we are willing to lay a bet that when they measure the chest of that man's 6 ft. 2 in.; 222 lbs. of bone and muscle, he also will exceed specifications.

Upon saying goodbye to Joe at a very late hour, the boys presented him with a handsome purse and wished him the best of luck on his new job.

To say that the boys had a swell time is putting it mildly as Joe's folks sure are great entertainers. Poor Joe, however, didn't get to spend much of his time with his best girl, as Stubby Kirtz and Lanky Whetstone looked after her practically the entire evening.

Sleuthing In 4-6

We are sure all the friends of Lucille Jockel will be glad to know that she is feeling much better, and last week was able to go out of the house for a drive to Hamilton Lake. Keep on improving, Lucille, we are all thinking of you. . . . At this time we wish to express our best wishes and hope for many years of happiness to Iva Uran, who became Mrs. Earl Moser on June 28th, and to Georgianna Miller who became Mrs. Andrew Handlin on July 4th. . . . "Red" Raney is taking after Harry Richardson. He took his radio apart and had to have it put back together again by somebody else. What's the matter, has the garage man a good looking daughter? You Casanova-You. . . . Virginia Selby was showing pictures taken during her vacation and one of the pictures has us wondering who the fellow standing so awfully close to Virginia was. . . . It is understood that the new expensive rod Herb Reitz bought hasn't been worth what it cost. The number of fish still is zero. . . . Did you hear about Wilma and Wally McKay? It was a secret, but it isn't anymore. They can't rhumba so they had an awfully hard time trying to dance to rhumba music in the Sapphire Room in Indianapolis. . . . The fellows had to read their own or their neighbor's newspapers last week as News Commentator Wilt was on vacation where he "accidentally" made news. We are glad that none of his family were seriously injured in the automobile accident which smashed his car. . . . The prize boner of the week goes to Charlie Yager. It seems that Charlie's brother had a nice big pike on the line and was cautiously drawing him toward the boat when Charlie decided to lend a hand. He got out the fish net (the minnow one) and tried to get the big fish scooped into it. It didn't work and somehow or other the hook came out of the fish and Mr. Big Pike went back into the lake. Was his brother disappointed—well, could be. . . . If any person in Bldg. 4-6 has an item for this column in the WORKS NEWS, please mail it in an envelope to "The Sleuth," in care of Mildred Gertz, Bldg. 4-6. This will not guarantee the article getting into the paper, as all items must pass a censorship committee.

The Sleuth.

Plastic Flashes

The Tillies are having to snoop extra hard as vacations have started and the Plastics Department seems to be behaving pretty well lately.

We wonder why Grace Funk wishes she were back in the fifth grade.

The love bug has been at it again. This time it bit Lillian Hatfield, who has promised to say "I do" to LaMoyne in August. Congratulations, you two!

Zola Hetrick isn't singing the blues any more. At the last minute Uncle Sam decided Ivan wouldn't have to leave her for a year.

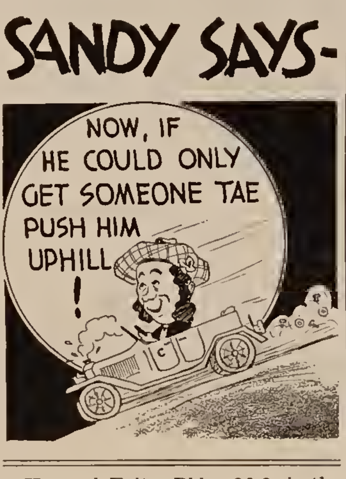
Floradella Amstutz is certainly looking blue since Bill went back to the third shift.

Nadine Cobb has that certain look in her eyes since her one and only has been using the airmail to hasten his letters to her.

Joy Stucky hasn't been the same since she came back from a week at the lake. Tch! Tch! Joy, the orchestra wasn't that good was it?

Why wouldn't Tom Cameron, Bldg. 12-3, eat that delicious apple presented to him by Betty Perry?

The Tillies.



SANDY SAYS-
NOW, IF HE COULD ONLY GET SOMEONE TAE PUSH HIM UPHILL !

Howard Fritz, Bldg. 26-2, is the proud father of a baby boy.

Virgil Schultz, Bldg. 26-1, has discovered a new safety hazard. He shuts his finger in a drawer and then tries to pull it out. The worst part is that Virgil was unable to hold a fish pole for a week.

Charley Penn, Bldg. 26-2, had a good time on his fishing trip. We don't know whether he got any fish or not but he claims that they were so big they jumped in the boat and chewed him up. After looking Charlie over we are inclined to believe him. Mosquitoes could never have done it.

Marge Green, Bldg. 19-4, would like to know who the guy is she has been getting notes from. He even has his own special messenger.

Borings From 4-4 Office

Here sits the body of the dear beloved rat learning the facts of something—perhaps it is of life—who knows? Orchids and Onions is my theme for this week's discussion. Orchids to a certain young girl with poison ivy (ivory). She is just new in our midst and has a beautiful breaking out of the hateful stuff. Now the problem is, how did she get it and where? Her name is Doris Lamle, so if you really want to know ask her poisonally (personally, to you) . . . Orchids also to Virginia Plummer who stands out on Broadway fumbling through her purse, meantime she is holding up the traffic, just like a real flat-foot . . . Now we come to handing out the onions. These go to a certain class of people who go around just a buzzing to themselves about girls who let their hair drop down their back and of course these people are none to talk. Perhaps I should say orchids, 'cause these other girls with long hair have sorta pinned theirs up. But I'll betcha tomorrow all the hair comes down for a rip-roaring good time at some resort . . . I realize that in the past I haven't been too original in my column but nobody can be original all the time. We all copy our dress, habits, walks and talks of life, but just because I use the sayings of some I get criticized. (Gee, I even get in the critics row) . . . Did you know that yours truly over-slept over an hour the other day? Not even the consistency of a Big Ben and G-E Electric can budge me in my sleep. I just wake up and die right. . . . Cliff Bowman is back to work after his vacation and he looks all rested too . . . Ivan Butler worked so hard last Monday that he thought he had done a week's work in one day. So after working eleven hours, he placed his card in the little black box after he had rung out . . . It's bundles for Jean—well anyway — almost weekly Jean Bugert comes to work with big bundles for her hope chest. Today it was curtains, and last week it was a bed spread. 'Tis enough for now and please try to be real good or I'll send you a bunch of onions. Sincerely as ever,

Elmer, the field mouse.
The Rat to you.

Margaret Woodard's Bldg. 4-3, theme song since she came back from her vacation is, "I Love to Ride the Ferry."

How to keep cool. Particulars can be obtained from Louise Sinn. She brings her cooling drink already mixed. Then all she needs is the cool water provided at our fountains.

Wonder why the big smile on Grace Ledbetter's, Bldg. 4-3, face Monday morning. Hope it lasts all week.

From The *Feminine Viewpoint*

By Irene Perry and Hilda Barthold

It's vacation season once more, and the question of the hour after settling where to go and how to get there is, "What to pack and what to omit?"

Each person has an individual problem of course, as regards the length of trip, whether by car, train, or 'plane, the type of vacation, seaside or lake resort, long automobile sightseeing tour, big city, dude ranch, fishing trip, etc., so the choice of clothes and accessories will be governed largely by the kind of vacation you plan to take, but there are certain problems of packing that are common to vacations in general.

It's a good plan to buy your favorite cosmetics in ten-cent sizes, but be sure to have an adequate supply, for while it's possible to buy a fresh supply, it isn't always convenient and also it takes time. The same thing is true of postage stamps, take a supply with you and save time and inconvenience.

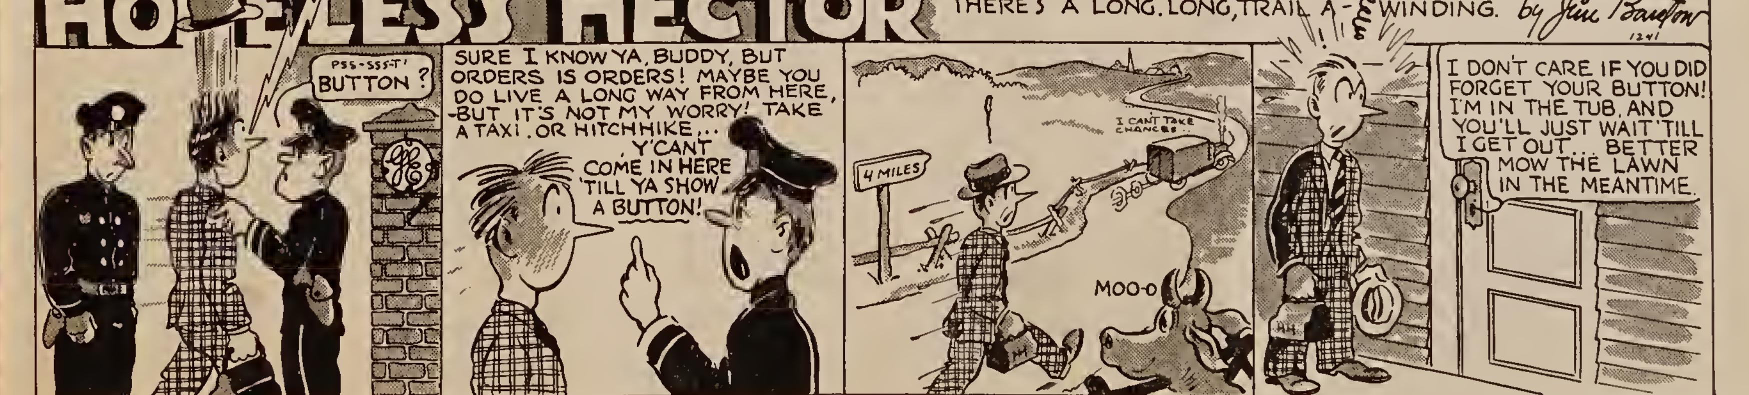
A small whisk brush for clothes, and a rubber brush for hats, and a brush for shoes will help to keep you looking spic and span, and for a long trip a travel-size iron to keep clothes pressed, while on any trip, long or short, a little sewing kit for emergencies. Take a tiny box of aspirin tablets, and perhaps a few tablets of milk of magnesia in case of eating too well, or the wrong things.

Shoes are always a packing problem, and unless the budget runs to an extra bag for them, we suggest that each shoe be wrapped in its own shoe bag; these are not too expensive to buy or improvise from a pair of men's sox.

Take a light bathrobe, one which will serve for pullman, bedroom or beach. It's well to carry a tiny bottle of your favorite perfume, tightly capped or corked, of course, in your purse and an extra pair of hose in case of run or snag when you may be far from your hotel or camp.

Hilda.

As the vacation season is now on in full swing, we, of the reportorial staff, expect to gather a wealth of material with which to fill these pages. We herewith present the first of the crop. Our "Triplets of the Big Swamp", comprising Art Brandenburger, Sam Allmandinger and Harry Mumma, all of Bldg. 4-3, report a good time. Art reports a goodly measure of boating, Harry reports the capture of some 2500 bluegills, but Sam, being the most fortunate, captured himself a wife.



HOPELESS HECTOR
THERE'S A LONG. LONG, TRAIL A-WINDING.

4 MILES
I CAN'T TAKE CHANCES
MOO-O
I DON'T CARE IF YOU DID FORGET YOUR BUTTON! I'M IN THE TUB, AND YOU'LL JUST WAIT 'TILL I GET OUT... BETTER MOW THE LAWN IN THE MEANTIME.

NEWS THROUGH THE PLANTS

26-5 Tool Bits

Richard Kelly will probably do some street mopping since he bought one of the earlier model motorcycles. . . . Ralph Steward and Russel Dunten are back on the job again after a week's vacation during which they saw quite a bit of the country, Ralph going to Canada by the way of Niagara Falls and Russel to Texas. . . . Between them we ought to get a good idea of what the country looks like—which we will, of course. . . . Jack Schemehorn is planning on a fishing trip in Canada and is doing a lot of worrying about the bait. He thinks maybe he will have to change his way of fishing, which, we hear, is to tie a "helgramite" on a line and throw it into the water and let it grab the fish. No it won't work on trout. . . . Earl Lenz certainly received a greeting from the boys when he returned from his vacation. A nice big "Welcome Home" card posted in a prominent position. In making his trip to the Smoky Mountains Earl broke an old tradition by traveling farther than Sandusky. . . . Bill Millige is planning on a repetition of the good times he had last year at the gravel pit. . . . The Tool Department staged a farewell party for Walter Konow who is transferred to the Winter Street plant. The party was in the form of a steak fry at Foster Park and was attended by approximately forty persons. Mart Kimble made his bid for fame by pitching in one horseshoe court and making a ringer in an adjacent court. Ed Steward called his ringers before he threw them while C. A. Brenner and Mike Lowe made a quick victory over Jim Mitchel and Elmer Fretz. . . . George Hauser and L. Dolan won pitching honors in the baseball game with Irma Wyneken showing her skill as a home run hitter and how to take a spill while chasing a fly. The rooting section consisted of Vera Beam, Betty Larimore and Dolores Wyneken. The gang was about famished when Chief Breidenstein bellowed "come and get it." Ed Schafenacher took first prize for consuming the most steak. The guest of honor was presented with a bottle of cheer—minus a bottle opener.

After the meal Superintendent Brenner gave a fine speech on the merits of the honor guest and presented him with a gift from the group. In reply Mr. Konow nervously arranged his necktie and did his stuff in thanking everyone for the cooperation given him during his twenty-three years of service in the Tool Department. Some party. . . . There are rumors about Nol: Decker but we're not sure. We will let you know next week. . . . Henry Hassig had a distinguished guest over the week-end. No other than Menno Steiner who sings with the Chicago Civic Chorus. With him was Dr. Clye Weiland. A program was enjoyed at the Hassig home on Sunday afternoon. . . . Margaret Ryan is sporting one of those brilliant little stones called a diamond. . . . Lonnie Rackstroh, the dashing blonde of Bldg. 26-5, looks like a chocolate drop since her vacation at the lake last week. We don't believe the assertion that Lonnie and Ruthmary Riedy are perturbed because they are the only two left in Aircraft without engagement rings.

"Blue Gill" Joe Hartman just returned to work and claims the record for being able to catch fish. All big ones and enough of them to give all the neighbors some. Claims he could get the limit in two hours out of the same hole. We don't doubt it; but it sounds more like he was ice fishing.

Earl Lenz hit a nice detour in the hills of Kentucky on his vacation (in the rain). The detour led him to a river without a bridge. Earl read the sign which said Ford, he didn't know what to do, whether there was a Ford in the bottom of the river or whether Ford's were the only car that could make it, or whether to forge ahead, so he chose the latter and safely crossed the river. Why not, four cars and a truck had passed him while he was making up his mind.

Sunbeams From 17-4

Nancy McKinley, Ruth Ann Schilling and Marjorie Morrison have really turned the old glamour on Muriel Kessler, and what is worrying Muriel is, is it the man, the new car or the safety medal on the back of said car?

Anyone seen my little bird today? It doesn't sing, it just goes "cheep, cheep." Maybe Jerry Pierce or Louie Groves has seen it.

Eugene (I forgot) Weaver, sure has his ups and downs in this old world. He is the elevator man.

The girls in the clipping section had a farewell dinner for Betty Harpel who is leaving the plant, and Alta Reed sure put up a howl because her piece of cake was thinner than she thought it ought to be.

I betcha Ed Meyers is going in the fishing tackle business when things get slack. He has more now than the Main Auto.

Thought for the week: Success is the result of a good idea and hard work.

Granny.

Here 'Tis From 17-1

A few more of the boys from Bldg. 17-1 we would like to have you meet; Sap Quinn, who's far from being one. Mason, who would rather be a carpenter. Burns, but never blisters. Daring, but not too brave. Hoot, a wise old owl. Coleman, who doesn't haul coal. Wright, sometimes he is. Moodie, who is always cheerful. More, who will take less. Hall, but not in the Hall of Fame. Barr, but nothing to drink. Eichorn, who has never "tooted" one. Shookman, who doesn't shake on payday. Szink, but not connected with a sewer. Trout, but not good to eat. Frost, nice in hot weather. Lewis, but not the Brown Bomber. Walker, who often runs. Shutt, sometimes he is. Mommer, who likes popper. Stone, a hard cookie. Martin, he's a bird. Williams, not quite as sweet as the flower of that name. Beer, but not on ice. Janes, who likes them all. Brown, well done. Taylor, who never sewed a stitch. Stout, who's weak at times. Harsh, who is very mild. Bear, who wears clothes. Green, but not in every respect. Bieler, not one of the Behler boys. More some other time—That's It!

Bill Hattendorf, Bldg. 12-B, star catcher with the Veterans of Foreign Wars ball club, is likely to create a serious problem for league officials. Seems that "Last Word" Hattendorf holds up the game so much arguing with the umpires, that Pennsy Park may be forced to install flood lights and serve supper, if Bill catches on any more doublebills!

Lydia Parrish, Bldg. 19-4, has been planning on spending her week's vacation in Antwerp. We sure would like to know what the attraction is there.

Hermetic Motors 17-2 And 17-4

Dear Girl Upstairs:

Against all the laws of aviation—but not against the law of gravity, Joe Bahr made a one-point landing right in the middle of the aisle.

Those super-special sandwiches that Helen Grunewald builds have made the wire-raisers forget their diets again. The "diet-forgetters" are: Virginia Doty, Jo Ann Young, Esther Remenschneider, Eileen Goeglein and Helen G.

Pauline and Margaret Corbat entertained a large group of the girls last Sunday. Gracie Koch had only eight escorts!

The Hermit.

P. S. I hear that Marcella Boyle likes milk.

Dear Hermit:

Have you seen Lu Nau since the 4th? She went to Detroit and thinks that is a city "too, too divine."

Irene Witham bought herself a fishing license and a gold fish bowl. She says she thinks fishing in the shade is more fun than rowing a boat in the sun. Invite us to the fish fry, Irene.

Did you know that Edith Venrick was learning to speak Greek? She can even count change to the envy of Helen of Troy.

Helen Klinker is getting younger by the hour. She is making doll clothes now. However she says there is a logical explanation. She isn't helping with Bundles for Britain, but she does have a small neice who thinks "Aunty Helen" is the best seamstress east of the Mississippi.

The Girl Upstairs.

Decatur News

Lohnes McIntosh, Herman Keller, Raymond McDougal, Al Schneider, Marlowe Schieferstein and Bob Andrews were in Chicago Sunday to see the White Sox and New York Yankees play.

From the dark recesses of Adams Lake comes a story that has been kept dark for many weeks. So the story goes: Edward Warren had acted as host to a group of friends at his cottage for a days' outing. The days' festivities were coming to a close and Ed, in order to speed the parting guests, promised to give one of his acrobatic demonstrations. Ed, by the way, was all dressed for the journey home, when in the midst of his artful tumbling miscalculated his distance and fell into the lake. It has been suggested that someone give Ed a bathing suit to take to the lake with him.

Tom Haubold started his vacation with a trip to Waltertown, N. Y. to visit relatives. Tom plans to make the trip there and back by transport planes.

Mr. and Mrs. Gordon Acheson left for a tour of the southern states on their two weeks' vacation.

Frank Geary, who has been confined at the anti-tuberculosis hospital at Lima, Ohio, for the past four months, is showing marked improvement. All his friends at Decatur wish him quick recovery.

Old Sol must really be bright. Margie Meihan came to work with blushing red evidence all over her face.

A man at a marriage bureau about to be presented to his prospective bride, whispered to the agent:

"She's ugly, small, hunchbacked, and cross-eyed."

"You needn't whisper," retorted the agent, "she's deaf, too."

26-3 Second Shift

Everyone came back with that "contented look," which proves a pleasant vacation was had by all. This vacation was just right for the newlyweds, namely: Eggers and Murray. Happiness to the pair.

We've been wondering what it would be like to see Darrel Hirschfielder or Bill Holloway when they didn't have a candy bar or a bag of peanuts.

Just a toothache is common, but when a bride of a few days takes time off with the toothache, well that's news. Now, Polly, we could think of a better one—why not confess you just wanted to be home with your new hubby? Sorry about the recent auto accident, better "brakes" next time.

A tall dark and handsome man is wanted in the winding section to keep the bugs away from Elsie Pederson. Can someone qualify?

We wonder if Thelma Arniston really meant what she said, "I'm still single and happy." At least she still sends her boyfriend a box of "Mars" candy bars.

There are three members of the second shift winding section who love to go swimming in the moonlight after work. Three guesses who they could be?

Eight "winders" gave Donna Zimmerman a send-off to her nursing career. Seven of them ate chicken at the end of the evening.

He's Enjoying It

Judging from the letters being received from Christ Kaiser, Bldg. 26-5, he certainly is enjoying his vacation in California. An extract from one of his letters reads: "Am having a wonderful time. Have seen the Douglas and American aircraft factories, where some of our flying fortresses are built. The planes and bombers are continuously roaring around here as the place at which I stay is only two miles from the factories and there are always some in the air. I have been through Mearch Field, and saw the big flying fortress, the one that is the largest in the world. It certainly is a big one."

Will someone please explain to Frank Ream, Bldg. 26-B, when potatoes are not apples.

Herman Wegman, Bldg. 17-2, must have notions of joining a nudists camp. He went home with an empty suitcase, and had to send back to the lake for his clothes. The other person—well, ask Katy Phillips, she insisted it was fish. We've heard of food being fried in olive oil, but fish oil? Now, Katy!!

Our former boss, "Red" Braden, says the fish were really biting where he was—and something else bit also—mosquitoes, eh what, Red?

See ya next week—and we'll be seeing you.

Two certain gentlemen of Bldg. 4-3 have been going out to the same place every Sunday for a home cooked chicken dinner. The sad part of it all is who gets there last gets the bones. Can anyone do anything about this so that each will get an even part of it, as Don Voorhees always gets the pressed ham.

Eva Gault and Mildred Mullins, Bldg. 4-3, were seen at Lake Gage over the Fourth of July laying in a supply of corn cob pipes, potatoes, mosquito chasers, peanuts, all day suckers, and what have you. A regular second hand store.

"Shirley Temple" of the winding department, Bldg. 4-3, has returned to work after a two weeks' vacation.

M.B.A. PATIENTS

General Purpose Motor: Evert Knapp, 423 Pearl St.; E. Niemeyer, 4134 Winter St.; Jeannette Lortie, Monroeville, Ind.; Gilbert Hutchisson, 731 W. Superior St.; Evelyn Heche, 2610 John St.; Clarence Geiger, St. Joseph Hospital; Pearl Gratts, 2811 Fox Ave.; Ethel Evans, Ossian, Ind.; E. Dourden, 1129 Burgess St.; Lester Daffirn, Route 4, City; Frank DeVauz, 2402 Wayne Trace; Melba Cottingham, New Haven, Ind.; Mary Butler, 2143 Weisser Park Ave.

Transformer: Leo Simpson, Lutheran Hospital; John Bostick, 344 S. Cornell Circle; Betty Drewett, 587 High St.; Wilfred Eickel, 310 E. State St.; Evelyn Gasper, 2007 Meridian St.; Pearl Miller, Columbia City, Ind.; Francis Magers, 2012 Pauline St.; Roderick Marhenke, 121 E. Woodland Ave.; William Ort, 1771 Hale Ave.; Giles Ogg, 223 E. Superior St.; Patricia Panas, St. Joseph Hospital; Thomas Ryan, 222½ Barr St.; Clifford Stein, 1418 Franklin Ave.; Florence Sheehan, New Haven, Ind.; Rex Buckles, Huntington, Ind.

Series and Specialty: Anita Meyer, 720 Harmar St.; Mary Markwith, 2438 Weisser Park Ave.; Fred Shaw, 2310 Molitor St.

Office: Edna Voirol, 428 Huffman St.

Winter Street: Arthur Bireley, Lutheran Hospital.

Apparatus: Clem Myers, 4530 John St.; William Luse, 1215½ Wells St.

General Service: Carl Hofacher, 1431 Michigan Ave.; Howard Moore, 2231 Ebey Ave.

Left the Hospital: Harold Kiefer, Agnes Jansen, Frank McInerney, Lester Shroyer, Paul Lichtsinn, Virginia Sealover, Grace Hennon.

Returned to Work: Ruth Barrick, Mildred Gaffer, Vern Castle, Alice Lake, Donna May Binkley, Ruth Fredricks, Wm. Hall, Wilmer Wiebke, Magdalene Hook, Mildred Brown, William Nieman, Elsie Justus, Esther Black.

Alice Pflueger, Bldg. 4-3, has her troubles driving through these small Ohio towns. Yesterday she ran a stop light. When the cop rode up along side of her, her husband said, in a low tone of voice, "I'll do the talking," but as usual poor Ray didn't get to say a word. Alice assured the cop she was very sorry and was sure it would never happen again. But he wasn't so sure as he said he didn't think much of women drivers anymore. Sure terrible parting with that ten bucks Alice. Better luck next time.

What would you think of a guy who every week promises you some news for the paper and even bragged about all the hot stuff he had gathered up about different people and never gave it to you. Well, Ted Mullins, Bldg. 4-3, has given his word of honor this week that he will truly have it in the morning. Well, we hope so.

Everett "Kitten" McKee is back to his lap holding tricks again. No admission and free lessons.

One evening as we were casually scanning the "Help Wanted" column, we came upon this ad placed there by Art Brandenburger, Bldg. 4-3. It read: "Wanted—one first-class cook to take charge of all cooking at my lake resort. Must sign a contract for the season as I do not want any walkouts." Evidently, Arthur's last cook went A. W. O. L.

What is it we hear about Don Wagner, Bldg. 4-2, and his cute little hill-billy from Kentucky. He tried some Copenhagen the other day and was well nigh snuffed out.

NEWS THROUGH THE PLANTS

6-4 Magneto Mumblings

By The Eavesdropper

We thought we had heard every story possible about those poor unfortunates who forget their identification buttons—that is until, of course, we heard Harold Kiel's story. It seems that once 'pon a time our hero was happily on his way to work when the horrible thought struck him! In the mad dash back home to retrieve his button, he was held up by traffic, ran out of gas, had a flat tire, and was still only 20 minutes late to work. . . . Now we wouldn't want it repeated, mind you, but Virgil Asher suffered a slight case of embarrassment the other morning when, upon opening the office wardrobe cabinet, he saw his favorite hat staring him in the face, and then suddenly remembered that he had just accused his wife of throwing it away that very morning. . . . And speaking of hats, we say Hats Off to Howard Timms' contribution to the latest style in men's straws. Although we think it's "just the thing", Howard insists that the only reason he bought the hat was because its large brim might keep his freckles from popping out. Imagine that! . . . Elmer Auman claims that the best way to have a duck dinner without furnishing your own duck is to have a couple of lucky Auman, Jrs. bring it home to you. The boys won the duck on a raffle drawing, and Elmer is proudly boasting about the economy of Dinner for five on 10 cents. . . . "Happy Birthday to You", sing the girls of Magneto Department on second shift, as they crowd around beaming Phyllis Closson, and present her with a lovely gift. . . . And we join them in saying, "Many more Happy Birthdays, Phyllis — even when you're getting old like us." It's a fact that this lil' Winchellette is getting "gray at the temples" nosing for news—but it's a great life, and we like it. So, until next time—G'Bye Now.

Last week Bldg. 4-3, as you all know, had a fire drill. Someone asked, "Where is the fire?" Another said, "It's no fire, it is just a drill." Mildred Mullins, in great excitement, said, "Must be an awful 'Big Drill'."

Rosemary Covert, Bldg. 19-4, is mourning the departure of the bug she hunted for and hunted for.

Dorothy Carrier, Bldg. 4-3, is displaying a beautiful rock. What we wonder now is when the wedding bells are going to ring.

Margaret Koch, Bldg. 4-3, promised her mother when she left for California she would write her a card every night. She has been gone over a week and her mother hasn't heard from her. Could it be possible Marge doesn't know when night comes?

Jerry Habig, Bldg. 4-3, was worried last week. After having tickets for the dance at Wawasee and no calls from the boy friend but all at once Dan Cupid played his part and everyone lived happy ever after.

One day last week Jean Smith, Bldg. 18-1, very neatly cleared her desk at 4:15 P.M. and advised all that it was time to go home. When her attention was directed to the clock which said only 4:15 instead of 5:15 she was so chagrined that she did not even request overtime for the extra hour.

As we all know, Johnnie Deahl, Bldg. 4-3, runs the little red Fire Wagon in Waynedale, but it certainly is a great shock to the people on Big Long Lake to see Russell "Buck" Adams, Bldg. 4-3, as sole manager of the big red ship, "Fire Chief." Buck made one long run yesterday to a barn, which was burning, 5 miles from shore in this new water fire wagon. All he had to say upon return was that the owner of "Big Snort XIV" better keep her off the lake.

Winter Street News

The next time the plumbers remove a water pipe from the office Keen and Barrick are going over in the next county. While removing a pipe overhead, one was found to contain a quart of very old black water. Keen got most of it and Barrick got what Keen couldn't use.

Don Leichty pulled the bright one of the week. He parks his car beside a tree and locks the car door from the inside and gets out on the street side and fixes the door so it will lock from the inside. At 5 p.m. he had 4 men and a boy pulling the tree far enough away from his car so he could squeeze in. It would have been easier if he had cut the tree down.

Bill Schwise was pleasantly surprised the other noon when he found his desk gaily festooned with crepe paper, some lovely gifts esconced thereon. Also some pennies were given for one of the members of the Schwise family. Bill and Maryjane wish to thank all their friends for the gifts.

Millie Atherton is willing to go on fishing trips as a "lost fish retriever." When they fall off her hook, she just scoops down in the water and brings 'em back. Just so she don't fall in sometime and require a scooping out.

Barbara Curtis forgot her button and when asked where she finally found it, she told them "behind the davenport." After further questioning she admitted she was sweeping behind there and that's how she lost it. And we thought that she didn't know which end of a broom to get hold of. Live and learn.

Since Eddie Heemsooth is again raising hair, Rita Wagner has been assigned the duty of measuring the length with a yardstick every Monday a.m. to see if Eddie is making progress or not. To date he is definitely making progress.

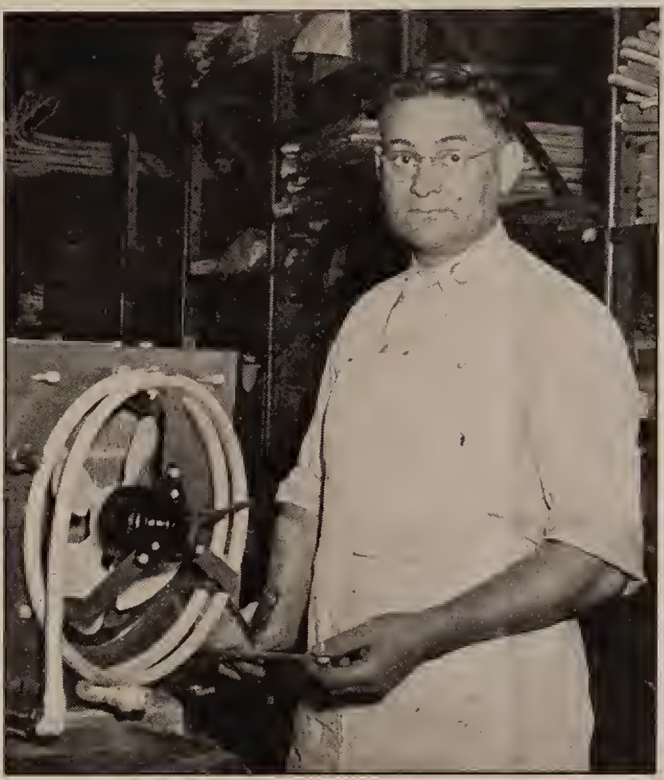
"Information Please?"

When the new partitions were erected around the Specialty Motor office the door was stragetically placed right next to L. Z. Gossman's desk. As a result the boys of the section placed a neat sign labelled "Information" on Lew's desk. The sign, however, evidently did not meet with Lew's approval as it almost immediately found its way into the waste basket. The original perpetrators are now said to be taking up a collection to purchase a fancy brass information sign such as are found on hotel desks, and bank lobbies. This will undoubtedly be more in keeping with the dignity of the occasion.

P. S.—Don't worry, Lew, you know about how much chance anyone has taking up a collection in this office.

Ora Farrell, Bldg. 4-3, our aquatic enthusiast, was the center of attraction at Tri-Lakes over last week-end. He did some very fancy diving, the likes of which we have never seen before. He also is quite an entertainer, keeping the crowd in high glee during his exhibition. As a climax to his extraordinary display of daring, he introduced a new dive which he claims is original with him. He calls it "the back slap dive." He tells us that if you feel the least bit groggy this dive will surely snap you out of it.

Newest Quarter Century Member



Vern Gratz, Winter Street, is the newest member of the Fort Wayne Chapter of the General Electric Quarter Century Club having become eligible for membership to the organization during the past week.

Motor Generator Static

State Pride

Have you noted the pin Alice Alringer is wearing? Yes sir, the gal got pinned with a S. A. E. pin, which makes it tough for the rest of "youse guys". Rumor has it that the only song Alice can sing these days is "Indiana"—the boy friend attends that University. Pride in state and school, we sez. . . .

Hot Stuff

Henry Lojeck (our fireman) is such an old smoke eater that ordinary heat does not effect him. The other day Hank went swimming and before dunking himself, took a sun bath. He remarked, "I didn't realize how hot I was, until I entered the water—when it went "hiss" and started boiling. I stepped in—well, that really was a sun burn.

Needless to say our hero's body took on a color many shades deeper and after a few days he started peeling. One evening while enjoying his evening nap and resting the old back, he awakened with a peculiar feeling running up and down his spine. There sat the little woman, pulling off countless yards of loose epidermis.

Hank said, "Was I burned up, and then skinned alive?"

"Sitting in the Park" or "Everything Happens to Me."

A one act play of many scenes with a moral (you supply that). Starring Al Swift.

Supporting casts includes Rus Blackburn, a drug store clerk and one taxi driver.

Scene One—Early morning on a corner Al boards a G-E special bus, rides to the corner of Creighton and Calhoun, absent-mindedly pulls stop cord, gets off bus.

Scene Two—Slightly later. Al Blackburn drives up.

Rus—"Going to work, my good man?"

Al climbs in car and they drive away. Al still in a daze.

Scene Three—Still later. We see them driving under the College Street elevation. Suddenly Al's face lights up. He speaks, "Shoot, doggone, I left my button at home, I can't get in."

Scene Four—Somewhat later at a drug store.

Author's note—Between the last scene and this one, 15 minutes elapsed while our hero tracked from the G-E parking lot to a neighborhood drug store.

Al enters, drug store clerk approaches.

Clerk—"Something for you, sir, and how are you this beautiful morning?"

Al—"Rotten, gimmie a bromo and your telephone.

Clerk—"One Bromo coming up—phones in the corner, but it will cost you a nickel to play."

Al—"Hang the expense, money is not all, think of honor and duty." Al deposits nickel, dials number, waits.

Al speaks, "Is this you dear, sorry I got you up. Will you get my button off the dresser and send it to me by a taxi? I'll wait in the park. I promise no girls there at this time. You know me dear. Too well? You should not say that. Tell the driver to look for a man in a suit. Good bye dear."

Scene Five—We find Al sitting in the park, waiting.

Taxi drives up, driver sticks his head out of window and calls, "Hey pal, are you the guy who wants a button?"

Al—"Yes, to be sure."

Driver—"OK, Buddy, that will be 30 cents.

Scene Six—We see Mr. Swift entering the works as the curtain falls.

Saying of the Week

Jerry Frye remarks, "Life is reciprocal, you pay for what you get, or you don't get it."

Sport Flash

Sara Jones and Vi Schwartz are progressing with this game called golf. Recently the gals went out and shot in the eighty bracket. Both girls were so elated that next week they intend to play the second hole.

What

What would one week's issue of our WORKS NEWS be without a note about "Pappy Archbald?" "Pappy" came to work with a burn about the size of a silver dollar on his arm. At first he claimed sun burn, but later his explanations were very vague.

Some of the boys wonder if Mrs. nudged him with a hot iron or if this is a brand of some kind. Perhaps his cowboy' ideas are getting him down.

Oh Me!

Wilma Krimm enjoyed a week end of golf—or did she? The poor girl literally creaks in every joint and once down can hardly arise. Just an ole "Softie".

Slips And Chips

Sir Viss Bldg. 4-4

The old custom of vacationers trying their best to out-do each other is prevalent this year. Ed Martin was behind the eight ball this year, having his vacation the same week as Leo Blair and Charley Meyers. However, Ed banked his ball and made the pocket with this story. "I had to hide behind the piling when I baited my hook to keep the big fish from getting me." We all knew you were a worm Ed, but we never dreamed that you would admit it. While Ed was doing a bit of commercial fishing, Leo, the other vacationer, was really landing the fish at Rome City. And according to Leo in commercial quantities. So far, I haven't heard a word about Charley Meyers' vacation but it will be good when it comes. Charley is waiting to hear the other stories . . . Al Schoenheinz and Wm. Weber were in Chicago last Sunday to attend the ball game. They rode the Pullman to Chicago (at excursion rates) and really enjoyed themselves. Al's ticket was for a grand stand seat and Bill proudly boasted of having a ticket for a box seat. Yes, boys, said Bill, you should have told me you were going to the game today. You see, I am a friend of Mrs. Comiskey's and I would have purchased box seats for you for the same price as your tickets. When they arrived at the Ball Park Al looked for Weber in his box seat but no sign of Weber. Al came to the conclusion that Weber's box was one at a knot hole in the fence . . . Let's take the short route out said Doug Blessing to Doc Coon last Saturday as they started for home. So they went through Bldg. 18 but the front door was locked and they had to come back to the main gate. This is where the short is the long, eh! boys . . . Did you know that Robert Till and Eleanor Brown are going to march down the aisle on August 30th; that Enoch Woodrow Hursh's famous last words are "I didn't hear the whistle ring"; that Elmer, the Rat, is one of the domestic type and purchased an ironing board this week . . . After returning home from the lake the other night Marge Thompson discovered she had left her purse and badge at the lake. We understand the second trip home in the moonlight wasn't quite so romantic as the first one . . . We are wondering why Lowell Arnold has a company policeman escort him to Bldg. 4-4 some days . . . Ted Reed would like to know how the Smoky Mountain folks dig their potatoes on the side of those steep hills. His deduction is that they dig out the bottom row and let them roll. That new step Ted Reed has is due to one leg being shorter than the other caused from walking around the Smoky Mountains during his vacation.

Softballers Go To Town In Two Games Tuesday

An animated spirit must have instilled the G-E softballers Tuesday night for they trounced the Kuhner meat packers 14 to 6 and then played a five inning exhibition game with the Berghoff Malters and undone the Malt men by a count of 20 to 7 on the Memorial diamond.

The unpredictable happened when the fielders backed the pitcher to the nth degree in the first encounter of the evening.

The slaughter men were trounced in the second frame when Romary and Schaefer accounted for doubles and newcomer Bob Cowan hit a triple with support of the entire line-up which accounted for nine runs.

Bob Cowan, coming to plate four times, took two walks, hit the hurler for a double and a triple and tallied two runs.

A one for all and all for one attitude was displayed in the games of the evening. Teamwork and fastball was the menu. Here is one for Ripley:

Summary

General Electric

	A.B.	H.	R.
Romary, ss	4	2	3
Holmes, sf	4	1	2
Stellhorn, 3b	4	0	1
Nahrwold, 1b	4	1	0
Weber, 2b	5	1	0
Hemsoth, lf	4	1	1
Huth, rf	4	3	2
Cowan, cf	2	2	2
Schaefer, c	3	1	1
Greider, p	4	2	1
Totals	38	14	13

Kuhner

	A.B.	H.	R.
Stanki, ss	3	1	1
Harter, 3b	6	1	2
Stellhorn, c	3	0	0
Moffit, p	3	0	0
Miller, 2b	3	0	0
Sitko, cf	4	1	0
Cowan, lf	4	0	0
Harter, rf	2	0	1
Cox, sf	4	1	1
Nelson, 1b	3	1	0
Totals	35	5	5

Winning pitcher—Greider; c—Schaefer. Losing pitcher—Moffit; c—Stellhorn.

Umpires — Earl Blauvelt and Floyd Wolf.

In the exhibition game with the Berghoff Malters Norv Wahrwold allowed only two hits in the five frame fray.

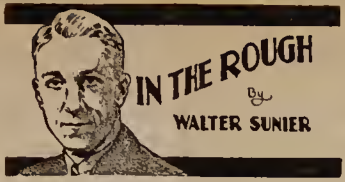
The Electricians were on their toes in the first three innings allowing no hits and scoring 18 runs.

It was in the fourth frame that the clowning of both teams assisted the beer men to account for five of their seven runs.

Although he played first base in the opener, Norv did creditable work on the mound for the put put lads, fanning six men and hitting twice at the two times at plate to account for two tallies.

Huth, Cowan and Weber were the three lads who brought in additional three runs each to account for the high scoring.

Winning pitcher—Nahrwold; c—Huber; Losing pitchers — Sitko, Ceccanese; c—Offerle.



IN THE ROUGH

By WALTER SUNIER

Jerry Frye, Bldg. 19-3, who is a clever cartoonist and wood carver, has made a very clever carving of a golfer. The golfer is in his natural habitat, the rough, and is following his natural inclinations of trying to extricate the ball without the loss of a stroke by the execution of a little clever foot work. Jerry has caught the spirit of the occasion with remarkable success. A picture of the carving is shown herewith to show the cleverness of the carving and to illustrate the technique.

In the Monday Evening Group, the Plastics plastered the Ice Cubes, 195 to 198; the Rough Riders rode over the Divot Diggers, 169 to 172; and the Turf Toppers topped the Slapsticks by one stroke in a match that ended originally in a tie at 188. Rather than play a regular nine-hole match to decide the tie, the teams agreed to play an extra hole. On this hole the Turf Toppers had 21 and the Slapsticks had 22. The low score for the evening was Sunier's 37.

In the Tuesday Evening Group, Bldg. 4-3 defeated the Optimists, 169 to 177; Bldg. 4-4 defeated the Dubs, 194 to 199; and the Billy Goats defeated the All Stars, 176 to 179. The last match was the play-off of a tie that occurred in the regularly scheduled match. The low scores were shot by Ife Holmes who had a 37 and Bob Merrill who had a 38.

In the Wednesday Evening Group, the Fluorescents floored the Sharpshooters, 155 to 157; the Hookers hooked the Apprentices by forfeit; and the Trappers trapped the Cro-Flites by forfeit. The match between the Fluorescents and the Sharpshooters also decided the winner of the first half. The Fluorescents shot 157 which is one of the lowest team totals ever shot. The low scores were, Lamboley 38, Kayser 39, Motter 39, and Fletcher 39.

Decatur Club Tennis League Results

Results in the last engagement of the Decatur G-E Club Tennis League are recorded as follows:

W. Smith defeated D. Macklin 6-4; A. Heller defeated G. Laurent 6-4; R. Schafer defeated H. Gehrig 6-4; P. Hancher defeated H. Blythe 6-2. Second round—H. Blythe defeated W. Smith 6-2; P. Hancher defeated D. Macklin 6-2; A. Heller defeated R. Schafer 6-0; G. Laurent defeated H. Gerig 6-0.

Standing now are:

	Won	Lost	Pct.
P. Hancher	4	0	1.000
H. Blythe	3	1	.750
A. Heller	3	1	.750
L. Machlin	2	2	.500
G. Laurant	2	2	.500
W. Smith	1	3	.250
R. Schaffer	1	3	.250
H. Gerig	6	0	.000

NEWS THROUGH THE PLANTS

(Continued from Page 7)

News On The Nose 4-5

Assembly men in Bldg. 4-5 have been very obliging in helping Kenneth Young carry out his very unique hobby—that of collecting milk bottles. Each day they help him so fast that he can't even find a place to sit down. Now they are wondering whether there is a little reason at home for this exciting new interest—In fact he sometimes becomes so excited, a few of the boys are wondering whether he really appreciates their help . . . Ed Glusenkamp bought a new Buick recently, also a spare tire which he has used frequently already, but not on the car. Every time he goes swimming, he admits he has a great time paddling around with it ... The Bldg. 4-5 winders think that Bert Hardendorf should take six lessons on fishing so he'll know that the boat navigates more easily if he would take in the anchor and row from the pointed end instead of the flat end. However, he was pulling in the fish so fast that his wife Jeanne had to take them off the hook for him—brave girl, that one ... During the fire drill for women only held last week, all the boys in the aircraft field assembly took the little siesta also. Were they embarrassed to return to the guffaws of the rest of the men who hadn't informed them of the ordinary procedure . . . It was also said that one fair damsel, name o' Helen, stopped to powder her nose before walking down the five flights of stairs . . . We'll just bet that Stu Herring hated having to make that refreshing drive back to Columbia City last week after his identification badge . . . Love made a long journey last week down to Camp Shelby when Violet Buesching and Private Hugh Scott made their marriage vows at Biloxi, Miss.

There's one less "Yoo-hoo" boy in the army now, General Lear. That is if love is the great reformer . . . Cleverest dog story of the week tells about Betty Williams, Bldg. 4-5 office, who started out to keep a golf date and found her pet pup steadfastly refusing to leave the automobile. Even on the golf course he followed every move, staying just far enough away to keep from being clipped. All we can say is that he had more faith than we have in the aim and power of Betty's drive.

One recent torrid day your nosey reporter observed Mart "Curly" Einsiedel, Bldg. 18-1, perched atop a filing cabinet valiantly doing battle with a "BAT" which had strayed into the Personnel department. Mart finally chased the bat into a hole in the plaster and corked up the hole while the shuddering feminine members of the office watched the operation in horror from the safe side of a glass partition. Being full of good advice we kindly suggested that, in the future, Mart hang his hat on his belfry to prevent the further escape of the inhabitants thereof.

Edna Oehler, Bldg. 19-4, has returned to work after a week's vacation. The name now is Mrs. Norman Brown. The ceremony was on July 5—and no kidding, Edna, it was good candy.

Loraine Leiter, Bldg. 4-3, really has turned chemist. Anyone interested in good substitutes for anything that ails you must see her.

More power to our two-ocean Navy! Both Robert (Easy Way) Loveland and Orlo (Get There Quick) Warner of Bldg. 19-5, have purchased outboard motors. So far the only casualties have been a blistered finger on Orlo (from the starter rope) and a blistered thumb on Loveland from fondling a hot exhaust pipe. Warner is planning to give his motor a good workout on Webster lake this week where he is spending his vacation.

Honest Herschel Smith has two pairs of trousers. How do we know? Well, it is reported that Herschel left his identification button on one pair and wore the other pair to work. One sergeant and two patrolmen discovered that Herschel did not have his badge. He was convinced.

Congratulations to Rudy Alexander. May his married life be long and happy. Our apologies for not making the announcement at an earlier date. It was a typographical error.

Glen Fernwald, of the Order and Stores department, ordered two noon lunches at a downtown restaurant. When asked whether his appetite was that much above par, Glen replied, "No, but I'm working overtime tonight and this saves me the trouble of going out to eat at six."

Speaking of looking at the world through rose colored glasses, Zoa Brock, Bldg. 4-3, has that beat. She has started a new fad. That of scanning this old world of ours through lavendar colored orbs.

Sam Allmandinger, Bldg. 4-3, is going to have one big job next Saturday, as Sam is going to move the gang from Bldg. 4-3 to his place at Big Long Lake for one grand time never to be forgotten.

We of Bldg. 4-3 wonder what happened to Harry Parker's car police badge.

Wife: "Every time you see a pretty girl you forget you're married."

Husband: "You're wrong, my dear. Nothing brings home the fact with so much force."

"Y" Horseshoe Loop Standing

Pennsylvania is leading in the team standing and Kilgore and Snyder are topping the individuals in the Y.M.C.A. Horseshoe league. Thursday's games at Swinney park match Pennsylvania and G. E., Zollner and International Harvester. Standings, with games won and lost, ringers and ringer percentage:

Pennsy	13	3	379	41.1
G. E.	11	5	395	40.3
I. H. C.	5	11	261	26.1
Zollner	3	13	305	33.1
Singles Standing				
Kilgore	4	0	140	52.2
Kraft	2	0	42	41.1
Snyder	4	0	102	45.5
Beckman	3	1	91	48.0
Hartman	3	1	102	44.0
Rietdorf	3	1	114	40.7
Binkley	1	1	57	45.9
Rickey	2	2	115	45.2

Swinging The Hickory

By Paul Schwehn, Bldg. 4-3

Old man remorse must have been playing with the varsity softballers last week, for they were really taken to the cleaners on two occasions.

Last week Tuesday at Memorial Park the Zollner Pistons were held at bay till the fifth when that slugger, Baker, started the ball rolling. After a few errors by the Electricians the zip-zap lads played around and "skunked" the Joe men. Although there was a large attendance till the sixth, the odor seeping up from the diamond was so great (in fact it was greater than the stink from the soap factory or whatever it is that lies east of the park) that the people just had to leave.

Greider, the G-E new hurler, tried his best to stem the tide, but with faulty fielding and only one hit the intestinal fortitude of some of the players appeared to ooze onto the field and add to their error filled game.

The second chapter, known as the sequel, came Thursday night at the Municipal Beach when the Berghoff Malt men eased over the G-E men in the last of the tenth.

With one man on in the first, James Cagney's double, "Whimpy" Stellhorn, slapped the pill in left field for a home run which almost clinched the ball game.

At this point in the fray Norv Nahrwold, the ten-year man lost control and consistently heaved the ball out of the park and dusted off the home plate.

Either the pitcher cannot support the fielding or the fielders cannot assist and back-up the pitcher. Whether the softballers are trying too hard or just don't give a "damn" cannot be ascertained, but they aren't playing ball the way they can.

The pay-off came Friday evening, July 11, when the boys finally got out of the slump and actually took the Auburn delegation to slaughter. Should some of this pep and ball handling be displayed in the city the Electricians would give any ball club a fight for its money.

Decatur Club Drops First League Game

The Decatur G-E Club dropped their first game of the softball league to St. Mary's by a score of 7-3. St. Marys outhit the Electricians 8 to 4 in a well-played game. The G-E played exceptionally well in their first game and should develop into a strong team before the end of the season. Two bad innings caused the defeat of the shop team when St. Marys scored 3 runs on 4 hits in the third inning and again in the sixth inning when the winners placed 3 hits, a walk and an error for 4 runs.

Score by innings:

G-E Club	0	2	1	0	0	0	0
St. Marys	0	0	3	0	0	4	0

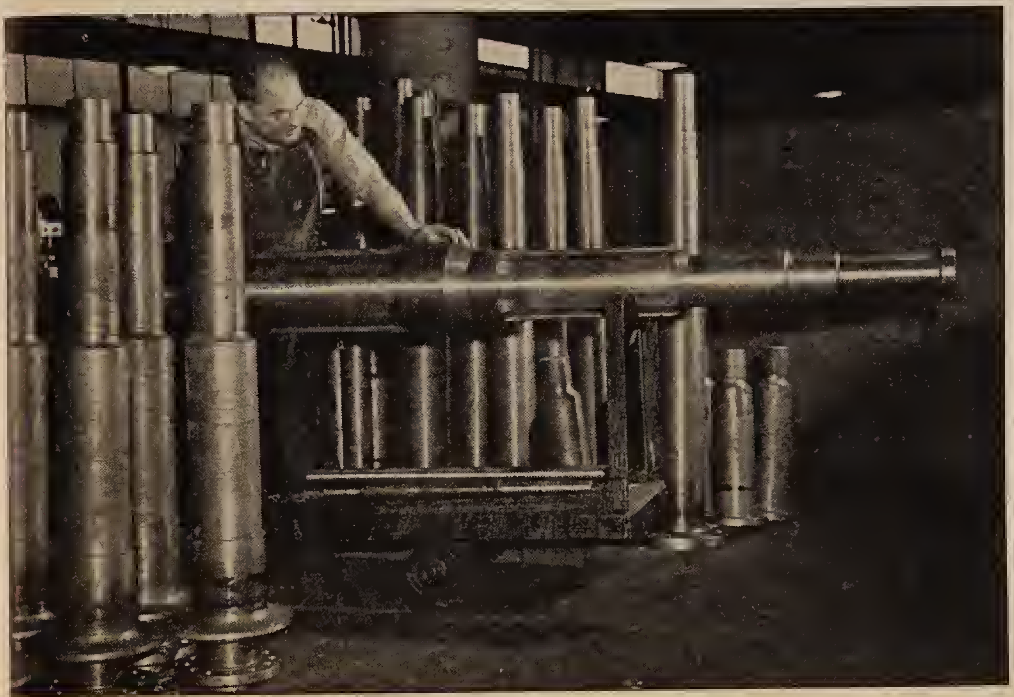
1941 Vacation Payments Announced

Fort Wayne Works Assumes Important Position In U. S. Defense Program



Not cannons but shafts needed in the manufacture of some of our larger equipment. Otto Pflueger whose job is shaft drilling is inspecting some of his work.

(Pictures on pages 4 and 5)

More and more of Fort Wayne Works employees are engaged in building products needed for the fulfillment of the National Defense Program. In this issue we show views of a few employees in one of our major departments engaged in this work. This department is now engaged practically one hundred per cent in defense work. Products manufactured are used in driving equipment on board ships and in submarines. In lighting, blowers, winches, gun fire equipment, signalling communication, ammunition hoists, steering and search light control apparatus, etc.

This is one department only. In practically every department of our Works and in every Works of our Company, General Electric people are engaged in manufacturing products needed in the Defense Program. These people are in the service too just as much as the boys at camp. They make the equipment that makes an army strong, for military officials estimate that for each soldier, sailor or aviator in the service, 17 men of industry—soldiers without uniforms are necessary.

Complete New Line Of Transformers Being Made Here

Many New Features In Apparatus For Use With Indoor Luminous Tube Signs

A complete new line of suspension-type transformers for use with indoor luminous-tube signs manufactured at Fort Wayne has been announced by the General Electric Company. It embodies the basic features of the "Streamliner," G. E.'s luminous-tube transformer for outdoor installation, which has attained a 99.93 per cent performance record since the first units were installed in 1938.

Leading feature of the new line is the spaced winding construction, which reduces voltage stresses. A balanced core design and improved high-voltage bushings are two more noteworthy improvements. The insulating compound, which is nearly twice as strong electrically as that used in older models, makes it easier for these transformers to withstand the abuse of overloads, unbalanced loads, and of open circuits caused by accidental grounding or by broken tubing.

The narrower width of these indoor models permits out-of-the-way installation, even in crowded display windows, and the light weight of the transformers makes handling easy.

NOTICE

United States Defense Savings Bonds and Defense Postal Savings Stamps may be purchased for cash at any time at the Payroll department.

Three Hundred To Take Part In Elex Trip

To Leave Tomorrow Morning By Special Train For Rail And Boat Trip To Milwaukee

More than three hundred Elex members and other employees of the Fort Wayne Works will leave tomorrow for a one day excursion to Milwaukee. The special train will leave over the Pennsylvania at 6:15 Daylight time and all who are taking the trip are asked to be there at least fifteen minutes before train time.

The party will travel by rail to Chicago and then embark on the steamer "City of Grand Rapids" for the balance of the trip to Milwaukee. After an extensive sightseeing tour in Milwaukee the excursionists will be enabled to enjoy an evening trip by boat back to Milwaukee. Entertainment will be furnished on the boat.

The boat trip, one of the highlights of the excursion, will permit exceptional views of many historical and interesting points of interest such as Chicago's famous "Gold Coast".

Pay In Lieu Of Time Off To Be Made August 29

The following notice concerning vacation payments for 1941 for employees of the Fort Wayne Works has been issued through the office of M. E. Lord, Works Manager.

"The Company appreciates the cooperation of the many employees who have willingly given up their vacation time off either in part or in full so that obligations and commitments on deliveries of material for National Defense may go through on schedule.

"Payment in lieu of vacation time off will be made on August 29, 1941 to all hourly rated and salaried employees who are eligible for either one or two weeks' allowance on that date.

"Those employees who are not eligible for vacations at that time on account of not having sufficient length of service but who will become eligible between August 29 and the end of 1941 will receive their vacation allowance at the time when they become eligible. The same rule will apply to those who are only eligible for one week's allowance on August 29 but later in the year will qualify for additional allowance. In this case the additional allowance will be paid when they qualify.

"It is to be understood that this is an emergency action due to the press of National Defense activities and in no way invalidates any provision of the regular Vacation Plan."

Big Enrollment Of Students By G-E Breaks All Records

Largest Number Of College Seniors In History Of Company Added To Rolls

Despite increasing demands for the services of young men by the United States Army, the United States Navy, and by other hard-pressed defense companies, the number of college seniors hired this year by the General Electric Company has broken all previous records. With the total enrollment of B.T.C. students set at 250 and the number of Test engineers reaching 706, these two departments will now be in a better position to supply the manpower needed by various departments and company works.

Those in charge of the two student divisions give credit for the increased enrollment to the fact that the company continues to hire students in bad years as well as in good ones. In this way a spirit of good will has been built up with college faculties, employment bureaus and with college students themselves.

Test men and B.T.C. students are hand-picked by G-E representatives, who spend the monthsfrom November to April interviewing

AT THE STORE

The Employee's Store is offering tailored pads and cover sets for metal top ironing tables. They snap on and fit like a glove. Store hours from 10:00 a.m. to 4:00 p.m. Mondays through Fridays.

G-E President Visits Works

Charles E. Wilson, president of the General Electric Company was a visitor at the Fort Wayne Works Wednesday. President Wilson's visit here was for the purpose of inspecting the site for the new plant to be built on the Company's Taylor Street property and to note the progress being made in National Defense Work.

At the conclusion of his visit he expressed himself very much pleased with the efforts being made by Fort Wayne Works employees to carry out defense orders assigned to this works.

Wednesday's visit was the second made by Mr. Wilson since he became president of the General Electric Company in January of last year.

Volume 24 Friday, July 25, 1941 No. 75

• You Never Miss The Water

"You never miss the water 'till the well runs dry," is an ancient axiom to be sure. But through all the years it has not lost its force of expression. Right now it particularly fits the material supply situation.

As a nation, we have always believed we had plenty of everything. We are discovering that we haven't as much as we thought we had, in the way of many essential raw materials. It took a war to wake us up.

All that means we must get tough with ourselves. We must guard more carefully than ever, the raw materials of the business. Waste and spoilage, tremendous problems in peaceful times, become almost criminal in times of preparation for national defense.

Every ounce of metal, every scrap of wire, every bit of wood, uselessly wasted or spoiled in these trying days means that much less we have to work with. Let us not go to the well and find the water all gone!

• "Glad I'm An American"

Living in the United States as we do, some of us never stop to think what it means to be an American. An unnamed resident of Missouri, a few weeks ago, wrote a letter to President Roosevelt—a letter which told the writer's pride in being an American. Because it contains food for thought, we believe it is worthy of being reproduced in the WORKS NEWS. The letter follows:

"Dear President Roosevelt:

"I am a married man, 28 years old; a boy 3, a girl 1. Here's how I feel about being an American.

"My ancestors were Czecho-Slovakians, my wife's English; but we're Americans.

"I look at my refrigerator, my oil heater and my radio. I'm glad I'm an American.

"My children get cod liver oil, nourishing food and a doctor's watchful care. They'll be glad they're Americans.

"This morning I went to church. Amongst my neighbors, unafraid and unmolested, I thanked God for giving us America.

"I went home to my wife and kiddies. My little boy, Douglas, came running and said, 'Hi, Pop, you gonna take me to see the ribber?'

"And I said, 'Sure, Doug, I'll take you to see the river.'

" 'And we'll stand on the bridge, and see the car cars, Pop.'

" 'Sure, Doug.'

" 'Pop, see the sun, look, see, Pop. It shines in the car cars window.'

" 'Yes, Doug, the sun's shining on all America.'

"After our walk we came home and sat down to veal chops, baked potatoes, fresh green beans and corn on the cob. I said grace with tears in my eyes. I'm so happy I'm an American.

"This afternoon we listened to a radio rebroadcast of British children, here in America, talking to their parents in England, and I was proud to be an American.

"Tomorrow I'll go to work. I work in an electrotype foundry and I love my job. I made it, in fact, from errand boy to production manager in two years. I had ideas and I told my boss about them. He's an American.

"Tonight, before going to bed, I told my wife, 'Honey, I'm going to buy a large flag and hang it out the window Friday. The President wants everyone to pledge allegiance to a new and united America. And, honey, I'm going to do my part, because I'd rather be an American than anything else on earth.' "

Of such mettle are true Americans made.

SCIENCE FORUM — by L. A. Hawkins

Q. Why is radio broadcast reception usually better at night than in the daytime, from the standpoint of volume and number of stations received?

A. The greater volume is, of course, due to greater signal strength at night. The stations not heard in the daytime are there, but the signal is too weak for the receiver to amplify above the background noises, man-made interference and static. This difference in daytime and nighttime signal strength is caused by a change in the condition of the heaviside layers or reflecting layers above the earth's atmosphere. It is definitely known that the sun affects both the degree of ionization and position of these layers. In the daytime, they scatter the radio waves to a greater extent than at night, and consequently much of the radio energy is lost into space.

Q. What causes earthquakes?

A. They are caused by the slipping of strata of rocks which underlie the region affected. These strata are so placed that the force of gravity tends to make them slide over one another; but normally, the friction between the layers keeps them from sliding. When they slip, we have an earthquake, as they settle in a new position.

Q. Why do some lightning strokes set fires, while others do not?

A. Some things are easier to ignite than others, and a harnful of dry straw or hay would be fairly easy to set on fire, while a green tree, well soaked with water, would be considerably harder to ignite. Also, all lightning discharges do not contain the same amount of energy. The current in a lightning stroke may be less than 1000 amperes, or it may be more than 200,000 amperes. Naturally, the heavier strokes liberate a great deal more energy in the form of heat, and therefore even an object hard to ignite may be set on fire by the more powerful discharges.

Q. Is there any point at great depths of the sea where objects of nearly the same density of water will not sink?

A. The density of water at great depths is practically the same as at the surface. An object sinks in a liquid because it is more dense than the liquid. If an object sinks at the surface of the ocean, the greater pressure at the depth will compress it more than water is compressed. Hence it will be even more dense than the water, the farther it sinks.

Q. When a great snowstorm to the earth. Will this extra weight have anything to do with increasing or decreasing the speed of the earth's rotation?

A. The fact that the earth keeps rotating with practically the same speed of rotation is one of the many fascinating things of nature; and it goes to show that the forces influencing its motion on one part are counterbalanced by equalizing forces on other parts. Thus, a heavy snowstorm on one part which would have a tendency to increase the speed is counteracted by the opposite reaction of evaporation of moisture into the air on some other part of the earth. And therefore no detectable change can be noticed in the short space of time we have to measure it.

Q. Is there any definite food value in white bread?

A. Yes. An average size slice of white bread contains three grams of protein, sixteen grams of carbohydrate, and a total of seventy-eight calories, in addition to a fair amount of Vitamins A, B and G, as well as calcium and phosphorous.

NEWS FROM THE CAMPS

We publish herewith with great pleasure extracts of letters sent to us by G-E employees now in government service. Address all communications for this column to the WORKS NEWS editor.

Harbor Defenses,
Fort McArthur, Calif.

Dear Editor:

The WORKS NEWS is always welcome and would appreciate getting it in the future. You have my correct address and will advise of any change.

So far I have spent a lot of my time on the Fire Department. Got all of my training from the Los Angeles Chief. I am enclosing a snapshot that was taken on the Fort. We are out on maneuvers at the present time and cannot say how long they will last.

Uncle Sam's Prize, Says Peeler,
Albert Norr.

33 Bat., Battery C,
8th Training Regiment,
Fort Sill, Oklahoma.

Dear Editor:

The 33rd Battalion is a specialty division in the army. The battery I am in is the motor mechanics. So far it has been interesting, and looks as if it will be more so the farther along we go. I don't know if you know anything about this fort or not, but it is the largest field artillery school in the world. It covers approximately 123,000 acres and there are about 30,000 men stationed here. We study and work on different types of field artillery pieces, namely, the French 75 mm.; 155 mm.; 155 mm. howitzers, some 37 mm. guns and other types too numerous to mention.

So far I haven't much to relate on my experiences, besides drilling, calisthenics, and studying. I want to say that I enjoy the WORKS NEWS as it keeps me in touch with things going on in the factory and I would appreciate it if you would keep on sending them.

Erwin Wedler.

Battery A, 57th, Camp Callan,
San Diego, California.

Dear Editor:

There are two of us here at Camp that worked at the G. E. so we get quite a kick out of the paper. Russel Fox from Bldg. 19 is the other fellow, and he is also in my barracks.

They have quite a lot of General Electric equipment here so we are not completely isolated from the Company. Hoping to continue to receive the WORKS NEWS, I remain,

Yours truly,
Ralph L. Spayde.

Big Enrollment

(Continued from Page 1)

prospects in colleges throughout the country. So thorough is the preliminary examination that out of the students chosen each year, very few fail to make the grade.

Business Training Course students and Test engineers receive their training mainly through practical experience. Both groups serve as manpower reservoirs, from which a department in need of a new man can choose one with the necessary training.

Students are given theadvantage of extra-curricular studies while earning a living. These studies cover the fields of business law, accounting and finance for the B.T.C. men, and mechanical design, sales and advanced engineering for Test students. Sometimes a student shows an aptitude for work along other lines. In this case he is allowed to branch off into the commercial, publicity, market research, production, manufacturing, distribution, or other fields.

The Test Course

The G-E Test Course was originally organized in the 1880's as a straight student course, with a yearly tuition of $100. Used now as a replenishing reservoir for engineering departments, it offers a student opportunity to gain practical experience while working on salary.

Upon entering the course, Test students are assigned to various testing departments throughout the company works. These testing departments are made up entirely of students, with a "sign-up" student (one who has been signed up for two or three years) acting as foreman. The Test men try out every machine that goes through the department. As a student progresses, he in turn trains new men.

Elex Benefit For Soldiers Recreation Being Planned

An ice cream social, the proceeds therefrom to be applied to some recreational project for soldiers stationed in this area will be sponsored by the Elex Club on Wednesday, July 30. The social will be held in McCulloch Park and Eileen Morris Fore has been named general chairman. Attractions will include water battles by teams from the Volunteer Firemen and a band concert by the G-E Club band under the direction of Perry Shober.

Other committees are: Cashiers—Helen Bleke, Dorothea Dissinger, Catherine O'Connor, Clara Gidley and Pauline Beaty. Ice cream—Pat Chapin, Polly Ort, Alvena Greber, Margaret Koch. Pop—Ceal Romary, Dorothea Swank, Marjorie Ponsot and Zella Sheean. Sandwiches—Esta Griner, Lillie Dunlap, Hazel O'Brien, Veda Orff, Irene Meyers, Eileen Fore and Eva Lynn. Games—Dick Weimer, Belle Bucan, Wilma Garringer and Alice Dailey.

Tickets may be purchased from contact girls.

Big Enrollment

(Continued from Page 2)

Test men usually attend weekly classes, as well as completing twenty-five hours of outside study during the course. Classes consist of mechanical design, sales or advanced engineering. The training usually lasts from twelve to fifteen months, but sometimes the advanced engineering course runs into two or three years, according to the aptitude and enthusiasm of the student.

When a Test man moves into a new department his progress is noted by the foreman, who makes out a detailed report for the student administrators. From these reports it is easy to see in just which direction a student's talents lie.

The Business Training Course

The B.T.C. is made up of high school, business school, and college men whose records have made them outstanding as students. B.T.C. men derive their business training from the statistical, financial, and accounting departments. They have the opportunity of taking after-hour courses which consist of five semesters of accounting, two semesters of business law, and two semesters of G-E accounting. The course takes two and a half years to complete.

The class in company organization has increased to such an extent that tentative plans are to hold the class in the General Electric Athletic Association gymnasium, since this is the only room large enough to hold the number of men enrolled in the course. The unusually large attendance is attributed to the fact that Test men are also included in this class.

High school graduates and business school men are usually hired for stenographic or business machine work. Their regular working schedule is supplemented by special courses which eventually fit them for work equal to that of the college graduates.

Decatur Employees Give Generously To The U.S.O.

The General Electric Company with a donation of $100 started the local USO drive on toward the goal of $936 assigned to the City of Decatur. The employees of the Decatur Works, in the individual drive for funds conducted at the factory, added $300 to the company donation for a total of 43% of the local quota. The 600 employees of the local works only constitute about 10% of the total population of Decatur and the result of the drive was extremely gratifying.

When notified of the General Electric contribution, Mr. Herman Kruckeberg, county chairman of the USO, made the following statement: "Once again when a civic or patriotic duty arises the General Electric Company responds with their full cooperation. The G. E. Company was the first in the county to respond with a donation to the USO and the employees have since by individual contributions, swelled this total to the largest single gift by any group of employees in the county. Their response is extremely gratifying to me, as county chairman and I know that their willing response has helped in making the USO drive a great success. I wish to extend my thanks and the thanks of my colleagues to them for their fine response to this patriotic duty."

Mr. Ed Bauer, city chairman, when notified also made a statement: "As chairman of the city of Decatur USO drive, I wish to thank the G. E. Company, E. W. Lankenau and the employees for the fine cooperation they have shown and the wonderful donations they have given to the USO drive in Decatur, Indiana."

G-E Club Band Will Continue Program

Becoming more popular with each program, the G-E Club Band will continue to broadcast over WOWO on Thursday nights throughout the summer. The program titled "Tempo of the Times," can be heard at 9:30.

Perry Shober, band director, announces that he has vacancies in the band for cornet and saxophone players. Employees wishing to join the organization may contact Mr. Shober or K. W. McOmber, business manager, Bldg. 18-1.

News Around

Regional Parts Outing

Judging from the Monday morning sighs, groans, yawns, and limps, the Regional Parts Warehouse Organization Chicken Dinner and Outing at Big Lake last Saturday, July 19, must have been a huge success.

In addition to the chicken dinner, baseball, boating, swimming, and dart ball filled the day.

June Couts, the Babe Ruth of the Warehouse, outclassed the men with her home runs in baseball.

Al Kaufman and Gil Bond, the Punch and Judies of the Warehouse, tried so hard to excel, but you know the old slogan: "a rolling human only gathers dust."

E. B. Smith, Bldg. 18-4, a guest of A. J. Kaufman, was on his good behavior.

In the boat races, Jane "Tugboat" Schele and her sister, "Tugboat, Jr.," won the honors for the girls.

Did Clint Newman fall into the lake. Surely you must be mistaken!

Modest Betty Kelly likes to wade with her shoes and socks on.

"Jumbo" E. Mills surpassed only in darts. Cupid Mills he was known as in the old days.

Henry Reidenbach got first prize for eating the most chicken. They weren't giving prizes for the one who ate the most mashed potatoes or he would have won again.

After so much fun is it any wonder they all looked like a "black out" Monday.

Congratulations are in order to the Committee in charge of this outing, namely, Jim Buchheit, Jack Fox, Mary Melching and Ireta Moats, who did a splendid piece of work.

Gerry Foerster, Bldg. 16-3, reports a successful fishing trip in Minnesota last week and will shortly bring in the pictures to support his story.

Jim Gargett, Bldg. 16-3, heard the fish weren't biting this week so he changed his vacation to next week. Here's hoping he didn't make a mistake in claiming he was mistaken in the week he thought he had marked up.

Al Hambrock, Bldg. 2-2, reports a swell vacation what with painting, building cupboards, making sidewalks, etc.

We bet Ray Kierspe thought he was being nice to the girls and keeping them from getting fat when he ate all their candy.

It is rumored that O. J. Mettler is trying to find a name for his new cottage. Since he has been getting his feet wet in "Ripple" we suggest he name it that.

Yes, I can use your friend for some literary work. But wait a minute, is he an optimist or a pessimist?"

"What difference does that make?"

"It makes a lot of difference. I can't use a pessimist. I want a man to get up a Spring seed catalogue."

The "All Out For America" Challenge Is Met

oils in a frame; Marietta Porsch taping D.C. coils; Joseph Miller, stator punching. The machine he is using will do a variety of 50 different operations; Ed Auth, balancing an MPC armature; Harry Schmidt, painting motor generator set.

Third row, left to right: Edwin Becker, tack welding a stator frame; Kenneth Hart assembling a commutator; Clarence Speaker forming stator coil support rings; Henry Luedeke soldering terminals on connector; Verlin Stambaugh and V. Carmen testing.

NEWS THROUGH THE PLANTS

From The Feminine Viewpoint

By Irene Perry and Hilda Barthold

Fort Wayne, evidently, isn't the only place where men have their own ideas on Feminine charms as the *Lynn Works News* printed an item by male authorities. It sounded pretty good to us so we will pass it on to you.

Should you act smart or dumb?

1. The beautiful but dumb girls went out long ago.
2. Light, gay talk — never a weary review of personal affairs on a date.
3. Be smart but not too smart —give him the lead.
4. Express your own ideas and you'll be more stimulating.

A few things you should do.

1. Flatter more—by actions such as satisfying his few silly whims.
2. Try to like his sports and participate in them.
3. Know what you want when ordering dinner—don't change your mind or order the most expensive meal on the menu.
4. Learn the art of relaxation and the art of keeping little intimacies to yourself!

What you shouldn't do.

1. Don't discuss your troubles, home or office—he would rather hear pleasant things.
2. Try not to appear overanxious by making a man talk too much about himself.
3. Don't be too dramatic in speech or actions—be natural.
4. Learn to understand his moods and to know when not to talk!

Should you phone him?

1. Why not if you have something to say?
2. What is wrong with flattering a man by phoning him once in a while to see how he is getting along.
3. The old saying about boys not respecting girls who phone is petty nowadays.
4. Better call only when the date book is full or else that anxious note might come up in your voice and spoil the casualness of it.

Should you play hard to get?.

1. A man always spends more time over something that puzzles him.
2. It is smart for a girl to be one jump ahead.
3. You can't get away from the pursuit instinct in man
4. Playing hard to get is good occasionally but don't overdo it.

We hope the Fort Wayne male who wrote such a nasty leter about the way girls try to land their men will note that Lynn men are giving pointers on how to snare them.

Jack Kearney, Bldg. 19-5, distinguished his department by taking the C.Y.O. tennis championship. Please note Mr. Meyer.

George Prince, Shepler Fagg and Robert Ace. Bldg. 19-4, ran out of gas on the way home from Detroit after seeing the Yankees do their stuff.

Lloyd Garrison, Bldg. 19-5, has a new name and it is "Superman Garrison." Now when he repairs a machine the parts just seem to fly into place.

Sympathy

Employees of Series and Specialty Motor extend their sympathy to Ralph Shoaff in the death of his mother.

He Knew Him Way Back When

C. D. Witte, who retired in 1932 after thirty-three years of service, and who has been for many years a deputy sheriff and still is, renewed acquaintance with his former chief while in Washington recently. Former sheriff, George W. Gillie, now congressman and Mrs. Gillie are shown on the lawn of the Capitol building. Mr. Witte, 74 years old, made the trip alone and enjoyed himself immensely. He is a member of the Quarter Century Club and recently had the pleasure of welcoming his daughter Alma Witte into the organization.

Slips And Chips

Sir Viss Bldg. 4-4

I learned how E. A. Martin financed his vacation trip. He gave the boys blank coupons for a quarter, redeemable for .... at .... on .... Do you know why the second trick girls use the north aisle now? See Herman Lepper, their boogie man, he knows all the answers. . . . Anyone knowing where there is an electric air grinder, contact Robert Spitler. He was asking for one this week. . . . Would you like to see Chris Delegrange's goat? If you would, drive out to Charley (Flash) Meyer's home and you can see it. Flash is its permanent keeper now. . . . It has been reported that Douglas, our Blessing is in the junk business. I cannot verify this story, but there is a slight probability that the story is true. He was seen driving a truck loaded with scrap sheet irons, etc. . . . Enoch Woodrow Hursh and Miss Opal Likens will march down the aisle some time in August. We all wish them the best of luck and happiness. . . . Art Kraft, our expert pump primer, was looking for some heavy oil to prime the compound pump with. He located that heavy, sticky gear oil and began dipping it out with his hands. He tried thinning it with water and all the time his fingers began sticking tighter together. He hasn't removed all of the oil yet. It will wear off in time, Art.

Rebecca Youse, Bldg. 19-5, is back from two weeks vacation at Houghton Lake.

Sleuthing In 4-6

Tom Doell is a different person this week. He had his tonsils removed last week and I understand some of the nurses at St. Joseph Hospital are good looking. Tom regrets his operation wasn't more confining. . . . Bonnie Ervin was surprised last week when she started to put the rest of her foot in her shoe. Someone had filled it with paper clips. Better keep your shoe on, Bonnie, or else look before you do. . . . "The Sleuth" pulled a boner last week, so here is a correction: Herb Reitz wants it known that his new fishing rod is worth something. He caught a two and one-half pound small mouth bass with it. May the next one be bigger and better. . . . Charlie Yager is everyone's pal these days. Those apples sure are good to eat. . . . If Alice Nichens wants to avoid a stiff neck, our advice to her is "don't forget to duck" when the mast swings around. . . .

The Sleuth.

News sure is getting good these days when Edna Crow, Bldg. 4-3, gets the news reporters out of bed to give them the latest flashes over the wire. To make a long story short, Edna wants it to be known to Kate Shaeffer that she would rather be chased by a lawn mower any day than a speed cop. But what seems to worry Kate is how Edna is getting along with that new washer she just purchased.

Flossie Davis, Bldg. 4-3, returned from her vacation with a new rock garden, while Beulah Wooley, Bldg. 4-3, is trying to get all the rocks out of Lake Everett.

26-3 Second Shift

Lila Franke has been complaining about her eyes since she came back from vacation. Maybe it was the salt water or maybe too many dazzling uniforms. . . . Should you care to know what to do about sharp corners ask Lucile Meckling. She says to flatten them out and make them round. . . . Have you heard our chorus during the 10:00 o'clock rest period? The girls are doing all right and maybe some day Phil Spitalny will hear about them. . . . It is reported that Mabel Ruckman and Doris Jarboc find fishing a-la pajamas very delightful. Lucky fish. . . . Elden Walker can sure swing with solid jive on his harmonica. He gave a swell demonstration of the 12th Street Rag. . . . Notice, if you need fans fixed just call on Estella Merkel. . . . Congratulations to our June brides —Peggy Gerber, Ruth Shaffer, Beatrice Mooney, Imogene Byrd, and Marge Stratton. . . . Ramona Garton says the best way to get a good supper is to forget your own lunch because the contributions are generous and tasty. . . . We all extend our deepest sympathy to Luella Essig on the death of her father. . . . Virginia Walling shared her birthday with all the girls at her bench by bringing a lovely birthday cake. She won't state her age but claims she is starting backwards. Twenty is pretty young to be doing that. Wait till you reach our age. . . . It isn't every husband who gives his wife a wrist watch to celebrate the sixth month wedding anniversary. So we don't blame Iola Lantz for being proud. . . . Charley Prime got his papers from the draft board. Not a chance Charley you got a family to keep. . . . Red Braden says the fish were really biting where he was. Looks as if the mosquitoes didn't do so bad either.

19-5 Office Chatter

The two smiling faces in Bldg. 19-5 office are the two Frances' who were saved by a 3 percent bell. . . . How does Bill Fryer explain that cut on his neck. Or does he? . . . Francis Richards makes the news by wearing "Sinful Soul" and "Whisper" cologne. . . . Evelyn Parkinson is going cruising next week on the Great Lakes—no lake sickness we hope. . . . Gladys Beal and husband are going to Salt Lake City and points west by south. . . . It is suggested that Lester Logan join the Salvation Army. We don't know why. It was just suggested. . . . Rea Kuhn is back from the cherry festival and she's all tired out. "Everything happens to me."

Mary Rupp, Bldg. 4-3, has returned from a two weeks' trip to the New England states. Wonder how she got along directing traffic in those other large cities. Several days before she left she was seen directing all traffic on foot on our main street in the center of the business section, but things were not moving so well for Mary. Hope she had better luck in those other great cities through which she went.

Malinda Gehle, Bldg. 19-5, is spending her vacation on a boat trip. Lucky gal.

David Mannix, Bldg. 26-2, knows his horseback riding. David and three of his pals rented a horse and when the keeper asked how "long do you want the horse?" Dave replied "Just as long as four people can set on." What are we talking about, time or distance?

Hoot Mon! People seem tae like to talk about morbid things—men talk about how near they've been to death—women talk about their operation, and here I am, about to start in on the Scrap Pile again. I can't think o' anything good about it. Ye might say that it could serve for National Defense in one way—ye could hide behind it.

But even then it would betray ye. If the enemy dropped a bomb into it, like as not some of the scrap would fly out and kill ye. So no matter what ye do for it, scrap will get ye in the end.

No, scrap doesn't help Defense—it slows it down—but we will positively have plenty o' defense goods in spite o' it. The defense o' our Country must not be held up for anything.

But here's another danger that lurks in that vile pile. Civilian goods can come only after Defense Goods are assured. Therefore every hunk o' stuff ye send to the scrap pile means just that much less civilian goods that we can build. And THAT means less luxuries—yea, even necessities—that we can buy. It might even mean a scarcity o' work in some departments.

What a mean trick that would be for old man scrappile tae play on us. Weel, I wouldna' put anything past him.

I never could put anything past my ould uncle Angus, either. He does a lot o' reading, especially free verse. One day as he was lying in the hammock, getting a free swing in the wind, and reading a free translation o' poem, the news boy same to collect.

As he cautiously opened the creaking hinges o' his purse, I remarked, "Uncle Angus, I've seen ye force that ould purse open on occasion, but I never saw anything come out o' it."

"Weel, me lad," he replied, "at least ye've never seen onnything FLY out o' me purse since me last invention. It's a flat moth ball tae use in Scotsmen's pocketbooks."

Thisa And Thata 19-5

We all admire the husband who helps the wife take care of the children, but you would think that as many times as Johnny Ormiston has dressed little Judy he would know the front from the back of the frock. . . . Alice Neuman has a very fetching giggle. Once you hear it you never forget it. . . . So sorry Bldg. 19-5 was forgotten during the past two weeks but your reporter was on vacation. For Frieda's information we didn't need the safety gadget.

For a while we of Bldg. 4-3 were quite worried about our two expert horsemen "Doc" Markley and Earl Souers. We noticed that both of them had a hand wrapped up so we came to the conclusion that Earl had been helping Doc exercise his plugs and that another disaster had occurred, but Doc said "No, nothing like that at all." He tells us his nags now are very docile, after an intense training course, he took the wild streak out of them.

Forest Whonsettler, Bldg. 4-3, reports his new dogs are doing fine.

AN INVITATION

The Decatur Supervisors Club will be the week end guests of Bill Heim at Adams Lake. This will be their regular monthly meeting. The following invitation was extended to the members:

The honor has been extended to the Supervisor's Club of the Decatur Works to help in dedicating building No. 2 at Bill Heim's cottage on the beautiful shores of Adams Lake, Saturday and Sunday, July 26-27, 1941.

From your comfortable lounge chair on any of the roomy decks of the safe, (?) steady, newest and largest, exclusive row boat powered by Mickey McDougal's Evinrude you can view the ever changing panorama of Adams Lake's famous Gold Coast Shore line, passing the historic WPA building which you have helped to dedicate earlier in the day.

Soon the tantalizing melodies of the Supervisor's quartette will call us forward to the main deck. (No charges for this) For those not caring for this there will be other diversions for your pleasure. (There will be a charge for this.)

Shortly the twilight and sunset hour begins, we witness a glorious pageant of the sky, a riot of ever-changing color beyond description, instilling in us a sense of calm restfulness and relaxation.

Then comes the deepening dusk and the shore lights begin to twinkle and you *try* to find a place to lay your weary head.

Special arrangements have been made to serve doughnuts, sandwiches, hot coffee, milk, soft drinks, etc.

Why is it that some fellows will go to such extremes to get a free cigar on a new bride, then again why is it that some new brides are so hard to get along with. That is one of the mysteries of life. Oh! say, would you like to know what brought this thought on? Well, it seems that one Helen Shoppman (now Helen Martin) went and got married two or three weeks ago, and following the usual custom, passed the cigars and candy. Well, here enters the villian (or victim). Our most highly esteemed Mr. Stephens from our Bldg. 4-2 office tried his darndest to get a cigar from Helen. She held out for three weeks then gave in and Mr. Stephens got his cigar. BUT on lighting it in the office there was heard a tremendous explosion, and Steve was seen leaving the office ahead of some violent force. When the files and typewriters settled back in place, the whole office was covered with cigar clipping, fancy paper bands and over all settled a blue haze which 'twas said to have originated from Steve. But to his credit (or discredit) he was seen salvaging the remains of the cigar. To what lengths some fellows will go to, and through, for a free smoke. Oh! well, just a thought anyway.

Art Mask and Gertrude Daymeyer, Bldg. 17-2 and Gladys and Harry Freeman, Bldg. 26-2, planned on a big meal in their Lake Gage outing. Unfortunately they forgot the meat although they remembered the sauerkraut. A fish substitute failed to work for although Art had every known type of bait the fish simply wouldn't bite.

M.B.A. PATIENTS

General Purpose Motor: Pauline Sovers, 214 W. Wallace St.; Louis Delagrange, Huntington, Ind.; E. Cox, R. No. 10, Tilman Rd.; Ernest Cutter, 621 W. Dewald St.; Rufus Byrd, Methodist Hospital; Margaret Brickel, 932 Grace Ave.; Dorothy Brecht, 637 Huffman St.; Marie Francies, 1314 Guthrie St.; Francis Fuller, 1233 W. Jefferson St.; Juanita Stevens Gerke, 534 Wagner St.; Pearl Gratts, 2811 Fox Ave.; Gilbert Hutchisson, 731 W. Superior St.; Charles Houser, 333 W. Leith St.; Sarah Smith, 2628 Broadway; Janice Stute, St. Joe Hospital; Grace Von Schmitton, 2016 Forest Park Ave.; William Knuth, 612 Lillian Ave.; Arthur Conrad, Laotto, Ind.

Transformer: Richard Beltz, 924 Cottage Ave.; Verla Wolfe, 804 Huestis Ave.; Roderick Marhenke, 121 E. Woodland Ave.; Robert Highland, 2517 E. Pontiac St.; Lelah Hile, 1146 W. Wildwood Ave.; Marcille Bercot, St. Joe Hospital; Betty Buchanan, Lutheran Hospital; Lane Breidenstein, 4619 Beaver Ave.; Betty Drewett, 517 High St.; Elizabeth Louis, 536 E. Lewis St.; Andrew Schuhler, 2106 Meridian St.

Apprentice School: Donald Myers, Lutheran Hospital.

Apparatus: Earl Davis, Ossian, Ind.; Herman Briggs, 2520 Caroline St.; Cecil Wood, Leo Road; Alva Walker, 2036 Elyetta St.; Edward Drew, 1219 W. Main.

Series & Specialty: Lawrence Duke, Lake of the Woods; Maurice Cook, 1140 Wabash Ave.

Shipping: Avonelle Bergmann, Buchanan & John St.

Left the Hospital: William Wright, Frank Newport, Leo Simpson, Arthur Bireley, Howard Moore.

Returned to work: Olive Ward, Ernest Knapp, Mary McMuller, Joseph Prange, Robert Gable, Ida Commers, Helen Karst, Cletes Goldsmith, Jeanette Lojek, Gatha Zion, James Umphry, Mary Butler, June Lambert, Max Lawrence, Emma Bradford, Violet Dollarhite, Guy Archer, Mary Baumgartner, Robert Moore, Marjorie Green, Eugene Rosesner, Harold Beaman, Lucile Baker, Robert Lachot, Clem Myers, Donna Wappers, Gretchen Webb, Harry Ecenbarger, Rex Buckles, Fred Shaw, Richard Weaver, Freida Kramer, Evelyn Heche, Wilfred Eickel.

Sunbeams From 17-4

Ralph (Cap) Dunlap has promised the fellows in the department that he will not yoo-hoo at the girls on the stairways during fire drill. Ralph is our new fire drill captain.

Did anyone see the moon shining at high noon, or the sun shining at midnight? Those are the things that Dorothy Wilhelm has been seeing this week. No, she isn't sick, the boy friend is home from camp.

Glenn Stalter says that zig-zaging on the road is alright if you do it right, only he zigs when he should zag and vice versa, if you know what I mean.

Helen Krauss bid all of the girls good-by and left for her new home in Detroit last Friday. Here's good luck to the newlyweds.

Thought for the week: Life is not so short but that there is always time for courtesy.—*Emerson.*

Granny.

The girls of Bldg. 4-2 and 4-3 offices enjoyed a very delightful time at the steak fry.

Decatur News

A. Buffenbarger, foreman of the Maintenance Department is back to work following an operation at the local hospital.

We notice that Joe Krick, one of the Decatur Plant's selective service men visits in Decatur quite often. Joe is stationed at Fort Benjamin Harrison close to Indianapolis and we wonder what a small town has to offer that Indianapolis doesn't.

Pat Murphy is home on a ten day furlough from Camp Shelby, Miss.

So the story goes—Geo. Womack and a friend visited in Van Wert Sunday, when they were ready to come home, they stopped in a filling station and got gas and started home. They had heard that gas was very cheap in Ohio, so they started out and forgot to pay for the purchase. They hadn't gone very far, when they were stopped and furnished with a police escort back to the filling station. "My, my, it must be terrible to be so absent minded."

We notice that Peggy Gaunt, our diminutive telephone operator, is sporting quite a piece of ice on the third finger of her left hand. When the big event will happen has not been published.

The benefits of swimming with clothes on seems to be catching at Decatur with two or more employees joining the Ed Warren Swim Club. On Sunday, July 21, at Big Long Lake, Fred Chronister, Decatur Tool Maker, joined the club. Just a few weeks before, we understand that Raymond McDougal also joined the club at Adams Lake. Anyone wishing to join the club are asked to contact the charter members.

Bert Gage has returned from a ten day fishing trip in Northern Canada. Mr. Gage spent his vacation at Cliff Lake Lodge and reports excellent fishing was enjoyed by all the party.

We note by the WORKS NEWS that Paul Hancher is leading in the Decatur G. E. Club Tennis League. What all the fans are wondering about is whether there is no competition or is Paul actually as good as he says he is (heaven forbid!), after all it is quite a feat for a man as old as Paul to be able to retain this lead over a field of young men.

On July 26th when the Elex goes on their trip to Milwaukee, the following Decatur employees will make the trip:

Dorothy Ray, Helen Ray, Verdella Everett, Francetta Everett, Florine Everett, Eddie Noonan, Marcella Bleeke, Olive Journay, Lucile Baker, Howard Gehrig, Paul Lord, Hollis Bonifas, Mary Miller, Mary Kitson, Goldine Kreischer, Quintilla Frye, Betty August, Norbert Lose, Richard Drake, Lucille Braun, Robert Lord, Ethel Tumbleson, and Harry Essex.

Don Voorhees, Bldg. 4-3, played in hard luck last week-end. It seems that he was invited out to a chicken dinner. When it came time to put said chicken upon the table, it had disappeared. Some culprit had made off with it and poor Don had to eat minced ham, and Oh, how he loves it.

"Shorty" Solberger and Howard Mills, Bldg. 4-2, decided to trade shotguns last week. However, when the time came to close the deal, "Shorty" discovered that his wife had burned her initials on the gun stock. The deal is now definitely "off" as far as "Shorty" is concerned.

Hermetic Office 17-2

Bldg. 17-3 would like to know why Ernie Bailey always gets thirsty about 3:24 every afternoon. . . . Dorothy Rinehart must have had her mind on the new house when she came to work without her badge. Bet she was thinking something else walking home in the rain after it. . . . George Langenberg says he doesn't want to interfere with National Defense but one of the United States mosquito boats would be just the thing for his fishing. You see he needs something fast enough to run away from the small ones and catch up with the large ones, but still big enough so there is room for him in the boat after he catches a few. . . . Red Smith may apply for a patent for the new dance he originated when "Mickey" or "Minnie" ran up his pants leg the other day. . . . Thought maybe the G. E. had started to make airplanes when we heard a noise that sounded like a bomber taking off, upon investigating we found that something had gone wrong with the small electric fan Jack Clarkson keeps under his desk these warm days. . . . Karl Geller had four teeth pulled and Bob Wefel celebrated his tenth wedding anniversary. Any similarity of these two events is purely coincidental.

Suzy Sleuth.

Borings From 4-4 Office

Early up and hie me to the office where duty bids be the guest correspondent for the Rat known as Elmer. Observed the Stock at the desk where he did early up and sharp all his pencils which now number 19 not counting those which mark in red and one which marked in blue. He didst say that it was a beautiful sight to see them side by side—all sharp. . . . The Uncapher will hie him to the shores where the breezes wilt blow the hair—but not in his Kayak. 'Twer a cruel world that by mischance did'st cause vacations and cracked outboard motors to meet. . . . Took me to the floor for observations and did'st notice the Weber (not one hair out of one place, as remarked by Elmer) with a spot on his shoe. He was greatly lamenting the fact Mail Pouch is not quite so good as shoe dressing. . . . Every week from now on until vacations are over I'm giving all a break to write in my column. If I can't write to suit them, I'll just let them try a hand at it. This week in the brevities of news we find Mrs. L. Hampton Roe just a little bit south of North Carolina. Mel Warner is also east visiting the capitol at Washington. Mary Hakes is at Cedar Point, Ohio on Lake Huron. . . . Charlene Snyder went home the other day to see if she had turned off her roast. It was turned off but she was just burned up to think she went home for nothing. There are things around our office that are just rich in tradition. For example, Mike O'Grady without a cigarette—the filthy weed, also Thomas Staley could be included. Virginia Plummer without saying "Boy, you can say that again." Also Jean Bugert without eating or passing out candy. . . . 'Till next week with another guest columnist. 'Tis enough for now, I remain sincerely as ever,

Elmer, the Field Mouse.
(The Rat to You.)

Cora Graham, Bldg. 19-5, is back from two weeks' vacation.

26-5 Tool Bits

John Hensler has returned from Crooked Lake. We will spare you the gory details of the fishing trips he made over the calm and serene waters of that mighty lake. . . . Art Blume is home from camp for a short leave. He looks swell. . . . George Hartman is all in from his vacation sojourn and doesn't want to join the painters union. Painting his house broke him of the idea. . . . Special—Notice is hereby given to all false teeth patients whose uppers and lowers don't fit to report to "Bluegill" Joe Hartman who has started a new profession in building precision teeth. . . . Wanted—A new or used set of false teeth—Joe Hartman. . . . Rex Buckles is back to work after spending a week enduring some facial operations in Indianapolis. Believe you me girls, Clark Gable had better look to his laurels. . . . Bert Telley is the information bureau on the best way to kill potato bugs. . . . Ed Grote's trip east last week brought a good one for Ripley. While in Albany Ed and the missus stayed in room 1052 and lo when they were taken to their room in New York they again had 1052. Wonder if there are any lottery tickets out with that number? . . . Society item. Mr. Frank Hoffman will spend next week fishing at Lake George. One thing certain if the Indiana fish won't bite the Michigan fish will. . . . Bob Goers is the silent detective of the G-E Jones street parking lot. Monday he saw his car being backed out of the parking space and a young fellow trying to change the wires. The young fellow got away. . . . Walter Elliott's aquisition of a baby Austin is causing speculation. . . . Gordon McDougal's vision has been pronounced O.K. Ask him to describe tbat bathing beauty. . . . Doris Windhorst has a new nickname, "Curley". Last Saturday she came to work all covered with curls. Incidentally she is spending the week at a ritzy lake.

The Bldg. 4-3 Dramatic Club is now busy producing a new play for early fall showing, the title of which is "A Gust of Wind." The direction of this play is to be handled by our expert Elmer "Sneezy" Harshman, Sam Allmandinger will play the part of the plodding ploughman, Charlotte Stanford the part of his faithful wife, Buck Kline as the plotting villian, and Wm. "Beezer" Burke as the sheriff whose delight it is to foreclose mortgages on widows. Do not miss this one folks, it will be a doozie.

Dawn Hunt, Bldg. 4-3, is displaying a brand new rock. We all wish her success.

Esther Crogan, Bldg. 4-3, had a real date last Saturday evening and was she ever mixed up. Instead of bringing home a loaf of bread as mother ordered, she brought a quart of milk.

Sam Allmandinger, the newly wed of Bldg. 4-3, gave a real stag party at his summer home at Big Long Lake. John Dehl, as master of ceremonies, and M. Feasel as chief of police. All went well until Carl Clevenger fell in the lake and it took Harry Mumma's and Buck Adams' fire boat to get him out. Ted Mullins was chief chef while Everett McGee did a real good scouting job.

"Why are you so bitter against your Uncle Nebuchadnezzar?"

"He lost all his money right after we named the baby for him."

NEWS THROUGH THE PLANTS

(Continued from Page 7)

Motor Generator Static

DREAMS

"Jerry" Tilbury and "Aggie" Freiburger, those two gals with the southern accent, who recently returned from a vacation in Georgia, report a very startling occurrence. While waiting in the station at Cincinnati the girls dropped off to sleep; and strange as it seems both had the same dream.

They relate that the station was suddenly filled with cowboys and Indians, marching back and forth, shooting off guns. (Too bad Pappy Archbald could not have dreamed this, he dotes on cowboys.) Now we are trying to decide whether the girls had too much "southern hospitality, southern fried chicken" or were just tired. Funny how these things will affect a person—sometimes they see pink elephants.

CHECKING UP

Mary Hartman, who until recently responded to the name Lankenau, together with her husband, are erecting a new home some where in the country north of our city. Mary remarked, "We got our new bath tub and though we have no water, I sat in it to make sure it would fit." Mary recently complained to the boys that what she said or did never made the "News"—well, this time it did.

SPECIAL NOTICE

Rachel Luellen, Bldg. 19-1, will celebrate her birthday July 26th and anyone wishing to bring gifts or extend congratulations will please attend to these matters not later than Friday evening of this week.

LOST

We have a report that Art Kelker of our drafting department recently started out for a stroll. Anyone acquainted with Art's strolls will realize they are almost equal to an army's daily march.

Anyway, Art started walking west and after traveling for some time decided to return home, he made a turn which he thought would bring him back to Fort Wayne, continued walking and ended up in Roanoke. No kidding, he got his directions mixed slightly, and so we suggest that in the future he carry a compass to chart his course or it's hard to tell where he may end. Might even have to charter a plane to get back.

ECONOMY PLUS

Boyd Fisher's pals report, that he is endeavoring to bring down tobacco costs. Recently, when he lit the old briar, the people in the vicinity noticed a peculiar aroma that brought visions of wide open spaces, pine trees, mountain streams and even forest fires. All these visions of the great outdoors were due to a mixture of tobacco and pencil sharpener shavings Boyd was smoking in his pipe. Remarks our hero, "Some dirty so and so mixed that stuff in my tobacco." Most of the folks think this aroma was far superior to the smell that some times comes from his pipe on other occasions. And think of the savings.

TOO BAD

Nadine Tierney made a startling discovery recently. While checking over the family tree, (probably looking for cocoanuts, or chasing monkeys) she discovered that "Pappy" Archbald and "Yoder" Bob Archbald were both her Kinfolk. Begins to look like Bldg. 19-3 will soon be one big happy family group. When asked how she felt about this happy reunion, Nadine remarked that she could tell but we would not be able to print it.

Too bad, we sez. In each life a little rain must fall.

SAYING OF THE WEEK

Jerry Frye remarks, "A really big man never advertises himself, —his bigness speaks for itself."

News On The Nose 4-5

Ah, that's the way life goes. Here all the girls in the Bldg. 4-5 office were eagerly awaiting final announcement of the contest proposed, sponsored and for the benefit of "Bachelor Jim" McGill and what does he do. He calls off the perfectly wonderful contest featuring "Why I think Jim McGill is the most popular man in the office." Now no one will win first prize which is a date super-duper. . . . There's some pretty fierce pitching going on in the rangs of the Bldg. 4-5 commutator section with Joe Trentadue, Ed Gephart and Bill Archer being the main contenders. Archer threw a double ringer and needed a half-hour rest to get over the surprise. Ed got too enthusiastic and threw a ringer around someone's shoulder blade. . . . Hilda Walda has been describing a friend's "out-door motor-boat" after her recent trip to the lake. My, My, what will sportsmen think up next? . . . Now when George Seibold feels hunger gnawing at his innards, he just laughs and laughs because he knows it's just the false-tooth he swallowed. . . . Witnesses tell us that Howard McVay should not be in such a hurry next time to let his wife get out of the car. Then she will not have to stop traffic on Berry Street while she collects groceries from all over the pavement. Was whose face red? . . . All our apologies this week go to Violet Buesching Scott. We called her new husband Private when he's a Sergeant in the U. S. Army. Oh goodness, we're ashamed.

Plastic Flashes

The Tillies are going to have to hire a body guard if people don't stop threatening them.

An Alspach pulled a fast one on us and became Mrs. Robert Bon-Tempo last week. Here's wishing you both lots of happiness.

We're glad to hear Helen Houser is up and around again. Hope you will be back with us soon, Helen.

If anyone would like to have some good entertainment in the form of a singing (?) duet, they should contact Anne Fox and Viola Yanney, Bldg. 12-3 office. The Tillies think they're not bad, but they're not good. We do, however, hope our Plastics duet does not receive more requests than they can take care of.

Grace Funk is discovering how peaceful it is in the country. She has taken up residence there.

Lorraine Blanchard, Bldg. 12-3, has not been the same since she went to Missouri. She's too skeptical now.

August 9 is the date when another of the department's beauties, Marie Norr, Bldg. 12-3, will become Mrs.

Betty Adams, Bldg. 12-3, is having a birthday Saturday. Gosh! kid, how do you do it? You don't look any older.

Nadien Cobb and Betty Perry seem to think that brass buttons are purty. Could there be romance?

Alice Friedmann changed her name to Mrs. Daniel Sorg a couple of weeks ago.

Marriages seem to be predominate in the department this week.

"The Tillies"

Hermetic Motors 17-2 And 17-4

Dear Girl Upstairs,

Food, and more food, was the order of the week!

Tuesday night the girls got together on a super-colossal pot-luck which served to demonstrate the efficient method the girls have worked out.

I certainly admire the way Vern Castle "stuck to his diet" and so does Charlie!

Pauline Corbat and Marjorie Ridenbaugh had a joint celebration for their birthdays last Friday. They were both overwhelmed by individual gifts from the girls. And then, of course, there was a surprise pot-luck for them! All of the girls on the connecting table attended the P-L.

Pauline even received a greeting from her granddaughter, who is none other than,

The Hermit.

Dear Hermit,

So Marcella Boyle likes milk, does she? Maybe that accounts for her ruddy complexion, but I seriously doubt it. I think Mart, is just an all-around, out-door girl. Did you know she liked horse-back riding in the mud, too?

Jerry Clark is certainly an excited little girl. She just received a beautiful engagement ring and is going to be married soon.

Merlin Duff was in an automobile accident and received injuries on his knee.

Helen Klinker took a trip last Sunday to Mackinaw Island in northern Michigan. Quite a trip I imagine, through beautiful country on a beautiful day.

Maxine Bobay is quite a fisherman. She has been going to Lake George with her little fish pole lately. Summertime surely brings out a lot of hidden talent, doesn't it?

Until next week I remain yours for better fishing, swimming and sun-tans.

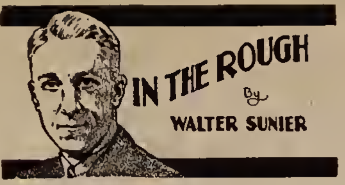
The Girl Upstairs.

It looks as if the Love Bug is in Bldg. 4-2 these days as Albert Renz marched to the altar over the Fourth, also little Phyllis Smith changed her name to Hall. Who will be next?

One of the highlights of the summer social season occurred last week-end when the personnel of the small lot section, Bldg. 4-3, got together for a big party at Viola Grover's home at Lake James. It started off with a refreshing dip into the waters of the lake and all the cottagers wondered at the sudden rise of the lake level. Russ Carpenter acted in the capacity of life guard and did a swell job. Chet Bradtmiller was the only casualty, getting lost in the wilds of the surrounding country, but was finally rescued. Ella Black acted as hostess, and Russ came to the fore and assisted her, acting as chief servitor. Forrest Whonsettler was not present for reasons well known to us. Goldie Dragoo and her escort did a remarkable job in cleaning up after the dinner and washing the dishes. In fact, every one had a glorious time.

Hubert Meyers has definitely decided that all back hand strokes should be barred from tennis games. He is not sure whether he has enough grounds to appeal to the A.L.T.A. to remove the stroke from the rules, but after looking at his eye we wonder? On second thought we all wonder about the story anyhow.

Margaret Cummins, Bldg. 4-3, who is a patient at the Lutheran Hospital, wishes in this way to express her thanks to all for the flowers and gifts received.



IN THE ROUGH

By WALTER SUNIER

Frank Goetz won the match last week for the Rough Riders when they were playing the Ice Cubes. The Rough Riders won by one stroke and the narrow margin was produced by Frank holing out from the sand trap at No. 3.

Stanberry also performed in a stellar way by shooting a 41. His average in the league was 51.5.

Some one sent us a big picture of a man with a very grim and determined look on his face breaking a golf club. The picture is labeled W. Wehrs. Mr. Wehrs might feel like that many times inside but we doubt that with the even disposition he has that he would actually bust a club—at least, not an expensive club.

In the Monday Evening Group in the Golf League, the Plastics won from the Turf Toppers, 186 to 190; the Rough Riders won from the Ice Cubes, 182 to 183; and the Slapsticks won from the Divot Diggers, 162 to 178. The low score, a 37, was shot by Harris.

In the Tuesday Evening Group, the Dubs defeated the Optimists, 186 to 205; Bldg. 4-3 defeated the All Stars, 183 to 192; and Bldg. 4-4 defeated the Bill Goats, 176 to 181. The low score, a 40, was shot by Daseler.

In the Wednesday Evening Group, the Sharpshooters defeated the Trappers, 166 to 226; the Fluorescents defeated the Apprentices by forfeit; and the Hookers defeated the Cro-Flites by forfeit. The low score, a 40, was shot by Lamboley.

Eddie Taylor, Bldg. 4-3, went to visit a sick friend at the hospital recently. All chairs being occupied except a wheel chair, Eddie set himself down in it. In the course of time a nurse came in, and Eddie busily talking, the nurse put the thermometer in his mouth. We all have thought you looked rather pale at times, Eddie, but didn't think you looked that bad. Just remember never to sit on one of those beds they whcel you from one place to another in.

It seems as though Bldg. 4-3 owes their sympathy to Dorothy Goshorn and husband as Toppy Goshorn, the sweetest car you ever saw, as Dorothy says, passed to the Great Beyond.

Floyd Dowell and Wayne Gilliom, Bldg. 26-2, came back from Michigan with an unusual fish story. They caught just one fish.

Stephany Hilker, Bldg. 26-2, has joined the large throng of grass skirt wearers.

Rod-Gun Club Group Qualifies

The first group of Rod and Gun Club members have qualified on the U.S.A. military course. Names of those who qualified will be forwarded to the Director of Civilian Marksmanship for the awarding of medals. Qualifications place no obligations on the shooters and are free of charge. However, all shooters must be members of the Rod and Gun Club and shoot the prescribed course at the outdoor range.

Members who have qualified to date together with their ratings are as follows:

Swinging The Hickory

By Paul Schwehn, Bldg. 4-3

Inter-department softball got underway last week Wednesday with the West Siders taking the Small Motor Office by a count of 6 to 4, the Apprentices walking away from the Sleepy Stators in the last inning and the Messengers, breaking their losing streak of five games, returned with nine men to dish out a last frame victory over the seven man Small Motor Factory team.

The center diamond afforded the most interesting spectacle of the evening where the West Siders held reign from the fourth frame. Sitko, hurling for the Cowboys, walked seven, struck out six and allowed four hits.

Dent, pitching for the White Collar lads lost his usual form and let go many a high ball with the count two to three and two away.

The good fielding and heavy hitting of the Cowboys were the deciding factors in the center arena.

It was in the sixth frame that the Delivery boys clenched their first win of the season when they tallied four runs.

Although the mighty seven of the Small Motor Factory tried, they were unable to hit the "tobacbacco chawin" hurler for the Delivery boys.

Once again history repeated itself when the Zollner Piston's defeated the Electricians last Thursday at the Municipal Beach in the Main Auto Major League.

The game was filled with errors from the time Norv Nahrwold stepped in the box until the last man came to the plate. Had it not been for the exceptional fielding of Cowan and Stellhorn, which won the acclaim of the fans, the trouncing would have been far worse.

The nimble feet of Cowan and Romary accounted for the two tallies in the last of the ninth, when Jerry Weber was at bat with the count two and three with two away.

At times a little psychology used upon players will go a long way to win a game. It is up to the manager or coach of the team to see that a pitcher is in the box who deserves the support of his fielders.

Too much bickering over incidentals by any coach will make the fielders uneasy and make for faulty playing. A few well chosen words by any doadh will make a player do more than is expected of him. A good doalh is indeed an asset!

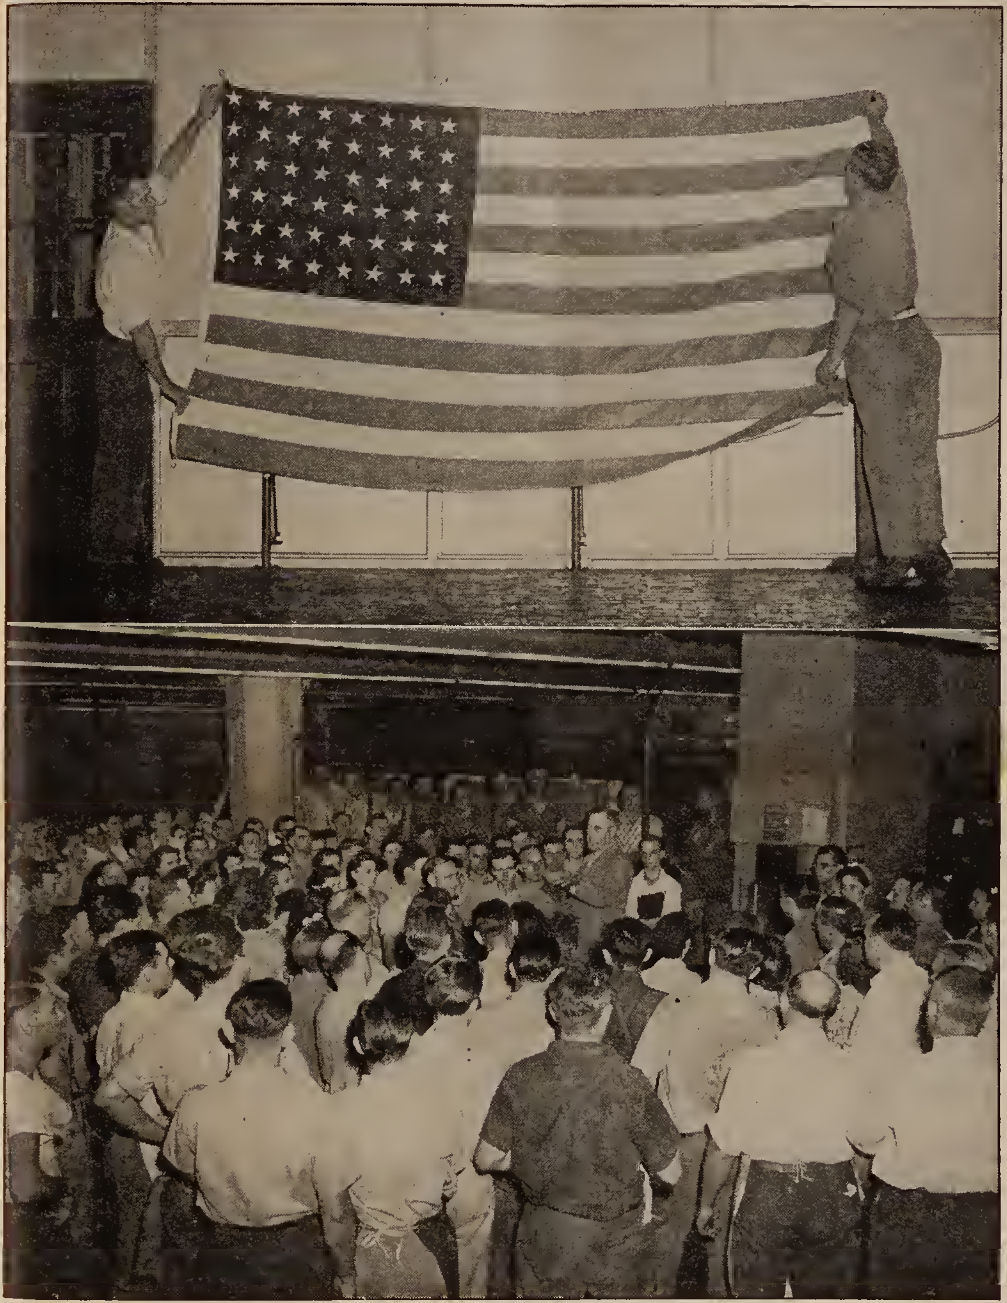
Substantial Increase In Suggestions

Old Glory Hangs In Magneto Division



In the upper picture Floyd Garland and Oscar Schelper are shown placing the flag in its position of honor following the presentation program which is shown below.

In a short but impressive ceremony held Tuesday afternoon the employees of the Magneto Division were presented with the American Flag which was posted, following the ceremony, in a prominent position in the department. The flag was presented to the employees by Works Manager M. E. Lord, in recognition of the department's excellent record of shipping its first consignment on schedule time. Mr. Lord was introduced by I. H. Freeman, personnel administrator. It was accepted on behalf of the employees by Kenneth Betts.

In presenting the flag Mr. Lord stressed the important part the Magneto Division is playing in defense work and emplasized the necessity for every employee to do everything possible to insure our peace and happiness and fulfill our obligation to Uncle Sam.

Complete Plans For Foremen's Picnic

Plans have been completed for the first annual picnic of the General Electric Foremen's Association of the Fort Wayne and Decatur Works to be held on Saturday, August 16. The affair will be held at the Log Cabin. A varied program is being planned including outdoor sports. There will be no charge for members and the program will continue throughout the afternoon and evening.

ELECTRIC RAIL FLEET

The Newburgh and South Shore Railway Company, which serves the steel mills and other industrials in Cleveland's Cuyahoga Valley district, is doubling its fleet of diesel-electric locomotives.

ALL OUT FOR DEFENSE

With this issue of the WORKS NEWS we welcome a newcomer, "All Out For Defense." The importance of every employee doing his bit for the National Defense Program is obvious and it is the aim and ambition of "All Out For Defense" to present facts that will stress this importance. Please read today's and every following issue carefully—it is important to your country's welfare, your welfare and your Company's welfare. "All Out For Defense" is being edited by Leonard Erickson and R. J. Hoffman, Bldg. 18-1.

$74,500 Paid In Insurance During June

One Claim For $1,150 Paid At Fort Wayne—Grand Total Now $18,857,685

During the month of June, beneficiaries of 23 employees in seven of the major apparatus works of the company, received a total of $74,500 under terms of the Group Life Insurance Plan of the Company, the monthly report from the office of the Secretary shows. The Schenectady Works had the largest number of claims, with twelve

$6,791 Is Paid To Suggestors In Half Year

Wire-Insulation Division Leads In Number Of Ideas Submitted Per Employee

During the first six months of 1941 the number of suggestions received under the General Electric suggestion system showed an increase of 1,151 over the corresponding first six months of 1940. The percent increase in suggestions is much higher than the percent increase in employment.

In the first six months of the current year 2,754 suggestions were received as compared with 1,603 during the same period for last year. There was, of course, a corresponding increase in the number of suggestions adopted, the total for the first six months of this year being 862 compared with 459 for the first half of 1940, an increase of 187.8 percent.

The total amount of money paid out for awards to employees for the first half of 1941 showed an increase of 230 percent and the sum of $6,791 was disbursed. In the first six months of 1940, $2,955 was given out for new ideas adopted by the various suggestion committees.

The average award per adopted suggestion was $8.33, an increase

• Americans

America was built by the men and women of many nations. America still is in the process of growing, through the efforts of the men and women of many nations. In the beginning we were all immigrants. The stock of every native born American came from a so-called foreign land. Today, when the defense of America is of prime importance to everyone, it ill becomes any one of us to look down our noses at men and women, lately arrived on these shores.

Louis Adamic, noted author and himself an immigrant, writer of "My America" and "The Natives Return", recently called to aid the Defense Commission work out a policy toward immigrant and minority groups calls for a new attitude. Says Adamic, "Every person wants to be identified with something bigger and better than himself. The new immigrant here wants passionately to identify himself with this country. But so many times he is made to feel that the country doesn't want him. He's called a wop, or a hunkie, or he's laughed at because of his name.

"So, he doesn't get identified with America . . . for America is not just a place: it's an idea. He remains isolated. Yet he still feels that driving need to be identified with something. And so, some foreign movement picks him up. The fifth column gets him".

There is food for thought in Writer Adamic's words. Let us not in General Electric be guilty of such a lack of understanding. Let us instead have tolerance and plain, old-time friendliness. Time spent on any other attitude is sadly wasted.

• So You Want A Coat Of Tan

Every year finds a host of willing martyrs to Ra, the sun god. These are the dupes who are determined to come back from a weekend or vacation with a healthy looking, bronzed tan, be the cost what it may. They lie under the sun's rays for hours, impatient that no results can be noticed immediately. But wait a few hours more! Their parched skin turns a fiery red and they toss through a sleepless night of blistered agony between sieges of chills and fever!

Sunburn is a real burn. It may have serious and even fatal results if a large area of skin is involved. The result is similar to that when a person is burned from exposure to fire. Sunstroke, stomach and intestinal disorders, headache and fever, to say nothing of painful discomfort, are a few of the after-effects of severe sunburn.

Healthy for you? Doctors will disagree.

Prevention of sunburn is worth far more than any cure. The sun's rays are more intense during the summer months, and particularly so from 10 a. m. to 4 p. m. Hence during these times, exposure should be brief until skin resistance has been built up somewhat and until tanning has begun and the danger from a severe burn safeguarded. And don't let hazy days fool you; the rays of the sun responsible for sunburn are just as intense!

A safe rule is to be exposed to the sun for only a few minutes the first few times so that the danger of a burn is reduced and the skin tolerance is learned. Take sufficient clothing along to keep covered after a brief exposure. Blondes and redheads should be particularly careful since they usually tan slowly. Some people are unable to acquire a tan at all.

Some preparations are sold which may be helpful in preventing sunburn and in building up a tan. Their effectiveness will depend largely upon the skin peculiarities of each individual and such preparations should be used with caution and discretion.

If sunburn has occurred, it should be treated like any other burn. Baking soda and water, ordinary vaseline, or carbolated vaseline may lessen the discomfort. If sunburn is severe or there are serious after-effects, a doctor should be consulted.

SUNBURN IS NEARLY ALWAYS THE RESULT OF CARELESSNESS!

President Wilson Inspects Works

Keenly interested in the progress being made in National Defense Work at the Fort Wayne Works, Charles E. Wilson, president of the General Electric Company spent Wednesday of last week in inspecting the various departments. In the above picture Mr. Wilson, accompanied by Assistant Manager C. H. Matson and Omer Mettler, superintendent of the Series and Specialty Motor Division is shown watching one of the operations in Series and Specialty Motor Division performed by Mildred Mitchell.

NEWS FROM THE CAMPS

We publish herewith with great pleasure extracts of letters sent to us by G-E employees now in government service. Address all communications for this column to the WORKS NEWS editor.

Dear Editor:

I have received two copies of the Works News and I certainly would appreciate to have the News every week. I have just returned from a 15-day furlough and was not able to answer your letter sooner.

During my visit to Fort Wayne I visited many of my friends who work in Bldg. 19-4 Die Casting at the G-E. For the past 6 months I have been stationed at Fort Crockett, Texas, in the city of Galveston, about 1,250 miles from Fort Wayne. During my time in the Army I certainly have seen a good deal of the country, the trip to Galveston itself was almost worth a year of my time in the Army.

I am in the Harbor Defense Battery where we use 10" and 12" guns capable of shooting from 7 to 18 miles. The last time they were shot was in 1928 and it was estimated that the vibration from the guns broke about $50,000 worth of glass in the city of Galveston and that has been the last time they were shot.

There are so many things to tell about a soldier's experience in the Army that I have put off in my letters in order to tell my friends which I am sure I can make more interesting by telling them.

Again I want to thank you and the company for their interest in the employees who are in the Army, and would be very happy to continue to receive the Works News.

Yours respectfully,
P. F. C. John W. McKee,
20th C. A. (H. D.) B Bat.
Ft. Crockett, Texas.

* * *

Dear Editor:

My personal experience is no different from thousands of other selectees, except that the Ordnance is not a combat organization, but a service unit, and our training is designed along maintenance lines. It is made up of men in the various trades, such as sheetmetal welders, machinists, mechanics, carpenters, electricians and others. Our day is not composed of drill and combat maneuvers, but lectures on the care and repair of tanks, trucks, small arms and cannon, ammunition, and other military material. To be sure, we receive some drill, because after all, we are soldiers and have to learn to act like one, but the only arm we carry and have to qualify in is the .45 pistol. I qualified with a score of 87 in rapid fire. My aggregate score was somewhat lower because I couldn't shoot as good when I shot my slow fire score for record. There are training schools for the various trades here where men with aptitude for that line are sent. I haven't been assigned to a school as yet, but I would like to as I understand they receive a thorough training.

Perhaps your readers would be interested in some information about this place, as it doesn't seem to be very well known back home, judging from some of the letters I receive. The Aberdeen Proving Grounds were established during the World War No. 1, when the facilities at Sandy Hook, N. J., were found to be insufficient. All the new weapons and ammunition are given a trial and have to prove their worth here at Aberdeen before they are accepted by the Army. As you may well suppose, it is a busy place at this time with the guns firing early and late. At least we are getting a taste of what a battle sounds like. For some reason the heavier cannon are fired at night. We can hear the rumble of the projectile passing overhead and some 20 seconds after the report we see the flash of the shell exploding.

The proving grounds, what we call the industrial area is off limits to us soldiers, so I can't tell you what I have seen, only what I heard. There are a lot of military secrets over there, so it is well guarded. The training center is just a new addition called Camp Rodman. We have permanent barracks, similar to those at the Baer Field at home. Camp Rodman, with the proving grounds, has an area of 165 sq. miles. It is five miles to the town of Aberdeen, 70 miles to Philadelphia, Pa., and 75 miles from Washington, D. C. It is 550 miles to Fort Wayne from here. That locates it as good as I know how.

The men here come from all parts of the country, including some Canadian soldiers. I have met men from Texas, Georgia, Alabama, California, Washington, Ohio, Illinois, Wisconsin, in fact from every state in the Union. We were reviewed by the Chief of Ordnance, Maj. Gen. Wesson. He said only one man in every hundred was chosen for the Ordnance, I don't know if he was trying to give us a pep talk or a swelled head.

We are pretty rotten at drilling, maybe that is why they sent us here. As an illustration, this is what happened to me. I was right file leader, as I told you, the com-

CONSERVE
MATERIAL

FORT WAYNE WORKS
ALL OUT FOR DEFENSE
ELIMINATE SPOILAGE

MAINTAIN
QUALITY

Volume 1 FORT WAYNE, INDIANA, FRIDAY, AUGUST 1, 1941 Number 1

Quality Program In Our Works

TO ALL EMPLOYEES:

All of us are aware, in a general way, that the performance of vital defense equipment in many cases depends on the quality and reliability of our products. We also are aware, generally, that the supply of many kinds of material cannot be increased fast enough to keep up with the ever growing defense requirements, and, therefore, the better the use we make of available material the faster the National Defense program can move.

Because it is believed that individual employees can contribute more than they realize to the maintenance of quality and the conservation of material, and thus to the Nation's defense effort, this supplement to the WORKS NEWS is being issued for a limited time to stimulate thinking along those lines.

As a further incentive, the month of August has been designated as Double Award Month. Twice the customary amount will be paid for accepted suggestions bearing *directly* on the conservation of material, and the reduction of spoilage and waste, submitted during that month. It is hoped that each of us will take a real interest in this activity because of a genuine desire to help the defense program as well as the opportunity for reward.

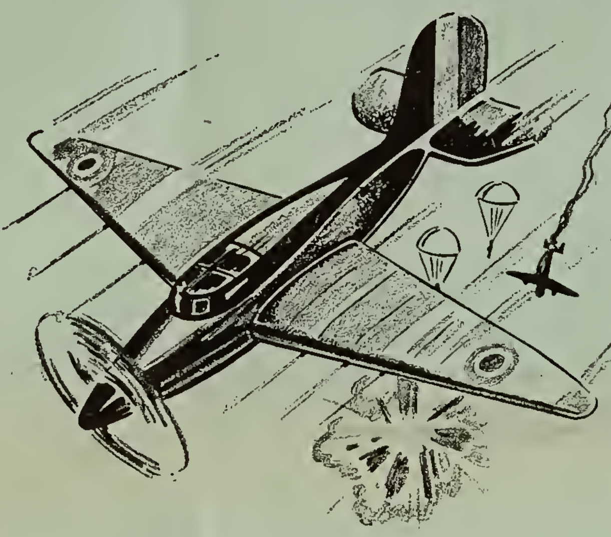
M. E. LORD,
Works Manager.

MATERIAL UTILIZATION

OUR COST REDUCTION COMMITTEE has been sponsoring a campaign, for the past two weeks, in co-operation with the Supervisor of Waste and Spoilage for the improvement of material utilization, particularly in the punch press and automatic screw machine sections. A large number of cases have been found which will make possible increased usage of material on parts. The savings in material will range from 5 to 20 per cent. This indicates that there are a great many opportunities for our people throughout the Works to aid the National Defense program by the conservation of material. Turn in a suggestion for material conservation during the month of August and receive a DOUBLE AWARD.

National Defense

NO BETTER EXAMPLE OF A JOB WELL DONE...



Against overwhelming odds, the R. A. F. beat back the Luftwaffe in the first battle of Britain. There's no better example for us of a job well done — of the job we must do in rearming America.

1. **Understand Your Job**
2. **Conserve Materials**
3. **Do It Right the First Time**
4. **Catch Mistakes Quickly**

IMPROVE THE QUALITY OF YOUR WORK NOW

MAGNET WIRE

represents a major portion of the $$ spent for material at Fort Wayne and becomes a part of practically all of our products. Damage to the insulation on wire during transportation, handling or winding, renders it unfit for use. A short in the coil of a motor, generator, transformer or dynamotor makes it necessary to dismantle the unit and usually to scrap the coil, and new wire is required to replace it.

SPECIAL SUGGESTION FORM FOR AUGUST DOUBLE AWARDS

Your WORKS NEWS carries with it a special suggestion blank for your convenience in recording NEW IDEAS which you believe will reduce spoilage or conserve material.

Do not stop with one suggestion, extra forms are available in the regular suggestion boxes at the bulletin boards.

Present Emergency Demands We Maintain Quality. Accelerate Our Spoilage Reduction Activity, And Make The Most Effective Use Of Raw Material

The Fort Wayne Works is entering upon a quality program with this first issue of "ALL OUT FOR DEFENSE." We hope by this supplement to our WORKS NEWS to cultivate a more definite interest in maintaining our quality at high level. This program should contribute to the reduction of our Spoilage Losses as well as promote conservation of much needed raw material by the elimination of waste.

Increasing amounts of our manufactured products are vital to National Defense which demands the highest quality product. The electrical products we are building enter into practically every branch of defense work for air, land and water forces.

Each week many of the materials used in our work are added to the priority list indicating the serious shortage which exists. These shortages of material present a challenge to all of us to contribute our ideas and suggestions that will bring about the conservation of material by reducing spoilage and the elimination of needless waste.

Defense production must have first call on our facilities but we must also continue to serve our commercial customers and this can only be done by the most effective use of all available material. All national emergency products are urgently needed which makes it imperative that we conserve time as well as material so that there will be no delay in our shipping promises.

Our quality program will teach us that we must understand our jobs thoroughly. To do so means that we must ASK QUESTIONS about any part of our work which is not perfectly clear in our minds. If there is the least doubt about how a particular job should be done, we must call our supervisor or set-up man and ask him to explain the point in question. "Understand Your Job" is the first and most essential step toward High Quality Workmanship.

The second point which the Quality Program will stress is "Conserve Materials." Through this Program we will learn to make our present supply of raw materials go farther and last longer. Most of the raw materials we use in building our devices are becoming more and more difficult to obtain, because of the large amounts required by the National Defense Program. Therefore, it is the duty of each one of us to start doing our part toward conserving materials NOW.

Another part of our Quality Program will stress "Do It Right the First Time." This point takes on added significance since the President's declaration of an Unlimited National Emergency. Each of us who make parts or who assemble finished devices carry an important share of the responsibility in our present National Defense effort. It is part of our job to see to it that nothing is allowed to interfere with the progress of work on defense equipment. By doing our work "right the first time," we'll be avoiding the necessity of doing the same work over again, thereby releasing the machines, floor space, and man-power now tied up doing re-work to produce useful devices. This is what all our capacity should be doing instead of repairing or rebuilding faulty devices.

Because it is impossible for us to do perfect work all the time, the Quality Program will also stress the importance of learning to "Catch Mistakes Quickly." In spite of our best efforts to prevent them, some mistakes are bound to occur. When they do, it's important that we catch them before they get farther down the line where they'll cause a lot greater loss of time and money.

We must constantly keep our minds turned to the need for Highest Quality Workmanship. In the months ahead many of us will take on new jobs with which we are not thoroughly familiar. When this happens, we must ASK QUESTIONS, and plenty of them. We must strive to acquaint ourselves with our work quickly so that production will not suffer because of time lost. If we thoroughly understand each new job assigned to us, no matter how different it is from the previous one, we'll show a record for increased quality and reduced spoilage that we can all point to with pride.

$ $ CASH IN ON AUGUST DOUBLE AWARDS $ $

Double Awards For Month of August

One o' the quickest ways tae get a Scotsman down on ye is tae be careless with the Coppers in his purse. One o' the quickest ways tae get UNCLE SAM down on ye is tae be careless with the copper in his factories. It must sound funny tae hear talk about conserving copper, but ye'll be hearing plenty o' it before long.

We have heard sae much about Aluminum lately that ye are aware every minute o' the day that ye must be careful with it. In fact you and I may not get the opportunity tae either waste or conserve it very often in the next few years.

Now it seems that one o' the substitutes for aluminum is copper. But whats going tae happen when copper gets scarce? Weel, we don't dare tae hasten that day by wasting it, scrapping it, or using it unnessarily. If ye are an engineer, ye must design tae use the least amount. If ye are in the factory, ye must be careful not tae spoil any o' it. Ye may argue that scrapping it doesn't actually destroy it —the scrap can be melted over and used again.

Weel, it seems that THAT is just what we must not do. In the first place, we do seem tae have lots o' aluminum and copper in the ground, but its the refining processes that are the bottlenecks o' production today.

Another substitute for aluminum and other critical metals in certain applications is Plastics. Ah, weel, ye say, Good old Plastics will save the day. BUT, alack and alas, now we find that plastics are made o' something that is also used tae make explosives for our fighting men.

SO—ye will have tae be very careful with plactics too.

In fact, ye will have tae start finding substitutes for the substitutes, as I said in this column a few weeks ago.

And in fact, sae many things must be conserved now-a-days that this is beginning tae look like more gude ould Bonny Scotland than America.

"Foosch on such a thought", said my cousin Colin.

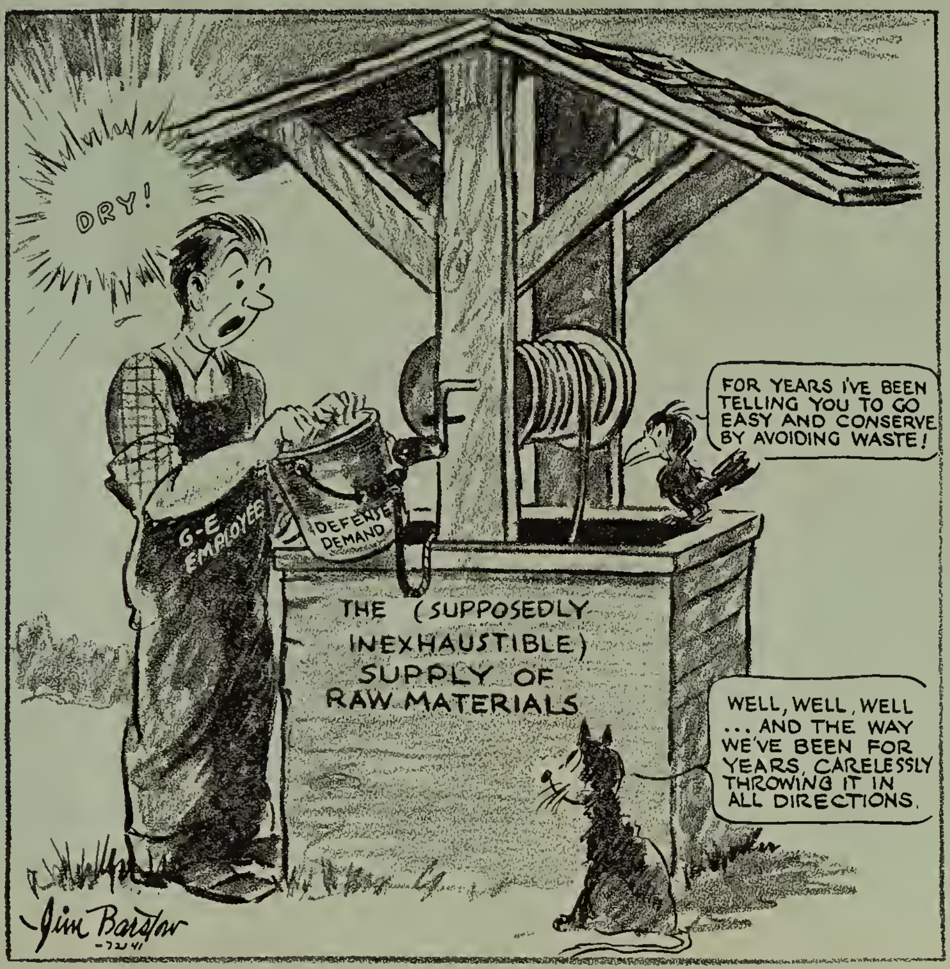
"Why Colin", I said, "I can't imagine why ye wouldn't like tae be in Scotland anon".

"Weel, I'll tell ye, me gude mon. If I'm tae be surrounded by Scotsmen all the time, who'll ever buy me a drink when I'm thirsty."

LOST AND STRAYED

Materials which are not identified about our place of work should be called to the attention of your Foreman. Like a stray child, they are being sought. Help to get them into the line of production, properly tagged and associated to the job for which they were built. This will avoid their being replaced, making them orphans, and eventually finding their way into the scrap-pile.

WE NEVER MISS THE WATER 'TIL....



DRY!
G-E EMPLOYEE
DEFENSE DEMAND
FOR YEARS I'VE BEEN TELLING YOU TO GO EASY AND CONSERVE BY AVOIDING WASTE!
THE (SUPPOSEDLY INEXHAUSTIBLE) SUPPLY OF RAW MATERIALS
WELL, WELL, WELL ... AND THE WAY WE'VE BEEN FOR YEARS, CARELESSLY THROWING IT IN ALL DIRECTIONS.

-7-21-41

AN OPPORTUNITY

WE, the employees of the General Purpose Motor Division have the opportunity of a life time to guide our thoughts and actions in our everyday life to be of more service to our Country in this time of need, and to our Works of the Company who is helping our Country, by putting into it the best we have, so that more goods can be made in shorter time with less waste of material and labor.

We are particularly pleased that our Management has decided that during the month of August they will give us an additional opportunity to benefit by paying *Double Arawds* for all suggestions that are accepted which will reduce spoilage and increase material utilization. Here is a chance to help not only yourself but your company and country as well.

Our waste and spoilage problem is a big one and we earnestly solicit your co-operation to submit suggestions that will help us to eliminate a large portion of the material and labor losses we now have.

W. N. WEHRS,
Mfg. Supt.
General Purpose FHP
Motor Dept.

Double Awards For August

Double awards for August! This should please employees and Suggestion Committees alike.

The field of opportunities on reduction in waste and spoilage, as well as the conservation of material, is large and, therefore, a fertile one for suggestions. Doubling the awards on this type of Suggestions, should prove a welcome additional incentive to all employees.

We like to pay awards and I know our Committees feel that their jobs are better done when awards are many and large ones can be justified.

You can rest assured that each Committee will see that every suggestion is carefully considered and acted on promptly.

I. H. FREEMAN.

All Of Us Can Help Improve Quality and Reduce Spoilage By Handling With Care

The careful handling of the material, parts, or devices that we work with is one of the best ways that everyone of us can contribute to Higher Quality and lower Spoilage. Handling is the one thing that is common to all our jobs. Some of us transport material through the plant, others work at machines turning out parts or winding coils, and still others of us assemble the parts into finished devices. In every case we handle hundreds and often thousands of items everyday.

Many of these items are extremely fragile, while others, although sturdier, can be easily damaged by rough handling. In these days of National Emergency we can all do our bit by being more careful about how we handle the parts with which we work. Most of these parts are made from those materials which are becoming harder and harder to obtain. We can all help to conserve these materials by reducing the damage that too often occurs when we move parts from one place to another.

Your Suggestions Are Important

By S. E. Palmer

The Company employs many men whose direct duties are to plan the conservation of material. The job, however, is a big one, elusive and ever shifting so it is never done; hence, "there is always a better way" and here is where the worker on the job can come in effectively. Problems of this kind are generally made up of many many small items, so the things to suggest are those that you see around you and are brought in contact with. Many of you, while reading this may think of material you believe is being wasted. Jot it down on the accompanying suggestion blank, or any other handy paper. Don't wait because you don't know a way to stop it. Just tell us what you know about it. The investigation of the suggestion may lead to a way and a double award for you.

As a punch press operator, or stock man, you may see parts of the sheet material go to the "scrap shed" instead of into finished punchings. Such conditions should not be accepted as unavoidable. Get your idea on a suggestion blank at once. Many sizeable awards have been made on more economical sheet sizes and the prevention of mispunches. Some late awards along these lines are:

Saving aluminum scrap at rotor die cast. By Louis Scherer, Bldg. 19-4—award $30.00.

Install stop on shears to save copper. By Edwin Bueker, Bldg. 8-1—award $35.00.

Change lead connection to reduce cable lengths. By Frank Bohnke, Decatur—award $80.00.

Order more economical sheet steel sizes (2 suggestions). By Perry C. Walters, Bldg. 17-1—awards $175.00.

You may be an assembler and notice parts being wasted for want of handling and stocking facilities, as an example, a short time ago the Specialty Transformer Suggestion Committee found considerable satisfaction in presenting a $50.00 award to Alma Tindall of Bldg 26-3 for the providing of suitable containers for keeping certain small resistor units off the floor. These nickel alloy resistors were so small that once on the floor they were liable to be stepped on and swept out.

No progressive worker will willingly spoil the product of anothers diligent toil and skilled craftsmanship. Causes outside of the personal factor usually can be corrected. Suggestions on improvements in material, tools, methods, etc., that will prevent the loss of such material and throwing away the work of our skilled workers are doubly valuable.

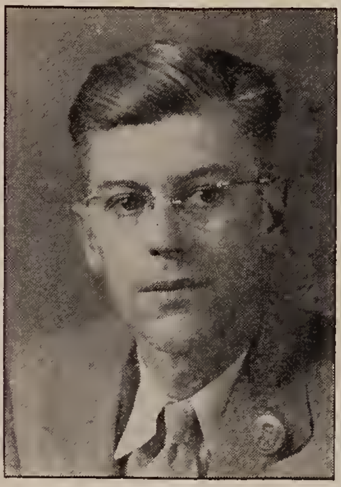
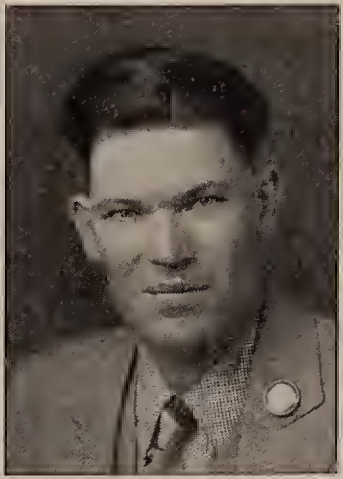
Five Appointments Of Employees To Supervisory Positions

W. O. Luebke



Paul Horstmeyer



A. F. Everett

W. E. Vought

M. H. Kline

Promotion of five employees to supervisory positions has been announced this week. The appointment of W. E. Vought as methods planner in the Tool Division is announced by Clarence Brenner, superintendent of the division and that of A. F. Everett as foreman of night shop activities in the General Service Division. W. O. Luebke as foreman of electrical maintenance on the second shift is announced by J. B. Greer, superintendent of General Service.

L. D. Hodell, superintendent of Bldgs. 17-2, 17-3, 17-4 and 2-2 announces the appointment of Paul Horstmeyer as superintendent of production and stock and of M. H. Kline as supervisor of planning and wage rate.

Mr. Vought has an employment record at the Fort Wayne Works of twenty-one years. He was employed in Bldg. 26-5 until 1937 when he was assigned methods planning work in the Tool Department. Mr. Everett was employed in 1929 when he entered the Apprentice Training School. He graduated as a machinist-toolmaker in 1933 and since that time has been employed as a master craftsman in the Maintenance Department.

Mr. Luebke took employment with the Company in 1925 and was assigned to the Maintenance Department. He has served continuously in this department ever since that time and during later years was leading operator. Mr. Horstmeyer was employed in the Fr. H.P. Motor Division in 1919 and has held various supervisory positions including that of assistant production supervisor. Preceding his recent appointment he worked on special assignments under Wm. Wehrs, superintendent of the Division. Mr. Kline graduated from the Apprentice School as a machinist-toolmaker in 1925. He was assigned to special machine work in the Tool Division and later was transferred to Bldg. 2-3 as tool and equipment engineer. Later he was assigned to time study engineering and recently to planning engineering in Bldg. 4-6.

News From The Camps

(Continued from Page 2)

mander has a lot of competition from the guns and tanks. Well, this corporal commanded "column left." I understood him column right, so I pivoted and started right. After several steps I felt lonesome out there all by myself so I turned and ran back to take my place in ranks. The corporal commanded 'to the rear' just as I got there. Everyone pivoted and started back and I almost ran over the leading man.

That is only one instance. I could tell you several more but I think that one is enough. Some of us are going to have a tough time when we leave here and are assigned a permanent post unless we snap out of the slump and put some snap in our drill.

We receive very good care down in this camp. I had a slight sore throat and was sent to the hospital for three days. At home I would not have paid any attention to it. The hospital is a nice place to go for a rest, but I don't need a rest. The last day I was there I washed windows to use up my surplus energy. The hospital is a rambling frame structure, single storied, with covered walkways or corridors.

That is all I can think of that would be of interest to your readers at this time. Hoping you will be able to use some of this, I am,

Sincerely yours,
Pvt. Eugene C. Boyle.

P. S.—Give my regards to the gang in Bldg. 17-4 and Bldg. 17-2, especially the Kelvinator section, and the inspectors.

E. C. B.
Co. A, 5th Ordnace
Training Battalion,
Aberdeen Proving Ground,
Maryland.

* * *

Dear Editor:

I received the WORKS NEWS and was sure glad to have received it, as I am greatly interested in it.

I have received several clippings from it, but it isn't like getting the whole paper, although I read them over and over.

I am in the Field Artillery. The battery I am in is the original National Guard from Franklin, Ind. The non-commissioned officers are all swell fellows, and some of the sergeants have been in for over 15 years. We have good eats and very little walking in the artillery, although it sure is rough riding and dusty in the back of those trucks.

The boys in this battery are all from Indiana and are swell fellows. It is hotter than the dickens here in the day time but the nights are swell. We sure get plenty of fresh air, sunshine, and sleep.

Thanks very much for the WORKS NEWS, and I am looking forward for it every week. The address is correct. We get mail twice a day, even out in the field, which helps a lot.

Sincerely yours,
Pvt. Lowell B. Noll,
Battery A, 139th F. A.
38th Division,
Cyclone Division,
Camp Shelby, Miss.

* * *

Dear Editor:

Received your letter and also copy of the WORKS NEWS. Yes, I would appreciate it very much if you would continue sending me a copy. It is nice to read about things that happen both at Fort Wayne and Decatur Works. In case of change of address I will notify you immediately.

Just now received information that we get up at 2 in the morning to go out on maneuvers for a week. Boys in tent don't hardly know what is going to happen next.

Camp life is much different than working back at General Electric. The good old plant would seem very nice if I could be working there now. Such as it is, I guess I am wanted here.

Had a review today for the colonel. Probably looked nice from a spectator's standpoint, but when you are standing out there it gets plenty tiresome.

Sincerely yours,
Monroe B. Fuhrman.

* * *

Dear Editor:

Am sending you a snapshot of myself with full pack, minus rifle. You may use it if you wish. Thanks again for sending me the WORKS NEWS. Enjoy it very much, and best wishes to you and all my friends of the G-E Co.

Yours truly,
Pvt. Harold Amstutz,
Co. D, 54th Battalion,
Camp Wolters, Texas.

NOTICE

United States Defense Savings Bonds and Defense Postal Savings Stamps may be purchased for cash at any time at the Payroll department.

J. W. Crise

(Continued from Page 1)

the shops. He was first employed on August 2, 1906 when he was placed on the Company payroll as an assembler in the Meter Department. His abilities were recognized very quickly and in October of the same year he was given a clerkship in the Accounting Department.

Mr. Crise continued work in the Accounting Department in various capacities for a period of twelve years when, on July 1, 1918 he was promoted to the office of the Fort Wayne Works Accountant in charge of budgets, costs, payrolls, internal auditing and accounting.

Mr. Crise has the distinction of being the first Fort Wayne Works employee to have been honored by the Charles A. Coffin foundation, having received an award from this body in 1923 following organization of the foundation in 1922. He has many affiliations and has served in many offices in addition to his duties as Fort Wayne Works Accountant.

Mr. Wichman graduated from Iowa University in 1928 and joined the General Electric Company shortly thereafter. He enrolled in the general office business course and in 1932 was assigned to the Erie Works where he became supervisor of costs. In 1934 he was made a member of the staff of the auditor of Works accounts and in 1938 he was transferred to the Fort Wayne Works as assistant Works accountant.

$74,500 Paid

(Continued from Page 1)

for a total of $40,000. Philadelphia Works had one claim for a total of $11,500 and Erie Works had four claims for a total of $11,150. There were two claims in Pittsfield with a total of $3,550, two in West Lynn for a total of $3,650, one in Lynn River for a total of $3,500 and one in Fort Wayne for a total of $1,150.

The total of claims paid for the first six months of 1941 is $710,080. The total of death claims paid throughout the entire company during the month of June was $140,380.

The grand total of claims paid since January 1, 1920 now stands at $18,857,685.

Suggestion Awards

(Continued from Page 1)

of 122.9 percent over the figure for 1940 which was $6.78.

The Wire and Insulation Division led in the number of suggestions per employee with the Series and Specialty Motor Division in second place, General Service third and General Purpose Motor fourth.

The greatest number of suggestions, a total of 1,003, were made by employees of the General Purpose Fr. H.P. Motor Division. The Specialty Transformer Division was second with 479, the Specialty Motor Division third with 342 and the Motor-Generator Division fourth with 234. Total suggestions filed during the six months show an increase of 171.8 percent over the same period last year.

In the percent of suggestions adopted the Specialty Motor Division led with 47.5 percent, the Distribution Division being second with 46.7 percent and the Decatur Works third with 40.7 percent.

The standings of the various divisions in the matter of suggestions received per 100 equivalent full time employees and the percent of suggestions adopted are as follows:

	Sug. Per Employee	Percent Adopted
Wire-Insul.	119.8	36.6
Specialty Motor	77.4	47.5
Gen. Service ...	66.2	16.5
Gen. Purpose ..	61.5	35.7
Plastics	60.4	21.2
Transformer ..	57.6	28.1
Refrig.	59.8	32.0
Motor-Gen.	41.0	28.1
Tool	37.9	39.0
Decatur	33.7	40.7
Distribution ...	32.8	46.7

CITY of GRAND RAPIDS

CITY of GRAND RAPIDS

ote Of The Elex Club Excursion To Milwaukee

NEWS THROUGH THE PLANTS

From The Feminine Viewpoint

By Irene Perry and Hilda Barthold

First of all a correction to the WORKS NEWS, which stated last week that over three hundred Elex members and friends would enjoy a lake cruise from Chicago to Milwaukee on July 26. There were over four hundred Elexers and friends braving the terrific heat and letting it have no more effect on a perfectly wonderful time than did the rain when they journeyed to Cincinnati and Coney Island. cruise.

A jollier crew was never seen than congregated at the Pennsylvania station early Sunday morning. While strolling from one end of our very long private train to the other it was very pleasant to renew friendships made on our previous excursion and to see a lot of new faces and make their acquaintance.

While on this tour of the train Irene Meyers was found receiving her sixth lesson from "Madam La Zonga." Music was furnished by Goldie Mentzer on her bazooka. Among the audience witnessing this special treat were Mr. and Mrs. I. H. Freeman. We were indeed very happy to have Mr. and Mrs. Freeman share our delightful cruise.

We found our steamer, the "City of Grand Rapids" to be a really huge boat. Evelyn Blakely looked everywhere for Clara Gidley, that is everywhere but on the reserved deck, where she was prevented from going, much to her embarrassment. I guess Clara was finally located, but it would be hard to say where, as there were so many interesting places to be on board. A favorite spot was on the fourth deck where there was the heavenly combination of warm sun and cool breeze to be enjoyed while watching the distant shore line with its lighthouses and cities.

The only casualty while enroute to Milwaukee was to Wilda Click's slacks. A needle and thread soon remedied them although Wilda was a little embarrassed, as who would not be?

We found Milwaukee to be a very lovely and hospitable city. Several busses took us for a very nice tour of the city which included some of the industrial section, the beautiful beach, Juneau park and exclusive residential district.

The boat ride back to Chicago was very enjoyable. The cool evening lake breeze was very refreshing and a lot of us took advantage of it while we enjoyed a little old fashioned harmony with old and new songs. Others preferred dancing on the main deck.

As we neared the beautiful Navy Pier at Chicago, everyone was thrilled by the sight of this huge city's magnificent skyline with its bright lights and flashing electric signs.

Half of the people on the train from Chicago to Fort Wayne kept the other half awake by singing. The trip was climaxed by a very long snake dance through the entire train.

I certainly agree with many others that I've not had a fuller or happier day for a long time and I hope to see everyone who was on this excursion and many more when we go to Cedar Point in August.

Eileen Morris Foor.

Winter Street News

Tom Collins went pike fishing and ran out of supplies before he hooked a "big one". While gone to replenish his stores a pike hit his line and tangled it with that of a nearby fisherwoman. She pulled in her line and also the pike and naturally claimed the fish. Tom says he didn't know what happened but wished he would have stayed on the spot. . . . Chalk up one of those most embarrassing moments to Helen Yeranko. While the painters were here last week she forgot they were using her office for a dressing room. . . . Be careful if Barb Curtis invites you to lunch some evening. You will probably end up by getting a quart or two of her famous canned cherries. It seems she has two small cherry trees from which she claims to have gotten 649 quarts. What is your secret canning formula which makes them go so far, Barbara?

Sunbeams From 17-4

Some days we have beltless days, some days sucker days, but today we had a spoonless day. The candy lady ran out of those cute little wooden paddles called spoons, so we turned savage and ate our ice cream with our fingers. You can't fool us.

This reporter is really stumped for news. Everyone says it's too hot to think. Well who was it that said that the mind ruled the body; well it isn't hot, it isn't hot—boy, am I cool!

Thought for the week: The greatest asset of any nation is the spirit of its people, and the greatest danger that can menace any nation is the breakdown of that spirit—the will to win and the courage to work. —George Cortelyou.

Granny.

It Was An Important Week

The week of July 6 was more than just an ordinary week for Charles M. Spencer of the carpenter shop. July 6 was Charlie's twenty-fifth anniversary with the Company. On July 7 he joined the Quarter Century Club, on July 11 he celebrated his sixty-eighth birthday and on July 11 he retired on pension. A full week we would say.

19-4 Spot Jottings

Our good Friend Pondo Uloschoff was riding with a friend when said friend had an accident. It was reported that when the car stopped, Pondo jumped out and was seen going away from there. A fellow employee reports that he thought it was Superman streaking down Broadway. The bricks Pondo tore out with his flying start are being replaced. . . . Herb Braun was seen in one of our leading department stores trying to convince the saleslady that the only reason he wanted to exchange his suspenders was because he didn't like the color. They'll do it every time. . . . Thelma Court thinks the pictures taken by the girls visiting the Rockies were faked. Regarding the snow scenes, Thelma says "How can there be snow with the sun shining?" Next time the girls are going to bring Thelma a snowball.

Alma Starke, Bldg. 19-4, is spending her vacation at the lake. Bet she comes back with a chocolate tan.

Thisa And Thata 19-5

There have been so many weddings here of late that we have lost count. To be on the safe side and not slight anyone we'll just say "we wish all the new brides and grooms the very best of happiness." . . . We have a new chapter to our "Forgotten Badge Club". This one is called the "Lost Badge Club" and Mildred Werling is a new member. . . . Wonder if Tiny and her husband will want hot dogs for a while. It seems that the lesser half overestimated their capacity in buying the dogs and they have been eating them all week.

Claude Kelly, Bldg. 19-4, is reported to have had a little difficulty on his vacation.

Would you like to know how to keep twenty-seven live frogs in the refrigerator at home over night? See Wayne Winters and Bob Kurtz. They lived to tell about it.

Rex Oberlin, Bldg. 26-2, must be saving gasoline as he drives to work and then goes home on the street car.

M.B.A. PATIENTS

Left the Hospital: Marcille Bercot, Janice Stute, Jean Hardendorf, Elizabeth Louis, Clarence Geiger, Margaret Cummins.

Returned to work: Karl Hofacker, Ernest Cutter, Herman Briggs, Sarah Smith, Helen Emrick, Wayne Cook, Helen Ryan, Glenn Linsky, Robert Houser, Anita Meyer, William Ort, Dorothy Forest, Alva Walker, Lane Breidenstein, Edna Hergenrader, Gilbert Hutchisson, Alva Walker, Mary Wildman, Lois Drewett, Josephine Strupp.

26-3 Tidbits

Old Man Sunshine has really been shining and it looks as if we were in for another month of the 99 to 105 marks. The girls can't seem to find enough "brow moppers" so one of the gang decided to talk her mother out of a sheet for community use. Darrell Hershfielder says it's really hot when he does away with his necktie. . . . Did you notice Betty Griebel's contented look. It doesn't come from Carnation milk either. . . . Grace Lowsley must have had a most wonderful time on her vacation in Florida since she was a little late in returning. Maybe it was life guards or something. . . . It seems that when Esther Babcock goes fishing the fish are never hungry. Better luck next time. Speaking of fishing ask Art Krukenberg how he liked to be on the water when a storm comes up. Ain't it wonderful, Art? . . . Elda Messman really made a "B" line for the gate after work. "There's something about a soldier." . . . Have you noticed the Indian squaw in our midst. Poor Mary Wisel really got herself a tan but she says she feels healthy. . . . Helen England seems to be "happy about the whole thing." At least she is always whistling or singing while at work.

Hermetic Office 17-2

The Birthday Club celebrated two birthdays, Audrey Hickernell's and Merle Kirkpatrick's. What those dinners don't do to our waist lines! —but we like it. . . . After a day and a half Pop (for the first time) Altekruse finally came back to work with a box of cigars under one arm, candy under the other, and a brand new hair cut. It's a boy! Everyone is doing nicely and Kenny's almost normal again. Congratulations, Pop! . . . We thought the office had the first class fish stories but Ray Bowers copped our laurels when he told this one. He was mowing the weeds in the lake in front of his cottage at Big Long when he caught a two and a half pound bass on the sickle. Once around the lake after that but the best he could get was some blue gills. He also caught the first class liar's prize from Spike Poorman with the story. . . . That's not all we heard. Lloyd Covault was seen playing Cop and Robber with the neighborhood gang. Guess the office is the safest place to work, even if Herb Koch is there now.

Suzy Sleuth.

Motor Generator Static

WHICH

When Walter Histed came to work the other day and reported that he was doing a fine job of painting his home, the usual line of razzing greeted his remarks. Finally in righteous anger, Walter retorted, "Well, anyway, I put the paint where it should be"; and as he turned around the boys noticed his hair in spots was a beautiful glossy white. Now we wonder if Walter was using head work in his painting or protecting the old roof against the hot sun. Could be.

STEPPING

When several of the girls from Bldg. 19-3 service bureau attended a dance given for the boys stationed at Baer Field, Alberta Bultemeyer acted as instructor teaching the lads how to dance. Mary Zimmerman, (LaConga Queen) gave a demonstration of how the Conga should or should not be done. Some of the reports are that when Mary got into action she resembled the circle swing in West Sweeney Park. That's Stepping.

TREES

Since last week's article on Archbold family history, "Pappy" and "Bob" have engaged in several arguments as to which one is the "sap" in the family tree.

SUCCESS

"I attribute my success to hard work and perseverance", are the words of Helene Blauvelt who hails from the thriving village of Monroeville — Just another case of "Small town girl makes good in big city". Yes, we saw your picture in last Sunday's society section and wish to say, "Congratulations and lots of happiness to you and Joe".

SAYING OF THE WEEK

Jerry Frye remarks, "Keep your thoughts and your chin up, a worm never sees the stars".

If anyone knows of a good surveyor they are directed to Huey Meyers, Bldg. 19-5. It is reported that Huey has purchased a good stretch of river bottom but can't get through the underbrush to get at it.

We've been wondering what Mildred Haslup's favorite pastime is, and now we know. She was seen whirling around in a revolving chair while Helen Hansche kept busy as the operator. Annual Kiddies Day for next week, girls.

»» NEWS THROUGH THE PLANTS ««

News On The Nose 4-5

They're telling a good story 'round Bldg. 4-5 way about the very hospitable Eldon Vosburgh who invited Mark Staker to ride down town to lunch with him one rainy noon. After a very refreshing lunch, they hurried through the pouring rain only to find that Eldon had locked the keys securely in his nice dry automobile. Hence, two bedraggled engineers returned to the Bldg. 4-5 office on foot, while Momma Vosburgh brought Eldon a second set of keys. . . . Gene Richards, Bldg. 4-5 test room, can still name the number of weeks, days and hours that he has been married. Incidentally, it has only been about three weeks that he has taken on this new glory. . . . Famous last words of Ray Hammond, Bldg. 4-5 engineer, "Take me back to Colorado," he can't take the heat these Hoosiers can. . . . Floyd Saylor's baby swallowed a penny and was Poppy disappointed. He only got the penny back and didn't hit the jack pot. . . . Dale Steward is starting early in making a glamour girl of his baby dotter. He's been taking bathtub shots of her as proof of her allure. . . . Everyone in Bldg. 4-5 shares the hope that Elaine Altheon may soon be back with us after a complete recovery. We are also awaiting the return of Juanita Stevens Gerke who recently underwent an operation for appendicitis.

Sleuthing In 4-6

In a special collection taken up for the U.S.O. fund, a donation of $65.00 was given by members of the Order Service Section, Bldg. 4-6. Thanks to all who gave so generously for "our boys in camps." . . . Jack Dunifon is so bashful that he is afraid to ask one of the girls down on Bldg. 4-6 for a date. Please, somebody down there, won't you help him out? . . . Bonnie Ervin has learned her lesson. The next time she goes to a dance for the soldiers, she will wear some special kind of armor on her feet to protect them from the hob-nailed boots the soldiers wear. . . . Rhiney Hofmann was seen without his tie last Thursday afternoon. Could it be that the tie fell in his soup? Well, that's the way I heard it. . . . I hear that most of the girls from Bldg. 4-6 who went on the Elex excursion last Saturday really enjoyed the drink that made Milwaukee famous. . . . Walter Whonsetler was rather absent-minded this week. The heat was too much for him as he worked overtime one evening so he borrowed a fan. This was perfectly alright except that when he returned it next morning, he gave it to the wrong fellow. . . . Mary Rogers is back from her vacation telling tales of how cool it was on the boat cruise she took on the Great Lakes. Was she sick when she came back to Fort Wayne? And how! Why? Tsk, Tsk. . . . As a rule I'm not much for asking people for things, but here I am asking and begging for news. This is for all departments in Bldg. 4-6. Send it to "The Sleuth," in care of Mildred Gertz, Bldg. 4-6.

Our Sir Viss man, I. Butler, Bldg. 4-4, got a kick back last week. He didn't know that Chris Delagrange has a goat.

Bob Ward, Bldg. 4-2, was seen winking at a girl in the parking lot. Later he was seen holding her hand going into the factory. Still later he was seen going home ill. We hope it is nothing serious.

From Here To There

Dear G. U.:

Have you heard the latest mystery around Bldg. 17-2? Two characters, who call themselves the "Reluctant Dragon" and "Honeybunch", have the girls all agog. But, just the girls who spend their time in Meyer's Wayne Street store! "Are you the Reluctant Dragon?"

We all have embarrassing moments, such as getting caught with our shoes off—like Ginny Ramsa.

A little rain, or even a lot of rain, doesn't stop the Corbat and Hanselman Lunch Delivery Service! Maybe the "Second Flying Dutchman" thinks she is so fast the raindrops won't fall on her. Pauline must have slowed her down, cause she certainly looked as though a lot of drops had hit her. And such big drops!

It just wouldn't be right if a week went past and the wire raisers didn't have a P-L. So, they had one! A super special, with shrimp salad and whipped cream puffs, etc. Sadie Smith tried to inhale a cream puff. She certainly looked funny with whipped cream all over her nose!

Georgette Begue must be superstitious. She carries a rabbit's foot on her key chain.

Bob Swain is back at work, and we're all very glad to see him looking so well.

"Are *you* the Reluctant Dragon?"

I'm,

The Reluctant Hermit.

P.S.—Marce Boyle has another amusing pastime, which is yelling down the elevator shaft. "Please come back! Oh, please come back!"

Dear Hermit,

With pen in one hand and iced tea in the other I will try and bring you some of the news that is making this sweltering weather more bearable.

Did you know that Frank Calkins' aversion to music is purely pschycological. He has a hidden desire to be a great baritone himself. His favorite theme at the moment, however, is nct Carmen or Romeo and Juliet, it is none other than that swingy little thing called "Daddy." Great Oaks from Little Acorns Grow, Frank.

Marcella Boyle told me she had learned to let sleeping dogs lie—especially if they were sleeping on trains. By the way, did you know Marcella was a cry baby?

The girls from Bldg. 17-2 and Bldg. 17-4 that went on the Elex trip Saturday decided on the way back that nobody should be allowed to spoil a perfect day by sleeping and missing any part of the scenery, so I'm told that they started a "Snake Dance" that aroused everyone to such an extent that peaceful slumber was a thing entirely of the past.

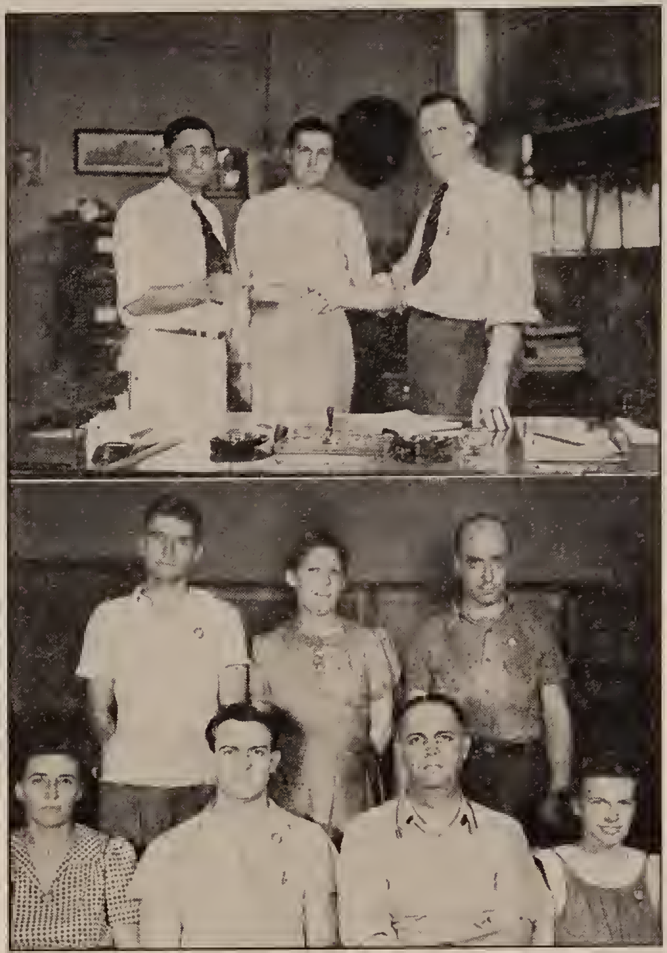
Mary Jane Eckert and Jerry Myrich were married Saturday at St. Jude's. Congratulations, kids.

G. U.

We think it was very thoughtful of Walter Seidel, Bldg. 4-2, to offer O. J. Meyers his comb when O. J. was posing for his picture for the Quarter Century Club. Meyers has hair like a pool ball and for years has been known as "Fuzz", and the combing and care of his hirsute adornment is one thing he never has to worry about.

Estel Grier, Bldg. 4-4, is thinking of putting a sump pump on his boat. She ships a little water on the turns.

Decatur U.S.O. Drive Big Success



(Top)—E. W. Lankenau turns over the funds subscribed by Decatur Works employees for the U. S. O. to Ed Bauer (left) city chairman and Herman Kruckeberg. Bottom—The soliciting crew which did an excellent job. Front row, left to right—Audrey Schladenhauffen, Edward Warren, Wendell Smith and Ethel Tumbleson. Back row—Robert Brown, Mary Lichtenberger and Carl Roberts. Dora Miller was absent when this picture was taken.

Slips And Chips

Sir Viss Bldg. 4-4

Too late for last week's column and too late for writing this week, but here goes. Wm. (Bill) Johnson became the proud father of a baby daughter (Evelyn Sharon). Congratulations Bill and we hope you sleep full nights. . . . Ewald Stinsmuehlen searched the town thoroughly for a gift to present his wife on her birthday. Finding nothing he thought was suitable, he took home a big sirloin steak. How did it work Ewald? I always thought it was man's heart that was conquered through his stomach. . . . We have all wondered what Shorty Lawson reads that makes him such a learned person. Well, he was caught fishing a comic sheet through the fence the other day. After considerable struggle he managed to get the paper and said, "Boy! She's worth it." . . . Anyone wishing to cool off quickly, see Mart Hardwick, or better than that, do the same thing Mart did. When you feel very hot and sticky, just get hold of the rubber band (of the sweat pad) on Johnny Fuller's head, pull it back about 8 or 10 inches and let it go. Mart says, "When Johnny starts for you, you will be nearly frozen, at least you won't be sweating any." . . . Carl Kloepper, the terra firma sky rider, always rides ahead of a cloud. It is rumored that when you ride with Carl you always ride in the shade because the sun has yet to filter through that blue cloud you always see back of Carl's car. . . .

Bald Spots In 4-2

Why is it that bald headed men are so vain. "Fuzz" Meyers was seen the other day running around like mad with a comb in one hand and trying to straighten his tie with the other, and all the time grinning from ear to ear like a school boy. It seems that our Works News photographer wanted his picture for the Quarter Century Club. I have often wondered if all the fellows with such long faces always comb their hair in public places. Oh well, it's something to think about.

Hilda Barthold, Bldg. 19-5, Feminine Viewpointer is having a fine time in the mountains in the east this week.

Doris Kleber must not have had such an exciting trip to Chicago or else she is one in a thousand for she gave very little account of the excursion.

Paulus Adams, of the test section, came to work Monday with a black eye. And to all his co-workers came this alibi, "You see, boys, it was like this. I was fishing and a blue gill flopped up out of the water and caught me in the eye." All who believe this, stand on your head. . . . The other evening I had the pleasure of seeing a wonderful collection of dolls. There were dolls from 24 different states, from Alaska, Porto Rico, Canada and many other interesting places. This collection belongs to Joe Kline's daughter.

Borings From 4-4 Office

It's too hot right now to even think, let alone write a column for the Works News. Gee, what am I saying there? I have a thermometer in my desk that has registered 100 for the past three days. Hot enough for you? However, I'm really not complaining 'cause way back last winter in Minnesota it was 20 below and I said, "If summer would only come." So now the good old summer time is here and I sure don't need my love to keep me from freezing in this kind of weather. . . . Don Niles would like to know what Mike (Eddie Cantor) O'Grady has got to be the office sheik. Should I the one to be a telling him? . . . Art Wedler says a swell birthday party for one of the girls. . . . Charlene Snyder walked right into the waste paper basket the other day. So what did she do but continue to walk? You should have seen the expression on her face when she discovered her error. . . . LaVon Price is on her vacation this week visiting friends and relatives in Minnesota and Northern Wisconsin. . . . Cliff Uncapher is also on his vacation up at the lake conveying his boat around. I bet it makes all speed records this week. Perhaps our whole office should go calling on him this week-end. . . . Virginia Plummer had the misfortune of breaking her glasses Monday just about time to go home. Gee, she certainly was the sick one. Just $15.00 for an easy break like that. . . . The mighty one and only Weber was griping around to Culver the other day. Two bit says Clayton didn't take any lip from Windy. . . . Our mighty keeper of the time, Esther Allar, will leave for Northern Michigan to spend her vacation eating, sleeping, fishing, dancing and all the rest will be her program for the weck. . . . Vern Daseler just commented on the sleeping beauty Delores Loveall or Lovewell. I guess she had a very wonderful time over the weekend and has spent the first three days of the week catching up on her sleep. All the men around her are slowing down on production 'cause they watch her sleep. You know every growing girl needs eight hours of sleep a *Day*. . . . Nate Porter was seen carrying an ironing board and cover home. Now all Nate has to do is the ironings. I suppose if my girl ever accepts me I'll have to do both the washings and the ironings. Well 'tis too hot for that now and it is plenty for now. Best I get back to work. I remain sincerely as ever,

Elmer, the Field Mouse.
(The Rat to You.)

Mark Farrell, Bldg. 4-3, really has his troubles between his dates and his toothaches. Maybe after he has all of his teeth pulled, he will have it all set with the girl friend.

The hot weather has showed us a lot of new ideas in Bldg. 4-3, as Jerry Habig removed her shoes and walked around in her new white socks; Rachael Kelley taking more airplane rides; Ellis Bleke working along the lake shore breezes on his new castle at Pretty Lake; Frank Kimble running around Bldg. 4-3 with his shirt unbuttoned, and Ralph McVay trying to buy a new wig before it gets cold.

Carl Klepper, Bldg. 4-4, told the boys that his car was 30 quarts old this week.

We don't know how the boys in Bldg. 19-4 will be able to stand it when Charlie Engle gets back from his Michigan fishing trip. Don't forget, Charlie, it is always the big ones that get away.

There Is No Sales Resistance Here

Of course all Fort Wayne Works employees were glad to give to the U.S.O. but we venture to say that the giving had considerable more zest because of the attractive solicitors stationed at all gates. (Above)

Two of the solicitors caught at an unexpected moment seem to be doing all right. They are, left to right—Marjorie Meehan and Jean Doan, both of Bldg. 19-5.

News Around

"Swim And Chicken"

That long talked of "swim and chicken dinner" was finally had by the Wire & Insulation girls. Lois Daugherty tried her water wings and made the raft in fine shape. Mary Wilson showed us all the latest in plain and fancy diving. Edna Martin always tried to steal the spotlight and this time it was by spilling her coffee. Marjorie Degitz brought home a spare chicken just in case she got hungry at work the next day. Mabel Alcott was so tired after the swim that she went to sleep while eating. LaVerna Lee will know better than to unbutton her slacks the next time while eating. Ellen Ditlinger nearly wore herself out trying to button Edna's slacks so she would be admitted into the dance hall. Mary Coggeshall made herself a brand new pair of slacks and they sure were pretty. Evelyn Porter lost her way and a searching party started back after her. After getting half way home we remembered to search the car and see whether we had forgotten Dorothy Boland, but there she was way down in the corner sleeping peacefully. Darlene Alcott was just a trifle leary of entering the dance hall with her shorts on, but Marjorie promised to protect her. There were a few timid, bashful girls who were afraid they would be caught doing something that could be written up; Loretta Gerardot, Elenore Plock, Agnes Bensman and Irene Perry. Bill Glenn was noticeable by his absence after signing up for the party.

Decatur News

Mary Miller should have enjoyed the trip to Milwaukee. On the morning of the trip she was getting ready when she found her slack suit had shrunk. Then after she finally did get dressed she found that her ticket was lost. After a feverish search it finally dawned on her that she had left the ticket in care of a friend and he lived in Berne. The story ended happily. However she did get to go to Milwaukee after all.

The following Decatur employees are on sick leave: Hester Pingery, Agnes Conter, Juanita Noll, Russell Owens, Frank Geary and Verena Myers. We wish all a speedy recovery.

Donald Gage is spending his two-week vacation in a tour to the State of Utah.

Kenneth Beard spent part of his vacation in Toledo, Ohio.

Roma Briener and family are spending two weeks at Lake Gage.

Fred Busse is driving to Camp Shelby, Miss., to return his son to Camp and plans to go to Camp Lee at Petersburg, Va., to visit his brother.

Oscar Heller and family are on a camping trip on Lake Erie on the small island 15 miles from Sandusky, Ohio.

Ed Hesher and family are touring through Michigan.

Dora Miller is visitingher daughter in Indianapolis.

Paul Reynolds and family are vacationing at Lake Pleasant, Indiana.

The following Decatur employees are spending their vacation at home: Wm. Kohls, Dwight Kimble, Martin Hoffman, John Loshe, Ralph Stanley, Milo Wait, Otto Wefel and Deloris Miller.

Bill Hattendorf, Bldg. 12-B, surely takes his work seriously. Assigned to understudy "Red" Noyes' job in order to be able to take over during Red's coming vacation, Bill became so wrapped up in his work, be showed up one morning with a big "chew" of Red's favorite plug tobacco. Lacking Red's years of experience, Bill finished the day with a pale green complexion and a very sick stomach. Now we're all waiting for Bill to come in some day with his hair dyed red!

Like so many other vacationers, Marie Gehle, Bldg. 12-B office, had such a good time on her boat trip to Canada that she had to spend the better part of the following Monday morning, resting up.

Now that the lake season is on in full blast, Art Brandenburger, Bldg. 4-3, reports that his Fort Wayne-South Milford bus line is doing the best business experienced in years. He is planning an extension of service to Big Long and Adams lakes. He tells us his rattlers are the last word in speed and riding comfort.

If we can believe all reports, the boys of Bldg. 4-3 are rapidly taking over control of Big Long Lake. Buck Adams can be seen nightly patrolling the waters in his fire boat. Sam Allmandinger is builder and inspector of docks. Harry Mumma is collector of internal revenue and Art Brandenburger now controls all shipping on this body of water. Nice going, boys, we are all for you.

Al Ringle of the Maintenance Department paid a visit to John Driver, Bldg. 4-3, the other day. We learn that Al was in search of something. According to Johnny, it happens to be a Sears-Roebuck catalog minus the harness section. Now why he desires this, we know not, but anyone knowing the whereabouts of such a catalog, please notify Al. He will appreciate it very much.

The Small Lot Section, Bldg. 4-3, honored Forrest Whonsettler the other day by giving him an infant shower celebrating the arrival at his home of seven Springer Spaniel puppies. He received many fine gifts, all of which will surely be appreciated by the pups. Forrest treated the gang to lollypops, and everyone thoroughly enjoyed the event.

Fred Vogt, Bldg. 4-4, says that Pretty Lake is O. K., but one gets sick of fish patties all the time.

Was Edna Martin, Bldg. 12-B, blushing or was it just a bad case of sunburn? Surely the lifeguard couldn't have been that handsome to make a person stay out all day.

E. C. Gallmeier, Bldg. 19-4, doesn't let 'em get away without an effort. Ernie caught a beautiful bluegill at Napp Lake and slid him into the livebox. The fish didn't like his cramped quarters and promtply jumped back into the lake. Grabbing an oar Ernie went after him but outside of making a lot of splashes and nearly upsetting the boat he failed in his endeavor.

Well, well! There seems to be some jealousy between Herschel Smith, Bldg. 21, and Elmer Haugk, Bldg. 18-2 in matters pertaining to fishing. One side only has been presented up to date and it states that Herschel proudly displayed some of his ten and twelve inch bluegills at one of the camp gatherings at Star Lake but that for real information on the catching of the fish Mrs. Smith should be contacted.

Stand aside gals for here comes Charles Campbell, Bldg. 19-4 in his new car. What a man! What a car!

A note to Private Carl Alter, somewhere in Oklahoma. Please send some of those lovely rabbits to Hugh Neely, Bldg. 19-5, so that he will know what he is looking for when he starts on his vacation with that new gun.

Ralph Smith, Bldg. 4-2, returned to work after a two weeks' vacation in Michigan. We were sorry to hear of the slight automobile accident. He said fishing wasn't very good. The largest fish he caught only weighed 3 pounds. We would have liked a picture for proof.

Wayne Cook, Bldg. 4-2, is back to work after being off for four weeks from an auto accident. We hope that will not happen again to the groom of about three months.

Swinging The Hickory

By Paul Schwehn, Bldg. 4-3

The Huth men, that zippy outfit from the West Side trounced the Sleepy Stators 11 to 2 Wednesday to win the title of first place in the first half of the inter-department softball tourney.

In the other game of the evening the Winter Street aggregation barely nosed out the Small Motor Office in a thrilling six inning ballgame which was called of at the end of the sixth with the count. 8 to 6.

The hurling of Sitko with Penkul catching and the consistent support enabled the cowboys to ride to first place as the Winkle men slept on.

The softball tamers began their drive in the first frame when they drove in four runs and rallied in the fifth to have five more cross the plate.

Huth hit a three-base hit for the Cowboys and stole third just before Hazelett hit Chedster for a home run.

The Rip Van Winklers awakened long enough in the fifth frame to push across two runs.

In a closely contested battle with only three strike-outs the Small Motor white collarmen displayed fine sportsmenship in not demanding a re-play when rain intervened in the sixth.

Here are the final standings:

Team	Won	Lost
West Side	5	1
Apprentices	4	2
Winter Street	3	3
Sleepy Stators	3	3
Small Motor Office	2	4
Messengers	1	5

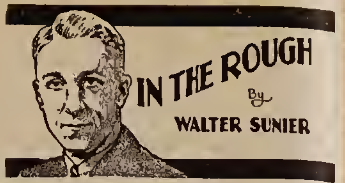
The G-E club really had a softball team Friday evening when they played the Ossian diamondmen. Coach and players worked in good-natured harmony as they prepared for the sectional play.

Since the Kuhner ball club has disbanded several of their most valuable players have been assisting the Electricians.

Stellhorn, brother of "Whimpy," third baseman, caught last Thursday when the Electricians were beaten by Zollner Pistons 7 to 1.

Stellhorn was taken to the doctor in the third frame when a ball hit the end of his finger and split the skin at one of the joints. Schaefer took over at this stage with Moffit on the mound.

The chug-chug lads have shown a decided improvement of ball in the past week. With this sort of unified co-operation between coach and players there is the greatest chance for the G-E club to go far in the coming sectional fray.



In the Monday Evening Group, the Slapsticks slapped the Ice Cubes, 180 to 193; the Plastics plastered the Rough Riders, 165 to 168; and the Divot Diggers dunked the Turf Toppers, 181 to 189. The lowest score, a 39, was shot by both Schwanz and Sunier. The standings in this group are:

Team—	W.	L.	Pct.
Plastics	4	1	800
Slapsticks	4	1	800
Rough Riders	3	2	600
Ice Cubes	2	3	400
Turf Toppers	1	4	200
Divot Diggers	1	4	200

The Plastics and Slapsticks played off the tie on Thursday, the Plastics winning 176 to 189. This makes the Plastics winner of the second half.

The Turf Toppers won the first half. In the play-off between the Plastics and the Turf Toppers for the championship of the Monday Evening Group the Turf Toppers won, 351 to 366. Hanna shot a 79, which was the low score for the match.

In the Tuesday Evening Group, the Billy Goats butted the Dubs, 180 to 188; the Optimists defeated the All Stars by forfeit; and Bldg. 4-4 defeated Bldg. 4-3, 173 to 185. The low score, a 36, was shot by Holmes. The standings for the second half are:

Team—	W.	L.	Pct.
Bldg. 4-4	4	1	800
Bldg. 4-3	3	2	600
Billy Goats	3	2	600
Dubs	3	2	600
Optimists	2	3	400
All Stars	0	5	000

The Optimists won the first half. In the play-off between the Optimists and Bldg. 4-4 for the championship of the Tuesday Evening Group, the Optimists won, 365 to 375. Holmes shot a 79, which was the low score for the match.

In the Wednesday Evening Group, the Hookers won from the Sharpshooters, 202 to 211; the Fluorescents floored the Trappers, 171 to 184; and the Apprentices won from the Cro-Flites by forfeit. The low score, a 38, was shot by Cox. The final standings for the second half are:

Team—	W.	L.	Pct.
Fluorescents	5	0	1000
Hookers	4	1	800
Sharpshooters	3	2	600
Trappers	2	3	400
Apprentices	1	4	200
Cro-Flites	0	5	000

The Fluorescents won the first half also which makes them the champion of the Wednesday Evening Group.

The Turf Toppers, the Optimists, and the Fluorescents will meet soon in a three-way match to decide which one will be the champion of the Golf League. The winning group will receive awards.

Second Round Shoe League Is A Tie

The second round of the Y.M.C.A. Horseshoe League ended in a tie. The G-E Club defeated the Zollners by a 11 to 5 count while Pennsy won over Harvester with 11 games to 5. A. Kraft was high for G-E with 4 out of 4. E. Rickey was tops for Zollners with 2 won and 2 lost.

RECEIVED AUG 9 1941 PUBLIC LIBRARY FORT WAYNE & ALLEN CO., IND.

Waldschmidt Re-elected Club Pres.

Nearly 400 Firms Aid G-E In Defense Contracts

Nearly 400 manufacturing concerns in all sections of the country are working with the Company in a $20,000,000 effort to speed the production of national defense items.

Tools, dies, jigs, fixtures, metal stamplings, wood and metal patterns, forgings, castings, gears—all of these and many other important pieces ranging in size from the smallest screw machine parts to 80,000-pound castings—are being made in hundreds of small shops on orders "farmed out" by the Company. This "farming out" or subcontracting, in many instances has cut delivery periods by weeks and months and at the same time has provided needed machinery, equipment and skilled labor for additional work.

Had Real Campaign

Faced with a shortage of facilities and tools to turn out the precision parts needed for defense equipment and instruments, Company officials some time ago developed an organized subcontracting program. Direct mail, advertisements in trade magazines, news stories and magazine articles were used to contact manufacturers in a survey of potential facilities. Directing the campaign is Horace Wall of the Manufacturing General Department in Schenectady.

Each applicant for subcontracting work is investigated thoroughly by the "farm out" organization which includes representatives of the manufacturing, purchasing, engineering, and accounting departments. Particular attention is paid to the shop facilities, the reputation of the manufacturer and the availability of labor.

"In many cases," said Mr. Wall, "subcontractors are producing parts directly allied with defense orders. These sub-contracts have required government approval. In other cases, work within the General Electric plant has been rearranged so that subcontractors can take on non-defense products, leaving our own machines free for high-precision defense work. Such a procedure has been necessary, largely because of a shortage of machine-shop facilities on the outside that work to sufficiently close tolerances.

The Flying Squadron

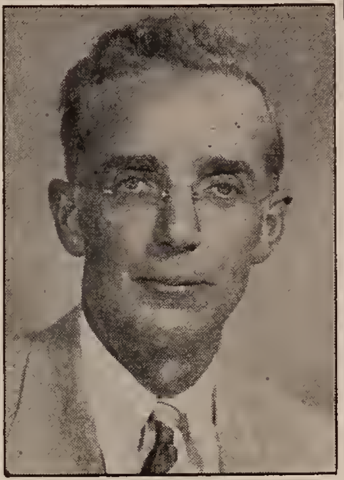
"Many subcontractors, have started their work believing that they have had plenty of experience in precision manufacture. However, at the start, many subcontractors experienced some difficulty in working to the close tolerances required by the Army and Navy. With time, however, and with the assistance of the General Electric 'farm out' flying squadron, desired quality and quantity has been obtained.

Particular facilities needed at the present time are turret lathes capable of handling bar stock from ⅞ to 7½ inches in diameter; punches and dies, jigs and fixtures, plug gages and reamers. Mr. Wall will be glad to receive any information on where such facilities may be located. Employees who may know of unused facilities are invited to write Mr. Wall at the Purchasing department, Room 133, General Electric Company, Schenectady.

FM To Be Installed At Nashville, Tenn.

After operating an amplitude modulated emergency communications system for five years, the city of Nashville has ordered a complete frequency modulation system from the General Electric Company.

Nashville is the first Southern city to adopt frequency modulation for police communication, and when the new system goes into operation in the near future, this city will have one of the most modern emergency communications systems in the country.



Geo. Waldschmidt

INSURANCE PAYS

A recent forceful example of the value of the Group Life Insurance plans of the Company is found in the story of a young woman employee of Fort Wayne Works, who died one day after she had been employed a year, but who had signed up for the additional insurance as soon as she became eligible, that is after a year's employment. The premium actually paid was 47 cents. The payment to the beneficiary was $650.

NOTICE

United States Defense Savings Bonds and Defense Postal Savings Stamps may be purchased for cash at any time at the Payroll department.

August 15 Set As Date To Pay Profit Sharing

Friday, August 15, has been set as the date on which Fort Wayne employees will receive their share of the $2,373,000 of General Profit Sharing, which President Charles E. Wilson announced on July 18 would be distributed early in August. Distribution will be made on the basis of 3 per cent for employees with five or more years of service; 2 per cent for employees with three or more but less than five years of service; and 1 per cent for employees with one or more but less than three years of service. The payment throughout the entire Company is based on the estimated first six months profits plus $373,000 of undistributed earnings left over for 1940.

Joe Henry, First Vice-Pres. Helen Bleke, Second And Harold Carter, Secretary

George H. Waldschmidt, veteran of the payroll department with more than 30 years service, was re-elected president of the G-E Club at the annual election this week. Other officers chosen were Joe Henry, first vice-president; Helen Bleke, second vice-president; Harold Carter, secretary; and Leo Wallace, director. The following directors will serve carry-over terms of office: B. C. English, Lois Miller and Byron Everard. The retiring officers and directors are Pauline Baker, G. A. Seabold and K. Betts.

The G-E Club is easily Fort Wayne's outstanding employees' social organization. Established formally in 1926 with the official name G-E Club, the organization succeeded the G-E Recreational Foundation which in turn succeeded the famous Electro-Technic Club. Neither of these earlier groups had any particular facilities for serving employees. They did sponsor various sports programs and for many years an annual employee picnic was carried out.

With the formation of the G-E Club and the decision of the Company to erect a modern clubhouse to house various recreational features, the real growth of the club began. The building was completed in 1927. Andrew M. Snodgrass, now production manager of the Pittsfield Works was the club's first president.

The club in the 15 years it has existed for the benefit of employees has filled a definite need. Bowling facilities, equalled nowhere in the entire state of Indiana are available for shop leagues.

A well equipped gymnasium provides ample space for basketball games and on occasion the gym can handle more than 1,400 persons. There is equipment for serving more than 400 persons at dinner and the club is also equipped with pool and billiard tables.

George Waldschmidt all through the years has been one of the club's most active members and ardent supporters. Widely known throughout the works through virtue of his long service and keen enthusiasm for sports, he has been chairman of the boxing committee, serving for four years. He was largely responsible for the Golden Gloves boxing tourney so popular several years ago. George is also secretary of the Quarter Century Club, having been chosen to fill the term of the late William Melching, and last year was elected for the full term.

The new club officers will take over on September 1.

Unique Device Aids Defense Operation

Polish Born Employee In Schenectady Speeds Work On Warship Parts

The time required for a small but vital step in building propulsion equipment for warships has been cut in half by the ingenuity of Waclaw Dasziewski, a 53-year-old Polish-born boring mill operator in the Schenectady Works.

He devised a horse-shoe shaped metal yoke that permits one boring mill to do the work formerly required of two mills and a lathe in making bearing rings and self-aligning bearings for battleships. The company has given him a suggestion bonus which, with other money from his savings, he is investing in defense savings bonds.

"I want to do what I can to help America," he said. "I have an old father in Poland, a sister in Rumania. I have not heard from them for some time. I do not know what has happened to them. Here I have enough to eat and good clothes to wear; I can sleep in peace; I can be happy playing with my grandchildren and hunting and fishing. I like that and am willing to do all I can to keep things that way."

The warship bearings previously were made on a vertical boring mill and the rings on a horizontal mill, but the required smoothness could not be obtained on the latter and finishing on a lathe was necessary. Use of the yoke permits the ver-

(Continued on Page 2)

NEW TENNIS CHAMPS

Raymond J. Hoffman, Jr., Bldg. 26-3, and his partner, Paul Dammeier, won the city men's double tennis championship at Weisser Park, Tuesday evening, August 5. They defeated Wilson and Schoaff in a thrilling five set match.

• Everybody Helps

(Guest Editorial)

It's been said that "woman's work is never done." Looking at the present record of the sex in helping out on national defense, there seems to be a lot of truth in the old adage.

Through research, women scientists are today playing their part in defense. A woman is one of the world's greatest authorities on the basic structure of aluminum, vital material in airplanes and other military equipment. Another has designed turbines and power plants for Navy destroyers. Still a third, who years ago invented the "invisible glass" you see in many store windows, is now devoting all her ingenuity to defense research.

But the record doesn't end with these scientific efforts. Women are by nature particularly skilled at performing certain "fine" work. Hence, many of them are today found assembling tiny motors for use in communications and other fields, while others are sewing parachutes and barrage balloons, or passing final inspection on particularly delicate defense products.

Women are making a splendid record in the manufacturing effort for national security. This fact is of unusual importance when it is remembered that in modern theory 16 to 17 civilians are needed to "back up" each man in uniform. Not only are America's women proving that they intend our way of life in this country to be preserved, but they are actively demonstrating that every ounce of the nation's skill is ready and eager to serve the purposes of national defense.

And so—here's hats off to our "battalions" of women in defense!

—Bloomfield Works News.

• No Left Turn, Please

The other day, one of our eagle-eyed plant protection men noticed an employee disobeying the "NO LEFT TURN" rule on Fairfield Avenue. As a matter of fact it was at 3:40 on Monday afternoon. The rule was established to observe, not to pass up. If it was YOU, don't do it again. Remember, accidents caused when folks break the rules don't win sympathy and understanding when the time comes to fix the blame!

Unique Device

(Continued from Page 1)

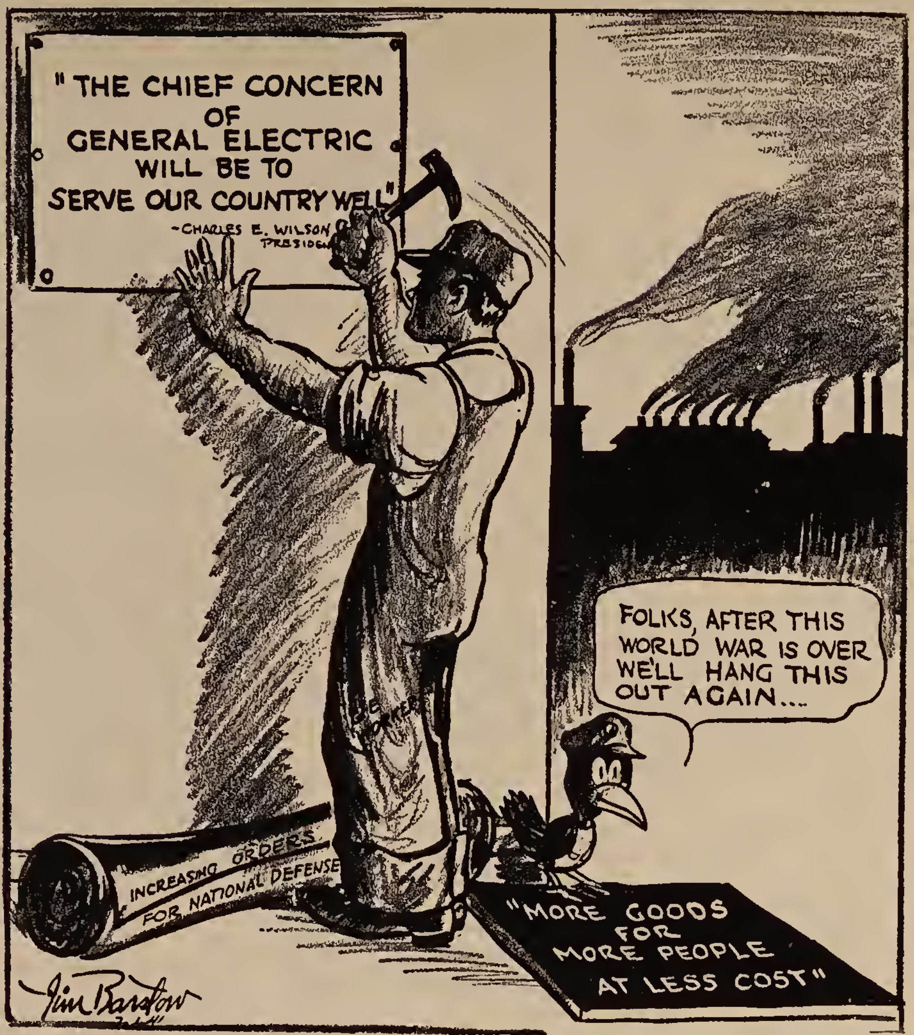
tical mill to be used also for the ring job, and considerable machine and labor time is saved because the requisite smoothness can be obtained initially.

Four previous suggestions of Mr. Dasziewski for machinery improvements have been accepted by the company's suggestion committee.

Typical head of an average American family, he is but one of thousands employed by the company on defense projects. He came to the United States as a boy of 18 in 1906 after two uncles who preceded him had written home about the land of opportunity. He worked as a rivet heater and boiler maker for several years and entered the employ of the General Electric Company in 1913. He became a citizen in 1914.

Now he operates a 50-inch boring mill in the turbine department. At an adjacent mill works his 25-year-old son who came to work for General Electric in 1937 as a chip sweeper. At Michigan State College is a second son, a junior in chemical engineering and an advanced student in the Reserve Officers' Training Corps. Upon graduation he will enter the United States Army as a commissioned officer. Of two daughters, the elder is married, while the younger keeps house for her widowed father.

FOR THE DURATION.....



"THE CHIEF CONCERN OF GENERAL ELECTRIC WILL BE TO SERVE OUR COUNTRY WELL"
-CHARLES E. WILSON PRESIDENT
G-E WORKER
FOLKS, AFTER THIS WORLD WAR IS OVER WE'LL HANG THIS OUT AGAIN...
INCREASING ORDERS FOR NATIONAL DEFENSE
"MORE GOODS FOR MORE PEOPLE AT LESS COST"
Jim Barstow

The spirit of the times today is to let nothing interfere with making the country strong. General Electric is striving its level best to live up to that spirit. In every division of its far-flung enterprises, national defense comes first. This is as it should be, for unless the country is made strong against any possible enemies to the American Way of Life, there's not much use planning for the future. We are now proving to the world that the system of private enterprise, so highly developed in the democratic nations, is better than any other system.

And after the war? One of the best answers was given by Robert S. Peare, manager of publicity and advertising for the Company and also treasurer of the Advertising Federation of America in a recent talk. Said Mr. Peare: "After this world war is over, it will be the good will developed for our private enterprise system—now harnessed to defense production—that will help restore it once more to the good cause of 'more goods for more people at less cost'."

The future depends upon how well we do our part in this huge national defense job. If we do it well, there's every reason to believe we will emerge stronger and better able to maintain the American Way of Life.

SCIENCE FORUM – by L. A. Hawkins

Q. Is it not possible to make paper from plants other than wood or linen, in order to save natural resources of wood?

A. Paper can be made from hemp, jute, straw, cotton, esparto grass, rags, and a number of other materials. These materials are not used more extensively, however, because of the higher cost and quality of the finished paper.

Q. What causes stars to twinkle?

A. The twinkling is caused by the atmosphere. It is due to the fact that the air is generally full of streaks and wavelets of unequal density. The amount of twinkling differs considerably on different nights, depending on the uniformity and steadiness of the air.

Q. What is agate?

A. Agate is a metamorphic rock formed by the deposition of silica from mineral waters in the gas holes in solidified lava.

Q. What are the three best conductors of electricity at ordinary temperatures and pressures?

A. In the order of their conductivity they are silver, copper, and gold.

Q. How is the per cent grade of a highway or railroad calculated?

A. Merely multiply the ratio of the vertical rise to the horizontal distance in which the rise occurs by 100. Thus a 1 per cent grade would mean a rise of 52.8 feet a mile. This is 52.8 divided by 5280 (number of feet in a mile) and multiplied by 100.

Q. How do you explain the sparks that seem to appear on adhesive tape as it is pulled off the roll?

A. This phenomenon is a manifestation of static electricity. A small amount of this static electricity is generated by friction as the tape is pulled off the roll, and then the separation of the charged strip from the roll increases the voltage so that a spark is frequently produced.

Q. How big do whales grow?

A. The largest whale, known as the sulphur-bottom whale, reaches a length of 100 feet and a weight of about 150 tons. It lives, appropriately enough, in the largest ocean, the Pacific, anywhere from California to Central America.

Q. What is the difference between a billion in England and a billion in the United States?

A. When we speak of a billion, we mean a thousand million; but when an Englishman says "billion," he means a million million, or a thousand of the U. S. billions.

Q. Are the stars actually the same shape as they appear to be when seen with the naked eye; that is to say, with points?

A. The stars are so far away that even the nearest one (excluding the sun) when viewed with the most powerful telescope appears as a mere point of light. It is reasonable to believe that all the stars are approximately spherical in shape similar to our sun, which is the most important of all stars as far as we are concerned.

Month of August 1941 - Double Award Month

HERE IS MY SUGGESTION

To Reduce Spoilage and Conserve Material

Secretary Suggestion Committee
Building 16-3

I SUGGEST:

Signed..

Pay No...................................

....Dept.

CONSERVE MATERIAL

FORT WAYNE WORKS
ALL OUT FOR DEFENSE
ELIMINATE SPOILAGE

MAINTAIN QUALITY

Volume 1 FORT WAYNE, INDIANA, FRIDAY, AUGUST 8, 1941 Number 2

FIRST TIME FOR DOUBLE CASH AWARDS

Present National Emergency Justifies Special August Drive For Suggestions

Experience the satisfaction of receiving a double cash award during August by making a suggestion that will further our National Defense and reduce spoilage. Reducing spoilage means the conservation of much-needed vital materials as well as better utilization of equipment and man-power.

Each issue of our daily papers calls attention to additional materials being placed on priority lists. It is reasonable to believe that as the scarcity of raw materials increases, the production of non-defense devices will have to be further curtailed, at least for a short time, while the producers of raw materials have time to fill the National Defense needs. Our ability to continue production of commercial products is limited by our ability to conserve and utilize to the utmost, the stock of raw materials we have in our plant at the present time and that we may be able to procure in the future.

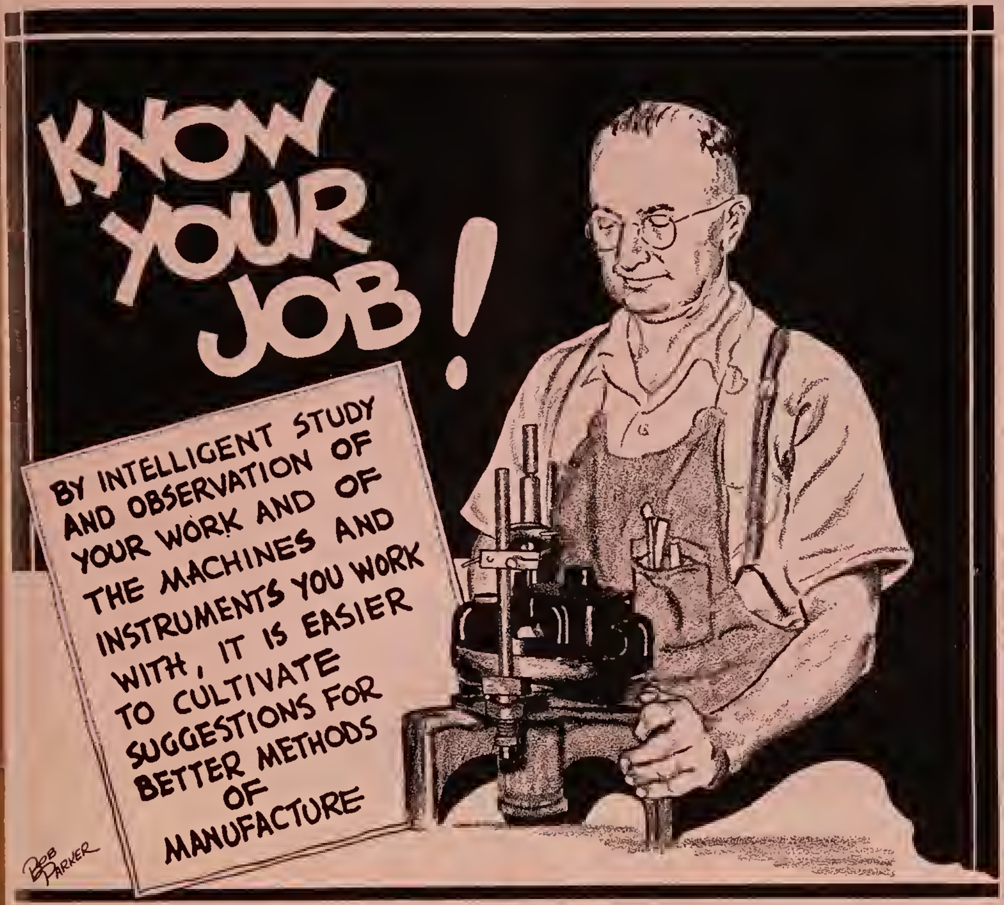
Here is where we employees enter the picture with suggestions to reduce spoilage and conserve material. Regardless of how small the saving of material may be in machining processes, the saving resulting from conversion of over-run material or a savings in labor, additional ideas through suggestions are needed, if we are to meet defense schedules and still endeavor to serve our commercial customers.

Are the materials that you handle and work on being economically used? Do they offer you an opportunity to benefit by suggesting a change that will conserve material? How are the tools you use in making the parts which you contribute? Can you suggest a change in them which will improve the quality, make your job easier, and at the same time reduce spoilage?

Analyze the cause of spoilage that may have occurred on parts which you have made so that you can avoid repeating the defect again. Have the tools, materials, or processes contributed to the cause? If so, what can you suggest that will overcome repetition of the same trouble on future parts?

Salvage operations require highly trained workers. By knowing our jobs so that we produce good parts, and no defective work, we can reduce the work to be done by these specialists so that their time will be available for use on new emergency work.

There is surely something about the jobs you are performing that can be improved and so lead to the saving of time or material and reduce spoilage. No job can remain the same year in and year out without some thought of improvement entering one's mind. Your suggestion may not cause immediate changes to the operations you perform, but it may stimulate your thoughts and the thoughts of others so that some improvement may result. Turn in that little thought on a suggestion blank today. It may mean a double award for you and enable you to contribute your share to the National Defense emergency.



KNOW YOUR JOB!
BY INTELLIGENT STUDY AND OBSERVATION OF YOUR WORK AND OF THE MACHINES AND INSTRUMENTS YOU WORK WITH, IT IS EASIER TO CULTIVATE SUGGESTIONS FOR BETTER METHODS OF MANUFACTURE
BOB PARKER

"Leave It To The Women"

. . . is a time-worn phrase, and with feminine response to the new double-award suggestion program for August, it looks as if the women may take the situation in hand and "cash in" some new ideas on the saving of material.

Cries of "Swell," "Great," and "Fine" greeted the inquiring reporter when she talked to some of the girls noted for their "Suggesting" ability about the merits of the August program. We hope this doesn't start an argument with the male contingent, but we settled this problem of suffrage long ago, and besides, new fall clothes must be bought, so why argue about whether or not the fair sex should try to corner the suggestion market.

Alma Geary, Bldg. 17-2, pocketed $75 some time ago because she thought it would be smart to use a single piece of stockinet on certain connections. (And brother, from where I sit, that $75 looks darn smart.) "This double-award program suits me fine," said Alma, "as a matter of fact, I thought of something this morning that will save material, and I'm going to send it in."

"The girls on this floor are thinking," said Margaret Rumbaugh, Bldg. 26-3, winner of a $35 suggestion award several months ago, "and I have an idea that this business of double awards is sort of urging them along." Pauline Ort, who once took home $22 for suggesting a rubber guard on conveyor braces, chimed in on this note of thinking also, with the explanation that since double awards for August had been announced, she had been thinking and thinking and thinking.

Ida Mugford, Bldg. 4-5, another former suggestion award winner, is now working on wedging on a Navy job, so her position is particularly significant in the National Defense emergency. "I don't know where I can suggest an improvement," said Dorothy, "but I'm going to keep my eyes open because a double award would suit me fine."

Say what you may about the fair sex, but the gals are thinking!

Swift Action Is Promised

The month of August Double Award Program for suggestions for the reduction of spoilage and the conservation of material is well under way. Suggestions are coming in from all departments in large numbers.

Engineers, planning men, and suggestion committees are making it their business to give each suggestion their best consideration and report their conclusions and make awards at the earliest opportunity. Their part of the program will not lag.

We will do our utmost to speed up the adoption of as many of the useful suggestions as quickly as possible. This will insure that our efforts toward spoilage reduction and material conservation will not bog down. Help the National Defense Program—send in another and better suggestion!

C. H. MATSON,
Assistant Manager.

Machine Tools Still Hard To Get

Vital That We Take Care of Them so as to Get Most Use Out of Them

Machine tool manufacturers are swamped and are working twenty-four hours a day in their effort to supply the heavy demand for machines and tools necessary to further their National Defense work. This makes in vital that we know our machines, use the proper care in their adjustment, and be sure they are properly maintained to keep them running at their highest productive capacity.

It is highly important that machine tools be lubricated at regular intervals and that any sign of distress, that is noted in their operation, be reported to the foreman, without delay. A minor cause of trouble can usually be corrected without much difficulty, but if the trouble persists it may mean a major breakdown of the machine tool with the consequent loss of production which is so vital at this time.

Keep your machine tools as clean as is consistent with the operation you are performing and never leave a machine tool to the next shift operator unless you have removed most of the chips, shavings and dirt that have accumulated.

Don't Waste Small Parts

It is surprising how many small parts find their way into sweepings. Parts which drop on the floor should be picked up at once so that they do not lose their identity and find their way into sweepings and become a total loss, usually unaccounted for in costs.

--- UNDERSTAND YOUR JOB ---

DO YOU UNDERSTAND YOUR JOB?

Our Present Emergency Requires That We Have Full Knowledge Of Our Job

Our present national emergency makes it necessary that we have a full knowledge of our job in order that we can maintain the highest quality in workmanship and conserve much needed material. To know our part in the manufacture of a variety of products, such as we build at the Fort Wayne Works, it is important that we know what the part we are making contributes to the final assembly of the unit or means to the customer who purchases the article which we build.

To make parts of the highest quality, we must be familiar with the material with which we work and know how it reacts to the operations we perform on it. The machines and tools which we use to fabricate materials play an important part in the control of quality, without spoiling parts or wasting raw material, so we must understand their operation in every detail and contribute our knowledge and human touch to keep these machines functioning at their best.

We can obtain answers to the questions we may have about our job from our foremen and the many specialists our company has available. We should make use of their help in understanding our job. Asking a simple question, even if you think it will cause you embarrassment, may solve one of your problems and help you reduce spoilage or conserve material and, thereby, increase your prestige with your foreman on account of a job well done.

The expression, "DO NOT LEAP BEFORE YOU LOOK", might well be written "DO NOT WORK BEFORE YOU UNDERSTAND YOUR JOB." If we follow this rule, we will save time and, without question, reduce the rejection and scrapping of badly needed parts and the necessity of providing additional material to replace that sent to the scrap pile.

As employees of the Fort Wayne Works, we all have a very definite responsibility in overcoming our spoilage problems and reducing the waste of material so that we can not only carry out the National Defense projects which have been given us but have as much material as possible available for the non-defense production which we now have.

Carry-Back Program In Hermetic Motor Department Maintains Quality

By Karl Geller

In the above picture, we see Violet Brower, instructor in the Hermetic Winding Department, Bldg. 17-2, "chalking up" a rejection on the carry-back chart, one of which she maintains in this department. This system was started on April 1 and through the splendid co-operation of the employees has been the impetus for a decided downward trend in the number of winding defects in hermetic refrigerator stators.

Each winder has a symbol to stamp her work for future identification. When a defect is encountered, an analysis is made to determine the cause and place the responsibility. After definite responsibility has been placed, the instructor marks the rejection against the operator responsible and carries it back to her for correction and further instruction.

Starting out with the theory that many of the defects are not caused by operator carelessness, but are caused by lack of proper training and instructions, defective materials, and faulty operation of equipment, the Hermetic Motor Department set out to accomplish reduction in spoilage and re-work through three separate sources.

(1) Training Paramount

Operators may innocently cause defects because of lack of sufficient training, and this is particularly true when increases in production are greater than our ability or opportunity to train new operators. The carry-back system affords the opportunity of more personal contact between the instructor and the operator, and where further training is needed, personal attention by the instructor can be given.

(2) Must be Corrected

The carry-back system also brings to light defects that are beyond the operator's control and are caused by faulty processes and equipment. The operators are zealous of their good standing and unless the responsibility can be definitely placed, (and in such cases, the defective part is NOT chalked up against the operator) the foremen and instructors will be ever alert to see that equipment is kept in good working order so that poor quality work from this source is kept to a minimum. Where repeated errors are traced to the same operator and analyzed as caused by the equipment, a set-up or maintenance man is quickly called in and the offending mechanism corrected.

(3) Quality Pays

The Hermetic Motor Department believes in the axioms, "If it's worth doing, it's worth doing right", and "It's just as easy to do it right the first time". Our operators take pride in producing good, acceptable work. The benefits gained by quality workmanship are readily apparent, compared with the inevitable inefficiency caused by poor and careless workmanship. Proper training and instruction inherently assists the operator to produce good quality work of which she can be proud.

During the first three months that the carry-back system has been in effect, the average number of carry-backs has been materially reduced as a result of the fine co-operation of our people in this training program. With such performance, pride in quality workmanship is paramount, which in effect produces good, all-around performance by placing QUALITY before QUANTITY. Every operator fully understands that they must produce good quality in order to receive full reward for their quantity.

GOOD QUALITY

has become synonymous with General Electric products through the efforts of several generations of employees who were proud of their opportunities to design, produce and sell those products. During recent years we have striven hard to maintain the quality of General Electric products and at the same time to reduce costs so that more people might use and enjoy the benefits obtainable from those products.

Today we have a new problem—one to which we have given relatively little thought—National Defense. We must get a new viewpoint. Here-to-fore, the majority of General Electric products were called upon to render a peaceful service in which life was not usually at stake. Today the products may be used in other manufacturing plants making equipment for defense or they may be used directly by our army, navy or air corps. In either case the failure of a motor or a transformer to perform its function at the proper time might endanger the safety of our country or more personally the lives of our own friends or relatives. We—must not let that happen.

The engineers must make sure that they have ample safety factors for our defense requirements. The production and planning personnel must be sure that the right materials, proper tools and equipment are provided at the right time. And equally important the people who build the product must build it not just to get by test and inspection, but to insure that the motor or transformer, or whatever it may be will stand up under the severe stains and shocks to which it may be subjected.

E. J. THOMAS, Engineer,
Transformer Div.

Pitch In Now

If there's doubt about how the job ought to be done, ASK QUESTIONS. If there's a way to do it better, MAKE SUGGESTIONS. Above all, KNOW YOUR JOB THOROUGHLY.

THERE ARE MANY BENEFITS

That we'll all receive by gaining a thorough knowledge of our jobs. We won't unknowingly make mistakes which will cause the parts or devices that we produce to be rejected and possibly scrapped when they reach the inspector.

There is no more satisfaction to an operator than the knowledge of a job well done. When parts or completed product pass inspection with flying colors, which means little or no rejections, we have the satisfaction of knowing that we have performed a good job. Our foreman is aware of our performance, when he reviews the Daily Defectives Reports, which are posted in most sections of every department.

A thorough knowledge of our job and work well done, cultivates job pride, which is so badly needed in our present National Defense Program.

DON'T LET THEM DOWN

General Electric has dedicated itself 100 per cent to helping our country equip for national defense.

Conservation of material, spoilage and defective workmanship, always a hazard to successful economic operation, now becomes much more serious, as failure to meet a shipment or furnishing defective equipment may result in one or more men in the armed forces losing their life.

Like any big job, this one can only be accomplished by each of us *doing our assigned task with a minimum loss in time and material.* Most essential to the success of this undertaking is a *thorough understanding of our job.*

Exeprienced employees should continually be on the alert and willing to aid the many new and less experienced. Supervisors and specially assigned trainers are available in order that you may ask for advice if your job is not clear to you.

Constantly keep in mind—late with our deliveries or defective apparatus—MAY LET SOMEONE DOWN.

J. H. GARGETT, *Supt.*
Transformer Department.

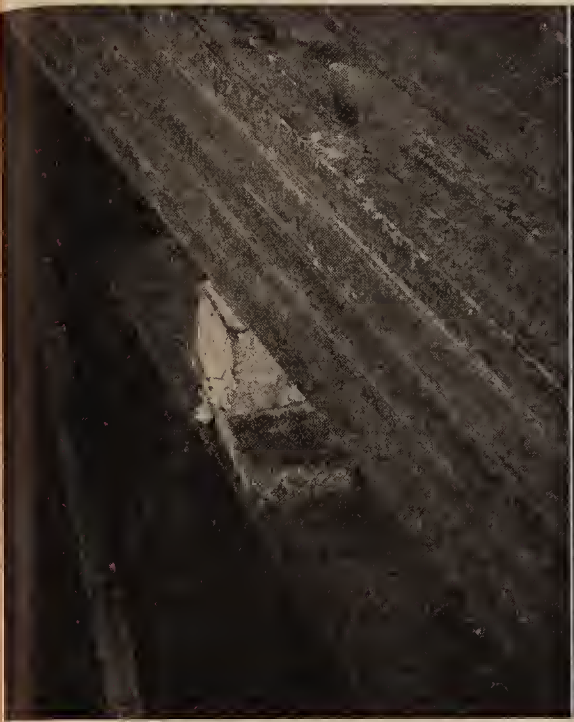
"It takes less time to do a thing right than it does to explain why you did it wrong".—HENRY W. LONGFELLOW.

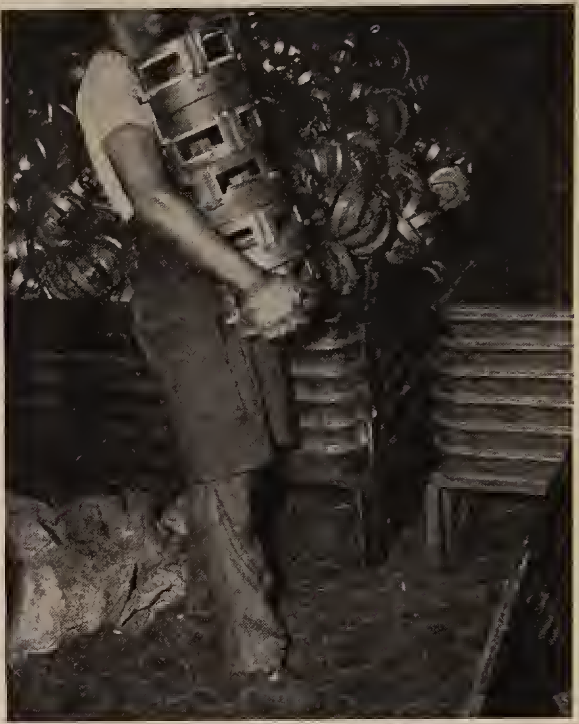
Avoid Complaints

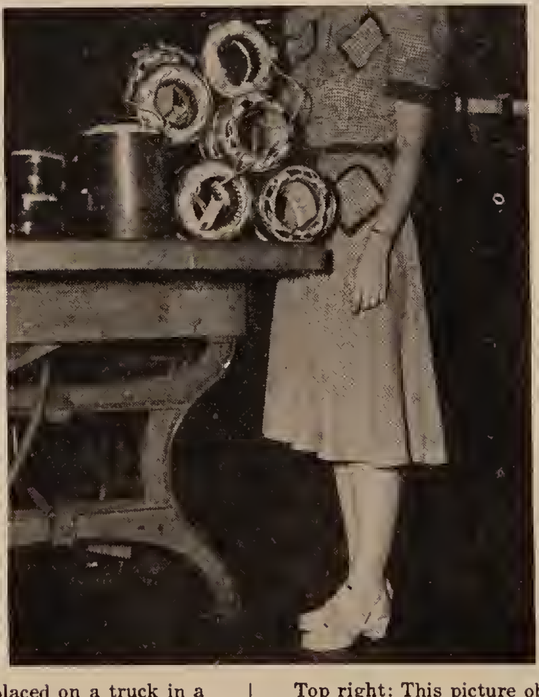
Minor defects and errors in our products cause our customers to lose time and they eventually become annoying complaints. Avoid complaints by maintaining the quality of all of our products.

--- HEADS UP FOR QUALITY ---

This Is The Way Forty Percent Of Our Accidents Occur







Top left: Cause and effect. The load of steel at the left was placed on a truck in a hazardous manner, a wide piece of steel being laid across the narrow block. The piece of steel fell just as an employee was passing, striking his leg and causing severe injuries.

Top right: This picture obviously shows that the slightest misstep or bumping into another object would cause several pounds of iron to fall on the man's foot. It is never necessary to transport materials in this fashion. One of our

NEWS FROM THE CAMPS

We publish herewith with great pleasure extracts of letters sent to us by G-E employees now in government service. Address all communications for this column to the WORKS NEWS editor.

Dear Editor:

Having received the "Works News", I was happy to know that now although being very far away I might still be in contact with those at General Electric. You may depend upon me for full cooperation to acquaint you of the activities at this camp.

By all means keep me on your mailing list. My correct address you will find below.

Sincerely yours,
Verne Marbaugh
Service Company
80th Armd. Reg. (M)
Pine Camp, N. Y.

Dear Editor:

I rceived the Works News and appreciate it very much and it will be a pleasure to receive the paper each week. Letters and news from home are the gem of the day to every soldier; the joker is, to get letters you must write letters and that gets to be quite a chore at times to add to our other spare time duties. I am slated to go on furlough July 23 so I hope to see you in Fort Wayne briefly at some time during that week. I will bring some snapshots with me.

See you soon,
Pvt. Sam Schladenhauffen
Co. B, 113 Med. Regt.
38th Division,
Camp Shelby, Miss.

Dear Editor:

I received the Works News and would like to have you send me the Works News. I have been transfered to the company which address I give to you. Also have sent some snapshots home. If you wish one of them I have written to my folks and told them to give it to you if you wish to put it in the News. It will be perfectly all right with me. I am taking bayonet practice now and it is O.K. I like it very much out here, but it sure get's hot out here. I have never been in h - - - but if it is as hot there as it is here I surely don't want to go there. I am just 135 miles from San Francisco and 250 from Los Angeles. It sure is nice country out here and also beautiful. It took us just four days from Fort Benjamin Harrison and slept three nights on the train. We went through eight different states: Illinois, Wisconsin, Texas, Nevada, Colorado, Oklahoma, New Mexico, Arkansas. They are all very nice in the spring. I also saw orange and lemon trees with oranges and lemons on them. They sure looked good to me. I was wishing I could get off the train and get some oranges. Well, I will send you some snapshots for the Works News just as soon as I get some good ones taken. Well, thas is all for now. Will send you some news later. I have had some rifle practice also. I got a 66 and a 72. That is all for now.

Sincerely yours,
Private Richard Becker
Co. A, 76th T'ng.
(Bn.) Hq.
Camp Roberts, Calif.
Fort Sill, Okla.

Dear Editor:

I received your letter and will try and answer as best as can.

Yesterday and today were cloudy and looks as though it will rain. It hasn't rained here since last April. All those pictures of the hostesses in camp are the bunk. I have only seen about three since I came and as hard to get to and talk as a guy giving out 100 dollar bills.

I haven't seen any rattlesnakes as yet but I heard a few have been killed since I've been here. When I was out to the rifle range about two weeks ago a scorpion was killed about ten feet from where I was sitting. This is about our last week of training, then we go to school for six or seven weeks. They are going to make radio operators out of us as far as I know we will only carry pistols and ride in trucks so we won't have to do much marching I hope. It looks as though they are trying to extend our time. I hope not as I miss the luxuries at home, especially my car. We are located in a large valley and there are large hills, which seem like mountains to me, around the camp. After our 13 weeks we will all be split up. I may get in the Infantry Band. I don't know as yet. Here's a picture of the tent we have to pitch. They expect two men to sleep in it—imagine that. We get plenty of good wholesome food. Usually Sunday dinner is the best—chicken and ice cream. They serve that strong beer—3.2—over at the Post Exchange. Twenty-one bucks sure doesn't last long here. They try like hell to take it away as soon as you get it. Tell Perry and the boys I said hello and sure miss playing with them.

Yours,
Dick H.
Camp Roberts, Calif.

Dear Editor,

The second issue of the Works News has just arrived and I am very happy to receive it. It is indeed a source of great pleasure to read about the happenings of friends and former co-workers every week, while being better than a thousand miles from your old friends and surroundings.

We are up at 4:45 A.M. every morning for a full day of exercises, drill, lectures, and class room work and when 9:30 P.M. rolls around we are usually ready to hit the "hay" and call it a day.

I am now beginning my fifth week in the Signal Corps Battery of the 8th Specialized Training Regiment. Included in our classes are: The operation, establishment, and maintenance of various types of communications, encoding and decoding of different means of signals, setup and operation of message centers, study of batteries and their methods of operation, map reading, etc.

Fort Wayne men are few and far between down here. Up to the present time Irvin Wedler is the only other G-E man I have come in contact with at Fort Sill. He is located in Battery "C", 33rd Battalion, a specialized motor mechanics outfit.

I will certainly appreciate the Works News at all times and will notify you whenever transferred.

Sincerely yours,
Carl A. Alter
Battery "A", 32nd Bn.,
Field Artillery
Training Center,

Dear Editor:

Have written this letter on request to tell of our experiences in camp, and if the substance is found to be boring disregard it.

I have now received two copies of the Works News, and am more than glad to have it sent. So if possible would like to have the same continued. Like a newspaper, it's interesting to page through and read of the latest happenings, and doings of some people or groups in your place of employment.

Except for being tough at first the eight weeks I have now spent in the army have been most interesting. The first few weeks of learning discipline, and the manner in which the army does things were the toughest. An axiom of the army is that there are two ways—the right and the army. You do the latter, and no argument if you want to save yourself K. P. on Sunday. For any boner you might pull, or goofing off as we call it here you get gigged, which amounts to punishment by being put on some detail, preferably in the mess hall.

Although this is a medium tank (28 tons) regiment we as yet haven't got the tanks so we carry on our training procedure—driving truck, and once in a while operate a light tank (9 tons). Besides this are taught care and operation of machine guns and small weapons, and finish off with lectures on how to carry on a successful war.

The most fun I have had so far is driving these tanks, and have likewise taken a great liking to such. July eighth was the date for the beginning of company and regimental schools, for all those who qualified for the training. The instruction period will last until August fifteenth when if we made good we will get our ratings, and be transfered to a regular unit. The schools attended are non-commissioned officers, radio, and tank and truck driving. I qualified for radio so that's what I do four days a week learning the Morse code.

The chow they feed us is swell, in fact our mess hall has the reputation of being one of the best in the division. Have gained several pounds, but charge that to having eggs and beans practically every day.

Co. A,
80th Armd. Reg. (M)
Pine Camp, N. Y.

Dear Editor:

Thanks for the Works News. Enjoyed it very much.

Would appreciate it very much if you would continue to send it to me. Yes, you have my correct address, and in case of any change I'll drop you a card. Thanking you for your interest, I remain,

William Schlecht
Hq. Det. 2nd Bn.,
152 Inf., 38th Div.,
Camp Shelby, Miss.

A writer in a woman's magazine urges her readers not to overlook the most insignificant detail of their wedding arrangements. After all, if it wasn't for him there just wouldn't be a wedding.

REPORT ACCIDENT HAZARDS
NOW IS THE TIME TO PREVENT the ACCIDENT WHICH MAY OCCUR NEXT WEEK

NEWS THROUGH THE PLANTS

Hermetic Motors 17-2

Dear Hermit:

Has the mystery been solved? Who is the reluctant dragon? Do dragons ever have sandy hair? I think the dragon species is extinct in Bldg. 17-4.

You know, I'll bet everyone in Bldg. 17 knows that Jerry Clark's middle name is Violet. Well, Jerry, my middle name is Rose, so together we ought to make some kind of a corsage.

Irene Meyer thinks the breeze over by the Sunbeam Table is just grand. She thinks it would be a fine breeze to be floating around in, under a parachute.

Our Dotty with the southern accent is very excited these days. She is to be married in two weeks and is moving to that good old state of Tennessee. We sure will miss her, but we all wish her every happiness.

With plans going forward to vacation time, there hasn't been time for much thought of anything else. However I think every one is going to enjoy those two weeks of rest and play, and I'd like to hear about their good times when they get back.

G. U.

Dear G. U.:

Esther Remenschneider entertained some of the girls at a chicken fry last week. The entertainment consisted of taking snapshots and horseshoe pitching. Those who attended were: Joan Young, Helen Grunewald, Eileen Goeglein, Ginny Doty aid Helen Wayer.

Dorothy Hanselman had a bad time last week due to an attack of laryngitis, so she stayed in bed all day Wednesday, and Thursday her voice was almost as good as new. But with all of the talking and singing Dottie did Thursday night by 11 o'clock her voice was gone again.

Saw Catherine Hoffman and Lois Burry at the Decatur fair. Seems that they are experts at dart throwing.

Do your Christmas shopping early. Only 116 more shopping days 'til Christmas!

T. H.

Motor Generator Static

A surprise shower was given for Miss Mary Rottman at the home of Miss Sara Jean Jones, 4302 South Wayne, last Tuesday. The table appointments were carried out in pink and white. A large umbrella in the same colors formed the centerpiece, with small pink and white rosebud baskets as favors. Shower games were played throughout the evening and prizes awarded, which in turn were given to the bride. Those attending the shower were the Misses Miriam Lemke, Jean O'Connor, Virginia Ayers, Mary Alice Herber, June DeWitt, Annabelle Haines, Mary Lauer, Jeanette Moats, Jeanne Brennan, Dorothy DeHaven, LaVern Engelbrecht, Sara Jean Jones, Virginia Davis, Mary Rottman, Rachel Luellen; Mrs. Wallace Moorhead and Mrs. Joseph Benanti.

Magdalen Hook, Bldg. 19-4, was certainly embarrassed the day of the Elex social. At one of the booths she gave the girl her social security card by mistake, thinking it was a ticket.

Rosemary Coovert and Ruth Henkenius are the two latest in Bldg. 19-4 to prance in with sparklers on their left hand. Who's next?

Lorena Hahn and Bob Haslup both of Bldg. 19-4, have most everyone guessing as to whether they're married or not.

Thisa And Thata 19-5

It has often been said that young people leave the farm and go to the city, but not so in Berniece Scheuman's case, she likes the farm so well that she's got herself engaged to a young farmer! We give our congratulations.

We were so surprised to see Ethel Hayes in at work on Monday, we thought she would be out peddling the fish she caught in Michigan.

Congratulations to Maybelle and Betty who were recently married.

Clarence Koff, Bldg. 4-2, must either be eccentric or the present heat wave is getting him down. He says that the salt tablets the company furnishes really quench his thirst, and the drinking water from the water cooler is so cold that it burns his mouth.

Why is is that some people never look where they are going. Vicki Fuhrman, Bldg. 4-2, was seen trying to walk through the new iron fence in the girls' wash room. My, my, while the workmen were still there and working on it too. But she defended herself by saying that she had another new bride with her, one Helen Martin. This love bug that causes all the absent mindedness in new brides must be a deadly thing to cause all the trouble that it does. If you don't believe it's catching, why does Mary Witte, Bonnie Meyers, Duela Archelman, Flo Rose Gant, Helen Schoppman, Dorothy Fundenburg, Thurlene Gronau, Mariana Cook, Millicent Farrell, Edith Uhrick, Mary Hoffer, Mabel Schwartz, Carolyn Shaffer, Janette Lortie and Mary Jane Mitchell all get married in three months. It's something to think about.

Anyone having lost anything, please see Doleen Geary, Bldg. 4-2. She may have it in her purse.

Vera Kruge, Bldg. 17-4 and Ruth English, Winter Street, recently made a trip through the Smoky Mountains and had a very enjoyable time. Ruth, however, refused to take any chances the early part of the day and whenever there was any rock or other objects to look over from a shaky position, she would always say to Vera, "Is it worthwhile?" After touring the most of the day, with no mishaps, finally Ruth came up missing. Vera searched and searched, and after about an hour she located Ruth on the highest point in the Smokies—Klingman Dome. Wondering how Ruth had the nerve and speed to climb that high, Vera started to climb this altitude too. Upon reaching her destination, Vera found the answer. Not far away from Ruth were a couple of Uncle Sam's finest. The next time you make another trip Vera, take a soldier boy along for a guide, then Ruth will see all the sights.

Russel Dunten says that the new G-E fan that he bought recently really creates a breeze of cyclone velocity. The first night he had it he tried to sleep with the fan running in the bedroom; he says after being blown out of bed the third time he shut the fan off.

Fred Stansbury, Bldg. 4-3, is now our chief flange dunker and drier-offer. Fred tells us that the only draw back to his job is that he comes to work in the morning all cleaned up and by quitting time he looks as if he had been rolling in a coal mine. Cheer up, Fred, there are worse jobs. For instance, operating a rattler in a foundry, ask your reporter, he knows.

Virginia Kaminitsas, Bldg. 19-4, makes a nightly trip to the windows at 10:30 to wave to her one and only, who gets off work at that time.

NEWS THROUGH THE PLANTS

From The *Feminine Viewpoint*

By Irene Perry and Hilda Barthold

Hot Weather Cocktail

Have you ever noticed how often, in this fast-moving, sophisticated, scientific world of ours, some simple facts concerning some of the very common things should have been obvious long ago? This general statement is prompted by the many questions asked each summer about salt tablets placed in the dispensers at drinking fountains. The sponsors of "feminine viewpoint" suggested that we clarify some of the inquiries in this column—for which we feel duly flattered. Of course, salt from the feminine viewpoint is no different than from the masculine, so that any of the stronger sex not addicted to reading this column, may break over and do so for this issue, at least.

Miners, furnace workers and others in excessively hot occupations used to talk about "water poisoning", a condition brought about after consuming large quantities of water in the course of a very hot work day, with the loss of large amounts of fluid by perspiration. Now it is difficult for us to look upon water as being poisonous, even in large quantities, and in fact it isn't. Those who formerly considered it as such overlooked the fact that large amounts of common salt were also lost in the perspiration. It is now known that the heat cramps and heat exhaustion formerly so common in such hot occupations were the result of the loss of salt, rather than by the drinking of too much water. By the simple process of supplying salt, to be taken with the drinking water, heat exhaustion has been practically eliminated in those hot occupations which a few years ago contributed many hospital patients each summer; and thus by getting the horse properly placed before the cart, one of the hot weather hazards has been very nearly eliminated.

Under normal conditions, a person needs from one-fourth to one-half ounce of salt to make up for the chlorides lost in the body fluids through the kidneys and skin. Normally we get this in our food, but under some conditions, the amount of sweat excreted by workers may amount to several pints an hour, and a corresponding increase in salt loss also occurs. Unless there is salt replacement along with the water replacement, there is an improper balance between fluid and salts in the tissues, and the result may be, and frequently is, varying degrees of heat cramps or heat exhaustion.

How much salt should one take? That will depend upon the amount of fluid lost by perspiration, and this in turn will depend upon the muscular activity of the worker, his working environment, and the outside temperature and humidity. The amount of water intake is almost automatically regulated by these factors, and in general it is safe on very hot days, or when working in hot occupations, to take a salt tablet with each drink of water.

Some have reported nausea and difficulty in keeping the tablets down. This can be largely overcome by crushing the tablet in the mouth and swallowing with plenty of water.

If this discussion leaves you feeling exhausted, try a salt cocktail and make all complaints to the "feminine viewpointers."

Dr. H. W. Garton.

19-2 Tattletale

By Sloop the Droop

As the zero hour approaches, a bald head can be seen sticking around the post at the nineteen gate. It looks up and down the street to see if the coast is clear, then waves to its overalled accomplice that they can proceed without interference from the monsters (better known as cops). It seems the reason for all this precaution is that Herb Kramer ("Baldy"), and Maurice Libbing ("Slugeye") were walking along Broadway, peacefully discussing the weather one evening, when up drove a big black shining limousine, but to their dismay, on the hood was written "Police." As the car came to a stop two officers hopped out and confronted both lads. One of the policemen held them at bay while the other flipped through his portable rogue's gallery.

By this time the entire police force had arrived and all joined in the chorus that they were looking for a guy in overalls which fitted "Slugeye's" description. However, out of all the cops, only one knew "Slugeye" and vouched for his good behavior.

As the cops departed "Baldy" and "Slugeye" joined in an agreement that they should make it a point to know more cops so that they could walk the streets in greater safety and that "Slugeye" would discard his overalls when walking with "Baldy."

Hermetic Office 17-2

Luella Franke, our "Outdoor Girl" even goes swimming this kind of weather, although once in a while she admits "it's too cold." . . . The newest item for Bldg. 17-2 budget is a steel plate to fasten on the back of Langenberg's boat to keep the over-anxious fish from crashing the end in. Bob Wefel is working diligently on the expense end. . . . If the WORKS NEWS isn't up to par this week blame it on Elmer Baade's vile cigars. It has been noted that Alex Smith looks slightly groggy while occupying the chair in the editor's office and we fear the results will be apparent in this week's WORKS NEWS. . . . We haven't found out why Dick Madden was sitting under the testing table for an hour or so the other afternoon. Maybe that's his way of putting himself in the dog house.

Suzy Sleuth.

Gerry Habig, Bldg. 4-3, came to work Monday with a basket full of sparkles. She is wearing them all around one big sparkler on her left hand.

Charlotte Sanford, Bldg. 4-3, bought a new car. After a trip to Ohio last week-end, she does not know whether she rode a car or a bucking bronco the way she felt on Monday morning.

Nellie Williams, Bldg. 4-3, has been taking long rides each evening to get all set for her Canadian trip next week. We are afraid she will be all worn out before she ever starts her trip.

Sylvia Bowers, Bldg. 4-3, came to work today with a Dayton hair dress. After a lot of explaining, we found out that she intends to spend the week-end in Ohio.

Lillian Bergman, Bldg. 4-3, has the mechanism girls all guessing how popular she was in "Baby Contests."

Harry Parker, Bldg. 4-3, wants to borrow a car to inspect Big Long Lake's gang. He is afraid to drive his car down there with the police badge on it.

Some Fishin'!

Vaughn Sheets, Mayor of Waynedale, will probably continue in this capacity if and when Waynedale should become a city. With such an honest face he couldn't help but be the people's choice. His well known fishing ability might have something to do with it too. These fish were supposed to have been caught in Long Lake, but they look like Canadian importations to us. This couldn't possibly be any reflection on the honesty of the mayor so all you bozos in the Wire and Insulation are expected to address His Honor with all due respect and courtesy.

Sleuthing In 4-6

A farewell party was held on Wednesday night for Pauline Gehrlich, who is leaving here on August 15th for Phoenix, Arizona, where she will reside. The girls presented her with a lovely gift to remember them by and sincerely wish her lots of good luck in Arizona. . . . The General Purpose FHP Sales Department has a newcomer in their midst. His name is Charlie King and he is not married. Go to it girls, but all strangle holds are barred. . . . Congratulations to Mr. and Mrs. Harold Sherbondy on the arrival of a baby boy August 5th. I understand his name is supposed to be Harlan John. . . . Ruth Kaiser is making so much money these days that she was very extravagant on the Elex trip the other weekend. She ordered a dollar steak dinner, left it on the table, and went down to the hot dog stand for a hot dog for dinner. Ruth claims that they must have forgotten to fry the steak. . . . Why was "Toni" Kennedy attracting so much attention last week at West Swinney Park? Could it have been the attire she was wearing?—Could be! . . . Charlie Gable took his wife and children to Hamilton Lake last Sunday so they could enjoy the water toboggan slide. Naturally, it ended with "Mama" Gable taking care of the children and Charlie doing the sliding.

Sleuthing is no job for me,
It taxes my mentality,
I really haven't much to spare,
So guess I'll go 'fore I get the air.

The Sleuth.

Congratulations to Tom Freeman, Bldg. 26-2. Proud father of a baby boy.

6-4 Magneto Mumblings

It's always nice to get home, but a boat cruise to Milwaukee with Elex Club was well worth any aches or pains which yours truly may have suffered resulting from a strenuous, but exciting day. . . . Those two Magneto Belles, Marjorie Phillips and Betty White, were so-o-o-o thrilled over their "Shipboard Romances" experienced aboard the S. S. Grand Rapids that they have talked of nothing else for a week. We're wondering why they don't collaborate on writing a book called "How to Experience a Shipboard Romance in Four Short Hours." . . . Howard Timms didn't go on the boat ride to Milwaukee, but he had his own experiences at the lake while fishing, oh unhappy day. Howard tells us the same old sad story about the fish conducting a jam session on the opposite side of the lake from him. Or maybe the poor fish just didn't appreciate all that new equipment you bought for their benefit, Howard. . . . It has just come out that Ralph Dennison's favorite popular song is the Swedish double talk "Hut Sut Song." He claims that it is so soothing to his nerves, especially after he has heard it continuously for about two hours. . . . They say there's "Something About a Soldier" and Phyllis Closson should know, cause she claims that her "heart" belongs to the Army. Lucky fellow, that one. . . . It's nice to have Irene Schultz, time clerk, who has been ill for some time, back with us again. We missed your sweet smile while you were gone, Irene. . . . Welcome to Richard Pinkham and Harry McKee, second and third shift foremen, respectively, who have recently joined the Magneto Department. Hope you like it here in Magneto Valley, gentlemen. . . . Elmer Auman is all in a dither, cause lil' wifey is going out of town for a few days and he has to rough it. Best o' luck in your new role of chief cook and bottle washer, Mr. Auman.

Sunbeams From 17-4

Well just when we all thought that the little man with the bow and arrows was taking a nice long siesta, along comes Aurelia Fortman with a nice new diamond.

It could be the heat or it might be love that caused Mabel Clark to almost put her seven cents carfare in the card box last Friday night.

Wanted: Some nice juicy beefsteak. Dave Havert ran into one of those dog-gone doorknobs again, or did he?

Attention girls: If you didn't happen to see Whitey VanAuken showing his lovely legs, over in the park the other night, you must come over to my house sometime and I will tell you about it; they are really worth talking about.

Thought for the week: To pity distress is but human; to relieve it is Godlike.—A Mann.

Granny.

Wayne Cook, Bldg. 4-2, was known to have stopped at a filling station with his wife. Two girls were stranded there with a flat tire and he offered his services to help the girls. While at work, his wife left him stranded there and when the tire was repaired, the girls too left him stranded. But he said, hitch hiking was rather good.

Al Monas, Bldg. 16-3, feels neglected because he hasn't made the NEWS as yet. Wonder if he ever obtained such beautiful pefmanent blushes in Pittsfield as Jho. helped him to over the week-end.

SANDY SAYS

Hoot Mon! Or should I say, be gorra, did yez see the beautiful gr-r-r-een "QUALITY" flyer in the WORKS NEWS last week? And did ye obsairve, me gude lads and lassies, that ould Sandy made the green sheet? Ye might put it mildly that I'm highly flattered.

Weel, even if they didn't maintain quality (meaning Sandy Says, of course) in the "QUALITY" sheet, ye get what they're driving at.

Quality—General Electric Quality—is something that we must maintain, in the face o' all that's happening these days. If ye havn't worked here long enough tae catch the spirit—ye're going tae catch it. And if ye have, and see any young beginners who havn't, give them a helping hand. I know ye will—especially if they are blond and beautiful.

Show them how their job, even if it looks unimportant, should be done right. Show them how Quality means less scrap, less waste, better goods at less cost, and better conservation of critical materials. (By the way, last week I said that copper was getting "critical." Weel, now I've just picked up the latest drip from the grapevine that steel is getting hard to get, too.)

But I started tae say something about how important ANY job is around here. Don't think yours, whatever it is, is not important. Ye know the old story about the horse shoe nail, for want o' which the shoe was lost, and for want o' the shoe the horse was lost, etc., etc., which ends up with the loss o' a Country!

SO—whatever you're doing, do it well—believe me, you'ld hate tae think that one o' your pals was killed in action, or in an airplane accident, or on a battleship, because you were careless about some little job ye are doing here. BUT YET THAT MIGHT EASILY BE POSSIBLE.

Weel, anyway, don't let it worry ye. My cousin Colin worried about something the other day and he was telling Uncle Angus about it.

"Uncle Angus," he said, "I'm afraid I'm going tae spend a lot o' time teaching new employees all my secrets, and I'll nae learn onnything in return. It's got me worried."

"Foosh, me lad," replied Uncle Angus, "Ye canna teach without learning something in return. Look at the Indians. They taught us how tae raise corn—and we taught them how tae drink it."

During the past week it has been very difficult to collect news due, no doubt, to the extreme hot weather. Everyone seemed to be in the doldrums, not much activity existed. However, your reporter of Bldg. 4-3 in a tour of the various soft-ball diamonds discovered many of our co-workers attired in some very outlandish clothing. Anything to keep cool they said. For instance, there was Carl "Pudge" Clevenger in his "Sing Sing" sweater. Herman Doehrman in his cheese cloth slacks, and Wm. "Beezer" Burke wearing an outfit that looked to us like lace curtains.

Edward Sarrazine, Bldg. 4-2, left his badge at home one day last week and was a few minutes late. "That won't happen again. 'I hope' ", says Ed.

NEWS THROUGH THE PLANTS

26-5 Tool Bits

Henry Wittber and Earl Lenz attended the circus last week in their usual fashion. 'Tis rumored that the circus company contemplated charging an adult fee to watch them load.

Rufus Niblick is just another way of spelling Kentucky. You should see those loud southern shirts he is wearing.

Gordon McDougal should be in the same category as the bugler who gets 'em up in the morning. He calls up his best friends on Saturday afternoon reminding them that their vacation is over.

Paul Richter's face displayed a very embarrassed expression as he opened his clarinet case, minus the clarinet, at broadcast last week.

Wanted by Eulalia Spath, Bldg. 4-3: A chauffeur to drive that new Plymouth.

To all concerned, the fair maiden Harold Bokar, Bldg. 4-3, was sitting and waiting for in the park was his wife. Do you suppose Harold could have forgotten his lunch or did he have something on his mind?

Now that there is a rumor of making Waynedale a city, Johnnie Deahl, Bldg. 4-3, and Max Farrel, Bldg. 4-3, are very much concerned over who the Mayor will be. Well, Johnnie, you might just as well make up your mind to stick to the fire truck. As you know, Max is the pride and joy of the big town.

Harry Karr, Bldg. 26-2, fishes all day and catches the limit and then lets them all loose again in the lake. Better luck next time Harry. Sew up the holes in your fish sack.

26-3 Tidbits

Well here we are again after a very hot week. There were only a few that were overcome by the heat. It looks as if next week will be cooler, so let's keep all fingers and toes crossed for cooler weather.

Have you heard that Beryl Carr is going to say "I do." In fact as soon as August 23. So good luck and oodles of happiness.

We are certainly glad to have Irene Craig back at work again. We sure missed you, Irene.

Petra McCollister received a very useful gift, an iron, for a wedding present. Too bad you burned your finger, Pete.

How about a look at the diamond Anne Gligor received? It's just beautiful, boy, and how.

Well, of all things, we hear that Elsie Pedersen's favorite dish, is baked beans. So whenever we have a potluck supper we will save Elsie a big dish of baked beans, won't we girls?

I guess congratulations are in order for July brides on "N. Bench." Alice Schukler and Gert Wyss.

Charley Prime must be afraid of losing his "schoolgirl" complexion or figure, because he always refuses sweets.

Fashion Notes: What the well-dressed girl is wearing these hot days of 1941; a backless dress with a full flared skirt, above the knees, rolled stockings and spike heeled shoes. Ask Harriet Augsburger for further details.

It isn't bad digging dirt and gravel with a shovel, but when it comes to doing it with your arms and shoulders, it isn't so funny. Ask Bob Hartzell and Bill Sexton about it, eh boys? And the motorcycle—well it's in a worse condition.

M.B.A. PATIENTS

Motor Department—Rose Walgamuth, 317 West Jefferson Street; Betty Seabold, 2701 Wayne Trace; William Schenker, 2905 Lillie Street; Bertha McLaughlin, 2819 Bowser Avenue; Calvin Long, 2522 Brooklyn Avenue; Phyliss Hill, 1609 Oakland Street; Helen Dennig, St. Joseph Hospital; Miriam Bireley, 1012 West Third Street.

Returned to Work: Pauline Fogel, Maurice Rogers, Dorothy Kintz, Ethel Perry, Joseph Steenman, Kenneth McKinney, Naomi Newhard, Betty Krause, Leo Simpson, Grace Kock, Clarence Geiger, Avon Snyder, Charles Seynman, William Sterling, Hazel Wise, Wm. Wollman, Lester Shroyer, Frona Witsche, Giles Ogg, Clayton Ryan, Ida Lininger, Donald Brown, Margaret McKering, Frances Wehrle, Richard Simpson.

19-4 Spot Jottings

It seems Fred Castor was doing too much leg work, he has torn the ligament in his leg and seems to crip around fair.

Vacations don't seem to bring in any news, too good a time and forget to tell the bad luck fish stories.

It seems Esther Pape did not do so well on her vacation in northern Michigan as Susie Wagner caught a bigger one than the one that Esther almost caught.

It seems Art Knoll, Bldg. 19-4, and his son Bob, Bldg. 26-1, and Marg, Bldg. 14-4, were planning on a nice vacation traveling and going down by Mexico, when his son who is in training at Camp Shelby, received a furlough and wanted to come home. Better luck next time to the Knoll family, maybe your son will be out of training and he can go along.

Congratulations to Mr. and Mrs. Norman Singleton, Bldg. 19-5, on the birth of a son, John Joseph Singleton.

A FAREWELL PARTY

A stag in true Series and Specialty Motor fashion was given last Friday night for Roy Rippe, who is going to Winter Street, in the planning department, of the new defense department. The party was held at Pleasant View cottage on the river. Joe Mills announced his appearance by a loud outburst of "Nertzy bombs." Shelter was soon found in the kitchen, where Bernard Parent and Elmer Sible doled out the light refreshments. In due time O. J. Mettler made a speech and presented the guest with a gift. Everyone extended their best wishes and the party rolled on into the night.

Archie Boren, Bldg. 4-3, took off for the wilds of Northern Wisconsin to do some plain and fancy fishing, and from the picture he sent your reporter, the fishing must be all fancy. The fish are of gigantic size, they even dwarf Archie. He tells us that he is going to charter a flat car and bring one home. Be prepared boys for a super fish fry at Huntertown.

Katherine Shaeffer, Bldg. 4-3, just returned from a two weeks' vacation and said she was glad that it was over and very happy to get back to work again.

Edna Crow, Bldg. 4-3, and the Boy Friend took a trip over to Ohio one evening. While driving along, a bumble bee flew in the car. Instead of said friend getting rid of the bee, he stopped the car quick and jumped out, as did Edna, but he kept his distance. The bee seemed to like Edna best. Wonder if that is the reason she had trouble sitting for several days?

Twelve Receive Promotions To Posts Of Supervision

O. W. Carsten

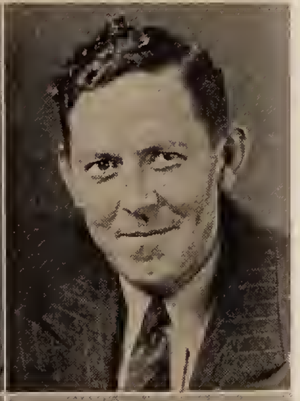
D. B. Poland

H. M. Edmunds

Henry Beckler

A. R. Anderson

E. L. Braden

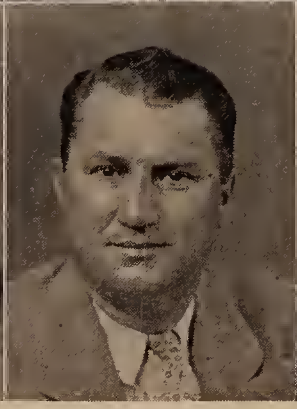


G. J. Brehm

F. E. Lieberenz

R. F. Davis

H. L. Karr



H. E. Stephens

Charles Keller

Twelve new appointments to supervisory posts were made this week to as many Fort Wayne Works employees, most of them in the factory organization. The appointment of H. E. Stephens to handle production service on special national defense items was announced by A. J. Rose. Mr. Stephens will coordinate production programs in the various manufacturing departments and will have special assignments in the production manager's office. Mr. Stephens started service with the Company in 1919 as time clerk in the Transformer division transferring later to production work. He left in 1924 for other employment and returned in 1928 to pro-

26-5 Tool Bits

Ed Steward, Jack Schemehorn and Henry Gerdom are back at work after a week's vacation. Ed went to Crooked Lake, but the fishing must not have suited him, because he was seen at home a great per cent of the week. Jack went fishing in Canada, the fishing was nothing to brag about, he says, or was it the bait he used, neither was the drinking water, and to quench his thirst he had to drink beer, and him not liking beer (not much). Henry didn't go fishing, but took a trip of about 1,400 miles through northern Michigan, and over to Detroit and other points which he and his family enjoyed, but Henry says he thinks he ought to have a couple of days to rest up from his vacation.

One advantage in having a small tractor is that most of the parts may be carried in one's lunch box. For more details see Chief Iron Hail.

Carrey Baker is going west for his vacation, and while out there will see his half-brother, Chief Iron Hail.

This is to advise the citizens of Fort Wayne that the sudden rise in the rivers Friday night was not caused by cloudburst; rather it came from one Myron J. Lowe, who lit horizontally upon the water from the diving tower at the Municipal Beach. Moral: Don't let big feet flatten you out.

Walter Elliott has a unique way of saving gas by keeping his car in confinement at the repair shop.

The exotic Queen of Aircraft went and done it. Our sweet little Nola Decker has now blushingly become Mrs. John Morris. The bride and groom have just returned from a two weeks' honeymoon in the south (yes we wondered about that, too—so beastly hot, eh what?) From meagre sources the writer has been able to glean that the bride wore a going-away dress, whatever that is; and the groom was spondiferously adorned in a suit. (Apparently he hasn't been keeping up his Bundles for Britain quota). Their trip extended through Florida over to New Orleans and then home. The bride expressed herself as being tired, but, then a long trip makes me tired,. too. A portion of a table was appropriately decorated for the bride's return and the gang was on hand to greet her. All wives interested in whether their husbands kissed the bride or not, see me. For further details on subsequent events we advise that you consult your WORKS NEWS.

Why is it that Henry Wittber has not worn his tan oxfords since he discovered his heels were painted red?

What makes Otto Bachmann so quiet, is it because his vacation is over, or is he worrying over the big ones that he didn't catch?

Friends of Rufus Niblick have noticed that he was awful busy in the last few weeks checking his car, supposedly for a long trip during his vacation, but the last minute it was learned that Rufus and his assistants were planning to explore the wilds of Skincinnati and surrounding countries. Rufus, doesn't it kind of make you nervous, the thought of all the wild animals you might run across? Good luck to you, Rufus, and don't venture too far away.

Earl Lenz is reported to have been complaining about the neighbors checking up on him too close while his wife was gone for a week. After all, Earl, these women have to stick together.

Decatur News

Esther Fisher likes to go out for picnic suppers. The other evening she arranged with some of her friends to go on a picnic at the Hanna Nutman Park. The question of transportation was solved by the offer of a co-worker to take the girls to the park in his car. The sad part of the story is she is still waiting for him to show up for the picnic.

William Hunt is confined at the Adams County Memorial Hospital for observation. We hope he enjoys a speedy recovery.

The Decatur G-E Club will sponsor a Men's Singles Tennis Tournament on Saturday, August 16, at the Worthman Athletic Field. All employees of the Decatur Works are eligible to compete. All matches will be one six-game set except the finals, which will be the best two sets out of three.

The following week the Club will sponsor a tournament for the girls to be run on the same basis. This will be held on Saturday, August 23.

All entries for both events are to be given to George Laurent, with the men's entries closing on Thursday, August 14, and entries for the women's event closing on Thursday, August 21.

Russel Owens, foreman of the Rotor Section, has returned to work following an absence from work due to sickness.

We wish to extend to Joe Krick our congratulations on his recent appointment as a sergeant. He is in the Quartermaster Division Company "A" at Fort Benjamin Harrison, near Indianapolis.

Lloyd Reynolds of the Decatur Works is suffering from some broken ribs and an injured hand following a motorcycle accident. His condition, while painful, is not considered serious.

The majority of Decatur employees eligible for vacation will take their vacation the next two weeks of August. Many are planning trips to the lakes or sightseeing tours into neighboring states.

Ezra Brandyberry, Niles Butler, and Dellie Chilcote are on vacation this week.

Charles Keller, president of the Decatur G-E Club, has made the following committee appointments for the coming year. Elmer Chase will serve as chairman of the bowling committee and will be assisted by Chester McIntosh, Hubert Cochran, Milton Brown and Wm. Lindemann.

The new entertainment chairman, Lloyd Kreisher, has named the following members to assist him: Milo Schieferstein, June Miller, Hilda Gaunt, Reba Stauffer and Audry Schladenhauffen.

Since skilled labor is getting scarce, and there is talk of training women to take the places of men, Frieda Ramm, Bldg. 4-3, has taken up shoe repairing. She says she would like to work at something she likes and shoe repairing has always been her hobby. Frieda is badly in need of tools and if anyone has an old shoe cobbler set they would like to donate, she will be very thankful for it, also she will repair anyone's shoes during her lunch hour free of charge, work satisfactorily done.

Byrl Miller, Bldg. 4-3, received a birthday gift from the two pole winders. He also received a gift from an unknown friend of which he doesn't say much about. Could it have been a mistake, or was is something Byrl couldn't use himself?

Motor Generator Static

"Pome" by "Mawgie"

Margie Oddou, poetic typist, influenced by hot weather and suffering the shock of some dictation she received of late, broke forth with this lament:

"So the heat's got you dictators?

"When you talk you only mumble.

"And your mumbling's got your typists.

"When you talk, we only grumble."

Great is the man (or woman) who can rise to such poetic heights when occasion demands.

Celebration:

Back quite a few years ago (we won't say how many), the stork, while winging its way over a small town in Pennsylvania had one more "bundle from heaven" to deposit. The hour was late and the bird was tired, so in last desperate attempt to place this red headed little bundle, it took aim and let fly, making a direct hit on the cottage of a family named Toole. Yes, folks, Jack Toole celebrated one of his birthdays on the 14th of this month. Congratulations.

Just a Slip:

"Man Mountain" Bushong, in a hurry to get out of the rain one day last week, was trying (to the best of his ability) to run for shelter when his foot hit a slippery spot and he slid in a manner not at all graceful, to a full reclining position. As he swooped toward earth he narrowly missed a young lady and ended up in a deep puddle of water directly in front of her. "Sir Walter" had nothing on "Bush", he merely laid down his cloak, our hero deposited himself, and, if the young lady had possessed sufficient stamina and fortitude, she might have climbed over with nary a drop of water touching her dainty feet.

"Just a slip" modestly claims our hero.

Animal Fair:

Have you seen the zoo? According to the gals of Bldg. 19-3, Doris Siebold is going into the zoo business. They report her backyard is infested with cats, dogs, rabbits, squirrels, and rats, as well as birds of various kinds. Admission price will be five pins and Doris will serve crackers on Sunday afternoons. So come early.

Fish:

Ask Mary Alice Herber, Bldg. 19-3, what became of the bass she didn't catch (or eat).

Hospital Ward of Bldg. 19-3:

Patients — Helen Moechberger, broken bone on hand. Blair Bushong, fell down chasing an umbrella (who held umbrella?), busted knee cap, three thumbs fractured. Clarence Kelley, sprained ankle, disposition sprained, too. Eric Gawehn, sprained ankle trying to scratch his back with slide rule. Chuggy Mungovan has a terrific hang nail.

Great Minds:

Yes, Bud Fisher and Ann Bartholomew entertained the same thought at the same time. It happened like this—Bud was looking up planning cards in the blue print section, and noticing a stool, decided that the opportune moment had arrived to drape himself upon it. While engaged in his search, Ann facing the other way, had the same impulse. But Ann never reached the stool, Bud arrived first so her first point of landing was somewhere in the vicinity of Bud's shoulder blades and from this location she did a rather bumpy glide down 14 more vertebrae then onto the floor.

Great minds do run in the same channel, but sometimes that's bad.

I say, how is there room for both?

He Loves Animals:

When Phyllis Wright, of Bldg. 19-3 service bureau, appeared on the "Muni" beach attired in a "chic" bathing suit and carrying a cute little black pup, she looked stunning, and her appearance was greeted with "Ohs" and "Ahs" from the males assembled, that is, except one, "Pappy" Archbald was heard to remark, "Gosh, ain't that a cute pup?"

Yep, a dog is man's best friend.

Saying of the Week:

Ferry Frye remarks, "The finest way to get even is to forgive and forget."

Bldg. 4-3 wishes a speedy recovery to Mary Ryan who underwent an operation at the Lutheran Hospital.

Transformer News

Wayne Winters, Bldg. 26-2, still holds that it was just some salad that made him sick. But the boys that were with him the night before don't think so.

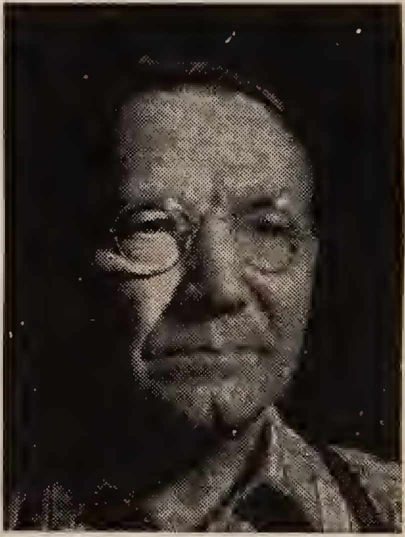
Luella Grotrian, Bldg. 26-2, went to New Orleans on a vacation, but next time she better get a new road map, because she was a day and a half late getting back home.

Transformer News

A birthday party was held for Bill Nussel, Bldg. 26-2. The guests were Margaret Horsell, Rosella Barich, Pauline Tacks, Nena Redman, Mary Standish, Connie Standish, Bertha Gruber, Helen Reinkin, Alma Kaiser, Elfrieda Kaiser, Ethel Brown, Pauline Ort, Charley Penn, Gladys Penn, Edward Crenics, Frank Schultz, Henry Webb, Tom Collins, Russell James. Bill says he sure was surprised.

We've heard a lot about G-E workers parking their cars in one parking lot and then looking in the other one for same, but Alfred Doan, Bldg. 12-B, had to extend his search to the "Auto Inn," corner Broadway and Washington to find his. It seems that he had parked his car in the Fairfield avenue lot a bit too hurriedly and got the car so close to the railroad tracks that the Railway Co. had to call a garage to have the car towed out of the way of an engine coming through. When Alf finally caught up with his car he had to pay the towing charges of $2!

The girls of Bldg. 4-3 are worried over the new romance in the winding section. Wonder if Marcelle Passe or Kenneth Federspeil could throw any light on the question as they were seen busily picking their teeth all during noon hour?



VETERAN

HE IS independent and proud, yet democratic and friendly. He is the envy of the rest of the world, and its hope. He is generous and tolerant and peace-loving—and withal the most powerful man in the world. He is the American workman.

His hands, accustomed to the feel of wrench and lever and gauge, may never have held a gun; his mind, trained to think in terms of tolerances as fine as 1/10,000 of an inch, may never have wrestled with a problem of military strategy; and yet he is the veteran of a thousand campaigns.

His campaigns began in the laboratories, and his prowess was proved in the test pits of American industry. His battles were waged on the factory floor and in the field. His victories have helped to make the citizens of the United States the most fortunate people in the world, and the U.S. the greatest nation.

In the plants of the General Electric Company, working with scientists and engineers, this man, the American workman, has made giant generators to light whole cities, X-ray tubes to penetrate human flesh and metal castings, radio and television apparatus to project man's voice and image over the mysterious waves of the ether.

Today, in the gravest hour of world history, he is engaged in the greatest campaign of all. But there is serenity and confidence in his face, and the experience of a thousand campaigns behind him. He is sure of his own abilities, certain of his country's future. General Electric Company, Schenectady, N. Y.

Promotions

(Continued from Page 6)

duction work in the Fr. H.P. Motor division. He was named supervisor of production in Bldg. 4-2 in 1932 and has since held that position. With Mrs. Stephens and their two children he lives at 1715 Clover Lane.

A. R. Anderson has been named assistant general foreman of the third shift in Bldg. 26-3. He has been foreman of that shift since February 14. He started his service in 1925 in the Apprentice course and was graduated in 1928 to enter the drafting department of the Motor-Generator division.

Otto W. Carsten, named general foreman of Bldg. 26-3 started to work for the Company as a winder in the Transformer division in 1927. A year later he was assigned to supervisory work which he continued until 1932 when he went with RCA Victor at Camden, N. J. where he remained two and one-half years as set-up man and later as foreman in the winding department. In 1935 he returned to G-E as foreman in the transformer department on coil winding and finishing. In 1929 he was transferred to Bldg. 26-3 as foreman in the Fluorescent winding department where he served until his present appointment.

D. E. Poland, named foreman of Coil winding and cable section in Bldg.. 26-3, started his service in 1928. Later he entered the Chicago Radio and Telegraph school and was graduated. He also completed the electrical engineering course of I C S and was re-employed by the Company March 21, 1935, as an electrical tester. He later became an inspector and worked on development of all new coil winding jobs for radio, control and fluorescents. Mr. Poland and his wife live in a new home, lighted, of course, with fluorescents.

Ralph Davis, named foreman of all night operations, second shift in Bldg. 26-2, lives at 227 Center street. He is a graduate of Central high school in 1930 and studied further under Indiana Extension courses. He has been with the Company four and one-half years in various jobs such as stock, testing, inspection and supervision.

H. W. Edmunds, named foreman of the Preliminary assembly job in Bldg. 26-3, started service October 1, 1940, as an assembler in Bldg. 26-1. He transferred to test and then to preliminary assembly in Bldg. 26-3. Before coming with G-E he was with his father in the electrical contracting business for about eight years. He is a graduate of South Side high school in 1931.

Henry M. Beckler, named foreman of Radio and Fluorescent assembly, second shift, Bldg. 26-3, came to G-E eight months ago. Before that he was with Stewart-Warner Corp. at foreman of radio production. He also served with United Air Lines in radio engineering. He is a graduate of Purdue University and Armour Tech. With his wife and three children he lives at 443 East Creighton Avenue.

George J. Brehm, made foreman of preliminary assembly, third shift in Bldg. 26-3, came with the Company in February, 1941, as winding machine set-up man. He was with Andlo & Inca Mfg. Co. as foreman before coming with G-E. He is married and has three children. The family home is 2802 Alexander Avenue.

No Wonder They Smile

Left to Right: K. R. Whearley, A. H. Lee, C. S. Allen, A. L. Johnson, N. Blankenship, R. C. Hanna and M. W. Edgar.

F. E. Liebercnz, named foreman of final assembly, third shift in Bldg. 26-3, first came with the Company in 1925 as a messenger boy during summer school vacation. In 1934 he started work in the Transformer department on repairs. He has served as leading operator in the department for the past three years. He is married and lives at 2832½ Broadway.

E. L. Braden, named foreman of coil winding, third shift, Bldg. 26-3, came with the Company in September, 1927, winding radio transformers. He was made machine set-up man three years later. In 1932 he was transferred to Winter Street in the Refrigerator assembly department. In 1934 he went back to his old job as set-up man where he has since been. Mr. Braden is a keen basketball man and in 1929 coached the G-E Club girls to win 17 out of 20 games. He is a graduate of Rock Creek high school and with his wife and two children lives at 321 East Wiley Ave.

H. L. Karr, named foreman on all night operations, third shift, Bldg. 26-2, came with the Company in January, 1929 at the Winter Street plant on monitor top refrigeration test. He later worked on assembly and also worked in Bldgs. 12, 6-4, 17, 4-20, 27 and 26-2. He has been in the transformer department for two years.

Charles Keller has been named foreman of the Progressive Assembly Switch Assembly and Box Motor on the first shift by E. W. Lankenau, Decatur Works superintendent. Mr. Keller's appointment was made following the transfer of J. Kenneth Eady to foreman of the second shift operation of this department. Mr. Keller was first employed by the company in 1925, starting in the Motor Assembly department. He later operated a shaft grinder and was transferred back to the Motor Assembly section serving as a repair operator until the time of his new appointment. Mr. and Mrs. Keller and family reside at Homestead No. 2 in Decatur.

The Turf Toppers won the final playoff in the Inter-Departmental Golf League ended last week with a total score of 333. These Monday night players were followed by the Optimists on Tuesday night with a total score of 340, while Fluorescents brought up the rear on Wednesday night with a score of 344.

Low scorer for the league was C. W. Kranmiller with a neat 78. George Bridges showed the most improvement with a league average of 97. The league play ended this year earlier than ever before, due to good weather and lack of other interruptions to sustained play on the three scheduled nights.

Accidents

(Continued from Page 3)

June accidents was caused by this unsafe practice.

Second row, left to right: Tall objects, which will not stand up safely as those pictured are frequent accident causes. Center: Guards to prevent foot accidents should be used and kept in repair. If foot hazards exist at "your place of work" which you cannot correct yourself, such as broken or lack of half rounds on benches, consult your foreman or Safety Committeeman at once. Right: When leaning pallets, bars of steel, etc., against the wall, work bench or some other object, make sure they will not fall over.

Bottom row—left. Three foot accidents have occurred like this so far this year. When lifting an object be sure that any object next to it or under it will not fall. Center: Those charged with piling of materials always have it in their power to either create a hazard which may seriously injure themselves or fellow workmen. These stators were certainly not piled with safety in mind. Right: Be certain not to follow the practice shown in this picture. Place materials on work benches, trucks, etc., so they will not fall off.

Teacher: "Why should we always keep neat and clean."

Pupil: "In case of an accident, ma'am."

Swinging The Hickory

By Paul Schwehn, Bldg. 4-3

There were horns blowing and feminine voices raised at the Taylor Street diamonds last Wednesday when the West Side softballers eased over the Sleepy Stators, 9 to 3. Simultaneously the Small Motor Factory defeated the Apprentices, 10 to 3, and the Small Motor Office trounced the Winter Street aggregation, 14 to 6.

Team play and laudable coaching accounted for the Westerners victory over the Rip Van Winklers in the first encounter of the second half.

Holmes and Penkul were the leading hitters for the Cowboys in the seven inning game.

Losing pitcher, Musser; catcher, Baals; winning pitcher, Sitko; catcher, Penkul.

West Side..............003 130 2
Sleepy Stators..............010 200 0

Although the Small Motor Factorymen had only seven men on the field against eleven, they slugged their way to a decided victory over the Apprentices.

The Apprentices stepped out in good style in the first frame when Goodwin clipped a fast ball for a two-base hit which accounted for the majority of the runs.

Harter and Eckenbarger were the sluggers for the Factory—they consistently slapped out double and triple base hits.

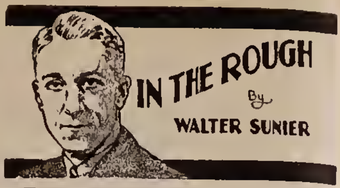
Small Motor Factory......030 032 2
Apprentices..............200 000 1

The nine "old men" of the Small Motor Office took on the Winter Street ten and a few substitutes and drubbed them with a final tally of 25 hits, 14 runs, and only three errors.

Hemsoth, on the mound, for the White Collar lads made a creditable showing, especially when he was in a "spot" in the last frame.

Small Motor Office..........242 301 2
Winter Street..............003 020 1

The pennant is within grasp as the Sweet and Bolenbaucher men enter the sectional softball tourney. The team has shown fine improvement within the past week and can, provided they get the breaks give the Zollner Pistons a run for the title of best ball club in the circuit. Watch the local papers for the schedules.



The 1941 G-E Golf League season ended on August 2 with an 18-hole playoff between the winners of the Monday, Tuesday, and Wednesday night groups.

The league ended earlier this year than ever before since the winners in each league were determined the first week-end after the regular schedule closed and the final playoff was played on the following week-end.

In the playoff the Turf Toppers, winners in the Monday evening group won with a total of 333, the Optomists, winners of the Tuesday evening group were second with 340, and the Fluorescents, winners of the Wednesday evening group, were third with a total of 344.

The low score for the group went to C. W. Kronmiller with a 78. George Bridges showed the most improvement over his season's play with a very fine 81 which was 16 strokes below his season's average.

(R. C. Hanna, substituting for W. A. Sunier.)

Wayne Pump Defeats G-E Club

The Wayne Pump Co. baseball team took a hard fought game from the G-E Club nine last Thursday night at the G-E diamond, by a score of 4-2.

The club team was sailing along nicely with Max Miller pitching good ball until the sixth inning when two costly errors and a timely hit allowed Wayne to score three times. They scored one more in the second while the G-E boys were unable to come through for the needed run.

Decatur Castings Fall To G-E, 5 To 2

The G-E Softballers were a co-ordinating unit Wednesday night when they easily defeated the Decatur Castings 5 to 2 in the first game of the Sectional Tourney at Municipal Beach.

The Electricians grabbed the ball game in the second frame when nine men came to plate to garner five hits and score four runs.

Good fielding supported the varied delivery of Norv Nahrwold as he accumulated 13 strikeouts out of 23 men to bat, and allowed only two hits.

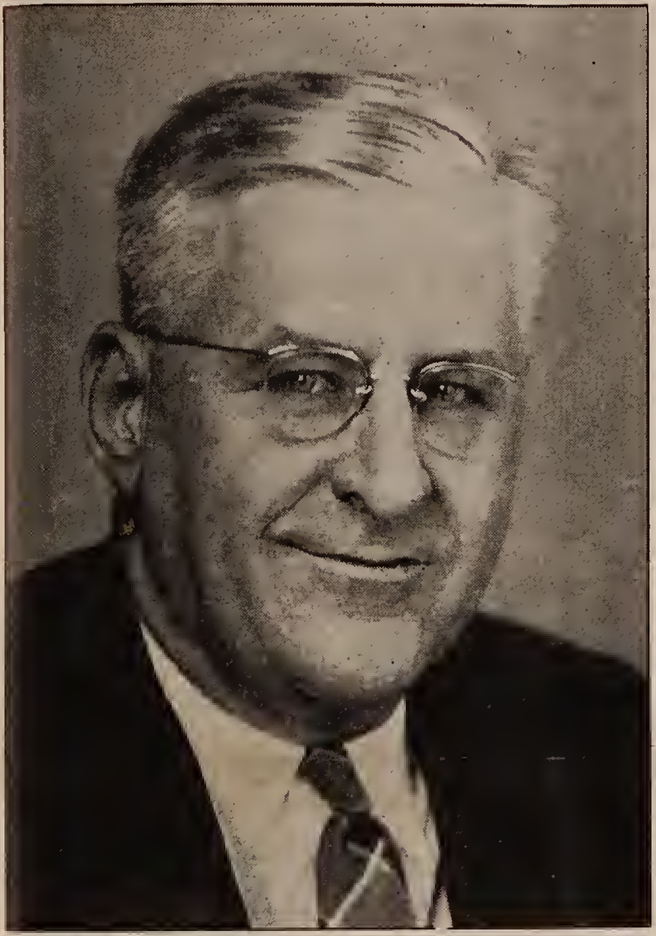
Suggestion Appeal Brings Results

New Administrator



Robert Wylie

Announcement is made by Works Manager M. E. Lord of the appointment of Robert Wylie, supervisor of general planning to the position of Administrator of General Planning and Wage Payments.

Mr. Wylie joins the Works management group with twenty-five years' service at the Fort Wayne Works. He graduated from the University of Michigan in 1916 with the degree of electrical engineer and immediately joined the Fort Wayne Works organization as a member of the test course.

In 1917 he was transferred to Plant Engineering Department under C. H. Matson, now Assistant Manager. In 1925 he was made head of the department as supervisor of general planning and he has continued in this capacity up to the present time.

The new administrator is married, has two children and resides at 3706 Shady Court.

NOTICE

United States Defense Savings Bonds and Defense Postal Savings Stamps may be purchased for cash at any time at the Payroll department.

Foremen To Hold Annual Club Picnic

First Outdoor Affair To Be Held Tomorrow Afternoon And Evening At Log Cabin

The first annual picnic of the recently organized Foremen's Association of the Fort Wayne and Decatur Works will be held tomorrow afternoon and evening at the Log Cabin, just off of the Bass Road. A stag affair, there will be no charge and refreshments will be served during the afternoon and evening.

A complete program has been arranged and this will include athletic events as well as entertainment by outside performers.

The committee in charge includes Carl Steinbacher, Wm. Walt, J. V. Johnson, Paul Buell, Ed Schafenacker, Joe Mougin, Glenn McAfee and Vic Boutwell.

Two Steinmetz Scholarships Are Granted

Both Recipients Of The Four-Year Scholarships Will Attend Union College

Two Charles P. Steinmetz Memorial scholarships, one to a G-E employee and the other to a son of an affiliated company employee, have been granted by General Electric, it was announced today by R. C. Muir, chairman of the company's Education Committee. Both recipients of the four-year scholarships will attend Union College in Schenectady this fall.

Edward L. Bates, Jr., son of Edward L. Bates, Sr., an employee of the Order and Stores department in General Electric's Pittsfield Works, is now employed in the Blueprint department of that plant. He was the salutatorian in the 1939 graduating class of St. Joseph's High School, Pittsfield. At college he will take up the study of electrical engineering.

Albert J. Taggi is the son of Anthony Taggi, a molder in the Elmira Foundry Company, a G-E affiliated company at Elmira, N. Y. He was graduated this year from the Elmira Free Academy, where he was valedictorian of his class. When he enters Union College in September, he will be enrolled in the electrical engineering course.

These scholarships were established in 1924 at Union College by the General Electric Company in honor of Dr. Charles P. Steinmetz, the "electrical wizard" of Schenectady. They are provided from a fund of $40,000.

Injection Molding Of "Mycalex" Achieved

Injection molding of Mycalex, a material consisting of ground mica and a specially developed glass, has been announced as a new development in plastics manufacture by the plastics department of the General Electric Company, at Pittsfield, Mass.

Primarily because of its low dielectric power losses, the material is expected to find widespread use in the radio and electronic field and, because of high mechanical strength, heat resistance and dielectric value, in industrial control and heating industries.

Offer Of Double Awards For Aug. Proves Its Popularity

A prompt response to the campaign to reduce spoilage and thus conserve much-needed vital materials in our National Defense program is reported by S. E. Palmer, chairman of the Committee on Suggestions. Added impetus has been given the campaign by the announcement that during the month of August double awards will be paid suggestors who register ideas definitely assuring conservation of materials.

Records are being maintained during the month of all adaptable ideas and a list of double award winners will be published soon after the close of the month.

All employees are urged to take part in the campaign to record their ideas through the suggestion system. Special suggestion blanks for "Double Award Month" are inserted in this issue of the WORKS NEWS and will be inserted in the next two issues.

During the first six months of this year the number of suggestions

(Continued on Page 3)

First 1,000,000-Volt X-Ray Machines

The first 1,000,000-volt industrial x-ray machines for boiler-drum and pressure-vessel inspection—capable of penetrating eight inches of steel in good commercial time—have been made by the General Electric X-Ray Corporation, Chicago. One has been installed by the Babcock & Wilcox Company in its Barberton, Ohio, plant; the other is for the Chattanooga boiler shops of Combustion Engineering Company. Still other units are now under construction at Chicago.

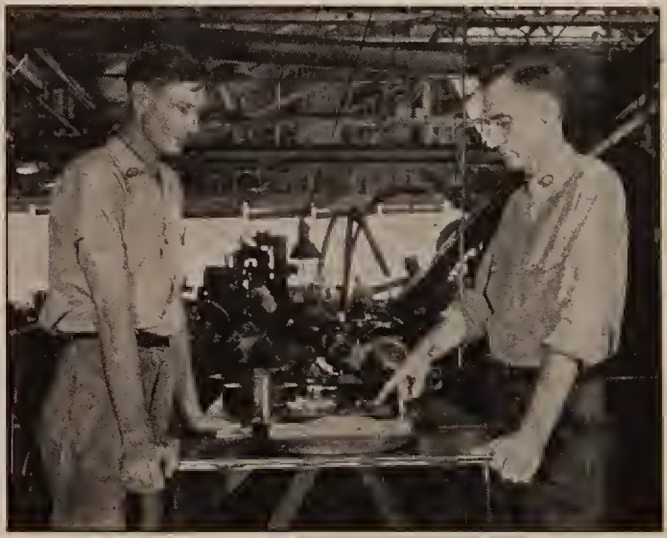
The new x-ray units—operating at 2½ times the maximum voltage previously available in industrial equipments—are like the one installed in the Schenectady Works Laboratory of the General Electric Company a few months ago. They are extremely compact in size, weighing only about 1500 pounds and measuring less than five feet in height and three feet in diameter.

W. J. DAY RETIRES

W. J. Day, a member of General Electric's Federal and Marine Department, retired July 31, on the eve of his seventieth birthday, after completing 41 years of service with the company.

An authority on merchant and naval vessel auxiliaries, Mr. Day had been affiliated with the G-E Federal and Marine Department for 33 years. He helped develop the lighting of air mail routes when the Post Office department started its air mail service.

Tops 1941 Suggestion Awards



U. B. Woods, Decatur Works, topped all 1941 suggestion awards to date with an award of $165, additional to $15.00 previously awarded on an idea resulting in the conservation of machine tools. Mr. Woods (right) is shown demonstrating his idea to his foreman C. Smith.

Mr. Woods' suggestion covered changes to stator repunch dies and was aimed at the prevention of mispunches and injuries to the punch and die caused by them.

• American Workmen

By H. W. MILLER
Works Laboratory

The great pianist had just struck the resounding chords of the finale of a difficult piano concerto. There was a moment's deep silence. Then the vast audience rose as one man, and the auditorium rang with its applause. Applause for what? The man? The piano? The composer? Well, without giving too much thought, the answer to all those questions might be "Yes." But, actually, what the audience was applauding—and the applause was evidence of enthusiastic appreciation—was the artistry, the skill that the composer, the builder of the piano, and the pianist each contributed to bring about the wonderful harmony of sound that so thrilled the vast audience.

Naturally, it was with a feeling of pride and self-satisfaction that the great pianist bowed to the audience in acknowledgment of the recognition of his skill. Pride of a job or a task well done is a justifiable human emotion, one in which no one should ever be ashamed to indulge.

Just recently, an article in one of the papers told of the splitting of a large, rough diamond. The splitting of large, rough diamonds into smaller pieces for cutting into individual stones is an extremely delicate job. There are but a few men with sufficient knowledge and experience to be entrusted with the splitting of a valuable diamond. One false move, a blow from the splitting-hammer a little too hard, and a diamond valued in the hundreds of thousands of dollars may be ruined.

In this particular case, the expert spent nearly a year studying the rough diamond, to locate the exact cleavage planes and precisely where the splitting-tool should be placed. At last he was ready to do the job. Much ceremony attends the splitting of a valuable diamond. The diamond had been properly mounted and lines drawn on it to indicate the cleavage lines. A year's preparation and thousands of dollars depended on a single blow of the diamond-splitter's hammer. Promptly at 10 o'clock of the morning selected for the ceremony, the door to the special room opened. The diamond-splitter, attired in a frock coat and top hat, entered. He handed the top hat to one of the group assembled and solemnly walked over to a table where, under special lighting, the great diamond, looking much like a big pebble, was positioned in a special vise. Amid a silence charged with an almost crackling intensity, the expert took up his splitting-tool and hammer. He carefully positioned the tool, slowly raised the hammer—then a sharp, tinkling sound and the great diamond split apart. There was the sound of subdued applause, the diamond-splitter shook hands with the head of the firm, put on his top hat and, with great dignity, left the room. No one could deny that man a feeling of pride over a job well done.

But job pride is not confined to great pianists or diamond-splitters. Anyone who wants to can attain a degree of skill in doing his particular job, which will command the respect of others and permit a personal pride in a job well done. Job pride is the backbone of confidence and self-reliance. The older men and women, who have learned this by experience, should try to instill job pride in the beginners. This is particularly important now that we are in the midst of a national emergency. Man hours and materials must be utilized to the fullest extent. A man or woman who takes pride in his or her job will realize this utilization to a greater extent than one who is indifferent and lacks job pride. Fortunately, job pride is a heritage of the American workman. This heritage, among others, must be preserved and handed on. If all of us do a job of which we are honestly proud, no one need fear for the future of our country.

NEWS FROM THE CAMPS

We publish herewith with great pleasure extracts of letters sent to us by G-E employees now in government service. Address all communications for this column to the WORKS NEWS editor.

Dear Editor:

Your recent note finally caught up with me right at the time I am back with the General Electric Co. After leaving Fort Wayne in October 1940, I was sent to Washington, D. C. in the office of the Quartermaster General and assigned to the Construction Division. My particular job was to assist in the purchase of laundry machinery. Sufficient laundry machinery was purchased to do the laundry work for over 670,000 men. Laundries were built at about 40 different camps throughout the country.

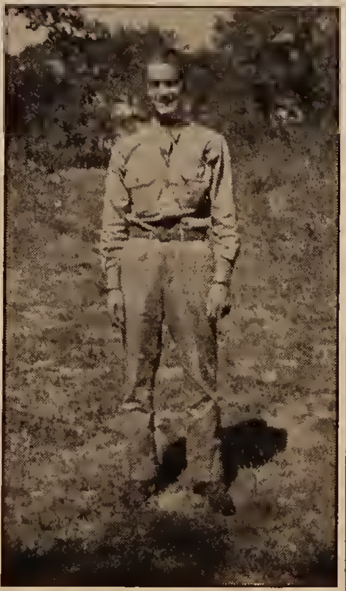
On July 28, I was ordered to Schenectady, N. Y., on a temporary basis to expedite machinery ordered by contractors and subcontractors from the General Electric Co. to be used in the building of camps and depots under the supervision of the Construction Division of the Quartermaster General. I arrived at Schenectady on August 1, and after explaining my mission to the executives of the company, Mr. F. P. Wilson, manager of the Contract Service Section, has given me a desk in building 22, room 334. Therefore all persons from the Fort Wayne Works visiting Schenectady are assured of a welcome in room 334. Please drop in and see me. I have already seen Ed. Misegades of Winter Street, and Roger Fuller formerly of Winter Street but now at Lynn.

Oh, yes, of course I will be glad to receive the Fort Wayne WORKS NEWS, sent to the address given below. I will notify you of any change of address.

Best regards to all,
Wilmer J. Bardonner,
Capt. Q.M.C.
27 James Street,
Schenectady, N. Y.

Dear Editor:

I received the WORKS NEWS and was very much surprised as well as pleased. As here of late I have more time for reading and other things besides my regular duties, and when I read the WORKS NEWS I can imagine I am back at work. The first few days of my army life began at Fort Benjamin Harrison, at Indianapolis, where I wasn't required to do any particular duties. On Monday, July 21, we left for the Air Corps at Ellington Field, Texas. We arrived 29 hours later and our first look at our new camp was quite a sight to see. The landing field when finished will be the largest in the world. It will be five miles square and will have eighty-five miles of concrete runways. It will also be the largest student training school in the United States. We are located about 15 miles from Houston, Texas and are about 15 miles from the Gulf Coast at Galveston, Texas.



Ralph Hardy

Thanking you again for sending me the WORKS NEWS, I remain,

Respectfully, yours,
Pvt. Ralph E. Hardy,
Recruit Detachment
Company D-8
Ellington Field, Texas.

Dear Editor:

I received my first WORKS NEWS Saturday, August the second. Was surprised to get the WORKS NEWS, but very pleased. I am overjoyed with the thought of receiving it every week.

I have been placed as a mechanic in the mobile laundry. I go to a carburetor and ignition training school five days a week. Then I will follow my unit as a mechanic where we receive our trucks. There will be about sixteen trucks to a mobile laundry unit.

Thanks again for your kind interest in sending me the WORKS NEWS. I appreciate it very much.

Yours truly,
Corp. Lawrence Bresler,
Co. "B" 60th Q.M. Bn.
Fort Benning, Ga.

CONSERVE MATERIAL

FORT WAYNE WORKS
ALL OUT FOR DEFENSE
ELIMINATE SPOILAGE

MAINTAIN QUALITY

Volume 1 FORT WAYNE, INDIANA, FRIDAY, AUGUST 15, 1941 Number 3

"Conserve Materials" Important Factor

We Are All Proud . . .

Vice-President H. L. Erlicher
In charge of G-E Purchasing activities

. . . of the way our Company is answering its country's call for armaments to meet the needs of the National Defense Program. All of us at General Electric are playing an important role on a stage that is constantly in the national spotlight. Those of you who make up that part of the General Electric family known as the Fort Wayne Works are certainly carrying your share of the responsibility for our Company's part in rearming America.

The current Quality Program which you are conducting is attracting an ever increasing amount of interest throughout our Company. Those of us who concern ourselves with procuring the raw materials that go into G-E products appreciate the magnificent effort you are all making to conserve these vital materials. The results you have obtained in substituting less critical materials for strategic materials without in any way affecting the quality and efficiency of the finished product is also commendable. The nation faces an acute shortage of strategic metals. Aluminum, copper, zinc, nickel, and nickel bearing steel have already been placed on the priority list. We must all do our utmost to make them go further and last longer.

America's mining, refining, and transportation facilities are working at full capacity in an attempt to keep the supply of vital raw materials flowing. We cannot hope to obtain materials for non-defense manufacturing until the requirements of our defense industries have been met. Therefore, as is constantly being pointed out in your "All Out For Defense" Quality Program, it is of supreme importance that we conserve materials now as we have never conserved them before. Every piece of blank stock that we feed into a machine must turn out its allotted number of high-quality parts. Every finished device must be assembled with highest quality workmanship. Above all, we must eliminate spoilage of raw material wherever possible, thus conserving our limited supplies for the important work of the months ahead.

H. L. ERLICHER,
Vice-President in charge of Purchasing.

ACTION IS NEEDED

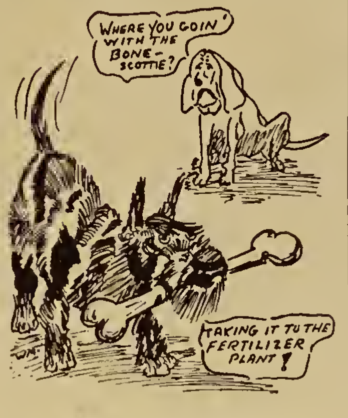
When we experience a complaint and repairs to an article are required, such repairs must have precedence in our manufacturing departments.

DON'T FORGET someone is anxiously awaiting the return of that motor, transformer or part. It may be holding up Defense Production in our customer's plant.

DOUBLE AWARDS FOR AUGUST

"GIVE ME AIR!"

Is a good request when conditions around your place of work become conjested so that the parts you are working on cannot be properly handled without causing spoilage and damage to quality.



WHERE YOU GOIN' WITH THE BONE-SCOTTIE?
TAKING IT TU THE FERTILIZER PLANT!

CONSERVING MATERIAL
BY GOSH

Tool Planning And Design Paramount

Our General Tool Division is continually looking for better ways and means of conserving materials, not only in the various alloyed metals that are used in making the tools, but also in the materials that are used for the parts that the tools produce. Conservation of restricted production materials, such as copper, bronze, brass, steel and aluminum, requires the utmost in thought in tool planning and design for the various dies, jigs, and fixtures so that such materials may be well utilized.

Generally all tools require consideration so that material costs may be reduced but some of the real opportunities for material utilization are embodied in the work produced with punches and dies. Production requirements, of course, have some bearing on the type of tool but in most cases the savings realized from nesting or grouping of punchings well warrant the added expense of more elaborate dies. Nesting permits the reduction in width of material per individual piece and is a big factor in material saving.

The design of the product quite often has an effect on the layout of the tool and through consultation with the engineers we are able to change the design of the product to permit the production of parts with practically no material waste.

Material utilization is such an important factor during this National Emergency that it requires the constant attention and co-operation of the Engineering and Planning Departments and Tool Division so that the best utilization of material may be accomplished.

C. A. Brenner, *Supt.*
General Tool Division.

G.E. Purchasing Dept. Predicts Defense Program Will Make Materials Harder To Get

Conservation of Materials More Important Than Ever Before

Many reports are being received from our Purchasing Department outlining the difficulties being encountered in the procurement of raw materials. In the statement printed on this page Mr. H. L. Erlicher, Vice-President in Charge of Purchasing, has stressed the importance of making our present limited supply of raw material go farther and last longer.

The buyers in the Purchasing Department with their many contacts with various sources of supply, are making every effort to get us sufficient raw materials so that we can continue production on all the devices now being made at the Fort Wayne Works.

It is increasingly important that all of us find ways of saving materials and reduce spoilage to a positive minimum. Due care should be exercised by our engineers in specifying the size, type and quality of materials to be purchased. Our Production Organization must be constantly on the alert to give the proper description as well as the size of the material required and designate the highest available Priority to procure the materials. Many items of raw material now ordered for stock cannot be obtained from vendors unless definite Priorities to specific jobs are provided.

The Order & Stores Dept. in our contacts with vendors are constantly referring to our quality requirements. When materials are received proper planning for material handling and storage must be provided to preserve quality and eliminate waste and spoilage.

N. S. Tilman, *Supr.*
Order and Stores Dept.

We Cannot Stand Idly By

In these very turbulent times, which exist throughout the world —a time when the very existance of our democracy is at stake—it behooves us to do our part to maintain the freedom of which we are justly proud. To attain this end, we cannot afford to stand idly by.

Industry has for some time realized the seriousness of the entire situation.

The greatest of all problems is the scarcity of materials, and to this end a campaign has been inaugurated for the all-out drive for the conservation of this vital necessity. In an effort to carry out the program of the government of arming to the hilt, to protect us in our way of life, materials are of the utmost concern.

We who constitute the millions which make us a nation, free and independent, based on a system of free enterprise, cannot stand by and see a great portion of our sorely needed materials wasted or spoiled and eventually heaped on the scrap pile.

During recent months we have read in the metropolitan papers, as well as our local dalies and our own Fort Wayne GENERAL ELECTRIC NEWS, that the General Electric Company is wholeheartedly in accord with the program of the government.

To this end our Works has inaugurated the DOUBLE AWARD MONTH, soliciting suggestions as to how we might conserve materials, not from a selfish point of view, but from one of necessity, to make certain materials available to adequately carry out the Defense program are fabricated without any undue waste.

Individuals who go to make up this vast Fort Wayne Works organization, I am certain, will cooperate in the drive for the conservation of materials, the reduction of spoilage, and maintain the Highest Quality in our Product.

As to the Specialty Fractional Horse-Power Motor Department we are confident that we bespeak the attitude of the entire organization—we will do our part.

O. J. METTLER, Supt.,
Series & Spec. Motor Dept.

Have You Turned In Your Suggestion

QUALITY

A General Electric Tradition

Throughout its history, the General Electric Company has been noted for the excellence of its products. High quality, maintained over a period of years, has contributed in no small measure to the attainment of leadership in the electrical industry. For many years a slogan suggested by the initials G. E.—"Guarantee of Excellence in Goods Electrical" was given wide publicity. The slogan now is—"More Goods for More People at Less Cost". We must recognize the danger of having the necessity for high production and low cost become uppermost in our thinking to the exclusion of the matter of quality. If all of the pressure and effort is concentrated on the tangible items of "More Goods" and "Less Cost", then the intangible item of quality is likely to suffer unless we are all continually on guard. Each engineer, draftsman, superintendent, foreman, and workman should recognize his individual responsibility. Each should constitute himself his own inspector and ask himself—not—"Will this get by?"—but—"Is this as good as it is intended that it should be?"

Quality is of paramount importance at all times and especially so at the present time. On commercial products, months of sales effort, careful application, and skillful design may be completely nullified by failure due to careless workmanship. On defense products, it should be realized by all that failure at a crucial time due to some undiscovered bit of careless workmanship of any kind may endanger the lives of young men who are now fighting or who may be called upon to fight for the preservation of the liberty and the way of life which we now enjoy.

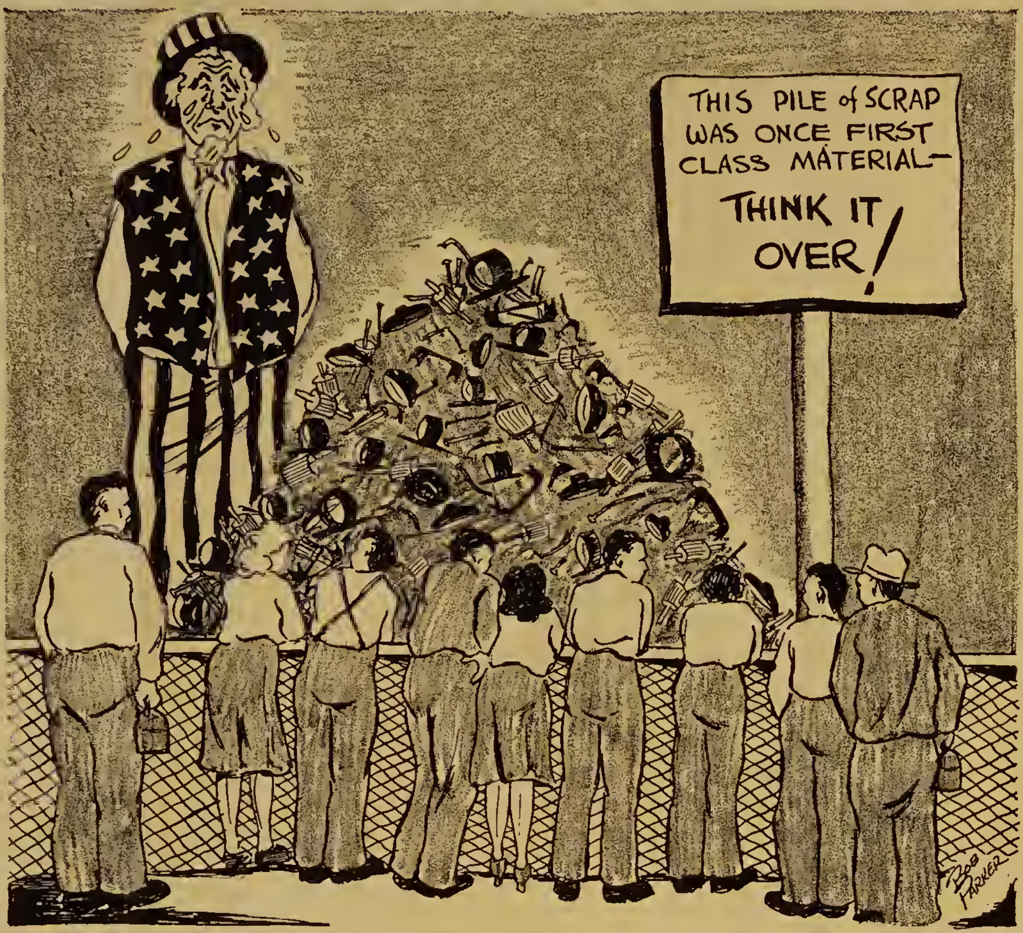
Reduction in waste and spoilage and the conservation of material are laudable enterprises and are of the highest importance, However, they should not be considered as primary objectives. It is conceivable that statistical improvement in these items could be obtained by depreciation in quality of the finished product. The primary objective should be the attainment of high quality. The achievement of this goal will automatically result in reduction in waste and spoilage, and in the conservation of material. These, in turn, contribute to uninterrupted production and low cost. In the long run, the best job will result in the lowest cost.

P. O. **Noble**, *Engineer*,
Fractional HP Motor Dept.

YOUR IDEA

May improve some part of our work so that we can conserve material or reduce spoilage.

You still have 16 DAYS during which you can receive Double Awards by submitting them on the special suggestion blank.



THIS PILE of SCRAP WAS ONCE FIRST CLASS MATERIAL—
THINK IT OVER!

Conservation Of Materials

By R. O. **Dunfee**, *Secretary*
Works Cost Reduction Committee

How much do we take for granted?

Surrounded as we are by everything to make life pleasant and easy in this land of plenty, it is not surprising that we have come to believe that there is a never-ending supply of materials to make our present standards of living possible.

Until the recent world crisis we have taken for granted that there is and always will be the resources necessary to furnish our manufacturing establishments with the raw materials necessary to provide for us not only the necessities of life, but also the luxuries to which we have become accustomed.

At a time when such thinking has resulted perhaps in habits of extravagance and unnecessary waste, our government needs an overwhelming amount of supplies heretofore used for commercial production; and many of us find ourselves wondering whether the relatively limited amount of raw materials can after all supply the products needed for the defense of our land without causing commercial production to suffer too greatly.

The demands of the defense program must and will be met. The extent to which these demands affect commercial production is controlable in no small part by the individual worker.

Much can each worker save if he would conscientiously apply himself to make the most of the material with which he works. A small bolt tossed into the scrap because of faulty workmanship may not seem important to the individual who discards it, but at the same time if each worker would discard no more than that, the daily volume of waste would be enormous considering the large number of people now employed at the Fort Wayne Works.

The value of the material scrapped during the first six months of this year at this Works alone equaled the cost of more than 30,000 washing machine motors. We are all agreed that defense production must not and will not feel the loss of this unnecessary waste! We should each ask ourselves this question: "How much did my carelessness contribute to this volume of discarded material so badly needed if our stores are to supply us with the products we have learned to accept as essential to our present day standard of living."

As the accumulation of individual waste adds up to such a stupendous sum, a like amount could be saved by the combined individual efforts to conserve material which could be utilized for commercial purposes.

When we realize that the quality of each link determines the strength of the chain—and that the strongest democracy is no stronger than its individual citizens, we can see the importance of our responsibilities as individuals in the conservation of materials.

DON'T MIX YOUR DRINKS!

Or should we say Don't Mix waste materials as they are worth a great deal more when separated.

Waste materials such as trimmings, slugs and shavings carry a relative value to the raw material from which they were made.

We reduce losses when we keep waste material clean and identified so that they can be sold as aluminum, copper, iron, steel, tin, lead or any of the alloys they make up.

Highest Awards in Past Have Been for Suggestions that Contribute to Conservation of Material

One of our empoyees, yes, mayb several of them, are going to turn in a suggestion that will make a nice saving of material, and b awarded a substantial sum for hi idea. Won't he or she be tickled with the additional award that they will receive on account of *August Double Award Program for Suggestions.* Suggestions on the conservation of material, such as: a narrower sheet, better layout of punch and die, smaller diameter stock, less cut-off waste, etc., are some types of suggestions that have brought major awards in the past. We need many such suggestions at the present time, as it is necessary that we conserve every ounce of material that we have or it will be possible to obtain in the future. This is particularly true on material which is used for non-defense production which may be badly needed to keep our good customers shops' running.

Many of the major items of material that are an absolute necessity in electrical manufacturing are already on the priority list and many of them cannot be obtained unless they are used in order to further the National Defense Program. Our engineers are working hard to find substitutes for many of the vital materials, and many of these substitutes as in the case of copper being substituted for aluminum, have now been placed on priority. Never before, in war time or peace time, has there been such an urgent need for the adoption of drastic measures to stop spoilage and to conserve the raw material we use. Can't you think up some suggestion that will not only pay you a Double Award but will help us to reduce spoilage and conserve materials?

Stop Those Over-Runs

By A. F. **Vinson**

Recent inventory control regulations established by the Office of Production Management, Washington, D. C., have been placed into effect to conserve the supply and to direct the distribution of all materials entering into the Defense effort. With material required for commercial production at a premium, it is essential that we conserve our material wherever possible so that we can secure maximum utilization at all times.

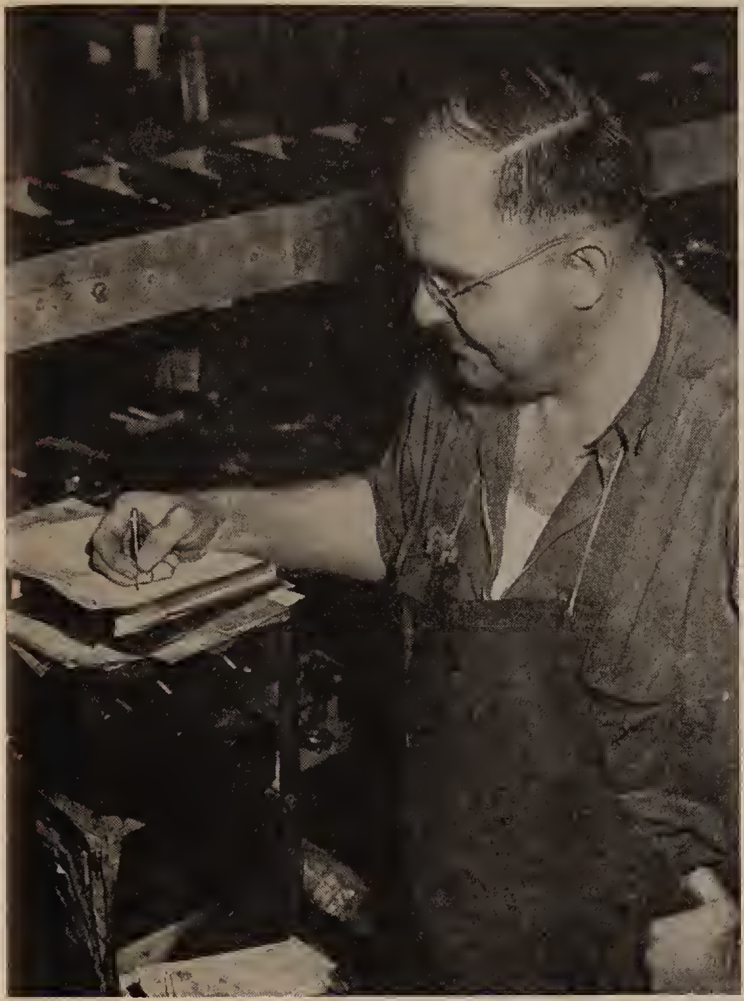
In line with a full material utilization program which we must adopt is the problem of production over-runs. Procedures have been established and are in effect to provide for current consideration of these over-runs, in order that the cause of such over-runs may be analyzed and so that any excess stock allowances or other irregularities may be corrected. When the possibility of future use warrants retaining production over-runs, such as during the present emergency, procedures of this type are essential so as to assure disposition to the best advantage.

The over-run problem in a plant of this size must be dealt with in our most aggressive manner. Idle unrecorded, accumulated stocks of this type represent a worthless investment which serves no one in the organization. Thus in this time of National emergency when material procurement is in the most difficult stage, everyone's co-operation is solicited to:

1. Order the correct number of parts. Establish accurate minimum spoilage allowances.
2. Produce the exact number of parts on order. Establish accurate counts; control automatic machine production.
3. Bring to the front under full light all those parts manufactured in excess of exact requirements so that an intelligent decision can immediately be made as to its disposition.

Build Better Products – Not Bigger Scrap Piles

They Made Suggestion Records During First Half Year



Suggestion Awards

(Continued from Page 1)

submitted by employees showed an increase of 1,151 over the corresponding period of 1940. The percent increases in suggestions was much higher than the percent increase in employment. With the full realization of every employee of the importance to conserve and utilize to the utmost, the stock of raw materials we have in our plant at the present time and that we may be able to procure in the future, it is anticipated that the suggestion record for the last six months of this year, will exceed that for the same period of any previous year.

A few outstanding suggestors for the first six months of this year are pictures above.

In the first six months of 1941 Frank Brindle, of Bldg. 19-5, was high man in the Works for the largest number of suggestions awarded. He had 13. Wilbert Putt, of Bldg. 6-B, was high man for suggestions submitted with 30 to his credit. Donald B. Poland, of Bldg. 26-3, received the largest amount of awards with $130, and the largest single award was $125 paid to Clarence Amones of the Power House.

A glance at the pictures on this page will tell the story of an award of $100 paid to Paul Noffze, of Bldg. 26-B. At left Mr. Noffze fills out the Suggestion Blank when the idea to make a better die for fluorescent ballast cases comes to him. Then in the next picture we see the suggestion being considered by the transformer committee and in the picture below it is receiving further study. The three bottom pictures explain themselves.

Top left—Paul F. Noffze, $100 award.

Top right—Specialty Transformer Suggestion Committee: K. L. Breidenstein, C. F. Tagtmeyer, W. K. Williams.

Right center—Roe Armstrong and Roy Dierstein inestigating and developing the Noffze suggestion.

Lower left—Frank Brindle, largest adopted number.

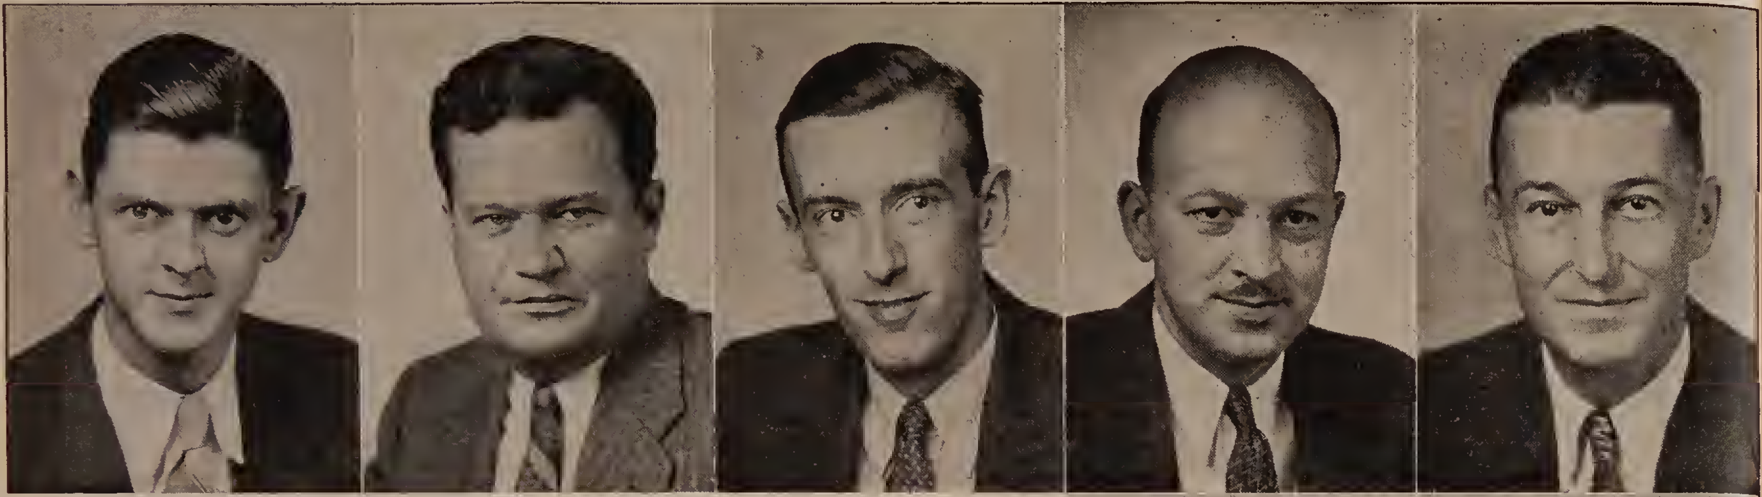
Lower center—Clarence Amones, largest single award, $125.

Lower right—Donald Poland, highest total award, $130 on three suggestions.

H. L. Erlicher Named On Newly Formed OPM

Harry L. Erlicher, Vice President of the General Electric Company and also in charge of that company's purchasing activities, has been named a member of the Defense Industries Advisory Committee of the Copper and Zinc Industries, a division of the Office of Production Management. The appointment was announced by Sidney J. Weinberg, Chief of the Bureau of Defense Industry Advisory Committees.

Seven Employees Assume Supervisory Positions



Top row, left to right—E. C. Throndsen, W. E. McKay, Norman Bender, T. H. Gugler and G. J. Nicole. Below, left, D. M. Irwin, and right, L. L. Bergevin.

The advancement of seven employees to supervisory positions was announced this week. They include T. H. Gugler named supervisor of costs in Bldgs. 4-2 and 4-3. G. J. Nicole named foreman of test and assembly overload and switch in Bldg. 4-3. W. E. McKay, in charge of planning and wage rates in Bldg. 17-1. E. C. Throndsen, in charge of production and stock in Bldg. 17-1. D. M. Irwin, assistant foreman of test, inspection and assembly on second shift in Bldg. 4-4. L. L. Bergevin, assistant foreman of winding on second shift in Bldg. 4-4 and Norman Bender, foreman of the second shift in Bldg. 17-1.

Mr. Nicole has been an inspector on the small lot section of the General Purpose Division since its inception. He began work at the Fort Wayne Works as an inspector in Bldg. 4-5 in 1925 and has served in that department as well as Bldgs. 4-2 and 4-3 since that time on inspection and test work. He was appointed assistant night foreman in Bldg. 4-3 in 1936.

Mr. Gugler entered the service of the Company as a student engineer in June 1929 following his graduation from the University of Nebraska. In the early part of 1930, he was transferred to the General Purpose Fractional Horsepower Motor Department as a process engineer and planning man, which position he held until 1934, when he was made assistant general foreman in Bldg. 17-3. In the forepart of 1938, Mr. Gugler was assigned to special cost reduction work. Following this, he was transferred to the Motor Generator Cost Department to aid in the setting up of the new standard cost system. In March 1940 he was assigned to the Central Cost Department as cost analyst, following particularly, cost reduction and estimating work, which position he held until his recent appointment.

N. A. Bender completed the machinist-toolmakers course in 1930 and was assigned to the Fr. H.P. Motor Developmental Department. In 1933 he was transferred to the Refrigeration Division and later to the Tool Department in Bldg. 17-4. In 1937 he was transferred to Bldg. 17-3 on tool and equipment work and in 1938 to the Tool Maintenance Department in Bldg. 17-1.

Mr. Throndsen entered the G-E test course as a student engineer following his graduation from the Polytechnic Institute of Brooklyn in 1939. He served on test at the various works of the Company before coming to Fort Wayne. He was assigned here to Motor-Generator test in Bldg. 19-1 and later to the Plant Engineering Department. In 1940 he was assigned to the Fr. H.P. Motor Production Department in the raw material section and on special defense assignments.

Mr. McKay's service date is December, 1925, when he enrolled in the Apprentice Training School. He was transferred to the General Purpose Fr. H.P. Motor offices and served in various capacities. For the past eight years he has been employed in Bldg. 17-1.

Mr. Irwin, 4026 South Wayne Avenue came to the Fort Wayne Works in 1922 after completing the Cook electrical course at Chicago. Since that time he has served as an instructor in the test and inspection department.

Mr. Bergevin was employed on inspection and test in Bldg. 4-1 in 1926. He continued in this department until assigned to instruction training in Bldg. 4-5 in May, 1937. Later he was assigned to machine set-up and supervisory work in Bldg. 4-1 and he has continued in this work in Bldg. 4-4 until his present appointment. Mr. Bergevin resides at 3124 Reed Street.

News From The Camps

(Continued from Page 2)

Dear Folks:

I had it pretty easy today. This morning we went over to Fort Logan in Army trucks for revolver practice. Those trucks are not easy riding, but in spite of the ride and dust from the roads, we enjoyed the scenery very much. Fort Logan is around 10 miles southwest of here. Due to the high altitude and rolling country without many trees, one can see for many miles. The trees are scattered all over and they are small and bushy. I hope you can see it sometime; it is different.

They set up targets in the pit of a hill about 15 yards away from the point of firing, and we each had 10 shots with a 45 automatic. I felt kind of shaky with such a deadly weapon in my hand. A perfect score is 100. A good score was around 70. I got a 31 which was among the lower scores. Of course this was the first time I ever shot a gun.

We are supposed to go through the gas chamber here this week some time and try out the gas masks. They are supposed to furnish protection for any known gas, but they just use tear gas in the chamber here when tryouts are made. We are supposed to have a review on the runways Saturday. I don't think we will have a whole lot of drilling after that.

I am receiving the WORKS NEWS from the G.E. so you won't need to send it to me any more. I appreciate it very much.

Eugene Carmichael, whose bed is on my right, is 24 years old and is from New Castle, Indiana. We get along pretty good. The fellow above me is married. He sold his garage business when he came into the Army. The fellow on my left is 30 years old. He received his questionnaire last September, but he has only been here about one month and a half. Max VonIsser, the National A.A.U. swiming champion is in our barracks. I haven't seen him yet, but I hear him sound off every morning at roll call. To sound off means to answer when your name is called, that is, if you can understand it. Such answers as Here, Yah, Yeah, Hey, a grunt, etc. are usually given. I have been called Kreidt, Crete, Credit and probably several variations if I could remember them. Usually I don't know whether they are calling my name or someone else's. I am enclosing a photograph of some scenery around here from the newspaper. I hope you like it and write soon.

Andrew Kreidt,
3rd School Sq., Air Corps
Lowry Field, Colorado.

Dear Editor:

I received your letter asking me if I would like to obtain the WORKS NEWS here in my camp. I would be very happy to have the WORKS NEWS sent to me here in the army. I've always enjoyed reading the paper very much. I would like to keep in touch with the things happening in the General Electric Co., and to my friends who work there. I'm not going to write a letter on my camp life right now, but I will later. I can say right now I don't care a whole lot for this life and would much rather be home with my folks. I will appreciate having the WORKS NEWS sent to me and I feel a lot better to know my company hasn't forgotten me.

Co. A 60th Q. M. Laundry, BN.
Camp Livingston, La.

News Around

Shorts From 6-B

Ralph Hamilton, well-known ex-South Side basketball star, is keeping in training juggling capacitors in Bldg. 4-B. However, we understand that his diet (?) of ice cream and pie has affected his weight, and he has difficulty in finding a box strong enough to support him. The shampoo of pie a la mode last week should convince Ralph of that. . . . Fred Thompson insists the new electric clock is a major improvement over the alarm clock formerly used. Fred says time passes much easier now. . . . Elmer Hart, Bldg. 6-B trucker, wishes everyone to know that the cutest baby in that group picture carried in the News-Sentinel was his offspring. For details see Elmer. . . . Eddie Krick, Bldg. 6-B, who can tell many interesting stories relative to World War No. 1, spent a day unloading steel tubing with his new electric truck. Ed says he was a little homesick from looking into so many "gun barrels." . . . The latest recruit from the Bldg. 4-B ranks is Tom Wagner from Bill Walt's department. Bill laments, "why don't they draft for the navy, then I could give them painters." Can you picture Tom as a "gob"? . . . Ruth Franzdorf, Ohio's gift to Ft. Wayne, has certainly proven the rule "A woman changes her mind." She has changed her vacation plans from Mexico to Mississippi to Michigan. Of course, it's purely coincidence that the draftees are shifted from camp to camp also. . . . Mystery: Why doesn't "Butch" Vegalues go fishing with Bill Walt any more? . . .

Bob Wilson has developed a sure system of curing any gambling instincts. If you win a dollar, you receive a penny a day until you either swear off, go balmy keeping records, or as a last resort, get your money. For developments see Ray Epperson, Ted Miller, "Red" Renbarger, Mildred Akers or Cliff Hosier.

John Deahl, Bldg. 4-3, is giving his new fire wagon a big work out. The only trouble is that all his fires are only burning grass.

John Trim, Bldg. 4-3, is in a big tizzy and the reason for this is the announcement that some of the citizens of Waynedale are trying to have that community incorporated as a city. John states that if this should come to pass he will run for mayor on the G. & P. party ticket. "Good & Punk." Nice going, John, we all wish you luck.

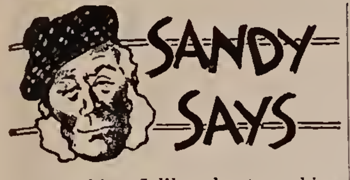
"Popeye" Patterson, Bldg. 4-3, reports he is rapidly proceeding with his new romance.

Beulah Wooley, Bldg. 4-3, tangled with a piece of pie at the cafeteria recently. After juggling it around in the air for several minutes, Beulah finally lost out. One dress to the cleaners and one pair of hose to the laundry.

Lillian Bergman, Bldg. 4-3, had a birthday August 6th, and she was so surprised when Julia Martin, Martha Ruhl, Sylvia Bowers, Dawn Hunt, Ester Grogan, Roxanna Richey, Marjorie Dowty, Edna Wolf, Pat Monroe, Ruth Lauer and Eileen Stemmler, all of Bldg. 4-3, remembered her with a lot of lovely birthday gifts. We bet she won't forget her next birthday.

Beware, girls, of letting Frieda Ramm, Bldg. 4-3, repair your shoes, as she says hers squeak since she fixed them.

NEWS THROUGH THE PLANTS



"One thing I like about working in my home workshop", said my cousin Colin, whose workshop consists of a bench made from G-E kindling wood, tools from junk yards, sandpaper from the alley back of a carpenter shop, and nails from the G-E kindling wood, "Is that I can enjoy first hand, the fruits o' me hard labors."

Weel, he's right. It's nice tae be able tae admire the finished product that we have created. But the trouble is that we can't always do this. And I don't mean the thing isn't fit to admire—I mean that we don't always get tae see it.

How many prosaic motor parts do we turn out every day that go into beautiful shiny airplanes, streamline trains, or meat grinders, that we never see or how many transformers that go into battleships that we'd gie our right leg tae cruise on?

Weel, ye see what I mean. Sae many o' us never get tae see the finished product that we are strongly tempted tae get careless o' our duties.

We are tempted tae believe that our own little part in this whole big program is very small, and we'll never hurt anyone, or cause any trouble if we do get a little careless.

But we don't dare let the little two-horned guy bother us. We gotta keep the whole picture in our minds. That beautiful Battleship, those Graceful Flying Fortresses, those Roaring Fire-Spitting Tanks—all are the finished products that we are helping tae build. And don't think I'm dreaming, either. Right here we are making lots o' parts for these defenders o' our Country —or for the factories that make them.

Just remember, a Battleship, an Airplane, or a Tank, is made up o' a bunch o' little details, no one o' which may be very important, but —details are not important as long as they don't go wrong—but—Hoot Mon—they are when they do!

Ah yus—Details are always important—even when Cousin Colin ran over a chicken and nearly threw us all out o' the model T — they are.

"Colin", I said, "How could a chicken cause such a bad bump?"

"Weel, Cousin", he answered, noting every little detail o' the catastrophy, "Nae wonder—it was a Plymouth Rock."

Deaths

Harry T. Mumma, an employee for the past twenty-one years and during recent years employed in Bldg. 4-3 died on August 8. He was a veteran of the World War and a member of the Disabled War Veterans. Funeral services were held Monday with burial in Lindenwood cemetery.

Betty Jean Buchanan an employee since April of this year died August 7, following an appendectomy. Miss Buchanan was employed in Bldg. 26-3.

Congratulations to Marion Jean Betts, Bldg. 17-2 who will become Mrs. Walter E. Thorne tomorrow. We wager that Kenney is beginning to feel his age a bit. Gosh a daughter married, and she was just a young 'un a short time ago.

4-2 Windstorm

Did you know that our Fire Department was training the fairer sex in the manly art of fire putter-outers in the event that all of the men were called to the Army. I saw Marge Linsey climb on a chair and huff and puff until she got very red and very hot and bothered at an electric fan. At first I thought she was trying to out-blow the fan but upon a second look, the electric cord had shorted and was on fire. Poor Marguerite, all her efforts and good wind were a loss, for the cord burned in two anyway.

Margaret Woodward, Bldg. 4-3, has found a new way of keeping cool in the cafeteria these days. Just ask her what happens when you put a window up and it comes down —bang!

SECOND TRICK STAG

The gang from Bldg. 26-3 enjoyed a stag party at George Shafer's cottage on Sylvan Lake. Max Beckler and Carl Hapner went swimming with their clothes on. Doesn't that make them members of some well known club? The motor boateers George Shafer, Dean "Popcorn" Lockwood, John "Rootbeer" Grandy and Darrel Hirschfelder really threw a mean wave—that is after they got the motor started. Have you ever walked back from a boat ride? Max Beckler did. Bill Holloway gave a good horse laugh until he had to take Max back to where the boat was tied with a stalled motor. It was a swell party and the only complaint we have heard of was the shortage of ham.

19-4 Spot Jottings

It was truly a moving sight, the last two weeks, to see the boys from the model shop assembled outside and patiently waiting for someone to unlock the door so that they could rush in and be all ready for work at 8:00 o'clock. You see Maurice Crowe, the keeper of the key, was away on vacation so the unlocking job fell to Cal. Cal got into the habit of trudging down to the watchman for a key each morning. Maurice got back Monday so everything is under control. . . . We understand that Art Horstman is an authority on the rising prices of certain commodities. . . . Congratulations to Kenny Deahl on his recent marriage.

We hear that Billy Overmeyer, Bldg. 6-B, cannot step from a boat to a pier without getting muddy, wet and bruised.

It Was A Very Wet Party

As anyone can see the party held by a group of second shift girls in Bldg. 26-3 was a very wet affair. The one picture shows the gals after they were thrown in the lake before having a chance to don bathing suit and the second picture shows them all prepared for the next ducking. The parties are a weekly affair and the girls are Marion Trumbower, Esther Walda, Lois Miller, Mildred Snyder, Maxine Schultz, Garnet Dunlap and Aileen McKienze.

Sunbeams From 17-4

Bob Boone says that his wife, Lenora Boone, of Bldg. 4-4, has added a new line to the "Daddy" song, and it goes like this: "Daddy I want a brand new sewing machine."

Thelma Oswald and Inez Geisler are about to hang out a shingle which will read like this: "Fresh fish right out of the lake, will also fry them".

Marjorie Rice is starry-eyed these days, and it is from looking at the new diamond on the all-important finger.

The Ki Cu Wa club gave a surprise shower for Mazie Greek, a bride to be, Sept. 14th. The party was held at the lake cottage of Sue Cameron at Big Long Lake, those present were: Lois Miller, Mildred Atherton, Alvena Greber, Margaret McMaken, Margaret Koch, Merle Kirkpatrick, Rosamond Schooley, Eileen Foor, Belle Buchan and the hostess and honor guest.

Well next week this time this reporter expects to be cooling her heels in the far regions of northern Michigan, so for two weeks I will say so long and keep your chins up, way up.

Thought for the week: Never expect the other fellow to do something you wouldn't do yourself.

Granny.

Since "Popeye" Patterson's Bldg. 4-3 girl friend has been transferred to the second shift, "Popeye" has trouble getting to see her, as all the other boys are in the grand rush.

Winter Street News

We've heard of people getting an earful, but Herm Norr really did and has the evidence to prove it. He went to sleep with an earache and in the A.M. went to the nurse. She dug out a nice big black bug. Herm has the deceased lil' bug gently reposing on a bed of cotton as incontrovertible evidence.

W. J. Hohman of Camp D 87th Inf., of Camp Roberts, Calif., sends a letter to his friends.

Hello gang—How is every one? Am in best of health. The weather here is hot but cool at night. It could be worse. Had a few rounds with a pistol last week and made marksman. Shot the rifle about two weeks ago but didn't do so well.

I hear from home that Winter Street is going great guns. I hope it keeps up. There are quite a few men from Fort Wayne at this camp. In fact, there were about 100 of them came at the same time I did. Since then we have been split up pretty well. All the gang are pretty good eggs and we have a lot of fun. The hours aren't so hot though. Up at 4:40 A.M. and to bed at 9:00 P.M. I didn't think I would ever go to bed at 9:00 o'clock but if I stay up longer I get awful sleepy. So far we have been marching about 10 miles a day so I get enough exercise.

Well folks will write later, as ever, Whitey.

Harlow Lammiman has a novel way of paying his noon euchre losses. He sells the boys eggs and then deducts the losses from the price of the eggs. Wait till the chickens hear what's going on.

From Bldg. 26-3

A group of nine girls tendered a farewell supper for Fern Bitler last Thursday evening. Fern will be preparing meals for the hubby instead of testing coils for the General Electric. Kay Valiton brought on the dessert—kisses (candy, however). Such a disillusion—tsk, tsk, Kay.

Most people like their fudge hard, but Hilda Hippenhammer is an exception. She'll take her's spoon fashion. She claims it's all in the way you're used to it and we insist that all she needs is a new recipe.

Virginia Walling, when asked for the best method of keeping her dog white says "don't get him dirty." But pressed for further information she said "I wash him in Ivory snow" and pin him back on my lapel. Cruel Virginia.

It is funny how the heat affects some people. Poor Marguerite Fisher has been writing letters to herself. We're wondering if she has received an answer from herself?

Doctor (after examination): "I must tell you frankly, madam, that I don't like the looks of your husband."

Patient's Wife: "Well, I admit he's not handsome, but he's very good to me and the children."

The husband answering the phone said, "I don't know; call the weather bureau," and hung up.

"What was that?" asked the wife.

"Some fellow asked whether the coast is clear."

From The *Feminine Viewpoint*

By Irene Perry and Hilda Barthold

August is the month for fur sales, so we thought we'd give you the benefit of our browsings through stores and fashion magazines on the subject of furs.

We have learned that brown is the season's best color for furs; black and gray are good too, but brown is definitely the most popular, ranging in shades from biege to cinnamon. Those who know, say that it is wiser to buy the best type of any kind of fur, choose the best quality obtainable in a moderate priced fur rather than second or third grade of an expensive fur. Select a coat having good lines in the correct size. The lining should be attractive and durable.

Some of the popular priced furs are opossum which is sturdy, long wearing and light in weight; squirrel, soft, pliable and requires a certain amount of care; coney or lapin which comes from none other than our old friend the rabbit; muskrat, a truly American fur which wears well.

The wearing quality of any fur depends on the care and consideration they receive. Hang your fur coat on a padded or rounded wooden hanger with wide ends, and don't jam it into a crowded closet. Clean it frequently with soft tissue or towel, especially about the neckline, brush very gently and then very seldom. Never use cleaning fluid to remove spots.

If your fur coat is long, unfasten it before sitting down and smooth the edge beneath you, never allow the hem to be crushed under your weight. Do not dry your furs near a radiator or heat of any kind, hang it in an open space where air circulates. Have small rips or tears repaired immediately and have furs cleaned and glazed at least once a year and send them to a reputable storage place during the summer.

Don't worry little girls, if you see the raging flames coming your way, all you have to do is shout for CHIEF Bob Lehman, of the Bldg. 4-2 Winding Dept., and he will rush to the alarm box and call five of the city's fire trucks, besides the Works fire department. Then he will rush the Pirene gun to the blaze and excitedly squirt the whole contents all over your legs and dresses and miss the blaze entirely and then you will have to put it out yourself. Anyway, you girls got a breath of fresh air out of it, but at what a cost. Will Bob ever live it down? The fire—Oh, it wasn't any larger than a 10c store cigarette lighter.

As you all know, there was a little pamphlet issued on "Rabies." Dorothy Goshorn, Bldg. 4-3, seemed very much interested in it, and after reading awhile said, "Sure awful to feel like that." After reading a little further said, "Well, what the heck, is that getting contagious, too." After turning back to the first page she discovered it said "Rabies" instead of "Babies." Better get your glasses on next time Dorothy.

NEWS THROUGH THE PLANTS

Borings From 4-4 Office

Sorry I couldn't have been with you last week, but duty called me elsewhere. I got my examination to go to the army but they wouldn't have me 'cause of my athletic toe and flat feet. So I guess I can continue here and render my services in the defense industry defending my honor. So much for poor excuses of being lazy. . . . Art Wedler and Bob Spitler are both in the same class. That of the scarface. I just wonder if both received their marks for life in the same manner? I know how Art got his but the present mystery is how did Bob get the cut on the nose, chin and hand? . . .Wasn't that a "purty" picture of Harry "Bil"l Edmunds, new night foreman of Bldg. 26-3 . . . Don Niles is back after his vacation, much rested and what have you. After his most recent visit to the barber getting not only his ears but his head set out and what I'd call a pig-shave, he would just love to go in hibernation until his hair grows out. . . . Charlene Snyder is on her vacation up at Barbee Lake. She and her husband are spending their week with Ardeth and Jack Hemp. Ardeth is a former co-ed of our office. . . . Esther Allar is back bag and baggage. After a wonderful trip in northern Michigan, she has a beautiful tan and says that she didn't miss a thing. . . . Pauline Young, in one of her weaker moments, took another week-end jaunt to Watertown, N. Y. . . . Jean Bugert was the guest of honor at a luncheon given for her at the Berghoff Gardens. The occasion? Why didn't 'cha hear? She is going to get married August 19. More power to you, and as for the party, all had a grand time. . . . LaVon Price recently went fishing in northern Minnesota and caught the biggest fish that was caught on their trip. It was 25 inches long. It's a lot of fish to have dangling from one little hook. Now I betcha Art Wedler never got one that big. . . . Now all you jitter bugs, here's your chance to "jit." Go along with Virginia to good old Tippecanoe. . . . 'Tis plenty for now, you rug cutters. Sincerely as ever,

Elmer, the Field Mouse,
The Rat to You.

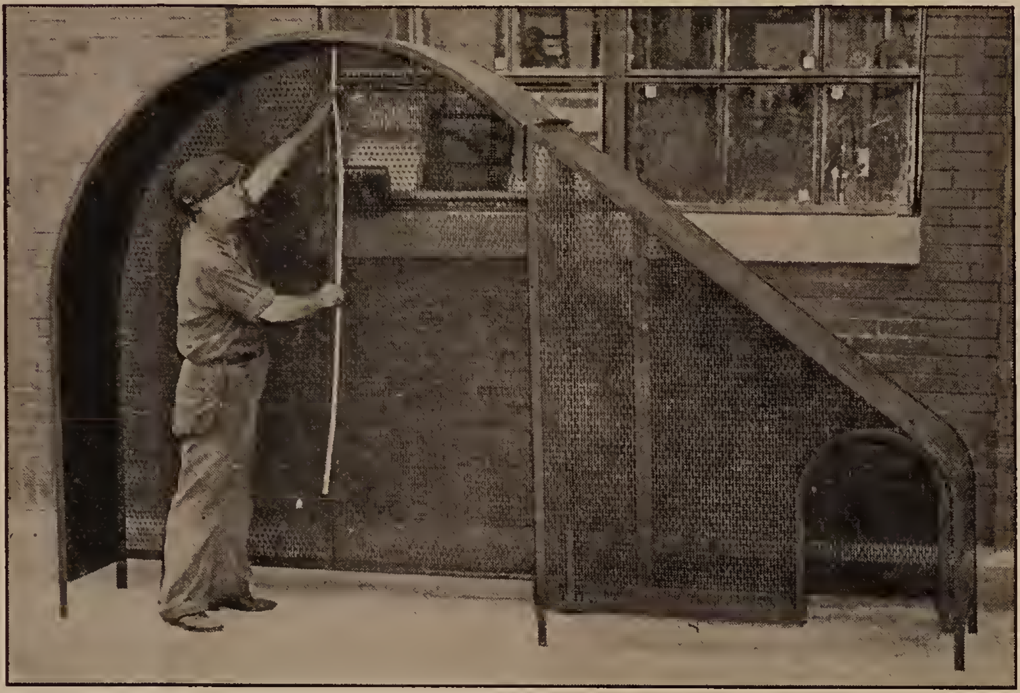
Nibbens From 19-4

Clara Gidley, Bldg. 19-4, is spending her vacation at home . . . Laura Gerber is back to work after having a trip through the New England States . . . Since starting to come in at seven in the morning, Margie Green has to get up at 4:15. We hear that early to bed is certainly hard on her social affairs—especially nightly dates . . . Mary Bertsch is having a hard time trying to locate the one throwing things at her . . . Jackie White believes in "See America First," as she is traveling in Yellowstone National Park, then to Pike's Peak and topping it off with the Black Hills.

John Zimmerman, Bldg. 4-3, made a trip to the Boy Scout camp on Big Island, Rome City, the other evening. John did not leave the camp until late and became lost so completely that he had to call out the State Police to rescue him from spending a night in the wilds. John tells us that if it had not been for the State Troopers he probably would still be driving.

Anyone wishing to know how to fry fish, just ask Valeria Demske, Bldg. 4-3.

The "Daddy" Of Them All



Of the thousands of belt and fly-wheel guards built and installed by our Maintenance Department, the one pictured above is given credit for being the largest. This guard was recently installed on a compressor in Building 15.

Guarding belts and fly-wheels has been a firmly established safety policy of the General Electric Company for many years. Consequently, our last serious belt accident dates back more than twenty years ago.

Those employees who have a part in this continuous guarding program have a right to be proud of this record. Machine tool designers, maintenance engineers, planning men, foremen, maintenance men, safety committeemen and machine operators all have a part to play in this phase of our safety program.

Harry Underwood, Building 20-1 Maintenance Department, is shown in above picture. Harry is a veteran employee in the Maintenance Department and has been doing guard work for many years. His sincere interest in the construction and installation of safety guards of all sizes and applications has no doubt prevented many accidents.

Motor Generator Static

Big "Choke":

Henry Lojeck is one of those individuals that require freedom—freedom of action, thought and speech. As a consequence, when Hank came to work the other day wearing a pair of bright yellow elastic topped socks, he seemed depressed. As the day progressed this feeling became more intense until our hero finally drew forth his trusty knife and removed the elastic tops. Of course the socks were ruined but Henry was happy, for as he remarked "those things were choking me, they were so tight that every time I winked an eye, my toes curled up." Big "choke" we say.

They Make It Again:

"Pappy" Archbald and Walter Histed whose names have appeared in the NEWS quite frequently of late make it again. It was my desire to have at least one issue pass without mention of these two lads, but it seems the fates rule otherwise. The other day our heroes pulled an obvious frame-up on "Old Poison Pen," and then stated that unless I gave this deed the proper notice they would write it up in their inimitable style. I confess they pulled a "honey" and they are receiving the credit they demanded, and—they make it again.

Saying of the Week:

Jerry Frye remarks: "Don't judge others too severely, sometimes your perspective is wrong or your glasses dirty."

Caught In His Own Trap:

Not content with writing an article last week about a certain young lady and a dog, our Bldg. 19-3 poison pen writer, "Honest Don" Shultz ended his theme with the insinuation that another party had given him the information. Still feeling the urge to do some one dirt, he next very carefully snipped the article from the paper. During a search last Monday for a planning book, a WORKS NEWS was discovered tucked away under some prints, said WORKS NEWS having a gaping hole where the literary masterpiece had been. Even before the paper was unfolded, loud cries of "I've been framed," were rending the air, however, due to the presence of a reliable witness, Don has still been unable to wiggle out of his self-created predicament and has been mumbling to himself of dire things yet to come.

Due to the terrible scourge of ants in our city parks, the Park Board is trying to obtain a herd of ant eaters to clean them up. This would entail quite an expenditure of money and place an unnecessary burden upon the taxpayers, so we suggest they enlist the services of Wm. "Beezer" Burke, Bldg. 4-3, who, by the way, is an expert ant eliminator.

A. R. Hall, Bldg. 4-3, is the proud owner of a trim new sailing craft which he can be seen maneuvering upon the waters of Big Long Lake. He is becoming quite expert at handling this boat. We secretly suspect that he is grooming her for entry into the international race for the America's Cup.

Eulalia Spath, Bldg. 4-3, says if any one wants to know how she is getting along with her driving lessons, just ask the streets out in Indian Village. Good thing they can't talk, or perhaps they would say a lot.

Marcel Gaut, Bldg. 4-3, has spent the last three week-ends fishing in Michigan, but the latest report is that he had brought home very little bacon.

Thisa And Thata 19-5

Annabelle Dunlap enjoyed her lunch Friday because she finally got to eat her pet tomato carefully guarded and cultured these many weeks. . . . Several of the girls had a treat the other day when they indulged in a big chicken dinner at Big Lake. The biggest treat was the ride in Frieda's new car. All the girls were careful to clean their feet for Frieda said "one speck of dirt and no more rides." Those present were Edna Rohbach, Alma Lehman, Flo Gilmore, Esther Ehle, Luella Schroeder and Frieda Knoche. Ask Edna what happens when you use too much sugar in your tea . . . We say so long to Esther Oliver who has decided that her new home should have her full time. Good luck and happiness. . . . Wishes for a speedy recovery to Lillie Benz who fell and injured her arm. . . . We are glad to see Richard Beltz and Florence Schim back to work after weathering appendectommies . . . Congratulations to Betty Gross, of Bldg. 19-2 who was married to Bob VanEvery at the Clear Lake Lutheran Chapel on August 9. Several of the girls from white armature attended the ceremony.

Perhaps our readers will recall reading in these pages some time back of an announcement by Forest Whonsettler, Bldg. 4-3, that he would establish a Super-Doggerie east of Avilla. Well, everything has been going along fine at his kennels, in fact too good. It has just about got poor Forest down with the arrival of new dogs and constant care of the puppies, he can get no recreation whatever. Hard work and the loss of sleep are wearing him down to a shadow. He tells us that he is going to have to enlarge his staff of attendants.

Sleuthing In 4-6

There will be some sunshine missing from Bldg. 4-6 from now on. Why? Because Virginia Whipple is leaving us to devote her time to her efforts to become a model housekeeper. The fact that she has the best wishes of her co-workers was evident when approximately 30 of the girls gathered in the Works cafeteria on Wednesday noon, where Virginia was the guest of honor, and was presented with a gift as a token of their good wishes. The little gift was just a symbol of the good things we hope will come your way, Virginia. . . . Welcome to another new co-worker by the name of Howard Reinking. Hope you like it here, Howard. . . . Bob Shirey was back for a visit and looks mighty nice in his uniform. He says he likes it because all he does is "push a pencil and the rest of the soldiers do the work." . . By the way, why did Elsie Mae Swank run to the office door when Charlie Yager told her a soldier in uniform was outside? . . . Georgianna Handlin and Alberta Gollmer, both of Bldg. 4-6, and Kay Miller of Bldg. 19-5 were guests of Miss Pask and the girls of the Service Bureau on Monday night at a combined shower (kitchen shower for Kay and Alberta, and miscellaneous shower for Georgianna). In addition to a delicious dinner at the Y.W.C.A. each girl was presented with a corsage of lilies, plus a number of lovely and useful gifts. . . . If the hot weather gets you down, just follow Wade Tyler's example and go to Michigan. He went there on a fishing trip, and had to go to bed (wearing all the clothes he could find) to keep warm. He caught a cold, some sort of a freak bug, and (so he says) all the fish they could eat. But who can eat when he has a cold? . . . No, it was not sunburn that made Ralph Richard's face so red. Wouldn't your face be red if you snatched a girl's purse from under her arm, only to find that you had been mistaken as to the girl's identity? . . . C. Yager really did things up right on his vacation up north. He went as far as he could via car, train, and canoe. Although the canoe was upset and Charlie lost everything but his shirt, he succeeded in fishing out all the lost articles, plus plenty of fish; and all in all, had a wonderful trip. . . . Paul Lange knows what to do when he fails to make a catch with the old fishin' pole. He goes and buys a nice new outfit, and then goes back and hauls 'em in by the dozens (with the old one) . . . Warning: Gerry Grim is still an amateur cook. At least she knows enough to throw out bread pudding she made with her own hands. . . . Esther Selzer received a new ring as a birthday present. She says it is from her brother's girl friend, but confidentially, if she had said her brother's boy friend we would believe it more readily. . . . When Virginia Selby tackles a job, she gets results or else. When the window refused to close, she simply ran her fist through it. "Cast Iron Selby" she was known as in them days. . . . We've all heard of "The little man who wasn't there." But here's a new one: Maxine Brim tried to sit on the "little chair that wasn't there." For further information, see Maxine.

We hope that some of the girls in the mechanism section in Bldg. 4-3 will help Hazel O'Brien get caught up on her work so that she will be able to go to Big Long Lake again this season before the snow flies.

Become Members Of General Electric Honor Organization

Nine employees are new members of the Fort Wayne Chapter of the General Electric Quarter Century Club. They are, top row, left to right—Homer Meeker, Bldg. 26-3; Oscar Huge, Bldg. 27 and Harlan Voltz, Bldg. 26-1. Second row—Omer J. Meyer, Bldg. 4-2; George H. Graue, Winter Street and Chas. H. Koomjohn, Bldg. 4-6. Bottom row—Alfreda M. Gessler, Bldg. 4-3; Leo J. Nyboer, Bldg. 4-5 and Harry R. Parker, Bldg. 4-3. New members during 1941 will exceed any previous year.

NEWS THROUGH THE PLANTS

Slips And Chips

Sir Viss Bldg. 4-4

The rain we had last week cooled us off a little, but at Herman Lepper's discomfort. Herman was complaining to me (shortly after the rain) that his hat was too tight for comfort. Like wood, his head swells when it's damp. . . . Delegrange has a little goat, and guarded it with his fist. But Charley Meyers came along one day, and the goat said, "So long, Chris." By the way, Charley is contemplating a naming contest to name the goat. Better than that, why don't you'se guys and gals just send in some names. I am sure a prize will be awarded for a good name. . . . We were sitting in the park, when it began to get very dark. Some one began to shout and cry, is Kloepper's car just passing by. The author of these two poems isn't Browning, but one of the boys on the second shift. I think it is very good and hope to have more in the near future. . . . Dale Irwin is in the market for a mechanical horse. One that will not throw him when a lighted cigar falls on its back. Try the merry-go-round, Dale, they won't buck. . . . Al Schonheinz is back from his vacation, but he won't say a word other than he was boat riding on the Great Lakes. Maybe I wouldn't either. . . . The other night I was bragging a little on the performance of my car. When it came time to go home at 3:06 a.m. I proudly walked out to the parking lot and it wouldn't start. While I was bragging on its performance the battery was getting deader and deader all the time (because the light switch was on). It will happen every time. . . . Ewald Stinsmuehlen received a letter from Ralph Hardy who was recently inducted into Uncle Sam's service. He is getting along fine and has good prospects for the remainder of his service. He is a little lonesome being among strangers and would enjoy a few letters from the gang. His address is: Priate R. E. Hardy, 70th School Squadron, Ellington Field, Texas. . . . John R. Heine and Violet Mayen became man and wife some time last week. Congratulations Mr. and Mrs. Heine, we all wish you happiness and success.

Plastic Flashes

Things we never expect to see:

Clarence Favourite without his windblown bob. Grace Funk with a toothache. Lillian Springer without LaMoine. Nadine Cobb without her Oklahoma drawl. Kenny Handchy not chewing gum. Bill Mieners without his "shuffle" walk. The girls not sighing when Tom Cameron waltzes by. Johnny Sowers without a necktie. Earl Ealing giving out with a Tarzan yell. Gene Coulter not trying to scare us gals by acting like the big bad wolf. Joy Stucky without her candy and ice cream. Floradella Amstutz not blushing. Betty Walker with platinum blond hair. Florence Peters being a "bad humor" girl. Bud Gilbert without that curl on his forehead. Wayne Pribble with his hair smoothed down longer than two minutes.

Evelyn Reiling will leave today to spend three weeks' vacation in California. Incidentally, Loretta Mulligan is also spending two weeks in the "Land-o'-Sunshine." We hope both will have a very restful and enjoyable vacation.

Anyone who desires first-class tutoring in whistling should contact Valeria Harber. Her whistling imitation of a buzzer is extremely weak.

We hope that Collette Furge, Bldg. 12-3, enjoyed eating the fish she caught at Lake James as well as she did catching them. How about bringing a few fish with you for lunch the next time?

Both Gloria Prough and Lois Drewett must have enjoyed last week-end as they were unable to make it to work during the forenoon.

Eleanor Plock, Bldg. 12-3, entertained Wednesday evening at her home on Swinney Avenue for the pleasure of Evelyn Porter, Bldg. 12-3 Mica Department, who will leave the company to reside with her husband in Indianapolis. All co-workers were present, and Evelyn was presented a farewell gift.

Marie Smith, Bldg. 12-3 spent her week's vacation at Bear Lake. Everyone wonders what Marie did to get such a lovely lily-white complexion.

The Tillies wish it known that the reason the column has not appeared for a while is because of the death of our grandmother. (It really is beautiful out west.)

So long until next week.

The Tillies

Seventeenfore Splurges

John Howard is contemplating building a new home and has been consulting some of his friends as to air conditioning. He has received lots of advice, but the best one was when some one suggested that for hot air in the winter, he was well supplied. All he had to do was move from room to room and throw his usual lingo. . . . Do not be surprised to hear of a new packing house, Seymour & Seymour, Inc., in the near future. Cy recently made a trip to a nearby lake on a Sunday for a picnic dinner. After the eating festivities, the picnickers decided to take a nap. All went along fine until Cy was awakened by a grunting noise and upon awakening, found a litter of pigs, with their mother, had come over for a lunch, too. We do not know how many of the porkers Cy was able to squeeze in his car, but you can bet your silk shirt after he got them home he had plenty of space for them to roam. . . . The neighbors in Charlie Crankshaw's neighborhood are glad that he finally got his trailer finished. They claim that the pounding and noise that was made during its making reminded one of the village blacksmith. Maybe Charlie built it in the basement and then couldn't get it out. Suppose? . . . Wonder what has become of Charles Israel's ice cream trousers? Could it be the girls were following him too much, mistaking Charlie for an ice cream vendor? . . . Paul Redmerski rented a cottage at the lake for a week's vacation. We were wondering why he took nails along with him when he went up. At last the truth is known. The boats with the cottage had no live boxes to put the fish in so Paul endeavored to make some. The result is, now the owner of the cottage claims the boats leak all over and his summer business is all shot.

Ed Schotter, Bldg. 19-B certainly believes in locking up the stock room when he goes home. A warning to stock room frequenters—be sure to be out of the stock room at closing time unless you brought along your pajamas.

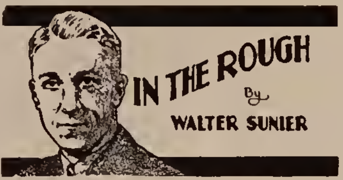
The officer received a complaint about the issue of bread.

"Soldiers should not make a fuss over such trivialities," he said. "If Napoleon had that bread when he was crossing the Alps, he'd have eaten it with delight."

"Yes, sir," said the corporal. "But it was fresh then."

A He-Man's Game? — Well Perhaps

It was only four strokes but nevertheless this impromptu team won the match against their male opponents. Marjorie Budecki is about to sink a putt while Marie Downie (left) and Jane Brinkman and Anita Rump lend moral support.



An effort has been made for the last six weeks to find out who are the best women golfers in the Works. A tentative list of nine golfers was made which included Marjorie Budecki, Mary Jane Brinkman, Marie Downie, Jessie Filler, Mildred Atherton, Dorothy Crawford, Elva Plattor, Anita Rump, and Dorothy Krick. The main idea at this time was to get four girls to play against a regular man's team in the league in the place of a team which due to overtime work would have to forfeit. Several attempts were made which were unsuccessful for several reasons. Finally a team consisting of Marjorie Budecki, Mary Jane Brinkman, Marie Downie and Anita Rump played a match against Landstoffer, Oman, Miller and Schmidt. The girls were given averages before the match and at the final accounting with a handicap of 36 strokes beat the men's team by four strokes. The match was played at Brookwood at the regular time for scheduled matches.

Anita Rump shot the stellar game for the women by shooting a 47. She sank a short approach on No. 14. Mary Jane Brinkman played especially scientifically at No. 16, where she stopped her second shot two feet from the creek. These two girls, who were in one foursome, held the honors for the first three holes.

Swinging The Hickory

By Paul Schwean, Bldg. 4-3

The batting of the G-E club lost for them two tournaments to the Reserve Zollner-Piston softballers. In the sectional tourney last Friday the Reserve aggregation took the Electricians by a count of 5 to 2. While in the IRA tourney Tuesday the final tally was 1 to 0 in favor of the Piston lads.

The hurling of Moffitt and Greider, without any hitters accounted for the easy victory of the Reserve club last Friday.

The Reserve club also had to call on two pitchers to pull itself out of the hole in the second frame. Hanchar, who had been doing mound duty for the Reservists was replaced by Art Hieber, who did a fairly good job in stopping the Electricians' rally.

In the IRA tourney Norv Nahrwold did creditable work when he struck out 10 men and allowed only three hits. The support of the fielders was missing in both encounters which added to the none hitting of the soft men.

Although the Electricians played better and more consistent ball in the second fracas with the Reserve club, the fact that the team was minus hitters gave the winners a decided edge. Thus the G-E club faded out of the picture because they were faced by a capital Z.

—

In the inter-department league the Small Motor Office annexed their second win in the second half when they trounced the Sleepy Stators with a count of 13 to 3. While in the other game of the evening the West Side aggregation continued their winning streak when they eased over the Small Motor Factory 9 to 8.

In an attempt to cop first place honors in the second half the White Collar lads batted the round in the fifth frame with Clawson, lead-off man clipping Musser for the only home run of the game.

Hitting was heavy on both sides, but the wide awakeness of the put-put lads appeared to lull the Rip Van Winklers into a lethargic state of action.

Small Motors	202	081	
Sleepy Stators	102	000	0

In a battle of dog eat dog the West Siders rallied in the sixth frame to ease over the Small Motor outfit by one run.

Faulty fielding and the heavy slugging of the chug chug boys in the fifth frame netted them six runs. Not to be outdone the Westerners buckled their spurs and rode the factory hurler for five hits and seven tallies, one being a home run by Sitko, the pitcher.

The other heavy hitter of the evening was Penkul, catcher for the Cowboys when he lopped a homer in the fourth and a two-base hit in the sixth frame when they batted the round.

West Side	000	107	1
Small Motor Factory	001	060	1

Extend Lighting For Night Ball Games

Ball parks of the new Class C "California League" at Stockton, Fresno, Bakersfield, Riverside and Santa Barbara will be lighted for the first time this year. Using a new high efficiency sportslight developed by General Electric, the system to be installed will increase general levels of lighting in "Texas League" areas where formerly many errors were made because of shadows on the outfield side of the ball. Under outmoded ball park systems, light was concentrated on the infield and made errors on simple pop flies just over the infield because they could not see the ball quickly enough.

Intensities will vary from a minimum standard of 25 foot-candles average on the infield and Texas League areas to the high and more satisfactory levels of approximately 50 foot-candles which will be obtained at the Santa Barbara park. Installation at this park, where the Dodgers will train in 1942, will be under supervision of L. S. (Larry) McPhail, father of night baseball in the major leagues, and H. W. (Bill) Hitchcock, president of the Santa Barbara Club.

Poles holding the floodlights will be 80 feet or higher at the five parks, General Electric engineers said, which will preclude any eye discomfort for fans. This coupled with better lighting for parking facilities should encourage attendance of women fans, who in the past have complained of smarting eyes, dark parking lots and, generally, that they "couldn't see the ball."

Engineers of the Pacific Gas and Electric Company, Southern California Edison Company and the Nevada-California Power Company co-operated with General Electric engineers in planning the power facilities.

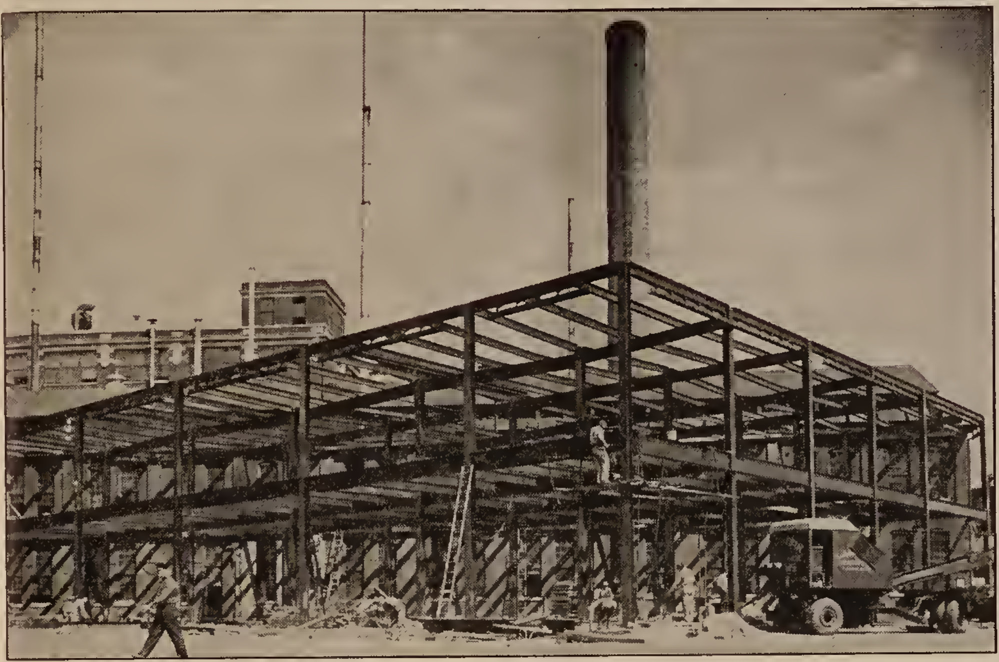
FORT WAYNE WORKS

BUILD
FOR
DEFENSE

Volume 24 FORT WAYNE, INDIANA, FRIDAY, AUGUST 22, 1941 Number 79

Additional Facilities For Defense Work



Steel construction work is rapidly nearing completion for the new addition to the Wire and Insulation building. The added facilities will be utilized to a great extent in the manufacture of several new types of wire in connection with the National Defense Program.

Antibeetle Garden Light Becomes A Navigation Aid In Hawaii

A green fluorescent light installed to protect his roses from night-working Japanese beetles has literally placed "on the map" the garden of W. A. Ramsay, General Electric representative in Honolulu, Hawaii.

Navy authorities noticed that the light, at an elevation of 1369 feet on the side of Mount Tantalus, just back of Honolulu, was visible for more than 46 miles at sea and, after ascertaining its purpose, had the U. S. Coast and Geodetic Survey make measurements and list it as an official light, much to Mr. Ramsay's surprise.

Charts place it at latitude 21 degrees 19 minutes and 41 seconds north, and longitude 157 degrees 49 minutes and 13 seconds west. A letter mailed by E. A. Crellin, one of his friends, in San Francisco and addressed only as "Keeper of Navigation Light" at this spot was delivered promptly to Mr. Ramsey.

"The idea of burning lights at night to retard or repel Japanese beetles which work only at night is an old one in Honolulu," explains Mr. Ramsay. "The light is made up of four 20-watt green fluorescent tubes. Green was selected because its color gives the highest efficiency in fluorescent tubes. The light is operated by a time switch; and I pay no further attention to it."

We take it the beetles are not a bit enthusiastic about further development of fluorescent lighting.

Chairman For Club Named

Committee Members To Be Announced Soon. Will Assume Offices September 1.

Chairmen of the various G-E Club committees to serve during 1941-42 were announced this week by George Waldschmidt who was recently re-elected president of the organization. Paul Vogt, Bldg. 6-3, will again head the entertainment committee. Jerry Duryee, Bldg. 4-6, is chairman of the athletic committee; J. H. Oman, Bldg. 4-5, of the golf committee; Wm. Doehrman, Bldg. 20-1, of the bowling committee; Frank Newport, Bldg. 19-1, of the boxing committee and K. W. McOmber, Bldg. 18-1, of the music committee.

The various chairmen will name the members of their committees within the next few days. The committees as well as the newly elected club officers will assume their duties on September 1.

With greatly increased employment it is anticipated that the coming year will be one of the most active in the Club's history. A meeting to plan the twelve month program will be held shortly after committee appointments are completed.

Employees Active In Securing First Aid Instructions

By DR. H. W. GARTON

(Pictures on Page 4)

First-Aid training for the laity has always been desirable and valuable, but never has it been so important, useful and vital as now and in the immediate future. Figures released for 1940 show a sharp increase in total accidents, and in accidental deaths for the entire nation. With the speeding up of na-

(Continued on Page 7)

Quarter Century Club To Hold Outing September 6

The annual outing of the Fort Wayne Chapter of the General Electric Quarter Century Club, which has become an institution since the organization of the Club twenty-five years ago, will be held on Saturday, September 6 it is announced by E. L. Simpson, president of the Club.

The affair will be held at Sargents Hotel, Lake Wawasee and will be an all day affair. Those attending are asked to meet at the Main Office building not later than 8:00 o'clock. In order that reservations for the dinner and transportation can be arranged, it is asked that the questionnaire being sent all members be returned promptly to George Waldschmidt, club secretary.

The program will include outdoor sports, boat rides and the annual

(Continued on Page 8)

Wire-Insulation Maintains Perfect Safety Standing

Nine Lost-Time Mishaps In July Bring Total For Seven Months To Seventy-One

Nine lost-time accidents in July brought the total for the first seven months up to seventy-one at the Fort Wayne Works. Three of the July mishaps occurred in the Motor-Generator Division, three in the Transformer Division, two in the General Purpose Motor Division and one in the Miscellaneous Division. The all department frequency at the end of July stood at 5.88 and the severity at .174.

The Wire and Insulation Division remains with a perfect safety score with the Miscellaneous Division in second place and the Series and Specialty Motor in third place.

Standings of the various divisions are as follows:

	Freq.	Sev.
Wire-Insul.	0.0	0.0
Miscellaneous	1.34	.03
Series-Spec.	2.88	.05
General Purpose..	4.95	.27
Tool	5.5	.01
Refrigeration	7.66	.60
Decatur	7.86	.14
Transformer	7.74	.05
Distribution	8.83	.05
Motor-Gen.	10.06	.23
General Ser.	12.29	.71
	5.88	.174

Identification Badges

When you leave home—be sure you have your badge.

When you pass through the gates—be sure you are wearing your badge where it can be seen.

When you get to your work place—wear your badge in a prominent place.

Spot checks indicate a great many of our employees have their badges in every conceivable place except where they can be seen at a glance. We wish to impress that wearing your badge where it can easily be seen is a protection for all of us who work here.

• "Paul Revere's Horse"

One of America's leading inventors of airplane engines was asked recently why it was that the men who used his engines in their planes received most of the glory for the flying accomplishment that it made possible. The research genius seemed to find the question an amusing but an important one.

"After all," he answered quietly, "who ever heard the name of Paul Revere's horse?"

That quiet spirit of service is characteristic of American industrial research. All over our country, thousands of research workers and engineers are making their individual contributions to our national security. They served progress in the past. Today they are making sure that the results of that progress are preserved for the American generations that lie ahead.

Often the names of the men responsible for the gains are not remembered. But the composite result of their achievements is so plain that no one can miss it—American industrial superiority, with its promise of security today and of still better living standards tomorrow. Research is the "Paul Revere's horse" that has helped to achieve this, and it can well be proud of the role it plays.

• American Bargain Day

For $126 America has bought the services of some of the best managerial brains in the country.

That is the sum paid to the 262 dollar-a-year men who left their jobs in private industry and volunteered for government service in the defense set-up. The money covered their services for the past fiscal year, and their checks ranged from 2 cents up, depending on the length of time they had served. Only 13 of them who had worked a full year were entitled to the whole dollar.

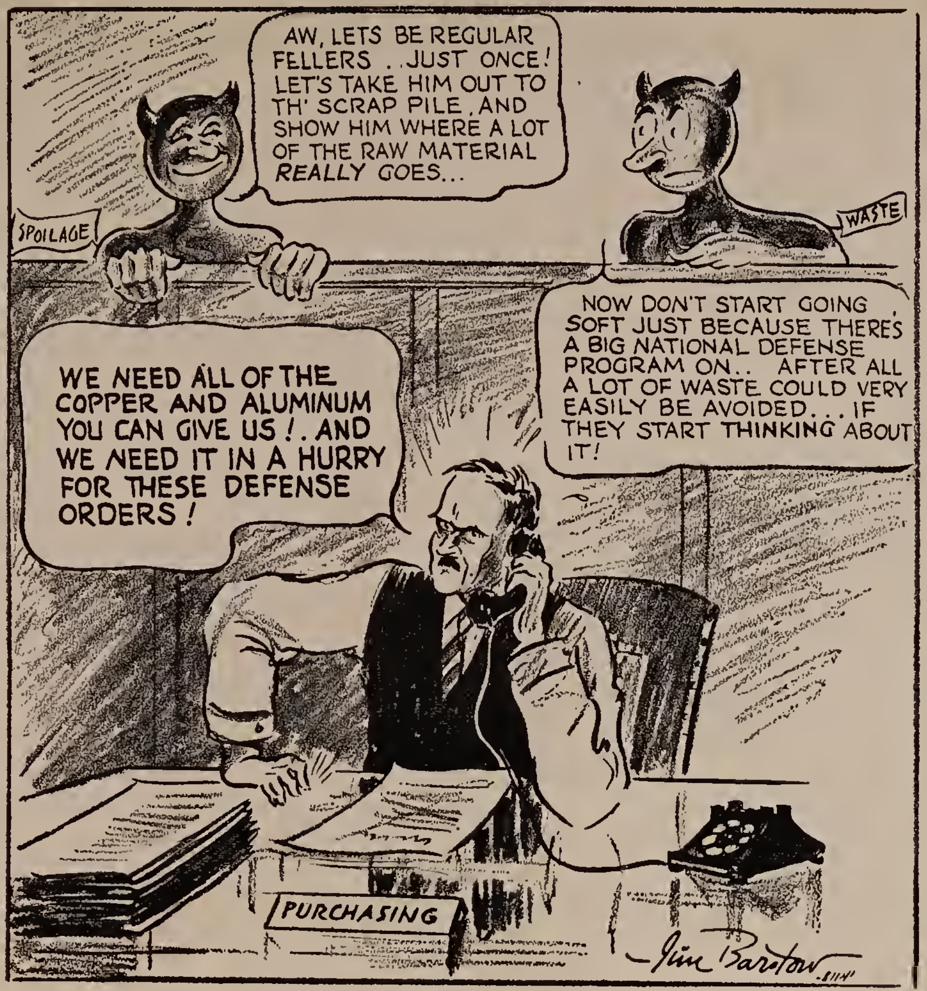
While the case of these men serves to highlight the patriotism and whole-hearted cooperation that American industry has thrown into the defense program, it by no means tells the whole story of the effort that industry is making to make America invincible.

Just as in Washington, in every part of the country industry is doing its part—the alley machine shop along with the big corporation. Into the vast program for armaments production it has thrown all the skill, resourcefulness and efficiency that have made this country the greatest industrial nation on earth. It has faced the ever-changing measure of the job before it and gone to work as never before, turning almost overnight from peace to defense production, and stepping up that production month by month. Industry knows that the destiny of free men hangs in the smoke rising from its factories. Come what may, it will not let them down.

Today, not only in Washington, but all over the nation the most skillful management and the most skillful labor in the world are going full speed ahead toward one end—the protection of our freedom.

Errors like straws upon the surface flow; he who would search for pearls must dive below.—*Dryden.*

THE IMPS OF INDUSTRY



AW, LETS BE REGULAR FELLERS . . JUST ONCE! LET'S TAKE HIM OUT TO TH' SCRAP PILE, AND SHOW HIM WHERE A LOT OF THE RAW MATERIAL REALLY GOES...
SPOILAGE
WASTE
NOW DON'T START GOING SOFT JUST BECAUSE THERE'S A BIG NATIONAL DEFENSE PROGRAM ON.. AFTER ALL A LOT OF WASTE COULD VERY EASILY BE AVOIDED. . . IF THEY START THINKING ABOUT IT!
WE NEED ALL OF THE COPPER AND ALUMINUM YOU CAN GIVE US!. AND WE NEED IT IN A HURRY FOR THESE DEFENSE ORDERS!
PURCHASING
Jim Barstow

One of the greatest industrial battles being fought today is raging behind the scenes in every shop in America. General Electric is no exception. It is the battle for materials, their swift and efficient utilization and the elimination to the lowest possible degree of the twin Imps of industry, Waste and Spoilage.

Let no one be deceived that this battle is not being fought because it is not blazoned forth from the headlines of the daily newspapers. Its very silence makes it that more deadly for unless more people know about it and thus have a chance to do something about it, that much longer will it continue.

Shortages of strategic materials vitally affect all of us. Inefficient use of the materia we have causes waste. Spoilage of the material in process of manufacture causes more waste and so the vicious cycle runs.

Purchasing men all over the land are tearing their hair to get the raw materials from which we must fashion the tools for defense When they do get it, in many cases after tremendous effort, all too often these materials are uselessly wasted and carelessly spoiled The fight is three cornered as indicated by Artist Barstow in his unique presentation of the facts in the above cartoon.

Line up on the smart side and join this figh to lick the Imps of Industry to a standstill

NEWS FROM THE CAMPS

We publish herewith with great pleasure extracts of letters sent to us by G-E employees now in government service. Address all communications for this column to the WORKS NEWS editor.

Dear Editor.

I received the Works News which you sent yesterday for the first time and was very much pleased and surprised. I sure enjoy reading news about friends and fellow workers back home. I also receive the Fort Wayne paper every day. It comes one day late. Now I will be able to keep pretty well in touch with my friends back home.

I have been placed in the Reconnoissance Co. of the 37th Armored Regiment, here at Pine Camp, New York. Our duties are much easier than I expected them to be. Most of our drilling is in vehicles which consist of motorcycles, scout cars, jeeps and peeps. I have qualified as a driver on all of these vehicles and have been assigned to a scout car.

Our regiment has been going out on convoys for a distance of about one hundred and fifty miles. On these convoys the Rcn. Co. goes out ahead to reconnoiter roads and bridges and to be on the lookout for the enemy. These convoys usually take about two days as we travel rather slow. During the night we set up our pup tents and sleep. Kitchen trucks go along with the convoy and we eat along the roads.

A boy from Kokomo has his car up here and we have been taking some very interesting weekend trips. We have been to Niagara Falls, New York City, Lake Placid and Canada.

Pvt. Geo. M. Soule,
Rcn. Co., 37th Arm'd Reg.
Pine Camp, New York.

Dear Editor.

Please continue to send the Works News if you will. It keeps us informed of the happenings there at the Works. Also of our friends there who we might otherwise lose trace of.

As for myself have never missed a meal and as many of you know I enjoy eating. We have some very nice kitchen equipment. Large gasoline stoves, complete with all equipment and let me tell you it's the very latest. The cooks are very good, no more wood smoke burnin their eyes. They can cook a complete meal for 150 men in about hours.

We are now in the maneuve area near Reaves, La. About 31 miles from Camp Shelby. Made i in 14 hours road time, had an overnight stop in Opelousas, La. Ther the people were very nice to us. W got a very nice letter from th Mayor as to the way the boys conducted themselves. An organizatio was there the night before we were I don't imagine he sent them a letter, from all reports. We made i plain we were all Indiana boys an we are proud of it. We made th trip without an accident. 373 moto vehicles and that's a lot of transportation.

The country here is very thin populated, flat and low. I don know what they live on aroun here.

Would appreciate letters from any of my friends there at th Works, will try and answer any an all.

Thanking you for all past favors
Master Sgt. Kenneth P. Carr,
Service Co., 152nd Infantry,
A.P.O. 38th Division,
Camp Shelby, Miss.

Create Opportunities For Suggestions

An Interesting And Fascinating Spot

One of the most interesting spots in the Works to me is the salvage department. Not that I like it. No one could enjoy seeing so much copper and steel and aluminum that recently came in as good raw material going ingloriously out as scrap. But it fascinates me to see the kinds of things that get into these piles of scrap, and to see that crane working continuously loading scrap into cars. By actual record, more than a million pounds—ten to twelve freight cars—of scrap are shipped out of the Works every week.

There is always good reason for reducing the amount of scrap we produce. The less scrap we have, the lower our costs, the lower the prices we can make, the more business we can get, the more people can have for better living—refrigerators—washing machines, toasters, radios, etc.—depends on how good use we make of the raw materials that are left over after meeting the needs of the defense program.

Of course, we can not expect to eliminate scrap entirely. It can never be possible to cut up raw material so that none is left over, or to avoid all the mistakes that cause spoilage. But think of the possibilities in even a modest reduction in the amount of scrap. That is the fascinating thing about the scrap department.

For instance, copper is one of the vital materials of which there just isn't enough to go around after meeting defense needs, and copper is the very heart of all electrical equipment. Out of our more than a million pounds of scrap, 35,000 pounds every week is copper. Suppose, by extra ingenuity on the part of engineers and planners, more thoughtful ordering and scheduling, and some extra skill on the part of winders and assemblers, we could reduce by ten per cent the amount of copper we scrap. That would mean 3,500 more pounds of copper every week to turn into useful things—enough to make more than a thousand refrigerator motors, or four thousand Tulamp fluorescent ballasts.

Yes, there are good reasons for putting some extra attention on the conservation of material now: help to the National Defense Program, more electrical equipment for every-day use, less risk of shutdown or lay-offs from lack of material, and—DOUBLE AWARDS.

R. H. CHADWICK,
Ass't to Manager.

You wouldn't grind your own razor blade and that should go for your drill grinding. The tool department will do it right the first time.

Drills ground properly will make holes to the correct size.

"Leave It To The Women"

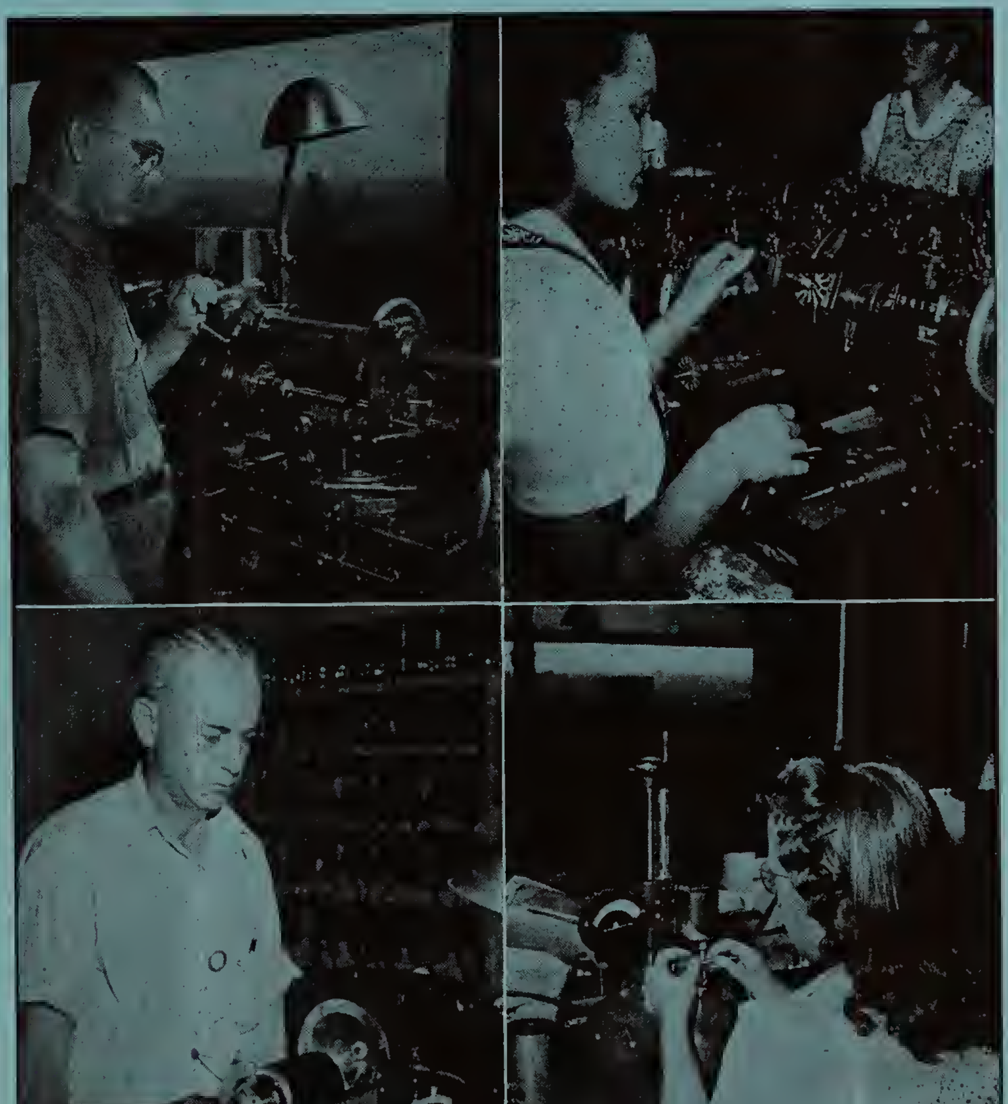
By Leona Menze

Personally, I've never worried much about conserving material—except when I bring home 2½ yards of dress material and the pattern calls for 3—but the girls in Bldg. 17-2 are doing a swell job of material conservation right now with their new method of machine winding of hermetic stators.

An instructor in the winding department in Bldg. 17-2, tried to

(Continued on Page 2)

Building Quality Products in Series and Specialty Motor Division



Top left—Warren Jackson cutting worms of highest accuracy and finish. Top right—Frances Brown winding primary armature coils. Exactness of turns is most important. Lower left—William Roberts is shown testing a completed unit. Utmost accuracy is required in order to insure unfailing performance. Lower right—Evelyn Weber is shown checking shafts on an Electrolimit gage. These shafts are held to two-tenths of a thousand limit.

Observe The Operations About You

The quality of General Electric products is the result of the contributions made by many different employees on the various operations and materials necessary in satisfactorily completing their product.

There is an old axiom that, "A CHAIN IS NO STRONGER THAN ITS WEAKEST LINK" which is quite appropriate when considering our individual contributions to a product which should be, and must be, worthy of proudly displaying a G-E monogram.

Perhaps you have been doing your job day after day in a more or less mechanical manner, in an efficient manner to be sure, but in the traditional way that it was explained or shown you. As an aid to the all out program for the conservation of men and materials, so vitally needed in our countries efforts in the present national defense crisis and with the thought of improved quality before you, wouldn't it be a good idea to think about your job from the viewpoint of quality workmanship and material conservation. Ask yourself, "HOW CAN I IMPROVE MY OWN JOB IN SUCH A WAY AS TO HELP IMPROVE MY PERSONAL EFFICIENCY AND QUALITY OF OUTPUT?" "HOW CAN I IMPROVE MY JOB IN SUCH A WAY AS TO PREVENT FUTURE SLIPS THAT MAY IMPAIR THE QUALITY OF OUR PRODUCT?" "HOW CAN I HELP THE OTHER FELLOW IN HIS DESIRE TO IMPROVE QUALITY AND PREVENT LOSSES IN MAN POWER AND MATERIAL?"

Look about you. Perhaps you have seen an isolated instance of poor quality that could have been prevented by a small change in the materials used or the operations performed. Perhaps you are aware of potential rejections caused by poor quality workmanship or inferior material, but have depended upon the inspectors to detect it.

Talk to your immediate supervisor and get his ideas on the matter. Talk to anybody else whom you think may help you in your effort to improve quality and conserve materials. Get one, several, perhaps a dozen ideas, act upon your ideas, translate them into useful suggestions for which you may receive double awards during the month of August.

There is a great deal of personal pride and satisfaction in knowing that you have performed an operation or produced a part of our product efficiently, skillfully and of a quality that will pass the severest test and rigid inspection requirements without rejection, because "YOU DID IT RIGHT THE FIRST TIME."

G. W. AUER, *Supt.*,
Bldgs. 4-2 and 4-3.

NINE DAYS LEFT FOR DOUBLE AWARDS

Do It Right The First Time

Something New Out Of The Past

While visiting an "Oldtimer", long since pensioned, I noticed over his attic hobby bench a rustic wooden plaque etched with a hot iron. These words, "DO IT RIGHT THE FIRST TIME", etched on that plaque struck me as being the essence and perhaps the starting point of our campaign on *Quality Control and Spoilage Reduction.* When I asked the "Oldtimer" where the slogan came from I found that he was as wound up as an eight-day clock and eager to spin a yarn on why he had that motto so conspicuously before him. I drew up a stool and he started his story.

"Son, my dad made that etching when I was a boy and gave it to me the first day I went to work. In those days if we spoiled a piece we had a hard time getting the material for another. We didn't have the supply or the rapid transportation you have today to say nothing of the costs of materials. Our Foremen didn't tolerate many spoiled pieces and a lot of the careless boys went hiking around the country looking for jobs. Your leaders today have more consideration for the workers. They try to help them help themselves and that's a fine spirit if the workers do try to help themselves.

"Do It Right The First Time" is a simple sentence with so many angles. It's easy for some and so hard for others, but the solution is as simple as the sentence: "Think Before You Act". Did you ever watch a bird dog race pell-mell across an open field where the going was clear and suddenly slow up to a cautious walk when the brush and stubble began? That dog's sense of caution warns him that what he is after may get away unless he proceeds cautiously. Every job we do in the factory should be approached by a worker the same way. It takes a kind of an inner sense, the same as a bird dog has, to warn ourselves that we may be approaching trouble before trouble occurs. That's where thinking before we act becomes so blamed important. Why does it take five pieces for some workmen to set up a new job and only one piece for others? The fellow that took only one piece must have thought a pretty good spell before he acted and he saved a lot of pieces that are mighty hard to get these days of scarce material.

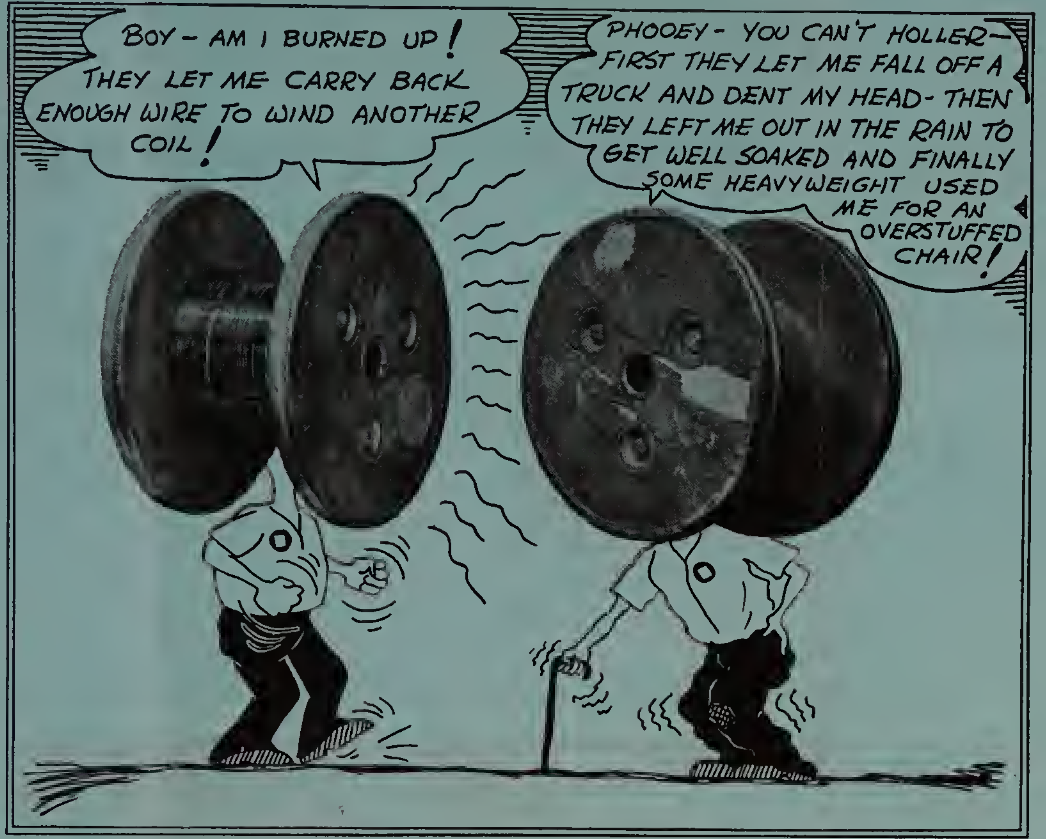
"You know, young man, there's a certain sense of pleasure in producing a piece that is right and a piece that will stand the toughest inspection and to become an operator that always produces "right" pieces gives you a feeling of security that is hard to beat. Letting a piece go by that is shady more often than not causes multiple trouble later on.

"Your new fangled terms of *Quality Control* and *Spoilage Reduction* is just putting a little polish on that old slogan: "Do It Right The First Time". If you could sell your workers on "doing it right the first time" by thinking good and hard before they act the quality improvement would be surprising and the scrap boxes empty."

After listening to this heartfelt talk, I reasoned that if it took a lifetime of industrial hard knocks to plant this one item so deeply in the "Oldtimers" heart, it wouldn't be such a bad idea to pass the thought along to a lot of people having a lifetime before them and let them benefit by an old man's experience. To get into the class of "right" workers is an ambition worth having and the security it offers is enough for anyone to fight for.

R. C. DENNISON, *Supt.*,
Magneto Department.

Use All The Wire And Protect Our Reels



BOY — AM I BURNED UP! THEY LET ME CARRY BACK ENOUGH WIRE TO WIND ANOTHER COIL!
PHOOEY — YOU CAN'T HOLLER — FIRST THEY LET ME FALL OFF A TRUCK AND DENT MY HEAD — THEN THEY LEFT ME OUT IN THE RAIN TO GET WELL SOAKED AND FINALLY SOME HEAVYWEIGHT USED ME FOR AN OVERSTUFFED CHAIR!

Think For Yourself

Since the slogan of this campaign is, "ALL OUT FOR DEFENSE", none of us needs to be told that defense needs are paramount. Have you ever stopped to think what effect waste of all kinds has upon the defense efforts of the nation? Of course, the first and most important effect is that valuable time is lost, time that never can be replaced, hours that delay and retard the defense effort. Things that ought to be done at a given time are not done and we never know the consequences. We are all familiar with this result of waste, but there is another and more hidden effect which, while not as pressing perhaps, is almost as important in the long run.

We all know that waste adds to our costs and that costs in the long run mean higher prices, so that the Government pays more money for the product than it would pay if the waste had not been present. Further than this, of course, higher costs of defense materials mean higher taxes for us and for succeeding generations. Also, the presence of waste in the defense effort adds a strain to the already tremendous burden of financing the program and this we all as patriotic Americans wish to avoid.

We must not forget that we are still doing and will continue to do a great amount of regular commercial business. People will need, as they have needed in the past, the things which add to their convenience and pleasure and their standard of living and our contribution to this will continue to be important. Waste in the production of civilian goods means that less materials are available to make these goods. It also means higher prices to our customers and less business for us, and less work for all. Then, too, after the emergency is over, we must be in a healthy position with regard to costs so that the company can continue it's proud position of leadership—"more goods for more people at less cost."

W.C. WICHMAN,
Works Accountant.

"LEAVE IT TO THE WOMEN"

(Continued from Page 1)

explain this to me the other day and took me on a personally conducted tour of her department to emphasize a point or two which we both knew were not hitting home. Factory operations don't mean much to me, I'll have to admit that to start off with, but I did assume my most intelligent expression just to ease her mental anguish and publicity make some showing. Privately, I kept wondering if the machine behind me was going to let loose and hit me on the back.

But it seems that formerly when machine winders came to a spool end where there was not a sufficient amount of wire to wind a complete coil, this wire was scrapped. With material shortages so much in the public mind, instructors, foremen, and planners in Bldg. 17-2 made the salvaging of this wire sort of a community project. They found that by making an extra connection, they could let the spool run completely out. The only handicap apparent is the labor involved in making the extra connection, but this is almost a negligible item.

The girls fell into the new plan easily enough, she says, and now agree that it's quite the thing to do. The new method has been in operation six weeks now, and it is hard to estimate how much magnet wire has been saved by this simple change. But more than anything else, this illustrates the trend of thought today and the possibilities for "double awards" on suggestions.

She kind of summed up the situation for me when she said: "Well, maybe we don't save so much, but every little bit counts."

Rework Is Expensive

Once again, as in years past, our country is faced with a crisis that threatens our national security. Our way of life has been challenged and we are responding to our country's defense program to assure our posterity the same freedom of speech, liberty and the pursuit of happiness that our forefathers left to us. American workers are bending their shoulders to the wheel and giving their utmost effort to the gigantic task that is confronting us. We can and will contribute more than stand in front of a machine and turn out piece after piece of material. We must all be sure that our work is turned out correctly the first time.

Errors in doing our job mean lost material and work that must be done over. Rework is expensive. It is so much harder to take an incorrect piece of work and rework it and still maintain the Company's high reputation of quality, than it is to make it right in the first place. Lost material, with the scarcity of material now experienced, is to be avoided if at all possible. But the loss of material is not to be compared with the loss of time. Time that is lost can never be regained, there is no waste and spoilage committee that has found a way to salvage a precious hour that was lost due to inefficient or haphazard work. Each hour with its 60 golden minutes must be utilized to their fullest extent. We are not only confronted with the loss of material and time but the loss of machine and tool time. If you're in doubt of the proper procedure to follow on your job, ask questions of your foreman but don't throw away any precious time.

If you are engaged in commercial work by all means do it right the first time, because the scarcity of material makes it harder to secure material and wasted material may mean lost business. Every effort should be made to conserve material as our supply is limited and what we lose we can never replace. Nevertheless, whether you are working on defense or commercial production the answer is still the same. If you're on defense production everything possible must be done to turn out the work in the quickest possible time, with the least amount of rework time and of the highest possible accuracy. Not only is our Army and Navy threatened with disaster, if our products fail in the time of trial, but all that we hold dear, our homes and our loved ones are threatened with a fate that might be far worse than death.

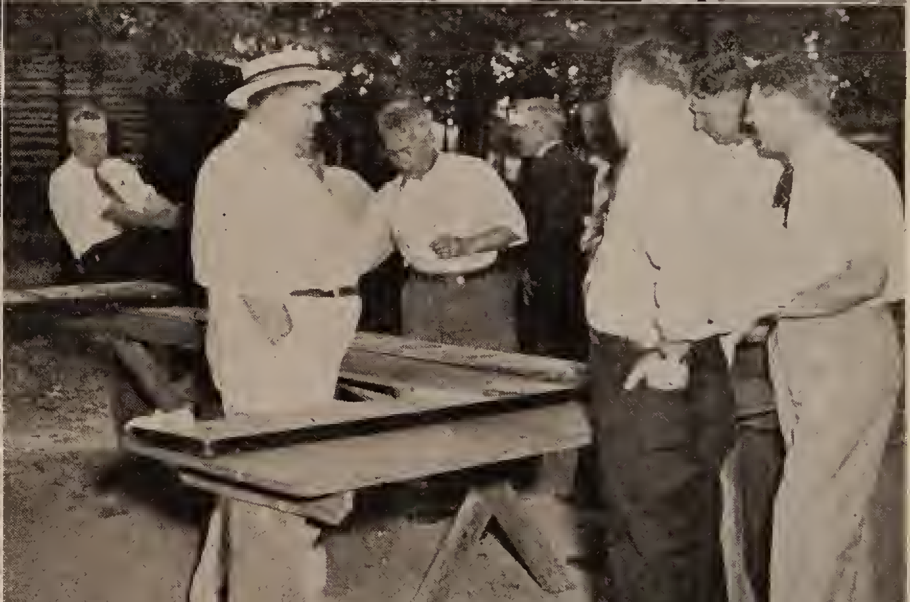
So let's remember that the more we can do for the betterment of our product and the more we "DO IT RIGHT THE FIRST TIME", the more we aid and protect ourselves, our country and it's ideals.

E. W. LANKENAU, *Supt.*,
Decatur Works.

Why look for a second chance? "Do it Right the First Time."

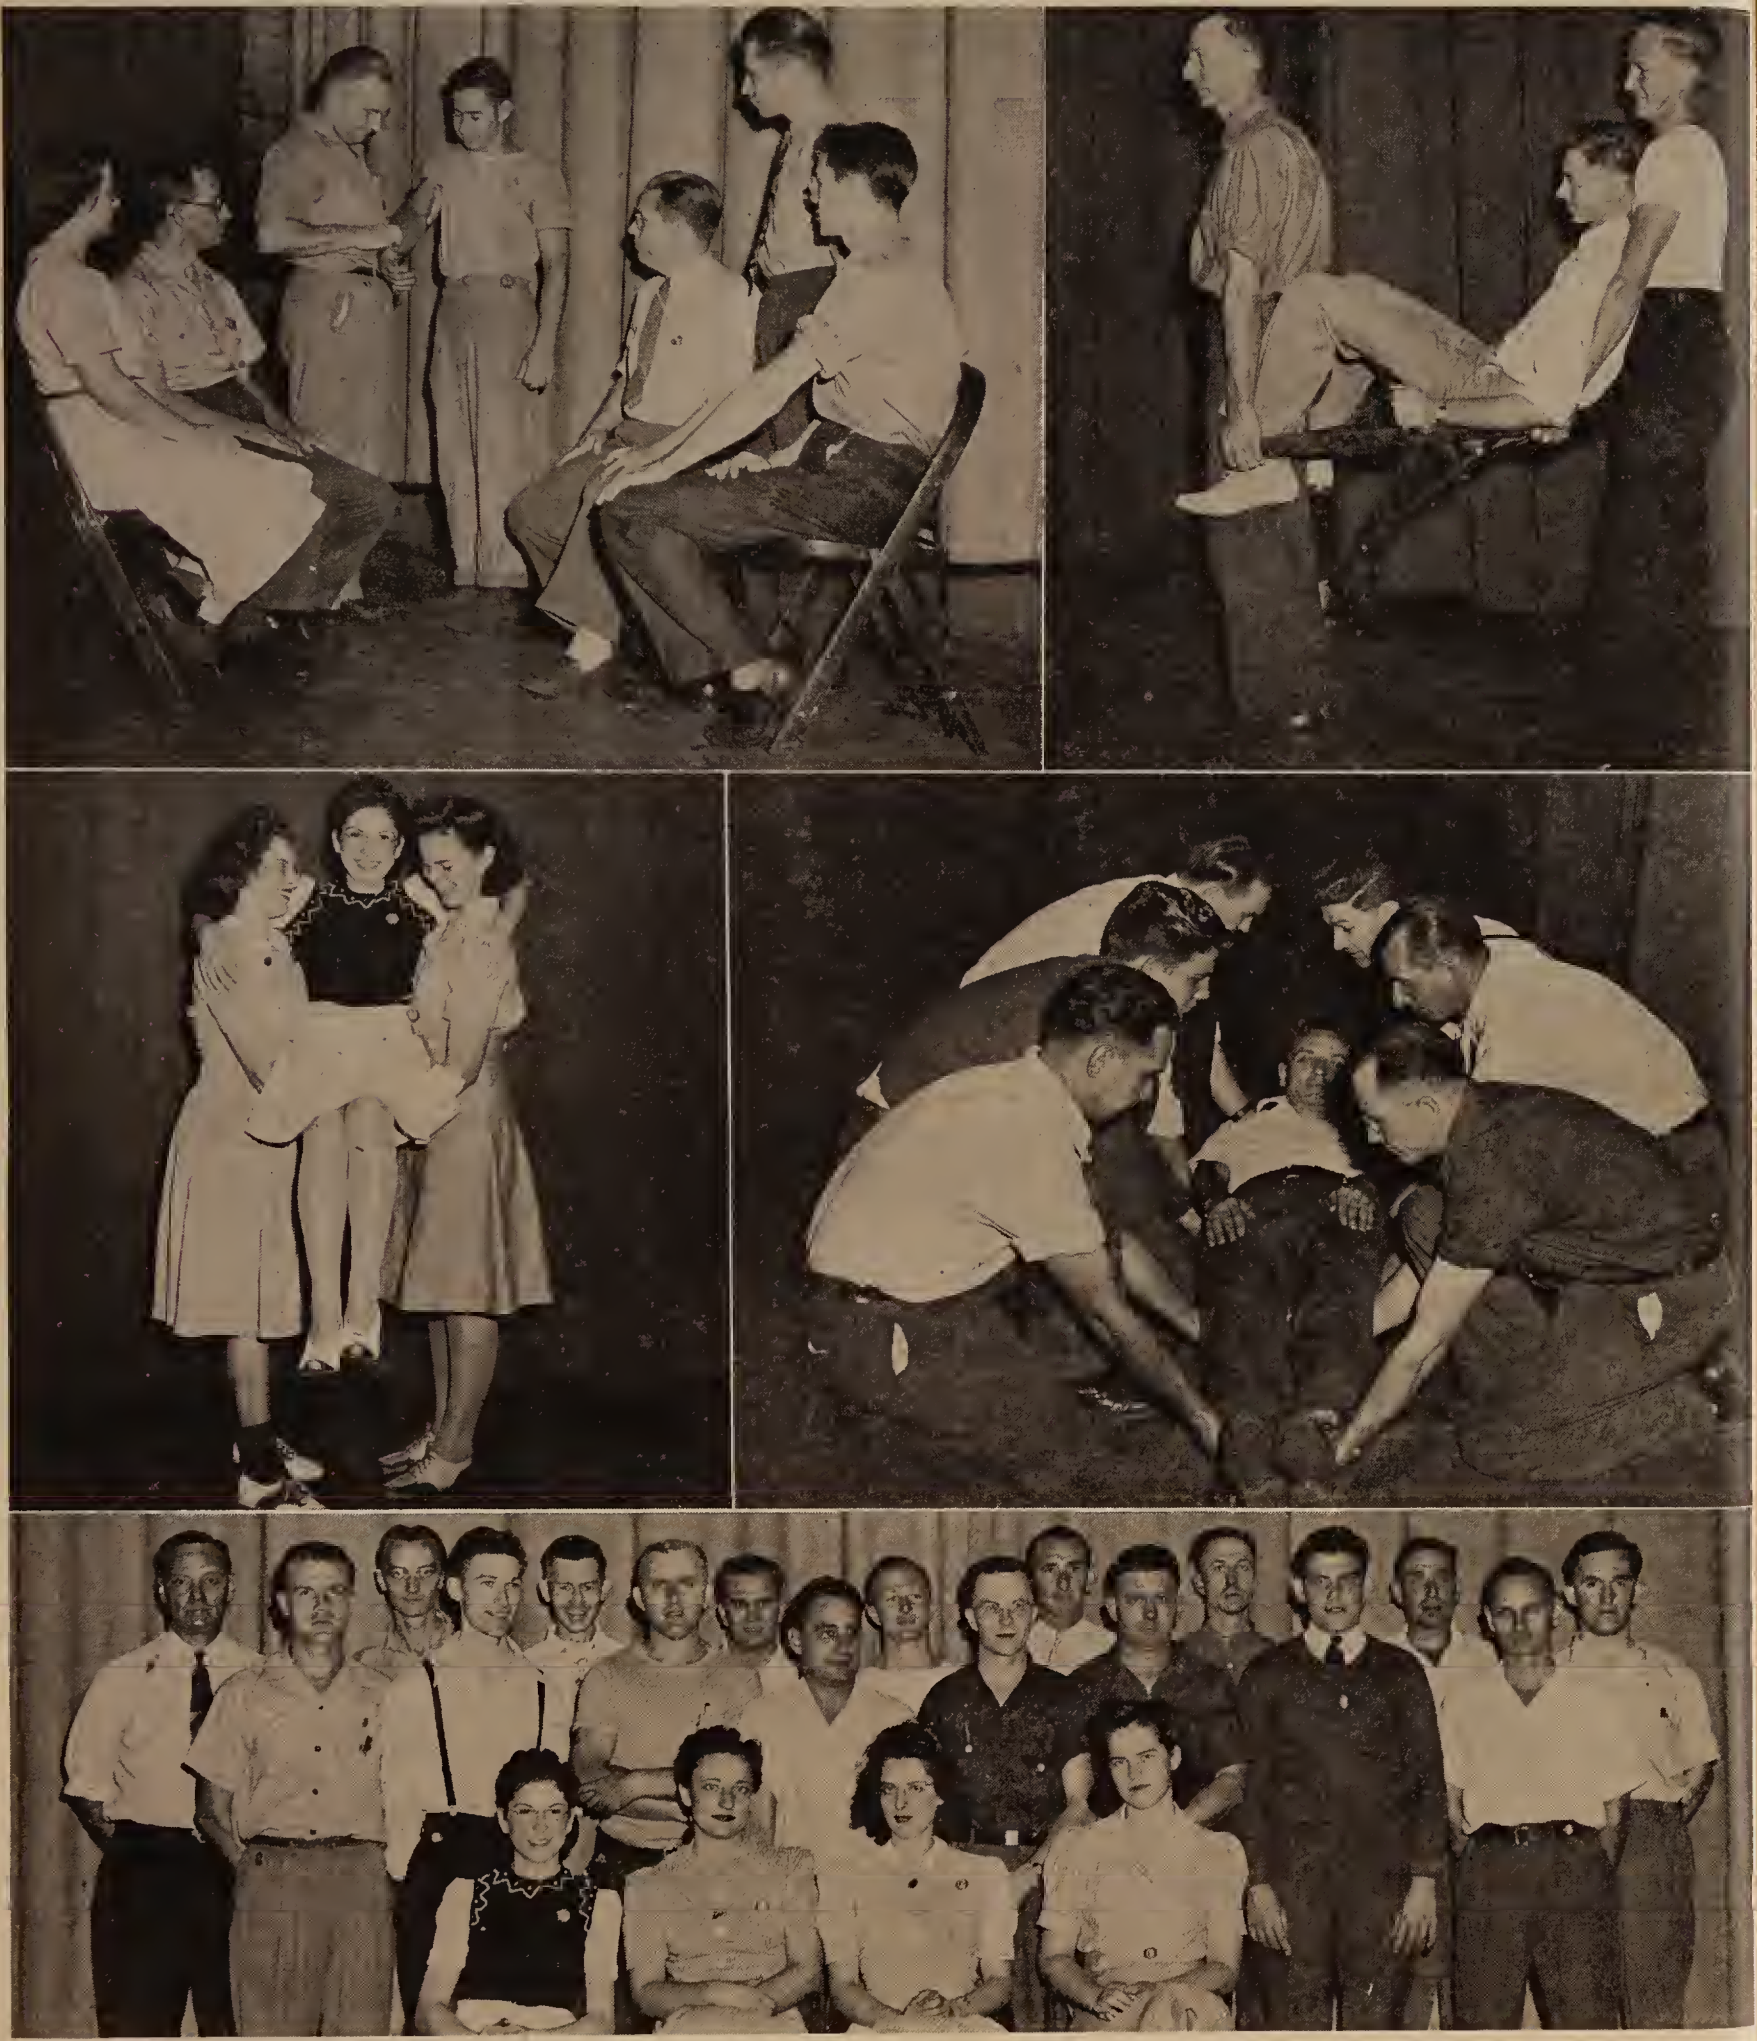
CAREFUL HANDLING MAINTAINS QUALITY

Foremen Relax For A Good Time At First Annual Picnic



Relaxation was the keynote at the first annual picnic of the recently organized Foremen's Association at the Fort Wayne and Decatur Works. The candid camera shots above show that "a good time was had by all", although Bill Walt, in the lower right hand picture, does appear to be a bit concerned about something. The outing was held last Saturday at the Log Cabin and was an all day affair. Plans are under way for an intensive program for association members during the fall and winter months.

Receive First Aid Certificates Following Intensive Training



A large group of employees recently completed the first aid course given under the direction of Dr. H. W. Garton, Works physician. Not all graduates are included in the above pictures. Top left—John C. Collins with the aid of Virgil Guebard demonstrates the pressure point to stop severe bleeding. Others, left to right, are Edith Mae Williams, Marion F. Bacon, Edward J. Kallmeyer, K. L. Greidenstein and William Diamond. Top right—Elmer Hart and Joseph Bailey with the aid of Ernest Lawyer demonstrate the chair method of carrying an injured person. Center left—Dorothy Zurbuch and Katherine Hively demonstrate the saddle carrying method.

NEWS THROUGH THE PLANTS

Motor Generator Static

OF MICE AND MEN

It was early in the morning, when Elmer Wagner returned home from the Planning Group's stag party; and the ride home had created an appetite that annoyed our hero. So, as a consequence, upon entering the house, he headed straight for the ice box. But as he stepped into the kitchen, a strange sight met his eyes. Mice were running around playing games and hiding under the furniture. Elmer could not believe his eyes, feeling perhaps this vision was due to the soft drinks he indulged in at the party. All the rest of the night was spent trying to solve this puzzle and he arose the next morning determined to put his mind at rest. The next evening we find our hero setting traps all around the kitchen and the following day his efforts were rewarded. Two of the traps held mice, his worry was over and his chums at work decided the animals entered through the holes Elmer drilled while installing his thermostat last winter. Such is the tale of mice and men.

COULD IT BE

Mary Hartman came to work the other day and related a strange tale of "sea going chickens" in the vicinity of their rural home. According to Mary, huge puddles of water surrounded the new home and chickens were swimming about with the greatest of ease. Which causes us to ask, could the "chickens" be "coot"?

PLEASE NOTE

To end all discussion and check all rumors, Bob Archbald wishes to announce that he never was, is not, and has no intention of being Frank Archbald's son.

STRENGTH

Jerry Michaels came to work the other day, very elated. Said Jerry, "I don't know my own strength; just pushed down on the seat of my car; and made three holes in the seat cover". But this illusion was short lived for it seems that while checking Jerry's battery, (I mean in his car) the attendant laid the battery cap on the cover and the acid did the rest. If Jerry had not pushed, the spots would have fallen out anyway. So our hero resumed his diet of "Pep" and "Wheaties" in his search for strength.

SILENCE IS GOLDEN

Jim Stouder, whose favorite indoor sport during the long winter months is slaughtering mosquitoes in his bathroom had a narrow escape the other day. Jim was doing a little fancy painting on the house, when in the distance he saw what appeared to be a swarm of mosquitoes. Our hero drew forth his trusty mosquito call, blew several blasts and immediately the swarm turned with military precision and headed in his direction. But this was not a friendly invasion, it seems that what Jim thought were mosquitoes turned out to be wasps, who irritated by the "call" thinking Jim was giving them the "bird" dove at our hero with the fury of a dive bomber squadron. Jim took one look, slid down the ladder and made the back door two jumps ahead of this angry swarm. This harrowing experience in itself was not so bad, but he told "Dagwood" Fisher, oracle of Bldg. 19-3, and as he later stated, "I told that buzzard and three minutes later five people came up to ask me about it."

Which proves, "Silence is golden" or something.

19-4 Spot Jottings

Congratulations to Mr. and Mrs. Gene Egts on the birth of a baby girl. Mrs. Egts was the former Leona Lauer and worked in Bldg. 19-4. . . . Josephine Offerle Budd, who is leaving us this week, invites her friends to drop in and see her when they are in the neighborhood of the new Budd store at the Upper Huntington and Miller Road point. . . . Frank Beatty was proudly passing cigars and candy last week in celebration of the arrival of Mickey Lee.

Mrs. Scarponi (standing in swimming pool up to her neck)—"My goodness, Tony, where's da baby?"

Mr. Scarponi (beside her)—"He's all right, I gotta him by da hand."

Walter Elliott's trip to Indianapolis has the stator group convinced that he has joined the expansion program.

Mabel: "Have you heard I'm engaged to an Irish boy?"

Violet: "Oh, really?"

Mabel: "No, O'Reilly."

TO DWIGHT

In every enterprise there is some individual who hidden in the background, engineers and directs the destiny of that particular line of endeavor. Such an individual is Dwight Myers, Division Editor of the Motor Generator Static column in our Works News. He leads a quiet unassuming life, keeps his name out of the "news" brings other peoples joys and sorrows before the public by the same medium. It is only fitting that "we" the people should know more of this retiring young man. Of his early life we say little except that he was born very young while residing with his parents, and as he grew older his outstanding ability to make hard things easy, or easy things hard, began to assert itself. He went through the usual list of children's diseases. Fell on his head a few times and finally adopted the cost department as his vocational love. Besides being married and having a fine family Dwight has figured in several noteworthy endeavors such as were related in "He loves flowers" and "Buttercup." However many little personal happenings have been missed, such as his desire to help prepare lunch at all parties thus assuring himself nice plump sandwiches. His crowning endeavor, that of building a large stoop at the cottage, andusing (according to authentic reports) a dish pan in which to mix the cement and his wife's electric mixer as the instrument for stirring the sand, cement, and water together. Nor will his many friends forget that night at the stag party held at a lake, when Dwight, tired but happy retires for his early morning nap. Scarcely had this young man gone to sleep before some villain in the crowd, crept up to the bed and with a loud "BOO" jumped at Dwight. Not fully aware of what was happening but being a fast thinker our hero, taking the only avenue of éscape immediately fell out of bed with a resounding bang; and did not fully recover composure for almost an hour. Thus we attempt to bring to you, his public, a few of Dwight's human little traits. Those traits people never realize exist, in one so calm, cool and businesslike.

SAYING OF THE WEEK

Jerry Frye remarks, "The milk of human kindness does not come in bottles".

HAPPY BIRTHDAY!

Dorothy DeHaven, the little girl with the big smile, who types "Motor Generator Static" for the Works News, will celebrate her birthday August 24th. Goodness how these children do grow up! So we all say "Happy Birthday 'Dot' and lots more of them."

P.S. Dorothy did not type this.

Best wishes to Rose Steiber, Bldg. 26-5, who will be married on September 14.

LaVerne Shuster, Bldg. 26-2, is back to work from vacation and he says he didn't have a dull moment.

Walter Trautman, Bldg. 4-2, returned to work after two weeks' vacation. He spent most of the time at Pretty Lake resting and fishing. Of course, we believed his fish story. He said the dog fish were biting extra good.

Who said Don Wagner was the only hill-billy in Bldg. 4-2? There's Shorty Sollberger who spent his vacation at Nashville, Indiana, in Brown County. He said the hills were extra high as he went down one hill that was 400 feet straight down.

Ask Hildabelle Warren, Bldg. 4-3, to sing her version of the song she calls "The Peanut Bender". We haven't heard it yet, but it's bound to be good.

If Ruth McCuaig, Bldg. 4-3, buys a hat with fruit or vegetables on it with the money off the check pool, she better look out. The girls in Group 13-59 might take the trimmings for the treat she owes them.

Won't someone please enlighten Paul "Rip Van Winkle" Berghorn? Although the Police Department claims there hasn't been a mounted policeman in Fort Wayne for at least 18 years, he still insists that he saw them marking parked cars 3 years ago.

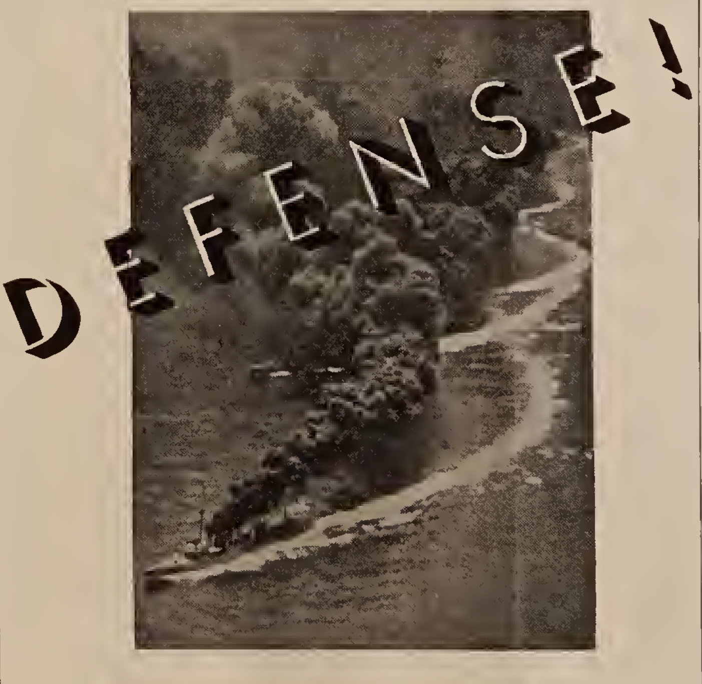
The girls of Bldg. 4-3 all say Art Brandenburger still has a chance now that Frank Quinn, Bldg. 17-1, has taken unto himself a bride.

Slips And Chips

Sir Viss, Bldg. 4-4

Another week has rolled by and I haven't received any names for the goat Charley Meyers keeps. Can't you do something about it and send in a name or two. . . . Last Saturday Enoch Woodrow Hursh was married. We haven't heard a word from him and can't find out where he is. We will just wait until he returns for further information. . . . The stork brought a bundle from heaven to the DeVeny home last week. Congratulations to Russell and Mrs. DeVeny. It is a bounding baby girl, Caroline Ann. . . . Breezy has a bit of news that just wouldn't fit into the paper, so he says. I really would not know but it seems that the St. Joseph County court house was sold last Saturday night to an unidentified person. Please don't tell anyone if you hear the news because Breezy was at the sale. . . . Robert Till is becoming very nervous and a bit puzzled. Robert is to be married one week from tomorrow and the boys have been very lenient with their advice. It may not be as bad as they say, Robert. . . . Ewald Stinsmuehlen is away on his vacation this week. He is following Ed's route to the big ones, he hopes. I don't know but I do hope he doesn't find it necessary to hide behind the piling as did Ed. . . . Speaking of vacations, Marie Wickleman has just returned from a very quiet and pleasant vacation which she spent with her friends. She was down on the farm. . . . I see that Ralph Hardy gets the Works News, so I'll just say for the gang, Hello Ralph, we miss you.

Mr. and Mrs. Ted Mullins, Bldg. 4-3, have returned to work after spending two weeks fishing. We are all wondering what became of the fish as Ted hasn't been doing the usual bragging.



CARELESSNESS IS AN ENEMY which endangers the fire-safety of this plant . . . . DON'T let *your* carelessness start fire.

News On The Nose 4-5

Dear People in Bldg. 4-5:

Your columnist, that's me, has many apologies to make to you. First, we're sorry we haven't dished the dirt to you each week as promised, but we can't dish what you don't do. Secondly, if we've skipped announcing the very important event of your wedding—forgive us—Cupid is just too fast for us to keep up with him. Thirdly, we apologize for Andy "Red" Lee—he needs it, doesn't he? . . . We've been wondering what was the matter with Leo Nyboer's photogenic possibilities. The Works News photographer had to make two trips and it took them three weeks to get up the nerve to publish Leo's smiling image. . . . Cleon Oyer, Bldg. 4-1, and Al Ray, Bldg. 4-5, drove down Broadway for lunch the other noon. After a good meal and a nice little jaunt back to ye old stamping grounds, Cleon remembered that he had left his car at the restaurant—so back he trotted after Lizzie. Did you ever retrieve the Chevvy keys, Cleon, or are they down in Davy Jones' locker by now, we'll betcha? . . . Roger Schuster believes in nursery rhymes, and his favorite one is Old Mother Hubbard whose cupboard was always full. Whenever he's hungry, he has only to tell Hilda Walda who has a locker well-stocked at all times. . . . Myron Richards makes news this week with the story of two spiders in his basement who captured and hung a live mouse to the beams. Call for Mr. Ripley!!! . . . George Seabold, Bldg. 4-5 commutator section, has this fish story told on him. He sent his wife to buy him a Michigan fishing license for his fishing trip to Wisconsin because he was going to fish in Lake Michigan. . . . Several weeks ago, the company auditor made the rounds of the Bldg. 4-5 office as pay-master. When he asked Stu Herring to repeat his clock number, the only one that came to his head was one that was changed five years ago. Betty Williams was so startled she could think of neither name or clock number, and Jeanne Fox told the surprised auditor that she didn't have one coming. She insists that she thought he was distributing profit-sharing checks. . . . Maurice Reed and Irv Koehlinger have started a private exchange system of trade, and what do they care about inflation and luxury taxes. Reed presented Koehlinger with a dog. Koehlinger retaliated with a couple of chickens and some cash was exchanged, then for 50 cents a harness was thrown into the bargain and the cash came out even. Now everyone is happy and the two traders are both wondering who got the best of the bargain. . . . Herbie Landstoffer is still shaking his purty black curls in bewilderment because a mere woman beat him in a game of golf by one stroke. . . . Oh gawrsh—now Ray Hammond won't be able to work for another hour, 'cause that glamor-gal from Bldg. 6-4, Ginny McCormick came over to brighten our office for a few minutes. Wish I were young and single, Ray, I'd give you some competition. . . . Congratulations, Joe Trentadue, and good luck in the days to come with your new wife, lovely Helene Blauvelt Trentadue. . . . Best wishes also to Blanche Kayser who will soon say "I do" to Private Larry Millstead, now stationed at Baer Field, Fort Wayne. . . . We join in hoping for a speedy recovery for Frank Shidler who is convalescing in the Lutheran Hospital.

NEWS THROUGH THE PLANTS

From The Feminine Viewpoint

By Irene Perry and Hilda Barthold

"Mary had a little lamb,
Its fleece was white as snow,"

The little poem that begins with the two lines above is perhaps as well-known as any in American literature, certainly it is frequently quoted, sung, and parodied. There are many people, possibly a large majority of those who read of Mary and her lamb or whose mothers repeated the poem for them, do not know that Mary was a real, little New England girl who had a lamb, and it really did follow her to school one day.

Mary was Mary Sawyer, who was born in 1806, and she was nine years old when her father gave her a tiny lamb. Mary cared for the lamb and it became her playmate and constant companion. The lamb followed her everywhere and one day as Mary and her brother Nat were going through the fields to the school, they heard the lamb bleating as it came toward them. A little sly urging from Brother Nat and Mary consented to take the lamb to school with them. She coaxed the lamb to lie under her desk, but when she went to the front of the room to recite, the lamb went too, and was discovered much to the amusement of the teacher and the other children.

A young man, John Roulstone, was visiting the school that morning, and next day he rode up to the school while the children were at play in the schoolyard and gave Mary a slip of paper on which he had written the first three verses of the now-familiar poem. Years later, the last three verses were added by Mrs. Sarah Josefa Hale, editor of "Godey's Lady's Book."

Mary lived to be an old lady, and in 1880 when a large fair and benefit was held to raise funds to preserve the Old South Church, some one suggested that they invite Mary, now Mrs. Tyler, to tell the story of the lamb that "followed her to school one day." Mary agreed and not only did she tell the story, but she ravelled out two pairs of stockings knit for her by her mother from the first fleece from her lamb, and sold bits of yarn fastened to a card with her autograph, thus raising a hundred dollars or more for the fund to preserve the Old South Church.

The schoolhouse that Mary attended was known as the Redstone school, though it is a frame building, painted red, and was used as a schoolhouse until 1856. The building was used for several different purposes and Mr. and Mrs. Henry Ford discovered it in 1926, and in 1927 Mr. Ford bought the school and had it moved near the famous Wayside Inn. Some sixteen children from Sudbury, Massachusetts now attend the school at regular sessions.

It is interesting to remember that the first verse of "Mary's Lamb" were the first words recorded on a phonograph record, spoken into the first phonograph made by Mr. Edison, himself.

M.B.A. PATIENTS

General Purpose Motor: Martha Schroeder, Medical Center Hospital; Dorothy Sales, Lutheran Hospital; Astrid Anderson, 1628½ S. Calhoun St.; Rodney Stair, 218 W. Wash. St.; Agnes Parcher, 1057 Charlotte Ave.; Marjorie Netterfield, 2214 Thompson Ave.; Josephine Meehan, 1717 W. 3rd St.; Robert Mellinger, 1822 E. Wayne St.; Jeanette Lauer, 1302 E. Berry St.; Wilber Gray, 1122 Jackson St.; Frank Shidler, Lutheran Hospital; Walter Frede, 1425 W. Wildwood Ave.; Mary Chalk, 2817 Lillie St.; Leonard Beckman, 2103 Weiser Park Ave.; Joseph Bahr, St. Joseph Hospital; Lelia Byall, R. R. 2, Roanoke, Ind.; Everett Smith, Pierceton, Ind.

Transformer: Ralph Walters, Markle, Ind.; John Bostick, 344 S. Cornell Circle; Betty Krausz, 333 Dalgren St.; Irene Kennig, Waynedale; Melvin Overman, 2101 S. Calhoun St.

Series and Specialty: Donald LaMaster, 2131 Oakley St.; Bessie Goins, R. R. 9, City; Edna Butler, 635 E. Wayne St.; Walter Steup, 2108 Pleasant Ave.; Vera Ward, St. Joseph Hospital.

Tool Dept: Martin Walsh, R. R. 8, City.

General Service: June Richardson, Huntington, Ind.

Winter St.: Kenneth Wyatt, 1206 Burgess St.

Left the Hospital: Miriam Valentine, Ed. Auth, Ralph Watson, and Charles Abbott.

Returned to work: Rose Walgamuth, Gladys Crow, Lule Cline, Calvin Long, Dottie Hazelrigg, Edna Callon, Nevii Nagel, Richard Beltz, Virginia Ayers, Richard Hoover, Ursula Mengerson, Gertrude Wagner, Eda Tarr, William Luse, Ethel Evans, George Lambraff, Florence Sheehan, Margaret Compston, Paul Hendricks, Harold Allen, Carl Moore, Margaret Wisemer, Imogene Seibert, Florence Rinehart, and Harold Brudi.

We understand that Earl Hoff, Bldg. 26-2, lost two bucks on a novel wager. Maybe he can bet the other way and win it back.

Sleuthing In 4-6

We were all glad to see Captain Wilbur Boltz, who stopped in for a visit with us last Friday afternoon. He has just returned from Louisiana and is now headed for Detroit, where he will spend a month or possibly six weeks making a study of conditions concerning plants making mechanized equipment for National Defense. . . . Esther Selzer evidently thinks "a plow horse is all right for plowing, but a riding horse is a horse of another color." Anyhow, she bought another horse whatever the reason. Going into the business, by any chance, Esther? . . . Wanted: An expert detective to solve the mystery as to how the beans and hominy found their way to Helen Forst's plate in the cafeteria last Wednesday noon. "All of a sudden, there they were", and nobody seems to know how or why. . . . Wilma McKay can really make the typewriter keys fly. In fact, they fly clear off the machine. She knocked the "E" out of her own machine, and then knocked the "L" out of Elsie Swank's. Hide your typewriters, girls, here comes Wilma. . . . We all know that Celeste Moran is a fast worker, but she would have to be to keep up with her family. In a year's time she celebrated the marriage of a sister, and also a brother—not to mention the arrival of a nephew. So Celeste is taking a day of her vacation on the 20th. You'll need a vacation, Celeste, after all that celebrating. . . . Walter Hahn will need the services of an artist to make his identification badge picture look more natural. He will quite likely have trouble getting into the building, since that —well, you name it—has appeared on his upper lip. . . . Don't waste your money buying alarm clocks, folks. Just call on either Toni Kennedy or Rosemary Pond. They did a very efficient job of getting Dorothy Mueller out of bed 'way after 11 o'clock the other night. Just ask Dorothy for details. . . . We regret the fact that the time has come when we must say "Good-bye" to Pauline Gehrlich, who is leaving us today. Our best wishes go with you, Pauline. We hope that good luck and happiness are waiting for you in Arizona.

Frank Kimble, Bldg. 4-3, is planning to take in the Black Hills of the Dakotas on his vacation. We are all wondering if the family bus can take it because the farthest it has ever been away from home is Ligonier. Surely it will be a surprise and a joy to the old bus to be able to gallop o'er hill and dale of some distant countryside.

Neva Baker, Bldg. 4-3, reports she gained five pounds on her vacation.

Plastic Flashes

The Things We Love:

Nadine Cobb's habit of saying "Sho Nuff"—Carl Sleppy's seaman's walk — Carmelita Fough's generosity — Gene Diehm's curly hair—Cherry Cokes—Addie's habit of ending a sentence with "else"—Mary Ward's lovely clothes—southern fried chicken—Waneta Beeman's beautiful black long hair—Earl Ealing's quiet humor—Helen Houser's eyes—Chocolate cake—Bob Edgar's off key whistling—Bettie Adams' personality—Betty Baxters' friendliness—and last of all but not least Arba Kurtz's cheerfulness. We also love the general all around "congeniality" of the kids we work with—but most of all we love this—Our Country.

The theme song for Betty Perry is—"The Bad Humor Girl."

We doubt if Fred Schaefer will sleep sound after this—for further details see Fred.

This is just to prove to Joy Stuckey that she is picking on the wrong person and we'll put her name in the news every week hereafter.

Why doesn't Kenny Handchy like his nickname of "Adrian?"

Ralph Foust above all appreciates the new location of the Tool Room. He constantly expresses his feelings by singing. If the vicinity weren't so noisy, everyone could enjoy the popular tunes of the day.

Good-bye now,
"The Tillies."

Thisa And Thata 19-5

We extend our sympathies to Faith Faulk whose sister recently passed away. . . . A speedy recovery to Vera Ward who was seriously injured in an automobile accident. . . . We would like a little more information about Florence Siebert and the beauty contest. Come on, Florence, tell us about it. . . . It is reported that Veva Healy has been having trouble trying to keep rats from making her home their winter quarters. She decided on a method of her own and planted pieces of cheese in her pantry. When the rats assembled for the feast, she slammed the door and stopped up all the exits. Unfortunately, however, someone opened the pantry door and out came the rats. She is now thinking of setting up housekeeping on the roof.

Velma Meads, Bldg. 26-2, went fishing and caught a solitary fish. Bet it will make her enthusiastic for the next trip.

It is reported that Elmer Webb, Bldg. 26-2, is wearing riding boots and spurs to work. First thing we'll hear him muttering "My kingdom for a horse."

SANDY SAYS

My Uncle Angus worked for years on a perpetual motion machine, and finally had tae gie it up.

My Uncle Douglass just about lost his cow, from feeding her milkweed, sugar cane, and hops, hoping tae get malted milk.

My Cousin Colin practically ruined his model T, trying tae redesign it tae run on a mixture o' kerosene and water.

Other members o' the clan, including me, hai tried many other ideas, mainly tae conclude that ye canna get something for nothing.

But that was all before the big announcement o', "Double Awards For August", in the colored supplement o' the WORKS NEWS.

Now ye should see the lads o' the clan working on cost reduction ideas. O' course, as Cousin Colin says, it would be just our luck tae rack our brains for the whole month o' August—and then get a swell idea the first week in September.

But that's not stopping us. And I don't know why I'm not stopping right here. Double awards alone are plenty o' reason for making good suggestions. But that's not all we get out o' them.

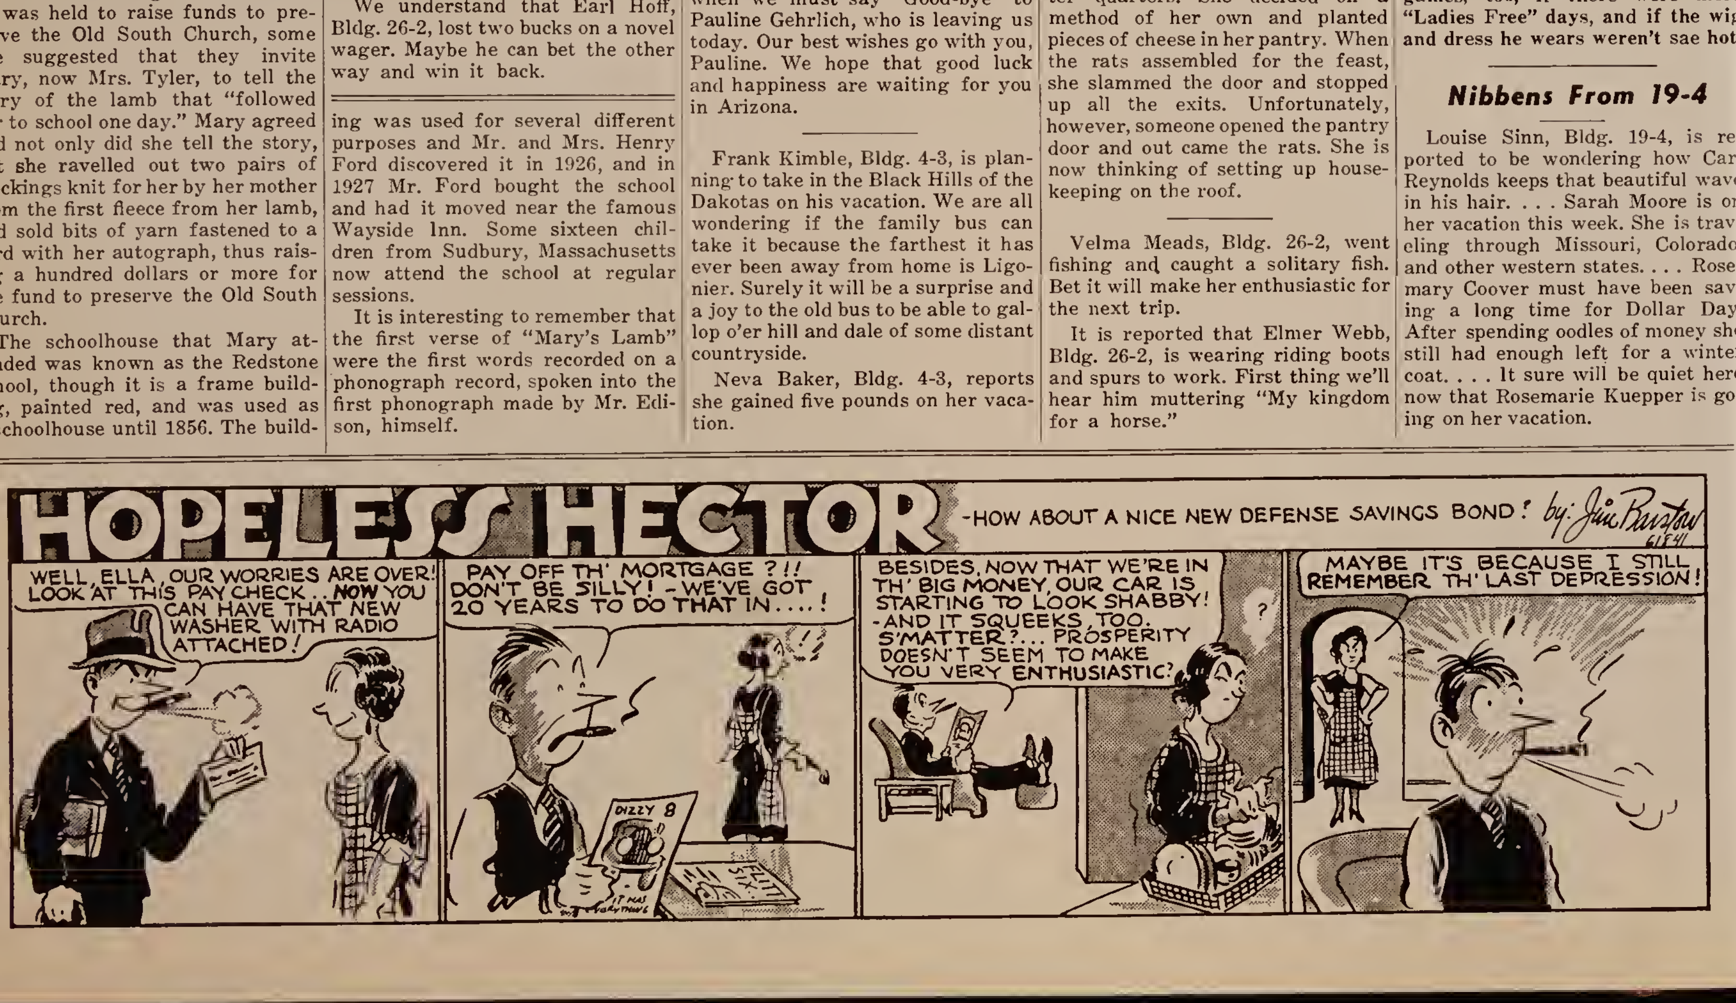
The profit sharing check we got last week might not have been possible if Suggestions hadn't helped tae make more profits. Remember, there must be profits, tae hai profit sharing.

And, too, remember the best award o' all,—a good, strong, mechanized defence o' our Country, plus a few luxuries tae help us to enjoy living here in the Land O' the Free.

That reminds me o' my Uncle Angus. The mention o' anything free reminds me o' him. And he goes in for luxuries, too. In fact, during hot weather his favorite luxury is baseball. And he'd see a lot more games, too, if there were more "Ladies Free" days, and if the wig and dress he wears weren't sae hot.

Nibbens From 19-4

Louise Sinn, Bldg. 19-4, is reported to be wondering how Carl Reynolds keeps that beautiful wave in his hair. . . . Sarah Moore is on her vacation this week. She is traveling through Missouri, Colorado, and other western states. . . . Rosemary Coover must have been saving a long time for Dollar Day. After spending oodles of money she still had enough left for a winter coat. . . . It sure will be quiet here now that Rosemarie Kuepper is going on her vacation.



HOPELESS HECTOR
-HOW ABOUT A NICE NEW DEFENSE SAVINGS BOND! by: Jim Barstow 6-18-41
WELL, ELLA, OUR WORRIES ARE OVER! LOOK AT THIS PAY CHECK.. NOW YOU CAN HAVE THAT NEW WASHER WITH RADIO ATTACHED!
PAY OFF TH' MORTGAGE ?!! DON'T BE SILLY! - WE'VE GOT 20 YEARS TO DO THAT IN....!
DIZZY 8
BESIDES, NOW THAT WE'RE IN TH' BIG MONEY, OUR CAR IS STARTING TO LOOK SHABBY! -AND IT SQUEEKS, TOO. S'MATTER?... PROSPERITY DOESN'T SEEM TO MAKE YOU VERY ENTHUSIASTIC?
?
MAYBE IT'S BECAUSE I STILL REMEMBER TH' LAST DEPRESSION!

G-E Man An Eye Witness Of The Collapse Of France

Harry A. Granary at his desk in Schenectady.

"We in America must do everything in our power to help Britain stop Hitler now, or we will be forced to make a choice between living with, and cooperating with Hitler in a Germanized world, or setting out to break him all alone."

Such is the belief of Harry A. Granary, an International General Electric man now in Schenectady, who was an eye-witness of the invasion and collapse of France. He was impressed by the efficiency of the invaders and warns that "we must develop a plan of our own big enough to defeat Hitler's."

"When the German army of occupation took over the city of Bordeaux last year, every soldier marched directly to his quarters," Mr. Granary recalls. "This remarkably thorough organization of the German army, more than anything else, made a great impression on all of us who witnessed what it accomplished. Those boys knew the towns they took as they knew their own home towns. Where to get food, trucks, supplies of all kinds. What is more, not only did all the officers speak excellent French, but every man knew at least enough to make himself understood."

Mr. Granary, who for 10 years was traveling representative in charge of appliance sales for International G. E., covering all of Europe except England and Russia, was in Norway when war was declared. After flying to Denmark and thence to Holland, he was forced to wait three weeks in Amsterdam before a permit to re-enter France and transportation to Paris could be obtained. Trains were crowded and slow. Changes had to be made at each frontier. When he finally reached Paris, many of the staff were already leaving. However, together with E. A. Baldwin, I. G. E. Vice-President in charge of European affairs; C. M. Popp; Louis Lehuraux, a native Frenchman; and P. J. Woolford, an Englishman, Granary elected to remain.

Business was at a standstill. Mail was extremely slow—letters sent by clipper sometimes taking a month for delivery. Travel was nearly impossible. So Mr. Baldwin returned to America after a few months, and Granary joined the "Relief Coordination Service," a group organized by Americans which was later incorporated into the Red Cross, to help take care of refugees pouring in from Holland and Belgium.

"Feeding and obtaining clothes for the thousands who had just packed up overnight was our main problem," he explains. "Most of them slept out in camps."

"With the invasion of northern France difficulties multiplied. Everyone who could got out of Paris. We decided to move the I. G. E. office to Hossegor in southwestern France, and our entire remaining staff and much of the office equipment and records were piled into three automobiles. Gas, which had been strictly rationed, was distributed with a free hand, 'rather than let the Germans get it.'

"There was no train transportation. Those who didn't have cars went by foot, by bicycle, by horse, by dog-cart. The confusion was terrifying. Fleeing south with Belgian, French and Dutch refugees, to the accompaniment of screaming babies, were whole detachments of the defeated armies from the north of France and Belgium. Troops were moving up from the south in enormous numbers for the defense—never carried through—of Paris. Progress was interminably slow. What with the congested roads, constant stopping of cars by pedestrians begging rides, thousands and thousands of both moving vehicles and those abandoned when gas ran out and no more could be obtained, the inability to drive at night since no lights were allowed, wornout dogs and horses fallen in the road, the trip from Paris to Hossegor took us five days. Normally it is an easy one-day drive.

"What impressed me most at the time was the attitude of the fleeing civilian French. Except for occasional moments when they stopped to think of all they were losing, they treated the whole disorganized exodus as rather a big joke. In spite of their wretched situation, friends and strangers alike talked and laughed good-naturedly along the road. The nervous high-

(Continued on Page 8)

First Aid Classes

(Continued from Page 1)

tional defense activities all along the line, a further increase in these figures may well be expected. The possibility of mass accidents in industries is something that may require a First-Aid program to meet the situation.

A group of Fort Wayne Works employees, some of whom are shown on page 4 completed First-Aid training this year, and have just received their First-Aid cards from Red Cross headquarters at Washington, D. C.

All classes were conducted by qualified instructors employed at the Broadway and Winter Street Works. These instructors have had special training in First-Aid and take annual reviews to keep them up to date on teaching methods and techniques.

The classes just completed were taught by Hoy Bastian, Bldg. 17-1, Lane Breidenstein, Bldg. 26-3, Jesse Hahn, Bldg. 4-2, Dorothy Zurbuch, Bldg. 17-2, and by Harry Chism, Paul Snyder and Joseph Goodman, all at Winter Street. Because of vacations and absences from other causes, some were unable to be present for the photographs.

The following employees completed the standard course (20 hours instruction):

Instructor, Dorothy Zurbuch: Katheryn Hively, Dorothy Scott, Rose Mary Spatt, Rosella Barrand, Kay Valiton, Julia Smith and Amanda Wiegman.

Instructor, Jesse Hahn: William Slatter, Carl Miller, Elmer Hart, Max Fretz, Joe Bailey, Ivan Standish.

Instructor, Hoy Bastian: Dale Brown, Robert Daring, Harold Fletter, Albert Flory, Fred Ginzel, Walter Hinrich, Joseph Kramer, Walter Kinsey, Ernest Lawyer, Don Mosure, Roy Pflueger, Norman Shane, Albert Stillwell, Albert Smith.

Instructor, Harry Chism: Edward Koester, Gladys Smith, Ben Lake, Edna Koester, Norbert Jacquay, Loring Gotschall, Dorothy Crawford, and Mildred Atherton.

Instructor, Paul Snyder: Wayne Cook, Cecil Goodson, Harry Richardson, Floyd Seitz, and C. E. Kreischer.

Instructor, Joseph Goodman: Robert Martz, Harold Reiter, C. Roy Ruegamer, and Forest Tustison.

In addition to completing the 20-hour standard course, the following employees took an additional 10 hours of instruction to qualify for the advanced First-Aid card: William Slatter, Carl Miller, Joe Bailey, Ivan Standish, Dale Brown, Harold Fletter, Albert Flory, Fred Gingel, Walter Hinrich, Joseph Kramer, Walter Kinsey, Ernest Lawyer, Roy Pflueger, Albert Stillwell.

Classes in First-Aid will be offered again this Fall. We have enough instructors at Broadway and Winter Street to take care of a large number of applicants. If classes are started early in September they can be completed before the Christmas holidays. Employees interested in Fall classes may contact the writer or any of the following instructors: Hoy Bastian, Bldg. 17-1; Jesse Hahn, Bldg. 4-2; Dorothy Zurbuch, Bldg. 4-2; Lane Breidenstein, Bldg. 26-2; John Bastian, Bldg. 19-3; George Casper, Bldg. 27; Elaine Goodman, Bldg. 19-5; Lillian Winkler, Bldg. 26-2; George Faulkner, Bldg. 21; at Winter Street, Carl Bobay, Harry Chism, Paul Snyder, and Joseph Goodman.

Customer: "Does a man with as little hair as I've got have to pay full price to have it cut?"

Barber: "Yes, and sometimes more. We usually charge double when we have to hunt for the hair."

Given Posts

(Continued from Page 1)

representative of the business administration department; W. F. Konow, named supervisor of planning and wage rates and F. T. Gamec, named supervisor of production and stock.

Appointments in the department are of unusual interest inasmuch as the product to be manufactured is something new to the Fort Wayne Works, and there is much to be done in the way of securing equipment and materials before initial production can be undertaken.

Mr. Bender, 419 W. Brackenridge Street, joined the Fort Wayne Works organization in 1922 and was assigned to the Transformer Division. After serving as time and cost clerk for a number of years he was transferred in this capacity to the Refrigeration Division. In later years he has been serving as assistant cost supervisor in Bldg. 4-6 and cost supervisor in Bldg. 4-5.

Mr. Konow, 126 W. Fleming Avenue started work in the Distribution Division in 1918. He entered the Apprentice Training School and graduated in 1923 as a machinist-toolmaker. After serving as a toolmaker in Bldg. 26-5 he was appointed methods planner and later to the position of supervisor of planning.

Mr. Gamec, 324 W. Darrow Avenue started his service in 1928 as a rotor assembler in Bldg. 17-2. Following various clerical positions in the General Purpose Fr. H.P. Motor Division he was appointed to supervisory positions on production, stock and date. His position before his present appointment was that of production supervisor of the hermetic motor department.

News Around

Hermetic Office 17-2

The cobwebs are hanging thick around Bldg. 17-2 this week and the only sounds to be heard are those of the office force tinkering. . . . Verne Castle completed twenty-five years of service recently so his vacation was in order. . . . Sleuthing is rather slim around all the silence so will give you all a rest until it is broken. . . .

The birthday dinner planned as a surprise for Golda Draggoo, Bldg. 4-3, also turned out to be a surprise on Fern Gilliland and Esther Schust, whose birthdays are the same week. Golda is now wearing a lovely diamond, and we understand she may have another ring in November.

An usherette was in the dentist's chair.

"Now, Miss," asked the dentist, "which tooth is giving you all the trouble?"

"Second from the left in the balcony," she replied.

It took a telephone call, Bob Klingle, Bldg. 4-3, and a hastily procured safety button to keep Helen Lord, Bldg. 4-3, from the perils of not working Wednesday afternoon.

Grace Ledbetter, Bldg. 4-3, has just returned from a two weeks vacation, which she said she greatly enjoyed.

Wanted by Ray Saul, Bldg. 4-3, an ear trumpet. Seems as though he has been having trouble getting the girls conversations right that he has been listening in on.

Margaret Niblick, Bldg. 4-3, and her gang spent Saturday evening at Art's place on Big Long Lake for a weiner bake and midnight boat ride. Her gang won the honors as Lucille Fruit of Bldg. 4 and her gang were too afraid to go out on the lake when it is dark.

Carl Christlieb and Ted Mullins, Bldg. 4-3, tried their new Johnson outboard motors on Big Long Lake last week end, and Old Man Wind gave the boys a little extra thrill.

The aircraft gang from Bldg. 26-5 are planning on a weiner bake some time next week. See Mike Schmidt for details.

"Pa," said Johnny, looking up from his composition, "is waterworks all one word or do you spell it with a hydrant?"

Carl Clevenger, Bldg. 4-3, not being as brave as Archie Boren, Bldg. 4-3, did not venture as far away from home on his vacation going only to Crooked Lake. However, from the picture he sent your reporter, he is catching some gigantic fish. Archie still holds the championship for the biggest fish caught, his being 1/32 of an inch longer than the largest caught by Carl.

The parking situation on the streets surrounding our plant is becoming quite acute. We are afraid that we are going to have to enlist the services of our super-councilman, Harold Hart, Bldg. 4-3, to exert a little extra effort in getting this matter cleared up.

"Yes, I've moved out into the country. It certainly has its inconveniences."

"What do you miss most?"

"The last train home at night."

Keen rivalry existed between some members of the Bldg. 4-3 and Bldg 4-2 gangs attending the city firemen's picnic one evening last week. Every one tried to outdo the other when it came to copping the prizes. A prize of 6 gallons of oil was won by Geo. Seabold, Bldg. 4-2. When the winning number was called, George stood up. The man in charge said, "Your name, please." George said, "Mr. Smith." The man in charge then said, "Snap out of it, George, come out from behind that phony handle and walk up here and claim your prize".

Deaths

Karl Stahl, employed in Bldg. 17-4, was drowned Monday afternoon at Pleasant Lake. Mr. Stahl, a toolmaker, was prominent in sports activities and at one time was an outstanding football player. He was a graduate of the Apprentice School and a member of the Alumni Association. Mr. Stahl became a member of the Quarter Century Club on Monday, the day of his death. Funeral services were held Thursday with burial in Lindenwood cemetery.

Harold Schwartz, an employee for the past six weeks in the Bldg. 17-1 offices, died on August 15 following a two-day illness. Funeral services were held Monday morning with burial in Greenlawn Memorial Park.

Robert Bunyan, Bldg. 26-13, wishes to thank his co-workers for their sympathy extended him in his recent bereavement.

Bldg. 4-4 extends their sympathy to Tom Staley in the death of his father.

The G-E CLUB

?

when will it open?

Rod-Gun Club Championship Shoot Sept. 7

Members To Compete In Pistol And Rifle Match For 1941 Crown

The annual championship match for members of the G-E Rod and Gun Club will be held on September 7 it is announced by G. F. Bowers, president of the Club. The 1941 rifle champion will be awarded a medal through the N. R. A. An added event will be the awarding of a medal to the pistol champion. This medal will be awarded by the Club.

It is planned to shoot the rifle event on the Club's 50 and 100 yard ranges, while the pistol course will be shot on the outdoor 25 yard range. Both events will be opened to all club members and will be conducted at no cost to the contestants. Last year's championship shoot, of which Lester Bland was winner, proved exceedingly popular and it is anticipated that even more contestants will turn out this year. In case of rain the contest will be postponed one week.

Club officers urge that all shooters who have not yet completed their military qualifications do so as soon as possible inasmuch as the outdoor range season is drawing to a close. Members qualifying for N. R. A. medals should be at the range Thursday evening or Sunday morning to register their scores.

G-E Shoe Team In Play-Off Finals

Having won the first round and tied Pennsylvania in the second round of the YMCA Industrial Horseshoe League, the G-E Club team is scheduled for a play-off and appearance in the finals if the play-off is won.

The individual standings for the three rounds follow:

General Electric

	W.	L.	R.	Pct.
Hahn	16	3	537	46.6
Kraft	14	4	463	41.5
Rietdorf	23	9	953	46.5
Binkley	12	8	571	47.2
Hartman	18	12	822	45.4
Cochoit	11	14	527	34.5
Total	94	50	3,873	42.9

Decatur G-E Club Tennis Tournament

Final plays have been completed in the Decatur G-E Club tennis tournament, with Paul Hancher as the 1941 champion. In the semi-finals Hancher won over Blythe 6 to 1 and Marklin over Laurent 6 to 2. In the finals Hancher won over Laurent 6 to 4 and 6 to 2.

Quarter Century Club

(Continued from Page 1)

banquet which will be at 12:30 o'clock. Following the banquet a short business meeting will be held and the membership will be addressed by Works officials as well as a speaker of national prominence.

G-E MAZDA LAMPS—STAY BRIGHTER LONGER. Employees' Store hours are from 10:00 a. m. to 4:00 p. m.

IN THE ROUGH
By
WALTER SUNIER

The 1941 annual city golf tournament really went over with a loud report this year with an entry of 152. 126 players finished and approximately one-sixth of them were G-E golfers. The G-E golfers who participated were:

Parker Motter, Brice Hamilton, John Gitter, Bud Morris, Bill Morris, Tom Gouty, Maurice Cox, Wyn Kirke, Pres Slack, Kenny Erne, Willie Adams, Bill Kayser, Ife Holmes, Walt Sunier, Carl Saaf, G. Imel, Lloyd Harshman, Von Whearly, Norm Wolf.

Parker Motter

There actually may have been more than this as we might easily have missed some in the rush and there might be some new ones we do not know.

Not only was G-E well represented but the runner-up, Parker Motter, is a G-E man. Parker works in Building 19. Parker led up to the last nine holes when the champ, Hal Schmidt, came in with a hot 33 and nosed him out. Since Parker won the championship in 1937 and was the runner-up this time we are running his picture. It does not do him justice because it was taken in the gathering dusk of a murky day, and the second day of the tournament was really murky.

Willie Adams, also working in Building 19, and also a former city champion, was well up at the top.

More interest was shown in this tournament than any held in the past. In addition to a large entry, there was also a large gallery. Parking space at Brookwood was at a premium and automobiles overflowed back to the bridge on the highway.

A little man was tearing down the street as fast as he could go, and behind him toiled the landlord of the local tavern in pursuit. At the corner a policeman stood regarding the scene with a smile.

"Why don't you help me catch him?" bellowed the landlord, as he drew alongside the man in blue.

The policeman looked surprised.

"He told me that you were racing him for the price of a drink," he said.

"So I am," shouted the landlord, "He hasn't paid it!"

G. E. Man Eye Witness

(Continued from Page 7)

tension and fear prevailing had the curious result of making everyone appear light-hearted and gay, though we all knew it was only a surface impression."

After establishing the I. G. E. office at Hossegor, Granary went to Bordeaux to continue his work with the Red Cross, which had moved its headquarters to that city. It was only a short time until Bordeaux, too, began to be evacuated. As the German army took over Bordeaux, Granary returned to Hossegor to join the local relief organization caring for 2,000 refugees in the little resort town, which has a normal population of only seven or eight hundred.

Food, particularly fruits and vegetables, was still obtainable, though the Germans took theirs first. The relief workers were allowed only one truck to bring it in from nearby Bayonne, and had to stand in line for hours. Most difficult relief problem, because of the disrupted state of all transportation and communications, was the locating of various members of widely scattered families. Many of the children didn't even know their own names. The problem had to be solved quickly, for the relief organization was allowed only a month of grace before all refugees were to be sent back to their homes.

"The real trouble I had with the Germans," Granary says, "came about when our I. G. E. Britisher was thrown into a concentration camp, and his wife (although a Frenchwoman), his daughter, one of I. G. E.'s secretaries who was English, and the wife of a British engineer working for us were required to report each day to the authorities and were refused permits to return to their homes in Paris. I finally did obtain permits for them, but only after many tirades on the harsh treatment meted out by the Germans, and those permits didn't do them much lasting good. They have since all been interned in concentration camps.

"Since censorship had completely stopped all incoming mail, although at that time one could still cable America through the American consul, we decided to close up the Hossegor office, and returned to Paris. The city was very changed. The Germans had taken over all the good hotels. There was no transportation except the subway—on which Germans rode free. Blackouts were still in order, with a 10 p.m. curfew. Many of my American friends were still living in their own homes, as no American property had been confiscated except that of the Jews, most of whom had left Paris early in the game. Food was getting scarce even then—October, 1940. It was almost impossible to obtain milk, and no butter or coffee had been available for six months.

"Worse was the fact that, because the German Gestapo dressed in ordinary civilian clothes, no one could be sure who was friend and who was enemy. No one dared talk to anyone else except in the privacy of the home.

"Still worse from my point of view was the total lack of any news at all from the outside world. At times I managed to tune in the BBC on a radio forbidden though it was, but even so it was impossible to learn how far America had gone toward war. This lack of information finally decided my coming home. I had no wish to be thrown into a concentration camp, which would probably be the fate of many Americans if we should enter the war. I sailed from Lisbon."

Speaking of the collapse of the French army, Mr. Granary expressed the opinion that it will be many years before anyone will know just where to place the blame. "There were too many factors involved," he said. "Opinion is too divided—some blaming the army, some the politicians, some the labor situation—old men blaming the youth, young men blaming the old.

"The spirit of the French people was very low when I left France. They had cried with shame and humiliation and sorrow when they heard that the armistice was arranged. Of one thing, however, I am certain. France will come back."

"If Britain falls now," Mr. Granary continued, "Germany's overwhelming ambition to rule the world will make extensive Nazi economic infiltration into the Western Hemisphere more than just a possibility, and we will find ourselves forced to make a choice between living with, and cooperating with Hitler in a Germanized world, or setting out to break him all alone.

"America," he concluded, "must not only put her industries—the finest in the world—her strong and enlightened manpower, her tremendous ability to produce, to turning out everything we can for Britain. We must cooperate with Britain in grasping the tremendousness of Hitler's plan and the completeness of his organization of his forces, and develop a plan of our own big enough to defeat Hitler's."

SCIENCE FORUM – by L. A. Hawkins

Q. Can ultraviolet light be seen better with or without yellow glasses?

A. Ultraviolet light cannot be seen at all, either with or without yellow glasses. Yellow glasses would prevent the ultraviolet light from reaching the eye at all; but, even if the ultraviolet light reached the eye, it could not be "seen." This doesn't mean that it would not affect the eye; but the optic nerves would not react to it, and send the sensation of light to the brain.

Q. If there are several types of human blood, are these types different in appearance?

A. There are four main types of human blood. They look alike, but laboratory tests can easily determine which of the main types of blood any given sample is. Blood transfusions must always be made from a person whose blood is of the same type as that of the person being given the transfusion.

Q. Why do tropical cyclones occur in the North Atlantic Ocean, but not in the South Atlantic Ocean?

A. Tropical cyclones, or hurricanes, can be produced only by a special combination of circumstances. They require warmth, moisture, calm air, and a twist to start them on their career. Therefore, they breed over calm, warm oceans, in the doldrums, or equatorial belt of calms, between the northeast and southeast trade winds. Over the Atlantic, because of the greater land mass in the northern hemisphere, the heat equator and the doldrums are always north of the true equator. Consequently there are no tropical cyclones in the South Atlantic Ocean.

Q. What is meant by a radio station operating on a certain number of megacycles?

A. That simply means that the station is radiating a carrier frequency of that number of cycles per second. If the station is operating on 4.3 megacycles, for example, it is sending out a continuous electromagnetic wave which is changing its polarity 4,300,000 times per second. The strength of this wave is varied in accordance with the speech or music which is being broadcast; and the reproduction of this variation in strength in the radio receiver is what enables us to hear the speech or music again. It is quite impossible, of course, for us to hear a frequency of 4,300,000 cycles per second. This very high frequency is used only to get the variations of speech and music from the radio transmitter to the receiver, and it is for this reason that it is called the "carrier wave."

Q. What are the main differences between the "Austempering" process and the former method of producing certain types of steel?

A. The old method involved quenching the steel from a high temperature to room temperature, and then reheating the quenched steel to "temper" or soften it to the desired degree of strength. The "Austempering" process involves quenching the steel in a hot oil or salt bath so that the quenching and tempering occur simultaneously. Steel quenched from a high temperature to room temperature by the old method often forms small internal cracks which weaken the metal and make it brittle. The advantages of the "Austempering" proces sis that cracks do not form during quenching in the hot oil or salt, and the metal turns out just as hard but is much stronger and tougher.

Plan Program For Opening G-E Club

Supercharger Superintendent and Successor Named

W. K. Williams

L. D. Hodell

The appointment of L. D. Hodell as superintendent of the new Supercharger Department which will eventually be housed in a new factory to be built on the Company's Taylor Street property is announced by C. H. Matson, assistant manager. At the same time Mr. Matson announces the appointment of W. K. Williams, assistant superintendent of the Specialty Transformer Division, to succeed Mr. Hodell as superintendent of the Hermetic Motor Department.

Temporary offices for the preliminary work of forming the Supercharger Division are in operation at the present time. Tentative plans

(Continued on Page 8)

Notice To Employees

Effective September 1, 1941, time payments on purchases secured through the Employees' Store will require a down payment, in all cases, of not less than twenty percent of the purchase price. In the past down payments of approximately ten percent were acceptable. The new ruling is in cooperation with the recently announced government regulation regarding installment purchases.

Employees' Store.

$60,750 Paid In Insurance During July

Four Claims Here Result In Payments Of $12,150. Grand Total Is $18,978,568

During the month of July twenty beneficiaries of as many employees in the six major apparatus Works of the Company received a total of $60,750 in death claim payments under terms of the Group Life Insurance Plan of the Company, according to the monthly compilation from the office of the secretary. There were six claims in the Schenectady Works for a total of $18,450. Erie Works also had eight claims for a total of $17,150. There were four claims in the Fort Wayne Works for a total of $12,150. In the Lynn River Works were two claims for a total of $7,000 and there was one claim in West Lynn for a total of $3,500 with one claim also in Bridgeport.

Since the first of the year, a total of $829,963 has been paid out in death claims throughout the entire Company. Of this total amount, $262,763 was free insurance while $567,200 was Additional Insurance.

The total of death and disability claims since January 1, 1920 now stands at $18,978,568.

Former Employee Leaves Bequest To Aid Students

Company officials are a bit agog over a recent bequest of $1000 left it by a retired former employee, for never in the 62 years of its existence has any money been left the company by an employee. The bequest came to light in the will of John E. Popper, an engineer who left the employee of the Company 30 years ago. His attorney said that Mr. Popper arranged the gift two days before his death because "he held in great esteem the General Electric Company and felt he would like to do something for that organization and for the young men coming into it." Terms of the bequest specify that it be used to assist one or more students in Company training courses.

John Popper came to General Electric in 1906 and remained until 1911. He was a member of the Contact Service department, that lusty band of intrepid installation men who set up General Electric's big machines "on location." So well did he do a job for the Mukden, Manchuria Light Works that he was offered the job of general manager of the outfit and remained there until the Japanese took over Manchuria in 1934. Then he returned to the U. S. and California. He died recently as the result of an accident in Los Angeles.

Plans to make use of the unusual bequest are under consideration

Employees and Families To Participate In Event

Apprentice Alumni Association Holds Week-End Outing

A week-end outing will be beld on September 13 and 14 by the Apprentice Alumni Association at Hamilton Lake. Headquarters will be the Island Park Hotel.

The outing will officially open at 3:00 p.m. on Saturday, September 13, and an excellent program of outdoor sports has been arranged for the balance of that day and for Sunday. This will include swimming, boating, tennis, shuffle board, darts and fishing.

Reservations will include room at the hotel, supper at 7:30 p.m. on Saturday and breakfast and luncheon on Sunday. Reservations will be $3.00 and they must be made by next Friday, September 5.

All Club Facilities To Be Available Free Of Charge On Evening Of September 11

A gala occasion for all Fort Wayne Works employees and their families will be the grand opening of the G-E Club building for the 1941-42 season, to be held on Thursday evening, September 11. On this evening all club facilities will be free for the use of those attending and refreshments will be served during the course of the evening.

Present plans call for bowling matches between various clubs and groups earlier in the evening with the alleys open to all bowlers immediately following. Negotiations are under way to secure a well-known dance orchestra for the dance to be held throughout the evening in the gymnasium.

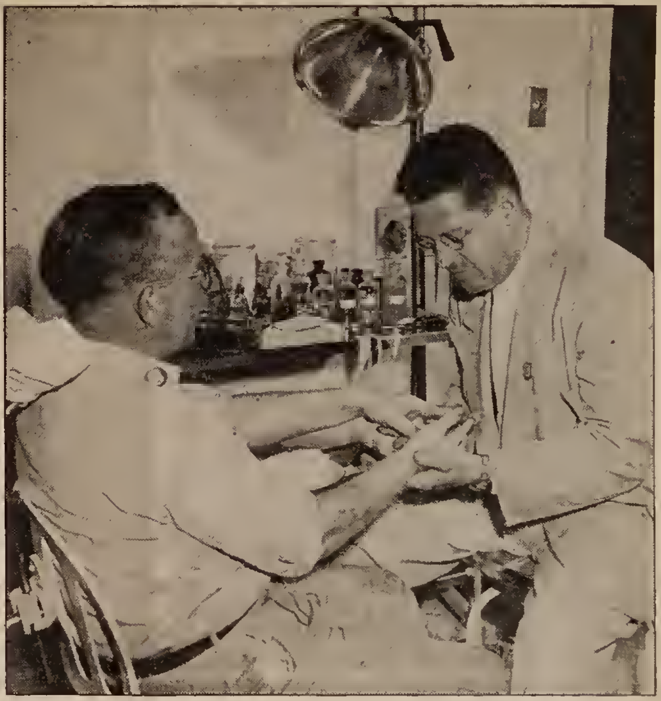
Physician Joins Medical Staff



Dr. Leslie Wilson and Thomas Roberts, Bldg. 26-5

Announcement is made by Dr. H. W. Garton, Works physician, of the appointment of Dr. Leslie Wilson as a member of his staff. Dr. Wilson, after completing high school, spent a year and a half at the State Teachers College at Bowling Green, Ky., following which he entered Indiana University and received his B.S. degree in 1926. He received his M. D. degree in 1928 and served an internship at St. Vincents Hospital in Indianapolis.

Following a general practice he took a post-graduate course in surgery at the Graduate School of Medicine, University of Pennsylvania and then served as resident physician at the local Methodist Hospital for one year. Since July 1940 he has engaged in general practice and surgery in this community.

• 'Symphony' in Middletown

Middletown, the average American community, has a "symphony." It's had one for a long time. And the Middletown Symphony has added a new number to its repertoire—National Defense, by Uncle Sam.

The "symphony" is Middletown's industry. Middletown's workers are the players, and machines of production are their instruments. Management conducts.

Industry built Middletown. And by building many other communities like it, industry helped build a whole great nation. Now industry is aiding in the defense of that nation. The symphony is playing a tune as important as any ever written for it!

Like the air we breathe, or the blessings of freedom we enjoy, our industries in this country are often taken for granted. Yet the smoke arising from their chimneys could well serve as an index of economic health and happiness.

Yes, indeed, Middletown's factories have always been important. Today, they are vitally so. From them must come the sinews of defense—not alone of physical property, but defense of America's freedom, the most priceless heritage of all.

No wonder that all ears are turned to hear Middletown's symphony today as it plays its mighty orchestral accompaniment to freedom and the ideals in which all Americans believe!

• They're All Ready!

More and more as clouds roll back and the full picture begins to emerge, it becomes plain that all of industry is contributing in some way to defense. We have a big country, and hence a big problem in rendering it secure, and as the rearmament program continues to progress, we can see that its ramifications extend everywhere. Summing up, we're all in it!

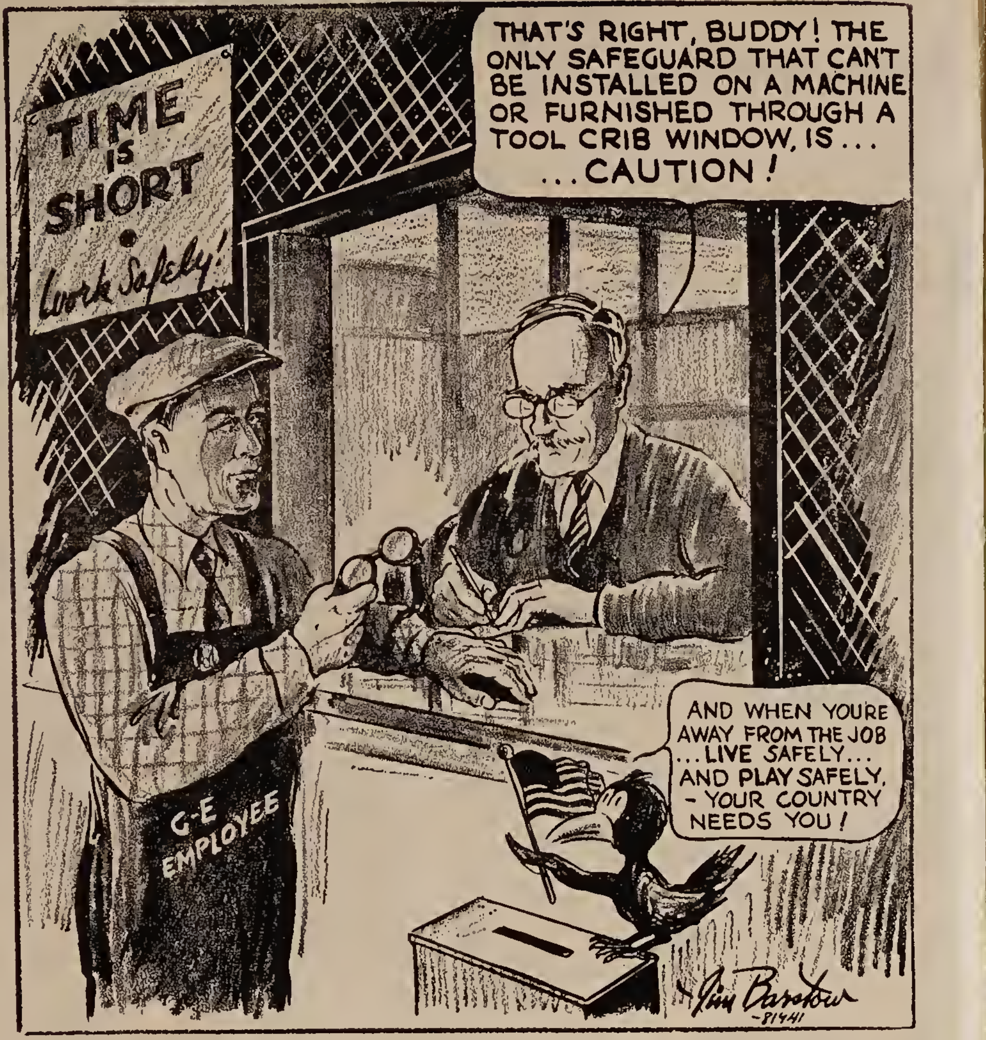
A recent dramatic example lies in the field of office equipment. Merely administrating an effort of this size is a major job. And when the manner in which this one big "peacetime" industry is affected by defense has been examined, it is at once clear how far the present program really reaches. William L. Batt of the OPM packed the whole story into one telling phrase when he declared in effect that the typewriter has now become an integral piece of defense equipment.

Experts estimate that government purchases of office machines this year will be about $100,000,000, or one-third of all office machine sales. More than that, defense may directly or indirectly account for three-fourths of all sales in this field.

Fortunately, this industry—like American industry in general in both defense and non-defense fields—has been ready to meet the new demand. Tabulating machinery has rapidly been designed for the specific purposes of government. Throughout all industry, research and engineering have been "tuned up" throughout the years, ready to do more than the minimum required of them.

American ingenuity is paying dividends in all manufacturing, whereas the "rule of force" in totalitarian lands has been able to concentrate in full on arms and ammunition. A better way of life pays off in practical terms like these!

IT'S UP TO YOU !



TIME IS SHORT
Work Safely!
THAT'S RIGHT, BUDDY! THE ONLY SAFEGUARD THAT CAN'T BE INSTALLED ON A MACHINE OR FURNISHED THROUGH A TOOL CRIB WINDOW, IS... ...CAUTION!
G-E EMPLOYEE
AND WHEN YOU'RE AWAY FROM THE JOB ...LIVE SAFELY... AND PLAY SAFELY, - YOUR COUNTRY NEEDS YOU!
Jim Barstow -81441

Today's times have brought a new meaning to the daily challenge to work safely, play safely and live safely.

Today's times make it doubly important that every General Electric man and woman take up that challenge with zest and determination.

Today's times insist upon closer attention to the safety rules in the shop, to the traffic rules of the road and to the intimate, personal rules of life. The times insist that we do a big job, do it well and above all do it safely.

General Electric spends thousands of dollars every year to protect its employees while they are on the job. It safeguards its machines, it provides every precaution to the personal being of its employees in the way of ready access to goggles, shoes, etc. It has proven beyond any shadow of a doubt that it is safer to be at work than not.

After working hours, it is up to the individual. The safety rules of the day must carry over into the hours away from the job. That is the duty of every employee. Throughout th United States last year 17,000 persons me death through their jobs . . . but 27,000 died o injuries received in accidents having no rela tion to their daily work. These are figure enough to tell the story.

Remember, human life is still the most prec ious commodity in the world. Eyes and finger and legs and arms still can't be bought in th hardware store.

The challenge of yesterday . . . of today an of tomorrow is Work Safely, Play Safely an Live Safely.

NEWS FROM THE CAMPS

We publish herewith with great pleasure extracts of letters sent to us by G-E employees now in government service. Address all communications for this column to the WORKS NEWS editor.

Dear Editor:

I received the copy of the WORKS NEWS for August 15, and was more than glad to receive it.

There is not much of a story that I can relate.

I was inducted into the army at Fort Benjamin Harrison, on April 23. After a few days I was assigned to Co. I, 152nd Inf., Camp Shelby, Miss.

After a few short weeks of basic training, I was transferred to Service Co., 152nd Inf.

The Service Co. is almost entirely made up of Fort Wayne boys, among whom are Capt. Mitchell Z. Brown, a former employee of the General Electric Co. There are also several other men who were working at the G. E. at the time of induction.

About July 12, I was more than honored with the opportunity to attend the best motor maintenance school in the U. S. I consider it an honor to be among the few who get to attend this school.

Our instructors are chosen from among the best engineers of the country, so you see why I am so happy about the chance the government has offered.

This brings me to the present date. Only the future can tell what will be the next step.

In closing, I would like to add that the army is O. K. Our officers all treat us wonderful and go to the end of their string to help us. We also eat very good. The army does make men.

Darrell E. Klinker,
4th Co. M. M. S. 16
4th Student Tng. Bn.
Fort Benning, Georgia

Finishes Course

Private First Class Rolan Dale Bohde graduated from a six-month course in air mechanics at the U. S. Air Corps Technical School, Rantoul, Ill., Chanute Field. Rolan was employed in Bldg. 18-B prior to his enlistment in October, 1939. He received his basic training at Patterson Field, Fairfield, Ohi

After a 15-day furlough, h v be stationed at Selfridge Fie Mich., with the 11th Trans Squadron. He is the son of Ca Bohde in Bldg. 19-B.

August 24, 194

Dear Editor:

I am stationed here at F Leonard Wood, Missouri, i Ozark Mountains. It is a country. This camp holds a 35,000 men. They're still buil barracks here. They are sm towns arond this camp. The bigg town is St. Louis, 150 miles fr camp. We will be here for 13 wee

CATCH MISTAKES QUICKLY

An Embarrassing Question. How Do You Answer?

By R. C. DENNISON

So many of us have been asked the embarrassing question, "Why did you ruin so many pieces before you found your mistake?" Our answers are nearly always a confession of some nature admitting carelessness, oversight or ignorance. Our prestige is humbled and we arc left with that old guilty feeling that we are "not so hot" as a top notch operator. The inspector or foreman feels badly about the ruined pieces, but not as bad as we ourselves feel and we wonder how we can prevent another such "mess" in order to boost our rating again. The remedy for this popular illness is fairly simple and introduces another slogan we should all cherish: "CATCH MISTAKES QUICKLY."

Only by being cautious when things are presumably going well and checking the results often can we catch mistakes quickly. When everything seems serene we should take this as a sure sign that something is bound to happen. Human nature takes the path of least resistance and caution is tossed overboard when the job is rolling smoothly. The clever operator will never toss "old man caution" overboard, but will check often and well to be sure nothing is "getting by." This prevents a wholesale number of bad parts and the operator can be proud of his early detection of incorrect pieces.

In these super rush days the quantities of rejected parts all having the same error can mount to the big figures and important dollars. Sure we hate to be the cause of a huge dollar loss but do we see the red tape and hard work of replacing the material lost in the rejected parts? Material lost today may mean jobs lost tomorrow, and that is serious enough for even the "don't care" people to t·t thinking about. Months ago, he material situation started to ecome acute and today has ched alarming proportions. very piece we make right—every iece we keep from the scrap pile neans a longer assured working period and personal security.

ailing to catch mistakes quickly ing these high production peri- causes an endless and vicious nt for the faulty pieces to be re we have corralled them all nd not missed a few that will reect assemblies or sub assemblies

(Continued on Page 2)

Additional Opportunity For You

Due to the interest shown in the publication of "ALL OUT FOR DEFENSE," and the prompt response to the August Double Award program for suggestions, the Management of the Fort Wayne Works is pleased to announce that this program will be continued throughout the month of September.

The interest in the reduction of spoilage and the conservation of material to aid in meeting the demand for Defense Production, has been demonstrated by the large increase of suggestions which you have contributed during August. The whole-hearted interest and the acute emergency which confronts us at the present time has prompted the extension of Double Awards to include the month of September.

Our Engineers, Superintendents and others have through the issuance of "ALL OUT FOR DEFENSE" stressed the urgent need for maintenance of quality of all our product whether for National Defense or a Commercial Customer. They have emphasized the importance of material conservation in these times when material is available in such limited quantities, as well as pointed out the benefits in the reduction of spoilage, to which we can contribute by following the Slogans, "Know Your Job," "Do it Right the First Time" and "Catch Mistakes Quickly."

We appreciate the opportunity that "ALL OUT FOR DEFENSE" has given us to promote a definite program, in the aid of our present national emergency, and we hope that the continuation of this publication during September will continue to stimulate your thoughts, so that you can profit by receiving additional Double Awards on suggestions covering the conservation of material and the reduction of Spoilage.

M. E. LORD,
Works Manager.

We Can Conserve Material And Reduce Waste By Detecting Errors Promptly

Periodic Checks for Quality Important Factor In all Manufacturing Activities

The National Defense Program, with serious shortage of vital materials, presents an increasing number of manufacturing procedure problems. It is imperative that immediate steps be taken which will conserve effectively our supplies of aluminum, copper, steel and other important materials in order to meet defense and essential civilian requirements.

"Catch Mistakes Quickly" has become an industrial problem of particular importance at the present time. We believe the solution of this problem may be achieved by promoting individual interest in such an enterprise, by creating alertness and earnest efforts on the part of each employee. The responsibility must be accepted and carried through by all persons engaged in handling and fabricating these materials.

THEY 'AINT

"The pasture always looks greener on the other side of the fence." But look about your own place of work and you will find the pasture just as green and many chances that you have missed in the past for suggestions. Cash in on a Double Award during the 30 days you still have in September.

The accompanying picture shows the method of conducting process tests in our magnet wire enameling department for the express purpose of "Catching Mistakes Quickly".

The plan contemplates prompt detection of faulty bare wire or defective insulation, by the operators of magnet wire insulating machines. This equipment, which is located within the enameling section, provides facilities for conducting important quality tests, namely: diameter, insulation thickness, elongation, adhesion of film, solvent resistance, and dielectric values.

Operators are responsible for the quality of magnet wire produced by the unit assigned to them. Immediately after a spool of insulated wire is removed from the machine, the operator makes the routine tests, thus we obtain a test of the outside end of the finished spool and the inside or starting end of each spool in process. Should the finished wire fail to conform with the respective specifications, necessary corrections are made without delay, thereby eliminating avoidable spoilage and waste.

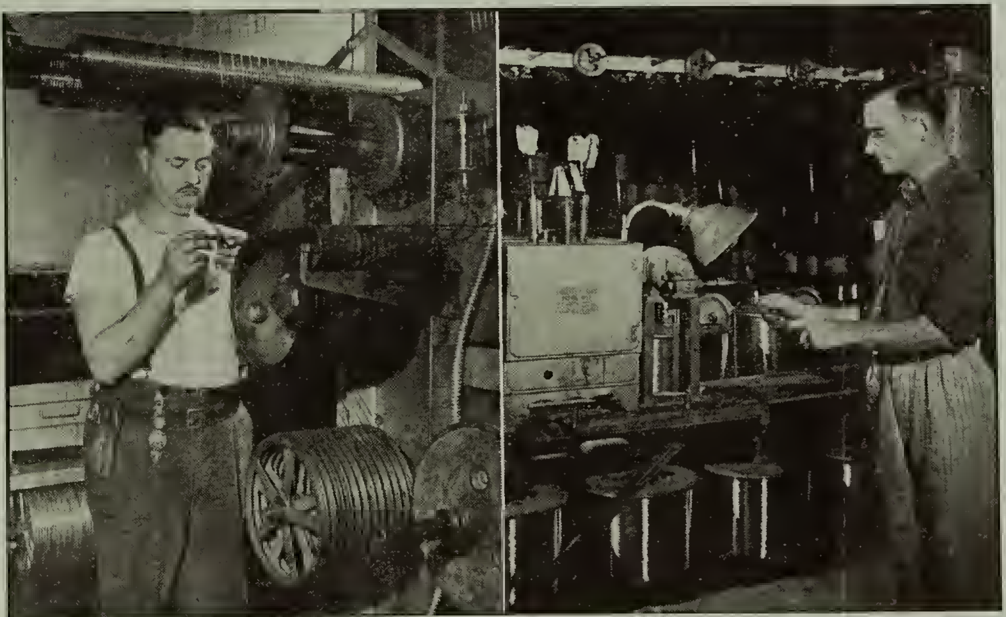
Many distinctly different types of magnet wire will be used for the manufacture of the new defense products. Process test facilities have been developed, to insure a consistently high grade of magnet wire, suitable for the peculiar requirements.

Each employee of the Wire & Insulation Division pledges earnest support of the slogan—*"Catch Mistakes Quickly"* for the purpose of conserving vital materials.

HARRY E. HIRE, *Supt.*
Wire & Insulation Div.

The time required to correct mistakes interferes with work on National Defense.

G-E Products Must Pass All Tests



Left—John Ruhl, Wire Department, Bldg. 8-1, is shown checking Formex wire for increase in diameter after Formex covering. Six coats of Formex are applied to bare wire and the increase is held to very close tolerances. Right—Cyrus Ort is shown making process tests for the purpose of detecting any irregularities in the quality; namely diameter, insulation thickness, elongations, diaelectric value, etc. ......

Double Awards Continued In September

"One Way Traffic Through Production Lines"

Heavy Defense Program A Concern Of Us All

At the present time, Motor Generator Department and National Defense are practically synonymous terms. With the unlimited National Emergency, proclaimed by our President, comes the crying need for materials — materials which are fast becoming hard to obtain. Hence, we must conserve the raw materials, making them go farther, or we may be seriously handicapped in defense work, and be forced to retard our operations. Hand in hand with conservation, we must reduce spoilage. We must learn to Recognize, Report, and Rectify Errors quickly.

Perfection, we know, is difficult to achieve. But we must strengthen our efforts toward preventing mistakes. THE SOONER THEY ARE CAUGHT THE LESS TROUBLE THEY WILL CAUSE.

Many mistakes, we should catch, are not always our own, but are mistakes which have been made by other people in our own or some other department. If we catch the error before the part is completed and perhaps finally assembled, we will be preventing loss of time and money required to rework the part. In some cases we would prevent the scrapping of the item which would have to be replaced—requiring more material—tying up machinery—and multiplying everything previously done by two.

We must not allow any correctable material to get away from us. Minor defects should be recognized and corrected. An example is recognizing defects in casting which can be welded before final machining in place of scrapping the entire casting and replacing it. Many items move from one department to another; and if the defective work should happen to pass by, it should be recognized as early as possible and reported immediately before any more labor is expended.

Catching mistakes quickly reduces spoilage losses; for example, a shaft, such as built for recent jobs, is cut too short on the first operation and the error is then discovered. The lost labor in cutting it off is approximately thirteen cents, but if this condition is not recognized until the shaft has been turned, the loss is $8.61. If however, the error is still unrecognized and the sixth or final operation is completed, the loss has grown to the tremendous sum of $133.00. Then, the whole shaft is rejected; the entire labor must be performed again, and new material provided.

Catch mistakes quickly and you will contribute to the reduction of spoilage, the conservation of material, and maintain quality so necessary in our National Defense Program.

R. M. HARTIGAN, *Supt.*,
Motor Generator Dept.

Our Bit

By P. S. STOUGH

We have been chosen by our Government, as one of the responsible and reliable companies in the Country, to build large amounts of vital equipment for all of our Defense Units.

Whether this equipment is used by an Army, a Navy, or Air Corps, it must be of the highest quality and absolutely reliable to justify the confidence placed in us, meet our own standards, and meet the needs of the Defense Program.

The present Emergency is a Technical and Mechanical Emergency and we, as leading manufacturers of electrical equipment and machines, have never had such an opportunity to serve our Country in our regular work as at present.

One of the most important lines of Defense is in our hands and each individual job well done forges a strong link in the chain to hold this line.

Only coordination of effort and the full cooperation of each person in the organization will allow us to perform the best service for all during this period.

Each executive, each supervisor, and each workman, has his part to play in this work, none all important, but all equally important.

Let's all get together and help John, help Joe, help our Company, help our Country do this Defense job as it must be done.

When material does not respond to normal practice, call your foreman so that the most economical disposition can be made before you lose time by damaging your machine set-up.

Quality From The Customer's Viewpoint

By J. L. TOWNSEND

Have you ever looked forward with real anticipation to a delicious dinner at home involving a large steak which the butcher promised would be tender and juicy? Then, to the disappointment of everyone in the family, the well recommended (and expensive) piece of meat turned out tough and dry which not only ruined the entire dinner but your disposition as well.

What happened then—did you return the food to the store from whence it came and criticize the butcher unmercifully or just lose all confidence in that shop and transfer your business to another store?

As a customer of the food market you are not unlike our customers who purchase Fractional HP Motors in good faith and at our prices with a feeling of pride that they will, because of their high quality, enhance the value of the appliances or machines which they will operate.

Just think how our customers would feel if they should receive motors from us which were noisy, had poor electrical performance, shoddy finish or improper mechanical fits and dimensions. As a piece of low quality meat can ruin an otherwise delicious dinner, so can a low quality motor greatly depreciate the value of an outstanding appliance or machine. And the part that really hurts is that the customer not only loses his confidence in us as a manufacturer of high quality motors, but in more cases than not will quietly but surely find another source of supply without giving us an opportunity to correct our error.

Who contributes the money which keeps our plant operating; the money with which we pay our vendors for raw materials; the money which comes in our own pay envelopes every week? Our customers—no one else! So is it not imperative that to perpetuate our business and our individual jobs, we must maintain our customers' good will and confidence by positively insuring that only motors which meet every quality standard are shipped to them?

Protect Our Plant

In order to make our Defense Program function properly, the Plant Protection Department is working to build around your job the best security possible. This can only be successfully concluded by having the earnest co-operation of all employees going in and out of the Works. Display and wear your badge in a conspicuous place so that the guard can pass you through the gate without delay. If you are smoking, be sure you deposit that cigarette or cigar butt in the proper container. Fire is our deadly enemy, and you and I surely don't want a fire on our premises. Obey all the rules and regulations that have been set up by the Plant Protection Department. Help us to keep our plant and premises in such condition that you can produce goods of high quality with minimum loss of time and material.

F. G. DURYEE,

Avoid Backtracking to Meet the Nation's Production Needs

To meet the Defense needs of the Country, the General Electric Company is obligating itself to an extremely large program. Those of us working on products that are used directly for Defense work recognize that not only the amount produced but quality of the work challenge us greatly. The greatest amount of work can be produced only when rework, spoilage and like losses are kept to a minimum. In other words "One Way Traffic Through Production Lines" without back-tracking will give us the greatest possibility of meeting production requirements.

Quality of work then becomes the paramount problem. Here every employee has an opportunity to contribute much in meeting the Defense needs, since plans are made and standards are established. Many inspection points are created so that customers will receive parts or products that meet established standards. If we have rejection, delay and back-tracking is encountered and it is not difficult for us to visualize that we retard our part in the Defense program. We must be certain that information tags are not defaced or lost since wrong materials might be used. Gauges should receive proper care and they should be used as intended. Operators should ask questions if information is lacking; this will enable them to make suggestions. It is well to learn the relative value of materials and parts on which labor is performed so that we may properly evaluate that which we work on. If we have knowledge and a desire to produce so that we have "One Way Traffic Through Production Lines" the most and best can be achieved. Let's all do the job right the first time.

Remember in Defense work our products affect lives and let it not be said, "I didn't think of that." With intense interest "the difficult will be easy and the seemingly impossible shall be accomplished."

H. G. SIEBOLD, *Supt.*,
Bldg. 4-1 & 4-5.

AN EMBARRASSING QUESTION. HOW DO YOU ANSWER?

(Continued from Page 1)

later in the progress of manufacture. Several cases of defects in finished assemblies were traced back to defective pieces used in the assembly and finally wound up with some operator who, through ignorance or carelessness, passed on faulty work. Had this faulty work been caught by the operator and not passed it on, the loss might have been almost negligible. Having gotten into completed apparatus, the whole unit was rejected.

Be on your toes, check constantly, don't be satisfied with "good enough" and you will be the operator the company will be proud to recommend for better things.

Mistakes Caught Quickly Are Troubles Avoided

Our Stiffest Tax Bill—1942's

NEWSPAPER STORIES have already told about the mammoth tax bill now before Congress. Most of us probably haven't worried much about this new bill, since it won't affect us until next March. For the same reason, we probably haven't taken time to figure out how much we're probably going to have to pay when Income Tax time comes around next year. But right now would be a good time to do it, if we want to avoid an unpleasant surprise later. The information on this page will help you do the necessary figuring.

FIGURING YOUR 1941 INCOME TAXES

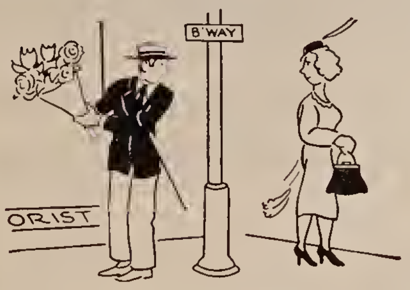
The Normal Tax is computed just as it was last year. The exemptions ($800 for single persons, $2000 for married couples, plus $400 for each dependent) and deductions (charities, gasoline taxes, etc.) are first subtracted from the total income. This gives the amount of *taxable income.* A further deduction, equal to 10 per cent of the total *earned* income is then made (this is called the "Earned Income" credit).

The amount remaining is the amount on which the 4 per cent Normal Tax will be paid. A Defense Tax, equal to 10 per cent of the Normal Tax, must also be included.

So far, this amounts to the same tax as we paid on our 1940 incomes. But now we must figure our Surtax, which is new this year on taxable incomes below $4000. This amounts to 5 per cent of taxable incomes up to $2000, and 8 per cent on taxable incomes between $2000 and $4000. A Defense Tax, equal to 10 per cent of this Surtax, must also be paid.

The three examples below illustrate the procedure in figuring the amount of tax under various conditions. For simplicity, deductions allowed for charitable contributions, etc., have not been taken into consideration. When figuring your own tax bill, remember to deduct amounts given to charities, and taxes already paid on gasoline, and so on.

EXAMPLE NO. 1



Single—No Dependents
1941 Income $1500

NORMAL TAX

(Same as on 1940 Income)

Income during 1941	$1500.00
Subtract Exemption for single individual with no dependents	800.00
Taxable Income	700.00
Subtract Earned Income Credit—10% of Income (assuming all income was earned)	150.00
Net Amount Taxable	550.00
Normal Tax—4% of the Net Amount Taxable	22.00
Add Defense Tax—10% of the Normal Tax	2.20
Normal Tax on 1941 Income	24.20

SURTAX

(Added this year)

Taxable Income	700.00
Surtax—5% of the Taxable Income	35.00
Add Defense Tax—10% of the Surtax	3.50
Total Increase in Income Tax	38.50
TOTAL INCOME TAX	**$62.70**

EXAMPLE NO. 2

Married—No Dependents
1941 Income $2500

NORMAL TAX

(Same as on 1940 Income)

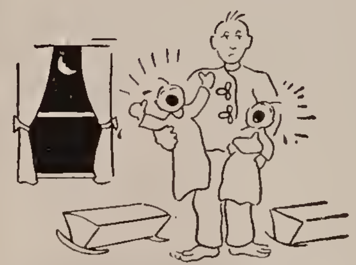
Income during 1941	$2500.00
Subtract Exemption for married individual with no dependents	2000.00
Taxable Income	500.00
Subtract Earned Income Credit—10% of Income (assuming all income was earned)	250.00
Net Amount Taxable	250.00
Normal Tax—4% of the Net Amount Taxable	10.00
Add Defense Tax—10% of the Normal Tax	1.00
Normal Tax on 1941 Income	11.00

SURTAX

(Added this year)

Taxable Income	500.00
Surtax—5% of the Taxable Income	25.00
Add Defense Tax—10% of the Surtax	2.50
Total Increase in Income Taxes	27.50
TOTAL INCOME TAX	**$38.50**

EXAMPLE NO. 3



Married—Two Dependents
1941 Income $5000

NORMAL TAX

(Same as on 1940 Income)

Income during 1941	$5000.00
Subtract Exemption for married individual with two dependents	2800.00
Taxable Income	2200.00
Subtract Earned Income Credit—10% of Income (assuming all income was earned)	500.00
Net Amount Taxable	1700.00
Normal Tax—4% of the Net Amount Taxable	68.00
Add Defense Tax—10% of the Normal Tax	6.80
Normal Tax on 1941 Income	74.80

SURTAX

(Added this year)

Taxable Income		2200.00
Surtax:		
5% of $2000	$100.00	
8% of 200	16.00	116.00
Add Defense Tax—10% of the Surtax		11.60
Total Increase in Income Taxes		127.60
TOTAL INCOME TAX		**$202.40**

THE NEW TAX PROPOSAL IS NOT YET A LAW

Congress, of course, may make many changes in the bill before giving it final approval—our daily newspapers will keep us posted on its progress. But the fact remains that the vastly increased expenditures being made for National Defense during 1941 require that the nation's tax revenue be drastically increased. Excise Taxes will be raised, Corporation Income Taxes will go up considerably, and the Income Tax rates on individuals will, in all probability, be as high as or higher than the rates discussed on this page.

Complete Twenty-Five Years With General Electric

Five employees are new members of the Quarter Century Club. They are, top, left to right—Frederic D. Kruse, Bldg. 19-5: Leland P. Laventis, Bldg. 19-2 and Arthur R. Kabisch, Winter Street. Below, left to right—David H. Armett, Bldg. 4-B and Charles C. Langston, Decatur.

News From the Camps

(Continued from Page 2)

for training and drilling and then will be sent to a permanent camp.

Yours truly,

Pvt. Donald LaFontaine,
Co. C, 27 Battalion,
Fort Leonard Wood,
Missouri.

Dear Editor:

I am a little late acknowledging your first copy of the WORKS NEWS, but I really appreciate receiving it. Please continue sending it, for I hope to be back again with the G.E.—the army willing.

After being inducted on July 8, at Fort Benjamin Harrison, I was sent here to Camp Lee, along with 300 others—16 from Fort Wayne—to the Quartermaster Corps.

I am in the motor mechanics school, in the engine and chassis section. My knowledge of motor mechanics was very limited when I came here, but they are doing their best to educate me.

Our sample army day is as follows: First call at 5:45. Reveille at 5:55. Breakfast about 6:30. Assembly for Motor School at 7:20. Motor School then from 7:30 till 11:00. Dinner is at 11:30 and at 12:15 we have physical training. The rest of the afternoon until 4:15 consists of lectures on different subjects: drilling, marching, and practical application of the lectures—for example: use of gas mask, tent pitching, camouflage, rifle practice, etc.

Last week we had rifle practice and for two days, from daylight to dark, we were on the range. I was one of the average shooters, getting only 126 out of a posible 200.

Then on Sunday, I was on guard detail. My post was around the warehouses, but it was mostly routine as there were three civilian watchmen besides me.

After thirteen weeks here, we will be sent to different camps throughout this part of the U. S. I hope my camp is nearer Fort Wayne for I sure miss the G. E., the Plant Engineering gang, and last, but definitely not least, my sweetheart.

Give my regards to all my friends of the G. E.

Arthur Tebbe,
Co. C., 1st Bn., 7th Q.M.T. Reg't
Camp Lee, Virginia

Dear Editor:

I was glad to receive the G. E. WORKS NEWS which is the first news I have received of the General Electric since I have left.

We will be transferred to regular outfits between Sept. 12th and 20th. I will let you have my address as soon as we move.

They are training me for motor drawn 75 mm. Gun Battery. We will fire our first cannon Wednesday of this week. So hope us good luck.

I will try to write you again about the Company.

Yours sincerely,

Frederick R. Bishop,
Fort Sill, Oklahoma.

G-E Farm Advisor Tells How To Catch Plenty Rats

There are several methods employed to kill rats, but Ed W. Mitchell, farm advisor of the General Electric Farm Forum in Schenectady, recommends an ingenious method that is very successful.

While some people prefer to reduce the rat population by means of traps or a small-bore gun, others kill the rodents by fumigating with cyanide gas. That is an easy way to get rid of them at one whack, but, according to Mr. Mitchell, "whether the dead rats in a wall are more objectionable than live ones is a question I cannot answer."

Other people are skilled in the use of strychnine in bait. When the rats swallow the poisoned bait, they usually run outside looking for a drink of water. A pan of water at a spot convenient for a person to pick up the rats for burial should be provided.

Here is Mr. Mitchell's pet trap, highly efficient, he says, where there is a large number of rats:

Get a 50-gallon barrel and put four inches of water and a brick in it. Cover the top with heavy paper and cut a large "X" across the paper. Hang a bait over the cross. The first rat falls in and sits on the brick. As soon as two rats are in the barrel, they fight for a place on the brick. The bait and fight attract more rats, who come to see what it is all about. And they, too, join the fracas. The result: All the rats are caught.

For more than 15 years Mr. Mitchell has been the "Question and Answer Man" of the General Electric Farm Forum, a program broadcast over WGY (810 kc.) every Friday night at 8:30 o'clock, daylight saving time. When not on the radio, Mr. Mitchell works on his Orchard Hill Farm

Elex Club Board To Nominate Officers

A meeting of the Elex Club board members will be held on Wednesday, September 3 at 6:30 o'clock at the Fairfield Manor for the purpose of nominating officers for the coming year. This will be the last board meeting of the year and all officers, contact girls and social committee members are urged to be there. Reservations may be made with Irene Meyers, Bldg. 21.

BULLETIN

The Fort Wayne and Decatur Works will be closed on Monday, September 1, in observance of Labor Day.

All departments, with the exception of continuous operations such as Power House, Patrol Service, etc., will, in general, be closed for the week-end, beginning with the normal quitting of the Friday shifts, August 29, and will resume operations on Tuesday morning, September 2.

M. E. LORD,
Works Manager.

NEWS THROUGH THE PLANTS

Sometimes I think it's awfully hard to get something started. Here I've been writing this column for 'way over a year, and have just this month, with the help o' a world war, national defense, and a big shortage o' materials, been able tae get people excited enough tae put on a campaign tae maintain quality, conserve material, and prevent spoilage.

Any Scotsman will tell ye that waste is very repoolsive at any time, but everybody will tell ye that it's positively poisonous when we face conditions as they are today. And these conditions will not change very soon, either. Even tho' our "All Out For Defense" campaign may end some o' these days, I know we will not turn off our efforts like a spigot. My one man campaign will go right on.

And it will not be a one man campaign, either. We all will keep right on, both in the way we do our work, and in the suggestions we turn in, maintaining quality and preventing waste. No idea, however insignificant it may seem, will be dropped before we think it clear thru.

But the ideas that we'll really hop onto are the ones that improve quality and reduce costs. Yes, I said IMPROVE quality and REDUCE costs.

Ye don't have tae reduce quality tae reduce costs. Anybody can do that, which spoils the fun o' even suggesting it. And ye don't have tae increase costs, or even keep them level tae improve quality, either. Just look all around ye for proof. Look at your light bulbs, your washing machine, its motor, your refrigerator, or automobile. Look at precision manufacture, distribution and merchandising methods, or the size o' ladies bathing suits. All have been improvements with concurrent reductions in costs.

No one person, or class o' persons, have done all this alone. It has taken ALL o' us, and it will take ALL o' us, from now on. The campaign is not over. It will not be over, ever!

In fact, my Cousin Colin says it's just beginning, so he set to making up some slogans. Every campaign must have a slogan. So he looked around for some. He looked at his "Duggins Dew", and wrote, "A Good Start is Half the Bottle". He looked at his Scotty and wrote, "We Are Itching Tae Start From Scratch". But when he looked at the "Initials of a Friend", on top o' building Four, even his best Scotch instincts couldn't think o' a thing that beats, "More Goods for More People at Less Cost".

It is reported that the reason Paul Monroe, Bldg. 4-1, feels so good on Monday mornings is because they keep him tied up over the week end since the rabies scare hit Poe.

Al Gerber, Bldg. 4-1, knows how to make the best of any situation. He had a lake front cottage at Dewart Lake but the lake is so low that he has to walk about two blocks to reach the water. However, Al says he's going to plant the shoreline with potatoes.

Alice Pflueger and Dorothy Goshorn, Bldg. 4-3, have returned from a week's vacation. All they would say was that they were glad to get back on the job so they could recuperate.

M.B.A. PATIENTS

General Purpose Motor: Wilma Weingart, 718 West Wayne Street; Catherine Hite, 201 East Creighton Ave.; Alan Lichtenberg, 4624 Tacoma; Oliver Sundsmo, 3508 Ramsey; Oscar Rodewald, 4716 Beaver.

Transformer: Delbert Rogers, 4205 Hoagland; Earl Fitzwater, 1034 Swinney Ave.; Carl Frauhiger, Roanoke, Indiana; Robert Hodell, 4312 Pembroke Lane; Marvin Rossiter, 220 Third St.; Betty Drewett, 507 High St.; Emma Bradford, 1719½ Lindley; Pauline Fogle, 510 E. Left the Hospital: Deloris Weise, Frank Shidler, Dorothy Sales, Ed. Auth, Vera Ward.

19-5 Office Chatter

Now, that the air has cooled off, maybe the news will warm a little. . . . It seems the air was rather blue at noon, when Hubert Myers and Hugh Neely put the skunk on Walter Bloomberg and Bob Meyers twice in a row. Perhaps Bob would like the pelts for his new home as a token to remember the occasion. Speaking of names in the news, . . . Virginia Wenegart comes forth with the saying of the week to match wits with Jerry Frye, "It's fun to be nuts isn't it." . . . The postals that Frances Richards sent us were all appreciated considering the distance they came, "Angola."

Walter Larimore reports a gain of three pounds over the vacation. . . . Arthur McNamara, Bldg. 19-4, spent a vacation in the Smokies, and he is sure he ran over a cub mountain lion—on being questioned it turns out to be a rabbit or squirrel, maybe. . . . Congratulations to Helen and Carl Conrad on their new home.

A birthday party was held at the Indiana Hotel in honor of Ceal Romary, Bldg. 26-2, and Clara Gidley. Bldg. 17-3. The guests were Mildred Harber, Carrie Green, Velma Meads, Dorothea Swank, Margaret Suelzer, Ruth Luther, Dorothy Wesling, Bertha Gruber, Louise Meker, Golda Mentzer, Pat Chapin, Hilda McClain and Grace Biedzycki.

Edna Crow, Bldg. 4-3, celebrated her birthday last Monday. What the girls would like to know is how old she is? All Edna will say is "Sweet Sixteen."

President Wilson To Speak On Broadcast

Charles E. Wilson, president of the Company will speak on the General Electric Hour of Charm program Sunday night, August 31. The program is scheduled for 10 p.m. Eastern Daylight Saving Time. Mr. Wilson's talk will be of interest to all employees. It will follow the usual musical portion of the program produced by Phil Spitalny and his all girl orchestra.

Slips And Chips

Vacationing for us is drawing to a close. There are a couple of boys yet to vacation and this will wind them up. Ewald has returned from a week's vacation up in the wilds of Michigan. Did he catch fish? Well, you ask him. The story he told me was about his wife having fish on two poles and a bite on another pole. He did say that they had located a school of perch and this extreme luck wasn't general as some have wished us to believe. By the way, he did not find it necessary to hide behind the piling as did Ed. . . . Chicken dinner with all the trimmings, but where was the honored guest. The whereabouts of Otho (Shorty) Lawson remains a mystery. You see, Shorty was invited to a chicken dinner at Columbia City, but Shorty didn't show up. . . . Art Kraft, our horse shoe king. Art and his G-E Club copitchers battled and battled, and still they were tied. At last the officials decided to split the honors. Art claims he pitched one game in the dark and won. We think you won, Art, even if the judges decided against you. . . You remember some time back I mentioned in this column that Oma August was contemplating the purchase of a yellow sweater. Well, she did. However, it isn't quite the sweater that Mary has, but it is nice.

Farmer: "Hi there! What are you doing up in my cherry tree?"

Youngster: "Dere's a notice down dere to keep off de grass."

A Machinist-Toolmaker

Richard E. Gebert

Latest Apprentice School graduate is Richard E. Gebert who has completed the machinist-toolmaker course. Mr. Gebert, who is a South Side High graduate, has taken extra curricular work at the Indiana Extension University in addition to his apprentice work. He is assistant superintendent of the Salem Reform Church Sunday School and an active member of the Y.M.C.A.

Building 26-3

The night girls on F. Bench took themselves, escorts, lungs and appetites to the Irene Craig ranch one Saturday evening. It was undecided by the gathering whether to roast with the "hot dogs" or freeze with the ice cold watermelon, not to mention the corn on the cob. Iola Lantz and Lillian Kyler introduced a new fad called "corn cob duck". The girls attacked a cob of corn from opposite sides and tried to eat their way through it—the result was a couple of very greasy faces. The balance of the evening was spent making recordings of all those present. . . . Virginia Romey is reported to be sporting one of those rings. . . . Bill Sexton, it is rumored, plans on getting married Christmas. No need to worry—he didn't say which Christmas. . . . Charlie Prine still has that calf in the leg. Suggestions for a good remedy will be welcomed. . . . Georgie Denis gave the night girls something to flutter about when she appeared with a "sparkler". Best wishes, Georgie. . . . When you forget your lunch it's bad enough, but when you leave your badge back in Ohio—well, that isn't so hot, says Joe Magditch. . . . If Aileen McKinzie would charge two bits for all the people she hauls in her new car she soon could retire. . . . Elsie Pedersen was quite flabbergasted when a group of the girls brought in a beautiful birthday cake. When Elsie had finished cutting the cake she found she had two of the largest pieces left for Donald Poland and Darrel Hirshfelder. We hope they got around them o. k. Many more happy birthdays, Elsie. . . . What's this we hear of Marguerite Fisher trying to keep cool with a piece of dry ice.

Harry Richardson, Bldg. 4-6, can give you a real way on how to drive a car. All he does is just start the car and drive it a little way, then he opens the door, falls out on the street, and lets the student have her own way whether she can drive the car or not.

What we would like to know is why Elva McMaken, Bldg. 4-3, needs a Board of Censorship in order to get the news.

Harry Parker, Bldg. 4-3, is getting his "bus" all ready for a jaunt next week. Poor Harry is afraid "ye old bus" won't carry the excess baggage on the rear so he is contemplating on putting it in the trailer.

Ellis Bleke, Bldg. 4-3, reports that soon the castle on Pretty Lake will be all set for the fall dinner to the gang.

Hazel O'Brien, Bldg. 4-3, made a lot of news last week-end. Anyone knowing the story, please report to your reporter.

Harry Freeman, Bldg. 26-2, found out that his garage doors were not wide enough to drive his car in, when his wife, Gladys Freeman, Bldg. 26-2, left the car door open.

Frances Krauskopf and Ruth Rose were the guests of the girls of the telegraph department at a dinner at Miller's Tea Room on Wednesday evening. Ruth is leaving to resume her studies at Purdue University and Frances will begin her new work in Bldg. 16-3 library. Good luck to you both.

Bee Statler and Ella Hartnett, Bldg. 19-5, did some traveling during their vacations. Bee went to California and Ella did some hill climbing in the Smokies.

"Is old Angus a typical Scotsman?"

"Is he? He's saved all his toys for his second childhood!"

From The
Feminine Viewpoint

By Irene Perry and Hilda Barthold

We learned somewhat to our surprise that there is a right way to wash our faces. This doesn't refer to the dash of cold water most of us give our faces in the morning as an aid to getting wide-awake, but to the all-out washing with soap and water once a day which is one beauty aid you cannot afford to neglect. If this is done correctly it pays high beauty dividends.

The first step is fill the basin with lukewarm water, then carefully cup your hands and splash the water over face and neck, gradually add hot water until the temperature is as hot as you can bear comfortably. This operation thoroughly relaxes the tissues of neck and face; it should take at least three minutes. Next with comfortably hot water work up a good lather and brush it into your skin with a complexion brush. Do not brush so long and hard that your skin is irritated, but enough to produce a glow and be sure to brush your neck too, particularly the back of it. Other people can see it even if you can't!

After a thorough washing with the hot suds rinse your face and neck in cold, not ice water. This cold rinse to be effective must be a quick change from hot to cold, if your skin cools before the cold water is applied, you will lose a great deal of the benefit.

Dry your face briskly with a coarse towel, then go over the entire neck and face with cleansing tissue to remove every trace of soap film. Now for the final step, rub the skin of your face with the palms of your hands, rub as briskly as if polishing a table top. Try to rub so that your skin will actually feel warm to the touch; the friction produced by your palms will draw the natural oil of the skin to the surface thus keeping your skin soft and glowing.

It may not be necessary to use the complexion brush more than several times a week, but always start with lukewarm water, increase to hot and quickly change to cold.

What is that blinding light around Rose Foster's, Bldg. 4-3, head. Could it be a "halo?"

It isn't every girl that can come back from her vacation and dazzle her co-workers with a sparkling diamond for that third finger as did Ludella Droege, Bldg. 4-3.

Due sympathy is extended to Forest Whonsettler, Bldg. 4-3, who lost one of his famous pups. Those with more experience in raising dogs think he took too good care of them. Guess he judged their appetites by his own.

Esther Schust, Bldg. 4-3, gave a lovely party for the girls of her department last Saturday night. She received many nice gifts. Those in attendance were: Evelyn Lowe, Ludella Droege, Golda Draggoo, Irene Fuelling and Mable Fuhrman.

It seems the "Big Boys" on Bldg. 4-3 are making their Christmas predictions already. Don Wiebke thinks he may get a sled, and from some of the motions he goes through while working, we don't think it would be amiss.

Sympathy

Sympathy is extended to Henrietta Deck, Bldg. 19-5, in the death of her sister.

NEWS THROUGH THE PLANTS

6-4 Magneto Mumblings

By The Eavesdropper

To Whom It May Concern:

Said writer doth hereby declare his most humble apologies for the absence of his column during the last two weeks. Said writer pleads the excuse of being so tickled at the sorry plight of Sid Borten who was caught in an elevator for half an hour, that it has taken two whole weeks to recuperate. . . . When we say he "really went up in the air" we're not merely stating a well-worn phrase, but are giving out with the whole truth about Ed Dinger, the poor unhappy victim. Ed, day dreaming about his best girl, no doubt, nonchalantly sat on an air hose the other day, and was quite unhappily surprised when it was accidently turned on and sent him flying through the clouds. . . . From all indications, King Solomon, Henry the Eighth and Bluebeard, those colorful gentlemen from the pages of history, didn't have a thing on our glamour boy, George Glenn, who has a "harem" all his own. For further details, we'll have to refer you to his honor, Georgie Porgie. . . . Although June is the so-called month of brides, we, of Magneto Valley, claim August for our month of joyous wedding celebrations. Kenny Betts was a very proud papa when he gave his dotter away to the accompaniment of wedding bells, and Clifford Zieg had a right happy gleam in his eye when he passed out the traditional cigars and candy in celebration of his marriage to the former Miss Irma O'Brien. . . . August can also be claimed by the Magneto Department as the month of birthdays since several of our "Magnetoites" have celebrated that happy occasion during the course of this week. We were all amused the other day when Joe Close was reminded of his birthday upon discovery of that huge "Sugar Daddy" Sucker lying on his desk. And we'll bet he enjoyed it to the last lick, too! . . . Both Helen Ginther and Ruby Martin received lovely birthday gifts from their friends on the second shift, and Anne Perry, our lil' Magneto Sunbeam who just recently recovered from a bad case of poison ivy, held a birthday party at her home last Sunday. . . . Jim Woodward was just bragging the other day that since he was such a "good little boy" I would never be able to print anything about him. Although we do have something now, we're sorry to say that it's only to give notice of his departure for Schenectady. We're all going to miss you, Woody. . . . Hear ye, hear ye! The Messy Section Trophy will be presented with great ceremony here in Magneto Valley every Friday to the section having the poorest housekeeping, by decree of our Mayor Dennison. We say three cheers to all those sections who are clever enough not to win this great honor.

Forrest Whonsettler, Bldg. 4-3, our big dog fancier comes forth with the announcement that he is going to raise a new kind of dog at his kennels. It is known as the Saint Barnyard. According to Forrest, it is a super-pooch surpassing any other breed of dogs for hunting, fishing, watch dogging and game retrieving. He invites you all to come and inspect these dogs when they arrive at his kennels.

We wonder why Edna Martin, Bldg. 12-B, hated to come back to work after her vacation at Jimmerson Lake. Oh, well, there is always transportation to Louisville.

Glad Hand For G-E Club Members

Not a physical disability but a little freak photography exemplifies the welcome extended by George Waldschmidt, club president, on behalf of the club to G-E employees and their families to attend the opening of the G-E Club quarters on September 11. George says "be there, I'll be seeing you."

Sleuthing In 4-6

"Ive heard," says Clara Ankenbruck, "of men losing their collar buttons, and boys losing marbles; but never before have I heard of grandmothers losing their Sunday bonnets." But that is just what happened to Clara's mother. However, after hours of searching, detective Clara unraveled the mystery, produced the bonnet, and now everybody is happy. . . . On August 24th at Salem Evangelical Reformed Church, Kay Miller became Mrs. Robert Gruber. After a short wedding trip, they will be at home in their apartment at 3115 South Wayne Avenue. . . . Leonard Roebel is on his vacation this week, so they tell us. But who can account for the fact that he has been seen at his desk, as usual? Is it that he can't get along without us, or that we can't get along without him? . . . Eloise Redding left last Friday for a week's vacation, after which she will take up new duties in the Telegraph Department. We wish you well, Eloise, but we'll miss you. . . . Here's one for the "Bright Sayings of Children" column. Jerry Duryee was overheard directing Mary Gemmill to Herb Reitz's desk in the following manner. Jerry: "Do you know Walter Brake?" Mary: "Yes." Jerry: "Well, Herb sits next to Spaulding." . . . Maxine Brim has been holding out on us. She has been Mrs. Louis Ungerer since December 28, 1940, and has just let us in on the secret. Our best wishes to you, "Mr. and Mrs." . . . Judging by a letter received from Bob Pfeiffer from Kelly Field, army life isn't so bad after all. He has returned from a trip to California, and expects to be stationed at San Antonio as a military policeman. He is getting along fine except for three pests—snakes, sand burrs and girls. He didn't say which he found the least annoying, but we'll bet it isn't the snakes or burrs. We warned him about that streamlined figure of his. . . . Mary Louise Hennessy and Thomas Doell have decided to join the ranks of the altar-bound couples this fall. Our best wishes to you both for a long life of happiness and prosperity. . . . The next time Jerry Lauer buys an ice cream bar he better eat it instead of putting it in his desk drawer and forgetting about it.

19-4 Spot Jottings

A dinner was given last Thursday evening by the Fan Motor girls honoring Josephine Budd. The dinner was given at the Aulton House and was attended by about twenty-five girls. The honor guest was presented with a corsage of rubrum lilies and several lovely gifts, and with them went the best wishes for her future happiness and success as Joe is leaving to devote her time to being a housewife and assisting her husband in their store.

Alma Keller also is leaving to devote her time exclusively to her new home and husband. We are sorry to lose Alma but wish her a lot of happiness. About fifteen of the girls that wrok with Alma assembled at her home on Thursday evening for a chicken dinner. All reported a good time.

Borings From 4-4 Office

Labor Day, one day of vacation for a million others, but I'll probably spend the day catching up on all the work that has accumulated since spring. Gee, I'm the lazy critter. . . . Pauline Young had a birthday last week. Dinner was served at the Battleship or Flagship. Good, too, eh what, Plummer? Virginia Plummer and LaVon Price were on their own respective diets, so they just sat idly by while we all munched and crunched on our chicken in the rough. Last Thursday night Pauline went to a party which turned out to be a surprise in more ways than one. However, she did receive many useful things for her birthday. . . . It was wedding bells for Jean Bugert who was joined in marriage to Richard Johnson at St. Peters Catholic Church. The reception was held at the Bugert home on John Street from 5:00 to 9:00. Everyone from our office was present. Just ask Emmy Stock if he had a good time. Me thinks he did. So did I. Good luck to both. Jean sent us a card on her honeymoon stating that she was having a wonderful time and wished that all of us could be there. . . . Evey Meyers is back from her vacation this week. She spent most of the time at their summer home at Lake Gage and then went to a ball game in Chicago over the week-end. . . . Now this week Lillian Magner is away on her vacation. . . . Wm. Weber is away this week too but I thought that he already had his one week's vacation. However, from the report from Clarence Shanebeck, Bill is suffering from Rhumbatism. It is a similar case like that of Charlene Snyder. . . . Hay fever is now in full bloom. Art Wedler is one of the victims of the circumstances. Too bad, Art. Perhaps we should get together and have a blowing good time. However, I haven't had a touch of the filthy weed this year as yet. I've got my fingers crossed and I'm going to Michigan over the week-end. Best I talk of pleasanter things. . . . Don Niles is taking Mike O'Grady's place this week. More fun. You see, Mike has gone away to Fort Wayne on his vacation, and we all miss Mike a lot. . . . We all wish to extend our deepest sympathy to Mr. Tom Staley whose father died unexpectedly. I remain, sincerely as ever,

Elmer, the field mouse.
The Rat to you.

Who Is That Guy In 4-2

Do you kind people wonder who has been dishing out all this information in Bldg. 4-2? Well, it's not Harry Spahr, and it's not Luella Guy or "Brownie." Nor is it Jess Hahn or any of the other mortal clay that works on the second shift. But it is I. Who am I? Says you. Well I am the guy who keeps you awake at night and I am the guy that makes you stop and think. I am the guy that makes you go to church once a year, and I am the guy that makes you nervous when the Boss walks by, and I also am the bird that dishes out. Well, what are you going to do about it? I don't think you can stop me, for I am,

Yours truly,
Bad Conscience.

Malinda Gehle, Bldg. 19-5, goes a long way just to be at the lake. She went way up into Michigan.

Martha Scherzinger, Bldg. 19-5, is back from her vacation which she spent in Chicago and Wisconsin.

Plastic Flashes

The second shift doesn't seem the same with Grace Funk, Joy Stuckey and Carl Sleppy on their vacations.

We are happy that James Fleming has come back to work. We certainly did miss you, Jim.

Boy! Oh boy! All we can think of is the fun we're going to have on our three-day vacation. It seems fall house cleaning time is here. We will appreciate any and all volunteers who are handy with a mop, etc. Please apply to the Tillie's private office on the fourth floor.

Have you seen the lovely scarf Addie Masbaum knitted from the wool that people pull over your eyes? It's gorjuss!

We forgot to tell you of the swell time the second shift girls had at Jerry Pickett's shower last week. Jerry can really whip up a swell cake.

Ask Lillian Springer how she got that "sun tan" on her leg and arm.

What was that good advice Bud Gilbert gave Betty Berry on how to prevent catching cold???

Evelyn Demler is sporting a new hair do and we all think it very becoming.

Mildred Oyer says that her husband's name constantly appears in the NEWS. Well, Millie, here's the time when you're also in the news. We'll try to see if we can't get your name in more often. So won't you help us and do something????

Anyone desiring to become an expert auto driver should contact Frieda Hartman. We hear that she is an expert instructor.

The Tillies are sorry that it will be impossible to answer the number of letters which were received regarding how many Tillies there are and what the Tillies look like. We shall try to print this information in the very near future.

Until the next time,
THE TILLIES.

26-5 Tool Bits

Frank Prezbindowski could never believe that a person could nonchalantly approach the gate, look himself over, and then suddenly start back home. It is reported that he feels otherwise now and that he tried it out himself the other day. . . . Jack Ebert has purchased a horse to keep the grass down around his cottage. The boys wonder what he'll feed him this winter, or will be bring him home to pull his car when it rains. . . . Art Dicke to Earl Lenz: "Art Thieme is sure going to have hard sledding when he gets back from his vacation". Earl: "How's that, Dick?". Dick: "Because there won't be any snow." Duck everybody. . . . Remember when? . . . Ross Cohagen and his pump. Julian Franke and the pigeon. That same train every Christmas. Gordon McDougal and the live box. Ray Kierspie and the wooden horse. Bernie Bienskie and the Star. Otto Rodenbeck's winter lake costume. George Mosshammer and T-bone steaks.

"Wrong Way Norris" has done it again, Earl, of Bldg. 26-3, started with some friends for Huntington and ended up in Ohio. Nice going, Earl. We hear that Ted Nelso, Bldg. 19-3, can also join the "wrong way" club since he started for Lake James and ended up in Ohio. We would have sworn that Leona Menze could have directed him in the right direction.

Virginia Schoeff, Bldg. 26-2, is sporting a beautiful new diamond. Best wishes.

NEWS THROUGH THE PLANTS

Motor Generator Static

The big tennis game between Korn-Willig-Parry- and Busian was exciting. Steve Korn has no serve, no backhand and no forehand; but he sho can play net—if he ever got up to the net, which he never did.

"Bones" Brandt of the Navy section is taking his Navy work quite serious. He may get an anchor tattooed on his chest.

"Gene" Roesner, who is about to be married, thinks all prospective grooms should wear a sweater with the date of the wedding like these college sweaters. They should say "Wedding Sept. 13, 1942 or 1958 or something to warn off all these girls.

Harry Rife can remember way back when they used to catch fish at Rome City.

Carl Pape is now a proud possessor of a cottage at Pretty Lake. Next year Carl is going to buy some fishing tackle.

Mike Dole, who is quite a follower of Isaac Walton, finds a way to change his luck while fishing. "If I don't get a bite for 3 hours, I generally change to the other side of the boat and sleep there.

Helen Stahl can remember when you could buy fish at the lake much cheaper than you can now.

Helen Hoelle broke her glasses—rumor is that she sat on them.

Every day is tag day for Jerry Tillbury. She should get a job on the police force hanging signs on cars.

Stanly Tisovic says "Life is just one A. N. after another."

Ross VanHorn, our iron man, says, "Men who chew are men who do." Ross remarked that he's glad he don't chew gum. Just think of trying to remember where you stuck your last chew. Kerplunk.

Helen Kelsey's ears get so tired that she has to take off her pink ear rings every morning about 10 o'clock.

When Russell Harruff, Jr., feels himself getting very busy, he puts three wastepaper baskets around his desk and then gets four scratch pads and then you should see the results.

Too Bad:

It's too bad we did not learn that Margie Oddou had a birthday on the 28th until it was too late to announce in last week's WORKS NEWS.

However, we are sure all belated gifts will be appreciated by the little gal.

We Think So:

One of the boys (name held by request) noticing the heading of an advertisement for ladies clothing, which read, "Ladies ready to wear clothing," remarked, "It's about time."

Proud Author:

Bldg. 19-3 associates no longer have to wait for distribution of the WORKS NEWS to see whether they have been written about by the author of "Motor Generator Static". Unlike most modest people, our "Famous" (?) writer "Poison Pen" Shultz, occasionally referred to as "Honest Don" may be seen of any Friday morning with an advance copy of the WORKS NEWS making the rounds of the unfortunates whom he has currently slandered showing them the handiwork of his pen.

Correction:

"Pappy" Archbold gives a repeat performance each week when his name appears in the NEWS. He rushes from person to person with this lament, "I wish you would spell my name the right way, not "ald" but "old"—how do you think my kinfolk will know it's me? Our sincere apology, but you are still "Pappy" to us in any language.

What Is It?

When "Dagwood" Fisher noticed he was referred to as the "Oracle of Bldg. 19-3" in last week's NEWS, he began to inquire if an "Oracle" was beast, fowl or insect. Henry Lojeck's reply was, "I won't say, but some time I think I'll bring a "Flit" gun.

Could Be:

"It was all most embarrassing," remarked Carl Shidler, Jr., and Hank Velkoff after Dick Gentis pulled his "Dollar Day" slicker on them. It seems these three lads play golf the way it should not be played, so when advertisements appeared in the local papers offering golf balls at greatly reduced prices for "Dollar Day" they felt the moment had arrived to replenish their depleted supply. So when "Dollar Day" noon rolled around, our heroes loaded into Hank's car and departed for the business section. As they drove along, Dick remarked that they should eat first and the other two agreed that this was quite the thing to do. Soon they spotted a local "drive in restaurant," turned into the lot and parked. No sooner had the car stopped than Hank crawled into the rear seat where he and Carl produced lunch boxes, and with the words, "Go ahead and order, we have our lunch," proceeded to unpack sandwiches, fruit, pie and thermos bottles of coffee. Dick sat waiting for service, until finally fearing he would not have time to purchase golf balls, stepped from the car and started in search of another restaurant, leaving the two setting in the rear seat surrounded by their lunch as a "car hop" approached to take their order. With very red faces, the lads made a hurried exit. "Most embarrassing," they said.

Saying of the Week:

Jerry Frye remarks, "Confidence is the priceless ingredient in a business prescription."

19-4 Nibbins

Three girls of 19-4 had a pot luck supper with fried chicken as the main course. A full stomach was had by all. . . . Was Vance Stover being paid for pushing Whitey Finger around or was it last year's election bet. . . . We hear Louise Sinn is spending her vacation canning pickles. . . . Ed Fiedler spent his vacation on a motor trip to Niagara Falls with the wife and children. . . . Marceille Surface will probably be back to work with a stiff neck. She has been spending her vacation in New York.

Some people think that Margaret Jane Ray, Bldg. 4-3, was still up in the clouds from her pilot lesson of Saturday.

Mrs. Dinocan: "I wonder if you would be so kind as to weigh this package for me?"

Butcher: "Why, certainly; it weighs exactly three and a quarter pounds."

Mrs. Dinocan: "Thank you. It contains the bones you sent me in that four-pound roast yesterday."—Pathfinder.

Walter Bloomberg says he was shaking like a leaf when they called his name at the American Legion convention and he had to appear before the big crowd to receive a medal for his drumming ability. Congratulations.

Virginia Miller, Bldg. 18-5, has a sparkle in her eyes that matches the sparkle of that ring. Putting out any information, Virginia?

May Heit, Bldg. 19-5, returned to work after two weeks spent at the lake.

Biography of a four-time widow: She first married a millionaire, then an actor, then a preacher, then an undertaker. One for the money, two for the show, three to make ready and four to go!

Thisa And Thata 19-5

Yippie! Hi Yoo, Silver. Yes, we have a cow boy in our midst. None other than Richard Beltz. Did you ever notice the belt he wears? . . . At first glimpse you wonder if your eyes are deceiving you, but after a more careful look you know there are two of them—the Steinbacher twins. More power to you if you can tell who is Jean and who is Jane. . . . Edna narkenrider had a terrifying experience the other day when she was held up—no, not by a thug but by a locomotive in the GE yards. . . . Arnold Johnson must have come into an estate or something. Notice that outfit he wears. . . . We hope our boss Bill Wickliffe, has a nice rest on his vacation.

Kate Johnson, Bldg. 4-3, had her troubles during that downpour of rain last Monday. She stood at the gate waiting for her husband until her umbrella turned inside out and finally had to take a street car. Upon arriving in the heart of our big city she had to purchase a new pair of shoes to get home, as somewhere along the line she lost her soles. Well, Kate, trouble never comes single handed, but we all hope you are having better luck with that new G-E stove, and those famous pies, too.

A wise guy stepping up to the bus as it stopped the other morning said to the driver:

"Well, Noah, you've got here. Is the Ark full?"

The motorman answered back: "Nope, we need one more monkey. Come on in."

Harry Karr, Bldg. 26-2, has finally revealed his secret for catching so many fish. He uses oats bugs.

There seemed to be a deep mystery for a while about Herman Hake, Bldg. 4-3, tip-toeing through the piles of stators one-half hour late last Monday morning. Well he was seen driving a new car later in the day, so perhaps this might shine some light on what happened. Better luck next time, Herman.

On a dark and stormy night, the trainman was signaling to the engineer when he dropped his lantern to the ground. Another man, passing by, tossed it back to him on top of the boxcar.

In a few minutes the engineer came rushing up to the scene. "Let's see you do that again," he said.

"Do what?"

"Jump from the ground to the top of that boxcar."

Pete Heniser, Bldg. 26-2, is now among the newly married set. He was married at Portland on August 23.

Well folks, this is some one's bad conscience popping off again. What is it about this time? Well this is about Pop Hemrick, the nimrod of Bldg. 4-2. We wonder why it is that Howard Mills and Ed Schafer lament the fact that they have been hunting squirrels for 20 years and never got one of those flying squirrels. Along comes Pop and swears that he shook eight out of one pawpaw bush down at Hartford City. We don't dispute his word, but flying squirrels in pawpaw bushes, I don't know. Oh yes, that brings up another thought. We wonder if Ray Smith has two more pheasants shut up on his dad's farm for Pop to shoot at this year. 'Twas said among the birds that those two didn't have a Chinaman's chance last year.

News for Bldg. 4-3 might be a little scarce this week as the Board of Censorship (Phil Tilford) is on his vacation, and the reporters aren't so sure what to write as he left no one to take over the job while he is away. Here's hoping he has a fine vacation and that he will be back on the job next week with lots of news.

Activity extraordinary exists in the little community of Waynedale. Those citizens most interested in the incorporation of this town as a city held a mass meeting the other evening in the present city hall to discuss the feasibility of such a step. The meeting was in charge of Alderman John Deahl, Bldg. 4-3, and two of his ward healers. After the meeting was dismissed, John and the two political experts retired to the catacombs beneath the building to discuss further steps to be taken and were locked in the building. Only the timely discovery of this fact by the janitor saved them from spending a night on the cold damp floor of the catacombs.

Sunday School Teacher: "It is the duty of everyone to make at least one person happy during the week. Have you done so, Billy?"

Billy: "Yes."

Sunday School Teacher: "That's right. What did you do?"

Billy: "I went to visit my aunt a couple of days and you can bet she was happy when I went home."

Art Brandenburger, Bldg. 4-3, reports to us that his hoggerie on Big Long Lake has done fine this summer, due, no doubt, to the excellent bathing beach furnished the porkers by Art. He is planning on having a big barbecue and hog auction the middle of October. He invites you all to come and get one of his famous pork sandwiches, also to purchase one of his porkers for winter consumption. We expect that his butcherie will be very busy for some time preparing the porkers for delivery to your homes.

Again we take an interested view of the passing show in Bldg. 4-3. First there is Helen Bunnell rushing back and forth between the south end and the office, Lillian Hitzeman coming up the aisle looking worried, Goldie Dragoo sporting a new ring. What kind? You guess. Arthur Bushing chasing horse flies out of the plant, and lastly, Carl Clevenger and Archie Boren indulging in a tall fish story contest. Each day the show grows more interesting, and it is a delight to stand on the side lines and watch it pass in review.

Goldie Mentzer, Bldg. 26-2, is having relatives from Massachusetts this week. Don't feed them baked beans, Goldie.

G-E Club Opening

(Continued from Page 1)

The opening is more or less a re-dedication of the Club building and follows considerable remodeling completed during the summer months. This includes a new lounge room, which will accomodate a number of card tables, as well as reconditioning of the bowling alleys and the gymnasium floor and refinishing of all seats.

All Shifts Invited

It is stressed that employees of all shifts are invited to the opening with an opportunity of employees on the second shift to inspect the Club after leaving work and those of the third before reporting for work.

A special committee has been named by President Waldschmidt to be in charge of the program. Its members include Paul Vogt, chairman; Joe Henry, Eva Lynn, Irene Meyers and Richard Kent.

LOUDER than Words

ACTIONS SPEAK LOUDER THAN WORDS:

★ On April 9, the battleship *NORTH CAROLINA* was commissioned—*five months ahead of schedule.*

★ On May 15, the battleship *WASHINGTON* was commissioned—*six and one-half months ahead of schedule.*

★ On June 7, the battleship *SOUTH DAKOTA* was launched—*four months ahead of schedule.*

★ The propulsion equipment for the battleship *MASSACHUSETTS* was completed this spring in the plants of the General Electric Company—*ten weeks ahead of schedule.*

Building a battleship is an all-American job. It draws on the resources of every branch of the nation's industry, and hundreds of industrial companies have done their part in speeding this shipbuilding program.

Our part is the construction of propulsion equipment—chiefly of turbines and reduction gears. And so far, for each of these ships, the equipment has been completed, ready for installation, ahead of scheduled time. General Electric Company.

This is the second of a series of reports on the progress of the defense work being done by General Electric

GENERAL ELECTRIC

IN THE ROUGH

By

WALTER SUNIER

The annual Blind Bogey Tournament of the GE Club will be held at Brookwood on Saturday, September 13th. A bigger turnout than ever is expected this year. Plenty of prizes will be given.

We decided not to take the golf chairmanship this year because of the thought that one person should not have it too long. We thought that responsibility for the golf activities for seven years was about long enough. Also, that it was time to do like others in public office—namely retire from the strenuous duties in order to have the opportunity to recoup our personal fortune. The job has worn us down to a mere shadow and a net weight of 110 pounds, wringing wet.

We know that no one is vitally interested in our actions but we do want to make this a chance to plug for Jim Oman who will take over the golf chairmanship. Jim is a fine fellow and an enthusiastic golfer. We are sure, therefore, that he will do a very good job.

We have been intimately connected with golf at the Fort Wayne Works for twelve seasons which, as far as we know, is as far back as organized golf goes at the plant. In 1930 and 1931, a GE Club team played in an industrial league against teams from other industries. Members of the teams for those years were: Pete Lamboley, P. O. Noble, I. N. Kellogg, Lew Gossman, Sam Newlin, George Cain, Bob Hanna, Emmet Mills, Harold McAtee, John Spencer, Merrit Hartman, Koch, Shannon and Sunier.

In 1932, Interdepartmental golf was started. Jack Evans, who was assistant works manager at that time, asked us to form a Main Office team as one of six teams. We helped to draw up the original league rules and in 1933 drew up the course playing rules which are still being used much as they were written then. At that time we had four driving nets for golf practice in Bldg. 2-3. In 1934, due to the depression, Brookwood was in financial trouble and we worked hard trying to devise some means for the Club to buy it. Henry Dannecker did some hard work for this cause. The same year we sold season tickets for Brookwood through payroll deductions and made a record in selling 227.

In 1935 we took over the responsibility for golf under the Athletic Committee. This year another group of players with higher averages was added to the league play. This added fifty more players. We discontinued keeping the scores of player hole by hole. Also this year through a bargain offer we sold 1,250 golf balls to employees with a saving to employees of $212.26.

In 1938, thanks to Eddie O'Neil, who was president of the Club, golf activities were separated from the athletic committee and given an entity of its own with its own chairman. This year the grouping of players into A, B, and C groups was discontinued and the present handicap system was started. Also, instead of having six large teams, the League was organized into eighteen smaller teams.

In 1940, we had the most successful annual blind bogey tournament when 118 players participated. In 1941, an experiment was made by trying one match with a girls' team.

We expect to continue "In the Rough" if this is of any interest to anyone.

Horse Shoe Pitchers Split Honors

After tieing the Pennsylvania horseshoe pitchers for circuit honors and holding the deadlock on a playoff the G-E Club horseshoe team will share honors with the railroaders for the Y. M. C. A. Industrial League. The pitchers shown above are, standing left to right—Arthur Craft, Jackson Binckley, George Hahn and Harold Hartman. Seated—Walter Rietdorf and Jules Cochoit.

Two Appointed

(Continued from Page 1)

for the new Taylor Street building call for a large special story building which, with its accompanying offices and service building will occupy substantially all of the property.

Mr. Hodell, the new superintendent, joined the Fort Wavne Works organization in 1916 when he was employed as a meter inspector. He became chief inspector and in 1917 he was assigned to the work of formulating operation layouts for the Meter Division. The next year he was transferred to the Fractional Horsepower Motor Division where he continued this work. Following World War service Mr. Hodell was installed as a methods man and in 1920 was made supervisor of this work. He continued in work of this nature until 1937 when he was made assistant superintendent of that division. In July 1939 he was made superintendent in Bldg. 4-1 and a short time later was made superintendent of Bldg. 4-4.

In December 1940 he was made superintendent of the Hermetic Motor Department including Bldgs. 17-2, 17-3, 17-4 and 2-2.

Mr. Williams, who succeeds Mr. Hodell, enrolled in the Apprentice School in 1925 and completed the machinist-toolmaker course in 1928. He was then assigned to wage rate work and later was transferred to the Specialty Transformer Division, where in 1934 he was named supervisor of planning and wage rate. He continued in this work until December 1940 when he was made assisstant superintendent of the Specialty Transformer Division.

Vacation Payments Will Be Made Today

Vacation payments in lieu of time off will be paid today to all hourly rated and salaried employees, who have not previously been paid their vacation allowance, and who are eligible to receive one or two weeks vacation allowance as of August 29, 1941.

Those employees becoming eligible for additional or all their vacation allowance after August 29 to the end of the year, will be paid in lieu of time off in the final week of the fiscal month in which they become eligible, i. e., those becoming eligible in September will be paid September 26. etc.

Inspect the G-E self-starting clocks. Employees store hours from 10:00 a. m. to 4:00 p. m.

Elex Bowling League Applications in Order

Applications are being accepted for the Elex Bowling League. The clubs will bowl on Monday and Friday evenings and on Wednesday afternoon. Girls who never bowled before as well as experienced bowlers are invited to join the league. Applications are to be sent to Irene Meyers, Bldg. 21. The League will open September 15.

Distinctive Wrapping For Store Purchases

It is announced that, beginning next week, purchases made at the Employees Store will be wrapped in distinctive paper so that watchmen can tell at a glance that the package being carried is an employee store purchase. Exceptions will be larger articles which will be enclosed in the original containers.

G. E. Club Tossers Split Shoe Title With Pennsylvania

Winning eight games each in both the second and third playoffs, Pennsylvania and G-E horseshoe pitchers remained tied for the Y. M. C. A. horseshoe title and agreed to split the honors. In the second playoff Pennsylvania was leading by two games near the finish but Kraft and Hahn defeated Saylor and Beckman to tie the match. Pennsy was again leading in the third match by two games but Hahn and Hartman pulled their team into a tie again by winning from Saylor and Grabill, respectively. Scores of third match:

G. E. Club

	W.	L.	R.	Pct.
Hahn	3	1	132	53.0
Kraft	2	2	97	43.0
Hartman	2	2	102	41.0
Rietdorf	1	3	107	41.1
Totals	8	8	438	44.7

Pennsylvania

	W.	L.	R.	Pct.
Saylor	3	1	109	53.9
Beckman	3	1	122	46.9
Grabill	1	3	128	44.3
Smith	1	3	106	42.0
Totals	8	8	465	47.4

Complete Plans For Rod-Gun Club Match

Trial plans are now being formed for the Club's second annual championship contest to be held at the outdoor range September 7. However in case of rain the events will be postponed one week.

The 22 calibre rifle championship medal will go to the club member shooting the highest total score on the course. Shooting will be on the 50 yard rifle range and will be limited to iron sights. However members with guns having telescopes mounted may shoot the official club rifles.

The pistol shoot, which is an entirely new event will be conducted on the 25 yard range and will be open to all members shooting either automatics or revolvers. The pistol shooting will consist of slow fire, timed and rapid fire.

Trial rules and the exact course of fire will be announced next week. However the entire event will be arranged so that all members will have an opportunity to fire and an equal chance to win a prize. Separate medals will be awarded to the rifle champion and to the pistol champion with an appropriate award to second place.

Doctor: "Your husband must have absolute quiet. Here is a sleeping powder."

Wife: "When do I give it to him?"

Doctor: "You don't give it to him—you take it yourself."

Defense Work Brings Engineering Change

F. T. Grothouse

H. D. Kelsey

The assignment of H. D. Kelsey, to take on duties in the new Supercharger Engineering Department at the Fort Wayne Works and the appointment of F. T. Grothouse to assume Mr. Kelsey's duties in the Air Conditioning and Commercial Refrigeration Department at the Winter Street plant is announced this week.

At the present time Mr. Kelsey is assigned to the Supercharger Engineering Department at the Lynn works, having been transferred to this work on August 15. Mr. Kelsey has taken on his duties at the Lynn Works in anticipation of assuming the position of engineer of the Fort Wayne Works Supercharger Department.

All In Readiness For Opening Of G-E Club

Candidates Named For Elex Club

Helen Bleke And Eileen Foor Nominated For President. Membership Drive To Start

The nominations of Helen Bleke, Winter Street and Eileen Foor, Bldg. 17-4 for the office of Elex Club president is announced following a meeting of the board of directors held last Wednesday evening. Other candidates announced are Evelyn Smith, Bldg. 18-B and Pat Chapin, Bldg. 26-2 for the office of vice-president and Margaret Suelzer, Bldg. 20-2 and Dorothy Mueller, Bldg. 4-6 for the office of secretary.

Nominees for director, of which three are to be elected are Marge Ponsot, Bldg. 17-2; Charlotte Stanford, Bldg. 4-3; Polly Ort, Bldg. 26-2; Dorothea Swank, Bldg. 26-3 and Dorthea Dissinger, Bldg. 26-5. Trustee nominees, two of whom are to be elected are Belle Buchan, Bldg. 17-4; Arietta Coe, Bldg. 26-2; Catherine O'Connor, Bldg. 4-6 and Ceal Romary, Bldg. 26-2.

With the nomination of officers it is also announced that the Club's annual membership drive will get under way next week and will continue for two weeks. Memberships may be obtained from contact girls. A goal of 2,000 members has been set for this year.

Employees and Families To Participate In Program Thursday Evening

Starting at 7:30 p. m. a program of interest to all employees and their families will be presented at the G-E Club next Thursday evening upon the occasion of the gala opening of the Club building for the 1941-42 season. An outstanding feature of the program will be bowling matches between various works organizations with a match between Works executives and the Elex Club as the probable high spot of the contest.

Other matches will be between the G-E Squares and the Apprentice Alumni Association; the Decatur foremen and the Fort Wayne foremen; the firemen and the patrol-

(Continued on Page 4)

Alleys have been assigned as follows for the match games to be played at the G-E Club opening next Thursday; Alleys 1-2, G-E Squares-Alumni; alleys 3-4, Decatur foremen-Fort Wayne foremen; alleys 5-6, Brass Hats-Elex; alleys 7-8, Club picked team-city team; alleys 9-10, Winter Street girls-Broadway girls; alleys 11-12, firemen-patrolmen.

W. C. Doehrman,
Chairman Bowling Committee

Tribute To Labor Is Paid By G-E President

Points Out That Job During Crisis Has Been Taken As A Common Responsibility

In his second annual Labor Day address given Sunday night, August 31, over the Red Network of the National Broadcasting Co., Charles E. Wilson, president of the company, paid tribute to labor in general during the present national emergency and to General Electric employees in particular.

Said Mr. Wilson in part, "Great emergencies like the present one accentuate developments and crystalize trends in the social as well as in the scientific and mechanical fields. Through it all the great majority of labor has been loyal and rejoices over its part in determining the outcome of the raging issues. It is a source of special gratification to us of General Electric that through the difficult months of expanding production of defense materials in our shops and offices, the job has been undertaken by our more than 100,000 people as a common responsibility and opportunity to serve our country.

"By their example, by the full force of their energies and skills to the speedy production of the requirements of the army, navy and air force, they are demonstrating their loyalty and their determination to preserve the way of life on which their faith in democracy, freedom and the fight is founded."

In closing Mr. Wilson said, "We pray for the success of free men abroad and we will do our share to achieve it. When this horrible human catastrophe is over, when the time that God has fixed has arrived, the cooperation of workers, soldiers and statesmen will have built a true democracy of understanding that will prepare us for whatever is to come."

Mr. Wilson's talk was the feature of the "Hour of Charm" program, broadcast from 10 to 10:30 Eastern Daylight Time.

CAUTION

With the heating period a short way off, the attention of employees is called to the necessity of clearing away all combustible materials that are in contact with radiators or other parts of our heating system.—Plant Protection Dept.

G-E Club Band Elects Officers

Closing one of the most successful seasons in its history the G-E Club Band held its annual election last week and named Clarence Schroeder president. Other officers are Paul Richter, secretary-treasurer; Jean Smith, corresponding secretary; Perry Shober, conductor and business manager.

A Good Time For All At Club Opening

"A good time for all" is promised G-E Club members and their families at the gala opening to be held on September 11. Above, George Waldschmidt, club president confers with his committee chairmen. Left to right—Paul Voght, entertainment; Jerry Duryee, athletics; Perry Shober, music; Wm. Doehrman, bowling; Dick Kent, publicity; Frank Newport, boxing; J. H. Oman, golf.

• Production and Panama

At first thought, there would seem to be little connection between our present defense program and the building of the Panama Canal. Yet a very graphic one has recently been demonstrated.

The Panama Canal stands as a model of the big construction jobs that have made the United States the marvel of the whole world. The defense program undertaken by industry is a vastly bigger and more complex effort. Hence, the former makes a handy yardstick for the latter, and Burnham Finney, editor of "The American Machinist," has seized upon it to illustrate a point:

"The world marveled at the magnitude of the operation of building the Panama Canal," says Mr. Finney. "Yet on the basis of cost, American industry has been given the task of constructing five Panama Canals a month for an indefinite period ahead. Later it is likely to be seven or eight or ten. Compressed within twelve months, industry will be asked to turn out defense equipment—planes, tanks, ships, guns, ammunition—equivalent to sixty or seventy Panama Canals."

It would seem like a David-and-Goliath proposition to the faint-hearted. But Americans have a long record of tackling big propositions that have awed the imagination of other peoples. And whether it's one or seventy or a thousand Panama Canals, industry, its skilled workers and management, can be counted on in this most important of all jobs!

"So far as history relates, free enterprise and democracy have grown hand in hand. I do not think we can have the one without the other. I think any effort, therefore, to destroy free enterprise with the profit motive for effort, will be destruction for our democracy."—A. W. Birdwell, President, Austin Teachers College.

• American Picture

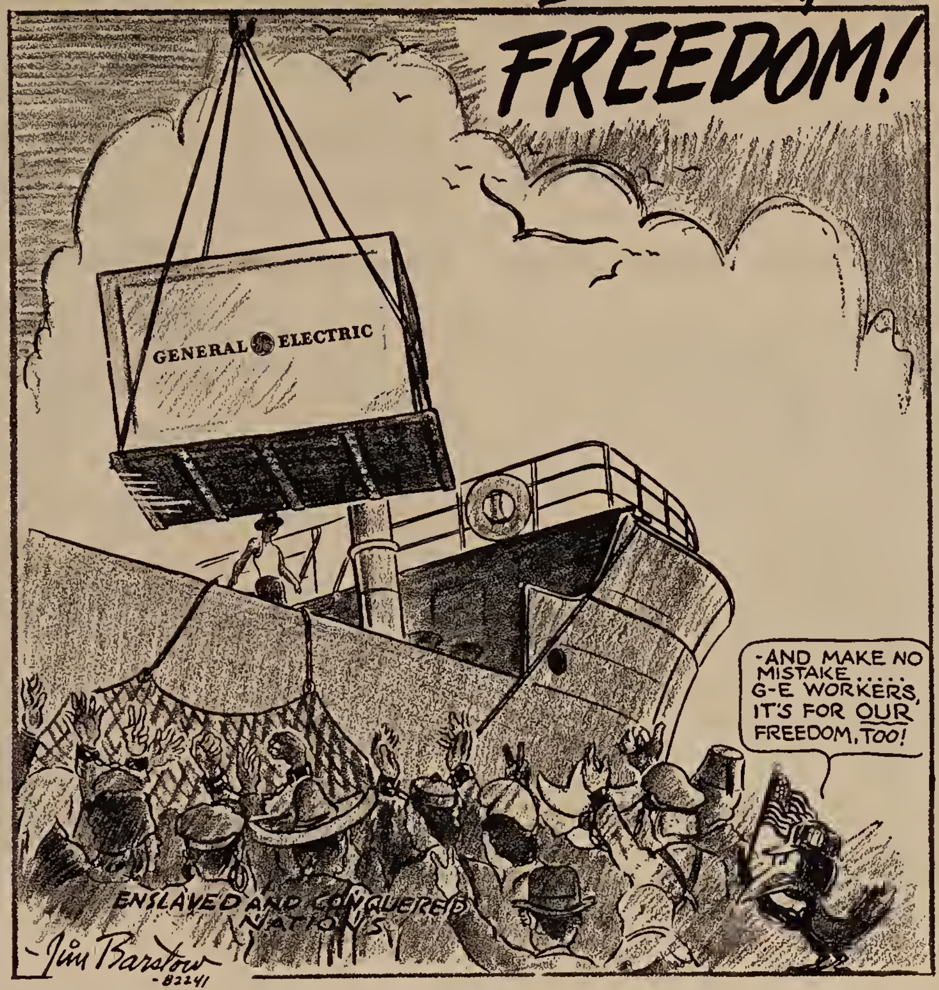
It was just another one of the hundreds of major league baseball games played each year in this country. Out on the mound, a young pitcher named Sullivan wound up and let go with a fast ball. The batter, whose name was Durocher, connected and hit a fast grounder to the first baseman, whose name was Elliott. If Durocher had missed, the man behind the plate—whose name was Lopez—would have caught the ball.

In the stands, thousands of other Americans with similarly varied names all let go with a concerted yell. They shouted because the side had been retired and a good play has been made—not because any particular nationality was involved. For the men in question were all Americans—players and audience alike.

In the middle of a warm summer afternoon, there was a picture of what it means to live in America. So much has it become a part of the pattern of existence in this country that surely no man or woman present even thought twice about the matter. Fair play . . . sportsmanship . . . tolerance . . . people of many varied origins who are all united as one nation in a land of opportunity: we take these things so much for granted that we seldom pause to give them any conscious consideration.

Yet these facts are what we really believe in, and all Americans are determined that they must continue to exist if life is to have any real meaning. And back of average American occurrences like these lies the basic truth that all of us are arming to defend!

PRODUCTION FOR ~~PROFIT~~ ~~Defense~~



FREEDOM!
GENERAL ELECTRIC
-AND MAKE NO MISTAKE..... G-E WORKERS, IT'S FOR OUR FREEDOM, TOO!
ENSLAVED AND CONQUERED NATIONS
Jim Barstow -82241

Thousands of words are being written today on the topic of freedom. A great many writers seem to think it is something new the way they sling two dollar phrases around. But it isn't. The fight for freedom has been going on now for quite a few thousand years and if there's one thing about it that's just the same today as it was in the beginning it is the fact, "that one should never put on one's best trousers to go out to fight for freedom." The quotation is from Ibsen's "Enemy of the People."

There's a lot of truth in that statement. Men fight for freedom in their overalls. They celebrate its achievement in tails and top hats. Right now is the overall season. Righ now we are in a big fight to preserve the fre dom which has made us great as a natio Right now we are raising the hope of the e tire world. . . . we are holding high the stan ards we cherish.

America's freedom has ever been the mag net to attract a world torn by conflict and di sension. It has always been a land of hop for the oppressed peoples of other lands. is more powerful today than ever. Gener Electric men and women have a vital part the business of helping to preserve this fre dom. Artist Barstow's cartoon symbolize production for freedom, not only for us . . but for all the world!

NEWS FROM THE CAMPS

We publish herewith with great pleasure extracts of letters sent to us by G-E employees now in government service. Address all communications for this column to the WORKS NEWS editor.

Dear Editor:

I received the WORKS NEWS the other day. It came as a pleasant surprise. The G-E seems far away, for the Army surely does things differently. Of course, I'll be pleased to receive the G-E News.

Army life for me has been an interesting vacation. I have traveled most of the time. We have lived in barracks built during the Civil War, in tent covered frame buildings, pup tents, on the ground with the sky for a roof, and am now in two story barracks like those out at the airport. The ground is a little harder than an Army cot.

When we were on maneuvers in June, we played host to a variety of insects. Those that did not burrow into our hides, managed to fly or crawl into our mess kits when we ate. Snakes, tarantulas, centipedes, and scorpions were quite common. We all were cheery about sleeping on the ground.

My company has sent me to school in Aberdeen, so my address has changed. I'll be here until the first of November. Then I must report for duty in Camp Shelby. From there, who knows.

Aberdeen is an interesting place. It is not at all uncommon to see a half dozen tanks bristling with guns come scooting down the road at forty miles an hour. It sounds like the Fourth of July here in camp most of the time, for the proving grounds are only a half mile away.

It is difficult to write of the Army, it must be joined and lived to be understood.

Sincerely yours,
Pvt. Carl Scott
3rd Prov. Ord. Trg. Center
Aberdeen Proving Grounds
Aberdeen, Maryland

August 24, 1941.

Hello Chief:

Am sitting out here in the wilds of Louisiana with the ants, baby scorpions, flies, mosquitoes and several other indescribable bugs fli ping a coin to see who takes th next bite out of my carcass. It's good thing they brought their ow coin as it is only seven days befo pay day, and I couldn't even pr vide them a picture of Lincoln.

Speaking of bugs reminds me the favorite Camp Shelby mosqui story: "One boy hearing the mu mur of voices in his sleep awo to find the mosquitoes perched the bottom of his bed. The o said to the other, "Shall we e him here or take him with us." T other replied, "We better eat hi here. If we take him back in t swamps the big ones will take hi away from us." Glad I was wr ing that or you would have u doubtedly halted me with that h mor killing remark, "Stop, I' heard it."

Have seen many strange thi in the three short weeks that I' been in Louisiana such as arm dillas, baby scorpions, "gators" e but ran into something odd yest day called . . . wash board. Up now I thought it was used exc sively for a musical instrument the "Schnickelfritz Band" but n I find that it is also used as an

Many Double Award Suggestions Submitted

Material Handling Important Factor

By J. V. Johnson

The elaborate and extensive handling system installed in the General Purpose Motor Department contributes greatly to the reductions in damages to parts during transportation.

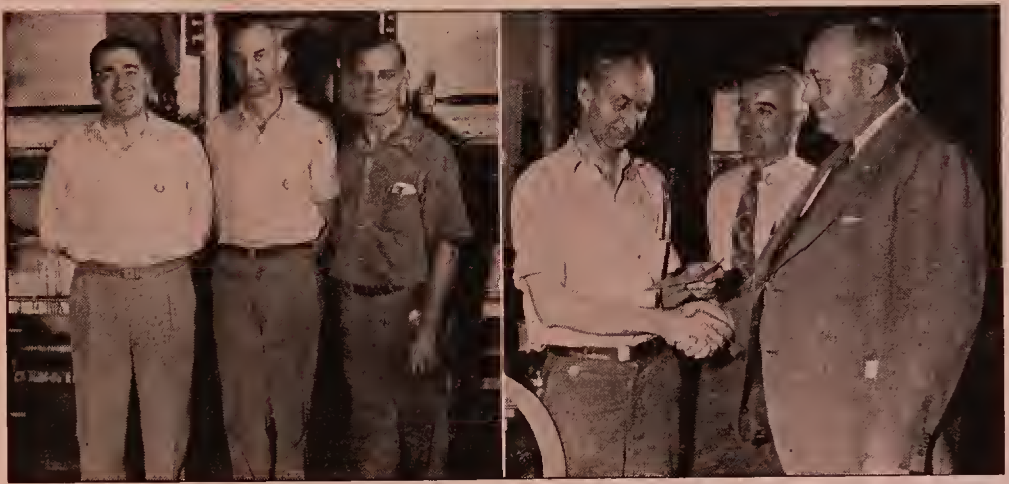
Coupled with the extensive conveyors and automatic loading and unloading stations is a system of standardized material handling containers. This equipment facilitates not only the handling of material on the system but creates a uniform means of properly protecting material in stock.

Like much of our other fine equipment, the success of its use depends largely on the operators and workmen who place the material in the containers. We can all contribute largely to the present campaign for reduction of spoilage adopting the following definite rules in the use of our stock containers throughout Fort Wayne Works:

1. All material must be carefully placed on the container so that it will not shift, causing damage to the finish or machine surfaces.
2. The material must be kept below the stacking ledge so that as the boxes are stacked in stock the weight of the added boxes will rest on the ledge rather than on the material in the box.
3. Materials which are subject to damage should be placed in containers with heavy paper separators between layers.
4. See that containers are clean and suitable for handling the material which you are placing in them without danger of damage.
5. If the container or box is damaged return it to the Repair Department as it may cause damage to parts placed in it.
6. Maintain the material handling containers in good condition by seeing that proper crane grapples are provided for lifting boxes by the ledge rather than with hooks to lift them by the container handles.

Improved handling of material always results from the returning of surplus empty containers to the central station so that they will be available for better handling of material in places where there might be a shortage of containers.

Three Double Award Winners In Wire-Insulation Division



Left—Wm. Rohe, Lazern Hopkins and Emmit C. Ort. Right—Lazern Hopkins, first double award winner, receives the congratulations of Harry E. Hire, superintendent of the Wire-Insulation Division and of Earl Gebert, foreman of the Department.

What If You Bought It?

By Walter Sunier
(Out of the Rough)

Didja ever buy one of those Whosis Triple X Champion World Beating Thingamabobs that peels potatoes, waxes the linoleum, beats eggs and mends broken shoe laces thinking how pleased the little woman would be and how it would get you out of the dog house which you are in on account of you had stayed out too late playing poker with the boys? It was a beautiful, shining gadget and with your voice choking with love and emotion and beer, you handed it to the better two-thirds and said, "Honey, the drudgery in your life is over."

The wise helpmate looked at it a little doubtingly and skeptically but still in the enthusiasm of the occasion and in the gush of making good, you placed it over the edge of the cabinet and turned the thumb screw to tighten it down. It worked a bit tight but you finally got it tight enough to try a demonstration. The whambungus beat the eggs to a froth. It rattled and wobbled a little from being slightly out of balance but in the exuberance of the moment you overlooked that. In mending broken shoe laces, it did a fine job of everything but mending them. In peeling potatoes, a few little adjustments were necessary to get the depth of the cut proper. The adjusting screw, however, was real handy and it was a simple chore to give it a turn. You gave it a turn but nothing happened—another turn and still nothing happened—another turn and by that time you fully realized that the threads were stripped and had been stripped when you became the proud owner. But a dauntless spirit such as yours is not to be daunted and you know that you can still make it work by pushing in on the screw. You try this but the consarned contraption is too loose on the cabinet to take it which means another turn on the thumb screw that you had a little trouble in tightening. Ah! One more turn and it is beautifully tight and just when you complete the turn, whamo—the thumb screw breaks. Now everything is just too ducky. The d - - - outfit won't work and furthermore it is fastened to the cabinet so that a young charge of dynamite is needed to get it off. And not the least of the disturbing features, is the secretary of the treasury glowering at you with her arms akimbo.

The farthest thing from our mind is drawing any moral. You can draw your own; but, as far as we are concerned, we will take a little quality with the apparatus we buy. Maybe our customers would appreciate a little too.

Lazern Hopkins, punch press set-up man in the Wire & Insulation Department took home 20 extra dollars last Friday and the distinction of being the Works first double award winner.

His suggestion was that material of insulation washers on drawing 5867759 be cut in rolls instead of strips. This is a saving of approximately ¾-in. of material on every punching and also saves considerable time in cutting and punching. The suggestion applies to the use of .027 thick acetated paper used for washers for the Motor and Generator Department. "Hop" has been with the company 20 years and has received 14 previous suggestion awards. Twelve of these were paid since 1936.

William Rohe and Emmit C. Ort, both Wire & Insulation employees, followed closely on the heels of their department's "Number 1 Man" with Double Award Suggestions also paying $20.

Rohe's suggestion was designated as a "campaign to overcome rough enamel." He suggested that a clip board be installed on each enameling oven so that operators can pass on to the following shifts the cause and method of correcting rough wire. Ort suggested the installation of idler pullies on booster roll chain for enameling ovens.

C. A. Borchert, R. L. Kierspe, and W. E. Engelbrecht, members of the Wire & Insulation Department Suggestion Committee, accepted these suggestions at the August 22 meeting. Harry E. Hire, superintendent of the department, awarded the checks.

Employees Respond To Campaign For Conservation Of Materials And Reduction Of Spoilage

Employees' response to the appeal for suggestions to reduce spoilage and waste and to conserve material during the month of August has been most gratifying. The figures below shows how each week the number of suggestions have very gratifyingly increased over the preceding one. With the extension of the "DOUBLE AWARD" incentive to include September it is hoped that these weekly gains will continue. The necessity for conservation and better utilization of materials is becoming greater so don't let up.

KEEP ON SENDING IN YOUR IDEAS.

Number of Suggestions submitted in August:

1st week	168
2nd week	207
3rd week	235
4th week	265
Total	875

Because of the great quantity that were received, those who are responsible for investigating these suggestions and making recommendations have been able to handle only a portion of the total. Many are still to be acted on and among these it is reasonable to expect that there are numerous worthwhile ideas.

Kill Two Birds With One Stone

Improved quality of soldered joints, and conservation of material, both result when solder used on joints is held to a minimum.

A large ball of solder adds nothing to the quality of a joint and may cover up a defect. A thin coat of solder which reveals the contour of a piece being joined, conserves tin, which is one of the much needed metals in our Defense Program, and reduces spoilage by eliminating high resistance or open circuits.

When you solder, the following rules will help quality:

1. Use the correct size of iron so that the solder and the iron will not be overheated and burned.
2. Keep soldering iron cleaned and well tinned.

(Continued on Page 2)

G-E QUALITY IS WHAT YOU MAKE IT

Keep Those Wheels Turning

Carry On!!

By Paul A. Vance

During these various periods of increased activity, such as, "Fire Prevention Week," "Be Kind to Dumb Animals Week," "Eat More Prunes Week," etc., we sometimes wonder if we should glibly switch our affections from hose carts to pups to prunes, and not retain just a little of our passing fancy of the past week. In other words, we are supposed to retain some of the campaign enthusiasm after the campaign is over.

That's why we should go right on, maintaining quality, conserving material, and preventing spoilage, after the "All Out For Defense" campaign is over.

In fact, to have adequate National Defense, and at the same time have enough civilian goods to help us maintain our well being, we must not only maintain quality and conserve material, but we must *improve* quality and *use less material* at the same time.

This is not asking for a miracle. It has been done hundreds of times. Let's take just three examples, for instance, which may be classified as large, medium and small:

1. When Mr. Ford changed from his Model T to Model A, he certainly improved the quality, and he actually did get a big saving.

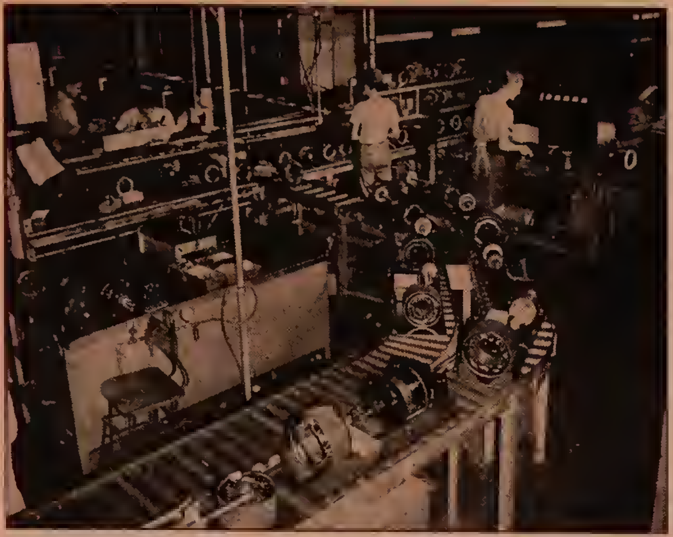
2. When the transformer department redesigned their "Navy" transformers, they lightened weights, improved strengths and electrical characteristics, and at the same time conserved about one-third of the material.

3. When Mr. Parrish, of the transformer factory, suggested a new method of winding saturable reactors, he not only improved quality by reducing the D. C. energy required, and by improving the heat conductivity but he actually saved material.

These examples were picked at random but they do something more than just illustrate what can be done. They show that it is always "open season", for all of us, no matter what kind of training or skill we may have, or how short or long our service with the Company may be. No one group can do it all, either. Ideas seem to come from anywhere and everywhere. And some of them take a lot of thinking and planning to develop. In fact, it is often lots harder to develop an idea into something worth while than it is to conceive it in the first place. And most of the difficulty comes in the form of little details that have to be worked out and settled by brute force or a lot of mental anguish. No, it isn't always easy. In fact, I have a vague suspicion that once in a great while a good idea falls by the wayside. But it is a lot of fun, and the promise of "Double Awards" doesn't spoil any of the fun, either.

But, regardless of how we may enjoy doing it, it is a pretty serious business, this improvement of quality and reduction of costs, and by "reduction of costs" I mean to include all the things we're striving for in this campaign—conservation of material, elimination of waste, prevention of complaints, and proper utilization of what materials we do have so we can keep on working. And it must happen here if we keep on, producing "More Goods for More People at Less Cost."

Do It Right In 4-4



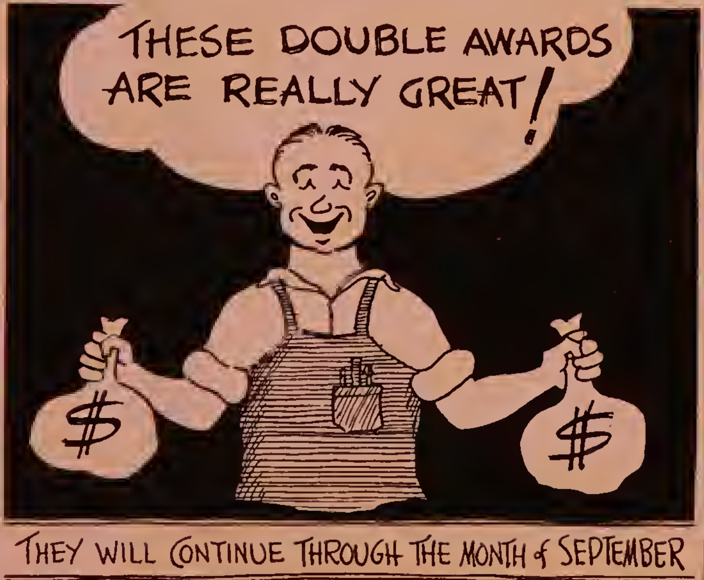
By T. L. STALEY

Bldg. 4-4 has an operating system, the heart of which is shown in the above picture. When all the parts are delivered ON TIME and DONE THE RIGHT WAY, the matched sets of parts move into the assembly smoothly and no additional material, tools or equipment, is necessary to produce the finished product. Delivery promises are kept and customers are pleased.

If parts are defective the set of parts on the tray must be side tracked to the left where additional materials, tools and equipment must be used to make repairs and delivery promises are jeopardized. If parts are not delivered on time confusion results, time and effort are lost, and deliveries are poor. In short, when anything goes wrong it sticks out like a sore thumb. The same troubles will result in any department when defects go up or are high and when parts are not delivered on time.

One of the cardinal operating rules in Bldg. 4-4 is that all material must be available before a job is started. This is essential if matching is to be made possible. In all departments matching must be effected before the finished product can be delivered. The last bolt, nut and screw must be provided; and when they are, the set of parts is matched. Nowadays, when materials are becoming more and more difficult to get, any suggestion which will reduce the amount or number of kinds of material needed will help America get defense products in time and will help maintain the American standard of living by maintaining the output of consumer goods.

Does any of the raw material used in making your product end up in the scrap pile because no plans have been made to use the so-called natural waste? Can you think of a place where it can be used to make another product or replace another material in your product?



THESE DOUBLE AWARDS ARE REALLY GREAT!
$
$
THEY WILL CONTINUE THROUGH THE MONTH of SEPTEMBER

National Defense Requires That All Machines And Equipment Must Be Kept Producing Good Quality Products

Priorities have long been placed on machines, tools, and other manufacturing equipment just as they are on materials we use in manufacture. The manufacturing capacity of our nation is the limiting factor in our Defense program, which makes it necessary that we do all in our power to conserve it.

Each one of us can help increase the capacity of our manufacturing facilities by seeing that the machines and tools which are assigned to us are producing acceptable products throughout the whole time we are operating them. Any loss in material or time incurred in the manufacture of products for National Defense is virtually a "damper" on General Electric's contribution towards National Defense.

We must make our parts correct the first time, as any loss of material or machine time due to spoiled work reduces the capacity of our machine facilities not only because of repair work necessary on defective parts but the need for complete replacement of those which are scrapped.

Let each one see that the machine facilities he is responsible for are being effectively used. When a machine or tool does not function properly or causes parts to be made which do not meet specifications, notify your foreman, at once. Delay may mean wasted material, time, and above all the ineffective use of our machine capacity to meet production.

All causes for "down-time" that is, the time when machines are standing idle or not producing, must be eliminated, whether it is due to the time taken for set-up, maintenance, or idle for any other reason, as to use our manufacturing equipment full-time to produce good parts limits the quantity of Defense material as well as commercial products we are permitted to turn out.

There are probably many ways that we can help the "All Out For Defense" program, but certainly one of the most important is that of keeping wasted production capacity to a minimum. The problem regarding more effective use of machine tool equipment for the improvement of quality of product and for greater production should offer a challenge to the alert worker, and presents itself as one of the most fertile fields for suggestions.

L. D. Hodell, *Supt.*
Supercharger Dept.

Why The Distinction

Just what gave it that tag or mark of distinction from the other parts in the production line?

It's Broken or Cracked

Castings—gray iron is strong, but sections are thinned to keep down the weight, so must not be dropped or roughly handled. Treat them like glass and they will not be cracked or broken.

Bent, Dented, Nicked and Rusted

Bar stock must be straight to make good parts without extra work or damage to tools, so protect it when you lift or handle it.

Buckled, Bent, Broken or Rusted

Steel, the thin sheets so common in our Works, scrolls, strips and sheets all easily buckled and bent, and in some cases alloys which are readily broken give trouble in shearing and punching due to the damage which comes in careless handling or stocking. After blanking and punching they must be carefully stacked or packed or the same defects will give trouble in sorting and stacking.

Scratched, Nicked, Tangled and Scuffed

Copper wire, like steel, is a large part of our material usage. It is easily bent, scuffed, scratched and tangled or damaged when the spools are filled too full, carelessly handled or stacked unprotected in aisles.

Damaged by Water, Torn, Soiled and Broken

Insulations—paper, cloth, fibre, Textolite or Kraft board find their way into spoilage when they have become wet or extremely dry, so that they will not form properly into the insulation we use. When they are torn, soiled or broken they cannot serve their purpose in the electrical products we build.

Use Your Opportunity

Think of the materials you see handled about you. Find an opportunity to keep them from being tagged defective. Suggest it; receive a double award while you are doing your bit to reduce spoilage and conserve much needed materials so vital to our National Defense.

KILL TWO BIRDS WITH ONE STONE

(Continued from Page 1)

3. Clean parts to be soldered and apply small amount of the correct flux.
4. Use enough heat to make the solder flow freely.
5. Hold the amount of solder to a minimum.
6. When heating parts to be soldered with a pyro tip, keep the carbon away from the joint itself.

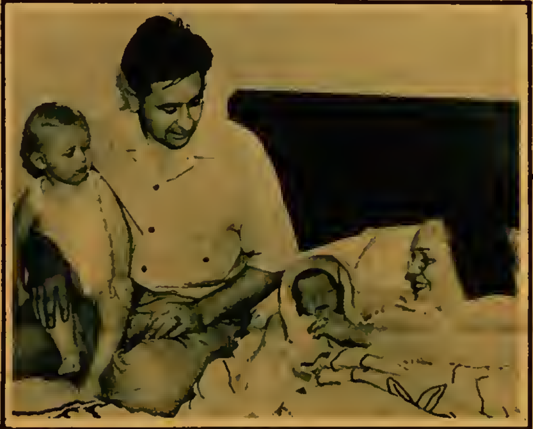
Barbara Lee Hazen, right, and Lorraine Wayland, left, daughters of G-E employees on defense work, like life in unique Trailer Village. There are more than 150 children of all ages in the village. Special school facilities are being provided when school opens in the fall.

THE FLAG FLIES . . .

daily over Trailer Village where Uncle S
defense workers in G-E and other defense

EVEN THE DOGS . . .

are welcome in Trailer Village. There are 15 there right now and so long as they don't bark too much and behave themselves as well-trained dogs should, they'll always be at home with a cool spot to sleep in during a hot day.

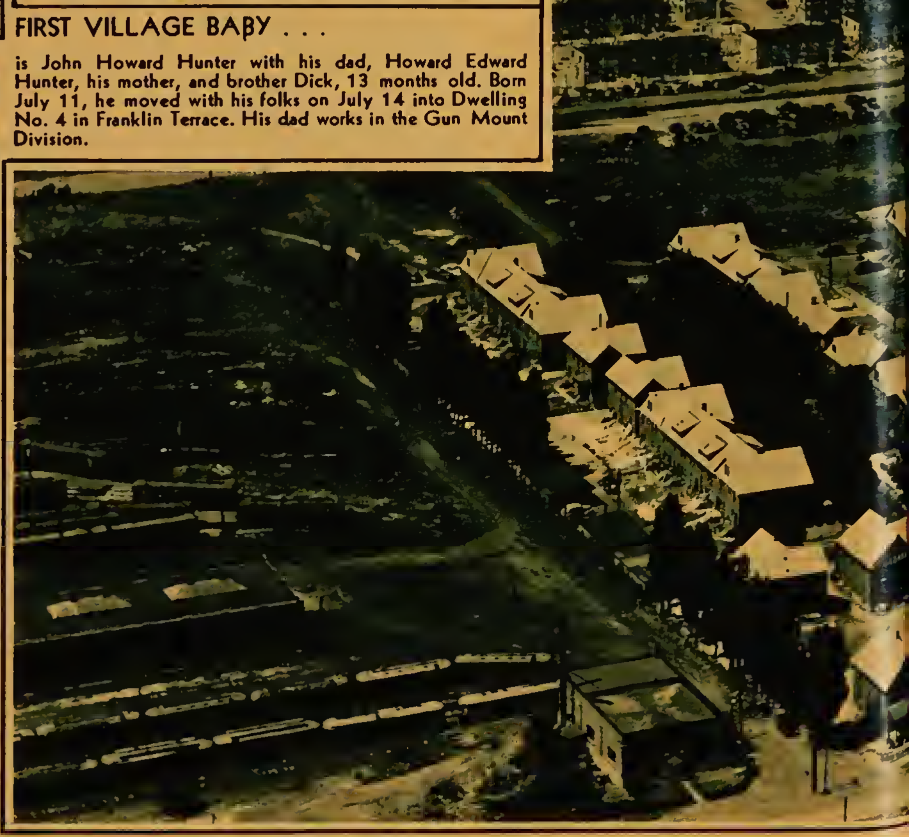


FIRST VILLAGE BABY . . .

is John Howard Hunter with his dad, Howard Edward Hunter, his mother, and brother Dick, 13 months old. Born July 11, he moved with his folks on July 14 into Dwelling No. 4 in Franklin Terrace. His dad works in the Gun Mount Division.

WATER AT THE SOURCE . . .

attracts a young Trailer Village resident. Throughout the area, central water sources and waste collection barrels are located. The entire village is wired and each trailer has electricity. Each trailer takes care of four persons with complete cooking and sleeping arrangements. Parking space for cars is provided between trailer rows.

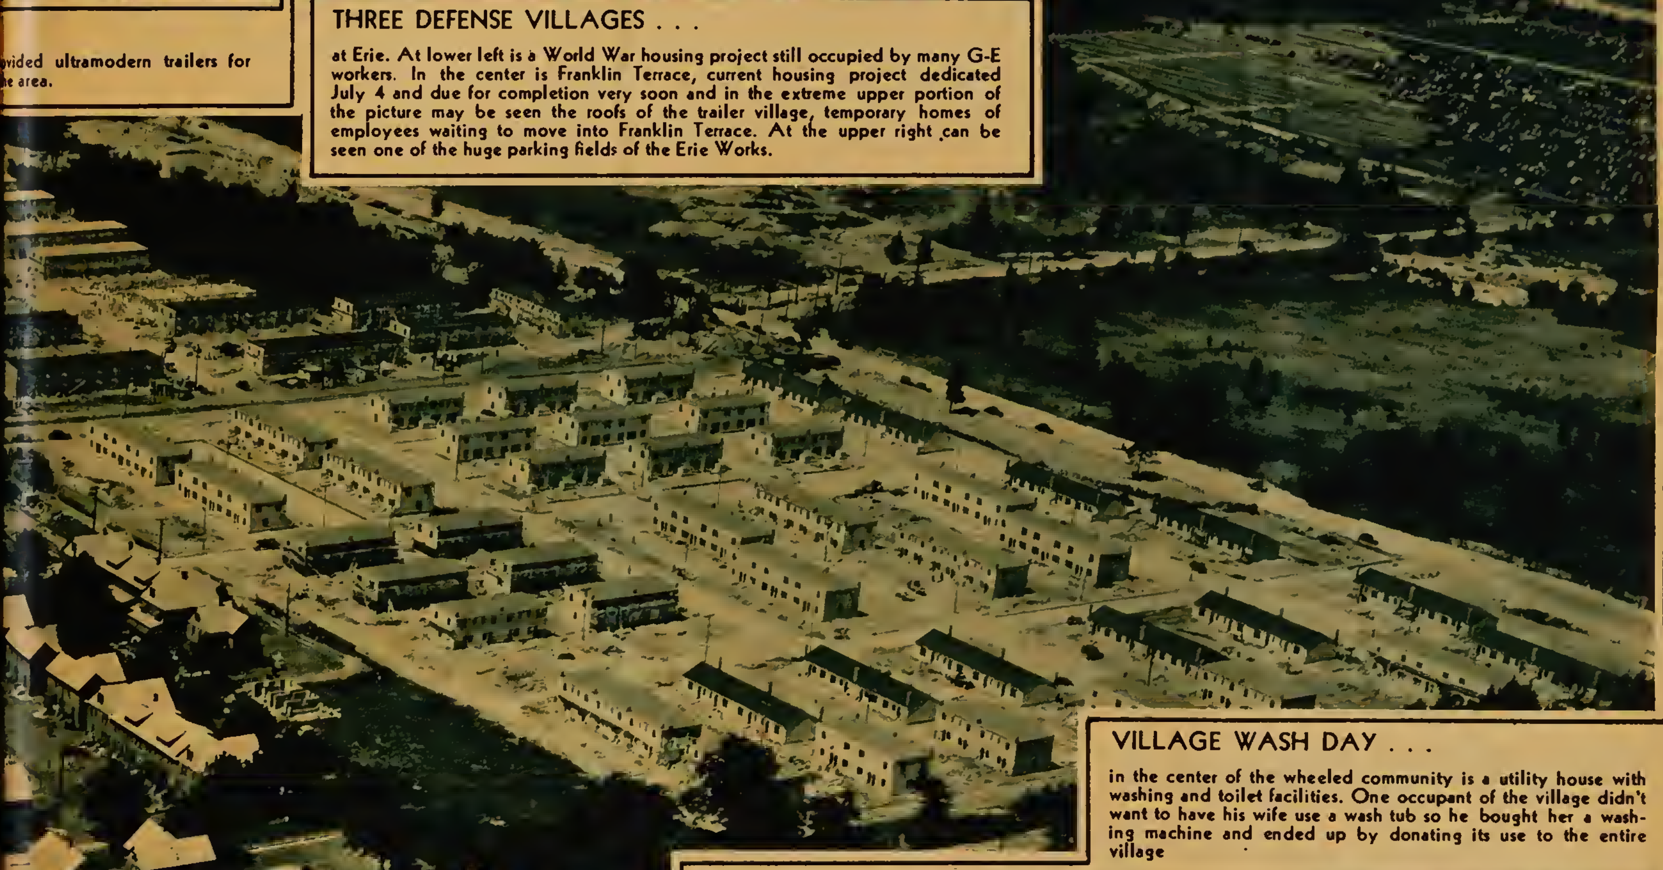


DEFENSE . . . Our Key To Freedom ! ! !

vided ultramodern trailers for
e area.

A FEW MORE . . .

of the 150 children busily at play right in the front yard of their trailer home. Children, previously living in congested city areas, have waxed fat and happy under an out-door way of life. Trailer homes don't have much space for children to play in.



THREE DEFENSE VILLAGES . . .

at Erie. At lower left is a World War housing project still occupied by many G-E workers. In the center is Franklin Terrace, current housing project dedicated July 4 and due for completion very soon and in the extreme upper portion of the picture may be seen the roofs of the trailer village, temporary homes of employees waiting to move into Franklin Terrace. At the upper right can be seen one of the huge parking fields of the Erie Works.

VILLAGE WASH DAY . . .

in the center of the wheeled community is a utility house with washing and toilet facilities. One occupant of the village didn't want to have his wife use a wash tub so he bought her a washing machine and ended up by donating its use to the entire village

DEFENSE . . . Our Answer To Tyranny ! ! !

WORKS NEWS CANDID CAMERA CAPTURES

REMEMBER WHEN . . .

the snow lay deep and heavy and the ice was crisp and keen? These hot August days make it seem all a dream. But it won't be long now before the cool days come again. Oh, yes, the picture was taken in February during Pittsfield Works Stanley Club winter outing. It shows Leo McAtteer and his star skating team about to go down the ice.

THREE MEN—ONE MACHINE . . .

in Philadelphia Works symbolize the vibrant spirit of the times. The machine runs around the clock 24 hours as Thomas Tully, top, takes it for an eight-hour workout during the day, Ralph Pierce, center, takes it for the second shift and John Henry, bottom, completes the cycle on the third shift. Thus this screw machine is doing full duty in the "all-out defense" campaign.

TWENTY-MILLION IRONS . . .

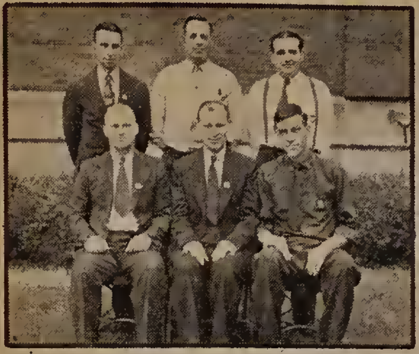
have been made in Ontario Works and they had quite a celebration out there recently. Here, Harry Strunk, first employee of E. H. Richardson who developed the modern electric iron, is about to take the milestone-marking iron from the assembly line while the sales group from Bridgeport looks on.

NEW SUNLAMP BULB . . .

known as the G-E MAZDA RS, it fits any ordinary 110–125 volt lamp socket and without further ado starts delivering "bottled sunshine." It uses 275 watts. No special equipment is required, for the lamp has everything. Goggles are not needed as special glass cuts out the unwanted rays. Nela Park at Cleveland is in production on the lamps now. Note the old bridge lamp standard being used by the model.

DEFENSE . . . Our Master Job Today!!!

G-E Club Officials For 1941-42

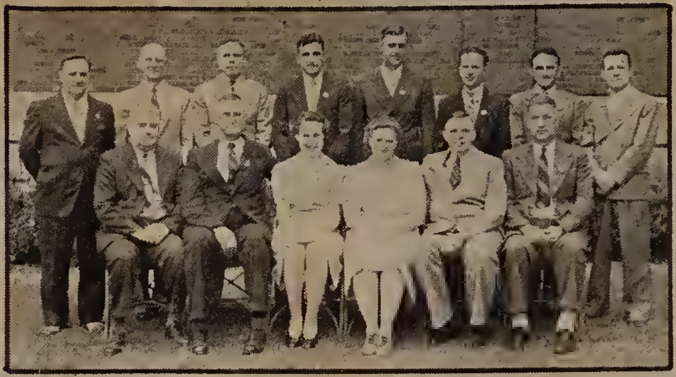


Athletic Committee

Front row: Jerry Duryee, Chairman, James Johnson John Braden

Second row: Jack Fox, Merlin Sweet, Charles Wilt

Missing: Otto Rodenbeck, William Straub, Robert Kessens, Ward Staley

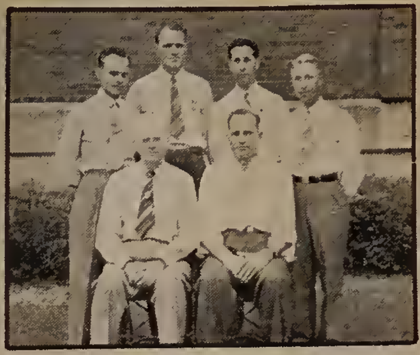


Bowling Committee

Front row: Victor Rump, Hamer Meeker, Merle Kirkpatrick, Ruth De Haven, W. C. Doehrman, chairman; Ed Yahne

Second row: Edward Hagadorn, Frank Heckman, Carl A. Rieldorf, Leo Elward, Royal Roeger, Carey Baker, Ray White, Howard Brooks

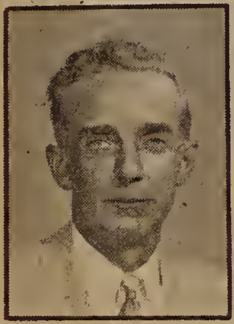
Missing: Kay Armstrong



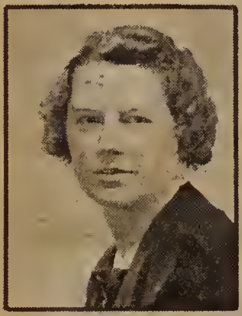
Golf Committee

Front row: T. L. Wallace, J. H. Oman, chairman

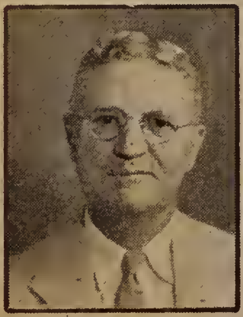
Second row: Jack Skevington, R. C. Hanna, Carl Reynolds, W. H. Sunier



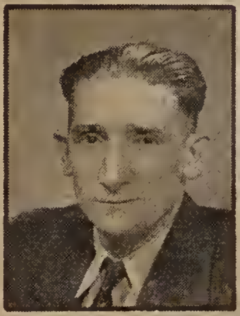
George H. Waldschmidt
PRESIDENT



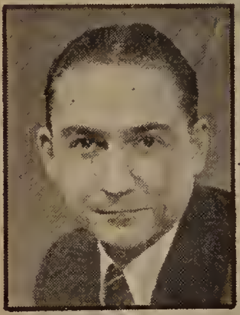
Helen Bleke
SECOND-VICE-PRESIDENT



William H. Fritz
TREASURER

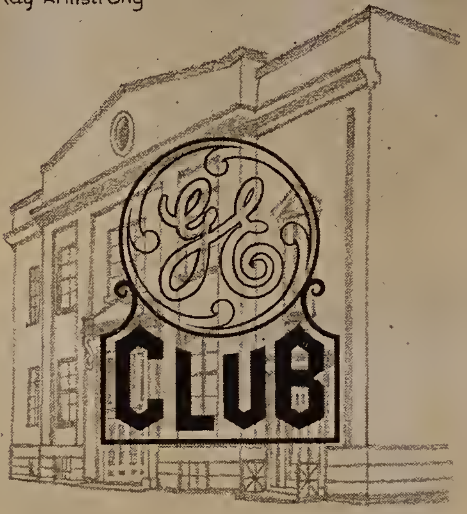


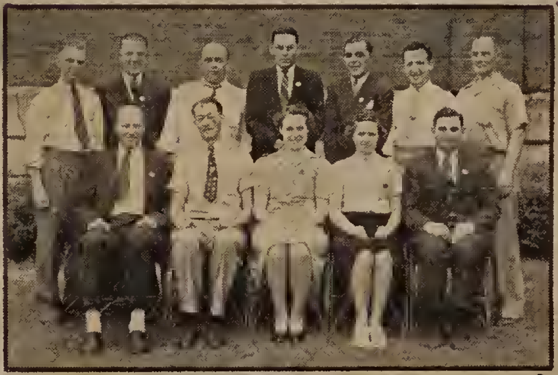
Joe Henry
FIRST VICE PRESIDENT



Harold B. Carter
SECRETARY

1941





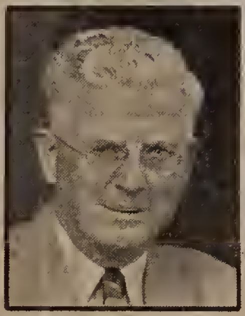
Entertainment Committee

Front row: Paul Vogt, chairman, Lawrence Schuster, Merle Kirkpatrick Pauline Baker, John August

Second row: Kenneth Redding, Arthur Brockmeyer, John Kaade, Gayle Griffith, J. L. Wyss, Ray E. Johnson, William L. Glenn

Missing: Ralph Henninger, Belle Buchan

1942



T. L. Wallace

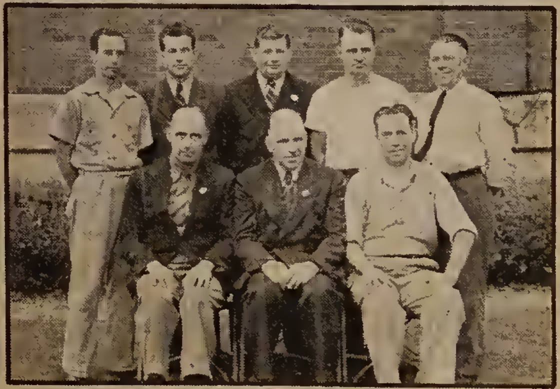
Band Committee

Front row: Jean Smith

Second row: Paul O. Richter, Clarence Schroeder, Perry Shober chairman



Boxing Committee

Front row: John Dennis, Frank Newport, chairman; Kenneth Betts

Second row: Richard Hurst, G. J. Shank, Harold Smith, Dale Weaver, Claud Kelly

Absent: Rolly Wickliffe, Sam Baumgardner

Quarter Century Outing Tomorrow At Lake Wawasee

Program Of Outdoor Sports Topped By Annual Banquet To Feature Affair

Tomorrow, September 6, will be a red letter day for members of the Fort Wayne Chapter of the Quarter Century Club for it is the day of the Club's annual outing. The affair will be held at Lake Wawasee with headquarters at Sargents Hotel.

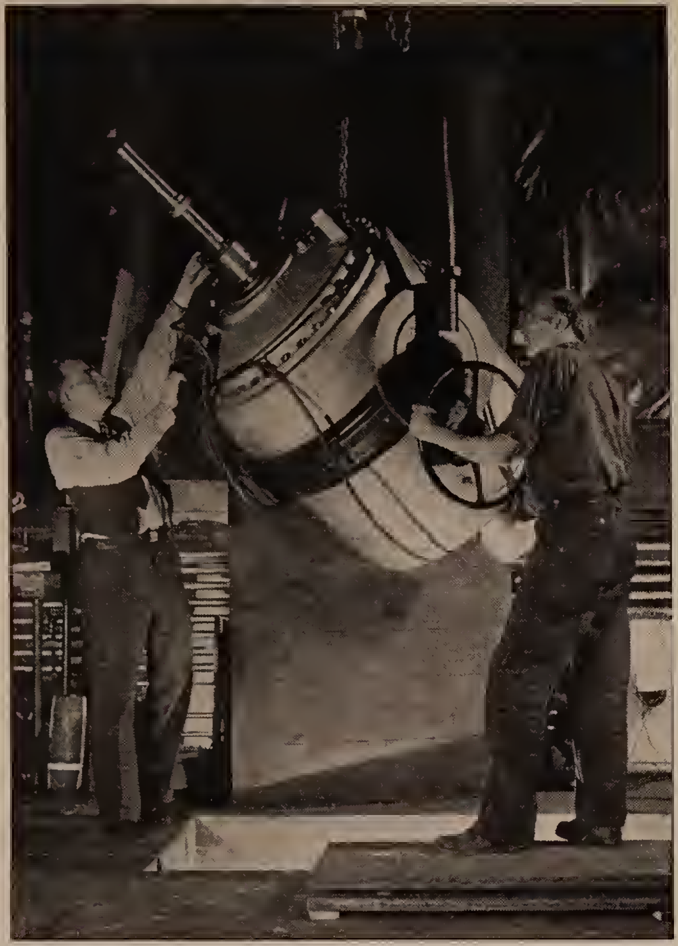
As in previous years the day will be spent in the enjoyment of outdoor sports including golf, horse shoe pitching, etc., Arrangements have also been made for boat rides around the lake.

The high light of the day will be the dinner at 12:30. E. L. Simpson, president of the club, will preside as toastmaster and will introduce Works officials for short talks and a speaker of national prominence.

To Leave 8:00 A. M.

All members who plan to participate in the outing are asked to report at the Main Office building in sufficient time to leave at 8:00 a. m. Fred Schafenacker has been placed in charge of transportation arrangements and all members who do not drive cars are asked to get in contact with him.

New Industrial X-Ray



An interesting view of the new highly flexible 1,000,000 volt X-ray machine developed in Schenectady. The machine weighs 1,500 pounds yet can be handled with the greatest of ease and pointed in any direction.

News From The Camps

(Continued from Page 2)

strument of torture for washing clothes. The Army has not only provided me with "dish pan hands" but also "wash board blues."

Last night was Saturday night and really had a big time. Five of us dressed up by changing to a clean pair of socks, walked a quarter of a mile to drink two bottles of pop, munch on a sack of peanuts and then returned to our so-called home. We then sat around telling each other what we would be doing if we were home. After everybody was finished trying to out-lie the other we hit the hay at the wee hour of ten o'clock.

The hardest job that I have here is holding on to my equipment. So far I've lost a shelter half, five tent pins, mess kit, pack, pack carrier, knife, fork and spoon. I've replaced everything but have started all over again as yesterday I let a knife get away from me. Guess I'll have to put my foot on one piece of the meat and pull on the other end. Have to do that sometimes anyway.

G-E paper gets here every week. Thanks a lot. Still wish I was back there grinding out that old sport page for you.

Corporal Arthur Maxham
Apo. 38th, 152nd Inf., Co. H,
Camp Shelby, Miss.

Dear Editor:

I am now working in the orderly room and also help the supply sergeant. Last Thursday we issued some clothing to the soldiers and it was a very long day for me. The camp has very good meals except Saturday we had some tapioca pudding which you could have used for fly paper or in other words used it for automobile tires—it was just like rubber. None of us ate any of it. I also rode in one of the Army trucks down to the warehouse and it isn't like riding in a sedan either. It is rather a rough ride. If I have to go to war I would much rather walk than ride one of those trucks.

I have seen Dick H. from the G-E. I see him quite often and we have chats together.

We have a Service Club. They have dances every once in a while. I have never been able to attend one, but I probably will before long. I am going to San Francisco over Labor Day and expect to see the Golden Gate bridge. I am getting another fellow to go along with me. We have to get weekend passes for this trip. I am going to work for awhile in the orderly room and also help the supply sergeant. That is what the captain told me. I enjoy the work very much. I take care of the tools in the supply room and keep a check on everything that goes out. The person that takes the tool out writes his name and platoon and as soon as it is returned I check his name off the list.

Well, I appreciate very much reading the WORKS NEWS.

Sincerely yours,
Pvt. Richard C. Becker,
Co. A, 76 Inf. Tng.
(Bn.) Hq.,
Camp Roberts, Calif.

G-E Club Opening

(Continued from Page 1)

men; Winter Street girls and Broadway girls; and a picked team of outstanding Works bowlers captained by M. Cox against a team of prominent city bowlers by E. Kraft. The matches will be in charge of Wm. Doehrmann, chairman of the Bowling Committee.

Other features of the program will include a concert by the G-E Club band under the direction of Perry Shober and a dance to be held in the gymnasium.

A general invitation to all employees and their families to attend the opening has been issued by George Waldschmidt, president, on behalf of the Club. Mr. Waldschmidt issues a special invitation to second shift members to visit the Club after leaving work and to third shift members to attend before reporting for work.

Announcement of committee members who will assume their duties at the opening of the club has been made by the various chairmen. The committees are as follows: Entertainment Committee, Paul Voght, chairman, Lawrence Schuster, Merle Kirkpatrick, Pauline Baker and John August, Kenneth Redding, Arthur Brockmeyer, John Kaade, Gayle Griffith, J. L. Wyss, Ray E. Johnson, Wm. Glenn, Ralph Henninger and Belle Buchan.

Athletic Committee: Jerry Duryee, chairman, James Johnson, John Braden, Jack Fox, Merlin Sweet, Charles Wilt, Otto Rodenbeck, Wm. Straub, Robert Kessens, Ward Staley. Bowling Committee: Wm. Doehrman, chairman, Victor Rump, Homer Meeker, Merle Kirkpatrick, Ruth DeHaven, Ed Yahne, Edward Hagadorn, Frank Heckman, Carl Rietdorf, Leo Elward, Royal Roeger, Carey Baker, Ray White, Howard Brooks and Kay Armstrong.

Golf Committee: J. H. Oman, chairman, T. L. Wallace, Jack Skevington, W. H. Sunier, R. C. Hanna and Carl Reynolds. Boxing Committee, Frank Newport, chairman, John Dennison, Kenny Betts, Richard Hurst, G. J. Shank, Harold Smith, Dale Weaver, Claud Kelly, Rolly Wickliffe and Sam Baumgardner.

Publicity Committee: Richard Kent, chairman, Perry Shober, Bob Parker, Walt Lamboley, Dick Robertson and W. H. Sunier.

Magnesium From Sea Promises A New Record

New American plants are making magnesium from sea water in such quantities that the United States and England are now equalling and will surpass Germany in production of this strategic metal, Dr. R. H. Harrington, metallurgist in the General Electric Research Laboratory, declared in a G-E Science Forum address.

An authority on alloys and heat treatment of alloys, Dr. Harrington said that the largest single use of magnesium, a metal only two-thirds as heavy as aluminum, is as an alloying element in aluminum base alloys. Many of these are used in airplanes.

"Of the common engineering metals, magnesium is about the only one in which Germany was self-sufficient, and, up to three years ago, Germany, using magnesium and its alloys as a main 'ersatz' substitution material, produced about three-fourths of the world's consumption," he pointed out. "Today, England and our country together are probably equalling the German output and, next year, should exceed German production in magnesium."

"Early in 1939," he continued, "it became apparent that the metal supply would be inadequate, and new production facilities were provided which increased the production by nearly 100 per cent to 12 million pounds for 1940.

"Present production points to a yield of 30 million pounds for 1941 and nearly 90 million pounds in 1942—from six million to 90 million pounds in three years."

This remarkable expansion is being made possible by new plants using sea water as a source.

"Even though the concentration of magnesium in sea water is quite low, there are about four and one-half million tons of magnesium in a cubic mile of sea water," he said. "Thus only one cubic mile of sea water will furnish 90 million pounds of magnesium metal each year for 100 years!"

Dr. Harrington declared that all the other necessary metals for magnesium base alloys are readily available in this country.

Magnesium and its alloys are used not only for reduction in dead weight, but also for less inertia because of light weight, for lower bearing pressures, easier rotating balance, for reduced centrifugal forces in rotating parts, resistance to vibration failure, and for certain advantages in high production fabricating methods, such as die castings.

Dr. Harrington listed some of the general applications, as follows:

Crank cases and covers, breather caps, supercharger parts, carburetor parts, manifolds, body parts for coal drills, portable polishing tools and drills, vacuum cleaner parts, lightweight bearings of low load carrying capacity, oil pumps, airplane wheels, reciprocating parts in printing presses, rotating parts in fans and blowers, panels, cases and fittings for portable instruments, bus doors, frames for fish nets, parts for grinders and sanders, light structural framework, fuel tanks, housings, furniture, trimmings, and small die cast parts such as door handles.

Edward B. McClelland Summoned By Death

Edward B. McClelland, assistant sales manager of the General Electric air conditioning and commercial refrigeration department, died suddenly of a heart ailment at his hotel in Portland, Oregon, on August 23, according to word just received at the department's headquarters in Bloomfield, N. J. He was 48 years old. He had suffered a serious heart attack June 1 while on a business trip in Portland. McClelland had spent over two months in a hospital there and was apparently recovering when he was stricken.

Nothing pleases a man more than a good cup of coffee. Nothing is easier for a woman to serve than coffee brewed in the new General Electric Automatic Coffee Maker. Just press a button . . . the appliance handles the rest of the job, and delivers a perfect brew every time served.

Engineering Changes

(Continued from Page 1)

Mr. Kelsey, a graduate of Syracuse University, entered the G-E in 1920 on a test job. The next year he was assigned to the Turbine Engineering Dept. at Schenectady, where he continued until 1928 when he was transferred to the Lynn Works. During the next five years he was on the engineering staff of the Turbine Dept. at the River Works after which he was transferred to Schenectady again and then to Bloomfield.

Plans for the new Fort Wayne supercharger unit, which were announced recently by President Charles E. Wilson, call for the construction of a $20,000,000 plant providing 400,000 square feet of manufactured area. Production at the Fort Wayne unit will supplement the output from the Lynn Works and the new plant at Everett which is nearing completion. Approximately 6000 employees will be required at peak production at the Fort Wayne supercharger plant.

Mr. Grothouse joined the Fort Wayne Works organization in 1916 and graduated from the Apprentice School in 1921. From 1922 to 1928 he was in charge of the drafting room of the Building and Maintenance Department and became associated with the late August Kayser on special machine and equipment design. In 1928 he was transferred to Winter Street where he was placed in charge of the drafting room and assigned to assist Clark Orr in the design of refrigerating machines.

He was placed in charge of the condensing unit design section in 1936 and continued in this capacity until 1940 when he was made engineer of the Production Engineering Section of Air Conditioning and Commercial Refrigeration. He continued in this capacity until his recent appointment as engineer of the Air Conditioning and Commercial Refrigeration Department of the Winter Street Plant.

NEWS THROUGH THE PLANTS

From The *Feminine Viewpoint*

By Irene Perry and Hilda Barthold

Whoever started the theory that women drivers are inferior to men? It just isn't so. Although not having statistical proof at hand, we're convinced that the fair sex chalks up a better record in the way of careful, courteous mileage than the menfolks. Goodness knows, it's the men who should be the better drivers since they do vastly more of it.

We believe in giving credit where credit it due, yes sir. And so, orchids and medals to the countless men and women who have thousands of miles of safe driving behind them. May their number increase. But please, gentlemen, merely because you're in the majority on the road and can (perhaps) do a smoother job of putting a car through its paces, that's no reason for calling the average feminine driver erratic, unreliable and generally a hazard to beware of.

We'd like to see this question settled once and for all, but realize the final answer will be found in the day by day driving we all do. Nearly everybody drives, and one thing is certain, the rules are the same no matter who you are or what kind of a car you drive.

Ye Voice of (some) Experience commutes 45 miles daily to and from the G-E. A lot of people drive in from out of town to their work here; we'd be interested in knowing how many. If you drive to work, here are a few ways to make your commuting easy and pleasant:

1. Before leaving home, check your gasoline, oil, water, tires and badge. Don't take any one of them for granted.
2. Have a regular time of departure. Allow sufficient time to cover the distance at a moderate speed plus margins for changing a tire if necessary, and walking from the parking lot to your building. If you want a good place in the lot, come early.

Now if we had to write this column in two words, the title would be "Speed" and the other half would read "Don't!" You'll never realize how precious seconds can be until they spell the difference between a narrow escape and a bad collision. Wonderful things, our reflex actions. They'll see you through many a close shave if you only give them time to act. If you travel 42 to 48 m.p.h. you have little to fear, regardless of the other fellow's crazy actions. We know there is a class of motorists who habitually cover a mile in less than a minute, and it's astonishing what they can get away with. But don't be one of them. They belong on the Indianapolis Speedway, not on the public highway.

We needn't remind you to stop where there are stop signs, defer to pedestrians even when they're wrong and generally observe the golden rule in navigating through traffic. Our pet peeve (fortunately there are few guilty ones) is the lane-weaver. Stay in your own lane in 4-lane heavy traffic, thus sparing yourself dented fenders and angry glares.

Having delivered ourselves of the above excellent advice, we go forth to our vehicle for the last trip home this week. If you meet someone in a one-way street, or see a poor female "sashaying" into a parking space, you'll recognize Ye Olde Advice-Giver in person.

26-5 Tool Bits

Milton Allmindinger and Don Alcott made a trip to Camp Lee to see a friend of theirs. They report a hearty reception by the camp personnel with a taste of army hospitality on the side. This included some spectacular motorcycle rides. . . . Harold Eggeman came to work recently with a slightly discolored eye and upon questioning he closed up like a clam. It's out. His car lost in an engagement with a cement bridge. . . . Fred Fitch earnestly summing up the various fine qualities of his new car included that "those seats are as wide as a davenport." It also has folding seats for beds and the double deck for fishing trips. Some car. . . . John Littlejohn has been breezing around like a wisp of smoke this week. Could it be that thoughts of a vacation are bothering him. . . . Christ Kaiser is very modest about his fishing abilities for he doesn't want the fishermen of Bldg. 26-5 to feel bad. If you want a thrill just ask to see a couple of those pictures he took of his California catch. . . . Gus Rodenberg's habit of walking halfway home and riding the other half has caused speculations as to the possibilities of a half price fare ruling being in effect. . . . Lloyd Welbaum narrowly escaped something this week. An air cushion ride home on Dick Kelly's cannon shot exhaust motor cycles, followed by requests for rides for his daughter caused a neighborhood turn-out. . . . Morris Hoffman is winding up his summer's stretch in the tool room preparatory to his return to Purdue.

The 4-2 Sleuth, Or Who Let The Cat Out Of The Bag?

Say, folks, I can tell you something else I'll bet you didn't know. I'll bet you didn't know that our very own 'Pop' Hemrick is known these days as Hawkshaw Hemrick. It seems that he is trying very hard to find out who let the cat out of the bag about the flying squirrels and the pheasant episode. Well we can't make up our minds whether he is trying to find someone who has some pheasants penned up this year. Anyway, he is all over the floor asking everyone if they know anything about flying squirrels, Paw Paw bushes, and pheasants in the very best Hawkshaw manner. Well, so long folks. Hope his conscience doesn't bother him too much.

Mildred Gertz

Winter Street "Worse"

(All in Fun)

Looks from here as though its time again
For me to take up my well known pen
To razz Editor Schwanz and the others who
Apparently have forgotten how to write the "Goo"
About us neglected folks at Winter Street.
That surely is not such a difficult feat,
But week after week there is not one line
About Kreischer saying "the fish is fine",
Or Peden is vacationing at Mosquito Beach
And Mensch is autoing way out of reach.
No Sir, not even the same old stuff,
And we've been patient long enough.
We now declare its just about
Time Schwanz got busy or got out.

Frigid Freddie

Marjorie Hargraves, Bldg. 3-4, has her own idea about how to make the most of a vacation. We only hope she does come back.

Wanted by Byrl Miller, Bldg. 4-3: Moving houses, not too large or too small. Any distance, price will be the same.

Everyone in Bldg. 4-3 seems to be back on the job after a three-day vacation. All report having a very lovely time.

Phil Tilford, Bldg. 4-3, has returned to work after a week's vacation, but we are all wondering where he received that rosy complexion.

We are very sorry to hear we will not see Evelyn Blotkamp in Bldg. 4-3 anymore. She is leaving us for Bldg. 4-6. Good luck, Evelyn.

Sleuthing In 4-6

We are glad to welcome Eloise Wright to our Bldg. 4-6 "family". We hope you will like being one of us, Eloise. . . . It would not be surprising if Bill Ryan were to see blue prints in his sleep. But since he was seen doing a spring dance and singing, "I am a blue print," he has us worried. Maybe it is a case of "Blueprint-itis." . . . Our friend Strasser says, "A tourist is a guy who travels 2000 miles just to have his picture taken standing beside his own car." You're not just talking either, Adolph. . . . Since it took Walter Brake so long to decide to buy a casting rod, his friends took pity on him and made him one. It is a most unique model made of file handle, paper clips, and any other articles that happened to be on hand. It is accompanied by a guarantee to catch one tub of 14 inch blue gills at Palmer Lake. We're expecting to hear a record-breaking fish story now. . . . Marjorie and Dick Szink are going to Niagara Falls for their Labor Day vacation. Could be a second honeymoon—who knows? . . . We wonder how it happened that two noted fishermen like Harold Sherbondy and Walter Brake were off from work on the same two days. They tell us that they were sick, and of course we would not doubt their word—much! . . . Approximately 12 members of the Birthday Club attended a Theater Party last Wednesday night in honor of Mary Cooper, Helen Forst and Sally Seele. Each of the honor guests was presented with a gift, and from all reports, an enjoyable evening was had by all.

Here's a rousing goodby to Chet Krasinko, Bldg. 4-2, who is leaving for college at Purdue. We hate to see him go as we will miss Chet and Don Wagner's singing the duet. Be careful of the coeds, Chet.

Ed. Fisher, Bldg. 4-2, is back from his vacation with a nice sun tan and looking good. We heard his fish story he told the boys. He caught 12 to 16 inch blue gills and they rushed over to see them. They turned out to be crappies. Nice fish, nevertheless.

Ralph McCuan, Bldg. 4-2, spent one week of his vacation in Lafayette and the other week resting up at the Eagles Lodge playing pinochle.

All the girls are worried over the idea of Herman Hake, Bldg. 4-3, asking so many of the girls to take a ride with him. Well, Herman has purchased a new Olds and he wants to make sure everyone knows he is driving something different.

Valeria Demske, Bldg. 4-3, underwent an operation at St. Joseph's Hospital last Friday.

SANDY SAYS

Once upon a time, long ago, in the rubber country of darkest Africa, there was an institution known as the Gentle Elastique Co. But before we start this sad tale o' woe, lets decide that any similarity between these and any person or persons alive or dead—from the neck up—is purely incidental.

Weel, this Gentle Elastique Co. made lots o' Stuff. Their motto was, more stretch for more bands with less rubber.

Once upon a time—but I said that—anyway, once, they got an order tae build some o' their very special static transformations—with two way stretch. Tae do this, they had tae buy from another tribe some very special penal-lastic boards, (Don't mind these foreign terms) at three Scudees apiece Then they had tae ventilate and grove them according tae a certain pattern.

But alas, there are 1,000,000 ways o' doing a thing wrong, and only one o' doing it right.

So, the ventilating (hole making) department tried one o' the other ways. So the penal-boards, at three Scudees apiece, were sent to a place they called the "scrap shed", (another foreign term tae a Scotsman).

Another batch at three Scudees each were bought. The hole makers did O.K. this time, so they were sent tae the groove gougers. But they weren't "in the groove" that day. So a second set at three Scudees per were ruined.

Now, sad tae say, all the other tribes o' the world were fighting, so more special penal-lastic boards just couldn't be had, even at three times three Scudees per.

Weel, the Gentle Elastique Co. might have failed tae make any money on the Stuff, but ye should hai seen the beautiful—and expensive—scrap pile they had. In those days a good scrap was enjoyed by all.

O' course, that couldn't happen here! And I can prove it. Someday when we have no scrap pile, and when our scrap shed is empty, I'll take ye over there and prove it myself.

At that, I believe I could prove it better than my Uncle McPhilly did that he could pick a race horse. He picked a little beauty, that he said, "Just stood at the post itching tae get started—so they scratched her."

Plastic Flashes

We see by the papers where we're going to lose Duane Duff to the draft.

Everyone's back to work fresh as daisies after being lazy for three days.

Everything is back to normal now. Joy has returned from her vacation.

Congratulations and best wishes to Lorraine Blanchard, Bldg. 12-3, who was married in St. Louis Friday.

Our men's fashion adviser, Jim Fleming, is back to work and has some cute new ideas on what the well-dressed man will wear.

We're wondering who has the inside track on Betty Walker's heart. Couldn't we guess, Betty?

What's this about Clara Knoll pulling a fast one on us and changing her name from Miss to Mrs. last Saturday?

The three stooges, Florence, Martha, and Betty have a boy friend named William. Tch! Tch! Girls, we didn't think it of you.

We all hated to see Kathryn Steinman leave our department, but hope that she will find her new undertaking very successful.

Mary Leslie, Lucille Schelper, and Marie Erickson certainly must believe in the saying, "Go west young—(well, you know the rest)." Mary visited California, Lucille journeyed to Colorado, and Marie saw the Black Hill territory.

Deveta Rietdorf is Bldg. 12-3's new shoe stylist. She has been wearing shoes covered with stamps.

In answer to a lot of letters we have received as to how many and what we Tillies look like, we wish to print the following information about ourselves:

Three "little" girls are we. Our names are: Sophy, Mabel, and Hepzibah (called "Heppy" for short).

Sophy is seven feet, six inches tall, with blond, reddish brown hair. One eye is gray and the other green. She weighs 98 pounds, and all in all is a very charming little lady.

Mabel is four feet tall, weighs 300 pounds, and wears a platinum wig. Her eyes are such an odd color, they cannot be described. She is engaged to an Army lad named Wilbur. We hope that Mabel does not consider marriage seriously as she is our best "news getter."

"Heppy", the beauty of the trio, is a luscious strawberry blond, approximately 74 years old, and really a "gorjuss" creature. She lives for only one thing: "Sadie Hawkins Day" when she is determined to catch the love of her life—Hairless Joe."

Satisfied Folks?
Bye Now,
THE TILLIES.

News From 26-3

Helen Miller "middle aisled". The groom said he didn't get nervous but for some reason lost control of his "Adams apple". He did manage to say "I do", however. Helen came through all O.K. but she would like to know who got tangled in her train. Congratulations and all that goes with it. . . . Luella Cook is happy with her wedding gift—one of those super G-E irons. . . . For the latest style on watch bands see Marguerite Krebs.

Thisa And Thata 19-5

Arnold Johnson and his wife decided to take a second honeymoon. Yes, they have gone to Niagara Falls. . . . Speaking of honeymoons we offer best wishes to Alice Pollard who left the employ of the G-E last week to become a bride. . . . We say goodbye and good luck to Joan Kleber who has decided that housework is an important item. . . . A speedy recovery to Louise Beamer who is on our sick list. . . . To all of you who are on vacations, we extend wishes for an enjoyable time.

Kathryn Walters, Bldg. 26-2, has a nice diamond. When is it going to be, Katy?

Why does Lillian Felty, Bldg. 26-2, call Jim in such a meek little voice?

Cecelia Prongie, Bldg. 26-2, received a rolling pin from Smoky Mts., doesn't know what to do with it.

Golda Mentzer, Bldg. 26-2, made so much noise with her drum and hula skirt last week at the lake the fish even quit biting.

Lawrence Richert, Bldg. 26-2, went to the Smoky Mountains over the week end. He couldn't understand why they weren't smoking so he went on to Tennessee.

Archie Boren, Bldg. 4-3, has always had the record of telling the biggest fish story, but now comes along Irene Roberts, Bldg. 4-3, saying they had to get a trailer to haul all the fish they caught. Now girls you can have that long promised fish fry.

Brightening 'Em

The G-E Club emblem will shine brightly on the official opening night of the club on September 11. Soap and water and new bulbs will make the emblem shine.

Nibbens From 19-4

It is reported that Doris Kleber, Bldg. 19-4, is quite a jitter bug. The report comes from Antwerp. . . . Margie Reed spent Labor Day traveling through Pennsylvania. Hope you had a nice time. . . . Such a life. When Bob was working days, his main interest was working nights. Then Bob started working nights and the interest started working days. It ain't fair. . . . Edna Braun is lonesome since all her friends are on vacation or working nights. Don't worry Edna we'll be back with you soon.

The girls in Bldg. 12-B office sure hope Bill Glenn enjoyed his vacation last week. Of course, if they had known he was going to spend it "pounding the pillow" they wouldn't have phoned him quite so much or so early in the morning! At least, that's what they say.

Mr. and Mrs. Harold Spath, Bldg. 4-3, enjoyed Labor Day vacation but Oh! that new car. To think of racing 500 miles off with it. Too bad for it. If they have too many holidays, it will get awfully tired.

Harold Bokar , Bldg. 4-3, spent a week in New Jersey and returned home with both bumpers and all four fenders in perfect shape. His motto used to be not to let a Ford pass no matter the loss, but now he says, "Let them go by if they like" for after losing several fenders and bumpers thought it didn't pay.

Again as we look up we see walking down the aisle a little black haired girl walking very fast with a big smile on her face. There's a reason. Her name, Margaret Niblick, Bldg. 4-3.

Forest Whonsettler, Bldg. 4-3, is taking a trip to the Northern Woods. He hopes to bring back an enormous amount of fish and do some prospecting for an Indian squaw.

If anyone has any photography to be done, Esther Schust, Bldg. 4-3, can do it. Ask the girls in the Small Lot Section of Bldg. 4-3.

Best wishes to Iris Hutchinson, Bldg. 18-3, and Bert Leiter, Bldg. 17-2, who plighted their troth last Saturday.

Three men visited a bar. "I'll have a Coca-Cola," said the first. The bar-tender turned to the second one. "I'll have an orangeade," was the order. The bar-tender turned to the third—who said: "And I'll just have a glass of water. You see, I'm driving."

SCIENCE FORUM – by L. A. Hawkins

Q. Is a keeper of any help in preserving the strength of a permanent magnet?

A. Yes. The use of the keeper reduces the stray magnetic field of a magnet, and makes it less liable to be demagnetized.

Q. Could a person write with the left hand as well as with the right, if given the same amount and type of instruction as given on using the right hand?

A. Yes, he probably could. Most human beings seem to be able to use their right hands a little more easily than their left hands. There is originally only a small amount of difference between the two, however. Most of our superior skill and dexterity with the right hand is the result of continuous use of this hand for the more exacting tasks. There is no doubt that we could be trained to write with our left hand, from right to left on the page, as easily as we are at present trained to use our right hand and write from left to right.

Q. How is lockjaw caused?

A. Lockjaw is caused by the Tetanus germ. It seems to be necessary for the germ to be driven down deeply into the tissues and to remain there, if the germ is to grow and multiply. It is important to get the attention of a physician for any wounds which are deep, penetrating, or crushing.

Q. What are proteins?

A. Proteins are the most important substances that occur in animal and vegetable organisms. They are highly complex compounds of carbon, hydrogen, oxygen, nitrogen and sulphur, occurring in solids or in solutions in nearly all parts of the body.

Q. How many foot-candles of illumination are there outdoors on a sunny day? Is this harmful to the eyes?

A. Outdoors on a clear midsummer day, the illumination frequently reaches 10,000 foot-candles. Most authorities agree that this intense illumination is too high for the least fatiguing use of our eyes. They believe the ideal intensity for outdoors is about 1,000 foot-candles; that is, the illumination of a shaded area, such as a porch, on a clear, bright day.

Q. I have been told that a person tans more quickly at the lake or seashore. Is that true?

A. Yes. This is due to the fact that there is much greater reflection of sunshine both from the water and shore, adding to the direct effect of the sun.

Q. If a bullet could be fired straight up and then allowed to return by gravity to the rifle, would it upon reaching the same level from which it was shot acquire the same velocity as when it left the gun?

A. In a vacuum it would, because the same force of gravity that retards its speed on its way up will also pull it down and make it speed up to the muzzle velocity when it strikes the ground. Because of the air friction, however, it will not do exactly this.

Q. To what do you attribute the change in temperature that made the Ice Age possible?

A. We might briefly enumerate a few hypotheses. The decrease in temperature may have been caused by the elevation of the land; in the amount of heat received from the sun; changes in the position of the earth's axis of rotation; changes in the amount of carbon dioxide in the earth's atmosphere; changes in the eccentricity of the earth's orbit, and the possibility of nebulous matter in space tending to shut off the heat from the sun.

Q. How much weight will one cubic foot of hydrogen raise?

A. Hydrogen is the lightest gas known, and that is the principal reason for its use in balloons and dirigibles. Hydrogen weighs about 1/10 ounce per cubic foot and air weighs 1.2 ounces. Now the difference between the two—1.2 minus 0.1—is 1-1 ounces. That is the weight that can be lifted with a cubic foot of hydrogen. These figures apply only at the surface of the earth at sea level. As you go up, the air weighs less per cubic foot; hence the lifting power is less. Hydrogen is difficult to keep confined. The problem would be somewhat simplified through the use of helium gas. That gas is not so inflammable as hydrogen is, it leaks out only half as fast, and lifts 92 per cent as much.

Q. Why does not lightning follow a straight line instead of a zigzag course?

A. If lightning followed the field of force between the cloud and the earth, it would take a smooth, curved path. But lightning follows the path of the least resistance, which it determines for itself as it progresses. The path is determined by local ioniation conditions, just ahead of the progressing streamer.

Q. How hot must dish water be to sterilize dishes?

A. Any temperature above 165 degrees Fahrenheit is satisfactory for killing harmful bacteria. It must be understood that water at this temperature will not kill all germ life, for there are some spore-forming bacteria that can live, for a short time, even in boiling water. For most everyday dish washing, however, 165 degrees or above is satisfactory.

Q. Nearly everyone is familiar with the expression, "the sun is drawing water," which is used to describe the cloud formation when long rays of sunshine reach down from huge banks of clouds. Is there any truth to the saying?

A. The expression has absolutely no scientific significance. The fan-like arrangement of the sun's rays, which is often observed toward sundown when heavy clouds are in the sky, is due simply to a chance arrangement of the clouds which let shafts of sunlight pierce through.

New Model Disposall In Manufacture Here

Latest Appliance Much Lighter In Weight And Has Many Improvements

A new model of the General Electric Disposall, designed and manufactured at the Fort Wayne Works, more compact and yet of greater effective capacity than its predecessors, has been announced. Attached to the sink drain opening, the Disposall grinds and eliminates all food waste at the sink.

Rapid strides in the refinement of the Disposall have been made since the successful introduction of the new product several years ago. The new model, third of its line (called the FA-3), has at once been simplified and increased in efficiency.

Fewer parts, smaller dimensions but greater capacity of the shredding compartment, faster grinding, faster pumping away of the shredded waste, practical elimination of operating noise and permanent lubrication at the factory are among the results of the design improvements of the new model.

A few statistics comparing the old and new models of the Disposall tell a dramatic story of product development. The total number of parts has been decreased from 239 in the original to 198 and now down to 137. Weight of the Disposall has been reduced from 75 pounds to 59 pounds and now to 50 pounds. Height of the Disposall has been reduced progressively from more than 26 inches to 20½ inches. At the same time, the useful capacity of the waste compartment was more than doubled, first from 85 cubic inches to 170 cubic inches, and now to 181 cubic inches (more than three quarts).

Garbage removal with the Disposall becomes a simple matter of scraping all food waste into the sink outlet. Last year installation of the Disposall in almost any sink was made easy by the addition of a unit with a 3½-inch entrance flange, which is now the universal standard size for sink outlets. There is also an entrance flange for the special, large 5-inch sink outlet.

Operation of the Disposall is controlled by a "Twistop Control" which fits into the sink drain opening. This has three positions, "ON", "SEAL", and "REMOVE". When the Disposall is operating, the Twistop Control automatically locks in place. A companion of this feature for simple and safe operation of the mechanism is the flow interlock which makes it possible to operate the Disposall only when an adequate stream of cold water is running into the machine.

In the new Disposall model, both the entrance flanges and control are made of the highest grade of bronze.

By the addition of new cutting surfaces, the grinding speed of the new model has been increased nearly 400 per cent so that only one and a half minutes a day is the estimated operating time for a family of four. Field tests indicate the operating cost at only 10 cents a month.

The secondary shredder and strainer of the new Disposall have also been improved and the pumping capacity, to force the shredded waste out into the plumbing drain line, has been considerably increased.

Elimination of parts has helped to reduce operating noise of the new unit, and a new design main bearing has been given a new resilient mounting to further reduce the noise.

For the convenience of the user, one of the greatest of the improvements is the permanent lubrication of the bearing, eliminating the periodic lubrications formerly required.

The FA-3 Disposall is equipped with a G-E ¼ horse power motor, completely enclosed within the unit to provide a more streamlined appearance. The list price of the unit is $99.50, F.O.B. Fort Wayne, Ind.

Service Men In Pacific To Hear Relatives On Short-Wave Program

A new program for men of the United States Army, Navy and Marine Corps in Alaska, Hawaii and the Pacific will be inaugurated Sunday, Sept. 7, by KGEI, General Electric's 50-kilowatt short-wave radio station in San Francisco. The program, to be known as the "Musical Mail Bag", will be broadcast each Sunday from 10:15 to 11:15 p. m., Pacific Standard Time.

Letters from service men at the Pacific bases will be acknowledged, musical numbers they have requested will be played, and a number of relatives and friends—wives, sweethearts, mothers and children of the soldiers and sailors—will be briefly interviewed and given an opportunity to say "hello" to their loved ones.

The programs will originate in KGEI's new studios at the Fairmont Hotel and will be broadcast on a frequency of 9670 kilocycles or 31.02 meters. They will be rebroadcast locally by Station KYA in San Francisco.

Relatives of service men will appear on the program as guests of the San Francisco Examiner which will schedule appearances and advise relatives by mail of the date they are scheduled to broadcast.

KGEI, a noncommercial station, is the only U. S. broadcasting station heard regularly in the Orient and throughout the year in Alaska.

$2,400,000 Expansion of Radio Manufacturing

Construction of a new $1,275,000 building for the assembly and testing of radio equipment for the Army and Navy has been started at Schenectady according to an announcement by Charles E. Wilson, president of the General Electric Company.

The building, to be equipped at an additional cost of $1,000,000, is part of a $2,400,000 project of the Defense Plant Corporation for expansion of radio manufacturing facilities at the General Electric plant there. The program includes purchase and renovation of the old Weber Electric Company plant. It will provide employment for approximately 2000 workers.

G-E Exhibit At Metal Show To Feature Electric Furnace Theatre

The General Electric exhibit at the Metal Show, Philadelphia, October 20-24, will feature a model theatre fashioned after a large electric furnace. Seating 50 people, the theatre will be used for "House of Magic" presentations and a series of technical discussions. Operating demonstrations of equipment will be presented at each of the five booths located outside the theatre.

In the Heating Booth, a gas carburizing furnace and the new box-type furnace with its accompanying drycolene-producing unit will be demonstrated. Visitors will see G-E's new thyratron control for motors in operation at the Control Booth, and also the standard line of G-E magnetic switches.

At the Motor Booth, the Tri-Clad motor will be featured, with operating demonstrations of Formex wire made at the Fort Wayne Works. The Welding Booth will be a giant model of a welding transformer, in which will be demonstrated several types of welders. The G-E X-Ray Corporation will exhibit equipment used in X-raying metals.

Among General Electric representatives expected to attend are C. I. MacGuffie, B. C. Tracey, C. L. Ipsen, and H. M. Webber.

Unexploded Nazi Bomb Becomes a Prize Possession

Prized among possessions of Mrs. Clark Minor, wife of the president of the International General Electric Company is an unexploded Nazi incendiary bomb which fell on Liverpool during a raid over that huge British seaport. The bomb, intact except for its deadly load of thermite was sent to Mrs. Minor by General Finlayson of the British High Command as a souvenir in appreciation of her services in British war aid campaigns.

The device is about 18 inches long and two and one half inches in diameter. The bomb itself is made of a magnesium alloy. Its hollow center is loaded with thermite. Ignition is achieved by a detonator located in the base of the bomb. This detonator fires the bomb when it strikes the earth or solid objects. The thermite is ignited and the magnesium alloy in turn starts burning, thus producing the intense heat which starts a fire.

The bombs are released from the plane in containers carrying 36 at a time. The container opens automatically and strews the small incendiaries over a wide area.

It was to extinguish such bombs that Leonard Gibney, Lynn River G-E man devised a unique method recently, now being studied by the U. S. Army and Navy.

WHEN YOU'RE HIT BY AN ACCIDENT YOUR WHOLE FAMILY FEELS the BLOW

Night Flying Insects Have Their Preference For The Bright Lights

Night flying insects, including mosquitos, don't like red light but prefer blue, such as emitted from mercury lamps and prefer bright lights to the soft amber tints such as come from orange yellow lamps, according to L. C. Porter, General Electric lighting expert.

Last summer an investigation was made at Nela Park, the company's lighting institute, to determine which of the standard lamps readily available would be the most satisfactory to use on unscreened porches, and in other places where people wished to spend the evening out-of-doors.

A string of 25-watt bare colored lamps was set up. White, daylight-blue, blue, green, yellow, flame-tint, amber-orange, natural amber, and red lamps were used, spaced 10 feet apart. Many evenings were spent watching the insects congregate around the various lamps and estimates of their relative numbers were recorded.

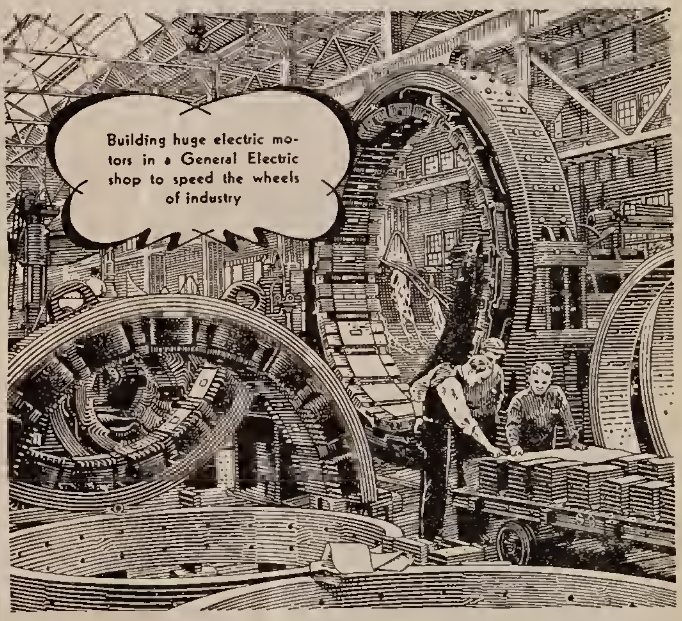
Later, the string of bare lamps was replaced by a pair of enclosing globe type insect traps operated by a time clock. By use of these traps, pairs of lamps could be compared and the actual catches of insects collected.

These tests were supplemented by a row of six similar traps set up at Nela Park and equipped with 100-watt colored lamps. A similar line of traps was set up at the Ohio Agricultural Experiment Station in Wooster. The work there was done under the direction of J. S. Houser, the station entomologist. Each night's catch of insects was removed from each trap and weighed. Not only were various colored lamps used but the positions of the different lamps were changed from night to night to eliminate any possible location advantage.

Late in the summer when the weather became cool and the catches reduced, actual counts were made of the numbers of insects trapped each night. Photographs were made of the various catches to give an approximate visual idea of the relative amounts trapped.

"It showed very definitely," according to Mr. Porter, "that the closer a light approaches the blue end of the spectrum and the higher its intrinsic brightness, the greater its attractiveness to insects; whereas the closer it approaches red the less its drawing power. Mercury lamps which combine blue color and brightness are particularly attractive to insects."

Red light is not a satisfactory color to live or work under, so Mr. Porter suggests a yellow light.



Building huge electric motors in a General Electric shop to speed the wheels of industry

A Preparedness Program Sixty Years Old

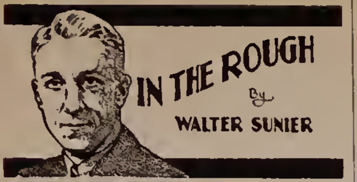
TODAY American industry turns its talents for mass production to the job of mass protection. It has been called on to produce, almost overnight, airplanes, tanks, guns—armament to defend the American way of life. And the accumulated experience which has given us our high peacetime living standard now becomes a chief asset of the nation's defense program.

American industry has been preparing for today's emergencies for more than 60 years. It has learned how to produce more automobiles, radios, bathtubs, electric refrigerators—more of almost every manufactured product than are produced in any other nation. As a result the people of this country have enjoyed a standard of living above that of any other.

General Electric scientists, engineers, and workmen have, for more than 60 years, been putting electricity to work to serve America's peacetime needs. They are now turning electricity to the job of defending the benefits it has helped to create.

G-E research and engineering have saved the public from ten to one hundred dollars for every dollar they have earned for General Electric

GENERAL ELECTRIC
952-50D



IN THE ROUGH

By WALTER SUNIER

Max Orr and M. P. J. Minter, both members of the Chicago office and former Fort Waynians, played at Brookwood last Sunday. In spite of the fact that it was very windy, both of these boys from the Windy City continued to play in the wind. After Max (who comes from the Windy City) putted on No. 11, his ball was on the edge of the cup. Although it was not one of those which you would call hanging on the lip, the wind finally blew it in. We do not get any connection between these boys being from the Windy City and the putt blowing into the hole but anyway it was a good thought to start with. Golf is like that too—a lot of things one starts never end up any place.

A week ago last Saturday, Leo Wallace toured Brookwood in 42 plus 38 equals 80 style. The fairways are beginning to get green again this week. Mr. Leo Wallace is not to be confused with Lew Wallace who wrote "Ben Hur" in which book you will remember the chariot races were prominent. Mr. Leo Wallace is of the Beaver Avenue Wallace's and we are sure he was not horsing around when he shot the 80 and we are sure also that he was not tearing from hole to hole in a chariot driven by a couple of fiery steeds.

Ife Holmes slugged out a 71 at Brookwood a week ago last Sunday. He had two eagles. On Labor Day, we saw him stare another eagle in the face at No. 16 at Brookwood. He had a beautiful second shot that was only about eight feet from the pin. The putt missed by only about three black hairs and a couple of red ones. Instead of saying, "Eagles for Holmes", we should run an ad for him saying, "Homes for eagles." We can't see much to getting a low score when you get a whole flock of eagles. Anyone can get a good score that way. After you get the eagles there is nothing to it.

Annual Golf Tourney To Be September 13

The annual G-E Club Blind Bogey Golf Tournament will be held at Brookwood on Saturday, September 13, it is announced by Carl Reynolds, who has been named chairman of the affair.

The tournament is open to all G-E employees. It is not necessary that the entrant be a member of the Club league. Mr. Reynolds stresses this point because of the feeling of some golfers that the tournament is only for those who have played in the league.

Since in blind bogey prizes are determined by a draw, everyone has an equal chance regardless of the score he shoots. Although no entry fee is necessary for the drawing of the prizes, those who do not hold Brookwood season tickets will, of course, have to pay the usual green fees.

G-E MAZDA LAMPS STAY BRIGHTER LONGER. Employees Store hours from 10 a. m. to 4 p. m.

Swinging The Hickory

By Paul Schwean, Bldg. 4-3

Old Sol is taking a major role in the three ring softball inter-department tourney on Taylor street these days—because of the ever shorter days the remainder of the softball games will be only five frames.

Pappa Huth and his West Side aggregation are making history in this second half. Thus far the Cowboys have met and defeated four teams with two to come. Should the Cowpunchers roll the last two opponents they will have undisputed title as the Inter-Department Champions.

During the first half of the tourney Huth tried various combinations until he found the team with which he is challenging the G-E Club ten. The former ball team acts as a unit and so enjoys the game that the stamina and zeal for the sport often gives them the edge —they have what is entitled sticktuitiveness and guts.

In the past two weeks two teams, the Winter Street Diamondmen and the Small Motor Office tried their hand to stem the tide. The final outcomes were 6 to 2 and 11 to 0 in favor of the Cowboys.

Bldg. 4, Small Motors, held the limelight in the games last Wednesday. The White Collar lads cleaned the Apprentices 13 to 5 while the Factory ten took Winter Street with a count of 8 to 1.

Both Bldg. 4 teams are fighting to maintain a high record in event the Cowboys should accidentally lose a battle. When at full strength either one of these teams would give the Huth men a run for second half honors.

The fielding in both encounters last Wednesday was rather haphazard as the Small Motormen scored their way to victory.

Here are the standings of last week:

Team	Won	Bye	Lost	Games to Play
West Side	4	0	0	2
Small Motor Office	3	0	1	2
Small Motor Factory	3	0	1	2
Sleepy Stators	0	1	2	3
Apprentices	0	1	2	3
Messengers	0	0	1	5
Winter Street	0	0	3	3

Major Bowling League Will Start Play Soon

Employees who wish to join the Major Bowling League which is being converted into an Inter-Department League this year are asked to register with Ray White, Bldg. 18-5 or Ed Yahne at the G-E Club as soon as possible. The League will start play at 9:00 p. m. on September 17 and will bowl at that time on Wednesday nights throughout the season.

In registering it is asked that the bowlers average be indicated. There are a limited number of openings for teams and individuals. The league is the only G-E Club league set up without a handicap.

SAFETY SUGGESTIONS ARE ALWAYS WELCOME
Let's have yours
IDEA

Championship Shoot To Be Held Sunday

The annual championship shoot of the G-E Rod and Gun Club will be held next Sunday, September 7 on the Club's range. The event this year will be larger than in previous years and will include pistol as well as rifle shooting. The rifle course will be on the 50 yard range and will consist of 20 shots prone, 5 shots kneeling and 5 shots standing. All shooting will be slow fire, however, each string of 10 shots must be fired within the time limit of 15 minutes.

Any small bore rifle may be used provided it has iron sights—telescope sights will be barred. The club's issue of military rifles will be available to any contestant not equipped with a rifle. The first prize, a medal, will be awarded by the N. R. A. The club will issue a second prize.

Pistol shooting will be held on the 25 yard range and will consist of the Camp Perry official course which is 10 shots slow fire, 10 shots timed and 10 shots rapid fire. Medals will be awarded for first and second place. The organization for the day will include H. Hyndman as rifle range officer and R. Soughn, as pistol range officer. E. Pion will act as secretary and A. F. Bowers as executive officer. The decision of the club officers will be final and a tie will call for a shoot-off. All contestants must be members of the G-E Rod and Gun Club to qualify for prizes although all G-E employees are welcome.

Bowlers Are Asked To Register Now

With the opening of the bowling season just a few days off, all employees who wish to join teams are asked to register with their league secretaries just as soon as possible. Registration may also be made with Ed Yahne, at the G-E Club.

A Fool-Proof Test For Crankshaft Cracks

Power presses, recognized as one of the most hazardous groups of industrial machines, are given careful periodic tests at the General Electric Company's Schenectady Works. A unique test is the magnetic test to which punch-press crankshafts are subjected.

The magnetic test consists of magnetizing the shaft, making the direction of the flux longitudinal so that it will intercept any possible cracks at right angles. While magnetized, the shaft is sprayed with kerosene which has in suspension finely divided particles of magnetic iron oxide. Any cracks or discontinuities in the metal will set up magnetic poles, which, while very slight, are strong enough to attract and hold the iron-oxide particles, thereby outlining a crack which may ordinarily be invisible to the naked eye.

This test is made each time a shaft is removed from a punch-press for any reason, as a punch-press crankshaft is subjected to tremendous strain in operation. One large company recently tested a group of 43 crankshafts, using this method, and found that 14 of them were cracked and required replacement.

G-E Worker Halves Time In Making Battleship Equipment

The time required for a vital step in building propulsion equipment for warships has been cut in half by the ingenuity of Waclaw Dasziewski, a 53-year-old Polish-born boring mill operator in the General Electric plant at Schenectady.

He devised a horseshoe-shaped metal yoke that permits one boring mill to do the work formerly required of two mills and a lathe in making bearing rings and self-aligning bearings for battleships. General Electric has given him a suggestion bonus which, with other money from his savings, he is investing in defense savings bonds.

"I want to do what I can to help America," he said. "I have an old father in Poland, a sister in Roumania. I have not heard from them for some time. I do not know what has happened to them. Here I have plenty to eat and good clothes to wear; I can sleep in peace; I can be happy playing with my grandchildren and hunting and fishing. I like that and am willing to do all I can to keep things that way."

The warship bearings previously were made on a vertical boring mill and the rings on a horizontal mill but the required smoothness could not be obtained on the latter and finishing on a lathe was necessary. Use of the yoke permits the vertical mill to be used also for tbe ring job and considerable machine and labor time is saved because the requisite smoothness can be obtained initially.

Four previous suggestions of Mr. Dasziewski for machinery improvements have been accepted by the company's suggestion committee.

Typical head of an average American family, he is but one of thousands employed by the General Electric Company on defense projects. He came to the United States as a boy of 18 in 1906 after two uncles who preceded him had written home about the land of opportunity. He worked as a rivet heater and boiler maker for several years and entered the employ of the General Electric Company in 1913. He became a citizen in 1914.

Now he operates a 50-inch boring mill in the turbine department. At an adjacent mill works his 25-year-old son who came to work for General Electric in 1937 as a chip sweeper. At Michigan State College is a second son, a junior in chemical engineering and an advanced student in the Reserve Officers' Training Corps. Upon graduation he will enter the United States Army as a commissioned officer. Of two daughters, the elder is married while the younger keeps house for her widowed father.

« «It's a Joke» »

RECEIVED 1941 LIBRARY FORT WAYNE CO.

At breakfast one morning the child pushed her cereal away, pettishly announcing that she did not want it and would not eat any of the breakfast.

"Well, darling, what would you like?"

A whimper: "I want a worm."

Daddy, running true to form, goes into the garden, brings in a fat one, and lays it on her plate. "There you are, my dear."

Indignant sobs: "But I want it cooked!"

It is sent into the kitchen, rolled in batter, cooked, and brought back.

Sobs again: "I want Daddy to have half!"

Daddy divides the worm, pulls himself together and manages to get his portion down.

This time sobs and howls: "But that was the part I wanted!"

* * *

"Where is the manager's office?" asked the paint salesman.

"Follow the passage," some one directed him, "until you come to the sign reading, 'No Admittance.' Go upstairs till you see the sign 'Keep Out.' Follow the corridor till you see the sign 'Silence,' then yell for him."

* * *

Jones was feeling queer, so he went to a doctor. The doctor, however, failed to diagnose the trouble.

"I'll tell you what to do," he said after a while. "Wrap a piece of paper round yourself and prick it in every place you feel a pain."

Jones did this, but when on the following day he came to look for the paper he found it missing.

"Have you seen a roll of paper anywhere?" he asked his wife.

"Why, yes," she replied. "I put it on the pianola and it played "The Last Round-Up'."

* * *

"I want to buy a toy train for my little boy."

"Next floor, please, sir. Men's Hobbies!"

A Traveler in a Pullman was in doubt about the tip he should give the Negro porter, so he said to him: "What's the average tip you get?"

"Two dollars, sah."

The traveler gave him $2, whereupon the Negro clapped his hands delightedly.

"What's the idea?" asked the traveler.

"Well, sah," said the Negro, "you is the first man dat ever came up to the average."

* * *

The foreman reported that the jury were unable to agree upon a verdict. The judge reproved them, saying that the case was a very clear one, and remanded them back to the jury room for further deliberation. "And if you do not reach an agreement before evening," the judge added, "I will have twelve suppers sent in to you."

"May it please Your Honor," spoke up the foreman, "you had better make it eleven suppers and one bundle of hay."

G-E Works Honored For Performance In Building Vital Defense Equipment

Under Secretary of the Navy, James V. Forrestall congratulates President Charles E. Wilson, president of the Company, in connection with the awarding of the U. S. Navy "E" pennant.

Erie Works of General Electric last week joined the ranks of the select . . . when it was awarded the U. S. Navy "E" pennant for being way ahead of schedule in the manufacture of vital naval ordnance equipment. It was the first General Electric plant to be awarded this highly coveted honor and was one of 11 other manufacturing plants chosen from the entire United States.

The pennant with the Bureau of Ordnance flag which accompanies it, was presented formally last week to Charles E. Wilson, president of the Company and John St. Lawrence, assistant manager of the Erie works at ceremonies held in the Navy department at Washington, D. C.

Plans for formal raising of the pennant with the ordnance flag are now in the making at Erie works and a gala time is planned. The plant is also entitled to paint a large block letter "E" on its stack at the power house . . . the same as the U. S. Navy practice in which crew winners of the award may inscribe an "E" on the ship's funnel or a gun turret.

Supercharger Production Is U. S. Accomplishment

Importance Of Aircraft Equipment To Be Built Here Emphasized By Chief Engineer Of Department

Mass production of turbosuperchargers for high altitude flying is exclusively an American engineering accomplishment according to R. G. Standerwick, chief engineer of General Electric's supercharger department at the River Works. Plans for a turbosupercharger plant at the Fort Wayne Works were announced some time ago. Speaking recently over General Electric's Science Forum program, Mr. Standerwick declared that superchargers are installed in American made planes used by the R. A. F. to bomb Germany.

"Planes delivered to England under the Lease-Lend Act are supercharger equipped, and thus Great Britain has the advantage of the high-altitude performance of the Boeing 'Flying Fortresses' and other American bombing and pursuit ships," he said. "German planes shot down over England have internal gear-driven impellers, but no turbosuperchargers."

Mr. Standerwick traced the history of the supercharger.

Quarter Century Wawasee Outing A Big Success

Present Year Establishes New Record For Increased Membership

Probably one of the most successful outings of the Quarter Century club, in the history of the organization was held last Saturday at Lake Wawasee. With ideal weather as an important factor the outing will remain a memorable one for many years to come.

Many interesting facts concerning the Club were presented by E. L. Simpson, president, at the meeting.

The first meeting was held on October 2, 1914 with 30 eligible employees present. Eight charter members are still on the membership roll. They are: F. S. Hunting, E. A. Barnes, A. L. Hadley, Wm.

(Continued on Page 10)

Elex Club Membership Campaign Under Way

Goal Of Two Thousand Members Is Set For The Coming Year

With a goal of 2,000 members the annual Elex Club membership drive is under way and will continue during the next week. All Fort Wayne Works women employees are invited to become members of the organization which is one of the largest of its kind in this community.

Enrollment in the club may be made through contact chairmen who are as follows:

Day Contact Girls

Louise Schwartz, Winter Street; Viola Moore, Bldg. 4-1; Margaret Koch, Bldg. 4-2; Marjorie Hargrave, Bldg. 4-3; Zella Sheehan, Bldg. 4-4; Maxine Dunaway, Bldg. 4-4; Blanche Allen, Bldg. 4-5; Georgia Garrett, Bldg. 4-6; Laura Haiflich, Bldg. 6-B; Louise Hawthorne, Bldg. 6-4; Lois Drewitt, Bldg. 12-3; Ruth Thomas, Bldg. 16-1; Veora Habig, Bldg. 17-1.

Roxy Alexander, Bldg. 17-2; June Martin. Bldg. 17-4; Dorothy Franke, Bldgs. 18-1 and B; Margaret Wal-

Quarter Century Club Holds Enjoyable Outing

(Pictures on Pages 4 and 5)

With a large number of members in attendance the Quarter Century Club held its annual outing at Lake Wawasee last Saturday. Above, Works Manager M. E. Lord addresses the group following the banquet. At the speakers table are, left to right—Joseph Stewart, mayor of Cincinnati, principal speaker; E. L. Simpson, club president; C. H. Matson, assistant manager and R. H. Chadwick, assistant to the manager.

The banquet held shortly after the noon hour climaxed a morning of enjoyable activities including boat rides, golf and other outdoor sports. As indicated by pictures on pages 4 and 5 one of the favorite sports was "just getting together and talking about the "good old days".

Advance And Be Recognized

General Electric's customers keep the business going. Without them there wouldn't be any employees or any stockholders. It has always been General Electric's policy to take good care of its customers whether they bought one lamp bulb or half a dozen big turbines. That is simply good business sense.

So, when a customer makes a reasonable request, the Company always makes every effort to grant it. Today, we have a pretty big customer on our hands. In fact he's the biggest customer we ever had. His name? You guessed it . . . Uncle Sam.

Well, way back in the beginning of this big struggle all of us are engaged in, he asked us to see that every employee working for us, had the right to be within the gates. That started the identification badge system. The customer asked for it. We said he could have it.

So, the wearing of your badge, every day, in plain sight is just good business sense. It's helping us keep our promise to our biggest customer.

• All Out For The Navy "E"

When a big gun crew of a ship of the line in the United States Navy develops such skill in handling its gun that it excels in hitting the target . . . that crew is awarded the Navy "E". The letter stands for excellence, which there is no higher standard in the United States Navy. The men of the gun crew can paint the letter "E" on their turret, they can wear it on the sleeves of their Navy Blue jumpers. It's a coveted prize in the Navy and it makes a gun crew so doggoned proud and sure of itself that it just isn't safe for an enemy ship to be within a thousand miles or more. And when a whole ship wins a Navy "E", well, there's no holding that ship and its crew. They're out to win *because they know they can win!*

And now Erie Works gets the Navy "E" for the job it is doing for the United States Navy on vital defense equipment. That puts Erie Works in the class with a crack Navy ship of the line. Its puts every employee of the Erie Works in the class with a winning Navy crew. It's just about the highest honor the Navy has to give

When the Navy "E" pennant streams forth from the main Erie flag pole this week, it should prove a challenge to every other Works of the Company to go and do likewise. Let every Works with a U. S. Navy job get on the band wagon and win the right to fly the Navy "E"!!!

"Show me an American and I'll show you a man who not only has courage, but who is honest, generous to a fault, has a sense of humor, has common sense; in short, he's a man. He may be a clerk or a capitalist, a student or a professor, a steel mill employee or the owner of a steel mill. He's first, last and always for America and the American way of living. Why? Because the years have shown us that we, in America, no matter what our station in life, are accustomed to comforts, advantages and opportunities beyond the comprehension of people in other lands."—Dan F. Griffin.

NEWS FROM THE CAMPS

We publish herewith with great pleasure extracts of letters sent to us by G-E employees now in government service. Address all communications for this column to the WORKS NEWS editor.

Dear Editor:

I am very glad to be getting the Works News every week. It really gives me a chance to keep up with what's going on in the plant.

Ralph Milligan who worked in the Punch Press Dept. of Bldg. 26-1, is in the Mule-Pack outfit, which is a tough outfit to be in. When he went in he weighed over 200 pounds, now he only weighs 187.

We have only about another month's training here, where we go to after that is quite unknown. I will write you and let you know my new address as soon as I get placed.

If you print this letter, I would like to take this chance to say Hello to all my friends that worked with me and hoping that they are all fine and healthy.

We are studying every thing there is to learn about an automobile and truck. I never knew there could be so much to learn about them. I always knew how they worked hut never knew the "why" part of it, especially the electric part of it.

Thanking you for sending the Works News every week.

Yours truly,
Pvt. Ervin Wedler,
33rd Battalion,
Battery C,
8th Tr. Regiment,
Fort Sill, Oklahoma.

Dear Editor:

I received the Works News last week, and appreciate it very much. If you will, please continue to send it. It helps a fellow to keep caught up with the latest goings on.

The band of which I am a member doesn't actually remain as such while on these maneuvers. We are attached to the Regimental Headquarters for various duties, such as guides, directing motor convoys, messengers, and the like. But during the time spent in base camps or rest camps we go back to our horns and become a band once more.

My job is being in charge of the music and musical supplies. I am also the drum major in the marching band. But I still continue to play trombone at rehearsals and concerts.

Today was a big day down here. It was payday, and boy, that means a lot in the Army.

Most everyone was broke this month, as is just about the case every month. So here we are now with money in our pockets and no place to go to spend it.

We are scheduled to be back in Mississippi around the latter part of September. Boy will we all be glad to see these cots and showers once again. Although a person can get pretty well used to the hard ground, and small and muddy streams, in which we do our washing and bathing. Some fun.

Thanking you again for the News.

Sgt. William H. Kronk,
Band, 152nd Inf.,
A. P. O. 38th Division,
Camp Shelby, Miss.

Activities of the Club which include regular parties during the year will be planned at the annual conference to be held on October 18 and 19. All members may participate in suggestions for the Club program.

Election Of Officers

The annual election of officers will be held on September 24, 25 and 26. Preceding the election a Campaign Party will be held at which the various candidates will present their platforms. The installation banquet, at which the newly elected officers will officially assume their duties will be held on October 6.

With the definite probability that the Club membership will be larger this year than for some years past, a program of considerable magnitude is planned

Forty To Receive Educational Loan Funds Benefits

Employees And Sons Are Eligible For Aid In Pursuing Studies

Forty employees or sons of employees of the Company will receive aid this year under terms of two educational loan fund plans and the Charles P. Steinmetz Memorial Scholarship fund to continue their education in various schools and colleges of the country. The loans were granted under the Gerard Swope Loan Fund for Union College and the G-E Employees Education Plan.

The two Steinmetz Scholarships were granted to Edward L. Bates, Jr., son of Edward L. Bates of Pittsfield Works, and Albert Joseph Taggi, son of Anthony Taggi of the Elmira Foundry.

New loans were granted under the G-E Employees Education Plan to the following: William S. Tuttle, son of F. B. Tuttle, Schenectady Works, for Iowa State College; Bernard A. Williams, employee of Pittsfield Works, for University of Michigan; William A. Rundle, Jr., General office employee, Schenectady, for Miami University; William St. John, son of Ernest St. John, Pittsfield Works, for R. P. I.; Charles W. Shell, son of Howard T. Shell, General Office, Schenectady, for Potsdam State Teachers College; William E. Cooper, son of William H. Cooper, Erie Works, for Stevens Institute; Alexander E. Edwards, Pittsfield Works employee, for Iowa State College; Emil J. Kremzier, son of Emil Kremzier, Schenectady Works, for R. P. I.; Harold Roth, son of Joseph Roth, Erie Works, for University of Pittsburgh; Anthony J. Aloi, Schenectady Works employee, son of Vincent Aloi also an employee, for R. P. I.; George T. Biittner, son of George L. Biittner, General Office, Schenectady, for University of Notre Dame; Francis Breen, G-E Supply Corporation, employee of Bridgeport, for Miami University; Charles E. Breizy, Pittsfield Works employee, for Ohio State; Wesley Stuart Burt, son of Charles T. Burt, West Lynn Works, for Northwestern University; William R. Carraway, son of Jomes E. Carraway, Schenectady Works, for Georgetown University; John A. Sketchley, son of Frederick R. Sketchley, Lynn River Works, for Tufts College; Warren N. Kernander, Lynn River Works employee, for Tufts College; and Edward N. Sherry, Schenectady Works employee, son of John J. Sherry also an employee, for Syracuse University.

Two new loans from the Gerard Swope Loan Fund for Union College were granted as follows: Henry W. Hochuli, an employee of the Bloomfield Works and William H. Oldendorf, son of William L. Oldendorf, Schenectady Works.

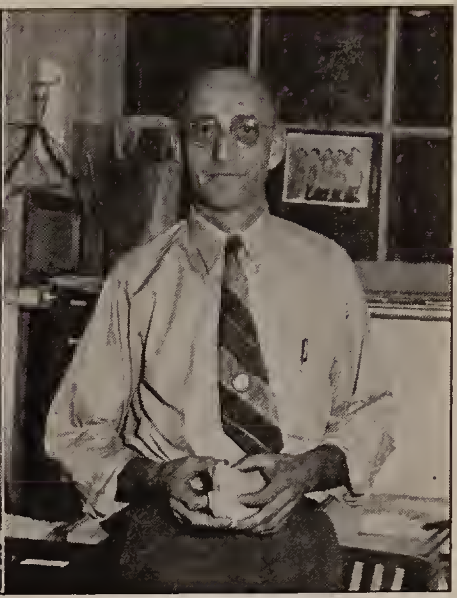
Eleven renewal loans were also granted under this plan to the following, all of Schenectady: Harold H. Britten, G. Earle Berton, Clarence R. Droms, Barclay B. Fishburn, Clarence W. Hart, Richard H. Marvin, George H. Shell, Marvin D. Smith, Walter F. Swart, Walter F. Thiessen, Henry W. Weisheit, Jr.

Seven renewal loans were also granted under the G-E Employees Education Plan to the following: Loring R. Frazier, Pittsfield; Robert O. Fulton, West Lynn; James R. Hargraves, Schenectady; Robert E. Ingmire, Schenectady; Arthur D. McGovern, Schenectady; Charles W. Wilson, Pittsfield, Robert E. Zoellner, Schenectady.

Appointed Motor-Generator Division Foremen

R. J. Barnes

G. E. Leonard



G. A. March

Three men assumed positions as foremen in the Motor-Generator Department this week, it is announced by R. M. Hartigan, superintendent of the Division. The appointees are G. E. Leonard who becomes foreman of armature coils; R. J. Barnes, foreman, second shift on machining commutators and cores and G. A. March, foreman third shift.

Mr. Leonard is an employee since 1922 when he started work in the stock department. During 1923 and 1924 he served in various capacities in the Fr. H.P. Motor and Maintenance departments. Since that time, with the exception of a short period he has been engaged in the Motor-Generator Division. He was promoted to supervisor in the division in October 1940 and continued in this capacity up to the time of his present appointment.

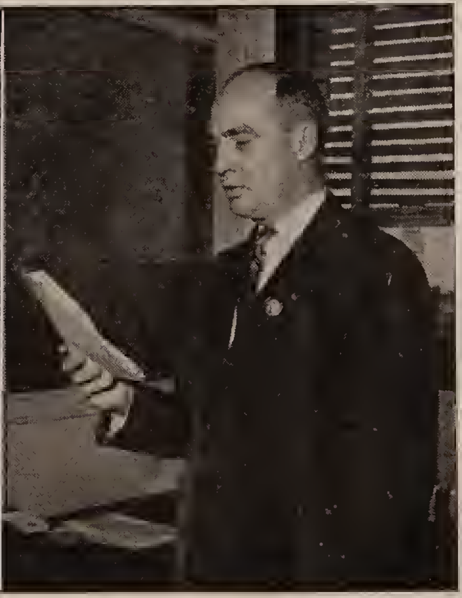
Mr. Barnes is a graduate of the Apprentice School, completing the machinist-toolmaker course in 1937. He took special courses in time and method study and was assigned to this work in the Motor-Generator Division. He continued in this work until his present appointment to a foremanship.

Mr. March began his service in 1917 in armature work in Bldg. 8-2. In 1926 he accepted a position under Foreman N. G. Prince and has continued in the department ever since that time.

Three Are Named Production And Stock Supervisors

J. J. Welch

F. L. Gale



Alvin Konow

Three appointments to new duties in the ranks of supervisors were announced this week. R. M. Hartigan, superintendent of the Motor-Generator Division announces the appointment of Alvin Konow as supervisor of production and stock; and at the same time the appointment of J. J. Welch to succeed Mr. Konow as supervisor of production and stock in the General Purpose Fr. H.P. Division is announced by W. N. Wehrs, superintendent of that division.

The third appointment, announced by G. W. Auer, superintendent of Bldgs. 4-2 and 4-3, is that of F. L. Gale as supervisor of production and stock.

Mr. Konow, a member of the Quarter Century Club, was first employed as a messenger in 1916. He became head of the messenger and service department in 1922 and continued in that capacity until 1929. In that year he was assigned to the staff of the assistant manager serving as supervisor of manufacturing expense in that office. In December 1938 Mr. Konow was named supervisor of production and stock in the General Purpose Fr. H.P. Motor Division.

Mr. Gale joined the General Electric organization in 1927 and en-

(Continued on Page 10)

G-E To Feature "Production Clinic"

The General Electric exhibit at the 1941 Metal Mining Convention and Exposition, San Francisco, Sept. 29 through Oct. 2, will be called "The General Electric Production Clinic," and will display some of the equipment that General Electric has available for speeding production in metal mines.

The exhibit will feature operating demonstrations of the General Electric Tri-Clad motor, hook-on volt-ammeter, and air circuit breaker, and is planned so that visitors may participate in the demonstrations.

C. A. Binns, of the G-E San Francisco Office, will be in charge.

NOTICE

Employees are asked to park their cars in the various Works parking lots. To avoid congestion and eliminate safety hazards overtime parking on streets in the vicinity of the Works is being checked.

GEORGE DOEHLA,
Fire & Patrol Chief.

»» NEWS THROUGH THE PLANTS ««

I hai been sitting here for fifteen minutes, and a Scotsman hates even tae spend time like that. But I'm doing it tae illustrate tae meself something that doesn't need illustrating—the fact that it's hard tae get started doing anything. It's hard tae get started writing this column. It's hard tae get started thinking. It's hard tae get started tae clean out that basement or garage. It's hard tae get started on a dozen jobs ye ken ought tae be done—that ye don't mind doing after ye get started.

And Cousin Colin, looking at his model T, merely says, "It's hard tae get started."

One o' the greatest inventions for Model T's and contemporary Bone-Bruisers was the electric starter. Now, if Kettering, or Gray and Davis, or whoever "thunk" it up could only figure out a way tae apply self-starters tae human beings!

Hoot Mon! If they could, I'd put one on and set it tae "Double Award Suggestion", and get busy.

Weel, as I started tae say, it's hard for me tae get started on this column—but—one thing that helps, yes, practically acts as a "self starter" is that Old Man Deadline, or time limit. If I hadn't resolved tae write something every week, I'd never get started. And knowing that it must be in at a certain time MAKES me get started.

How's that for a tip to ye for your "Brain Work"? I mean that suggestion or cost-reduction idea. Set yourself a time limit. Make up your mind ye'll hae a good idea a week from next Tuesday, or so. Make up your mind ye've just GOT tae have one by then—and ye WILL. I'll bet on it. (Yes, even a Scotsman would bet on odds like that.)

Weel, speaking o' starting things, my Cousin Colin said, "Mon, I hate tae think o' starting me furnace this fall!"

"Who doesn't"? I replied.

"Weel, I hai a oxtra special reason. My wife and I agreed not tae argue, and whenever one o' us felt a quarrel coming on, he'd step outside."

"And what does that hai tae do wi yer furnace?" I asked.

"Weel, I hate tae heat the house for just one o' us at a time."

Winter Street News

Winter Street deeply regrets the passing of one of their very promising young men, namely, Max Goddard, aged 24.

Death was caused from injuries received in a collision Sunday evening. Max, a graduate of the G-E Apprentice School last January, was until the time of his death, a tool-maker at the Winter Street plant. Besides his various activities around the Y. M. C. A., Max was also active in G-E Club activities.

It is with a feeling of irreparable loss that we record the passing of Max Goddard. The attribute of loyalty to his friends, employers, and co-workers was equaled only by his indomitable will to master any problem presented.

Marie Page, Bldg. 19-5, returned to work after visiting the Smoky Mountains.

Schlemmer, Orville Tracey, Herbert Wise, Frank Offner, Alice Norris, Milton Dennison, Lillie Benz.

Left Hospital: Geo. Telly, Harry Bush, Jean Meyer, Bernard Walden, Patricia Timme.

Harry Karr, Bldg. 26-2, Indiana's best accordion player, spent the week at Lake Gage playing 1,000 of the latest song hits—all to the tune of Yankee Doodle and "Hold That Tiger". He doesn't know the music or the words but he says he has got rhythm.

Carrie Green, Bldg. 26-2, is reported to go in for the new and novel. It is told that after Carrie had disposed of all the hot dogs she could hold she tried to roast the cat at Edythe Dibert's house.

Louis Sordelet, Bldg. 26-2, has a chest like Joe Louis these days. He sure is a proud grandpa.

We are glad to have Loretta Bloom back with us in Bldg. 26-2, after her recent illness.

What was that we saw on the floor in the Bldg. 12-B office the other day? Surely it wasn't Edna Martin? It seems that Edna and her chair just couldn't get together and the chair won. Nice going, Edna.

Sleuthing In 4-6

Evelyn Blotkamp has been transferred from Bldg. 4-3, and is now one of us. We are more than glad to have you with us, Evelyn. . . . Have you noticed the sparkle in Geraldine Grim's eyes? It is a reflection from that lovely new diamond ring she is wearing. Congratulations and best wishes, Geraldine. . . . Wedding bells rang at St. John's Lutheran Church last Saturday at 6:00 P.M. for Alberta Gollmer, Bldg. 4-6, and William John Cripe, Bldg. 26. After a week's honeymoon, they will be at home in their new house on the Bluffton Road. . . . It really pays for Alice Nichens to have a birthday. In addition to a number of nice gifts, she received a beautiful wrist watch from her husband. You're doing all right, Alice. . . . Anyone in need of a good cook and general housekeeper? If so, apply to Walter Whonsetler. He has had experience in that line, and can give good references. His wife went on a week-end trip through Southern Indiana, and left Walter in charge. And, from all reports, he really did a good job of it. Any member of his family will tell you that he really can cook—and how. . . . The annual family picnic of the Order Serice and Drafting Dept. will be held September 13th at Charlie Yager's home near Cedarville. There will be games and things till 5:30, when a "Potluck Supper" will be served. After dark, there will be home movies. Anyone who has ever attended one of these picnics will tell you that a good time is in store for you. So get out your play togs, folks, and sharpen up your appetites. We'll see you at Charlie's. . . . Doleen Geary, Bldg. 4-2, one of our former co-workers in Bldg. 4-6, is leaving us on September 19th to go to Arizona. A number of her friends honored her with a farewell party last Wednesday night. They presented her with a lovely gift, along with their good wishes for a successful trip.

Stranger: "What will you take for that fine Jersey cow of yours?"

Farmer: "That depends on who ye be. Be ye the tax collector or has she been killed by the railroad?"

Borings From 4-4 Office

Now if I can get down to business and stop all my blowing. You know now is the ideal Hay Fever days, Well, anyway, 'tis a good excuse for not having an article in last week's WORKS NEWS. . . . Delores Lovall recently visited her army favorite just a little bit South of North Carolina and found paradise. She came back with a beautiful diamond—third finger, left hand. Good luck to the both of you. . . .Ask Art Wedler for the sure cure for hay fever. He told Marge Brown and this is what she told me, "The Guillotine." If one should ask me that was always the cure for athlete's foot. . . . Earl Greenlee has recently become one of our great big happy family and is working with Bob Spitler in the Planning Department. Speaking of Bob Spitler, he got his ears set out. About time Bob. This is no age for the braids. . . . Jack Dunifon, star messenger of Bldg. 4-6, has finally gotten the official title for carrying bags from the hands of Denton Faye Manecke to the hands of the fairer sex of Bldg. 4-4 (or vice versa). . . . Did you hear that Doris Roe and Marge Boerger are going to become an Aunt or an Uncle. They don't know which as yet, but it won't be long. . . . Charlene Snyder was seen kneeling at the feet of some of the inspectors the other day. However, she was filing blue prints. Guess I fooled you too. . . . Cliff Bowman has more fun in the drafting dept. He opens the windows without giving fair warning and everyone is now working on papers that they got from the general blow in the office. More fun. I'm thinking dire thoughts of Cliff now. . . . Pauline Young had a very pleasant surprise last Friday. I went to see one of my best girls in Sidney, Ohio last week-end. I went down on the train but missed it coming back, so had to resort to the bus. My best girl still likes me though. . . . Well, when hay fever days are over, all can expect the impossible out of me. Right now I'm not in the mood. I remain, sincerely as ever,

Elmer, the field mouse
The Rat to you.

Quarter Century Club Outing

(Pictures on Pages 3 and 4)

1. Vern Castle, Ed Bandt and A. B. Cook stage a reunion. 2. Needless to say Dr. Garton beat Ed Witte in barnyard golf—that's what we hear. 3. Good food and plenty of it made the banquet a big success. 4. Leo Nyboer, Bill Straub, Works Manager M. E. Lord and E. L. Simpson enjoy the sunshine. 5. Mayor James Stewart, principal speaker, E. L. Simpson, club president, and J. W. Crise, club treasurer. 6. Wm. G. Miller and Sam E. Houser. 7. Mayor Stewart delivering his address. Facing camera are Works Manager M. E. Lord and E. L. Simpson.

8. Part of the gang from Decatur—Ray Leitz, Bill Heim, Charlie Langston, Frank Braun, Bert Gage and Bill Kohls. 9. Phooey, what a golf score—left to right: Charlie Johnson, Wm. Wehrs, Bill Bowman, Leo Wallace, Ray Hoffman and C. L. Moffatt. 10. Charlie Becker, oldest employee in point of service with a record of 48 years, and Joe Schwartzkopf who retired in 1932 after 40 years of service.

11. R. H. Chadwick, assistant to the manager, Charlie Richard, Fred Owen and former Works Manager W. S. Goll. 12. Ready for a trip around the lake. 13. The oldest and youngest member in attendance, Pete Kindt, and Herbert E. Franke. 14. Christ Kaiser and Wm. Schultz—they remember "way back when." 15. A busy man, George Waldschmidt, club secretary. 16. No they didn't use the slide, although Walter Blomberg and Carl Rietdorf did rest a bit. 17. Women members with Mr. Crise and Mayor Stewart. Standing—Clare Voirol, Martha Scherzinger, Mr. Crise and Mayor Stewart, Irene Fox, Flora Gilmore and Alma Witte. Seated—Frieda Kaiser, Clara Krudop, Catherine Wise, Alfreda Gessler, Lulu Heine, Alma Kaiser and Bessie Chpman. 18. On the way to the dining hall.

From The
Feminine Viewpoint

By Irene Perry and Hilda Barthold

And now with vacations practically over and the fall work stacking up, it is again time to think of our fall activities. Of course, every G-E girl should head her list with the word ELEX. It is an honor and privilege to belong to such an organization. There is no other such club in our country with as large a membership. That is based on the 1500 members we had during the past year, but this year we are expecting to go over the 2000 mark and why shouldn't we with all the new girls working here.

It seems that all the new girls have heard about ELEX before they ever come here to work—but just in case some of you didn't—it is an organization for G-E girls and girls who have worked here at some time or other but have now left. The dues are $1.00 per year which is from October 1st to September 30th. There is a social meeting of all members once each month and sometimes an extra one thrown in. These meetings are usually held in the form of a supper immediately following work and rounded out with about an hour's entertainment. We can't tell you what the program for the next year is until after conference which will be Octoher 18 and 19.

The contact girls and all officers meet somewhere for a week-end and discuss what they want to do for the coming year. This conference is open to any girls who care to attend. The contact girls would love to have your suggestions on what you would like in the form of entertainment for the coming year.

The membership drive will last for another week, but of course that doesn't mean you can't join at any time during the year. You cannot attend any of the meetings unless you are an Elex member though. We know you have all been reading quite a bit about the drive the company is making to save material and time. This is an important part of our Defense Work. You too might help by having your dollar ready when your contact girl stops to see you rather than make her come back again for it. The company is good enough to give the girls time off to see you so why don't you help the company that is giving you a weekly pay check.

The annual election will be held Sept. 24, 25 and 26 and no girl will be eligible to vote who hasn't paid her full dollar. There is a complete list of contact girls elsewhere in this paper, so why not see her if she hasn't seen you and give her your membership?

ELEX is what YOU make it, not what the officers and board members make it. If you are willing to take an active part in YOUR club, ELEX will welcome you with open arms and make this a never-to-be-forgotten year in your life.

Blanch Conkel, Bldg. 19-5, says she rode around in a buggy in Atlantic City on the board walk. Blanch says, "some fun".

Alice Laisure, Bldg. 26-2, wanted her picture taken at the lake. Unfortunately she fell in and all the picture shows is a pair of feet breaking the surface.

NEWS THROUGH THE PLANTS

Motor Generator Static

Forgetful Don

Upon reading last week's WORKS NEWS, associates noticed a complete omission of "Motor Generator Static." Due inquiry revealed that "Poison Pen" sometimes called "Honest Don" Shultz, author of the majority of the column absentmindedly forgot the Labor Day vacation and thinking to meet the Tuesday noon deadline very carefully turned in his articles on Wednesday noon. Careless, says we.

How Some Spent It

While many went to lakes, golf courses, or stayed at home, a few of the more venturesome went on extensive trips over the Labor Day week end. Ray Moore went fishing in the wilds of Michigan. Nice sunburn, no fish. Herb Foreman and T. Leichty took trips to the "Smokies". Mary Alice Herber toured Fort Wayne in a Ford convertible and wore her "baby bonnet". Larry Larenitis ventured as far as Van Wert and got lost in the big city. (For his information the peony festival is in the spring.) Herb Mertens and "Pappy" Archbold visited Ford's Greenfield Village. ("Pappy" reports all that machinery reminds him of his "Tinker Toys".)

Just Fooling

When Bill Hoelle, Bldg. 19-1 appeared at work with a box of cigars and a big smile, announcing the arrival of a baby girl, the boys were almost as pleased as he appeared to be for Bill has doted on baby girls for a long time. However, the truth soon came out. Bill was passing cigars for Louise Henderson who became Louise Schueler over the week-end.

While the boys wish Louise all joy and happiness they are disappointed in Bill—he was "just foolin'."

Almost

Autograph collectors in our local plant almost added two names famous in movies and radio to their collection last week. Early one morning some of the hired help lounging in front of the Works observed an old car of the Maxwell variety rumbling along down Broadway. Driving this conveyance was a grinning colored lad and draped in the rear seat was a plump, smiling young man who appeared very satisfied and at peace with the world. As this car dealer's nightmare crept near, rumors of "Rochester" and "Benny" spread through the crowd and a throng gathered to pay homage to their Sunday Evening favorites. However, when the car drew to a stop in front of the gate, some noted the smiling man was not "Benny" but John Rogers, the smile was not a smile but a look of terror frozen on his face (due to riding in this fugitive from a junk yard), and the colored lad, not "Rochester" but a helper at a local garage where John had taken his car for a new paint job.

Well they almost had something anyway.

"A SUPER DUPER APPETITE"
or
"HE CAN'T EAT A THING"
A short play of two acts.
Starring Mike Dole

Supporting cast includes John Rogers, one waitress and plenty of food.

Act One—Saturday noon

Dole and Rogers are driving down town

John: "Well let's go eat."

Mike: "My stomach is upset, I don't believe I can eat much of anything."

John: "That's too bad, but you can watch me".

Mike: "It's terrible."

Curtain falls

Scene 1, Act Two—Later

Dole and Rogers seated in a local restaurant. Waitress approaches.

Waitress: "Well, what do youse lugs want?"

John: "I'll have a barbecue sandwich, malted and pie."

Mike: "My stomach is in an awful shape, bring me a barbecue and a malted."

We see Rogers calmly eating—Dole has finished his sandwich and malted—Dole beckons to waitress.

Waitress: "Yeah?"

Mike: "My stomach won't stand much, but bring me a T-bone steak, French fried potatoes, salad, side, of beans, coffee and rolls—it's awful when you can't eat."

Scene 3

Rogers is just finishing his food, Dole has finished eating entire order and two paper napkins besides.

Waitress approaches and gazing at Dole in awe and admiration—gasps—"We have berry, cherry, apple, raisin and custard pie."

Mike: "I wish I could eat a square meal, bring me some apricot."

The girl's chin, Dole's stomach and the curtain fall at the same time.

It is rumored now that some of the fair sex in Bldg. 19-3, have been bribing our literary genius, "Honest Don" Schultz with candy in order to keep their names out of the NEWS. Cecil Goeglein, the mistaken identity gal, seems to have started this new racket with an offering from a large box of chocolates. No doubt a piece of candy now and then is a welcome addition to Don's tomato juice and sandwich diet, however, candy will not gain the donor immunity from appearing in this column.

News From The Buzzards

"Dugan" Duncan almost had a hair cut. He fell asleep in the barber chair, and the barber gave him a shave. Dugan was cussing somebody and saying "It's a shame". The barber thought he said shave.

"Gene" Raysinger has at last confessed. He has been trying to raise a mustache for 3 months. If you stand real close you can count them one by one. Total—17.

"Chic" Waltmath drove 817½ miles for a "Chicken in the Rough" in one day. It's cheaper to buy a chicken on the market for $1.50 instead of paying out $15.00 for gas.

Helen Hoelle who drove to New York, said it was a special trip to see Mayor LaGuardia—he has such a cute shape.

Virginia Mollett who specializes in catching catfish took along some catnip and caught, what do you think? A dog fish.

Bob Stout's wedding approaches apace—Occasionally Bob will answer "Yes, Dear", "No, Dear", or he will say "I do". Now remember Bob, two can live just as cheap as one but only half as long.

The new car fever has hit Bill Fuller, he was looking at a 1930 so & so the other day. And he remarked "Boy these new cars certainly look good." The salesman said what year is your car? Bill said, "1939".

"Dub" Weaver who thinks he knows how to bowl is practicing holding big fish bowls in his hands. He says the secret of a big score in bowling is to get lots of pins.

Retires On Pension

David Gehring

David Gehring, an employee for the past twenty-eight years has retired on pension. Mr. Gehring has been a milling machine operator during his entire period of service, working for a number of years in Bldg. 19-4 and later in Bldg. 17-3. His many friends wish him many years of health and happiness.

Every Dog Has Its Day

A few weeks ago an article titled, "He loves animals" appeared in "Motor Generator Static" and was closely followed by a caustic reply designed to create doubt as to the authenticity of the article and discredit its author. However, reports reaching us indicate "Pappy" Archbold was seen riding down Broadway recently in the rear seat of the Bartholomew car seated beside "Rumpus", Ann's dog. Ann reports, "Rumpus"' has been scratching something awful since that day. Yep, every dog has his day.

Saying of the Week

Jerry Frye remarks, "Teamwork makes a good corkscrew to open up a 'bottle neck' ".

Bldg. 4-4

We wonder if it could be that Katherine Weigele, Bldg. 17-2, was so interested in her fishing that she fished for four hours before she noticed her sun glasses were minus one lense. . . . We sure would like to see the big mosquitoes down around Huntington. They must be big ones according to Wilbur Poehler. After struggling all night with the mosquitoes, he was peacably asleep when his driver came after him to go to work. . . . Leona Scheuman has us all wondering why she went to Kentucky on her vacation . . . We wonder if Lulu Kline was trying to help the watchman, or was she just waiting for some one to bring her badge from Huntington. . . . Maxine Dunaway must have forgotten how to use her new skates. She has several black and blue places on her body. . . . We wonder why Helen Wilson is so happy these days? Could it be due to her new name "Smiles".

A farmer was losing his temper trying to drive two mules into a field, when the parson came by.

"You are just the man I want to see," said the farmer. "Tell me, how did Noah get these into the ark?"

Sunbeams From 17-4

Well, well, hello and salutations, everyone is back from their vacations and looking right smart, too, that is almost everyone. Roxy Drewitt must have done a powerful lot of walking on her vacation; she came to work sans her hose and then took off her shoes. Well, needless to say the shoes came up missing. poor little tootsies they looked so cold too, but the shoes came back postage collect.

Bonny Shoner says the college girls has nothing on her. She is wearing a pin too, only it isn't a Frat pin, it is a beautiful U. S. army pin, but it could mean a lot.

Dorothy Wilhelm is wearing a lovely coat of tan which she got while visiting the boy friend in camp.

Croak, croak, what is that we see in that frog pond—well of all things if it isn't Helen Miller—come on out Helen, we know you.

Fred Geisler of Bldg. 19-3 has hung out a shingle, it has something to do with chickens—the feathered kind we mean.

Thought for the week: Don't go around sticking your cbin out, someone might mistake it for a punching bag.

Granny.

The gang from Bldg. 4-1 want to extend their best wishes to George Hahn and wife for a long and happy married life.

Frank Lawrence, Bldg. 4-1, said the next time he goes fly casting with Cleon Oyer he is going to wear a steel helmet. His fly reel either flies apart or the fly comes sailing at you. Never a dull moment.

Just a little advice to Mary Felber, Bldg. 4-5 and Jean Sanders, Bldg. 4-5, in playing bridge. When you have three aces in your hand, bid "no trump." Signed—The Louse.

Margaret Niblick, Bldg. 4-3, has a bigger smile this week, and for a very different reason. Look on her third finger, left hand. Congratulations, Margaret.

Marcel Gaut, Bldg. 4-3, returned to work after spending the past week in Northern Michigan fishing. He didn't do the usual bragging about the big fish he caught. From all reports, all he returned home with was one of those 1880 "Soup Strainers." When asked about his changed appearance, Marcel said that just before leaving, he attended an Indian medicine show. The Indian, he said, was selling hair grower for $1.50 per bottle, and as usual, passed it through the crowd for them to smell the wonderful odor. Now it seems as though Marcel got it too close to his upper lip. He is warning the men and most of all, the women, to be very careful if they attend the show.

Notice to all Golfers. Anyone playing on the same course as Hildabelle Warren, Bldg. 4-3, beware! Be sure to mark your ball with a red stripe very plainly. If Hildabelle happens to find anyone's ball lying around, she hits it, only to find out later that it isn't hers.

Lois Knepper, Mary Long, Mary Mechling, Mildred Furthmiller and Alice Pelky, Bldg. 4-3, became tired of waiting to go to Niagara Falls on a honeymoon, so they made the trip over Labor Day. From all reports, a grand time was had by all. Even the shortage of gas in the east did not stop them.

Nibbens From 19-4

Helen Egger, Bldg. 19-4, went on a motor trip over Labor Day. She went through Kentucky, Tennessee and Georgia.

Mary Greer received a beautiful bunch of roses for her birthday last month. The sender we hear, is from Camp Shelby, Mississippi.

We hear Charlotte Frankart, Bldg. 19-4, is planning to middle aisle come November. We'll all be there to dance at your wedding, Charlotte.

What's the interest in the night shift that makes Lydia Parrish stay on. We need you back on days to laugh at Louise Sinn's jokes, Ha!

Ruth Peck has eye appeal.

Congratulations to Anne Gligor, Bldg. 26-3, who will be married September 27. Wish you happiness Anne.

The new name Jean Grant has for leghorn chickens is "leg bugle." Anyway she knew it sounded the same.

We wish to congratulate Dave Gehring, Bldg. 19-4, for his many years of service. Dave retired on pension last week.

Thisa And Thata 19-5

Girls. We have an Elex contact girl in our own group—none other than our friend Mildred Werling. Give her all the cooperation you can. . . . A group of the girls went out for chicken dinner and on their way were to pick up Dorothy Dunifon. Now it seems that the person who was to pick her up always has a difficult time locating the right house, so Dorothy said she would stand out in front so she wouldn't be missed. Yes, you guessed it. They drove right by and didn't see little Dorothy standing on the curb. . . . We're glad to see Lillie Benz back at work again. . . . Arnold Johnson didn't get enough rest on his vacation. He overslept and was one hour late.

Something happened to Clara Zemper, Bldg. 4-3, that the readers of the WORKS NEWS should know about, but she asked us not to print it, so we will oblige by leaving her name out this week.

Nellie Williams, Bldg. 4-3, traveled 500 miles north into Canada on a fishing trip and then after all that distance, to make it seem like the real thing, had to buy canned salmon. Her 1941 version of the story, "The One That Got Away", would really put any amateur fisherman to shame.

Marjorie Hargrave, Bldg. 4-3, seems to think the best way to plant a peach tree is to carry a peach around with you, then slip and fall on the hand holding the peach, thus burying seed and all in the ground —anyway two feet. Of course, you may break an arm or a leg in the process, but think of the name you would make for yourself if it works.

It is surprising what lengthy subjects are discussed at noon in the Small Lot Section, Bldg. 4-3. Now Ludella Droege and a few others will be able to tell you where their brain is—an anatomy book settled the question for them.

Georgia Elam, Bldg. 19-5, has returned to work after spending her vacation at Atlantic City and Washington, D. C.

"Who was that man you just raised your hat to?"

"That? Ah, that was my barber. He sold me a bottle of hair restorer a month ago, and whenever I meet him I let him see what a fraud he is."

News Around

19-4 Spot Jottings

Margaret Teboe went to a movie the other evening, and instructed her young son to meet her after the show. He met her alright but with his bycycle instead of the family auto. So Maggie had to ride home on the handle bars. . . . During the second shift lunch period Wanda "Daisy Mae" Sarazin wished she had one of those handy little gadgets that makes drinking out of a bottle so much easier. So the next evening one of her kind friends gave her one and she liked it so well that she took it home. . . . A new discovery has been made in chewing tobacco. Small pieces of rubber bands were mixed in Otis'. He thinks it not only tastes better but it makes the chew last longer.

Art Knoll, Bldg. 19-5, after three years' constant use, has discovered that his Parker Eversharp has an eraser and a supply of lead. Art says: "I hope my kids don't hear of this or they'll think I didn't appreciate the Christmas gift."

Bill Wickliffe sure did his Boy Scout deed Thursday when he went clear to Bldg. 19-5, to get Anna Ruth Clement's identification badge, which she left in her office. There she was waiting at the gate 'till Bill so kindly brought it to her. Better think twice before you go home the next time, Anna Ruth, there might not be another Bill around.

There will be a great many people disappointed around here when they call for Blue Prints. Our Josephine will no longer answer the telephone as she is accepting a position in Bldg. 4-2.

Carl Conrad is reported to have his house completed—right down to the night lock on the coal bin.

Ruth Theurer, Bldg. 19-5, and Blanch Conkel, Bldg. 19-5, returned from their vacation, spent at Atlantic City and Washington, D. C.

The Wire and Insulation Dept. girls, 16 strong, assembled at Mary Coggeshall's house last Tuesday evening and surprised Irene Perry with a bridal shower. The guest of honor received many useful items for her new home. We all had a grand time and after that delicious luncheon, we know where to go when we're hungry.

The girls in Group 13x59, Bldg. 4-3, seem to have their favorite pastimes: Pearl French eating ice cream and "Oh how"; Glyda Yoder playing golf; Erma Linder bowling; Freda Bunnell "jitterbugging"; Beulah Wooley fishing, and Ruth McCuaig buying new hats.

Irene Roberts, Bldg. 4-3, really gave her fish dinner last Wednesday. At least those lucky ones who ate lunch near her received a fish from the trailer load she brought back from Michigan. Thanks Irene!

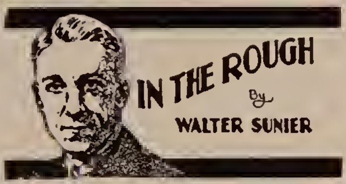
Fern Truelove, Bldg. 4-3, came back to work with a thrilling account of her vacation, and all the wonderful things she saw on her trip. She really did get around too. It took approximately one day, starting at Swan, Indiana. Some of the points of interest: Churubusco, Arcola, Waynedale, New Haven, Leo, and then back to Laotto. It sure must be wonderful to travel so extensively!

After this Byrl Miller, Bldg. 4-3, won't always expect to find nuts in a can marked "Mixed Nuts". Well you know the old saying Byrl, "Curiosity killed a cat". Perhaps Phil Tilford and George App could explain the contents of the can.

FOR SALE OR TRADE—One good slightly used over and under shotgun. Will sacrifice for a tube of B.B.s. For full information call H. Federspiel, Bldg. 19-3.

G-E Club Studebaker Corp. Golf Match

Upper Left: G-E Club golf team. Upper Right: Relaxing after the struggle. Lower Left: Pete Lamboley, tired out from three putting six greens. Lower Right: At the first tee, Brice Hamilton driving.



In sight of the famous golden dome of Notre Dame and in the shadow of the stadium, the golfers of the Studebaker Corporation took the golfers of the G-E Club for a ride on the University of Notre Dame course at South Bend last Sunday. True to the spirit of the great Knute Rockne, they carried on to victory even through the tough matches where the going was rough. They never kicked; they never bucked; nor they never carried the ball but their open field running without interference put them across the victory line. They could not be passed. The final score was—Studebaker, 55½; G-E, 34½.

G-E did better in the lower bracket than in the upper. Their main loss was in the scores above 90. G-E had eleven scores above 90, while Studebaker had only five. In the lowest group, each team had four men who shot in the 70's. Hamilton had a 78 and Motter, Gitter and Bob Link each had 79.

Several new men turned in very creditable scores. Von Wearley shot an 82 and so did Bill Morris. Gouty had an 83, Ottenweiler picked up two and a half points with an 89.

Most of the G-E men had trouble in putting and many strokes were lost on the greens. Although the greens were beautiful and well kept, they were large and rolling. The common lament was, "I three-putted _?%$& greens".

Don't forget the annual blind bogey tournament at Brookwood, tomorrow, Saturday, September 13th.

Mr. and Mrs. Elmer Gault, Bldg. 4-3, have returned to work after a two weeks' trip through Yellowstone Park.

G-E Club Golf Tournament Will Run All Day Saturday

Carl Reynolds, who is in charge of the annual blind bogey golf tournament, states the annual event will be in progress all day Saturday, September 13, so that anyone can start at any time. There will be some one present during the entire day to take care of the entries. He states, also, that there will be no entry fee.

Mr. Reynolds also announces that the cash blind bogey which proved very popular the last two years will be held again. It will be operated on the same basis as before. Anyone playing in the blind bogey can enter the cash bogey. In the past practically everyone has entered the cash bogey. Payment of four prizes has been made on the basis of 40%, 30%, 20% and 10% of the amount collected.

Everyone has an equal chance for prizes regardless of the score shot except for two prizes. One of these is awarded for the best score and one for the highest score.

Department Bowling League Candidates

It is announced that a number of vacancies still exist in the Inter-Department Bowling league. Candidates for teams in the league are asked to contact Ray White, Bldg. 18-5 or Ed Yahne at the G-E Club.

Elex Bowlers To Meet On Monday

A special meeting of all girls planning on bowling in the Elex Monday and Friday night leagues will be held next Monday, September 15 at 7:30 o'clock. Bowling will not be started that evening but it is important that everyone planning to join the league be there.

SCIENCE FORUM – by L. A. Hawkins

Q. What foods contain the greatest amount of iodine?

A. As a general rule, sea foods contain the greatest amount of iodine, among the common foods.

Q. Why is rock salt added to ice that surrounds containers of ice cream?

A. The salt is added to lower the temperature of the ice cream by speeding up the melting of the ice, with the result that heat is absorbed more rapidly and at the same time the temperature is reduced, since the liquid is brine with a melting point of 8 degrees Fahrenheit.

Q. Of what use are the hairs in a person's nose?

A. They act as a filter to keep dust out of the lungs.

Q. Is there any material that will not transmit heat?

A. Strictly speaking, there is no material which will not transmit heat. Even a vacuum will transmit radiant heat, and any solid, liquid or gas will conduct heat.

Q. Is it true that the earth is being continuously bombarded by cosmic rays? If so, could rays possibly have any effect on the length of human life?

A. Yes, the earth is being constantly bombarded by cosmic rays, but there is no evidence to indicate that they have any effect upon the length of human life. Cosmic rays are very penetrating and probably would not be absorbed by the body.

Q. What are sun spots?

A. Sun spots are gigantic tornadoes on the surface of the sun.

Q. How hot is the sun?

A. Its temperature at the apparent surface is about 6000 degrees Centigrade, and this temperature undoubtedly increases rapidly as the center is approached.

Q. Are transformers the most efficient kind of electric apparatus? How efficient are they?

A. Strictly speaking, transformers are not the most efficient pieces of electric equipment. The most efficient electric apparatus is the heating unit; because, in it, 100 per cent of the electric energy used is converted into heat. Transformers come a close second, however; because they change electric energy at one voltage into electric energy at another voltage, with very little loss in the process. Most transformers used in power work have efficiencies of better than 98 per cent; that is, they lose less than 2 per cent of the electric energy in changing its voltage. Some special transformers have an efficiency of better than 99½ per cent.

NOTICE Rod-Gun Club Members

Due to rain the championship pistol and rifle shoot of the G-E Rod and Gun Club has been postponed until next Sunday morning, September 14.

A. F. BOWERS,
President.

ATTENTION Night Shifts!

Anyone wishing to bowl in the Owl-League, report at the G-E Alleys, Monday, Sept. 15, at 1:00 p. m.

LEO ELWARD,
Secretary.

National Emergency Creates Era Of Great Industrial Progress

INDUSTRIAL PROGRESS is usually most rapid in times of emergency and when the emergency is such that many people are involved, their combined efforts can result in tremendous strides in development and manufacture of new or improved products. It is the well known story "Necessity is the Mother of Invention" because necessity or demand inspires us to greater effort and makes us more alert to discover new things and take advantage of every opportunity for improvement.

Today we find ourselves in such a period of emergency—a National or rather International emergency—World War. Today, more than ever before in history, this means industrial emergency, because, as we have seen, the most highly mechanized forces have the best chance to win—and those forces must be our U. S. Army and Navy. Thus necessity demands that industry find ways of vastly expanding its productive capacity and at the same time, somehow make our raw material resources meet defense needs plus a large part of normal requirements. As is often true at the start, the problem appears difficult and discouraging but we are confident our combined efforts can find the solution.

Conservation of material and productive capacity is a tremendously important part of the job and each of us can help toward making every pound of material count, and do more than we expected of it previously. In developing or improving a product design, engineers search for ways to reduce quantities of materials required, or to use more common materials. Under present circumstances, the necessity for material conservation stimulates greater effort and is causing more rapid progress in this direction. However, the possibilities for further progress are unlimited, and anyone, regardless of position, may contribute valuable ideas on material saving through design changes.

Quality of Workmanship is one of the most fertile fields of endeavor for conservation of our resources—and this applies all the way through the process of developing and manufacturing a product. A better job done at any stage, starting with the design, through the planning, scheduling, purchase of materials, handling of materials and finally the fabrication, will reduce losses in material and labor. Obviously some losses must occur and we cannot attain 100 per cent utilization of material in fabrication but we can all find spots where, with some extra thought or care, "leaks" can be plugged" so that a greater number of useful products may be made available from a given amount of material.

The benefits resulting from our efforts now will be permanent and will not cease with the present emergency. In future years, we will look back on this period as an era of great industrial progress during which we learned, through necessity, more about the art of "making more goods for more people at less cost." If we all strive continually to further this cause, we will have the satisfaction of knowing we have added something to the total progress we know will be made.

F. T. Grothouse, *Engineer*,
AC&CR Dept., Winter St.

Help Train Those New Employees

Throughout the Transformer Dept. we have found many enthusiastic boosters for "ALL OUT FOR DEFENSE." Some of the employees feel that we should make better use of this paper and go on record with their ideas and thoughts about the part each one of us can play in conserving materials and reducing Spoilage.

WE ARE ALL PROUD of the quality we build into the General Electric products we work on. Our share of National Defense work has been very large, and has taught us to appreciate the value of anything that will help to better acquaint new employees with their duties or increase the skill of workers already on the job. We have been faced with the huge task of starting hundreds of new people along with building new jobs and increasing production in a volume unheard of before in the history of our department. During all of this, many employees have been prepared for advancement and changes.

This would certainly be a good time for us all to take stock of ourselves for a minute and be sure we have been tolerant and friendly in helping others. Have we done all we can to help everyone "Understand Their Job Well?" The importance of conserving materials, and reducing waste and spoilage cannot be over-emphasized, and it can be accomplished only through the patience and tolerance of all of us in teaching and learning all we can about our work.

Let's take advantage of every opportunity to ask and answer questions about our jobs. Do your part and help others to conserve materials, reduce waste and spoilage, and improve the quality of General Electric's products.

A. E. Duhamel, *Supvr.*,
Waste and Spoilage,
Transformer Dept.

THEY FIND THE ANSWER

START

GENERAL PURPOSE Fr.H.P. MOTORS

FINISH

Walter Starke is checking a sample casting in the Receiving Department, Bldg. 6-B. The results of his checks are used to approve patterns for production.

George Morton is checking a completed motor for outline dimensions in Bldg. 4-5. Quality is paramount. All drawing dimensions and tolerances must be maintained.

Entire Organization Must Be Quality Minded, All Must Have One Ideal "Quality Workmanship"

When the production of goods was operated on the individualistic basis, when the craftsman worked as an individual, alone or with the aid of a helper or apprentice, the standard of quality as far as the finished products were concerned was scrupulously maintained, because it meant a good reputation and new and repeated business for him and his helper. But, with the development of the simple tool into a variety of complex pieces of power driven machinery, specialized for mass production of parts of commodities, this little workshop has grown into an enormous factory in which thousands of men and women are organized into elaborate labor systems.

The change and growth in methods of producing interchangeable articles by repetitive processes and operations to obtain the finished product has developed the need for methods and systems to control and maintain the high standard of quality known to the craftsman. This is done by educating and training the entire manufacturing personnel (operators, foremen, planners and engineers) to know the workmanship, equipment, processes and design, needed to maintain the high standard of quality. To measure standards of quality we have raw material, process, and final inspection, defective charts and also control limits. From this data, which is available hourly, daily and weekly, operators can know the quality of his or her work; foremen can determine where to improve his quality, planners can develop equipment and processes, the engineer can better the design and make changes in materials.

By aid of the above tools and everybody (operators, foremen, planners and engineers) doing his or her duty, we will be able to maintain the high quality standard of the old craftsman—keep the G-E Monogram a symbol of quality and satisfy all of our customers.

Public Enemy No. 1

Ross E. Coon, Head Inspector, Bldg. 74, River Works, says our public enemy No. 1 is "RE." "We REdrill, REmachine, REtest, REassemble, REpaint, REinspect, and finally REschedule, all because the job was not done right the first time."

Why not make it complete and add, "We REdesign, REdraw, REorder, REpair, REmill, or REstock all because someone failed to do his part?"

– DON'T FORGET THAT SUGGESTION –

It's Priceless If You Can't Get It

Carry The Ball

In this hour of National Emergency the increase in the production of defense apparatus makes the furnishing of contributed parts a problem of ever mounting importance.

The parts that we make today are of such contrasting design and diversified material that our first step in eliminating waste and spoilage is to provide efficient planning in all its phases.

The foreman is faced with increased responsibility which challenges his ingenuity. He must be alert at all times to the normal problem which is greatly magnified because of the unusual products being manufactured. He must see that the proper tools are used, that the material is not faulty, operators are instructed properly and sequence of operations are correct. On his shoulders rests the burden of policing the reduction of waste and spoilage.

With most of the reason for errors removed by proper planning and instructions, it behooves each operator to "CARRY THE BALL" as his part of the game. Parts contributed are usually of such design and produced in such a manner that no salvage operation can be performed. A part blanked and formed incorrectly can seldom be reformed. Blanked punchings improperly located on a die cannot have a missing corner replaced. Parts machined for defense products are not passable with tolerances' permitted on commercial parts.

With the best of planning, material, supervision and workmanship we are still subject to human errors. Operators should not take things for granted but frequently have the parts checked by the inspector. Drawings and material changes should not be overlooked. MAKE FEWER ERRORS TODAY. Since the operator is the manufacturer of the parts, he is in the key position to suggest better ways and means. THINK OF A BETTER WAY FOR DOUBLE AWARDS PAY.

The employees of the Contributing Department have accepted the challenge and will produce good work with a minimum loss of material.

W. H. **Franke**, *Supt.*,
Bldgs. 17-1 and 6-B.
2-1 and 4-B.

Important!

The most important thing necessary for the accomplishment of a high standard of quality is the education of the entire manufacturing personnel to the standards desired. It is easy to obtain precision machines and tools and accurate gauges, but it is very difficult to develop in the minds of a group of men the same and one thought relative to a high standard of workmanship.

Transformer Division Will Maintain Quality

LET'S GET INTERESTED

By **Marjorie Telley**
1st Shift, Bldg. 26-3

Marjorie Telley

WHY ISN'T EVERYONE INTERESTED in so vital a subject as conserving materials for defense?

Out of fifteen testers in my department, some of them told me they had not read the "All Out for Defense" sheet that is now a part of the Works News. WHAT IS WRONG? Is it because we have never had to conserve material before, or possibly because we don't realize the gravity of our waste and spoilage situation?

Why aren't we interested enough to hand in suggestions? Some of the people I have talked to said they didn't want to hand in anything that wouldn't deserve an award. Some seem to feel that perhaps awards were given for suggestions that aren't worthy. Two or three new girls said they never gave suggestions a thought. I believe some of us get to thinking our transformer models are conceived by experts and how could we expect to improve upon them.

We are not all experts, but we can certainly all read the News and try our best to think of some suggestions to save time and materials.

WE MUST LOOK AHEAD

By **Louise Metker**
1st Shift, Bldg. 26-3

Louise Metker

If we are conscientious in the work we are doing and in the conserving of material, we will make sure we are performing each operation correctly.

If we come to a point where we are in doubt, we will stop the operation until we have consulted our instructor — as to the proper way of completing the operation.

It is true we may lose time in getting the proper instruction, but the lost-time would be doubled or tripled, if we were to go ahead in doubt and make a mistake. Then, we would have to tear down and rebuild the article, and in many cases replace the material that cannot be re-used.

If we would think of material in terms of money, we would be more conservative. If we were to drop a nickle, a dime, or even a penny, we would surely stop to pick it up. Whenever we drop a piece of material, let us say—there goes a nickle, and pick it up. We would be surprised at the number of nickles (material) we would save in a day's time.

Looking ahead we should think of the finished product in which we have had a part. We may only wind or finish a coil, yet every step is an important one. If each operator does his or her part correctly, we will have a perfect product for shipment.

In looking ahead, I like to think of the story of a great philosopher who was walking down the street and saw three men breaking stone. He was curious to know just what each one was thinking as he was doing his job. He asked one of the men, "What are you doing there?" "Breaking stone," the man replied. And to the second, the same question. His answer was, "Working for two dollars a day." "And you," the philosopher asked the third. The man looked up and smiled and said, "I am helping build a beautiful cathedral." All three men were doing the same operation, yet the third man was the conscientious worker looking ahead to the completed structure.

So it is with our jobs, we all like to look ahead and be proud of the small but important part we have in producing a General Electric product. If we do our job correctly, we are "Maintaining *Quality*," "Eliminating Spoilage," and last but not least, we are CONSERVING MATERIAL.

WOW! LOOK! LOOK!

Per Cent Increase from July.		87	130	182	174

We look at the above tabulation with pride as it shows that every department has had an increase in the number of suggestions turned in during each week of the month of August. Since Double Awards will be paid on Suggestions covering the reduction of Spoilage and the Conservation of Material during the month of September let us try to improve this record by submitting many more suggestions.

Ways And Means Must Be Found To Conserve Those Small Items Of Material That Are So Hard To Procure

By **Leona Menze**

I took a walk around Bldg. 19-5 the other day and learned that a lead is a piece of stranded, rubber and cotton covered wire that is one of the essentials in BA field coils. Just where it "leads," I'm not sure, but I was convinced that without it, you might have a problem or two on your hands. Sort of a "mighty oaks from little acorns grow" idea, I guess.

When such material is plentiful, you probably wouldn't give a snap of your fingers for a whole spool; but with every manufacturer in the country now wanting it, a strange importance has attached itself to that little lead.

When the Specialty FHP Motor Department faced a shortage of this material several weeks ago, the girls in the winding group had to conserve every foot of lead material they could—or else start reading the Want Ads. So rejected leads, which were formerly scrapped, are now returned to the operators and used on small lot jobs, provided they have not gone through the 16-hour bake treatment. The material saved has been enough to supply leads for all the Bldg. 19-5 small lot jobs, which amount to 10 per cent of the load of the whole section. Martha Scherzinger, foreman of the BA field winding section of this department, explained this to me, with many a demonstration of the "befores and after's" of field winding.

The labor in reconditioning the leads was formerly thought to overshadow the material savings, but the present need for materials has reversed the case. The point is, it seems to me, that 3 or 4 cents worth of lead material does not offer much concern for worry—except when the lack of it makes a $10 stator worthless.

Be Alert!

It isn't the obvious defects that are found every day that makes you a good inspector, but the rare and hidden defects which you detect that adds to your prestige and value to your department.

"Nuff Said"

The control of quality in a manufactured product can only be accomplished by coordination of design, provision of adequate and proper equipment and tools, development of an interested manufacturing personnel and proper control to keep elements of the products within the limits of the standards set.

Promote Good Will

By **R. F. Robinson**
Contract Service Dept.

Why does a customer buy our product? Because he has faith in G-E quality which gives reliable and satisfactory performance. Picture customer's disappointment when he receives a defective article, especially if shipment has been long delayed and the article is required for an urgent job. Thanks to G-E prestige our customer still has faith that we will not let him down but will correct the defect with repair or replacement with all possible speed.

There are many ways to extend service to our customers. One of the important services that helps to promote good will is prompt correction of defective material. We all know what it means to receive immediate correction of a product that fails to give satisfactory performance. Quality first, but if a motor slips by and gets out in a defective condition, our next concern is prompt correction. Let's all make it a point to improve this kind of service to our customers.

G-E PRODUCTS MUST LEAD THE FIELD

Elex Club Names Candidates For Annual Election

Candidates for the various offices of the Elex Club have been announced by the board of directors. The candidates, the offices for which they were nominated are as follows: Top row, left to right—Helen Bleeke, Winter Street and Eileen Foor, Bldg. 17-4, president; Pat Chapin, Bldg. 26-2 and Evelyn Smith, Bldg. 18-B, vice-president. Second row—Margaret Suelzer, Bldg. 20-2 and Dorothy Mueller, Bldg. 4-6, secretary; Marge Ponsot, Bldg. 17-2 and Charlotte Stanford, Bldg. 4-3, directors.

Third row—Dorothea Swank, Bldg. 26-3, and Dorothea Dissinger, Bldg. 26-5, directors; Belle Buchan, Bldg. 17-4 and Arletta Coe, Bldg. 26-2, trustees. Bottom left—Ceal Romary, Bldg. 26-2, trustee and bottom right, Catherine O'Connor, Bldg. 4-6, trustees.

Maneuvering With The 38th Division

In Which Elmer J. Zelt, Bldg. 26-2, Describes A Reunion With The Gang From The Fort Wayne Works On The Texas-Louisiana Front

By E. J. ZELT

After visiting parts of the South with the intention of finally spending a week end with our son, and seeing our friends of the Fort Wayne Works who are with the above division, we finally arrived at Reeves, La.

The division (from latest word received) was maneuvering approximately somewhere one mile north of Reeves. Leaving a nice grey ribbon we landed on a very dusty army road. Amid army men, dust and trucks we proceeded to find the 38th Div. After inquiring, we were led on a secret hair pin loop road which brought us to the back of Hdq. Div. Here we were informed that the 38th Div. moved so rapidly and were now in hiding somewhere 42 miles north of this place. Leaving here and going through more dust and hitting a lot of shell holes, we picked up a buddy, who was thumbing his way towards De Ridder, and who knew where the 38th Div. was in hiding. After leaving this Buddy at De Ridder, he advised us to go north approximately 15 miles towards the town of Cooper and again make inquiries. Arriving at Cooper and approximately 2 or 3 miles out we finally caught up with a sign marked 38th Div.

Here we were advised to take another dusty road and travel about three-quarters of a mile westward. All honked out and camouflaged looking like the army itself we finally hit an open spot where a group of soldiers were lined up to receive candy, pop and those ever welcome letters from home and friends. Out of this clearance through a familiar whistle we contacted our son. What a thrill! After the exchange of greetings he led us into the backwoods where the army was really in hiding. Stumbling over sticks and stones we finally landed in the arms of Lieut. "Pop" Knoll, who became very excited, grabbed us by the hand, and finally landed us in the camp of Major "Foster" Houck. Here with Lieut. Walt Pohler, Lieut. Don. Thompson, Lieut. Bloom, a buddy or two, a chaplain, and a cook named Fuzzy Miller, we chatted for approximately 2 hours. They wanted to know all about the boys back home, how and what the G-E was doing and many other things of interest. After chatting for about an hour this man Fuzzy the Cook were given orders to bring us sandwiches and water. Then Major Houck and Lieut. Pohler took us to another hide out where we were introduced to higher ranking officers of the army. At this point we fell in line with other officers and had so trained our vocabulary that we were now saying "Sir" this and "Sir" that. Having thus acquired the first step in army life we are taken in their confidence and learn some of the army secrets; such as: Major Houck saves every sheet of the Fort Wayne Works News, and sleeps on an air cushionor pad; Lieut. Pohler buys postal cards (ten for a cent) and mails them to anyone who will write him a letter (they are beauties, boys; write him and get one); Lieut. Thompson graciously issues passes to any buddy who is visited by either a relative or friend; Lieut. Knoll gives a month's pay for just a little draft from the D. C. See—(he is always hot); Lieut. Bloom will give his shirt for small motor (fan) mail now (a deep secret). This group of men has advanced so far they are now leading the enemy. After this the boys kissed us all goodbye (because we were now buddies in dust with them) and wished that many of their friends would pay them a visit. They request all their friends to write often, send cookies, cigarettes and stamps. With all respects these boys are doing their part and are asking, are we at home doing ours. Let us stay behind them, encourage them, let us get dusty and not rusty, let us show them we too are doing our part here at home to help them on to victory and remembering it is our game as well as it is their game.

Quarter Century

(Continued from Page 1)

Schultz, Wm. "Pete" Kindt, Steuart Rehrer, Herman Rehm and Wm. Raidy.

The present membership of the Club totals 568 with thirty-four women members.

Record Year

The present year will set a record for new members with 188 employees becoming eligible during 1941 for membership.

Thirteen members have passed away since the outing held last year. They are: Charles Trautman, Paul Grimme, Walter DeHaven, Charles Braun, Wm. E. Soest, Detrich Muehlenbruck, P. C. Morganthaler, John C. McNulty, Max E. Brand, Oscar F. Schmidt, Adolph F. Strube, Wm. Martin and Karl F. Stahl.

The youngest member present at the outing was Herbert Franke, thirty-nine years old. Mr. Franke held the record over Edgar F. Waldschmidt by a matter of less than one month. The oldest member present was Wm. "Pete" Kindt who is rounding out his eighty-third year. The oldest member present, in point of service, was Charles E. Becker.

The activities of the day in addition to outdoor sports included the annual banquet at Sargents Hotel. President Simpson presided at the banquet and introduced the various speakers who included Works Manager M. E. Lord and Joseph Stewart, mayor of the city of Cincinnati.

Ayer's To Promote Sale Of Electric Blankets

N. W. Ayer and Son Inc., New York, has been selected as the agency which will undertake the first advertising and promotional campaign on the General Electric automatic electric blanket, it has been announced

Many Sign For Defense Bonds

More than 2,400 employees have signed new Income Accumulation Orders. The new Income Accumulation Plan, which became effective on June 2, 1941, enables employees to have the interest on their G-E Employees 4% bonds and their general profit sharing accumulated for the purchase of United States Defense Savings Bonds.

When the accumulated amounts equal $18.75 or multiples thereof on June 1 and December 1, United States Defense Savings Bonds, Series E, will be purchased for and delivered to the employees.

Employees who desire to acquire United States Defense Savings Bonds in this way may do so by signing an Income Accumulation Order, which may be obtained from Department heads, foremen, or the payroll department, or from J. W. Lewis, Treasurer, Schenectady, N. Y., and deliver it to any of the foregoing.

Supervisors Appointed

(Continued from Page 3)

rolled in the Apprentice School. He graduated in 1931 as an electrical tester and shortly after was assigned to production activities in the General Purpose Fr. H.P. Motor Division. In 1937 he was named production supervisor in Bldg. 17-1, and continued in this capacity until July of this year when he was made assistant to the production supervisor of the General Purpose Division.

Mr. Welch graduated from Purdue University in 1922 and joined the General Electric organization in 1934 as a member of the scheduling section of the Production Department in Bldg. 4-6. In 1935 and 1936 he served in production work in Bldgs. 4-6 and 4-1, and in 1937 was placed in charge of the newly formed production section in Bldg. 17-2. After various other assignments in production work, he was made section leader in charge of stock data section in the Order Service Department, Bldg. 4-6. In 1940 he was transferred to Bldg. 4-3 as supervisor of production and in 1941 to supervisor of production in Bldgs. 4-3 and 4-2.

Booklet Tells About G-E Plastics Dept.

The plastics department of the General Electric Company, Pittsfield, Mass., has prepared a 64-page illustrated booklet telling how Textolite plastics are made—covering each step from raw materials to the finished product—and indicating the variety of applications for which different types of Textolite are suited.

The booklet may be classed as an introductory encyclopedia on plastics manufacturing, since it covers the whole range of operations of the G-E plastics department which, it points out, "is a self-contained unit and is the only plastics manufacturer in the country engaged in every phase of the business."

In eight sections the booklet covers raw materials, development, designing and engineering, mold making, molding, laminating and fabricated parts, industrial design, and commercial policy. Two other sections prepare in chart form the properties of Textolite molded and Textolite laminating.

Supercharger Program

(Continued from Page 1)

"Dr. Sanford A. Moss of General Electric is recognized throughout the world as the 'father' of the turbosupercharger," he pointed out. "In collaboration with the National Advisory Committee for Aeronautics and the engineers and pilots of the United States Army Air Corps, he has developed it from its original primitive state to the highly efficient device it is now."

"In the 35 years prior to Dr. Moss's retirement three years ago he was awarded 40 patents on mechanical devices, including the centrifugal compressor, the exhaust-driven supercharger, and the gear-driven supercharger," continued Mr. Standerwick.

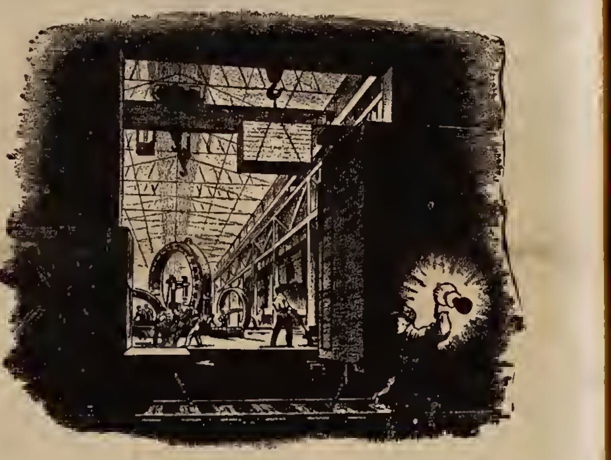
"When the European war broke out Dr. Moss was called out of retirement and is at present acting as consulting engineer in supercharger manufacture for General Electric."

The turbosupercharger is used to overcome the effect on an airplane engine at high altitudes, according to Mr. Standerwick. The density of air decreases very rapidly as one ascends, and this affects the performance of airplane engines, just as it affects human beings. For instance, the average person will lose consciousness at 18,000 feet unless artificially supplied with oxygen and at that same altitude an aircraft engine will lose more than half of its power, and the speed of the plane will drop sharply. The turbosupercharger offsets this and persuades the engine that it is flying at sea level.

The operation of the turbosupercharger is easily explained. The waste gases coming from the exhaust manifold of most internal combustion engines are allowed to pass to the outside air without doing any work, and this, in the case of a large engine, represents a considerable amount of power—as high as 350 horsepower.

On a turbosupercharger engine, these red-hot gases are directed by nozzles against "buckets", or vanes, arranged around a wheel, and the wheel is thereby made to revolve. On the other end of the shaft is an impeller, or centrifugal compressor, which compresses the rarefied air of the upper atmosphere and thus delivers a good, rich "shot" of air to be mixed with the gasoline vapor. The engine is thus enabled to "breathe" normally at any altitude and maintain its rated horsepower.

The red-hot gases are around 1500 degrees. This scorching heat, combined with the terrific speed of the supercharger rotor, is the problem whose solution has made possible the use of superchargers, according to Mr. Standerwick.



Out of the Night

IN LOS ANGELES it is ten o'clock; in Detroit, one; in Schenectady it is two o'clock in the morning.

In Los Angeles a young riveter moves a little faster down the row of rivets that stitches a gleaming airfoil. In Detroit, a helmeted welder concentrates on the harsh arc that knits two pieces of steel plate. In Schenectady a veteran machinist watches a little more intently the lathe tool that pares a precise 1/1000 of an inch from a 20-inch steel shaft.

Listen! You will hear them: staccato beat of rivet guns . . . crackle of welding torches . . . harsh whisper of turning lathes. The sounds of America working!

Look! You will see them: factory windows ablaze at night . . . long freights rolling by in the twilight . . . somewhere in Newfoundland six bombers, motors idling, poised eastward on a runway in the gray dawn. The signs of America producing!

Many men, many places, three shifts. But *one* job—to make America secure.

Different machines, making different things—bombers in Los Angeles, tanks in Detroit, generators in Schenectady. But behind them all *one* universal force: electric power—turning lathes, joining metals, providing a changeless, universal light.

For more than 60 years electricity has been the power that makes all work kin. In itself one of the major industries that have contributed so much to American life—contributing now in its own right to national defense—electricity is today vital to all the others as they labor "all-out" in America's defense. DEFENSE

Volume 24 FORT WAYNE, INDIANA, FRIDAY, SEPTEMBER 19, 1941 Number 83

113 Employees Profit By Suggestions

First To Fly "Producing For Defense" Banner

To the Fort Wayne Works goes the honor of being the first of the Company Works to fly the banner "Producing For Defense". It is planned to fly this insignia of honor at all G.E. Works where defense work is in progress. Shown hoisting the banner under the Stars and Stripes are left to right: E. M. Hanauer, Doral Feasel and Wm. E. Piercy.

Political Rally For Elex Candidates Is Arranged

An old fashioned political rally will be held by the Elex Club on Tuesday evening, September 23 when the various candidates for Elex Club offices will be presented and outline their platforms. It is rumored that cigars will be free for the asking and that the candidates will do anything "within the law" to gain votes. Banners are in the making at the present time and with Pete Dannecker's orchestra on hand it is anticipated that some of the candidates will attempt a stampede.

The meeting which will open at 8:00 o'clock is free to all Elex members and will be featured with a dance. Balloting for club officers will open on Wednesday morning, September 24 and continue through Friday, September 26. All members are asked to attend this meeting.

First Aid Classes For Night Shifts

Training in first-aid work for second and third shift employees is being offered under the direction of Dr. H. W. Garton, Works' physician. An organization meeting will be held next Thursday afternoon at 1 p.m. in Bldg. 16-2 and all employees interested are urged to attend. There is no charge for the course, which will be taught by Hoy Bastian, Bldg. 17-1.

The value of first-aid training has been demonstrated on various occasions at the Fort Wayne Works.

$1,054 Is Paid For Better Ways During Four Weeks

Ceremonies Mark Presentation Of Navy Pennant

The Erie Works of General Electric today received the U. S. Navy's highest honor for an industrial plant when Rear Admiral W. H. P. Blandy, chief of the Bureau of Ordnance, presented the Works with the Bureau of Ordnance flag and the famous navy "E" pennant. The honor was accepted by John St. Lawrence, assistant manager of the Works. Charles E. Wilson, president of the company; C. H. Lang, chairman of the Defense Coordinating Committee, and Mayor Charles R. Barber, of the city of Erie, spoke briefly. Presentation exercises were held on a flag decked platform erected near the main gate of the Works with all employees assembled there. Music was furnished by a forty-piece band from the Lawrence Park high school, made up almost entirely of sons and daughters of Erie Works' employees, and the color guard was formed by a troop of Sea Scouts, also all sons of Works' employees. Lapel buttons bearing the Navy "E" were distributed to employees. A large white "E" was painted on the main Works' smokestack.

The Mystery Of The Missing Dowel Pins

John Nowell, General Electric engineer, had 90 days in which to construct the first large electric plant in the Belgian Congo. On location, he was checking the many parts packed in crates and boxes, to see if everything was there. His inventory tally disclosed that nothing was missing—except the dowel pins. The whole camp was searched, natives were questioned, but not a single steel dowel pin was found.

It was too late to get replacements. So, with some scrap iron rod, improvised iron tools, and un-

Philadelphia Works Manager Succumbs

Robert V. Good, manager of the Philadelphia Works since 1936 and widely known throughout the Company died Wednesday afternoon at his home in Drexel Hill, Pennsylvania, after a long illness.

P. C. Walters, Bldg. 17-2, Leads List With $80.00 Award For Idea On Material Saving

One hundred and thirteen Fort Wayne Works employees utilizing the Suggestion System are richer by $1,054 it is revealed by the latest suggestion list which covers a period of four weeks. Among the award leaders are Perry C. Walters who gained awards of $80.00 additional to awards of $95.00 previously awarded on two suggestions.

Mr. Walters' suggestions were for changes to the size of steel sheets for certain stator and rotor punchings and for changes to sheet steel sizes for certain stator blanks. An award of $50.00 was made to Charlotte I. Hallauer, Bldg. 28-2, for her suggestion to install an acoustic phone system, and an award of $40.00 to George Angel, Bldg. 17-1, for his suggestion to reduce the size of material and to change the dies for stator shells.

A registered idea to cut shorter ends from bull-ring copper brought an award of $35.00 to Edwin E. Bueker, Bldg. 8-2, and a suggestion for changes to specifications on certain rubber tubing brought an award of $25.00 to Lawrence A. Kramer, Winter Street. Stephen E. Kelker, Bldg. 26-2, also gained an award of $25.00 for his idea to provide gauges for winding machine set-ups.

Five awards of $20.00 each were made as follows: Robert L. Haslup, Bldg. 17-3, changes to heating unit

• Speaking Of Books . . .

Book markets today are alive with best sellers. You can buy anything you want from poetry to fiction, to fact. You can find anything to fit your mood or fancy, your belief or your disbelief. There are writers for every kind of human being who reads. There never was a time in the history of the world when books have had so great a hold upon the minds and imaginations of men. Books are thoughts. Thoughts, sooner or later become actions.

But, there's one book being written right now that you won't be able to buy at the booksellers. The only way you can read it is to help write it. Its words are not the kind you find in the unabridged dictionary. Its covers are not of the finest calfskin. Its pages are not of the clearest rag paper. Rather its words are the daily deeds of 120,000 General Electric employees. Its covers are the courage and enthusiasm of these employees and its pages are the bright days and torch-lit nights through which these men and women labor.

WE are writing THIS book . . . we as the people of a great free land. We are telling the story for the world to learn and when the book is finished there'll be no doubt about its being the world's best seller!

• Lynn Renders First Aid!

At the risk of being termed blowers of our own horn, we cannot help but point with pride to the recent outstanding accomplishment of a group of workmen in the Lynn River Works repair shop who gave up a week-end, worked day and night for nearly a full week and finished the job a day ahead of schedule . . . a job of repairing a 175 kw generator for a British man-of-war. The job would normally take from two to three weeks.

The ship with the damaged generator came into the Charlestown navy yard for repairs. Instructions were that the ship must be ready to go within a week. The major problem on the generator was a damaged armature. It was a Saturday night. Forthwith the shop superintendent, Frank Brown, rounded up his gang and at daybreak Sunday they were on the job. Working continuously with meals being brought to them and with barely enough time out for sleep, the gang disassembled the armature, salvaged the copper coils and retaped them, tested the machine and had it back in Charlestown by Friday.

That is the stuff General Electric workmen are made of. We are proud of their accomplishment. We know it is the same spirit which will push the defense program through to a satisfying finish!

"American industry has discovered that whatever can be done to improve the health of its workers and executives is a sound investment for both employer and employee. Now it becomes also a contribution to national defense."—Dr. Victor G. Heiser, Medical Consultant, National Association of Manufacturers.

NEWS FROM THE CAMPS

We publish herewith with great pleasure extracts of letters sent to us by G-E employees now in government service. Address all communications for this column to the WORKS NEWS editor.

All Are Swell Fellows

Dear Editor.

Well sir, here is a little dope about Pine Camp: Pine Camp is located in the region of the Thousand Islands, the nearest town is Watertown which is about eight miles southwest of the Camp. Pine Camp covers an approximate 90,000 acres, and houses at the present time about 12,000 soldiers, and all are swell fellows. They hail from everyone of the 48 States and most territorial possessions. The buildings here at Pine Camp are of all new materials and each barracks houses about 60 men. The cantonment area is about two miles long and one-half mile wide. We have all sorts of recreations, shows, bowling alleys, outdoor sports, boxing—twice a week, and a number of other amusements. Each Company has a recreation room of its own, which contains pool tables, ping-pong tables, a radio, plenty of magazines and all sorts of games, such as darts, checkers, chess, etc., thanks to the people who are contributing to the U. S. O. The boys here at Camp know they are doing their part in contributing to the National Defense Program.

Our new hospital will house approximately 750 patients, it is laid out in a network of connected buildings—all one story. It is away from the cantonment area about one-half mile and covers about one square mile. It is equipped with the latest and most modern equipment.

The weather up here is quite chilly, and we will have an early winter and a tough one—so the old-timers around the Camp say. Pine Camp is located in a sandy region of the country, and Lake Ontario is located only about twenty miles away.

If at any time I have anything interesting pertaining to Camp life, I will contribute it very willingly for the WORKS NEWS.

Thanking you in return, I am,

Sincerely yours,
P. F. C. Thomas J. Conroy,
Hdqrs. & Hdqrs. Co.
4th Armored Brigade,
Pine Camp, New York.

Address Changed

Dear Editor.

I wish to tell you how much I appreciate receiving the WORKS NEWS. I like the news items and especially the chat about the different departments. You will notice that my address has been changed. This is the second change within two weeks.

I was assigned to the Third Battalion a week ago last Thursday. I no more than got settled and assigned to a school of Basic shop practice when I was sent over here. I don't know how long I will be here but I hope to stay for some time. The company is scheduled to leave the Proving Grounds next month for Ft. Ethan Allen, Vermont. I don't know as yet whether I will go with them or stay here. I would like to stay and finish my school course. There are only 130 men in an Ordnance Co. and 90 ratings so I would have an even chance of making a rating. A first class rating pays $36.00 over your base pay per month, so you can see it is worth working for.

This camp is ideally situated in regards to sight seeing. All the large cities in the east and the National Capital are within reach and can be visited on a week-end. The roads are well traveled and a man in uniform has no difficulty in hitch hiking wherever he wishes to go. I was at Atlantic City last week-end and spent the day out at sea, deep sea fishing. No I didn't get seasick or catch many fish, but I enjoyed it immensely. It was all so new to me, living all my life in the midwest that I found it very interesting. We hitch hiked back to Aberdeen in 2½ hours, which is four hours better than we could have made it by bus.

I was in Fort Wayne over the Labor Day week-end. I would have liked to renewed my acquaintance with my many friends at the shop, but I was so pressed for time I couldn't get around there.

Thank you for your kindness in sending me the WORKS NEWS.

Pvt. Eugene C. Boyle,
47th Ord. Co. (M. M.) O. U. T. C.
Aberdeen Proving Ground,
Maryland.

Push Campaign For Conservation

Elmer Is Initiated

"So your name is Elmer Blurp. You never worked in a factory before, but you're willing to do your best. Well, hop over to that bench, get a box of those parts and get going. Watch that fellow next to you, and if you get stuck holler." Elmer felt like the ship's captain stranded in the center of the Great American Desert. But Elmer had ambition and tried. He didn't do so good but he could get the parts together and so he got by. Some "Elmers" have an inventive knack and develop, by both force and viciousness, into good operators. Other "Elmers" go on day by day just getting by and we wonder why we don't have good quality and why the scrap pile is as large as the shipped goods.

The leaders are busy and no doubt about that, but how much of that busy business is caused by mistakes, bum work, re-work, and scrap. Could we contribute quite a bit of the busy part to being too busy to show "Elmer Blurp" how to properly get started and follow up by a few or several checks on "Elmer" later on? I believe we could and so do you. It's mighty near impossible in rush times like these to do a real good job of training anything, even our hair, but it's a whole lot more necessary than when things are normal. The least we can do is try. One suggestion might be to start the employees in a fair manner with sufficient information and demonstration to let them know what is wanted. Then concentrate on those new "Elmers" that don't grasp the situation quite so readily. Go back on short excursions to the others and polish up the rough spots until all are doing a fair job. After the "fair" state is reached don't for heaven's sake stop them, but carry through. To be satisfied with a "fair" operator is like running 70 yards for a touchdown through mud and opponents and then sitting down to look around on the three yard line.

For the leaders there is a store house of means in our works of teaching new help and we owe it to the help as well as the company to do our best in using these means. There is a whole building full of "Howard Millers" that are experts waiting your call to develop just the correct method if the leaders are in doubt. There is a group of "Bernie Evans" to help us in machine and tool use and methods. There are many "Persings" to help us in work place arrangements and methods and we could go on no end in the available help if we only ask for it. That's one side of the picture and the other is to make ourselves remember that we must spend a lot of time personally coaching the new employees in the tricks of the trade we have accumulated ourselves in our experiences and be willing to give these experiences truly.

The people we like to refer to as "Old Timers" have an equal responsibility in this "Training That New Employee" idea. Nowhere will help be more appreciated and more tenaciously clung to than that coming from the boys who have been on the firing line for years. I never forgot those little things the "Old Timers" told me because they seemed to fit just right and did me a whale of a lot of good. These "full speed ahead days" makes it almost necessary that the experienced offer those tid-bits of advice that make the job better understood and a lot easier. "Elmer" is going to feel a lot more at home if you experienced chaps offer your advice along with the leaders and there is no doubt that the "Elmers" and "Ethels" will be much more valuable for having heard from the older employees in addition to the leaders. What old timer hasn't at some time pointed with pride to a successful boy or girl and say, "I helped train that person when they didn't know the tool bit from the foot pedal."

Sure it's a lot of self satisfaction to see those new employees turn out to be craftsmen, but it doesn't just happen. You have to help and help plenty, train and keep on training and then when the results speak for themselves we can feel as though we have "Trained That New Employee."

R. C. DENNISON, *Supt.*,
Magneto Department.

ELEVEN DAYS
REMAINING
FOR
DOUBLE AWARDS

Transformer Division Will Maintain Quality

"MIGHTY OAKS FROM LITTLE ACORNS GROW"

By GERTRUDE KUMMERANT
(Bldg. 26-3, 1st Shift)

Instructor—I wondered just what the word meant when I was given that job to do. Did it mean helping my Boss see to it that the employees used the correct material—did it mean helping the sweeper by keeping the material we used off the floor—or did it mean helping the employees to do their work.

I found that the job implied teaching new people how to use the material required to do their individual job accurately from the first. Helping them overcome the danger of making mistakes, which means waste of material and time, which is to everyone's advantage in the long run.

For instance, we use a small piece of varnish paper on our transformers for insulation. Maybe an operator drops a piece in getting a supply, in a day's time maybe four pieces are lost. Forty-five operators do this one operation, one hundred eighty pieces are dropped or lost in a day, nine hundred pieces in a week, maybe this is swept out by the sweeper as waste. Just what the cost of this one piece of insulation is, we may not know, but over a period of time it amounts to a pretty big sum. All of us just being a little more careful in getting the supplies used in doing our daily job can help reduce Waste and Spoilage.

BE CAREFUL, THERE MUST BE NO "DUDS"

By WILLIAM SPACKMAN
(Bldg. 26-3, 3rd Shift)

With a good percentage of the transformers being made for the national defense program, Bldg. 26-3, is striving toward accurate, wasteless production.

These transformers help produce approximate daylight around the clock in defense factories throughout the nation. It has proved itself to be the most efficient lighting and fits in perfectly with the new type "blackout" factory. This is essential under our "All Out" Program. Our transformers are being placed in another precarious position by our Navy, being installed in the newest of Naval air and sea craft.

For this reason there must be no "duds". The transformers must be made accurately! They are being placed in too important positions to fail from carelessness or being mechanically assembled wrong. The assembly is being laboriously checked by competent inspectors to prevent any waste.

Waste presents one of the biggest problems. Because of the difficulty of getting materials, all unnecessary waste must be eliminated. This is something that only the assemblers can do as it is in their hands that the material is placed. Every effort must be made to use all materials obtainable.

We on the third shift realize the importance of these things and want to do our share in carrying on and supporting the program to reduce waste and spoilage.

Cost Reduction Committee Continue Their Material Utilization Program

Present Shortage of Supply Brings Increasing Demands for Better Utilization of All Available Material.

Planning and Tool Departments co-operate in an effort to correct inefficient use of Materials which exist on many planning cards. New tool layouts are being carefully scrutinized in order that initial tools for new jobs will produce maximum utilization. Material waste from various processes such as, punching, forming, screw machine, etc., are being analyzed to reduce them to minimum.

A group of illustrations taken from jobs now being built in factory are being circulated which illustrate different classes of utilization.

These Illustrations show samples of:

(a) Poorly planned die-layouts.
(b) Dies used without stop pins to properly space punching.
(c) Material not sheared or used as called for in planning.
(d) Layouts illustrating maximum utilization.
(e) Effective use of waste material by using it to produce other good parts.

Development of materials and processes have made possible more conservative use of material, and in these cases, rebuilding or replacement of tools being considered.

Set-up men and operators have a fine opportunity to contribute to conservation of much needed material, by bringing to light, all cases where the sizes of material used, or the tool layouts, do not give maximum utilization.

Suggestions covering improved utilization of material, provide added incentive during September, by paying Double Awards.

V "THE CHIEF CONCERN OF G-E WILL BE TO SERVE OUR COUNTRY WELL" V

CHARLES E. WILSON, President

Good Housekeeping Is Essential

PUT TIME TO GOOD USE

IT IS LATER THAN YOU THINK

Is your suggestion to reduce spoilage and conserve material overdue? Hasn't it always been overdue? Many times recently the statement has been made that the essence of the defense program is TIME. Should you ask what it is that we propose to defend, the answer on every lip is DEMOCRACY. If you ask, "What is the most democratic thing that is?" the answer is TIME. Think about time for a moment. You have twenty-four hours a day. The rich, the poor, the famous, the humble, our friends and our enemies all have twenty-four hours a day; not one minute, not one second less. There is one best way to save time—DO IT RIGHT THE FIRST TIME. The second best is to CATCH MISTAKES QUICKLY. In order to do ti right the first time it is absolutely necessary that you UNDERSTAND YOUR JOB.

Consider the case of Joe Doakes. He said to himself, "I'm smart enough to figure this out myself, I'll go ahead and get this job done without asking any questions." Joe had turned out several pieces when the inspector called his attention to the fact that he was not making the parts according to drawing. They looked the drawing over very carefully in order to determine how these pieces might be reworked to make them usable. While doing this they found there was a detail on the drawing that they didn't think would permit the part to work even if the part was made according to drawing. They decided that the drawing must be right and continued to turn out the parts the rest of the night and reworked the first pieces not quite to drawing but to what seemed to be a usable condition. The next day the assemblers found that the pieces wouldn't go together and that those that had been reworked once bad to be scrapped while the remainder had to be reworked. All this caused delay and waste of material. The customer was indignant when the first delivery was overdue but became so irate, after waiting for weeks for the part of his order covered by the material which had been scrapped, that he placed his futur ebusiness elsewhere. Joe's department was heavily engaged in work for this customer and since he was a new employee he was temporarily out of work.

Dick Roe, an operator in another department, was confronted with a similar problem. He want to his foreman with the problem and it was found necessary to call the engineer at his home. The engineer came in to straighten out the matter and discovered that the customer had overlooked a detail that would cause him trouble when he specified what he wanted. Everything was put right, the job was delivered on time, and the customer was so pleased with the change suggested that he placed a large order for material in connection with a defense contract he had just obtained. There was no difficulty in obtaining material for this job and Dick was busy and had steady employment.

Dick Roe made sure that he UNDERSTOOD HIS JOB. It is true that DO IT RIGHT THE FIRST TIME was overlooked in the preliminary stages but MATERIAL WAS CONSERVED and THE MISTAKE WAS CAUGHT QUICKLY.

T. L. Staley, *Supt.*

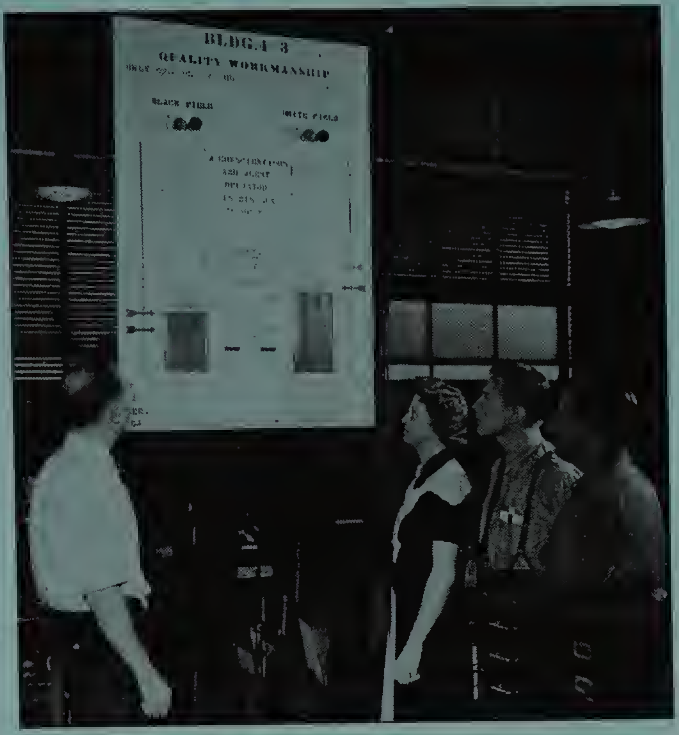
Suggestions received during the first six weeks, of our Double Award Campaign, have been gratifying. Eleven hundred and seventy-seven came in during the first six weeks, this is an increase of about 203 per cent over the average weekly rate in July.

New Drive For Quality In Bldg. 4-2 And 4-3



Foreman George App discussing Quality Workmanship with Ass't Foreman Phil. Telford, Set-up Man Marcel Gaut and Operator Zoa Brock.

A New Indicator

In line with our Work's program of "ALL OUT FOR DEFENSE" and the need for conservation of materials and labor, the General Purpose Fractional HP Motor Department, Bldgs. 4-2 and 4-3, have developed the above quality control board. Similar boards have been made for each group on both floors. Limit lines based on past performances have been established which must be maintained and continually improved upon. These boards will keep before us the results of our efforts towards reducing rework, scrap, and extra costs. As we reduce losses we will reduce broken promises and customer complaints.

When the green light burns our per cent defectives are within control and the red portion of the indicating belt is below the red arrow. We hope to keep the green light burning and the red section of belt farther and farther below the red arrow.

We are asking that each employee give our program his or her whole-hearted support by calling to our attention by suggestion or otherwise any improvement that can be made to reduce rejections, so that we can conserve materials and labor. Let each person be his own inspector catching defects as they happen, so that correction can be made, before large quantities of defective parts find their way into production or have additional labor spent on them.

R. E. McVay, *Supvr.*,
Waste and Spoilage,
Bldgs. 4-2 and 4-3.

Fresh Ideas Go To Work

Materials are most effectively utilized when it is not necessary to repair or re-work them, and in response to the appeal to reduce Waste and Spoilage, and thus conserve Materials for the National Defense Program, the Winding Department of Building 4-3 has inaugurated a Quality Workmanship Program. Each operator identifies Fields they complete. Operator who analyses the rejections will then make a report to supervision, stating the nature of the defect, the quantity involved, and the code number of the operators who are responsible. From this data, a chart is maintained in each group showing the frequency, or the rejections per day and week, for each individual operator in the group.

At a conspicuous place in the department, rejections that are most frequent and troublesome are exhibited. A placard stating the reason for the rejections, and the most effective method for eliminating the trouble will be shown. As operators have defects, they will be informed of the rejected work and shown the corrective measures necessary to prevent a recurrence of the loss. Suggestions from operators are always appreciated and will be given the utmost consideration.

The fine spirit of co-operation that we are enjoying and the eagerness of operators to do their part to help the "ALL OUT FOR DEFENSE" program by doing their job "Right the First Time", give us assurance that we will show an appreciable reduction in our Waste and Spoilage, and in this way conserve valuable Material and Time that are now so vital for our National Defense.

George L. App, *Foreman*,
Bldg. 4-3.

Let All Of Us Lend A Hand

By K. W. McOmber

Do you remember that evening you and friend wife called on the Smiths and just after you turned out of the Smith's drive on the way home, the little wife remarked, "My goodness, John, did you ever see such a cluttered-up house? There was dust all over the radio and Bzzz . . . Bzzz . . . Bzzz." Well, sir, the wife wasn't just being "catty," she was expressing her disgust for a workman who didn't realize the importance of Good Housekeeping or was too indolent to care.

Remember the old neighborhood blacksmith shop of your boyhood days with the sparks flying, the forge humming, and the acrid smell of smoke and hot metal? There was coal and ashes all around the forge, litter all over the floor, a pile of scrap metal in one corner, a pile of refuse in another corner, dirty windows and dust all over everything. Well,sir, that was a mighty good example of poor housekeeping.

Yes, Good Housekeeping is important. Sloppy Housekeeping is carelessness and carelessness developed in one phase of our character spreads. Therefore, sloppy housekeeping very often results in the development of careless workmen.

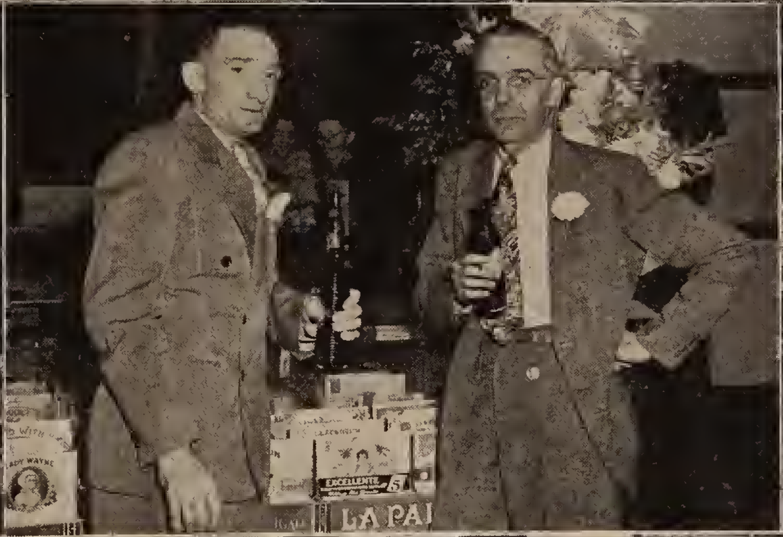
Poor housekeeping is Costly and is the fault of losing much valuable material. Fragile parts dropped on the floor are soon damaged if not picked up immediately. Small parts, sometimes more valuable because they are small, when dropped, only too often are swept up by the sweeper and go to the rubbish can. Piling parts upon each other promiscuously may damage precision parts until they are unfit for use when a little orderliness would have prevented the damage.

Therefore, the manufacturing floor where poor housekeeping prevails is always inefficient. "A place for everything and everything in its place," is an old saying, but if followed religiously will add greatly to the precision and dispatch with which a workman may perform the task assigned to him. However, Good Housekeeping can only be accomplished by the united efforts of the entire personnel of a department. One sloppy housekeeper can undo the best efforts of five men who practice neatness.

Think it over, fellows! With just a little extra effort on the part of each one of us, we can have a shop so "spic and span" that we are proud of it. We will be conscious of a job well done and know that we are getting all possible value from the material with which we work at a time when material is more scarce than ever before in history.

IMPROVE THE QUALITY OF YOUR WORK NOW

Official Opening Of G-E Club Building, Popular Affair



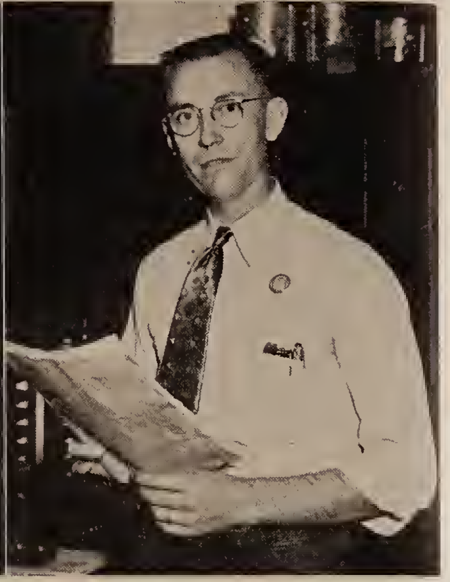
Hundreds of employees and their families enjoyed the official opening of the G-E Club building last week. Top left—the dance proved popular to the younger folks—and some of the older. Top right—The G-E Club Band swings into action for a program. Second row left—Works Manager M. E. Lord as leader of the "brasshats" team accepts his bowling jacket from Ceal Romary, heading the Elex Team. Elex won. Right—The billiard tables were in use throughout the evening. Third row, left—Bill Doehrman does his stuff as announcer. Center—Not bored, just resting are Joe Henry and George Waldschmidt, club president. Right—Helen Bleke helps boost the Elex Score. Lower left—The Decatur foremen were on the job to show the Fort Wayne foremen "what's what". Lower right—A general view of the bowling spectators.

Four Are Promoted To Positions Of Foremen

H. F. McKee

Frank Brindle

Mardo Tobias



Ralph W. Hare

Four employees were promoted to foremanships during the past week. In the Specialty Fr. H.P. Motor Division Frank Brindle was made foreman of inspection of test, R. W. Hare, foreman of armature finishing, and Mardo Tobias, foreman of dynamotor armature winding. In the Magneto Division H. F. McKee is named foreman of the third shift.

Mr. Brindle was employed in 1911 and assigned to the Fr. H. P. Motor Division in the inspection and test department. He served in supervisory capacities until 1938 when he was transferred to the Specialty Fr. H.P. Motor Division. He continued in inspection and test work up to the time of his present work.

Mr. McKee began his service in 1913 and has served seven years as an automatic operator, nine years as a leading operator and twelve years as assistant foreman. Mr. Hare became a G-E employee in 1923 and later was made assistant foreman of armature finishing in Bldg. 4-4. In later years he was engaged in production dispatching in the armature and field section in Bldg. 19-5.

Mr. Tobias' service record dates back to 1914 when he was engaged by Harry Baals, present mayor, as a messenger. Later he engaged in assembly work as a lathe operator, and on grinding. He has served in supervisory capacities in Bldgs. 4-4, 26-4 and 19-5.

Suggestion Awards

(Continued from Page 1)

for wedge machine—additional to $5.00 previously awarded; Florence Robinson, Bldg. 19-4, improvements to insulation machine—additional to $5.00 previously awarded; G. E. Zehender, Bldg. 4-6, use of the same drawing for cast iron and steel machine parts; Theodore Branning, Bldg. 17-1, making clip complete at wire binder; Ellis McMullen, Bldg. 17-1, changes to tension springs at trimming machines.

Other awards of from $5.00 to $15.00 were as follows:

Daniel F. Mee, Bldg. 26-1; Walter V. Wohlford, Bldg. 19-4; Robert J. Arnett, Bldg. 4-4; Fred Alles, Bldg. 19-4; Ivan Y. Butler, Bldg. 4-4; George E. Thomas, Bldg. 26-3; Doris L. Roe, Bldg. 4-4; Joe W. Clark, Bldg. 26-3; Rose Mary Bender, Bldg. 26-3; Earl Frederick, Bldg. 19-4.

Geraldine M. Pickett, Bldg. 12-1; Chester McIntosh, Decatur; Otto Helmrich, Bldg. 19-5; Wm. G. Tennison, Bldg. 19-5; Wm. Strahm, Decatur; Paul Wm. Schwehn, Bldg. 4-3; Charles H. Brown, Bldg. 4-3; Mary F. Lehman, Bldg. 17-2; Claude L. Gill, Bldg. 17-2.

John C. Collins, Bldg. 26-3; Victor E. Hall, Bldg. 17-1; Paul K. Hapner, Bldg. 4-5; Cecil E. Tarney, Bldg. 26-3; Lester R. Parrish, Bldg. 26-2; Howard Shipman, Bldg. 26-2; James McCray, Bldg. 26-2; Robert A. Bunyan, Bldg. 26-1; Nora Coburn, Bldg. 26-2; William R. Shuler, Bldg. 17-1.

Gustave Mittermaier, Bldg. 26-5; Donald M. List, Bldg. 4-1; Frank Quinn, Bldg. 17-1; Clarence Cleveland, Bldg. 4-1; Russell G. Gibson, Bldg. 17-1; James A. Johnson, Bldg. 4-1; H. Eastman, Bldg. 17-1; J. M. Russell, Bldg. 17-1; George A. Silk, Bldg. 17-1; Paul A. Studebaker, Bldg. 26-2.

Carl H. Einsiedel, Bldg. 26-5; Marie Louden, Bldg. 4-4; H. P. Ray, Bldg. 4-1; E. L. Hott, Bldg. 4-5; Park E. Schemehorn, Bldg. 4-5; W. E. Henninger, Bldg. 4-5; Elmer W. Brown, Bldg. 17-1; Beeman F. Howard, Bldg. 26-2; Dorothy Parrot, Bldg. 26-3.

"G-E Mazda Lamps Stay Brighter Longer". Employees' Store open from 10:00 a. m. to 4:00 p. m.

The Missing Dowel Pins

(Continued from Page 1)

skilled help, Nowell manufactured a new set of pins, and the job was completed on time.

Months afterward a visitor to a half-savage tribe in the Belgian Congo found men and women alike wearing a new type of nose ornament. Thrust through the cartilage of the nose, gleaming and twinkling in the African sunlight, each proud native wore one of John Nowell's missing dowel pins.

S. W. Scarfe Receives New G-E Appointment

The appointment of Stanley Wells Scarfe to the position of Assistant Manager of the company's Los Angeles Central Station Department has been announced by S. E. Gates, Manager of the Los Angeles Office.

Mr. Scarfe, a native of Towanda, Pa., was employed intermittently at the company's San Francisco service shop while still a student at the University of California. Upon his graduation in 1924 with a B. S. degree in electrical engineering, he became sales assistant in the San Francisco Office. In January, 1925 he entered the student test course at Schenectady, N. Y., and on August 31 of that year enrolled for the company's sales training course. On December 1, 1925 he returned to San Francisco, where he worked in the sales department. In March, 1927 he was placed in charge of sales at Fresno, Calif., and in July, 1932 was transferred to Sacramento in the same capacity. From November 1, 1937 to August, 1939 he served as Assistant to the Manager in San Francisco. Since 1939, Mr. Scarfe has been a member of the company's Los Angeles sales office.

NEWS THROUGH THE PLANT

Thisa And Thata 19-5

Some people have queer hobbies —we understand that Hazel Heron is collecting pencils! Telling Bill that she didn't have a pencil to make out her report, when all the time she was wearing one in her hair . . . It just seems that we can't keep Arnold Johnson's name out of the NEWS—he went squirrel hunting and evidently he didn't have the right kind of squirrel bait 'cause he didn't get any. George Diffendorfer says he is just about as good as he is, he didn't get any either. Might we suggest trying a little salt—they tell me that it sometimes works.

Who is that gorgeous brown-eyed Susan working for J. C. Miles in Bldg. 19-5?

Bldg. 4-3 gave Bob Horstmeyer a big send off to the army, at least with a full stomach. They had a big pot luck dinner Friday noon for Bob. We wish him lots of good luck and hope he may be a general some day. Don't try any of those tall stories on the army boys as they don't have to believe them, and be sure to keep an eye on that military kit too.

We have been wondering what is wrong with Ralph Smith, Bldg. 4-2. He runs around like a child with his first dime. Oh! Oh! we get it—an Oldsmobile.

The Penny Pinchers of Bldg. 26-2 had a party at Gladys Freeman's house. Those present included Freida Schaffer, Helen Coryell, Hilda Rebber, Martha Costion, Betty Roesner, Irene Lazar and Margaret Truelock. A fine time is reported, but it is also alleged that some of the girls couldn't take it.

Frieda Morin, Bldg. 4-3, spent last week in Wisconsin.

Lulu Witte, Bldg. 4-3, is attending the American Legion convention in Milwaukee this week on her vacation.

PARKING NOTICE

In order to permit the greatest number of cars possible to be parked on the Company parking lots, the lots are being marked with parking spaces. Employees are asked to be certain to park their cars within the limits of the marks. Regular inspections will be made to enforce this ruling.

GEORGE DOEHLA,
Fire and Patrol Chief.

It has been suggested that Dick Graber, Bldg. 4-1, tie his automobile to him. The other day he had the police looking for it. They finally found it in the G-E parking lot.

Paul Witte, Pattern Shop, is proud to announce that he is the father of a 10 lb. 13 oz. baby boy, born on August 26. Both Mrs. Witte and son, Lawrence Allen, are doing nicely. Father Witte? Better than that! The only complaint Paul has to make is that his son doesn't take after him.

Margaret Woodward, Bldg. 4-3, is receiving the very worst punishment. Can't talk until noon each day. She says she has a cold.

Rolly Wickliffe, Bldg. 26-2, is alleged to have eaten thirteen pieces of chicken and then taken thirteen strokes to make that No. 5 hole. Glenn McNamara didn't do much better after eight "wimpies", for he couldn't stoop over to tee off. Orville Ellingwood ran a close second.

Saving Gas?

Herman Weickman; Bldg. 17-2, is very absent-minded these days. He put some new cement in his driveway and then discovered that he had neglected to first remove his car from the garage. Herman rode a bus to work and took his wife walking in the evening.

NEWS THROUGH THE PLANTS

From The Feminine Viewpoint

By Irene Perry and Hilda Berthold

Shakespeare wrote of "the white wonder of dear Juliet's hand," and countless other poets have written verse in praise of women's, or one particular woman's hands. Traditionally it required generations of ancestresses who never so much as opened a door, to endow a woman with a lady's hands.

We suspect that this notion never found much favor in America, and we'll venture a guess that the hands of a modern woman, who gives them reasonable care, are as shapely and beautiful as those of any aristocratic lady of long ago.

In order to achieve lovely hands the first essential is, of course, health, followed by skin improvement, care and dressing of nails, exercise, and learning to make your hand movements mean something; teach your hands to be expressive.

Too hot water is hard on the hands, as it causes the blood to come to the surface, leaving hands an unattractive red, it also tends to dry out the skin. Apply your favorite lotion after each washing, not forgetting to apply a bit to your elbows, it's a convenient time to give them a bit of care too. In case your hands have become dry and chapped, a simple treatment is to cover them well with olive oil, vaseline, or cold cream at bedtime, draw on an old pair of white cotton gloves and by morning, you will find your hands smooth and supple once more.

A simple exercise designed to limber your wrists, just drop your hands at your sides and shake them hard; make-believe piano playing helps to make your fingers flexible, while still another exercise is simply raise your hands straight in the air until your fingers tingle, then drop them at your sides and let them hang loosely. A little gentle pinching of flesh away from the fingernails helps to taper them.

Charlotte Sanford, Bldg. 4-3, is running up a few good records with her new car.

Margaret Niblick, Bldg. 4-3, has us all guessing why she is going, oh, so far away on her vacation.

Mary Guilliff, Bldg. 4-3, reports that it won't be long until she, too, will be wearing a brand new sparkler.

Carl Christlieb, Bldg. 4-3, caught the season's record in one large bass at Art's cottage, Big Long Lake. The only trouble was it cost him plenty of gas to show said fish to all the gang.

We wonder why Sylvia Bowers, Lillian Bergman, Norma Beach and Dolores King, all of Bldg. 4-3, came to work so bowlegged last Monday. Could it have been from the horseback riding they did Sunday?

Esther Crogan, Bldg. 4-3, was surprised on her 21st birthday with a potluck supper and gifts from the following girls: Dawna Hunt, Norma Beach, Lillian Bergman, Marjorie Dowty, Edna Wolfe, Martha Ruhl, Dolores King, Sylvia Bowers, Julia Martin and Roxanna Richey.

We wonder what is the matter with Bill Skevington, Bldg. 4-2, these days. He was seen preparing a sandwich and instead of putting on catsup he poured on pepsi-cola.

A New Man And A New Plan

SPECIALTY MOTORS
SAFETY RECORD
WE HAVE NOW WORKED
45 DAYS
WITHOUT A LOST-TIME
ACCIDENT

Wm. Fryer has recently been appointed by O. J. Mettler as secretary of the Series and Specialty Motor Divisional Safety Committee. Bill hasn't wasted any time in getting things rolling on his new job judging by a new method he has worked out to maintain interest in safety in his division.

He is shown in above picture scrutinizing this method, which consists of a display board with a mechanical means of recording the days worked in the division without a lost time accident. This board will also show the safety record of each department and will serve as a medium in keeping employees in the various departments posted in the matter pertaining to safety.

The Series and Specialty Division enjoy a good safety record now and can be expected to show an imcreased safety effort.

H. L. Smith, Safety Engineer

Gossip From 19-5

Regmore Engeman, Bldg. 19-5, returned from her vacation after spending two weeks in Wisconsin and Lake Gage. . . . Eveline Best, Bldg. 19-5, returned from her vacation down in New Orleans. . . . Mable Sponhauer, Bldg. 19-5, and Dale Hurd were married August 30 at Auburn, Ind. . . . Mary Thurston, Bldg. 19-5, and Steve Maljak were married Saturday, September 13. . . . Elsie Frede, Bldg. 19-5, returned to work after one week's vacation. . . . Clarence Rentschler, Bldg. 19-5, calls himself Clark Gable the second, he is so popular with the girls, only when they want him to do something for them. . . . Anna Pearson, Bldg. 19-5, said she did not go anywhere on her vacation but she said she sure had a swell time, eating chicken, cleaning garrets, and washing the automobile. Anna said she had the most fun eating the chicken. . . . Anyone knowing how to put weight on, please tell Louise Boehm, Bldg. 19-5; seems that Louise lost twenty pounds (it must be love). Now she wants to put it back on in one sitting. Where did you get that appetite, Louise?

19-5 Office Chatter

Leo Didier has found his observation is on the slipping side—when last Friday he was strolling down Broadway—Rea Kuhn made a mad dash in no time through the gates. Yes, the office has four red-heads—Joe Miles has a name for that.

This is one way our office can say "Hello" to our fellows in camp. Incidentally we hear that Carl Alter will soon be home. Hugh Neely will not be surpassed when it comes to pipes. It seems like the letters received around here are enjoyed by the entire office force.

Our nomination for the absent-minded professor's medal this week goes to Larry Wightman, Bldg. 19-5, who walked all the way across the office to the pencil sharpener and found he had left his pencils on his desk—not to mention his falling over an open drawer in his desk.

Sympathy

The employees of Bldg. 4-4 wish to extend their sympathy to Sophia Bodigan in the death of her father.

The Series and Specialty Motors extends its sympathy to Lew Gossman on the death of his brother.

M.B.A. PATIENTS

General Purpose Motor: Genevieve Rondot, St. Joe Hospital; Harry Savage, 716 Walnut St.; Robert Smith, St. Joe Hospital; Patricia Timme, St. Joe Hospital; Eunice Turner, 3005 Hoagland Ave.; Thomas Vachon, 1517 Spring St.; Betty Ruth Wichman, 516 W. Berry St.; Wallace McKay, Lutheran Hospital; Anna Kensell, 3415 Hoagland Ave.; Robert Born, 3231 S. Harrison St.; Erma Harrison, Lutheran Hospital; Bonnie Jetmore, 2313 Oliver St.; Robert Smith, St. Joe Hospital.

Transformer: Cecilia Bowers, St. Joe Hospital; Bert Caley, Route No. 6, city; Delores Ferckel, 1540 E. Wayne St.; Cletus Goldsmith, 3330 S. Calhoun St.; Max High, 660 High St.; James Hughes, 3107 Oswego St.; Edna Klein, 914 E. State St.; Dorothy Leisey, Lutheran Hospital; Kathryn Walker, 1420 Columbia Ave.; Joseph Ternet, 3333 Winter St.; Erick Soderquist, 1130 Osage St.; Waneta Richardson, 2046 Thompson Ave.; Mary Robertson, 1430 Eliza St.; Levona Porter, 1424 Martin St.; Pauline Ort, Medical Center Hospital; Clarence Mentzer, 2110 Thompson Ave.

Winter St.: Albert Becker, Woodburn, Ind.

Wire and Insulation: Charles Redding, 2714 Maumee Ave.

Shipping Dept.: Dorothea Roop, 1111 Wilt St.

General Service: Frank Voirol, 1306 Winter St.

Motor Generator: Harry Knatz, Route No. 9, city; Ruth Bell, 604 Florence Ave.

Series and Specialty: Robert Fredricks, Methodist Hospital; Edward Brackhall, 1912 High St.

Apparatus: Walter Coggeshall, 610 W. Superior St.

Left the Hospital: William Meeks, Mary Martin.

Returned to Work: Frank Yarman, Gerald Norwalt, Don Meyers, Russell Gebhardt, Jeanette Lauer, Myra Meese, Ione Arnold, John Stettler, Dorothy Craig, Vera Wad, Eugene Yergens, Bess Goins, Susie Wagner, Agnes Grosjean, Helen Martin, Catherine Hite, Robert Hodell, Kathleen Meyer, Marian Cook, Richard Meyer, William Nickerson, Beulah Jones, Jean Buskirk, Grace Ewing, Evelyn Kruse, Junita Gerke, Jean Stauffer, Earl Bodle, Edna Voirol.

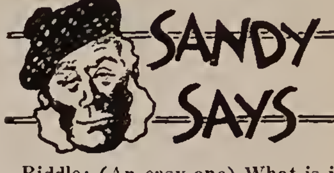
Now that Bldg. 4-3 is having so many farewell and birthday dinners Phil Tilford and George App want to be very careful or they might lose their girlish figures. Do you suppose that is why Phil is helping with the sweeping?

Alma Ladig, Bldg. 4-3, was all set to spend her vacation in Florida when, standing in front of her bedroom window putting on her hat said, "Why go to Florida to be able to reach out and pick oranges when you can stay home and reach out the window and pick peaches." So Alma put her hat aside and stayed home to enjoy herself doing her fall house cleaning.

If anyone is interested in a new route from Muncie to Fort Wayne, ask Ceal Romary, Bldg. 26-2. New Castle is awfully nice, isn't it, Ceal?

Bldg. 4-3 wishes to congratulate Carl Schoenherr on the arrival of a baby girl.

The next time John Binkley Bldg. 4-1, goes to the annual Mulligan Lake party he isn't going to listen to any of his fellow members on how to play his cards. It proved rather expensive for him at the last party.



Riddle: (An easy one) What is it that a Scotsman or Calvin Coolidge never wasted—The Greeks had a — and woman always gets the last —?

O' course, the answer is, "word".

One verra gude reason for Scotsmen not wasting words is that some o' them are very valuable—even priceless.

Let me tell ye a story tae illustrate this. Way back, almost 400 years ago, the European war going on at that particular moment in history was called "The war of the Roses". The name, "Fifth Columnist" hadn't been invented, but a spy by any other name would smell as vile. Now, the Scotch in those days, as now, saved their words, sae narry one leaked out tae the enemy, and history records a war won largely by the tight lips o' a tight people.

If it was important then, it's more important now, tae keepmum. News travels faster now. A spy doesn't have tae sneak thru the woods for days tae get his message home like he did then.

Don't think anything ye say is not important, either! Sure, the papers tell lots o' things, but not all, and they will be telling less and less as time goes on. Weel, not anly WHAT we're making, but HOW we do it, is OUR secret, from now on.

So don't gossip about it with your relatives, don't talk about your job to your neighbors, and young lads, don't brag o' your work tae that "incindiary blond".

I've said time and time again that no matter what we do, our work is IMPORTANT. Now I say, our knowledge o' it is MORE IMPORTANT.

So—if ye are a real Scotsman at heart, ye'll save your breath, save your words, and help save your Country.

And that's not just dramatics or flag waving either.

But speaking o' saving words reminds me o' my cousin Colin. We got "comps" tae a show, and in one o' the dances, a big set o' plumes fell off a costume and landed right in Colin's lap. During intermission we took them back stage.

No big, long winded explanation from my cousin Colin. He merely said, "Horse feathers from the pony chorus".

Mr. and Mrs. M. J. Lowe are proud parents of a new baby girl. Her name is Virginia Grace and she was born Friday, September 5. Since they already have a son, both parents were sincerely hoping for a daughter. Lots of luck.

Deaths

Christ C. Koble, known to hundreds of employees who patronize the Works restaurant, died Monday morning while at work, following a heart attack. Mr. Koble had been an employee since 1916 and worked in the restaurant. Funeral services were held Wednesday afternoon with burial in the Parker cemetery.

NEWS THROUGH THE PLANTS

Motor Generator Static

The Buzzards

"Captain" Bones Brandt who is the best bowler in his family when his Dad is out of town says, "The secret of a big score in bowling is to get more strikes than splits."

Art Fruecht (commandant by direction) of the Navy section believes he could get more work out of his men if they would use "Old Navy Cut Plug"—Just imagine Gene Rayzinger with a chaw in his cheek.

Earl Morrill (who can lick his weight in stuffed wild cats) says there is only one way to get Production up. That way is to move the Production Department to the fifth (5th) floor.

The reason Dick Wyatt gave for a low score in bowling last week was that he bowled with his wrong arm. Didn't realize it till the next day.

Francis Kay Russell who drives a mean maroon colored car made the statement that married people live longer than single people. Whereas "Chic" Waltemath said, "It only seems longer."

Speaking of pipes, Walter Suter has his pipe trained to steer the car home. All he has to do is get in his car and of course every one knows how strong his pipe is.

"Streamline" Gawehn (alias Collateral Joe) (alias Happy Gus) seriously thinks he will bowl. All he needs is some money for bowling and some shoes and a bowling ball.

"Bull" Guller who has been married these many years (18 months to be exact) has decided to specialize in armature cases for the Navy. He once knew a lawyer who had some cases, but slightly damp.

Sure He Does!

"Pappy" Archbold, whose name has become a regular part of the "Static", in fact, is blamed by many as the cause of this disturbance, again demonstrated his love for animals.

When he appeared at work covered from head to foot with scratches, his co-workers were at a loss to explain this condition, for "Pappy's" only reply to questioning was, "I don't remember." However, the "grapevine" brings reports that our hero attempted to rescue a terrified cat, stranded on the top of a rose trellis. Neither cat nor roses suffered any injury—only "Pappy" shows signs of wear.

So when folks ask "Does he love animals?" our reply is "sure he does".

Saying of the Week

Jerry Frye remarks "Some women can dish it out—but they can't cook it up."

Art Plus—

The production department "Aesthete Club" held one of their art appreciation meetings, honoring "Gwen" De Weese, at the Culver cottage on Skinner Lake. The evening was spent in the appreciation of finer arts, music, dance, nature and culinary delicacies. A concert of recordings by masters unknown to the author, bearing such titles as "Boogie Woogie", "Beat me, daddy, eight to a bar" and "La Conga" provided the music to which they danced the stately minuet and polka for a while, then as true connoisseurs are wont to do, conducted an open forum on food. Satisfied at last that their gastronomical education had not been neglected, they retired to the lawn in front of the cottage, to muse and discuss the wonders of nature and what makes the wheels go around. Later in the evening they again entered the cottage where an art clinic was held with Helen Kelsey as instructor and Marcella Brachman demonstrating the technique of changing the commonplace into a thing of beauty. From this demonstration George Moses emerged with finger nails tinted a beautiful "tulip red" while Leroy Seitz, as well as the instructor and demonstrator mentioned above, were metamorphozed into radiant beauty by liberal applications of the same polish. With the exception of Virginia Shidler's pantomime of "The boy stood on the burning deck" while adrift in a row boat without oars, and her rescue by "My Hero" Gentis, the evening was spent in lighter forms of amusement. However, at a late (or was it early) hour, the entire group returned home with that ethereal sensation which comes only from sojourning with the higher arts.

Humiliated:

The famous (in a questionable sort of way) seem subject to criticism upon the least occasion. "Old Poison Pen" was humiliated no end when a caustic article, titled "Forgetful Don," appeared in last week's issue of the NEWS. Now every "genius" (?) is a little "wacky" in some way or other and this forgetting trait of mine was one of those things I wanted concealed from you folks. However, it seems "my public" have caught up with me at last and I feel depressed, to say the least. To the author of the above mentioned "gem" (I won't satisfy his vanity by mentioning his name) I extend my hearty congratulations, you too, along with me, are worthy of being classed as a screw-ball, and such talent should not lie dormant, but be drawn forth to broaden and benefit humanity. I regret that my amnesia prevented your name from appearing before the public for one week and I assure you that I will put forth every effort to prevent a recurrence of this mental lapse.

Am I humiliated?

26-5 Office

Another prominent wedding taking place is that of Don Welbaum, of Bldg. 26-5 Drafting, to Mazie Greek, at the Waynedale Methodist Church at 6:30 p.m. Sunday.

Margaret Ryan of the Aircraft Department became a bride last Saturday, September 6, 1941. Monday, upon her return to work, the Aircraft Gang had the scenery set. The whole gang wishes the happy copule the very best of luck.

Ozzie Nahrwold, Aircraft's famous Rod & Gun Master, has bagged a peculiar animal. He claims it's a cross between a red squirrel, fox squirrel and a skunk.

M. J. (Horizontal) Lowe broke 25 straight skeet this week. It is quite evident that Mike is much more proficient at shooting than at diving.

Monday Morning Mike.

Carl Conrad, Bldg. 19-3, is so pleased with his new home that he wants it extra perfect; in fact, he has a night lock on the coal bin.

Bldg. 26-2 has a great unsolved mystery. How did Leonard Harsch break his toe? Could it be he stubbed it on the door stoop?

Al Monas, Bldg. 16-3, is looking forward to a brass band serenade tonight, as he is leaving for "Dear Ole Ohio." All you broken-hearted gals might just as well come on out and join in the fun.

Assistant Cost Supervisor

The appointment of C. E. Slater as assistant supervisor of the General Purpose Fr. H.P. Motor Department is announced by E. C. Reese, supervisor. Mr. Slater became a G. E. employee in 1925 and was assigned to planning and wage rate work in the Fr. H.P. Motor Division. He continued in this work for twelve years and was then transferred to the Cost Department and assigned to special analytical work. A year later he was made supervisor of costs in Bldgs. 4-2 and 4-3 and continued in this work up to the time of his present promotion.

Winter Street News

Ruth English wishes that they would hang a hammer on one of the posts in the parking lot. She had to break her car window twice in two weeks because her car was locked with the keys inside and she just hates to run around looking for a rock.

After Don Vorhees extricated himself from up in the tree where his pals found him, they finally found out how he got up there. He was turtle hunting and he spied a big boy on a rock across the river. He took careful aim and wounded the critter and like all wounded animals, it became mad. It jumped off the rock, looked around and started swimming across the river. Don said he could stand that but when it got on land and started after him, he broke down and beat it. That's how come he was in the tree.

Marge Scollard, the new duplicator girl, is flashing a sparkler. We hope it's serious and soon, as we need a smoke pretty bad.

Ode to "Silent Freddie"

As far as getting news in print,
We're always anxious and ready.
So why don't you come across and
"give",
Ya darned old "frigid Freddie"?

We finally found out what Herm Norr does on his vacations. He practices driving in funerals. This was indubitably demonstrated when he took Harlow Lamminan, Ralph Dennison and John Schwanz on a fishing trip to Michigan. How anybody can take so long to get such a short distance is beyond us. After seeing a sample of Norr's fishing prowess and his very evident lack of interest in oars and anchors, it was decided to draw cards and see who lost so Herm would have a partner. He even left his wrist watch hanging on a nail in the cabin and had to have it mailed back to him. What a man!

Donald Wagner, Bldg. 4-2, was out riding with Bob Ward rather fast on a boulevard when some cops appeared. We don't know if it was cold or stage fright that made Don's teeth rattle. Now he is known as Horace.

Bldg. 4-4

Zella Sheehan is doing her bit for defense. Anyway, she has some fine pictures to prove that she is taking good care of the boys from the Baer Air Base. . . . We were wondering why all the girls looked so sad last Monday, but soon heard of their sad news. Russel Beamer has been a married man since last April. . . . Maxine and Dolores are reducing. They have a new way. They roller skate, then stop at the Hobby House and have three or four sandwiches and a malted milk. . . . Louis Hinen must think a stitch in time saves nine. Anyway he carries his needle and thread on the button on his shirt sleeve. . . . Hilda Scott doesn't mind if she did flag an Inter-State truck instead of a bus. She arrived home O.K. and enjoyed the ride. . . . Chester Rennecke seems to be in favor of helping ladies in distress. He recently loaned Catherine Reehling his trouser belt so she could go to the cafeteria. . . . Fred Kryder (Glamour Boy) does a very good job of sweeping. He sweeps dirt into the dust pan and then throws the dirt on the floor missing the basket entirely. . . . Agnes Campbell, KC winder, is flashing a very beautiful diamond. The date is set for November 9th. Best wishes, Agnes. . . . Two of our girls were recently elected to office in the night girls' bowling league. Sophia Bodigan is vice-president and Marie Louden is publicity chairman. . . . Bonnie Jetmore is still confined to her home by illness. We all miss Bonnie, and wish her a speedy and complete recovery. . . . Mary Brown was so sure the girls on KC winding wouldn't find out her birth date that she passed candy bars. But the girls surprised her by finding out the date and showered her with some very lovely gifts.

Irene Roberts, Bldg. 4-3, was seen riding the Merry-go-round at Trier's Park one night last week. We're glad you enjoyed the ride, Irene.

We all wonder why "Dinty" Moore, Bldg. 4-1, couldn't stop laughing so that he could have his picture taken for the Quarter Century Club. Do you suppose it was the "Little Man" that wasn't there?

Plastic Flashes

Who has been causing Floradella Amstutz to lose the well-known shut eye?

We think Joy's "diamond" the cutest ring we've seen in a long time, don't you, Byron?

What's this we hear about Marie Erickson stepping out with a certain tall, dark, and handsome lad from the country?

We have a new proud father. Joe Lothamer is the one who passed the cigars. Congratulations, Joe.

What gal can't make up her mind to say "I do." One day it's "Maybe", and the next day it's "No". Please, dearie, you're driving us crazy.

It looks as if Dan Hughes' Ohio cousin has gone home. We don't see her around any more.

My! My! It just isn't the same around here with Clarence Favourite vacationing. We sure miss seeing that windblown bob every day.

Jim Fleming is going around with a long face since he can't play the "hosses" any more.

Regardless of good behavior, Mildred Oyer, your name will still get in this column.

Ruth Shoup reports that she spent a very enjoyable vacation in Texas and Mexico, and it is worthwhile to hear the items of interest which she has to relate.

We are all happy to see that Alice Martin has recuperated from her illness and is able to be with us again.

Edna Holbrock is back to work after vacationing and is modeling a new white tissue head dress.

Agnes Ryan journeyed to Niagara Falls, but returned with no results. Too bad, Agnes, better luck next time.

See you again,
THE TILLIES

26-3 Tidbits

Quite a few girls found out what kind of broadcasting voices they had. It's amazing how a little pressure of the thumb brings out the true tone.

The argument between Molly Underwood and Helen Kespoldt still goes on. They just don't like each other's permanents.

Doesn't Delores Ferckel's new hair shade and new fingernails look pretty?

Isn't it wonderful how Betty Busse finds enough energy to go "bike" riding after work? Maybe it's what she eats. Let's watch what she buys from the candy lady.

Those new aprons that button down the back are becoming almost uniform in the preliminary assembly.

If anyone wants to know how the argument is coming on "G" bench—Well, the word is pronounced Ra-bi-ēs.

Eva Thomas and Betty Morman went home Friday exclaiming over the swell time they expected to have over the week end. They returned Monday, one with a broken toe and the other a dislocated knee. Some fun.

Glendola Redding and Helen Ward sure gave their girl friends a workout at Bell's on Saturday night.

We are all wondering what the big attraction is down by Antwerp, Ohio for Elsie Pedersen. Could it be the corn you husked; the horses you drove, or the tall, dark and handsome guys, eh, what!!!

When is somebody else going to have a birthday? We're tired of buying our own dessert.

6-4 Magneto Mumblings

By The Eavesdropper

The "mumbles" of the Magneto lads and lassies for want of WORKS NEWS representation, are growing louder and louder, and woe is your lil' Winchellette if she doesn't answer their demands, pronto. . . . There is indeed very good news this week coming from our "Night Owls", otherwise known as Magneto Second Shift—news of a lovely dinner party which was held at the new "Colonial" restaurant in honor of Bob Fielder and Brock Nolan, who have left to continue their studies at college. This party was such a grand success that plans are now being made by the second shift for many more parties to come. Good luck to you in your enthusiastic endeavors, all you wide-awake people. . . . Well, Johnnie Cox, you went and done did it. You joined the Navy, and started those Magneto Second Shift gals wailing "Oh, Johnny, Oh". But, ah, Johnny, we'll bet they stop their lamentations when they see you in that uniform. . . . Rumor has it that "Beanie" Whitright has a great fear of cafeterias. And it would certainly be fun to tell "all" about his recent cafeteria episode, but have no fear about this. We will save your face, Beanie. . . . It is simply impossible to understand why such a thing could happen to a serious, sensible man like Wilbur W. Stocks. We're speaking, of course, of the incident, or should we say accident, which occurred when he cut his finger on the same hand in which he held a pair of scissors. Bet your pride was hurt worse than your finger, eh Wilbur? . . . Welcome back home to Magnetoland, Oscar Meyers. We've missed you a lot during your recent illness and are glad to see that you are feelin' "tip-top" again. . . . Our most heartfelt sympathies are extended to Patricia Timme and Eunice Turner who are both hospitalized. Here's wishing you well to quick recoveries, Pat and Eunice. . . . And now, dear people, we bid you fond farewell with this little "tale" of a dog. Elmer Auman claims that his prize bird dog has higher ambitions than merely "sniffing" for quail—he'd rather chase bigger game, airplanes.

26-5

Albert Stecker went to Toronto, Canada, on his vacation and visited with Gordon McDougal's brother while there.

Henry Wittber combines business with pleasure on his trips. He spent his vacation through Wisconsin and around the point of Michigan, and on the side he gathered enough tools to equip the apprentices in Bldg. 26-5 and sold them as always with no profit. Every appearance of the tools indicates that they may have come from the approximate area of Maxwell Street in Chicago, where the store displays are not only on the sidewalk but also in the middle of the street.

Gordon McDougal spent a happy week-end on his vacation visiting his mother in Canada. He reports a swell time and all rested up.

Cleon Oyer, Bldg. 4-1, was caught smuggling a new shot gun into his home. To clear himself with the little woman, he put a tag on it, "To Mildred from Cleon." She proudly took the gun and immediately asked him to teach her the fine arts of hunting.

Winners Of The 1941 Softball Crown

Winning 11 out of 12 games the West Side softball team made an easy bid for the Inter-Department League championship. The champions pictured above are, left to right, standing: E. Huth, manager, M. Spade, L. Crowell, A. Bauermeister, R. Sealover and R. Holmes. Kneeling: R. Starkle, F. Sitko, B. Penkul, D. Mertens, G. Diffendorfer and J. Allen. E. Hazelett and W. Miller were not present when the picture was taken. F. Schultz, a strong member of the team, was called to the colors in the middle of the second half.

Slips And Chips

Sir Viss Bldg. 4-4

The man on the flying chair is none other than our beloved Al Schonheinz. Al leaped through the air with the greatest of ease but he didn't land that way. No Al didn't sit down with ease for several days. . . . Herman Lepper wandered around the parking lot the other night trying to locate his car. Herman parked in a spot closer to the gate intending to save a few steps and time. When he was leaving for home, he forgot his savings project. . . . While Augustave Weisenburger (Gus to us) was vacationing in Chicago, the bull broke out of the rodeo. He hasn't confessed, but the bull was out to see Gus. . . . Louis Guissinger (Uncle Louis) en route home, on his bicycle, stopped for a red light. As a car pulled up behind, Louie felt a sharp pain in his back, like something had been thrown at him. He turned to the driver of the car and proceeded to tell him off for throwing things at people. The argument was accelerating nicely when Louie discovered that the rubber band he had stretched on the bicycle seat had deteriorated and broke. Do you suppose this incident is the reason Louis is trying to purchase a farm? Or is it to raise frogs and goats for his son and daughter? . . . Did you know Chris Delagrange raises moon chickens? Well, he must because he was telling me that the position of the moon makes a world of difference in his chickens. . . . Max Shaw has his mind turned to the teaching profession. Yes, Max would like to teach welding. All those interested in the finer arts of welding, see Maxie for details. . . . Douglas, our Blessing, donned the goat horns the other day and drove Gee home for his badge. Gee's alibi is that he placed the button on the right shirt but put on the wrong one. . . . There is nothing quite so refreshing as a shower to close the day's work. So says Edison Martin to himself as he arrived home. He proceeded to disrobe and take his shower but the water didn't feel just right to his feet. He looked down to find his socks were still on.

Sunbeams From 17-4

Ah me, now that summer is over there are some things we are going to miss, one is the constant rush on the drinking fountain and Claude Bireley's fish tales.

The other day we thought that Irma Frosch was doing a limbering-up exercise, with her hands but we were wrong, she was trying to get us to notice her new diamond. Well congratulations Irma.

Bea Drummond doesn't like to eat raw eggs; she just likes to squeeze them in her hand for the amusement of Wayne Worman, and that's when a joke proved to be not a joke.

The three little boys who had their picture in the paper some days ago have nothing on Muriel Wetzel for that sad, sad look; her boy friend, too, has gone back to school.

Thought for the week: In this whirl-pool of life, if you don't keep swimming you soon find yourself going under, so keep paddling even if your strokes are a bit weak.

Granny.

Everyone wonders why Ellen Heidbrink, Bldg. 4-1 Office, wears such a long face these days. You would too if your boy friend joined the air corps for two years.

In Memoriam

Employees on the east side of Broadway will note the absence of a venerable land-mark, namely Jerry Simpson's Model T Packard. In its place stands a shiny new Packard. The old Model T has had so many replacements and amputations that the name plate alone identified the original model. Jerry not only sold the old car, but he had enough parts left to provide a happy week-end for the junk man. Bets are even that Jerry starts tearing the new car down before the first thousand miles.

Borings From 4-4 Office

I bet you are all wondering what is happening to Mike O'Grady—Clarence for short. Well it seems to me that Mike was leaning back on his chair (he still has it, too) and six springs flew from under the seat. Down went Mike with a bang. He came up and was redder than Heinz' Tomato Catsup. "Everything happens to me" says Mike. . . . Have you tried W. & D.'s new escalator? Well, if you haven't had a chance to try 'em just consult Art Wedler and Mike Brayer. Gee, were they ever having fun during their lunch hour the other day. The fact of the matter was, they were almost late for work. I'm glad I'm over that kiddish stage. . . . Introducing to you at this time our new members of our great big happy family. Henrietta Hectowriter, Bertha Burroughs, Cora Comptometer and Ulyssis Underwood. How's that for an addition to the family in one week. . . . This week from my far fleeing fans in Gary, Angie, Chuck and Butch, Jr., we hear that they still get the WORKS NEWS and enjoy it very much. Too bad Angie isn't here now. She would really get a pleasant surprise. Keep writing, Gary. . . . Ife Holmes got on the elevator the other day intending to get off on Bldg. 4-5. However, he was so engrossed in overhearing a spicy conversation that he forgot to get off. . . . Ralph Fishback treated the whole office to peaches the other day. One of the girls—not mentioning any names—asked him, "What's wrong with them." Nothing if you ask me, they were very good. Now perhaps we can talk Nate Porter into bringing us some pears or apples. . . . I have a correction to make. Jack Dunifon brings bugs and not bags from Denton Faye Manecke to the girls in our office. Well. enough is said for awhile. I remain, sincerely as ever,

Elmer, The Field Mouse,

Wayne Cook, Bldg. 4-2, is going into the hog business. He has a good start of eight pigs.

Shorts From 6-B

Laura Haiflich, Bldg. 6-B Elex contact girl missed one good prospect in her canvass for new members. Here it is Laura, Albertus F. Brown. At least that's the way his mail is addressed. . . . "It really happened". Ruth Jimmerson. "What job have you got now, Lynn?" Lynn Crawford, "Oh, I have an important job now, I'm taking Smith's and Putt's place while they're on vacation." Ruth, "Isn't that an awful lot of work for one man to be doing? . . . Clarendon Blanchard found a sure-fire method to avoid slipping in the japan room. He applied glue to the bottom of his shoes and walked through the sand blast room. The funny thing is Leo Heersche, co-inventor of the idea, doesn't think much of it for his new shoes. . . . If Ruth (Lefty) Franzdorf hasn't found a second hand southpaw bowling ball by this time it isn't the fault of Layton High. . . . Ed Arthur has a fixed opinion of Bill Walt's fishing ability. But Bill finally proved something or other by leaving a dozen fish heads and tails on Ed's front porch. Ed says he still isn't convinced they were large enough to keep. We suggest Bill show Ed the pole he caught them with. . . . Robert Dammeier leaves next week for Uncle Sam's service. From the volume of Bob's voice, we feel it won't be long until he's one of those hard-boiled top kicks. Best of luck from the gang, Bob. . . . Did we tell you how we appreciated the cigars from Bill Tracey? Yes, it was a boy and Bill didn't even lose a day. Those truck drivers are made of stern stuff. . . . Since Robert Gruber took unto himself a bride, and is she pretty, he's taking this draft business awfully serious. It seems the announcement with accompanying picture of the bride has made some of the board members jealous. Anyway Bob received his questionnaire too soon afterward to make him believe it was a coincidence. . . . The gang in Bldg. 6-B miss Veora Rider Habig very much. This WORKS NEWS reporting looks easy when you read it, but it's not so easy to write, or am I getting old?

19-4 Nibbins

Dorothy Shipman, Bldg. 19-4, is next in line for a sparkler. Tell him to hurry, Dorothy, 'cause he's keeping us in suspense.

Louise Sinn was pretty sure that she was going to be the first to ride on W&D's new escalators. But here it's been over a week now and we've all been on them but Louise. Even Sarah Moore thinks it's a lot of fun.

There was a barnyard serenade in Bldg. 19-4 last Thursday afternoon. Marceline Girardot certainly had us fooled as to whether there was a rooster around or not.

We want to congratulate Mr. and Mrs. Ezra Klopenstein on the birth of a baby girl which came as a surprise to Ethel Klopenstein's former co-workers in Bldg. 19-4.

Hope you all noticed the shine on Mardo Tobias's new car. After the whole community spending all Saturday morning washing and polishing it, someone had the nerve to blow dust on it and Mart had to call on help to hold flashlights while he gave it another bath about 10 o'clock Saturday night.

Congratulations to Miles Cameron, Bldg. 4-6. He is the proud father of a baby girl, Carol Ellen.

PUBLIC FORT WAYNE ALLEN CO. IND.

News Around

Sleuthing In 4-6

Sights worth seeing at the picnic at Charlie Yager's farm last Saturday: Ralph Kaeck trying to jump the rope. Result: One dusty Ralph. John Kapsanis showing up all the girls in the rope jumping contest. And he was really good! Charles Kable putting sugar in his coffee—er—I mean putting sugar in his mouth and pouring the coffee in afterward. He said it was good. R. Kirby winning a rabbit in the trapshooting contest. Virginia Selby sporting a new slack suit for the occasion. Cute, too! Jack Cochran pushing all the little kids on the big swing in the barn. "Da-Dee" Dwight Willits consoling little Stevie who decided he didn't like the evening's entertainment. . . . Geraldine Grim displaying her cake "I baked with my own little hands". . . . Toby Tyler generously offered to take charge of all children at the picnic last Saturday—10c for all under eighteen, and no charge for those past that age. But we fear that the job proved to be just too much for him, since he failed to come to work on Monday morning. . . . Why did Dot Mueller bring home twirl combs from New York to all the girls in the office? Did she really think they needed one, or was it just that N. Y. label? Well, anyhow, they are quite convenient, Dorothy. . . . Harry Zehender would be very grateful if one of our Bldg. 4-6 inventors would devise some kind of a telephone receiver "Holder-upper." He says that if he continues to receive so many long-winded telephone calls, he will soon be a cripple for life.

If the government drafted women,
To help with army chores;
They'd get one gal up in 4-6
Who'd win a dozen wars.

Be it infantry or aircraft,
It doesn't matter what;
For anything that's in her way
Is really gonna be shot.

I was watching her the other day,
I thought I'd nearly die,
To see her pounce upon and smack
A tiny little fly.

The little fly was grazing
Upon an office desk;
When sighted by this certain gal
Who thought it was a pest.

Quick as a flash she reached right down
And came up with a rubber band,
Sighted the fly and drew a head
In that one quick stroke of the hand.

Before I could say anything
I heard an awful "smack";
And there on the desk lay a tiny fly
Stopped right dead in its track.

The army sure could use this gal,
With the "Annie Oakley" eye;
A war wouldn't last so very long
For the foe would only die.

And when at last the war would end
There'd be medals of gold upon 'er;
I'm speaking of no other gal
Than "One Shot" Katie O'Connor.

Mark Staker threatened to take our new desk chair back if we didn't write a column this week. And what would be more fitting than recounting the little tale about Mark and the Better Half taking Ray Hammond, Bldg. 4-5, and Jinny McCormick, Bldg. 6-4, to Lake James to spend a pleasant evening and ending up in Michigan because he turned left instead of right. . . . Maurice Petgen is a proud grandpappy these days because his healthy young granddaughter has been appearing in picture form in the newspapers recently as evidence that healthy babies drink that certain brand of beauty winning milk. . . . Departing for portals of higher learning these past two weeks are Katherine Stogdill, Almeda Cox, Edna Litzenburg, Atheleen Bandelier, Rodney Stair and Gaylord Staller. We'll also be saying goodbye and good luck to Edna Tarr who will take over the duties of home-making from now on. . . . We just saw a bee-oo-tiful blush on a nice young man, name o' Dick Ninde. It's refreshing to see such modesty—uh-huh. . . . Comes the season of weiner bakes and falling leaves, new fall clothes and happy hunting seasons, and the best hunting story of all is told about Herbie Landstoffer, Bldg. 4-5, who went squirrel hunting and shot a coon. Still innocent of any mistake he had made in shooting our furred friend, he got into a heated argument with an irate farmer over the identity of the animal. It took a lot of persuasion to make Herbie agree that his first catch was a coon and not a squirrel. . . . Johnny Breese is having a private feud with those little winged insects called millers. Annual G-E Club Golf Tournament

Upper left: Carl Reynolds taking down the bad news. Upper center: Mark Hennigh in a bad lie with Bud Pierson sympathizing. Upper right: Johnson and Elder shaking hands with opponents Harvey and Townsend before the match. Lower left: Noble, Bartling and Edgar viewing the alien's drive. Lower center: Elder biting his putter on account of a missed putt. Lower right: at the first tee.

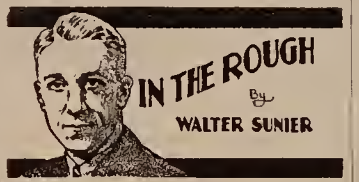
To All Members Of The G-E Club

The Entertainment Committee requests your help in obtaining ideas for the type of entertainment to be offered at the Club for the coming season.

Several members have suggested "Name" Bands for dances and a return engagement of the Schnickelfritz Band.

Make your suggestions and send them to the Chairman of the Entertainment Committee, Bldg. 23.

R. W. KENT,
Publicity Chairman.



Although the President has sought no shooting war, the G-E golfers shot in earnest last Saturday. Rightly so, because the President also said that vessels enter American defensive waters at their own risks and the golfers in patriotic style started shooting at the vessels in the greens.

Saturday was a grand day for the annual blind bogey and it started at 7:30 before the dew was off the greens with all the usual wrangling in individual matches about who would get strokes and how many and why. It ended when Phil Tilford finished in the deep dusk.

Many new faces were seen and we learned about quite a few new golfers. They have come into the plant so fast that we can't keep track of them.

Among the better scores, Bill Wickliffe had an 82, Al Doan a 74, Cliff Leegard a 78, E. Becker an 83, Tom Gouty a 79 and G. Imel an 82. As usual there was Hanna 79, Gitter 79, Adams 76, Holmes 79, Hamilton 74 and Bob Link 80.

The following merchandise prizes were won:

$5.00—H. Spahr, N. Wolf, R. Blee, C. Moffatt, J. Waldschmidt, and L. Wightman.

$4.00—L. Funk, E. Becker, R. Smith, R. Elder, R. Kent, R. Barnett.

$3.00—M. Tobias, C. Lallow, R. White, L. Bergevin, C. Allen, C. Stonehill.

$2.00—L. Wallace, A. Doan, E. Waldschmidt, A. Lee, D. Hanson, D. Weidman.

Brice Hamilton and Al Doan tied at 74 for the $3.00 low score prize. Free golf lessons go to D. Slater and C. Long for the highest scores.

The cash bogey which is operated as a separate event with the players donating 25 cents each has proved more popular each year. This year there were 153 chances sold. Brice Hamilton won the first prize cut of 40 per cent which amounted to $13.80. D. Hanson won the 30 per cent cut totalling $10.35; L. Shattuck the 20 per cent cut totalling $6.90; and R. White the 10 per cent cut totalling $3.45.

Skevington, Reynolds, Hanna, Lallow, Saaf and Sunier assisted during the day in handling the entries.

Bland Wins Annual Rod-Gun Club Match

With a high score of 279 on the rifle course and 275 in the pistol division, L. Bland took first place in both events. A record number of shooters participated on the opening day despite the rainy weather.

Second place in the rifle shoot was tied by E. Pion and R. Neale with scores of 264. In view of the high score shot by both men it has been decided to give duplicate awards. The surprise event of the day was Virginia Rummels score of 256 in the pistol match, which gained her second place. Actual awarding of prizes will be made in the near future.

Club members are asked to shoot the qualification course as soon as possible inasmuch as the outdoor range will be closed in the near future.

NOTICE

Industrial basketball practice will begin next Wednesday and Thursday evenings, September 24 and 25 at 7:30 P.M. at the G-E Club.

ON - - the Alleys

The Office League started its 15th season with some fairly good scores being posted for the first night.

Ed Waldschmidt, a deserter from the Blueprint Outfit, turned in a 606 count with the Payroll team, which incidentally returned to the League after a two year's absence.

The 200 class bowlers included Baird 205, Johnson 216, Kent 209 and Perry 208.

Ask J. L. F. who bowled 181-125-100. (No reference to any person, understand.)

Some of the boys who hadn't opened their lockers since last spring were very surprised when their equipment looked like something that one of those Texas dust storms had passed over.

A good investment for somebody lies in an insurance policy on any of the following three fellows, Berning, Bushong and Mentzer. The way they were after each other Monday night, after next week I'll probably have an obituary for one of them.

Elex Bowlers To Form New League

The Elex Club announces the formation of a new bowling league for girls completing work before 3:45 p. m. The league will bowl on Wednesdays from 3:45 p. m. until 6:00 p. m. with the first match scheduled for Wednesday, September 24. Wilda Click is president and Marge Ponsot, secretary. All girls interested in joining the league are asked to register by next Monday.

The Club now has four leagues with the remaining three bowling on Monday and Friday evenings and on Wednesday afternoons.

Insurance Premiums Are Suspended

Collections For Nine Months Only In 1941

No Deductions To Be Made For The Months Of October, November And December

Nearly 75,000 General Electric employees this year will enjoy a full 12 months' protection under terms of the free and additional group life insurance plans and have to pay contributions for only nine months, it was announced this week by the secretary of the company.

NOTICE

Insurance deductions made from pay vouchers distributed today will be refunded to employees with next week's pay. Deductions had already been completed before official notice of the suspension of premiums was made. The suspension of premiums effects coverage in force prior to January 1, 1941.

E. F. Waldschmidt,
Paymaster

This is possible, despite estimated death benefits for the year of $850,000 because of continuing favorable claim experience. The benefits paid under the free insurance will amount to an additional estimated $400,000. The suspension of three months' premium for all insured employees represents a saving to them of $300,000.

The low net cost of the insurance under the favorable contract which the company has with the Metropolitan Life Insurance Company is shown by the fact that a man with dependents in the age group from 31 to 40 inclusive who has $2,000 additional insurance will actually receive a combined coverage of $3,500 under the free and additional plan at a net cost of $13.50, or at the rate of $4.00 per thousand. It is the group of men with dependent families which probably has the greatest need for the term insurance provided under the plan.

Elex Is Host To Three Hundred Baer Field Men

(Pictures on Page 4)

Approximately three hundred service men from Baer Field attended the dance given by the Elex Club last Tuesday night in connection with the club's campaign party. It appears from the above photograph that Toni Kennedy, Bldg. 4-6, has enlisted a few of the boys to root for her favorite candidate for Elex secretary.

Many Defense Items By Electrical Industry

E. O. Shreve, Vice-President In Charge Of Sale, Outlines Important Position In Program Maintained By Industry

No defense program or active prosecution of war would be possible today without a very substantial contribution by the electrical industry, E. O. Shreve, president of the National Electrical Manufacturers Association, declared in an address.

Speaking to the Essex Electrical League, Mr. Shreve, who is vice president in charge of sales for General Electric, said that not only must the electrical industry drive the machinery to produce the defense equipment, but it also has to operate the equipment in the field.

"Up to the present time, activities of the electrical industry have been in the preparation stage only," said Mr. Shreve. "We are not yet in full production."

"I believe the electrical manufacturing industry is handling a greater diversity of lines of material than any other industry in the country," he pointed out. "Out of approximately 26 billion dollars of contracts which have been placed for direct national defense material, about two billion dollars of these contracts have been assigned to the electrical industry; and including in-

Credit Union Will Hold Benefit Party

A benefit party, to which all G-E employees and their friends are invited, will be held by the Credit Union at the G-E Club on Friday evening, October 10. A portion of the funds derived from the party will be allocated to the Filene Memorial, to be erected in honor of E. A. Filene, founder of the Credit Union plan.

The committee in charge includes Charles Winans, Belle Buchan, Irene Meyers, Lee Cupp, Art Brockmeyer and Leo Wallace. The personnel of the Membership Relations Committee will also serve.

Announcement Of Candidates By Decatur Gecode

Annual Club Conference To Be Held In Fort Wayne On October 4

Announcement of candidates for the offices of the Decatur Works Gecode Club were made this week by the nominating committee. The presidential candidates are Dorothy Ray, Mary Miller and Anne Murtaugh. The candidate receiving the second largest number of votes automatically becomes the club's vice-president. The nominees for secretary and treasurer are Etta Anspaugh, Esther Fisher and Eileen Bowman.

October 4 has been announced by Dolly Schladenhauffen, president, as the date for the annual conference. The conference is to be held at the Keenan Hotel and in addition to planning this year's program the board of directors will be appointed.

The Club program, similar to that of the Elex Club offers a variety of activities for women employees of the Decatur Works. Parties are held each month in addition to picnics and outings during the summer.

Morrill To West Coast On Defense Assignment

Wayne J. Morrill, designing engineer of the Fractional Horsepower Motor Engineering Department is on the west coast where he is collaborating with several airplane manufacturers on the design and application of fractional horsepower motors used for driving several types of auxiliary equipment.

Mr. Morrill's trip, made by plane is the second within the past few weeks.

Heights Of Clouds Measured In Daylight With Mercury Lamp

A tiny, 1000-watt mercury lamp developed by General Electric for searchlight and television studios has been used to solve a vital problem of aviation—the daylight measurement of the height from the ground of clouds.

Maurice K. Laufer and Laurence K. Foskett of the National Bureau of Standards discovered that by projecting the light from one of the high intensity water-cooled quartz mercury lamps, and noting with a photo-electric eye the "splatter" of the light where it hits the cloud, that the altitude can be calculated by triangulation.

"During the daytime," they explain in the Journal of Research

• Imps Of Industry

Ages and ages ago, Samuel Q. Strongarm, general foreman in the shop of Stone Hatchets, Inc., makers of custom built stone carving tools for cavemen of the day, paused a moment in his daily tour of inspection. Before him, squatted at his workbench in the dim light of early dawn, sat John B. Rock, expert fashioner of the latest in stone hatchets. John B. was busily pounding away with the tools of his trade, laboriously banging off chunks of material from a hefty sized piece of selected granite.

"Hold!" cried Foreman Strongarm to John B., "you are wasting precious stuff that way, why didn't you get a smaller piece to start with? Why, that hunk of stone you're working on would make two hatchets. With the price of raw stone up three clamshells over last week, we just can't afford to waste any. How come?

Now John B. was a skilled craftsman. No one could whittle out a stone hatchet with any more skill than he. And he resented the comments of his foreman. Quoth John B. "Well, that's the stuff they gave me to work with and here's the pattern I got with it. I figured the guys know what they want. They didn't ask me any questions."

Samuel Q. Strongarm halted at that one. He pondered the situation well and then he went to his boss and told him all about it. Right then and there commenced the greatest battle the world has ever seen . . . the continuing fight against two of the most evil characters of all industry—Waste and Spoilage. These two . . . Imps of industry are doing their stuff again right now with appalling vigor. We must bend every effort to eliminate them from the scene. **Our** war fronts are right on our machine tables and our desk tops.

Out with the Imps of Industry!-!

• Fire When Ready

Naval tradition had a lot to do with Erie Works winning the Navy "E" award. Erie is a cradle of American naval tradition. Erie gave Commodore Perry to the world. On the windswept shores of Lake Erie 128 years ago, Perry and his valiant crew built the fleet which won America an epic naval victory. Who will ever forget Perry's stirring, one sentence account of that engagement "We have met the enemy and they are ours!"

Erie also was the home port of the U.S.S. Michigan, first iron clad of the Navy with plate borne by ox-cart from Pittsburgh 100 miles away. In Erie also is the grave of Gridley, famed naval officer of the Spanish-American war, who responded to Admiral Dewey's command at Manila Bay "You may fire when ready, Gridley."

In Erie last Friday, Chester H. Lang, himself an Erie native brought out all these facts in his talk as chairman of the Company's defense Advisory Committee. He directed his closing remarks at Rear Admiral W. H. P. Blandy as follows: "So with this inspiring naval tradition that is Erie's and in your behalf, my General Electric associates, I now say we commit ourselves to what it takes so that "YOU MAY FIRE WHEN READY, BLANDY!"

NEWS FROM THE CAMPS

We publish herewith with great pleasure extracts of letters sent to us by G-E employees now in government service. Ad-

Dear Editor:

Sure glad to receive the WORKS NEWS. This helps a lot in keeping up with the news at the plant.

I went to Los Angeles and Long Beach over Labor Day. I enjoyed seeing Long Beach very much and know now why they call this the "Queen of the Beaches." I also saw Signal Hill, the famous oil center of California. I never saw so many oil wells in such a small area. Last Thursday night we went on a overnight hike with our radio sets. We set up in the field and started our work with the 195 (this is the radio telephone), a fairly easy set to work sometimes. There were four of us on the set working from 10 P. M. to 4 A. M. Friday on two-hour shifts. It was sure hard to sleep on the ground.

We are winding up our radio work here next week, then being transferred to our permanent post. I can take code eight words a minute now but hope to get it faster later. We go on a fifteen mile hike tomorrow so I will be plenty tired tomorrow night as I also had K. P. today. The 28-year-old fellows are sure glad they are getting out. They are doing fatigue duty until they leave now. The 13-week training has gone fast but my 2½ years is a long time and I hope it will go faster as I would like to get back to the General Electric and my friends, as I miss them a lot. I appreciate the chance I have in this radio work as it is a lot easier than the Regular Infantry, I understand. I sure miss playing in the Club Band with Perry and the boys. I intend to join the Infantry Band at my permanent post if I don't pass this radio work.

Well, I will sign off, so until next time, I remain

Pvt. Richard Hoopingarner,
Co. B, 87th,
Camp Roberts, Calif.

P. S. Edgar Bergen and Rita Hayworth were here at our ampitheater last Sunday and gave a good show for us.

Dear Editor:

Many thanks for a copy of the WORKS NEWS. I appreciate it and so do the fellows in the Maintenance Section, as several have friends and members of the family working in the Company.

I haven't forgotten the G-E as I have a daily reminder of the fact in my present company, which is the Service Company, 152 Infantry, 38th Division, Camp Shelby, Mississippi.

For instance my company commander is Captain Brown of Bldg. 9, Power House. Also in the Service Company is Master Sergeant Carr of Bldg. 2-1, Private Brady Evans, Bldg. 6-3, Lieutenant Neuman, Bldg. 4-2 and Private Ternet, of Bldg. 26-3.

At present I am working in the Parts Room in the Maintenance Section. My job is to issue new parts and special tools to the mechanics.

On maneuvers, the Parts Room is located on a 4x4 Chev. truck.

How do I like maneuvers? Oh! for a feather bed and a bath.

Again, many thanks for the WORKS NEWS.

Yours truly,
Private Dan Bishop
Service Company,
152 Infantry,
A. P. O. 38th Division.

P. S. As far as I know the battle going on at present is a see-saw affair. The Maintenance Section travels with the Kitchen Train so I'm located behind the lines. Aeroplanes fly over at all times and yesterday we saw our first dog-fight. We have been waiting since 9 o'clock this morning to move, it is now 3:00 P. M.

Dear Editor:

I have been enjoying the General Electric News very much. I have been thinking about writing to you and thanking you for sending me the G-E News for some time, but down here we are pretty busy and now am going to take time. I started once before but just about had one line finished and the top sergeant said get ready to pull out. I really appreciate it even if I haven't written you before.

Right now the company I am in it out in the fight. Big maneuvers are now on and I am back with the Rear Echelon. I have not yet learned how to spell that Enchelon but I guess that is near enough. Anyway that is where the headquarters, such as company clerk, makes his stand. The reason I am back here is because the chiggers (Red Bugs) and mosquitoes have been arguing to see which one will take the next bite of me. They think my ankles and feet are very tasty. Also something else that bothers me is Swamp Fever. That is something like prickly heat, only this bothers you all the time. It just makes you want to pick out the nearest tree and get out and rub like a pig against a fence. Will be very glad to get back to Camp Shelby so we can see some civilized life again, at least once in awhile.

I don't know if the boys get their mail when they are out on the line or not but we get our mail here in the Rear Echelon every night and you can be sure that none of our mail is overlooked. That is one thing that the soldier boy likes and plenty of it.

I have a very nice bed here in the tent. It is a pretty large tent and we have all the barracks bags of the company placed in this tent. In these bags a soldier has all his clothes and that is what I have for my bed. It is pretty soft except when I lay on a tin helmet. They are pretty hard and a guy just adjusts his head so it is comfortable.

Decatur Appointee

George Laurent

E. W. Lankenau, Superintendent of the Decatur Works, announces the addition of George Laurent to his staff. Mr. Laurent will correlate all employee activities of the Decatur Works, and employee relation activities covering safety, the investigation of accidents and general employees welfare. The employees' store will also be handled by Mr. Laurent and a complete stock of all G-E Products will be handled for the convenience of employees. For the past few weeks he has been in Fort Wayne taking a short training course.

Mr. Laurent has been employed in the Inspection department prior to his present appointment.

Surface Just Being Scratched

SCRAP PLEADS ITS CASE IN THE LAND OF MAKE BELIEVE

If Scrap and Material in Process lived in a land of make believe and enjoyed our American heritage of life, liberty and pursuit of happiness, many strange happenings would be going on, many atrocities would come to light.

First no doubt a hospital would be set up for Scrap to dress their wounds and alleviate their suffering. They would have to build buildings, equip them with medical equipment such as vises, files and the like, and staff these buildings with skilled mechanics and technicians to diagnose and treat Scrap's bleeding body. The bodily sound Material in Process would have to be taxed heavily to provide these facilities for Scrap. Material in Process would not like this but it would seem the only humane thing to do.

In spite of the taxes and the care, Scrap's mortality rate would be high. Many of Scrap's wounds would be far too serious and no amount of tender care could save him from sinking into Scrap oblivion. Proper obsequies for Scrap would entail further expense and taxes on Material in Process.

With so many of their make believe community diseases and broken, many of the supposedly well members of Material in Process would be found ailing, most of them from a malady called Complaint, and further expense would be heaped upon able bodied Material to hospitalize these cases.

This unhappy make believe community would soon look around to see why they were in such unfortunate circumstances. In order to bring order out of chaos, they would formulate laws and set a just judge on the bench to obtain justice for their maltreatment.

Then it would be that each piece of Scrap had his day in court to tell of the wrongs that had been inflicted upon him.

First on the stand would be Draftsman. Scrap charged Draftsman as responsible for his deformities. Draftsman would be quickly consigned to the hoosegow.

Next defendants—Tool Dept., Production Supervisor, Dispatcher. Whole batch of initial production Scrap would charge that last minute mad rush to meet 3 weeks overdue shipment battered their bodies into unrecognizable form. Dispatcher blamed Production Supervisor, Production Supervisor blamed late tools. Verdict, guilty on counts of Procrastination and Buck Passing.

Planner and Management would be called to the stand by mutilated Scrap who charged poor methods. Planner claimed poor methods were due to lack of suitable equipment. Management contended Planner did not ask for equipment loudly enough. Both would be given a respite in the hoosegow.

The case against Engineer involved the full technical ability of the Court but the prosecution succeeded in proving Scrap had too many turns to run fast enough to keep out of harm's way and Engineer joined his mates in safe keeping.

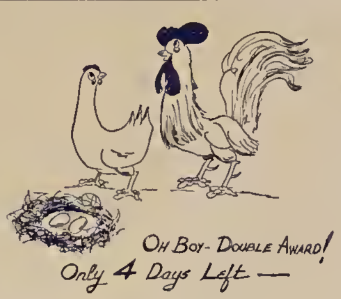
Foreman, workman and Inspector would be hauled into court for malpractice at the inception of Scrap's illness. It was shown that a minor injury in Scrap's youngest days went untreated and uninspected and resulted in complete disability when Scrap became a grown up motor. Another triple killing for the judge.

By the time every piece of scrap had had his say, there would be no more workmen, no more inspectors, no more draftsmen, foremen, engineers, nobody at all to take care of Material in Process. The sage judge would see that this was a bad condition and would release them all on probation with this lecture.

"Every piece of Scrap that has come into this court has convicted some one of you on one or more counts. In not one single case has Scrap himself been at fault. Somebody was careless, many of you did not use your eyes and your good judgment. I do not believe any of you have willfully committed the crimes of which you stand convicted but the results of your careless and unthinking acts have created havoc in this make believe land of materials and to a great degree are nullifying your best efforts in your land of human beings at a time in your history when you can least afford to waste your efforts or our materials.

Go now, mend your ways that your human world and our world of materials may both be better places in which to live."

L. F. Hemphill.
Series & Spec. Motor Engineer.



Oh Boy- Double Award!
Only 4 Days Left —

FOLLOW
THE WORKS NEWS
FOR
DOUBLE AWARD
SUGGESTION
NEWS

Waste And Spoilage Must Continue Downward. Substitution, Yes, But G-E Quality Must Be Better

Commencement in its true meaning is what we expect with this final issue of the series of supplements to our Works News "All Out For Defense." Each week the absolute necessity for all out efforts to follow the slogans, MAINTAIN QUALITY, REDUCE SPOILAGE AND CONSERVE MATERIALS have become more real.

The issues of "All Out For Defense" have suggested many methods by which we can all contribute much towards carrying out each slogan. Having received many constructive thoughts from our fellow employees for the improvement of quality and conservation of material, we should make this the commencement of continued effort in every department to obtain a new, high material utilization and greatly reduce percentage of spoilage.

We should recognize the advantages of knowing our job and what it means to the new employee working close to us when we give him the help he needs to avoid the pitfalls of poor quality and spoilage.

The answer "It can't be had and we don't know when we will have it," as well as the material substitution being made, show us the need for conservation of materials. Many experienced set-up men and operators are finding means to reduce waste as they check the raw material they handle in process. The shortage of material is emphasized more and more each day as we hear of one manufacturing concern or another being shut down for lack of materials and we must save our material so it won't happen to some of our departments.

The slogan of the old-timer "Do it right the first time" when thought through adds a bit of care to our moves and motions in order that we finish our part with General Electric quality standards. An eagle eye that catches mistakes quickly, yes our own or that of some other employee, will develop a lot of personal pride in the contributions we can make in the much demanded material conservation.

Increased numbers have taken advantage of the opportunity for personal benefit in the double awards for suggestions by being elert to causes for wasteful use of material and spoilage.

Today it is more than opportunity, it becomes our individual responsibility to reduce spoilage or waste of material so badly needed both for defense and maintaining our high American Standards of living. We can no longer drop the issue and "let George do it." We must see that no material is scrapped or wasted until every means of economical salvage has been exhausted.

So let's put the thousands of shoulders we have in the Fort Wayne Works to the task and meet our defense demands with better quality, with less material and spoilage.

Transformer Division Will Maintain Quality

HELP AMERICA

Paulene Baker
Bldg. 26-2.

Pauline Baker

National Defense the new title for the preservation of the American way of living.

Everyday we are constantly reminded by radio, billboards, etc., that we must do our part to help. Financially we can help by buying United States Savings Bonds. The men in the Army help by giving their jobs so they can help prepare America for any emergency that might arise.

The least we can do is furnish them with good products, products that we are sure they can rely on. By doing our part we can help give General Electric products a quality rating that can be depended upon.

Rework is a great bottle-neck in any organization. Let's work together to get rid of those blue tags we see on some of our units. It takes longer to explain why we did it wrong than it takes to do it right. Let's do it right the first time.

Let's all be pushers and help with National Defense by giving our job all our best efforts each and every day. The "National Defense" we see printed on our folders means exactly that.

"Let's help General Electric, help America."

HE EXPECTS IT

By Helen Wagner
(Bldg. 26-3, 2nd Shift)

Helen Wagner

Regardless of where . . . or in what department we work it is important to remember that our jobs and our pay checks depend upon someone buying and paying for a high Quality General Electric product.

We have all learned to respect the high Quality of General Electric products and everyone that buys them has been educated to *expect* the highest Quality in workmanship and performance. By maintaining quality in our work we are maintaining our jobs.

Which all comes down to this: As long as we conserve material, as we know we should, and do our part to build products to please our customers we can be sure of continuing to work and profiting by it.

TAKE TROUBLE TO PREVENT TROUBLE

Many Defense Items

(Continued from Page 1)

direct defense this figure would be between four and five billion dollars."

Mr. Shreve said these products include guns, shells, naval gun mounts and projectile hoists, electric drives for submarines, turbines for ship propulsion, reduction gears through which turbines are connected to propeller shafts of naval vessels, electric and hydraulic devices for naval guns and searchlights, anti-aircraft searchlights of 800 million candlepower, radio transmitting and receiving apparatus, turbosuperchargers which permit airplanes to operate efficiently at high altitudes, propeller pitch control devices, aircraft instruments, as well as motors, control switchgear, and wire and cable.

The electrical manufacturing industry has co-operated in many ways through N.E.M.A. with various departments of the government, according to Mr. Shreve. As an example of this co-operation, he mentioned the national defense specifications for various lines of products.

"The National Electrical Manufacturers Association has endeavored to distribute information on electrical materials required for construction of cantonments and camps," he said. "The association has co-operated in setting up an electrical industry advisory committee and has also assisted the Office of Production Management in creating the electric product advisory committees."

Mr. Shreve declared that the electrical contracting industry is making its contribution through the handling of electrical installations for all of the new army camps, aviation training stations, munitions plants, and the millions of square feet of new floor space being added by the electrical industry to produce the necessary defense equipment.

He also praised the electrical jobber because, as Mr. Shreve said, "he has performed and is performing a vital and necessary function in his ability to gather unrelated lines —thus relieving the governmental departments from having to do that kind of work."

Commenting on the defense housing program, the N.E.M.A. president said:

"A very closely associated part of the defense activity is the construction of thousands of new homes, to which a contribution must be made by every part of the electrical industry. The estimated minimum need for the period July 1, 1941, through June 30, 1942, will be 625,000 residential units, according to C. F. Palmer, Defense Housing Co-ordinator, writing in the American Builder of July, 1941."

The utilities have responded magnificently, Mr. Shreve pointed out.

"In the 18 months from January 1, 1940, to June 30, 1941 orders were placed for new generating units totalling 6,361,000 kilowatts," he said. "The total steam-turbine generating capacity of the central station industry in the United States at the end of 1940 was approximately 29,000,000 kilowatts; and the total generating capacity for that period was 41,638,000 kilowatts. The Federal Power Commission estimates that throught 1946 there will be installed an additional 9,000,000 kilowatts of steam-turbine generators."

Mr. Shreve asserted that the contribution of the electrical industry has been wonderful and there can be no doubt that the spirit and the will to do have been great.

"I am confident that the industry will continue to respond in a magnificent way, and we must get the deep conviction that this is a very serious world emergency. We must be successful in preserving our American way of life," concluded Mr. Shreve.

Baer Field Service Men Trip The Light Fantastic

Below: A corner of the dance floor at the G-E Club during the dance sponsored by the Elex Club with three hundred service men from the Baer Field as guests. The guests demonstrated that army training sure develops energy for most of the guests stayed until "Home Sweet Home." Top: The Club stands "treats" for the boys, including transportation back to camp after "lights out."

Additional Contact Girls Named By Elex

Additional contact girls have been named by the Elex Club to serve during the coming year. They are: Clara Brinker, Bldg. 18-2; Dolores Orth, Bldg. 18-4; Frieda Winters, Bldg. 19-3; Hilda Holderman, Bldg. 19-4; Ladonna Springer, Bldg. 26-2; Mildred Baumbaugh, Bldg. 4-1 and Helen Petgen, Bldg. 26-4.

Plans are under way for the annual Elex Club conference, which will be held early in October. The time and place for the conference will be announced at an early date. The year's program will be planned at the session.

SCIENCE FORUM

by L. A. Hawkins

Q. How is heat produced in a Calrod unit of an electric range?

A. Heat is produced in a Calrod unit when an electric current is allowed to pass through a nichrome resistance wire. This wire is imbedded in fused magnesium oxide at the center of a hollow metal tube which forms the outer spiral shell of the unit. The nichrome wire is thoroughly insulated from this outer shell so that there is no danger of getting a shock when metal pots and pans are placed on the unit.

Q. What is the relation between the wavelength of radio waves and frequency?

A. In general, the shorter the wavelength the higher the frequency, and vice versa. If you know one, you can get the other by dividing the speed of light by the one you know. The speed of light is three hundred million meters per second. If you have a wavelength of 20 meters, the frequency will be three hundred million divided by 20, or 15,000,000 cycles per second, or 15,000 kilocycles.

Q. Are germs transmitted by the handling of money?

A. Yes, they are. I do not believe that this fact can be disputed. This is especially true if money changes hands rapidly, because of the decided tendency for the pathogenic organisms to die if money is given a chance to become thoroughly dried. On the other hand, money is not considered a good culture medium and thus this tends to lessen the likelihood of germs being transmitted in this way.

U. S. Citizenship Is Necessary To Visit Plastics Departments

All visitors to Schenectady, Erie, Fort Wayne, and the various Plastic Department plants of the Company now require proof of United States citizenship. These plants are in addition to those already announced such as Pittsfield and both Lynn plants. Employees on interworks business may secure duly executed citizenship identification cards from their respective department heads.

The extended ruling does not apply to visitors to General Office departments at Schenectady, exclusive of the General Engineering and Research Laboratories. Such visitors, however, must be escorted at all times and cannot be permitted to pass from General Office departments to Works departments unless they can comply with the citizenship ruling.

News From The Camps

(Continued from Page 2)

It is pretty hard to just sit around and do nothing back here as we do most of the time. It is pretty hard to get enough reading material so the only thing left to do is sleep. I have been getting my share of that, too. The boys that are doing the fighting are not near so lucky. I imagine they are doing their hard work and not getting much sleep either.

It is two hours' wait till supper and it seems to me that it should be 5:30. Guess I shouldn't get so hungry as I haven't done anything. Just the same a soldier gets hungry sometimes.

We have some boys that just were transferred from Camp Wheeler, Georgia, in the company and they don't like this country.

Just got some good news that we would not eat tonight unless some rations come in. So guess some of the boys will have to make a little trip to town. Probably that was just a rumor, though. I've missed more than one meal since I have been in the service so guess I can miss another without any trouble.

I am not sure when we are going back to Shelby and don't think anyone else does. Some say the last of September and the next time you hear it, it is the first of October. Then some say it will be the fifteenth of October. I am just going to wait till I get back there and then I will know for sure when we will get there.

Again thanking you for sending the NEWS each week.

Sincerely yours,
Pvt. Monroe B. Fuhrman.
152 Inf., 38 Div., Co. I,
Camp Shelby, Miss.

BULLETIN

At midnight Saturday, September 27, clocks throughout the city will be set back one hour, returning to Central Standard Time, in accordance with an ordinance passed by the City Council in 1928.

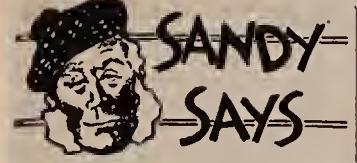
The Fort Wayne Works, however, will not change its clocks to Central Standard time until 8:00 P. M. Sunday, September 28. This is being done to avoid a change in clocks and confusing clock card registrations during the working hours of many people. The least number of peoule are working on Sunday at this hour.

Employees who start their working hours before 8:00 P. M. on next Sunday will observe Central Daylight time. Those who come to work after 8:00 P. M. will observe Central Standard Time.

M. E. LORD,
Works Manager.

Note: At the Decatur Works all clocks will be set back one hour at midnight, Saturday, September 27, for the return of the Works to Central Standard Time.

NEWS THROUGH THE PLANTS



When ye see a line o' cars parked along the road, it may be an accident, or cheap melons. When ye see a crowd of people on the street, it may be a fight, or someone giving away free samples. When ye see a line at the box office, it may be a murder mystery, or free dishes.

Which shows that we all hai two things, morbid curosity, and Scotch instinct.

Sometimes, when I get a special morbid feeling, I go thru the horror o' wondering what it would be like tae waste things, tae throw money away, and tae squander precious materials and waste hours o' labor at my job. Then I get tae wondering how anyone could have such terrible thoughts.

One thing that COULD suggest a little carelessness about waste at our jobs is the mistaken idea that we are working on a cost-plus basis and that a little waste o' materials or time wouldn't hurt the General Electric Co.

Weel, here are two reasons tae forget such morbid ideas and get back tae Scotch sanity on the subject.

Reason No. 1. Even IF we DID sell Uncle Sam things on a cost-plus basis, you and I are Uncle Sam. We're paying for it all (and how—see the new tax-talk) and you and I can't afford tae pay high prices for Electrical goods.

Reason No. 2. There is no such thing as cost-plus in our business with Uncle Sam. Most o' our orders are taken in open competition, just like any other business. I got this straight—from a choice tap on the grapevine. And I can just about prove that I got it straight, too. Here's the proof. Published figures I've seen show the first six months o' 1940 and 1941 something like this: 1940 shipments—191 million bucks—profits—26 million bucks. 1941 shipments—310 million bucks—profits 26 million bucks. As I said, these are figures for the first six months o' each year—and they are round numbers. Sec how much more work we have had tae do this year tae get the same profit sharing? Never has there been such a time tae keep plugging away at the ideas that SAVE. There's so much at stake.

Speaking o' lots at stake reminds me o' Cousin Colin the time his wife sent him after some cream.

"Weel, it's a long walk ye are askin' me tae take," he told his wife.

"O course, Colin," she said, "I ken ye'd never buy cream oxcept out in the country where it's cheap, but why don't ye take yon model T?"

"Weel, ye want cream, not butter, when I get hame."

Howard Jones, Bldg. 4-1, wanted to make sure he would get through the gate last Monday morning. He discovered he had his son's badge on, too. You don't need two badges, Howard.

Ilean Spuhler, Bldg. 12-B, may be a new member in the Insulation family, but she has evidently heard how to break into print. Yes, it was the well-known balancing act, but the chair was too tired, so decided to lay down again.

The employees of Bldgs. 4-B and 6-B extend their sympathies to John Shanahan in the death of his mother.

They've Gotta Be Right

YOU KNOW YOUR STUFF CHARLIE —BUT PEOPLE SHOULD AVOID BEING UNDER CRANE LOADS—EVEN I WOULDN'T DO A FOOLISH STUNT LIKE THAT

Inferior workmanship must not occur when engaged in an occupation like that of Charles Goetz, General Service Division, Bldg. 10-2. Charles is shown in above picture making a splice in a manila rope, thus converting a straight rope into a loop or sling.

These manila rope slings are used at various places throughout the plant for lifting heavy apparatus with cranes. Charles also has the responsibility of inspecting all slings that are in service to see if they are safe for use.

An error in workmanship or use of poor judgment in an occupation like this may cost a human life. Charles' work has "Gotta Be Right For Safety."

H. L. SMITH,
Safety Engineer.

19-4 Nibbins

Congratulations to Mr. and Mrs. Kenneth Brown, the proud parents of a baby girl.

Whitey Finger would like to know when Marceline Girardot is going to bake another cherry pie. Maybe he ought to get the recipe to take home to his wife.

Here is a warning to all girls with boy friends. Better treat them exceptionally nice, especially when it's close to your birthday. Leona Buchs had to wait two months but finally got a watch. Who knows, maybe it was in the pawn shop.

We most certainly had a lot of fun at our potluck watching those two hungry bears, Jackie White and Gladys Truby. The poor girls were offering 35 cents a plate just so they could join us. Gordon Smith downed a piece of cake in four bites. Guess he didn't realize that it was one-fourth of the cake.

Wedding bells were ringing September 14 for Maisie Green and her name is now Mrs. Welbaum.

Next week a few of the girls will have to come in at 6 in the morning. Mildred Wright, who is one of them, said her clothes would still be swinging from where she had hung them the night before. Why don't you try sleeping with your clothes on, Mildred?

Horse collars and inner tubes look alike to Hildabelle Warren, Bldg. 4-3. Ask Hilda what size wheel a horse collar fits.

Anyone having any old cook books to donate to the cause, we're sure Freda Bunnell, Bldg. 4-3, will be able to make good use of them. We hear she is going to housekeeping one of these days.

A Blue Ribbon Winner

Edward Bandt, Bldg. 19-4, has a Boston Terrier—pedigree definite and qualities unknown. Nevertheless Ed decided to take a chance and entered the purp in the Kennel Club show last week-end. You've guessed it, the dog won first place in the novice male class. It is hard to determine who was more flabbergasted, Ed or the dog, when the judge turned over the blue ribbon. It is rumored that the dog now sleeps in a private bed and receives the tid-bits at meals that Ed used to get.

Looks as if Guy Carnes and the missus are really seeing the country. According to last reports Guy has directed the trip through Canada, Niagara Falls, Watkins Glens, N. J., Washington, D. C., the Shenandoah Valley, and expects to make a stop-over at Erie, Pa., to inspect the G. E. Works at that place.

Sophia Bodigan takes this manner of thanking her friends for their kind expressions of sympathy in the death of her father.

It's O. K. Now, Otto

We trust that Otto Brunner, Bldg. 18-1, will take careful notice of the return to Central Standard Time bulletin. Otto unofficially returned to C.S.T. some weeks ago when he arrived at work an hour late after setting the clocks at his home back to Central Time.

Prof.: "What do you consider the greatest achievement of the Romans?"

Student: "Speaking Latin!"

Thisa And Thata 19-5

We hear that Irma Huhn is preparing for the future; if she ever decides to quit she can find a job as a first-class house painter. She is getting experience by painting the cottage at the lake! . . . More power to Mildred Friedrich, here's hoping she wins a thousand every week! . . . There is an old saying "that you should buy shoes to fit your feet and not your head." I'm not saying Margaret Hilgeman's shoes don't fit, but something is wrong if her feet hurt! . . . Our deepest sympathy to Claradell Cox, whose mother died recently. . . . A speedy recovery to Selma Moeller. . . . Hurry up and get well, Louise Beamer, we're rootin' for you!

L. Sordelet, A. Pequignot, and W. Hildinger, Bldg. 26-2, are still all a tremble at the near tragedy last week-end. It seems that Les Parrish was getting out of the boat after an unsuccesful fishing trip and smacked into the lake. Les was rescued in one half foot of water, but who knows, the worst could have happened.

From The Feminine Viewpoint

By Irene Perry and Hilda Barthold

Cupid has waged war upon the authors of "From the Feminine Viewpoint"! Casualties total 50 per cent! There is much weeping and wailing in the remnant of the host. Irene Perry is leaving us to become a queen in her own domain. We've enjoyed working with you, Irene, and we've enjoyed reading your columns. And now we all sincerely wish you joy and happiness.

* * *

Whenever anyone undertakes something new, whether it be a new job, or building a new home, or starting out to school, it is customary to wish the beginner good luck. And that's where too many of us stop. We forget that to do anything successfully requires help, especially at the start. Of course, the will to succeed and the fundamental materials of success lie within the individual himself, but even the most determined person needs encouragement.

Don't you remember how lost you felt when you first started on the job you're now holding? And how you thought one person among so many was rather insignificant? And how glad you were when that little, sparkling, brown-eyed girl across the way smiled at you? And how that at lunch time a group of your fellow-workers asked you to lunch with them? And how that before the end of the day you decided they were all grand people, and that this job was going to be a lot of fun?

And now you're an old hand at the business. You've made friends, and you know your way around. You know that Bldg. 28 is west of Broadway and the cafeteria is tucked away east of Broadway. You grew up with the badge system, and you saw the fences being built. And now it's your turn to help the new worker.

Are you doing it, or are you letting him down? Are you going to help him to get a good impression of his co-workers, or are you going to let him struggle along as best he can?

Try to help the new fellow. It's good for him and it's good for you; it draws you out of your shell, and helps develop personality. And maybe he'll be a President of the G. E., or a director, or your brother- or sister-in-law. Who knows?

Ora Farrell, Bldg. 4-3, spent his vacation in Colorado trapping wild beasts. Like Frank Buck, he brings them back alive. He returned to Fort Wayne with a cargo of horned toads and gila monsters, all of them standing the trip very well. He plans on placing them in the zoo he is establishing at Tri-Lakes.

We herewith present an act of chivalry performed by our genial friend Bob "Strativarious" Klingle, Bldg. 4-3. It seems that while roaming about Chicago one afternoon, he came upon Rosanne Weston, Bldg. 19-4, standing in a theater lobby minus her shoes. Bob asked her where her kennels were. She explained that she had taken them off while in the theatre and had come out without them and was afraid to go back in after them. Whereupon Bob dashed into the theater, retrieved said shoes, much to the delight of Rosanne.

NEWS THROUGH THE PLANTS

19-5 Office Chatter

We suggest that Novelle Yarian take up the study of hitch-hiking as she visited her home town, which is so far off the beaten track that you can get into the town but she says "you can't get out of it again so help me!" It's a good story, stick to it.

19-5 Artful Artist

At a small informal meeting of distinguished guests, which congregated at F. L. Richards' cottage at Golden Lake, H. Neely demonstrated the delicate art of dressing the glorious fowl known as a chicken. The demonstration was very successful in-so-far as removal of feathers but the only disappointing feature of the demonstration was, after a three-hour struggle with blood smeared over the living room floor and feathers all over the cottage, Mr. Neely emerged loking as if he had developed featheritis.

Some of the euchre players had a stag last week end at Francis Richard's cottage on Golden Lake. From all the planning, etc., it should have been good—the only remark we did not hear was: What shall we wear?" It seems the party came forth with many pictures which so far have not been developed—but one certain story was told. "A certain farmer near Golden Lake had nine chickens, one got run over; now he has seven." Where does Hugh Neely—fit in the picture—. It seems that Dotie Ross has been pulling a series of absent minded professor acts, but when she puts her keys in her drawer, and then closes her drawer, she gets the prize!

Sleuthing In 4-6

Is there a poet in the house? There sure is! For proof, see last week's WORKS NEWS. "One Shot Katie" hereby expresses her appreciation of the clever poem written in her honor. Well done, my friend—well done. . . . We are sorry to lose two of our helpers in the Drafting Room, James Hilfiker and Ernest Hicks, who have been helping us out for a few weeks, have been called back to their own jobs in Bldg. 19-5. . . . Our congratulations to Jerry Schlund. Last week he announced the arrival of a new daughter, whose name is Mary Catherine. . . . Paul Tanner has left us to take up new duties in the Tool Design Dept., Bldg. 4-5. However, we are glad to say that we are not losing him altogether, since we understand that the Tool Design will be moving up to Bldg. 4-6 in a few days. . . . If you want to see Esther Selzer in the horse and buggy days, just ask to see her picture which she's flashing . . . There are many new faces appearing in the Raw Material Dept. Among the new ones are Ralph Woody, Ed Markey, and Harry Mentzer. Your co-workers in Bldg. 4-6 extend a hearty welcome to each of you. . . . Dorothy Gerdom has announced her engagement and approaching marriage. Our best wishes to you, Dorothy, for the best of luck and lots of happiness. . . . You should have been at the main gate last Tuesday noon and seen the expression on Harold Carter's face when he discovered he had left his badge on his coat up in Bldg. 4-6.

Mildred Raymond, Bldg. 4-3, doesn't know enough to stay in out of the sun now that summer is over. She even went so far as to get her eyes sunburned last Sunday in Indianapolis.

"It's New Fangled, But It's Perfect"

Seventy years ago Mrs. Lavina Hergenrader assumed as part of her work around the house, the job of helping with the family ironing. "Sad irons," probably so-called because of their weight and backbreaking potentialities were the the order of the day seventy years ago. Mrs. Hergenrader, who is now 83 years old, eventually enjoyed the convenience of electric irons, but weight continued to figure in a successful iron. Came the day when Edna Hergenrader, Bldg. 19-5 visited the Employees' Store and bought her mother a new iron—a G. E. featherweight iron. "Money wasted," said Mother Hergenrader, "an iron that light can't do the work." However, she tried it out and now Edna claims she has an awful time trying to use the iron for Mother Hergenrader will use no other, and says that in her seventy years of ironing it is the best iron she has ever had.

Gossip From 19-5

The girls in Bldg. 19-5 are wondering when Marie Page is going to give that chop suey supper she promised the girls September 11, 1937, or is it too early to ask?

Since Esther Nahrwold came back from her vacation in Champaign, Ill., her favorite food is cheeseburgers.

Rosemary Blust just can't make up her mind whether she should get married and move to South Bend, or should she keep on working. Will someone please help Rosemary out?

Anyone having any old-fashioned waltz sheet music they don't want, see Kathryn Hepker, Bldg. 19-5; she said she went through all the ten-cent stores but she can't find any. Kathryn says give me an old-fashioned waltz any time.

Sarah Middaugh, Bldg. 19-5, and Harold Anderson were married Saturday, September 20, in the parsonage of the St. Paul Methodist church.

Ezra Klopfenstein, Bldg. 4-3, is a proud father of a new baby girl. Since they don't sell candy and cigars in Grabill, Ezra is passing out clamp bolts.

Heights Of Clouds

(Continued from Page 1)

of the National Bureau of Standards, "dark overcast clouds at an elevation of 9000 feet have been readily detected. For cumulus clouds illuminated by direct sunlight and having elevations up to 4000 feet, the detection is positive."

19-4 Spot Jottings

Saturday, September 20, was a big day at Pleasant View cottage on the St. Joe river for 33 boys from Specialty Motor Test and Inspection.

The party started about 10 a.m. with Herb Braun, Cooney Nahrwold, Alva Powell, Bill Roberts and Alva Foulks working on the dry groceries. George Ryan arrived early loaded down with the wet goods.

A delicious fried chicken dinner was served about 6:30. It must have been good, the way the food disappeared.

A movement is now on foot to open the Fort Wayne Metroplitan Opera, providing the proper throat astringent can be had.

Les Hubbart and Alvin Powell carried off honors in euchre while Alva Foulks took the other boys to the cleaners.

It is understood that Bo McMillen spent Sunday in Fort Wayne signing George Ryan for right tackle.

Gale Jones is making a trip to the State House to have a law passed to put handles on both sides of screen doors.

Maxine Swaim spent Saturday in Chicago buying new fall clothes. We wonder why?

Stephany Hilker, Bldg. 26-2, gave a real house-warming at her new home. Guests were Loretta Bloom, Golda Mentzer, Betty Hawk, Loretta Halt, Helen Varner, Ruth Lahman, Mattie Lou Brunner, Betty Harkenrider, Jean Woodcox, Elizabeth Franzdorf, and Pauline Menefee.

Lamp Display At Employees' Store

A new shipment of the popular I.E.S. lamps have been received at the Employees' Store and are on display. I.E.S. lamps are designed to give the proper amount of light at correct heights and they are offered in many attractive designs.

Bldg. 4-2 wishes to extend their deepest sympathy to Lillian Voirol and Naomi Robinson in the death of their mother.

Why is it that Frank Hemrick, Bldg. 4-2, is going around these days with a very satisfied and contented look on his face? Could it be that he is very pleased with the little gift the gang gave him at the office party. I have been trying to find out what it is, but all he says and does is grin, "Why didn't they give it to me long ago." Maybe some of you girls can find out what it is. I'm not a very good finder outer.

That mighty giant, that impresario of imperturbability, that suave and naive personality, that is, Walter Sunier, famous "In the Rough" scandal monger, finally ruined his reputation. After practically completing a lovely round he arrived at the 18th tee, determination just oozing out of him. He was "skid" happy. He missed his drive and the club slipped out of his hand and flew 5 feet away. We know it slipped out because he said so. On arriving at the green he promptly proceeded to miss his 6 foot putt. There was his ball, 2 inches from the hole. With a mighty swing, a full pivot and plenty of disgust and stuff, he hit his ball. It finished on the putting green 100 feet away, so it stands that he missed the 2-inch putt. He didn't play his ball back to the green so he didn't finish the hole, therefore he forfeits the match and what we are really getting at "WE WANT OUR MONEY BACK," or maybe it was worth it.

The girls in Bldg. 4-3, Group 13x59, have been hearing that Van Wert, Ohio, is a busy place. How about that, Erma Linder?

A group of girls in the Overload Switch Dept., Bldg. 4-3, held a weiner roast at Leona Scheumann's home last Wednesday evening and did they have a good time. Those present were Leora Carpenter, Eileen Stemmler, Janie Clark, Hilda Hiatt, Gustie Fuller and Ruth Lauer. Leora and Hilda won first prize for the 2¼ mile hike and Janie took first prize for hog calling. If you need any Bursley coffee, ask Gustie Fuller. Maybe she can get it at half price from the Berghoff Brewery.

George Hahn, Bldg. 4-1, and his wife gave a party for their friends recently. It was a big success and a good time was had by all.

Indiana Co-Ed On "Hour Of Charm"

Continuing the auditions for university women, the "Hour of Charm" sponsored by the General Electric Company, will this Sunday evening present Phyllis Wilcox, of the class of 1944 Indiana University.

Miss Wilcox will be a soloist with the all girl orchestra directed by Phil Spitalney.

News On The Nose 4-5

Leo Persing has such a time parking that over-size motor buggy of his that the boys in Bldg. 4-5 Planning Department are considering the purchase of a kiddie-car for easier navigation. That shows how much they luvs ya, Leo! . . . Frona Witsche, of the Bldg. 4-5 flange packing section, is acquiring a great renown for her skill with the needle. It 'all started when Johnny Leach had a little bad luck with an essential portion of his trousers. But the day was saved and so was Johnny when Frona gallantly came to the rescue with her sewing kit. . . . Grace Dafforn, former field winder, entertained royally with a chicken dinner for her former co-workers. Prizes for games were awarded Therese Rumbaugh and Oscia Klopfenstein, while Evelyn Strupp took the booby, so they say, and not for games she lost. Others present were Esther Hanke, Betty Jean Smith, Freda Shady, Lelia Byall, Ruth Walda, Hilda Walda, Izora Bandy, Ida Patterson, Ruth Papenbrock, Lydia Kleinschmidt and Barbara Mavity. . . . Not very flattering to Sam Newlin was the fact that the WORKS NEWS photographer had to make three trips before he could "shoot" Sam to his satisfaction. Anyhow, congratulations Sam, on your twenty-five years of useful service to the General Electric Company. . . . We offer the same best wishes to our genial foreman, Ed Glusenkamp, who walked to his desk last week one day to find it beautifully decorated with a bower of crepe paper and a luscious cake as festive tribute to his twenty-five years of service. Also in appreciation of their foreman, his many admiring people presented Ed with a fitted Gladstone bag. . . . Wedding bells will soon be ringing for a lovely little Bldg. 4-5 winder, Irene Thimlar and her groom-to-be, Jack Voorhees. . . . Also making a young man very happy is Marjorie Netterfield, who is wearing a solitaire for Maurice Moffit. So much for this week. G'bye now.

Snoopin' Sal.

Building 26-3

Farewells and all the trimmin's, including cake, were tendered our foreman Daryl Hirschfielder. He goes to Bldg. 26-4 and Red Braden, takes his place. Good luck, Daryl, and it was a pleasure having you the short while we did.

Betty Griebel and Sally Bowers are patients at the St. Joseph Hospital. Speedy recovery, girls—we sure do miss you.

We wonder if Katy Bitler did go to heaven and drag "Cupid" along back. It almost looks like it from the pin she is wearing. We hope he brings you lots of luck, Katy.

Didn't Kenny Erne look queer sprawled over the iron box.

Bette Busse brought a piece of birthday cake to her boss. Oh! That we were all bosses.

Warren Harding, Bldg. 4-1, surely was disappointed when he bought a pumpkin pie from the candy lady and found that it was only the crust. "Darn, and Warren was so hungry."

Al Kissinger and Ed Johnson, Bldg. 4-1, arrived at the lake party last Saturday night about two hours late. They were in Angola when they discovered they did not have the pies. So back to town they came. It must have been a long way to the lake, eh Al?

Motor Generator Static

Noble

When some of the boys stated they intended visiting the Bluffton fair, "Pappy" Archbold, who always places mankind's welfare ahead of his own desires, announced that he would be a morals committee of one to inspect all side shows. Visiting "girl" shows, will constitute a tremendous sacrifice on "Pappy's" part, but he is willing to take this step, to protect boys like Fisher, Lojek and Histed. It is rumored that he will suggest that "hula" dancers wear full length bath robes and "interpretative dancers," "interpret" in total darkness, thus making sure the boys maintain their equilibrium.

Noble, we sez!

Of Hats and Stuff

Ate lunch with Mike Dole and some of the boys the other evening. Mike is noted for his hats, and according to the WORKS NEWS of a few weeks ago, his ability as a eater. I was horrified when I noted that Mike's check was less than mine, but then, it was the first full meal of the day for me—I don't know how many Mike had enjoyed—however he took that opportunity to tell me how he felt about anyone who wrote about his appetite and then ate as much as I did. If you have noted Mike's "cowboy" hat, (not a "10 gallon" size, but rather, between that and a "drip"—about 5½ gallon) you have been impressed by its distinctive appearance—it radiates western atmosphere. Well anyway, when we finished dining and Mike went to the check room to get his hat, the check boy saw him coming and placed the hat on the counter long before Mike had arrived. Don't know whether the lad scented the sage brush on Mike, or expected him to drag forth a "six shooter" if service was not as he wanted it to be—whatever the reason, out of the hundreds of people there, the boy recognized Mike by the hat or the hat by Mike—I don't know which. But it sure is distinctive!

At It Again

Jack Toole, the painter, is at it again. During the days that are ideally suited for painting, Jack remains inactive, but as soon as early evenings and cold nights arrive he drags forth his overcoat and gloves, extension cord and lamp. His friends believe it to be a sure sign of Fall, when they observe Jack clothed in overcoat and gloves painting by the light of a G-E Mazda lamp. Yep, Winter is almost here, he is at it again.

Dog for Rent?

The day Stuart Head, Bldg. 19-1, purchased his dog, "Old Lady Luck" was not only smiling, she was grinning from ear to ear. It seems when the pup first saw the light of day, the voice of some radio crooner warbling a popular song, "Trees", greeted its ears and since that time the dog has been allergic to any wooden object. There was a new home erected near the Head residence and his pup under the influence of its strange affliction picked up all the scraps of lumber left laying around and carried them home. Soon the basement was almost filled with kindling and Stuart feels if a few more homes are constructed his Winter's supply is assured.

Many of his pals insist that he rent the dog to them, as they too are in need of fire wood for the chilly nights to come. Yes, Lady Luck almost laughed out loud.

Saying of the Week

Jerry Frye remarks: "When a man is a fool and knows he is a fool, he is a wise man."

Apologize

This disher of dirt wants to take this opportunity to retract a statement he made in a former statement that George "Whirlaway" Auer, Bldg. 4-3, is a kleptomaniac, or a desk taker or a sleepwalker. He is no such a person and I apologize. What I meant to say was he should have lived 50 or more years ago. He would have made a fitting pardner of Jesse James. He and his horse that he had at the office stag at Lake James last Saturday really took the boys for a cleaning at poker. Some of them said that he would look like poor Jesse if only he had a gun, and they also said he plays as if he might know something about the game. Anyway George has the money and a "cat ate the cream" look about him. Say, come to think about it, maybe I had better apologize to Jesse James, too.

Doc Martley, Bldg. 4-3, our famous horseman, tells us that he now is having cow troubles. After getting his horses well under control, his cows got loose and ate his nasturtiums and trampled down his petunias. We sincerely hope he does not go in for hog raising. We do not recommend any further enlarging of his menagerie.

Art Brandenburger, Bldg. 4-3, reports a very thrilling two weeks' vacation spent at his hoggerie on Big Long Lake. He reports everything in excellent shape for the fall and coming winter. While there, he and Carl Christlieb, also of Bldg. 4-3, gave the cottagers a thrill by staging a race with their sub-chasers. Art lost the race, the reason given was that he was carrying too much ballast. When asked why he did not throw some of said ballast overboard, he said it was alive and could not be disposed of lightly.

David Mannix, Bldg. 26-2, spent the week at Fawn River shooting pink turtles, so they say. It must be a new delicacy, but we are willing to try anything once.

« «It's a Joke» »

"Why do you weep over the sorrows of people in whom you have no interest when you go to the theater?" asked the man.

"I don't know," replied the woman. "Why do you cheer wildly when a man with whom you are not acquainted slides safely into second base?"

* * *

"Say, pa."

"Well, my son?"

"I took a walk through the cemetery today and I read the inscriptions on the tombstones."

"Well, what about it?"

"Where are all the wicked people buried?"

* * *

The train roared past the station. Above the noise the station agent heard a yell. Rushing out to the platform he saw a man sprawled alongside the tracks. A little girl was standing by.

"Did he try to catch the train?" asked the agent.

"He did catch it," she replied, "but it got away from him."

Holds Service Record

To Bessie Chapman, Bldg. 26-2, goes the honor of being the woman with the longest service record at the Fort Wayne Works. On Tuesday, September 30, Miss Chapman will celebrate her thirty-sixth anniversary at the Fort Wayne Works. Miss Chapman, modest in her achievement of an outstanding service record, declares that she has never regretted becoming a G. E. employee and hopes for many more years of happy association as a General Electric employee.

Plastic Flashes

The employees of the Plastic Department wish to extend their sympathy to Lamont A. Buckmaster in the death of his mother.

Pets seem to be all the rage around our building. The latest is Grace Funk's little red fox.

We've just found out that Jim Fleming's gas buggy has a name. It's christened "Mayflower."

The girls on the second shift haven't been the same since glamour boys Johnnie Sowers, Clarence Meeks and Carl Saaf held a fashion preview for them the other day.

Bob Edgar sure is "wowing" the gals with those bright green plastic suspenders of his.

We sure miss Cecil Young, as he's on his vacation; but we're hoping he is enjoying himself.

Our bet for the Champion tall story teller would be Dan Hughes.

That sad look on Joy's face is because her army beau has been chosen to serve "Uncle Sam".

Was ever a blue Monday blue for Jeanette Penkul. Her heart interest was called to service by the U.S.A.

It certainly seems that everyone had a hilarious time at the "Textolite Stag Party", just listen: Although it was a stag party, Bob Davis was escorted by "Flynn" . . . We would like to know if anyone lost money in the card game besides Jim Milne. . . . It was reported that Carl Saaf paid all of the boys' expense accounts for the golf game. . . . Fred John spent more time looking for someone else's golf balls rather than his own. . . . Why didn't R. Lepper eat dinner? Entertainment for the affair was furnished by Nick Treiner and we hear that it was a "wow". . . . When John Sowers called the square dances, the natives thought it was a "hog calling contest". . . .We wonder if Fred John and Ernie Summers ever tapped a keg of "you know what" before. They certainly should have had their raincoats on . . . After the big chicken dinner, a vocal racket was enjoyed (?) by the members. A quartet consisted of Charles Coles, Clarence Lallow, Tony D'Agostino and Ralph Foust. Clarence's solo really was tops. While singing (did we say singing?) was in progress a great "din" was set up around the lake by the barking of dogs. . . . We bet that Big Lake isn't the same after this affair.

Till the next time,
THE TILLIES

Elex Election To Be Concluded Today

The annual Elex Club election is under way at the present time and will be concluded today. The Election committee includes Pauline Beaty, Bldg. 18-B, chairman; Martha Costion, Bldg. 26-2, Marjorie Hargrave, Bldg. 4-3 and Mildred Werling, Bldg. 19-5.

The newly elected officers will be installed into office on October 6 at an "All American Girl" banquet to be held at the G-E Club. The banquet will start at 6:00 o'clock and reservations will close on October 3.

Announçer (At a concert): "Miss Periwinkle will now sing *"Oh, That I Were a Dove, I'd Flee."*

Junior: "Dad, what's a dove-eyed flea?"

Winter Street News

Harry Kaehr wears the "absent minded professor" medal this week. After quitting work at 4:30, he went to "Walter's" until his brother picked him up. After waiting until 5:15 with much muttering about waiting around he suddenly realized he drove and his car was parked in back of "Walter's". Now what did he have on his mind?

We hear Ed Ehrman is still a past master at passing out the "blarney." While up at Milwaukee for the Legion convention he and his wife were looking at some large boxes of candy and evidently she wanted one and Ed was heard to tell her, "Aw, honey, you make better candy than that at home. Let's wait." Just then the waitress asked them to move on. We wonder if he had the waitress bribed too.

Louise Schwartz is refusing all offers of hard candy for a few days since the other day she opened her mouth and a dentist stuck his hand in it and started yanking around.

Vacation time is over for Hortense Wylie. She's back looking fit as a fiddle and ready for another one.

H. Rahe got caught in the draft. He didn't get a cold but he is in the army. His fellow workers presented him with a nice gift last Thursday and wished him well. Good luck, Harold.

Viola Noll, nee Mestemaker, caused that smoky haze around Winter St. last Monday. Yep, they were wedding cigars. Some of the reception "shower" boys decided to waive the rice and substituted large beans which they tossed around with much gusto. Incidentally, music was furnished by Frank Goetz and his mandolin. He played a few popular late numbers, "Hearts and Flowers" and "The Prisoner's Song." All in all everybody had a swell time.

The AC & CR Production Department threw a surprise party on Kenny Huyette last Thursday at his home in Bluffton and boy, was he surprised. After the gang got settled down it seems as if the festivities started up. Joyce Harwood, the perfume gal, rendered a solo that was very appropriate. Wayne Cook, not to be outdone, also gave a vocal selection, even if he did have to stand on the piano stool to reach "them there" high notes. Marge Kohlmeyer really cut loose and put on a few dances that were—well the boys said they were OK. Harlo Ramniman stopped on the way up and won a little on the slot machine and invested it all in cigars. He looked like a cigar store Indian when he walked in the house. Strangely enough, those cigars disappeared so fast Charlie had to hang on to the one he was smoking with both hands. He doesn't know who got most of them but McLain has been smoking furiously ever since the party. W. L. Griffith of Production Dept. of Bloomfield was an honor guest. Kenny was presented with a little gift and the concensus was that he was "sitting in the buttertub." Congratulations and good luck, Ken, in your new job.

Doleen Geary wishes to take this opportunity of thanking her many friends for the lovely gifts and the well wishes for future success she received in connection with her leaving the Company.

Anyone wishing to obtain some original ideas in party favors or tallies, see Cecelia Horstmann, Bldg. 4-3.

News Around

26-5 Tool Bits

Our newest addition to our office is Virginia Simon. She previously worked for the Department of Recreation at Lima, Ohio. She's a native of our Old Home Town, Spenserville, Ohio—Good old Spencerville—Virginia enjoys working for the G-E and also is keeping up her studies in voice and piano at the Bible Institute.

Russell Simon (no relation to Virginia) is spending his vacation touring the hills of Kentucky. It sure is amazing how some fellows can pick out a vacation with such swell weather. Remember how it rained for three days and nights on that trip to the Smoky Mountains last fourth—Well, better luck for some of you boys next vacation.

Is "Ginsboig" man or mouse? This question kind-a stumps us. Anyhow Dick Gebert left work Friday stating that he was going to put his foot down with the little woman and go see the North Side and Mishawaka football game. Saturday morning, however, he returned to work with the comment, "It sure was a swell show at the Paramount." We'll let you decide: "Is he a man or mouse?"

The heavy detonations and vibrations heard in Bldg. 26-5 last week can be explained. They were the results of Ross Cohagen's false teeth bounding across the floor after a hearty sneeze.

A bowling ball and shoes are to be given away in the near future by a fellow workman, who is so sad about his bowling results. For particulars see Earl Lentz.

Lieut. Eber Markland of Fort Leonard Wood, Missouri, is the guest of Mr. and Mrs. Walter Elliot who visited him in camp while on their Western trip this summer.

Barney Walden has returned to work following an operation. Glad to see you back, Barney—friends are wondering if he had any good-looking nurses.

Mart Walsh is in Chicago taking treatments following an operation last week.

That's true what you read or hear about snakes peeling off their skins, but we are at a loss as to why Art Thieme's forehead suddenly peeled off.

Oh, yes, we don't want to forget the 25th anniversary cake the boys of Bldg. 26-5 Drafting presented Mart Kimble last week. The cake was exquisite and also was Mart. He beamed like a star on top of a Christmas tree.

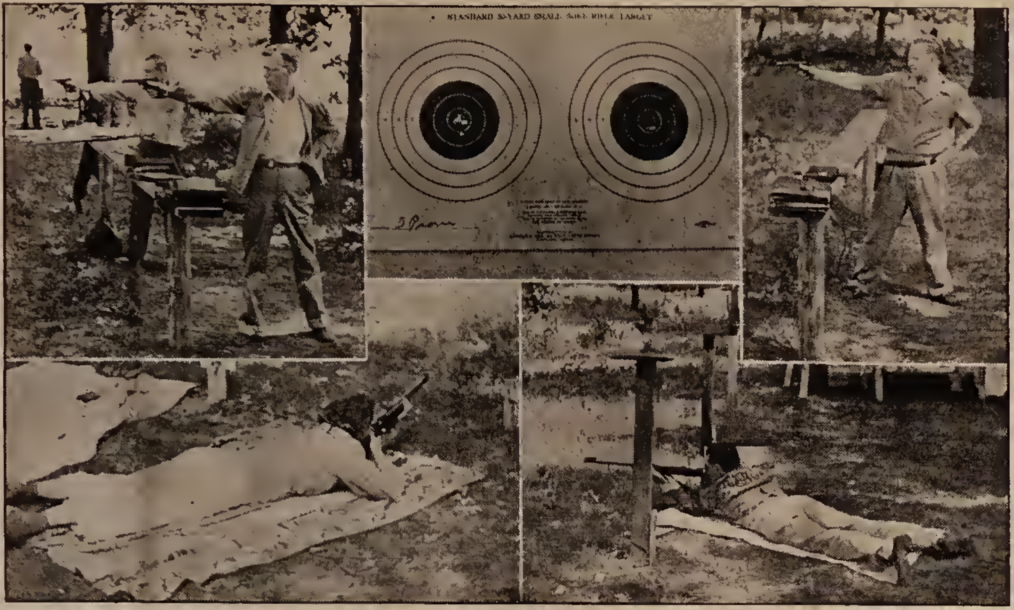
Irma Wyneken has been trying to get a parking permit for her "Yellow Convertible Coupe" so she can park with the foremen. She says that the foremen are very considerate about her fenders. Last week during that terrific downpour Irma forgot to press the little button which brings the top up. As a result, about a foot of water came pouring out when she opened the door.

Rufus Niblic is like the boy waiting for the last week of school to pass, only he is waiting for the Bluffton Street Fair.

Jack Schemehorn is very badly in need of an explanation, the difference between a strike out in softball and bowling. . . . J. H. Breidenstein, Sup. Tool Cost, Bldg. 26-5, is in the market for a desk with long legs so Doris Windhorst can get her work done. It seems Doris has to stand up to do her work this week after horseback riding last week end. Doris says she was always out of motion with the horse; everytime the horse was going up she was going down. Gus Weigman is in favor of lengthening the bowling hours, to quit at 1:30 A. M. is too early.

Oh, yes—just one more thing to mention. The boys know now that Ross Vaughn can take it.

At The Rod-Gun Club Championship Shoot



Upper left—E. Leiter and C. Fell, Bldg. 17-2, firing on the Pistol Range. Center—E. J. Pions "possible" at 50 yards with 22 rifle. Right—A. F. Bowers, Bldg. 4-6, club president at the firing line. Lower left—V. Rimmel, Bldg. 4-5, winner of second place in the pistol event. Lower right—L. Bland, Bldg. 27, winner of first place in both pistol and rifle contests.

Hermetic Office 17-2

The bowling season has started and after Bob Wefel's debut the fellows suggested he join the girls' team. After considering the 96 score he made the girls say it's OK—as mascot. . . . The production department was scheduled for carmel corn, so George Langenberg, realizing that inventory was near, finally brought us some and it tasted just like—more. . . . Jack Clarkson promised us if his mustache was red he would shave it off—from the looks of the thing it won't be here long.

This choice bit is just too good to keep. Vernie Crabill is building a house, so when the siding arrived "Cautious Crabill" hid it between the floor joists so it would be safe—it's safe enough now, with the floor nailed over it. . . . We couldn't end without mentioning the stag party at Verne Castle's cottage Saturday—everyone had a good time and we hear Kenny Altekruse did all right.

Suzy Sleuth.

Steve Korn and Collins Mannan received an awful setback. They were refused entry in the Elex Bowling League. We all know that Mannan is the ultimate in feminine pulchritude—and as for Steve Korn, the 80 average they allowed him was 30 pins too high.

Lee Bernhardt, who was trying to install a compass in a car the other Monday evening after a strenuous week-end trip, after trying so hard to make it fit, woke up and found he was trying to install a pencil compass. Ask Lee about it, his answer will be œæ**x!!! trips any way.

Fred Petsenbarger says his name is not Fred, but Floyd Petsenbarger. He says some little guy with a fog horn voice hung that monicker on him.

Ed Schaeffer and Noble Bell, top flight squirrel hunters of Bldg. 4-2, have failed so far this season to produce any meat on the table. Their excuse of hunting with bow and arrow in order to exterminate the supply of game in one season is not believed by Bldg. 4-2 hunters.

Rod-Gun Club Will Open Indoor Season

Announcement is made that the G-E Rod and Gun Club will open its indoor season on Wednesday, October 1. Weekly shooting of rifle and pistol enthusiasts will start on that date at the Armory range. This range is considered to offer the best facilities for both rifle and pistol shooting in the city.

The Thursday evening shooting will be discontinued on the outdoor range but the Sunday morning matches will be continued as long as the weather permits.

Everybody had a swell time at Joe Gawehn's party. Virginia Mollett gave a demonstration on how to catch a dog fish. Helen Stahl and Olga were so hungry they ate six raw frankfurters before the party started. Mr. and Mrs. Bones were there—"Bones" was making swell sandwiches out of tomato worms—Helen Hoelle and Jerry Tilbury sang a quartet number—Vizitrum sings a mean beetone, pardon me, I mean baritone. Mr. and Mrs. Bob Stout (soon) were there. They were the first ones to come—Bob left early so they'd be there by 6 o'clock. Roesener and his better half were there—he was late as usual, said he had to comb out his mustache—Roesner sang a solo.

We understand the feud between Bill Glenn and Edna Martin in Bldg. 12-B is quite harmless.

The girls from Switch and Mechanism group on Bldg. 4-3 gave a shower recently in honor of Gladys Brown at the home of Myrtle Bennett in Waynedale. Those present were Marjorie Hargrave, Fern Truelove, Eadie Wolff, Cecelia Horstmann, Mildred Raymond, Irene Martz, Adelle Kuckuck, Nellie Williams, Gladys Balyeat, Caroline Hans, Mary Guilliff, Helen Dornick, Anna Ness, Leora Carpenter, Charlotte Stanford, the honor guest and hostess.

Anyone wanting to know how to spend a restful week-end, just ask Eileen Spuhler, Bldg. 12-B office. Her advice, based on recent experience, would probably be to stay as close to home as possible, especially at bed time! Personally, we can't imagine why anyone would want to sleep on a swell party to Columbus, Ohio, but evidently Eileen did.

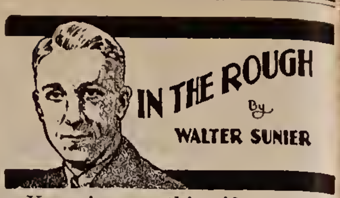
New Radio-Phonograph And Consoles Announced

Frequency modulation is included in a variety of new radio receivers announced by the General Electric radio and television department, Bridgeport, Conn., as part of its 1941-42 line.

The new models include six radio-phonograph combinations, of which three have the frequency modulation band, and two new consoles, both equipped with FM. One new console, also with FM, was announced earlier. At the same time, G-E announces seven new table models to be added to the table models, table-type radio-phonographs, and battery-portables announced previously.



IN THE ROUGH

By WALTER SUNIER

You miss something if you missed the Patty Berg, Helen Detweiller—Johnny Revolta, Bud Williamson match at Orchard Ridge last Sunday. There was no question but that they could sock the pill. There were no dirty socks such as we have seen among the proletariat. These women know that a dirty sock will not stay on the line.

Patty is a former women's national title holder and is unquestionably one of the very best woman golfers in the country. Her score at Orchard Ridge was 68 which shows that she shoots stellar golf and not only just good golf for a woman. Incidentally, in the match she had five consecutive birdies.

We asked her what advice she would give to 250 General Electric Company golfers.

"Tell them to think of the hands," she said. "The hands are the important things. They are the only part that has contact with the club."

"Do you have hand path in mind when you speak about the hands?" we asked in order to make sure what she meant.

"Of course, the hands must move in the right path and must in particular go out in the direction of the line of flight," she replied. "But I meant by telling them to think of the hands, that the feeling in the hands of what is being done with the clubhead is the guide by which the effort of swinging should be directed. The body action will follow."

"But," we said, "That is in contrast to most of the things we have read in the past which talked about body action first."

"Yes," she replied very emphatically, "And that has ruined a lot of golfers. Tell them to think of the hands, hands, hands. Also balance and rhythm are important — and don't slug."

There you are for a 68.

The picture above taken by Bernard English followed the interview which Miss Berg so graciously gave.

Afternoon Girls Open Bowling League

The girls' afternoon bowling league started off with a bang last week. Officers of the league are Ruth Hess, president; Sophia Bodigan, vice-president; and Kay Armstrong, secretary. A large crowd of girls turned out for the opening event and kept the pin boys busy. New girls in the league are extended a hearty welcome.

He was at the fountain pen counter making a purchase. "You see," he said, "I'm buying this for my wife."

"A surprise, eh?"

"I'll say so. She's expecting a Packard."

Elex Club Names Officers For Coming Year

Helen Bleke, Winter Street, was elected presiden t of the Elex Club in the selection of officers for 1941-42 just completed. The successful candidates are pictured above as follows; Ceal Romary, Bldg. 26-2, trustee; Dorothea Swank, Bldg. 26-2 trustee; Dorothy Mueller, Bldg. 4-6, secretary; Catherine O'Connor, Bldg. 4-6, trustee; Miss Bleke; Pat Chapin, Bldg. 26-2, vice-president and Charlotte Stanford, Bldg. 4-3, director. Polly Ort, elected a director, was absent due to sickness when the above picture was taken.

G-E Military Service Policy Is Extended

Eighteen Months' Additional Leave Of Absence Protects Continuity Of Service For Over Thirty-one Months. Other Provisions Preserved

General Electric's policy for its employees now in the service of Uncle Sam, adopted a year ago, has been extended for another 18 months, according to recent official announcement. This means that leaves of absence, originally granted for one year and 40 days have been extended an additional 18 months so that continuity of service is fully protected for over 31 months. All other provisions of policy such as restoration of employees to their former positions or positions of like seniority, status, pay, etc. are extended with the exception of the Free and Additional Group Life Insurance plans.

These changes, as officially announced are as follows:

"The United States Government now offers to all persons who have been inducted or ordered into service under the Selective Service and

Many Delegates Plan To Attend Elex Conference

Annual Meeting To Arrange Club Program Will Be Held At Elkhart

The annual conference of the Elex Club, at which time the club's program for the next twelve months is adopted will be held at the Hotel Elkhart, Elkhart, on October 18 and 19, it is annouced by club officials. As in previous years the more than 100 delegates will be divided into three groups, each group planning a program and presenting it at the general meeting. The most acceptable events from each pro-

(Continued on Page 4)

Can We Save Free Enterprise System?

In a featured article appearing in the November issue of *The American Magazine* entitled "Can We Save Free Enterprise?," Charles E. Wilson, President of the Company, proposes a Congress of the American Free Enterprise System to be convened late this fall or winter.

Quoting from the article: "This would be a sort of constitutional convention to draw up new? self-imposed rules for industrial and commercial progress, acceptable to a majority of our people."

In a sweeping review of the reasons for this proposal, Mr. Wilson points out that while millions today are gainfully employed in producing the sinews of war, the time will come when this employment will cease and the nation will find itself facing all its pre-war headaches, plus new ones including a vastly greater national debt.

Quoting again from the article:

"And we shall be faced by the vicious spiral: men laid off in defense factories, hence less purchasing power, hence even larger unemployment rolls, greater relief burdens, and less taxable income to support them. We know how deadly such a spiral can be, and how hard it is to stop.

"People will ask: 'What kind of civilization is this, which can give us employment to make guns and shells and tanks, but which fails to find jobs for us in peaceful industry? Private enterprise has failed. It is time for the government to take over farms, factories, and unions, to produce full blast, and to distribute the products of our progress to all the people.'

"There are those who actually hope for such a situation, where the American people, despairing of any other solution, would throw all their problems and a good share of their liberties into the government's lap.

"I hope, and believe with all my heart, that we can do better than that. I say this not because of any

STOCKHOLDERS INCREASE

General Electric stockholders on September 19 totaled 218,152, an increase of 6,541 over a year ago, it was announced this week by W. W. Trench, secretary of the company. The present number to whom the October 25 dividend will be paid is an increase of 812 over the last record date, June 27, 1941.

Develope Starter For Fluorescent

A new fluorescent starter, to be known as the Protector-Starter, is under development by the accessory equipment section of the General Electric appliance and merchandise department, Bridgeport, Conn. The Protector-Starter is designed to eliminate blinking fluorescent lamps by automatically cutting them out of the circuit. This action prevents the starter from destroying itself in trying to start a defective or worn-out lamp. It also may save ballast equipment by eliminating the possibility of a closed circuit condition creating excessive temperature rise.

The conventional fluorescent starter is developed for many hours of normal lamp starting, G-E en-

Gecode Club Holds Its Annual Picnic

Members of the Decatur Works Gecode Club enjoyed their annual picnic last week with eighty-five members in attendance. Following the meal, a scavenger hunt was inaugurated. Co-chairmen for the picnic were Sylvia Ruhl and Aileen Porter with committee members including Jane Linn, Mary C. Houlthouse, Metha Hilpert, Katherine Kitson, Marie Auman, Loretta Weiland, Ruth Borne, Maxine Hilton, Ethel Tumbleson, Margaret Cloud and Betty Zinsmaster.

Fifteen Hundred Ideas In Double Award Months

In Personnel Work

Mildred Harber

Announcement is made of the transfer of Mildred Harber to the Personnel Department to work with Irene Meyers in connection with personnel activities.

Miss Harber joined the Company on June 7, 1927, upon completion of her schooling. Her first job was in the factory as a machine winder in the Motor Department. She then became instructor in the special training school and was next a production clerk in the Motor Department.

Increase In Weekly Average Of Suggestions Set At 110 Percent

With 1,507 suggestions submitted by employees during August and September, "the Double Award Months", a record exceeding that for any eight weeks during the past several years was established, it is announced by the suggestion department. The response of employees for the appeal for suggestions to help in the battle of conservation of materials through reduction of waste and spoilage is indicated by the fact that during the eight weeks of the campaign the average percent increase in suggestions over the previous month's weekly average stood at 110 percent.

The peak in the number of suggestions submitted during the campaign was reached during the third week in August when 253 suggestions were made. The lowest number for any week was 131. The weekly average for July, prior to the opening of the campaign, was 90 suggestions.

Although the "double award" project has been officially closed, it is pointed out that the campaign against waste and spoilage must continue with undiminished effort if we are to do our part in the move-

Carefulness vs. Carelessness

It is strange that two words so alike in appearance can have such opposite meanings. Yet the difference between them is marked in the United States, each year, by the useless loss of many lives and the destruction of much valuable property. Fire Prevention Week, starting next Sunday, gives special emphasis to this matter of loss of life and property. Carelessness is one of America's greatest enemies with fire as its chief ally. With carelessness to lead the way, fire conquers and devours all within its path, until it, in turn, is overcome by man.

Did you know that every minute of the day and night, on the average, there is a fire somewhere in the United States?

These fires annually burn to death more than 10,000 human beings, most of them women and children, and injure 15,000 more, many of them permanently. They wipe out of existence each year, on the average, property worth about $500,000,000. Thousands of people are thus made homeless, for most fires occur in homes. "Why do we not stop this great waste of lives and property?" you may ask. The answer is, "We must stop it."

Most fires are preventable. They are the result of carelessness. You can do a large part in preventing them, first, by keeping from all actions that might cause danger to others; second, by learning to recognize and correct all dangerous conditions in your own home, and place of employment; third, by pointing out to others all dangerous conditions in your community; and, fourth, by helping to educate those about you in habits of carefulness and safety.

That is the purpose of fire prevention study—to guide you in this work of good citizenship. Study it, so that you will recognize the many fire hazards constantly surrounding you and know how to correct them. When wasteful habits of carelessness are replaced by thrifty habits of carefulness, America's prosperity will be assured. Her future depends upon the good citizenship of everyone in safeguarding her national resources.—GEORGE DOEHLA, Fire and Patrol Chief.

• Do You Realize

. . . that you can aid the Defense Program?

We are facing a definite shortage of many of our fundamental office supplies, and it is becoming more and more difficult to secure deliveries on many of the items carried in stationery stock—particularly those whose basic element is **paper** or **metal.**

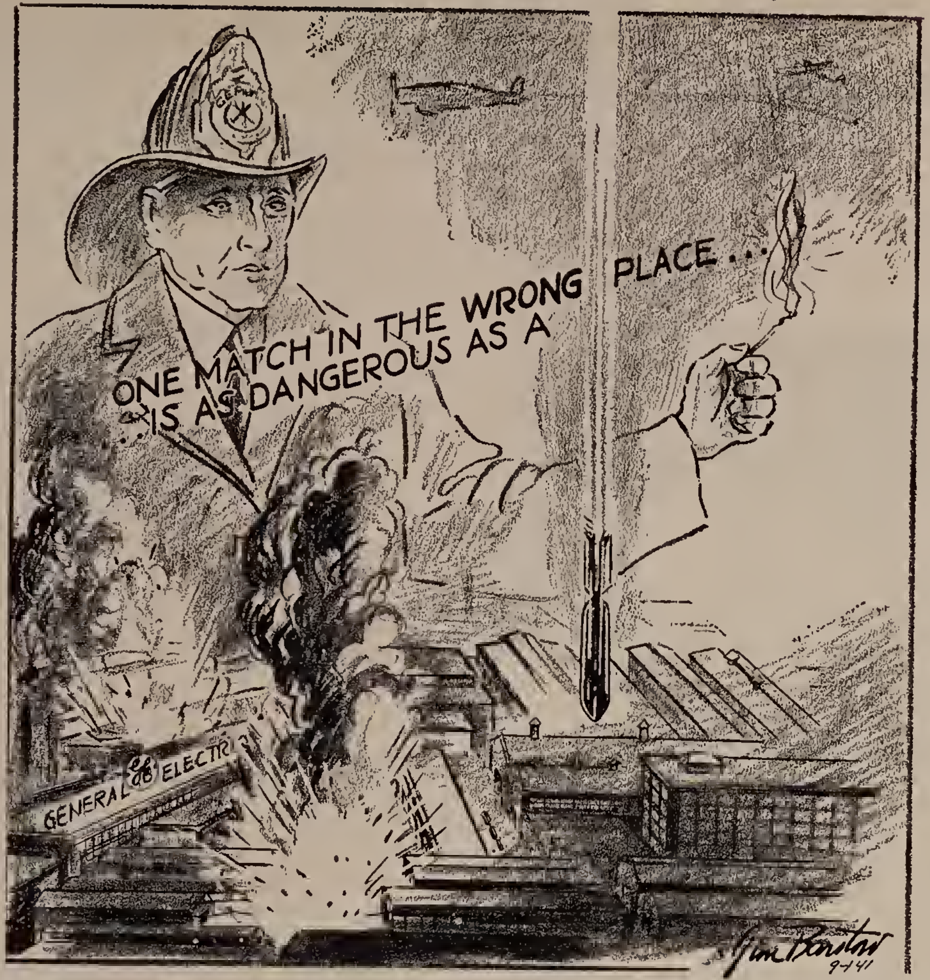
Delivery promises are being extended daily—many as long as six months in the future. Therefore, if we don't want our part in the Defense Program definitely hampered, it is essential that each of us conserve these vital supplies.

For instance, do you use active printed forms for scratch paper. If so, you are wasting supplies.

Unimportant as stationery supplies may seem, the task of operating our factories without them would be well nigh impossible.

We are counting on you to do your part!

TWO DEADLY ENEMIES !



ONE MATCH IN THE WRONG PLACE...
IS AS DANGEROUS AS A
GENERAL ELECTRIC
9-1-41

Fire is man's best friend and his worst enemy. Controlled it brings warmth and comfort to his home, prepares his food, does much of his hard work. Unloosed it brings death and destruction and lays waste to all living things. Fire is indeed the great paradox.

Fire can be America's greatest saboteur. It can be the surest weapon any enemy can use against us. It requires no great army of men, no high priced fighting machinery . . . nothing but one match, one tiny fire-bomb and the job is done.

Remember . . . the match you light a cigarette with can be as deadly as a thermite bomb hurled from a high flying enemy plane. It can wreak damage untold. It can cause work stoppage when we need every minute of time we can gain. It's up to everyone of us to be more vigilant than ever.

Those who know, call today's great war across the seas a "fireman's war". For us in this country it is a fireman's war, too, with every one of us enlisted agains the enemy!

NEWS
FROM THE
CAMPS

We publish herewith with great pleasure extracts of letters sent to us by G-E employees now in government service. Ad.

Dear Editor:

I am writing you and letting you know I am all o. k. and feeling fine. We have about four fellows downstairs and three upstairs who are going in the parachute troop at Fort Benning, Georgia. They will have left camp when you print this in the WORKS NEWS. We will be leaving camp about October 8 and don't know where we will go from here. We have all sorts of recreations such as basketball, football, softball, and also have table tennis in the recreation hall. It is very cool out here at night and also in the morning when we have to get up at 5:10. We have to wear our field jackets. It also gets very foggy out here, especially in the mornings.

I see where you are holding the dances in the G-E Club and would like to get home some time to go to one. I used to go every once in awhile, I thought they were very nice. I went to Long Beach, Calif., over Labor Day and saw the big Douglas plant where they build these big Army bombers. It surely is a big place. I have a friend in camp whose sister lives at Long Beach. She showed us a very good time. I am going to go back a week from this coming Saturday.

They have a walk and a road which is a mile long and out over the ocean. The city looks very nice when you are out at the end of this walk and can see all of the palm trees. It looked as though my friend and I were the only soldiers on the beach. Everywhere we looked all that we could see were sailors in every place we went. I suppose you know that the soldiers and sailors don't get along very well. In fact I almost got into a fight with one going into a dance hall. All that I did was bump him as I was going out and it couldn't be helped. The stairway was crowded and we had to pass one another and that was the result of the whole thing.

Well I really appreciate your sending me the WORKS NEWS. Will close for now. Sincerely yours,

Private Richard Becker,
Co. A., 76th Inf., Bn. H. P.
Camp Roberts, Calif.

Don't permit rubbish to accumulate in basements, work shops, or anywhere about the premises.

Apprentice Alumni Anniversary Program

The 40th aniversary of the Apprentice Alumni Association, the unveiling of a plaque to A. L. Rohrer "grand old man of the apprentice course" and the dedication of the new Navy building at Schenectady will be the highlights of the two-day celebration in Schenectady Friday, October 3, and Saturday, October 4.

The plaque to Mr. Rohrer will be unveiled Friday noon-time by his grandson Albert Rohrer Shelby. It will be dedicated by President Charles E. Wilson. The plaque, of bronze three feet by four feet, carries a bas relief of Mr. Rohrer and a tribute to the work he did in establishing both the Test and Apprentice courses of the Company.

In the evening there will be a parade comprising members of practically all classes of the Alumni Association, three companies of the New York Guard ,and several bands. Dedication of the new Navy building with James V. Forestal, under secretary of the Navy, as the principal speaker will take place in the evening at 8:30. The ceremonies will be broadcast.

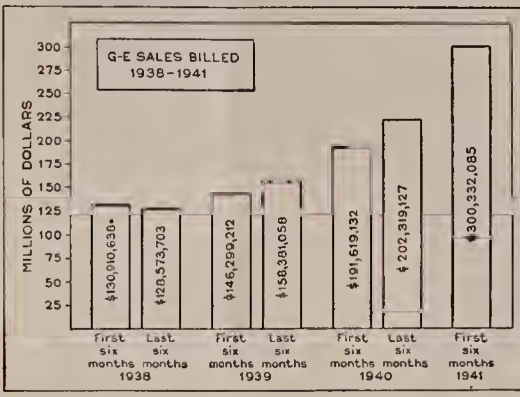
On Saturday the Alumni Association will hold an outing which will include an athletic program.

Highlights of the First Six Months

DURING THE FIRST six months of this year our Company made tremendous progress in the production of defense materials. New employees were added at a rate of about 1000 per week—most of them going directly into defense work or into training for defense work. New plant facilities put into operation reached approximately 800,000 square feet, with an even greater area under construction. Throughout the Company, defense equipment began rolling off the production lines—some of which many of us had never seen before and certainly never thought of building. And week by week our defense effort grew. By the end of the first six months over 60 per cent of our Company's production capacity was devoted to National Defense.

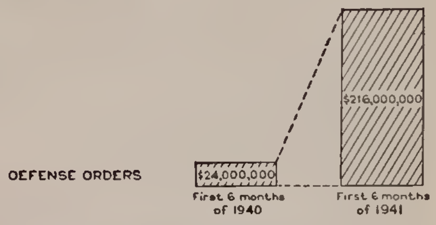
SHIPMENTS HIT NEW HIGH

The volume of shipments billed to customers during the first six months of the year established a record for any previous six months' period, amounting to $300,332,085. This represents a 57 per cent increase over the first six months of last year.



DEFENSE ORDERS UP 800%

Approximately $216,000,000 of the new business booked during the first six months of this year is definitely known to cover equipment for National Defense. This is an increase of 800 per cent over the first half of 1940.

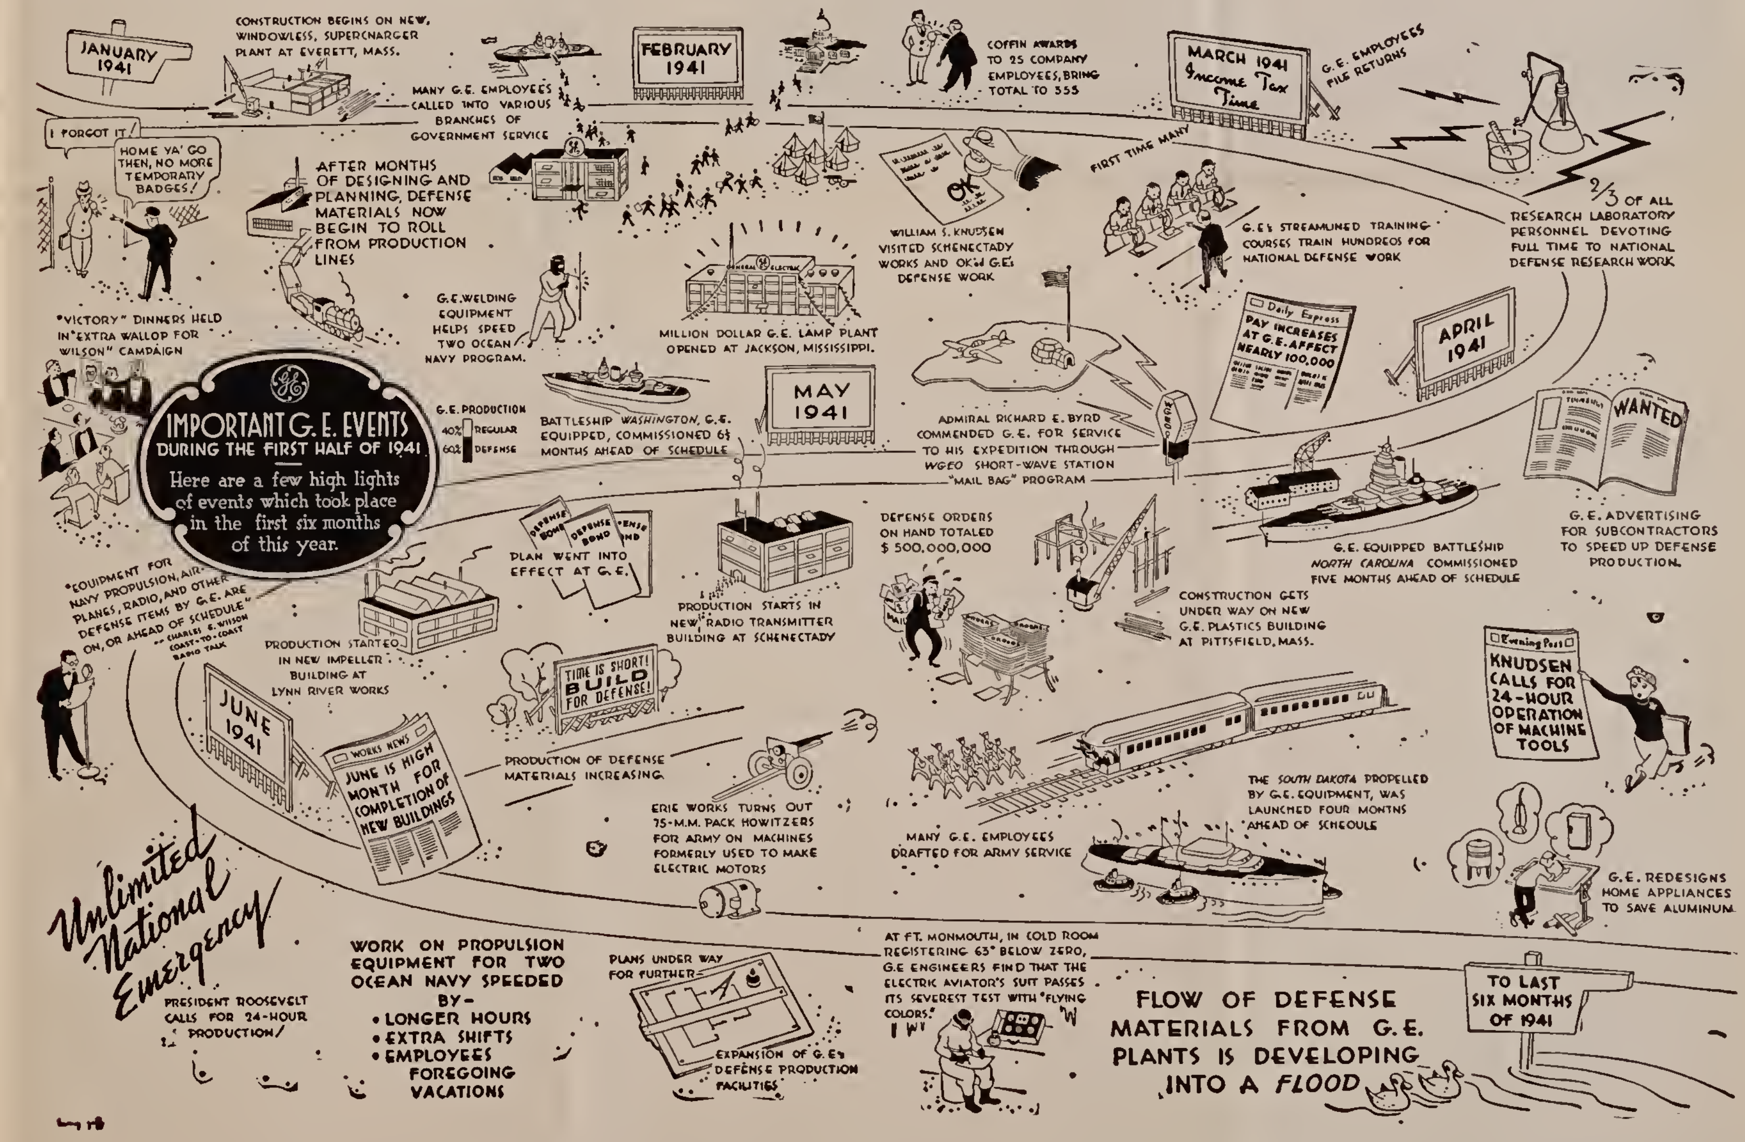


EMPLOYMENT SETS ALL-TIME RECORD

Employment at G.E. reached a new high during the first six months of this year. By the end of June 115,000 men and women were working at the various plants of the Company.

RECORDS WON'T STAND FOR LONG

The records we established during the first six months of this year probably won't stand for long. The expansion program, now under way, provides for construction of over 2,000,000 square feet of new floor space, in addition to that already completed during the first half of this year. It is impossible to predict what new demands the Government will make on us, but we can be fairly certain that production to meet existing requirements will continue at an ever increasing rate.



IMPORTANT G. E. EVENTS DURING THE FIRST HALF OF 1941
Here are a few high lights of events which took place in the first six months of this year.
JANUARY 1941

FLOW OF DEFENSE MATERIALS FROM G.E. PLANTS IS DEVELOPING INTO A FLOOD
TO LAST SIX MONTHS OF 1941

Leaders In Latest Suggestion Award List

Leaders in the latest suggestion award list are—top row, left to right: Lawrence A. Kramer, Winter Street; Stephen Kelker, Bldg. 26-2; Charlotte Hallauer, Bldg. 28-2. Below: Edwin E. Bueker, Bldg. 8-2 and George Angel, Bldg. 17-1. Miss Hallauer's award of $50.00 followed her suggestion for the installation of an accoustic phone system. Mr. Angel received an award of $40.00 for his suggestion to reduce the size of material and to change the dies for stator shells.

An award of $35.00 was made to Mr. Bueker following his suggestion to cut shorter ends from bull-ring copper. Mr. Kramer and Mr. Kelker received awards of $25.00 each, the former for an idea to change specifications of certain rubber tubing and the latter for his idea to provide gauges for winding machine set-ups.

Military Service

(Continued from Page 1)

Training Act of 1940 and the National Guard and Reserve Officers Mobilization Act (P. R. 96) life insurance protection under the National Service Life Insurance Act of 1940, provided application is made on or before December 16, 1941, by those entering service before August 18, 1941, and within 120 days after being inducted or ordered into service by those entering service on or after August 18, 1941.

"The National Service Life Insurance, which is comparable in cost to the Company's Additional insurance, has certain advantages in that it has valuable conversion rights, waiver of premium in event of total disability, and it provides coverage in case a state of war should exist. Inasmuch as there is no assurance that the Company's Additional insurance could be continued in the event a state of war exists, it would be distinctly to the employee's advantage to subscribe for the Government insurance.

"The Additional and Free Insurance will, therefore, terminate at the end of the one-year-and-forty-day period for insured employees inducted or ordered into service under the Selective Service and Training Act of 1940 or the National Guard and Reserve Officers Mobilization Act (P. R. 96) prior to September 15, 1941. All such employees are urged to apply for the Government insurance promptly but in no case later than December 16, 1941, if the employee entered military service prior to August 18, 1941, nor later than 120 days after entry into service if the employee entered military service on or after August 18, 1941."

Accordingly, employees inducted or ordered into military training or service on or after September 15, 1941, may carry their Company insurance for a period of three months instead of one year and 40 days as originally provided. This period will give all such employees ample time to apply for the National Service Life Insurance which is available if applied for within 120 days after being inducted or ordered into service. Whether or not they are insured in the Company plan, all employees are urged to consider seriously applying for this Government insurance.

Winter means a lot of social entertaining including large parties to whom meals must be served. The aftermath of all such parties brings stacks of soiled dishes to be cleaned. Done by hand it is a slow tedious chore; done in the General Electric Dishwasher it is but a matter of minutes—with scarcely any effort on your part.

Free Enterprise

(Continued from Page 1)

unreasoning fear of socialism, but because I am convinced that the vast majority of Americans are better suited to private enterprise than to the public payroll.

"I went to work when I was twelve years old. In the forty-two years since that time I have been fortunate enough to see almost every branch of our Free Enterprise System: research, invention, small and large-scale manufacture, selling and distribution.

"I know there are flaws in that system. But I have seen it, at its best, provide the highest standard of living in the world; I have seen it generate energy, initiative, ingenuity, ambition; give opportunity, and bring out individual ability—far beyond the power of government or political organizations to develop such gifts."

In conclusion, Mr. Wilson says, "Blind John Milton's cry should be ours—'Awake—arise—or be forever fallen!!'

It is my firm conviction that intelligent men in industry, labor, and agriculture will seize this challenging opportunity — not merely to save our system but to perfect it. Then we can go on together, a free, friendly, and united people, to construct an ever greater and grander America."

Fluorescent Starter

(Continued from Page 1)

gineers point out. As is generally known, however, when a worn-out lamp is flickering constantly, yet cannot be replaced for some time due to an inability to get at the fixture, the starter can wear itself out within a relatively few hours. The new Protector-Starter is designed to cut out the lamp and prevent this from happening. When a new lamp is installed, the Protector-Starter is again ready to function.

The first installation of the new device has already been made, and it is being field-tested in a large factory. Engineers expect that a few more weeks of operation will determine its opening characteristics exactly, and General Electric will then place it in production. Since the primary need for the Protector-Starter will be in large factory installations, the entire output at first will be restricted to those factories doing a large amount of defense work.

Suggestion Ideas

(Continued from Page 1)

ment to conserve materials. All employees are urged to use the Suggestion System to register their ideas and a special invitation is issued to our newer employees to send in their ideas.

A tabulation of the suggestions submitted during the "Double Award" months compared with the weekly average during July may be found on page 8 of this issue of the WORKS NEWS.

Elex Conference

(Continued from Page 1)

gram will be then adopted for the official program.

Leaders of the three groups and the secretaries are Helen Bleke, leader, and Dorothy Mueller, secretary, group 1; Eileen Foor, leader, and Margaret Suelzer, secretary, group 2; Irene Meyers, leader, and Vivian Hitchcock, secretary, group three.

Private busses for the delegates will leave the G-E Club at 9 a.m. on October 18. All members of the Elex Club are invited to attend the conference and may obtain information on the cost and make reservations with Miss Meyers, Bldg. 21.

Delegates are asked to report to "Peacock Alley" at the Hotel Elkhart for registration immediately upon their arrival. The conferences will be held in the "Athenian" room and meals in the "Empire" room.

SCIENCE FORUM

by L. A. Hawkins

Q. How can oil paintings be cleaned?

A. To clean oil paintings use a good grade of castile soap. Make up a good lather or suds and apply with a fairly stiff, large brush. The suds should then be removed with plain water. If there are a few remaining spots that do not come off with soap, take a slice of raw potato and rub it over the spots, after which clean thoroughly with pure water. In about two or three days after the painting is clean and dry, pick a dry, bright day and coat the painting with mastic varnish. This will restore the colors to their original brilliance.

Q. Is it probable that atomic energy will be used in our time?

A. It is not entirely improbable. The theoretical possibility has been demonstrated, but much research remains to be done before practical utility can be reached. The extent of the difficulties which must be overcome is not yet definitely known, but many physicists are optimistic and research is being pushed vigorously. If success is achieved, scarcity of suitable materials may limit atomic power to special applications.

Q. What is documentary film?

A. The term simply means film which contains a record. For example, the Library of Congress has on file more than a million feet of film records obtained by photographing manuscripts in various libraries of the world, with a small camera using 35 mm film. Instead of a whole page of a newspaper, for example, one has a picture of the page, about one inch square and little thicker than the page itself. When one wishes to refer to the newspaper page, the small film picture is projected on the screen and one may have a copy of the page, of any size desired.

Annual Elex Banquet Will Be Held Monday

The annual banquet of the Elex Club, at which time new officers for 1941-42 will be installed, will be held at the G-E Club on Monday, October 6. Dinner will be at 5 o'clock and reservations must be concluded today.

The party is termed "American Girl Banquet" and will feature unusual table decorations depicting hobbies, sports and avocations of the American girl by means of hand-made dolls dressed in original designs and settings.

Famed Engineer Dies

William L. R. Emmet, 82, famed General Electric consulting engineer and uncle of Herman L. R. Emmet, manager of the Erie Works, died Friday, September 26 at the home of his nephew in Erie, Pa. Mr. Emmet was widely known for his work with turbines, electric ship propulsion and the mercury vapor process of power generation. Funeral services were held Sunday in Schenectady and burial took place Monday in Arlington National cemetery in Washington, D. C.

NEWS THROUGH THE PLANTS

From The Feminine Viewpoint

Aren't You Glad You Are An American, An All American Girl? For . . . where can girls enjoy the freedom of sports and careers in the business world in any land but our good old U. S. A. ? It is Great To Be An American . . . and it will be great to be All American at the Elex Club's annual fall banquet next Monday, October 6th, celebrating the closing of 1940-41 year and the opening of the new 1941-42 season.

"American Girl Banquet" appropriately named will feature unusual table decorations depicting the American girl's hobbies, sports and avocations.

Table settings are from a special collection of dolls made by Miss Alyce Ringler, of Beta Sigma Phi Cultural sorority of this city. The dolls are hand made, dressed in original designs and in settings representing sports such as skiing, skating, swimming, tennis, hunting, fishing, golf, bowling; the arts are represented by music, drama, the dance, featuring a ballet setting, painting, sculpturing. Hobbies include aviation, gardening, Red Cross work, traveling, entertaining. Industry features the office and factory worker.

The tables will be centered with these clever settings and candles in rainbow hues will be used throughout making the decorations unusual, colorful and unique.

In club annuals Elex can well be featured as All American Girl's Club, we aren't only known throughout the country, but inquiries and letters come every week commenting on the club's work, or making inquiries for similar clubs wishing to adopt program outlines and form clubs like Elex. Fort Wayne can well be proud of this outstanding organization. And every General Electric girl can be proud that she has the opportunity to join and be a part of an All American Girl's Club. United We Build.

Plastic Flashes

Mildred Bair certainly looks cute when she steps "high, wide and handsome." How those "spectacles" create illusions.

Dorothy Lebrecht, Bldg. 12-3 certainly has a recognizable laugh.

Sigh! Sigh! We just can't keep up with Betty Adams and her new Romeos. How do you do it, Betty?

Can you imagine : Carl Saaf drinking chocolate milk? Marguerite Hullinger being in the dog house? Lorraine, Bldg. 12-3, not going to Missouri for two weeks' vacation? Joy Stuckey working too laboriously at times? Deveta Rietdorf with a sophisticated hair styling?

Carl Saaf evidently doesn't like to have bets paid to him on the instalment plan. With such measly dime-a-week payments, you should be irked.

It seems the years for Ed Fogel are going backward instead of ahead. He dates his longhand notes 10 years in arrear.

We wonder if Gloria Prough still has her bank night evenings. If so, see the Tillies for assistance in disposition.

The Tillies.

Transformer Employee Recounts Interesting Career In The Orient

Above Miss Kurtz is shown aboard ship bound for the Orient. Members of the group partaking of a meal in Chinese style include players from the University of California baseball team who played exhibition games in the Orient. Below Miss Kurtz at her work in Bldg. 26-3.

Life in the Orient. Shanghai. Manila. Hangchow. It sounds exciting! "And it is exciting." So says Bonnie Kurtz, Bldg. 26-3, who lived there for 7 years.

Bonnie is a Fort Wayne girl who attended South Side High School just as many of us did. But sickness proved a turning point in her life. She battled through a 1½ year siege of infantile paralysis, and then worked at a local department store for some time.

In 1930 Bonnie left home to live in Manila in the Philippines, where she stayed until December, 1934. The outstanding events of her life in Manila are mainly social. She was hostess at an American Halloween party, which was attended by Arsenio Luz, the mayor of Manila and Don Rafael Alunan, president of the Philippine Sugar Association, both internationally known figures. Halloween in the Philippines is a religious ceremony with a good deal of ritual, including the lighting up of the graves. Therefore Bonnie's party was somewhat different from the ordinary Philippine holiday.

Thanksgiving, too, was a slight variation from the American brand. It was celebated on a sugar plantation by eating carabao (water buffalo) meat. "Tasty but tough!"

The most exciting moments of her life in Manila came when she shot the Pagsanjan Rapids in a banca. The stream is very rocky and whoever finds the courage to go through the rapids, puts his life into the hands of the guides. The guides, naturally, are experts who miss rocks by a fraction of an inch!

From Manila Bonnie went to Shanghai, China, where she worked for the Oxidite Battery Corp., first as a telephone operator, and later as Secretary-Treasurer of the company. The Shanghai branch employed 45 natives in the factory and had an office staff of nine. Bonnie spoke enough Chinese to teach from 45 to 60 coolies in the "godown" (factory) to make batteries and battery plates from beginning to end.

Bonnie's boss, who was British, happened to be on the same boat on which Charlie Chaplin and Paulette Goddard spent their honeymoon. He introduced Bonnie to them, and she also met them later at an International Arts Association reception and tea. Also present at the tea (and introduced to Bonnie) were Anna May Wong and Butterfly Wu, the famous Chinese actress. Bonnie also signed the guest log at the grave of Dr. Sun Yat Sen, the founder of the Chinese Republic, who is buried at Nanking.

A Chinese family invited Bonnie to celebrate the Chinese New Year with them. The guests were served no less than 37 different dishes!

Hangchow, China, is a beautiful spot. Bonnie says, "Heaven must be something like Hangchow." There is a sufficient supply of conveyances to permit everyone to see the sights. The traveller may choose to go by way of plane, ship, taxi, train, rickshaw, sampan, sedan chair (carried by four coolies), horseback, bicycle, burro, camel or tram!

The cost of living in the Orient is extremely low. Servants are cheap—the average servant costs one dollar per week (and Chinese servants are perfect—they do exactly what they're told). The only articles that are particularly high in price are gasoline and imported things.

In comparing life in the Orient with life in the states, Bonnie summed it up like this: "Pleasure before business there; business before pleasure here. Before any business is discussed, tea is served; this is a practice of all shops. From 4:30 until 5 every day all companies serve tea to their employees. When an employee finds out that a friend of his is in port, he merely informs the powers that be, and takes off all the time necessary to show his guest the town. The businesses believe that their employees should be seen in the proper places at the proper times—it builds prestige."

Bonnie came back to the States in 1936 on a six-months home leave. She returned to China in December, 1936, but left again in 1937, one month before the Japanese descended on China.

After her return to the States she lectured on China in various places, including a radio lecture in Salt Lake City in 1937 during the showing of "The Good Earth."

Bonnie is now making her home in Fort Wayne, and works here at the G. E., together with her mother and two brothers.

Sleuthing In 4-6

Talk about popularity! Harry Richardson stole the show from the soldier boys at the "Candidate Swing" last week. He had no less than five girls at his heels all evening. Why not give the other fellows a chance, Harry? . . . If you think Ruth DeWitt wasn't a cute baby, just ask her to show you her picture that she had taken at the Bluffton Fair. You'll change your mind then, or I miss my guess. That picture would win first prize in any contest. . . . It certainly was good to see everybody at work Monday morning after such a strenuous week-end of inventory. Vera Berning and Marge Szink looked a little droopy last Saturday evening, but it all came out in the wash. . . . It really sounded as if Dorothy Mueller and Jean Junk enjoyed their inventory. Wish we all could have had hot dogs and coffee. Nice to furnish eats at a time like that. . . . Nobody is going to doubt Joe Anderson's word and get away with it. He had his picture taken with a big fish that he caught. But because his head did not show on the picture, certain people refused to believe his story. Was Joe stumped? Absolutely not! He proceeded to have a letter written by the person who had taken the picture, and who had also seen the fish caught. Said letter was duly notarized and presented to the doubting Thomases. . . . We offer our congratulations to Dorothy Mueller, our new Elex Secretary, and also our best wishes for a most successful year.

A surprise house-warming was held recently at Margaret Beerman's new home. Girls from Bldg. 4-2 who enjoyed Dagwood sandwiches and other "things" were: Audrey Young, Lillian Voirol, Mildred Shumm, Peggy Brandyberry, Irene Blank, Mable Miller and Kathryn Van Zant.

SANDY SAYS

My cousin Colin's boy, Douglass, is no "Quiz Kid," but he manages tae give some kind o' answer when his techer asks him a question. She asked him what a budget was.

"Well," he said, "A budget is like when my mother puts some money away for food, and when my dad tries to borrow a dime of it for tobacco, she won't budge. If she'd budge it wouldn't be a budget, I guess."

Budgets seem tae be popular now. Ye read o' all kinds o' them in the papers. Ye probably hae one at home, even if ye don't put it down in writing.

No doubt in the General Electric Co. there are hundreds o' them, and the 1942 budgets are being made up now, I hear.

But did ye know they hae a budget for cost reduction too? Weel, I heard about it the other day. I suppose some wise men meet and figure out how much we will have tae save in 1942.

Weel, I suppose if ye don't want to be hap-hazard about it, ye must have a plan o' some kind and a goal tae shoot for.

But I don't ken why they call the "cost reduction budget" a "budget." Some people would call it a bogey. And, I suppose they'd call the man who set it a "bogey man."

Other people, Walter Sunier, for instance, would call it "par." He'd probably also say that in golf, ye don't want'a' waste a shot, while in "cost reduction" ye do want a shot at waste.

Well, what I started out tae say —and did—was that we hae a budget tae meet in cost reduction, and in these times we'd better meet or beat it, if we want tae be good Americans, as well as good employees—looking for more profit sharing.

I also mentioned tobacco. O' course, not getting a dime from his wife didn't worry Colin. He just went on borrowing from his friends. "Now," he said, "I don't like tae borrow tobacco. I hae such a hard time keeping it lit till it burns down level wi' the top o' my pipe."

About Poison Pen

Co-workers have long marveled at the almost endless stream of more or less polished essays which week after week flow from the pen of "Honest Don" Shultz. The true facts may occasionally be stretched —the spelling of names may be incorrect but the quantity and perhaps the quality of the output remains high. This endless stream of rhetoric has amazed his readers. The question of "How Come?" can now be answered briefly. Taking note of Dagwood Fisher's eminence as an oracle, old "Poison Pen" has appropriated his dictionary and may be seen busily searching through its pages each week when preparing his current evidence of Winchellisms in Bldg. 19-3.

Sergeant Frank Martin bought his wife a canary, so Julia claims they do not need the alarm clock anymore.

Motor Generator Static

IT GOT AWAY

Her line cut through the water sending showers of gleaming spray into the wind, as with the skill of a master she played the finny giant, in and out, up and down, backward and forward, every way except into the landing net. Yes, chums, Helen Stahl really hooked a big one (we have her word for that) and the fight lasted from early morning until late in the evening, when finally disgusted with such playing around, the fish leaped high into the air, finned its nose at her and departed for home, leaving our heroine with an empty hook, disgusted look and water in her shoes. Though so completely exhausted from the struggle she was barely able to row to shore and broken-hearted over her defeat, Helen says she will try it again and next time they won't remark, "It got away."

BELATED GREETINGS

Because "Smiling" John Rogers celebrated his birthday Sunday, September 28, the boys were unable to pay their respects until Monday when John came to work at noon, his desk was adorned by a chocolate cake, topped with a large candle. While his pals admit it is a customary habit to govern the number of candles by years of age, they feared the heat from so many flames might overcome a large part of our office force—hence, the one, "Man's Size" candle.

We all join in a belated greeting, "Many more happy birthdays, John."

DIG DOWN

On rare occasions, some individual whose kind acts and noble deeds have always been credited to others, is brought from his self-created obscurity and given the publicity he so richly deserves. Such a man is Walter Histed, Bldg. 19-3. Thoughtful little gifts, such as cleverly wrapped craw-fish, pencil shavings or rubber bands for smoking tobacco, buttons of garlic, or newspaper clippings and cartoons are continuously bobbing up, and Walter, always very graciously sits back and allows either Bud Fisher or "Honest" Don Shultz to take the credit. No matter what happens, Walter is always first on the scene to give helpful suggestions and names of possible culprits and will even plant evidence, on or in the suggested persons desk to aid that person in receiving credit.

The Planning Section's slogan now has become, "No matter what happens, if you dig down far enough, you'll find Histed."

WAIL OF THE WEEK

"Curly" Mannan philosophizes—It's bad enough when a guy breaks his glasses, then falls out of a boat, but when he gets picked up for speeding all in one week—that's really bad.

SAYING OF THE WEEK

Jerry Frye remarks, "In one way the horse and buggy is superior to the automobile—sometimes the horse has more sense than the driver."

We add among "forlorn figures"—Katherine Ensberger, Bldg. 26-2 when she discovered the call button she had been punching all morning was out of order.

What's the matter with Velma "Skipper" Meads, Bldg. 26-2. We noted her absence when the parade of motor boat riders started on Lake George.

G-E Board Of Directors Meet At Schenectady

Directors of the Company met Friday, September 26 in Schenectady for the first time in six years. They made an inspection of the Schenectady Works in addition to transacting routine business.

Left to right, seated around the table are: Percy M. Haight, IGE secretary; S. Sloan, Charles D. Dickey, Gerard Swope, honorary president; Charles E. Wilson, president; W. W. Trench, secretary; Philip D. Reed, chairman; Owen D. Young, honorary chairman; Clarance Stanley, Robert C. Stanley, G. Peabody Gardner, Leon Fraser, Charles F. Adams, John P. Wilson, Francis L. Higginson, Lewis B. Williams, Bernard E. Sunny and Clark H. Minor.

19-4 Nibbins

Two girls in Bldg. 19-4 have received diamonds within the last month. They are Marge Reinke and Ellen Parker.

The night shift girls in Bldg. 19-4 were certainly out for a good time last Wednesday afternoon. It was Kid's Day at the Bluffton Fair and they all got past the gates on children's prices. Mary Roebuck insisted she stop for a pineapple whip every time we went past the wagon. Vilena got pretty dizzy riding on the Silver Streak. Rosemary Coovert wanted to spend the rest of the afternoon in the auto scooters getting bumped around. Virginia Fox broke a camera and upon getting to work Magdalen Hook found two of her torn pictures pieced together on a sheet of paper with a WANTED sign above. That night up at work was spent in moans and groans from having too much pop, candy and carmel crisp. Or could it have been the Loop-A-Plane that upset everybody.

Congratulations to Mr. and Mrs. Leo Brenizer on the birth of their baby daughter.

Louise Sinn demanded that her name should not be printed in the Works News this week. All right, Louise, we won't put it in. As likewise with Joe Prangle, who said he'd tear all the Works News to bits. What's the matter, are you both bashful?

19-5 Office Chatter

Helen Conrad, Bldg. 19-5, insisted her new typewriter has larger print—micropic eyes, we calls it. If you are interested in what's playing in the local movie houses—see Richards—he really invents the titles. Don't know if May Rose Slagle will be here at all this next week with "Here comes the Bride" drumming in her ears. . . .

Anyone wishing to learn "Hula Dancing" see Frank Lawrence, Bldg. 4-1.

A Good Citizen In 4-2

We have reliable information that because of the lack of material for the manufacture of Safety Shoes, Frank (Hawkshaw, the Squirrel Hunter) Hemrick, Bldg. 4-2, has generously offered the hides from a quantity of blind flying squirrels that he has successfully garnered during the present open season.

Ward Grimm, Bldg. 4-3, spent last Saturday evening at the Bluffton fair. The trouble was that Ward forgot his periscope and could not find the hamburger in his sandwich.

Frank Phillips and Bertha, Bldg. 4-3, had the time of their lives at the Bluffton Street Fair. Only don't get lost next time, we hope.

Why is Everett McKeen, Bldg. 4-3, so secretive about where he spent his vacation. How do you like Wisconsin, Everett?

Bldg. 4-2 wishes to extend their sincere sympathy to Flossie Schmidt in the death of her mother.

If the employees of Bldg. 4-3 wonder who the new red-head is, take a second look. You'll find it is Hildabelle Warren. Hi, Red!

Elroy "Fire Alarm" Bailey, Bldg. 4-3, gets very excited every time the fire siren sounds. So much so that the other day when an alarm was given he kicked over his chair and broke it. We hope that this does not occur at home. Perhaps his wife has a method by which she can tone him down. He tells us that eating figs has a great soothing effect upon his nerves.

Sam Trautman, Bldg. 4-1, was plenty worried last week. He lost his button and could feel that fifty cent piece slipping out of his hands. After an extensive search, the button was found. Sam gave a sigh of relief.

Gosh, we wish it would hurry up and get cold so Fred Pyle, Bldg. 4-1, could stop worrying about his figure. He says girdles are too hot in summer.

Winter Street News

The girls here at Winter Street wish to congratulate Helen Bleke, new president of Elex for the year '41-'42. More power to you, Helen.

Help Wanted—

Someone to explain to Harold that Joe Louis fights in rounds instead of innings. Would appreciate if this was explained before Louis' next fight.

The sudden flashes in the office aren't caused from poor fluorescent lighting, but from the bright red sweaters and dresses, along with the new sparklers that are being worn.

Since Hugo Mueller's vacation began, a few people around the office have occasionally run out of matches. I wonder why — It couldn't be that they no longer have the use of his box—or could it? ? ?

Al Ralston reports that he is back from his vacation. Evidently he worked around the house as he inadvertently told that his wife bought him two loads of black dirt and he had to spread it around. This is quite a come up from the stuff he has been spreading around the office.

Deaths

George B. Farrell, formerly a member of the Plant Protection Department and later employed in Bldg. 26-1, died Monday from injuries received in his first try at parachute jumping. Funeral services were held Wednesday afternoon with burial in Greenlawn Memorial Park.

Charles W. Cline, an employee since 1917 and a member of the white-armature department in Bldg. 19-5 during his entire period of service, died on September 25. Funeral services were held on Saturday with burial in the Lindenwood cemetery.

Do not put hot ashes in wooden barrels, boxes or baskets—use metal containers.

I want to take this opportunity to thank all the Elex girls for voting for me.

Signed: Catherine O'Connor.

I supose you have all heard the story about the "Little Red Hen." Well, Augusta Fuller, Bldg. 4-3, has decided to sell little fat red hens as a side line. Good luck to you, Augusta.

It looks like Cliff Witham has found a new hobby. Collecting baby pictures. If you have any, see Cliff.

During the recent extended dry spell Henry Spahr, Bldg. 4-2, was heard to say that if it would only rain he would gladly walk all the way home in it just to feel how it was to get wet again. That evening during the lunch period it was somewhat foggy and he dashed out of the cafeteria, trying not to get damp, but he decided it was too damp and knocked down some little fellow about half his size and proceeded to pick up his umbrella. He let the little fellow lay and went on his merry way to lunch secure in his own mind that he wouldn't get damp.

How Good Is Your Arithmetic?

Time limit on following problem one minute and no seconds.

What percent of 10,000 is 1?

The correct answer is the response shown to our request for your help in obtaining entertainment for the G-E club this season.

We issue the sole right to this person who showed his interest in his club to (literally speaking) howl his head off if the entertainment doesn't suit him this year.

The rest of the people had better start suggesting quick or take what we think is what you want.

You elected the officers. Please support them.

Incidentally the dances will start October 18th and the picture shows November 2nd.

Mail your suggestions to P. Vogt, Bldg. 23.

NEWS THROUGH THE PLANTS

26-3 Tidbits

Agnes Christman had a blind date Friday night which proves the G-E dance was a success. He's in the army.

Betty Busse still insists the tall, dark and handsome man she meets in the park is her brother. We wonder if this is so, Betty?

Flash! We would like to know what the accident was around Don Poland's desk??? And the comments you made on it, oh!

Eva Thomas, Alma Alt and Ginger Smotherman were seen learning to skate at Bell's. Keep it up, girls, pretty good, I'd say.

The gals on F bench decided to launch a campaign on the conservation of gas, Sunday evening, by collecting a wagon, load of hay, couple of horses and going for a hayride through Fort Wayne. On Calhoun Street a few strands of hay found themselves on several cars. Some conservative souls informed the police that we should be told to save our straw for defense, too; yes, we were informed.

A hay battle was started on the wagon, so we promptly initiated Bill Holloway on the subject of "how to become a hayseed." So, consequently we all arrived at our destination safely; but surprised due to the fact that Essig Cook still claims she drove the horses part of the way back. We understand that the only disappointment in the evening was experienced by Ella Lawson and Lillian, because they couldn't ride horsey back instead of on the wagon. Our only scare was little Florence Drake's slipping off the wagon and Ella's hot dogs falling in the fire; Lucille Holloway proved herself an efficient housewife as well as the life of a party by putting all her hot dogs on one stick, thus saving extra work running back and forth. Music for the evening was furnish by the "Harmony Sweethearts." Ray and Irene Craig, Art Kyler, Mac Buhler and his wife, Lucy, claim they acquired oat lungs but know it must be the results of the poison ivy we built our fire in. As the result Ella Lawson has been to the doctor several times. Those who were too busy eating to cut up were Ruth Schafianski, Bud Held and Floyd Flaig. We don't want to forget to thank Bill Cook for being our fairy godfather by building our fire and making sure we had plenty to eat. We sure did!!

We are glad to hear that Betty Griebel and Sally Bowers were able to return home from the hospital. Hope you will be back on the working list with us all soon.

The Italians haven't anything over on Helen Walker and Aileen McKinzie as far as spaghetti goes.

"No, I do not like the farm life," says Kate Phillips. What's wrong with the farm, Kate? Was it because the chickens, pigs, horses, cows, etc. scared you?

Grace Towsley and Margie Wisel don't sing "A-bowling we will go." They developed rheumatics or perhaps just sore muscles from one day's training and that's enough for a while. No score was mentioned.

Why is Carmen Durfey so tired and worn out all the time? Guess its painting walls plus G-E, we hope.

The big moment is over for Dawn Van Buskirk. She has her name changed to Mrs. Carlisle Hanson. Lots of luck and happiness to you both in your new home.

One Hundred Percent For Safety

THIS IS JUST ANOTHER REASON WHY THE WIRE & INSULATION DIVISION HAVE HAD NO LOST TIME ACCIDENTS SO FAR THIS YEAR

Cleo Crowe, safety committeeman in Bldg. 2, is shown in above picture with his toes under the spool of wire on which Scott Armstrong is seated. He doesn't seem to be a bit worried about an accident. Neither does Mr. Armstrong or the rest of the men looking on. They all know that the safety toe cap in Cleo's shoes will protect his toes because they also wear safety shoes. All employees in this department wear safety shoes—and this includes the foreman.—H. L. SMITH, Safety Engineer.

Sunbeams From 17-4

Just because Ruth Lemert was seen hanging from a scaffold on her house, she doesn't want it said that she is any relation to a monkey.

Cupid isn't the only one that carries a bow and arrow around, Bob Bennett does all right with them himself, only his isn't romance, its archery.

Nick Abbott just mows them down with his love songs, but they are all sung for private consumption so the rest of you gals may as well not listen.

Merle Kirkpatrick can sure sling a mean salad, at least Eileen Foor thinks so, and as for me, well, if I were a young man, Merle could hang her apron in my kitchen any day.

There are several ways of disposing of coffee, you can drink it or you could spill it, like Fritz Reinking does.

Thought for the week: Be honest, do your best today and God will take care of tomorrow.

Granny.

It looks like the fishing season is closed for Beulah Wooley, Bldg. 4-3. She has packed up and moved back to town for the winter. P. S. She'll probably go ice-fishing all winter.

On Monday evening, September 22, the Oriental Gardens was the scene of a dinner party held in honor of Thelma Court, who on October 4 will become Mrs. Jack Winebrenner.

She was presented with a beautiful corsage and gift. Those attending were Loretta Sheehan, Deloras Smith, Eleanor Kesner, Dorothy Neuman and Maxine Swaim.

Gossip From 19-5

Bea Stalter was sorry she could not attend the Bluffton Street Fair because she was most anxious to see someone she knows. Don't worry, Bea, they will have another fair next year; maybe you will see him then. Since Lloyd Garrison and Clarice Fyock have taken up Spanish, we don't know whether they are talking about us or whether they are really going to spend their vacations in Mexico.

We wonder why Malinda Gehle had to take Elsie Frede's hand the other day when the fire whistle blew. Were you afraid of the big whistle, Malinda?

Jane Getty has returned from her vacation, spent in Wisconsin.

Three Men In A Boat

The three men—Ted Wagner, Bill Shovlin and Tony Hollocher. Other things in the boat—a twin motor and a nice burlap sack of crappies. Catastrophe — crappies hanging over edge of boat. Violent starting of motor—No fish.

If some of you folks are in doubt as to what is the cause of "Northern Lights" please see Ruth McCuaig, Bld. 4-3. She even has the encyclopedia beat.

Two men were discussing the reasons for success and failure.

"A good deal depends on the formation of early habits," said Howell.

"I know it," replied Powell. "When I was a baby my mother hired a woman to wheel me about, and I have been pushed for money ever since."

Borings From 4-4 Office

Well, here rests your own correspondent, nothing to say 'cept I'm starved. It certainly is a windy day, hats are blowing, dresses are blowing, and people are running after the things they have lost or running from the wind and the rain. . . . Everyone, almost, was at the Bluffton Street Fair with everyone else last Saturday night. My, what a crowd. . . . The funniest thing, almost daily, is LaVon Price breaking her chair. Poor Cliff Bowman just sits around until it breaks and then he is the carpenter in the crowd and has to fix it. However, she isn't the only one. I was sitting on Art Wedler's chair and the thing tossed me over and I almost fell head first into Marge Brown's waste paper basket. . . . If anyone knows how to make peach cobbler besides Pauline Young, please send the recipe to Bldg. 4-4 office, in care of me, and I'll see that the deserving person will receive all. So please rush as peaches are just about out of season. (Won't Mickey be surprised if all would send him the recipe, or perhaps you could send one with a recipe). . . . LaVon Price says, quote "The only reason I can figure that an elephant and a hamburger sandwich are alike is because neither one can climb a tree." Unquote. . . . The other day when we had a fire drill, Esther Allar said she thought it would be all right if she remained inside, as all the men had that privilege. What if the place would really be on fire. She had better change her mind. . . . Clayton Culver has at last issued an invitation for me to bring my gal and come up to his cottage at the lake. To think it took all summer for me to promote this and it is really too cold to go swimming. . . . Nate Porter is going on his vacation next week. He is going to his old home in the Ozark Mountains. He is going to take all his old issues of the current publication and paper the walls of his home. Well, Nate, we all hope you have a very enjoyable vacation.

'Tis plenty for now, I remain sincerely as ever,

Elmer, the field mouse,
The Rat to you.

26-5 Tool Bits

Kenneth (Dick Tracy) McCague always gets his man. After a careful study of the evidence, he immediately pounces on the culprit, *he thinks.*

There is one thing that we are sure of and that is: Winter is here again because Carey Baker turned on the heat.

The following is a conversation overheard in Art Thieme's congenial group of Tool men:

Henry Wittber to Earl Lenz: "I was over to the Bluffton Street Fair last night. Saw plenty, but I never spent a cent; came back to Fort Wayne to buy my hamburgers."

Earl: "I don't go for any Street Fair gyp stuff, either. I didn't spend any money."

Enter Rufus Niblic, Bluffton home-town boy, getting pretty hot under the collar. "Say, I bet all that kept you boys from having a good time was somebody to pay your fare over and back. No wonder Johnny Jones Circus charges admission—etc., etc."

Enter Walter Best. "Don't be too hard on these fellows, Rufus; they are saving their money for Defense Bonds and I happen to know Earl traveled on gas from those seven barrels he saves each year and Hank spent plenty buying stamps for his collection."

Enter Gordon McDougal: "Earl and Hank always padlock their billfolds before each trip."

Enter the G-E 8 o'clock whistle. Tch—tch—saved by the bell.

Frank Hoffman assumes new duties as Traffic Sergeant at the 5:00 o'clock lunch cart. It is suggested that he study the modern beer parlor bouncer's technique.

Russell Mueller believes in comfort to the "nth" degree. Last Friday he had Doris Windhorst purchase him a pillow. He didn't specify the color or thickness but through Doris' feminine instinct she purchased a very thick—pink pillow.

Second Childhood

There are a great many things that would cause a man to limp—rheumatism, chilblains, malignant corns, E-flat Crud and countless other ailments, but no one would ever accuse Chief Doehla of going to bed over an hour and a half of softball.

However, at the American Legion picnic last Saturday, the urge of his pent-up youth, together with a vicious desire to get at the umpire's throat, was too much; hence, the wheelchair and the G. A. R. condition Monday.

Lawrence Schuster, Bldg. 26-2, would like to join the Elex Club, it is reported. It is said Lawrence is willing to sit way off in a corner by himself.

Training School—Harley Riclenour, 472 Penn Ave.; Wayne Dye, 1021 Columbia Ave.

Office—Verna M. McMillen, 409 Greenwood St.

Left the Hospital—Cecelia Bowers, Patricia Timme, Ed Auth.

Returned to Work—Harold Steinbacker, Marjorie Reincke, Charles Crum, Harold Stabler, Levona Porter, Mary Ellen Armstrong, Donald McCollister, Petra McCollister, Rita Helmer, Dale Stutz, Gilbert Jamison, Delores Liniger, Virginia Wilkinson, Richard Goller, Lucile Crum, Jean Meyers, Erma Shankster, Bonnie Jetmore, Lawrence Duke, Richard Simpson, Eldora Baker, Louise Busse, Kathryn Lahrman, Olive Sundsmo, Hilda McNamara, John Clymer, Mary McCague, Earl Jones, Luella Lore, Walter Goggeshall, Georgia Winesburg, Lillie Beng, Mary Robertson, Charles Crum, Selma Moeller, Ellen Gerber, Chester Hewitt, Nellie Williams, James Harris, E. O. Nickleson, Ana E. Kensill.

Glyda Yoder's (Bldg. 4-3) secret ambition is to be a member of the Fire Department. She would like to ride the "Hook & Ladder" truck. We also learned that she would like to blow the fire whistle on Fridays, too. Is that why you go past the fire house every noon, Glyda?

Sympathy

We extend our heartfelt sympathy to the family of Charles Cline, 42, who died Thursday, September 25. Charlie was employed in Bldg. 19-5, having been a member of the white-armature department for 24 years, 1 month, and 11 days. All of us will miss him, as he was a friend to all!

It seems that it is next to impossible for Eldon "Toodles" Mee, Bldg. 4-3 to shake off the effects of his childhood vocation. That of passing newspapers. Every Friday evening he tries to carry off a large bundle of WORKS NEWS.

The Ross Boat Livery at Wawasee collected 25 cents "salvage" from Henry Reehling, Bldg. 4-6, when he was unable to push his new boat off of the "reef" at Morrison Island without assistance last Saturday. A few weeks ago when Henry put on his Admiral's cap to go yatching, his small grandson said "Oh, Mama, look! Here comes the laundry man." Saturdays escapade indicates that maybe it was a laundryman's cap after all.

Herb Tilford, Bldg. 4-2, is not going to trade in his old car after all. After a couple of push starts from the parking lot, Herb discovered that excess corrosion on the battery cable was preventing a sufficient amount of starting power. P. S. Other than five or six flats a week Herb says she perks rather well.

Clarence Hatfield, Bldg. 4-2, always anxious to display the merits of his car, gave Frank Kimble, Bldg. 4-3, a thrilling demonstration on their way to attend the picnic at Pokagon State Park. Shortly after leaving Auburn, they encountered a car of the 1928 vintage. Clarence said, "Watch me take this bird." He gave his car the gun and finally succeded in passing the old '28 on the outskirts of Angola. It was a glorious passing though done in a cloud of steam. The natives of those parts thought that a locomotive had taken leave of its tracks and was bowling down the highway. Frank said that during most of the trip his coat tail was up around his ears.

Monroe Green, Bldg. 4-3, our expert rodeo performer, met with a slight accident last week-end while at roping practice. He was roping cows on horseback and was very successful, and decided to try it standing on the ground. His foot slipped, Monroe fell to the ground, his cows stampeded, and one of them stepped on his face. He tells us that if he ever tries again he is going to put felt boots on his cows.

Harold Blauvelt, Bldg. 4-1, was very much put out last week. He wondered why "The Little Woman" did not congratulate him on his birthday. It was discovered later that his birthday is this week.

When the wind moans, it is extremely bad luck to burn trash near the house.

ATTENTION, TABLE TENNIS PLAYERS!

If you are interested in playing in a league on Saturday afternoon in the G-E Club gymnasium please fill out this form, and mail it to Ed Yahne, G-E Club.

Elex Bowling League Champions

Duplication of its record last year is the goal of the Elex Club "Gopher" team which won the league championship. The champs shown above are, left to right: Helen Houser, Helen Stahl, Helen Tieman, captain; Olga Dreibilbiss and Ella Dietze.

ON -- the Alleys

We're sorry we missed the column last week, but National Defense comes first.

The only oddity that occurred last week of importance was Jack "Jefferson" Waldschmidt's 242 game. Things like that we can't understand.

Monday night saw three fellows go over the 200 mark. They were Ed Waldschmidt with 216, Bleke, 211, and Bob Hanna, 202.

Honorable mention goes to Johnson who ran up five strikes in a row, then finished with 199.

All the fellows should try and cooperate with the following Elex League and be finished by 9 p.m. There is no alibi for running three games more than two hours, or are we that punk of bowlers. (Let's hope not.)

Announce New G-E Exposure Meter For Movie Makers

A new exposure meter, Type DW-49, featuring a preset type of calculator, has been announced by the General Electric Co. Featuring the same instrument element and general external appearance as the recently announced G-E DW-48 exposure meter, the meter is intended particularly for movie makers but may be used for stills as well.

The present calculator used in the DW-49 makes further adjustment unnecessary once the calculator has been set and locked. The calculator hood has been especially designed so that it will fit the present DW-48 exposure meter.

« «It's a Joke» »

"Who goes dere?" he challenged.

"Major Moses," replied the officer.

The young negro scented a joke.

"Glad to meet yuh, Moses," he said cheerfully. "Advance and give the ten commandments."

* * *

Mother: "You were a very tidy boy not to throw your orange peel on the floor of the bus. Where did you put it?"

Johnny: In the pocket of the man next to me."

* * *

She: "Here's your ring back. I cannot marry you, for I love some-one else."

He: "Who is he?"

She (nervously): "You're not going to kill him?"

He: "No. But I'll try to sell him the ring."

* * *

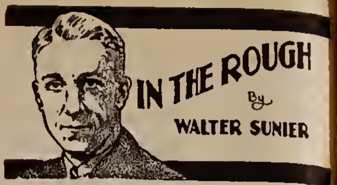
Lady to Window-cleaner: "Will you have a cup of tea or a glass of beer?"

Window-cleaner: "Beer's best, mam. I find it gives a better polish when I breathes on the glass."

* * *

"Pardon me, suh," said the old pappy, "is you de bridegroom?"

The young buck shook his head dolefully, "No, suh," he rcplied. "Ah wuz eliminated in de semi-final!"



IN THE ROUGH

By WALTER SUNIER

Heigh Ho and a bottle of coca cola! On this keynote the Orchar Ridge Stag was ended last Saturday. The Stag, in which abou thirty-five G-E golfers participated was the last of the major gol events of the season, although man G-E golfers will be playing for si weeks yet if the weather is as favorable as it was last year.

Johnson and Hanna played Edga and Elder in the Stag with the latter doing well up to the short 17th. Here Johnson hit a wide one which escaped the trees but went clea over to No. 2 fairway. His pitch to the green was very low. In fact, his opponents say it was a missed shot and that he topped the ball. Johnny says that's the way he played it. However, in whatever manner it was played, it rolled onto the green and into the cup. This so discouraged the opposition that at the end of the eighteen they were only two strokes up whereas they had been nine up at the seventeenth tee. We think Coach Zuppke of the University of Illinois should have referred to a golf ball when he said a football bounces awfully funny sometimes.

D'Agastino had a bit of bad luck on No. 18 which cost him his match with Saaf. Saaf had spotted him 15 strokes and at the 18th tee Saaf was five strokes behind. D'Agastino hit his best drive of the day at No. 18 and there seemed to be no chance for him to lose five strokes. But the way of the golfer is peculiar and unforeseen and the way of a golf ball is unpredictable and nonsensical. About the fifth shot, he was by some seemingly impossible method, in the bushes at No. 1 tee and then had a tough shot that had to go between the clubhouse and the tent which had been put up for the Stag. Finally, after a sashay across the green into a sand trap and a few more strokes, he ended up with eleven strokes, giving Saaf a win by a comfortable margin instead of what appeared to be a certain lose. We still think Zuppke should have referred to a golf ball when he said that a football bounces awful funny sometimes.

Keep matches in metal boxes where children cannot reach them.

"House Of Magic" Show Scheduled

"They Had The Same Idea At The Same Time"

Layton High (left) and John F. Fulk (right) express their satisfaction in the sharing of a $150.00 award. The award was made on suggestions which pertained to solutions to the problem of reducing spring breakages on the tab release mechanism for the material handling system carriers, and the cost of making replacements on such springs. The springs developed from these suggestions are very much simpler and therefore cheaper and can be installed with less hold-up of the conveyor.

Neither Layton, who is a mechanical maintenance man in Bldg. 6-B, nor John, who is an electrical maintenance man in Bldg. 6-B, knew the other was working on a similar idea. Both suggestions, each of which differed very slightly from the other, were turned in to the Suggestion Committee at approximately the same time. Consequently the award was split between the two suggestors.

Plans Are Completed For Program At Club

Apprentice Alumni Associaton To Elect Officers

Cincinnati Mayor To Address Group At Annual Meeting October 12

The annual election of officers will be held by the Apprentice Alumni Association at their annual banquet to be held Tuesday evening, October 12 at the Mizpah Shrine club rooms. A feature of the social program will be an address by the Hon. James Garfield Stewart, mayor of Cincinnati.

The slate of nominees is announced as follows: For president, Wallace Clayton, Bldg. 19-3, Frank Peternell, Bldg. 4-5, and Herman Korte, Bldg. 26-2. For vice-president, Charles Gable, Bldg. 4-6, Earl Plummer, Bldg. 26-2, and Arnold Berning, Bldg. 19-3. For financial secretary, Richard Hanson, Bldg. 19-3, Arthur Davis, Bldg. 20-2, and Carl Beyerlein, Bldg. 4-1.

For the office of treasurer, Richard Wagoner, Bldg. 26-5, Lloyd Grodrian, Bldg. 4-6, and Ralph Hershberger, Bldg. 4-1. For secretary, Robert Stout, Bldg. 19-3, Paul Ohnesorge, Bldg. 4-6, and Wayne Weimer, Bldg. 26-2. For directors,

Spectacular New York World's Fair Program To Be Seen Here November 10 and 11

An unusual treat is being offered G-E employees and their families in the announcement that the G-E Club has arranged for the presentation of General Electric's "House of Magic", one of the hit shows of the New York World's Fair and of every major exposition since Chicago's Century of Progress, in the Club gymnasium.

Tentative dates for the presentation have been set for November 10 and 11, with one show at 1:15 each afternoon and with two shows at 7:00 o'clock and 8:00 o'clock on the two evenings. Tickets may be procured at the G-E Club on a date to be announced later.

A man walking away from his own shadow, the world's first sun motor of its size and kind, and visible sound and audible light are some of the demonstrations which startled World's Fair audiences and will be seen here by arrangement with the research laboratory of the Company.

The presentation will be under the direction of William A. Gluesing, who in private life is a real magician as well as a scientific one, and whose gift of showmanship makes

(Continued on Page 3)

Record Total In Orders Received During Period

Orders received by the General Electric Company during the first 9 months of this year reached a record total of $831,390,000 compared with $397,810,000 for the same period last year, an increase of 109 per cent, it has been announced by President Charles E. Wilson.

During the three months ended September 30, the orders received amounted to $310,251,000, a record volume for a quarterly period, and were equivalent to an increase of 68 per cent over the $185,157,000 of new business booked in the corresponding period a year ago.

Orders definitely known to cover equipment for national defense purposes amounted to approximately $412,000,000 in the first nine months of this year, including $186,000,000 received in the quarter just ended.

By quarterly periods of this year and last year, orders received have been as follows:

	Orders Received 1941	1940	% Inc.
1st quarter..	$257,382,000	$ 97,490,000	164
2nd quarter..	263,757,000	115,163,000	129
3rd quarter..	310,251,000	185,157,000	68
9 months....	$831,390,000	$397,810,000	109

Two Engineers On A.I.E.E. Program

Two Fort Wayne Works engineers delivered papers at the southwest district meeting of the American Institute of Electrical Engineers held in St. Louis on October 8, 9 and 10. Five engineers from here attended the meeting. The two men who delivered papers are Emerson G. Downie, Works Laboratory, whose subject is "A Cathode Ray Oscillograph with Rotating Drum Camera," and Wayne J. Morrill, Fr. H.P. Motor Department, whose paper was on the subject of "The Apparent Impediance Method of Calculating Single Phase Motor Performance." Mr. Morill's paper was an extension of ideas presented in former papers in the past.

The three additional engineers to attend the session were Gordon Harvey, Fr. H.P. Motor Department, who is chairman of the local section of the A.I.E.E. and who was also listed on the program; Ed Misegades, Winter Street, and L. A. March, of the Motor-Generator Department.

BULLETIN

Chicago, Ill., Oct. 8.—General Electric's eight works papers today were awarded a certificate of excellence by the National Safety Congress in session here. The award was made in competition with employee publications from all sections of the United States.

Named Assistant Superintendents

F. J. Kissel

C. L. Johnson

Announcement is made by R. M. Hartigan, superintendent of the Motor-Generator Division of the appointments of C. L. Johnson and F. J. Kissel to the posts of assistant superintendents of the Division. Mr. Johnson's duties will be in the manufacturing section and Mr. Kissel's in the office section.

Mr. Johnson began work at the G. E. on May 7, 1913. He was made

• Unfinished Business

Today American industry and the men who work in it can well be proud of the speed with which the change from peacetime to emergency production is being made. Given an enormous job to do, industry is doing that job in record time. Arms are flowing from our factories in quantities that were thought impossible only a year ago.

Yet that job, enormous and difficult as it is, is only part of the task that lies ahead of us today. When the present emergency is over, industry will have to change back to normal production, and millions of men and women now working on defense orders will have to be employed once more in the making of peace-time goods.

This transition to civilian work will not be easy. Dislocations will inevitably occur. One thing, however, is certain: when the time comes there will be a heavy schedule of unfinished business.

As curtailment of civilian goods becomes more acute under the impact of the defense program, more and more of us will
be le to buy many products that we used to find readily
av le. When defense orders stop and normal production of
no tary goods is resumed, those who have done without
wil f m a market for industry to supply. Whether or not that
ma is able to buy will depend to a great extent on whether
sta ion of the processes of production, exchange and dis-
tr n is averted by a lifting of unnecessary restrictions
an per readjustments to the transition.

ddition to manufacturing for it, however, factories and
m l find many other jobs awaiting them. In every line of
pr ion there is unfinished business that can be completed.
A ndication of the scope of this work, industrial engi-
ne int out that in homes already wired for electricity we
ca many more labor-saving appliances than we do at
pr . A recent survey revealed a $16,000,000,000 market in
th l alone. To satisfy it would keep 1,000,000 persons at
w four and a half years, yet this is only one instance
of ny potential markets that exist.

the emergency is over, new industries and new prod-
u ubtedly appear, results of the research now
g dustry's 2,300 laboratories. These, too, will in
t h bs for people now busy with defense.

alizes that the current boom is only temporary.
I se indicate, however, that when it ends there
nty of unfinished work for us to do. How well
e to do it will depend to a considerable extent on
l y we plan now for the change-over from emer-
ion. The first job is still defense, but today we
nd defense to insure a prosperous tomorrow.

ogether the mistakes of their lives, and create
y call Destiny.—John Oliver Hobbes.

END OF THE BOOM
SAVINGS BONDS
NATIONAL DEFENSE
Van Bardow

Thrift is a habit. Habits rule our lives. When habits are young, they are like puppies. They grow up fast and at last one day they rule us. The habit of thrift at all times, whether in war or peace simply says that you shall spend less than you earn.

Thrifty people are happy people, for when you earn more than you spend, when you produce more than you consume, your life is a success. You are full of courage, life, ambition and good will. The habit of thrift proves your power to rule yourself. You are captain of your soul.

Right now, establishment of the habit of thrift is about the most important single personal task on the horizon. We are in the midst of a great spending era. We are all faced with a tremendous temptation to spend more than we earn. We are faced with the danger of deluding ourselves that the sun will always be rising . . . that it will never set.

Remember . . . this era will pass. Labor and thrift go hand in hand. Unthrifty ones become slaves of circumstance, playthings of chance and as leaves in a storm. Start now to save. Buy Defense Bonds, put it in your sock, put it in the bank but put it away somehow, somewhere, however little or much it may be . . . whatever you do . . .

START NOW TO SAVE!

NEWS FROM THE CAMPS

We publish herewith with great pleasure extracts of letters sent to us by G-E employees now in government service. Ad-

Dear Editor:

There isn't very much that I can say about Fort Warren except that it is quite barren and devoid of foliage, particularly the replacement center, where inducted selectees of the Quartermasters Corps learn the A.B.C.'s of army life in 13 weeks.

I've been here since the tenth of September and have been attending the Officers Training School for the last two weeks. Since having had little or no company duty I know little of their training program, however I will say that the average selectee goes about his duties with a spirit and determination that is really contrary to numerous idle rumors.

The majority of the officers of this brigade, commanded by General Worden, are from Wisconsin, Illinois and Michigan, with a few of them from Idaho, Arkansas, Washington and Minnesota.

Having been assigned to Co. H. of the newly activated 3rd Regiment and subject to report for duty October 1, my duties will constitute in the main the basic training of the selectees assigned to our company.

This is quite a large replacement center, housing some 20,000 men, and each man's ration rate runs about 47 cents per day per man. I'd like to see the average housewife feed a flock of men at that rate.

Thanks a lot for sending the Works News and continue to send it. I appreciate it very much. Say hello to all the fellows in Tool Supply for me.

Sincerely yours,
Carl G. Schultz,
2nd Lt., Co. H.,
3rd Quartermasters
Trng. Regt.
Fort Warren, Wyo.

Dear Editor:

It gives me great pleasure to give you information regarding army life here at Camp Roberts, California. The camp covers several miles and is situated between Los Angeles and San Francisco, and lies about 20 miles east of the ocean. It sits in a valley surrounded by distant mountains and hills.

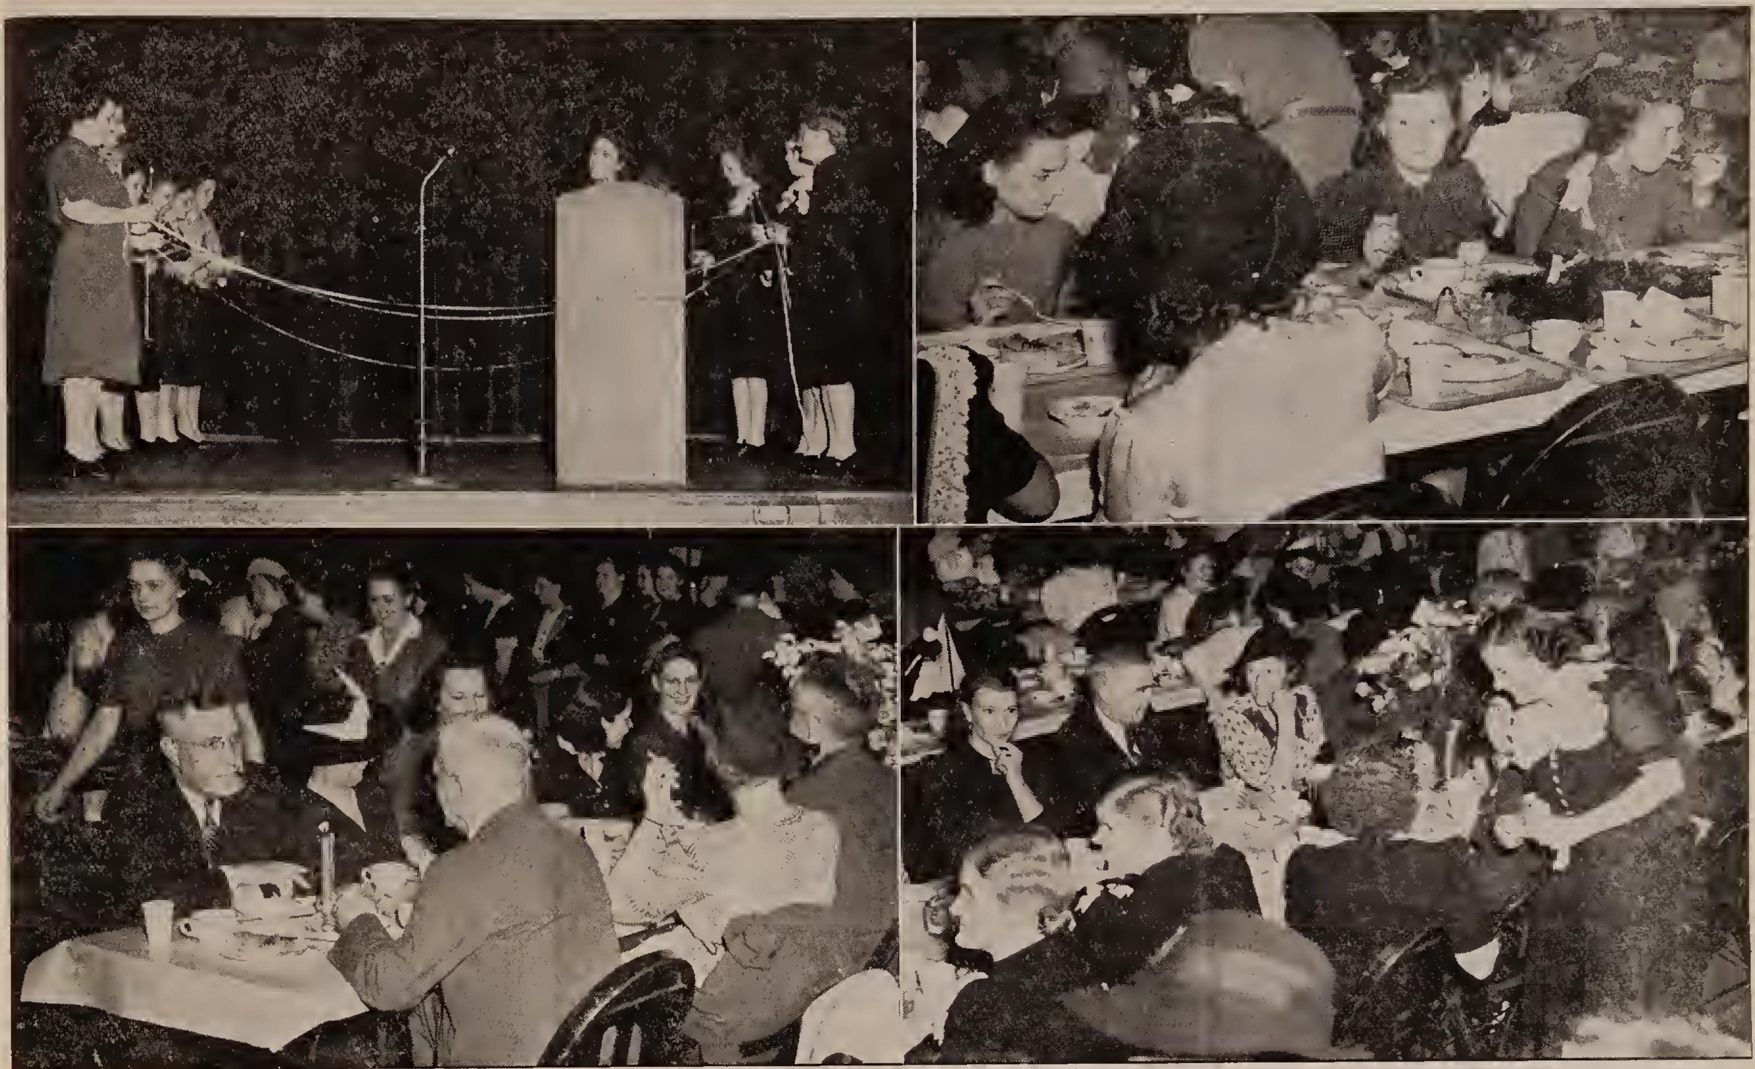
The camp at present can handle about thirty thousand soldiers, making it the largest replacing center in the United States.

The men are kept here for a period of thirteen weeks, which is the allotted time for the basic training. Since the camp is a training center it covers all fields of army work.

The men on coming into camp are classified according to their ability and experience, and then placed in a company where they may receive the training of a subject most suitable to them. As a matter of fact I have just finished my time here in a radio company and am now waiting to be sent to a regular outfit.

(Continued on Page 3)

Seen At The Annual Banquet Of The Elex Club



With a gala banquet on Monday, October 6, Elex installed its new officers. Above left shows the new officers on the left and the retiring officers on the right during the candlelight installation ceremonies. Above right: Part of the large group served. Makes you hungry, doesn't it? Lower left: Here are some of the new officers with Works Manager M. E. Lord and R. H. Chadwick, and lower right, another view of the speakers table with C. H. Matson, assistant manager, in the foreground.

News From Camps

(Continued from Page 2)

The camp in appearance is similar to any other army camp, for its barracks, churches, mess hall, etc., are all built under army specifications. The camp is said to have one of the largest parade grounds in this country, and is situated in the center of camp. On the west side of the camp they have erected a large outdoor theatre that affords a seating capacity of probably forty or fifty thousand.

The biggest drawback of the camp is that during the summer months it is very dusty here because of the lack of rain. On windy days regular sandstorms occur covering everything with the grimy substance. During the winter, however, this doesn't occur for it rains most of the time.

Since the camp is still very much in the making it gives me a reason to believe that it will be in the future one of the best camps in the country.

The camp was named after a corporal named Roberts, who proved himself a leader of men during the last war. Since he was just a corporal it brought about naming of a camp for the first time after a non-commissioned officer.

Yours truly,
Harold Taylor,
Co. B., 87 Inf., Trng. Br.
Camp Roberts, Calif.

Dear Editor:

Just a line to let you know I have been receiving the WORKS NEWS O.K. It is really nice to be able to read about the G. E. once again.

Have just been transferred from Camp Roberts, California, to Camp San Luis Obispo, California. Our basic training was completed September 22. We have been waiting since that time to be sent to our new posts. Were just transferred yesterday.

I was trained in radio, code and that means of communication. Was fortunate to be assigned to a headquarters unit where I can put to use my training.

It was a distinct surprise when I received the first WORKS NEWS, but a pleasant one. Each week I'd wait till the day it would arrive. Several of my pals were from Fort Wayne and had friends at the G. E. They enjoyed reading it also.

Again, many thanks for the WORKS NEWS.

Yours truly,
Pvt. Michael Edsall,
160th Inf. Hdq. Co.
Camp San Luis Obispo,
California.

She (sarcastically, to stranger at same restaurant table): "I hope you won't mind my eating while you smoke."

He: "Certainly not, lady, so long as I can hear the orchestra."

House Of Magic

(Continued from Page 1)

the "House of Magic" as entertaining as it is educational.

The "House of Magic" is the name originally given to the research laboratory of the General Electric Company, over the protests of the nearly 400 serious-minded scientists who work there. From the research laboratory come the effects and demonstrations of the "House of Magic" show which suggest new developments for the future that the average layman never dreamed of.

A phosphorescent screen enables Gluesing to walk away from his own shadow, shake hands with his shadow and roll it up into a box.

Music is sent across the stage on a beam of light with the aid of a special lamp and a phototube, commonly called the electric eye. The special lamp sends a beam of light which changes with all the musical vibrations of a phonograph record. While the human eye is too slow to see the light changes, the electric eye sees each change and records it as a change on sound on the loudspeaker. This same experiment of carrying sound on a beam of light has been performed in Schenectady for a distance of more than 25 miles, from airship to earth and from a moving train to station platform.

While the electric eye is making it possible to "hear" light, a cathode ray oscillograph at the same time makes it possible to "see" sound in the form of waves recorded on the tube.

Many other interesting demonstrations will be seen in the "House of Magic" presentation, including a miniature electric locomotive controlled by commands of the voice, a "kidnap detector," and beautiful color changes produced under "black light".

Manager Named At Philadelphia

Robert Paxton, assistant to the late Robert V. Good, manager of the Philadelphia Works, was appointed manager of the Works last week by W. R. Burrows, vice-president in charge of manufacturing. The appointment became effective Wednesday, October 1.

Mr. Paxton joined the Company on Test in Schenectady after graduating from Rensselaer Polytechnic Institute, Troy, N. Y., in 1923. The following year he transferred to the Switchboard department and in 1927 went to Philadelphia where he served successively as application engineer in the oil circuit breaker division, managing engineer of the metal enclosed division and managing engineer of the panel and equipment section. He was appointed assistant to the manager on October 1, 1940.

Two Appointments

(Continued from Page 1)

foreman of the Machine Shop in 1916, and was made general foreman in 1926. His entire service has been in the Motor Generator Division. He is vice-president of the Quarter Century Club. Mr. Johnson has spent his entire life in Fort Wayne. He resides at 820 Huestis Avenue.

Mr. Kissel, who resides at 333 Kinnaird Avenue, joined the General Electric organization in 1919 when he enrolled in the cost department at the Erie Works. He was transferred to the Fort Wayne Works in January 1940 as cost supervisor in the Motor-Generator Division and he continued in this capacity up to the time of his present assignment.

Following the election and the address of Mayor Stewart a program of entertainment will be presented. Tickets may be obtained from contact men.

Biologist Explodes Oyster Theory In Address On G-E Science Forum

Contrary to the popular belief that oysters can be eaten only during the so-called R-months, Dr. Thurlow C. Nelson, biologist in oyster research at the New Jersey Agricultural Experiment Station and State Board of Shellfisheries, declared in an address they were perfectly wholesome food the year around.

Speaking on the General Electric Science Forum, Dr. Nelson also said that the edible oyster does not produce valuable pearls. He explained there are two kinds of oysters: the ones that can be eaten, and those that produce pearls.

He told how the R-month belief originated. The first colonists to America had eaten oysters from northern European waters. The oysters found there hold their young upon their gills through the warmer months of the year, according to Dr. Nelson. If eaten, such oysters taste as though full of sand because of the multitude of tiny shells of the young larvae.

"Therefore, when the colonists came over here they feasted on our Atlantic Coast oysters, from September through April, but left them alone for the rest of the year," he said.

Commenting on pearl oysters, Dr. Nelson asserted that the only ones in American waters are in a small bed in Pearl Harbor, Hawaii. Such oysters are large, and the shells have a beautiful lining of mother of pearl.

"Edible oysters produce pearls occasionally, but they are of no more value than so much chalk," the speaker said. "And if you should find a pearl in your stew, don't be 'taken in' by any jeweler who tells you it would have been worth thousands of dollars if it had not been cooked."

"The oyster is scientifically the best known marine animal in the world today," he said. "The research is worth while, for the annual oyster crop of this country has in some years been valued at $16,000,000."

"Oysters give much of nutritive value in return," he continued. "A year's harvest of oysters in the United States has a food value equivalent to 400,000 dressed steers."

Oysters are a good source of the vitamin B complex, containing both riboflavin and thiamin. They are highly valued for their sea salts, mainly iodine, and they also contain vitamins A, C and D, according to Dr. Nelson.

G-E Club Dances Will Be Resumed

Announcement is made by the G-E Club Entertainment Committee that the popular Saturday night dances will be resumed starting on October 18. G-E Club members and friends are invited to attend the dances which are held in the Club gymnasium.

Elex Club Names Committees For Coming Year

Chairmen and committee members for the coming year were named by Helen Bleke, newly elected president at a recent meeting of the Club's board. The chairmen and committee members are as follows: Eileen Foor, Bldg. 17-2, and Bess Brown, Winter Street, mistresses of ceremony. Belle Buchan, Bldg. 17-4, Elaine Altheon, Bldg. 4-5, Arietta Coe, Bldg. 26-2, and Alvina Greber, Bldg. 4-2, hostesses. Clara Gidley, Bldg. 19-4, contact chairman.

Veora Habig, Bldg. 6-B, and Frances Krauskopf, Bldg. 16-3, publicity. Margaret Suelzer, Bldg. 20-2, and Marge Ponsot, Bldg. 17-2, benefit projects. Mildred Schoeff, Bldg. 26-2, sick committee. Edith Mennewisch, Bldg. 26-3, scrap-book chairman. Ethel Poorman, Bldg. 4-4, and Loretta Bloom, Bldg. 26-2, menu committee. Evelyn Blakeley, Bldg. 26-2, photograph chairman. Mildred Atherton, Winter Street, song leader. Vivian Hitchcock, Bldg. 21, football chairman.

Evelyn Smith, Bldg. 18-B, Frances Fitch, Bldg. 19-5, Jo. Magers, Bldg. 19-4, Modesta Nichter, Bldg. 26-3, Dora Siebold, Winter Street, Dorothea Dissinger, Bldg. 19-4, Eva Lynn, Bldg. 16-1, Hazel O'Brien, Bldg. 4-3, Mary Ellen Butler, Bldg. 4-4, Angeline Filus, Bldg. 4-4, Bea Livingston, Winter Street, Edythe Williams, Bldg. 26-5, Vera Berning, Bldg. 4-6, May Heir, Bldg. 19-5, and Monica Gnau, Winter Street, social committee.

The committee in charge of bowling will include Merle Kirkpatrick, Edna Etzler, Ruth DeHaven, Wilda Klick, Marge Ponsot and Kate Armstrong.

The Employees' Store is always ready to serve you. Store hours from 10:00 A.M. to 4:00 P.M.

WITH THE COLORS

DUANE HENRY DUFF, Plastics Dept., selective service. Residence, R. R. No. 3, Butler Road.

DONALD JOSEPH LAFONTAINE, General Purpose FHP Motor Dept., selective service. Residence, 2946 Bowser, Fort Wayne, Indiana.

PAUL ROBERT DIDRICK, Specialty Transformer Dept., selective service. Residence, 1312 Maumee Ave., Fort Wayne, Ind.

PRESTON HERMAN HILLE, General Purpose FHP Motor Dept., selective service. Residence, 134 E. Pontiac, Fort Wayne, Indiana.

HENRY ELMER WEBB, Specialty Transformer Dept., selective service. Residence, 1152 Oakdale Drive, Fort Wayne, Indiana.

Income Accumulation Plan Proves Popular With G-E Employees

More than 2,500 employees have signed new Income Accumulation Orders. The new Income Accumulation Plan, which became effective on June 2, 1941, enables employees to have the interest on their G. E. Employees 4% bonds and their general profit sharing accumulated for the purchase of United States Defense Savings Bonds.

When the accumulated amounts equal $18.75 or multiples thereof on June 1 and December 1, United States Defense Savings Bonds, Series E, will be purchased for and delivered to the employees.

Employees who desire to acquire United States Defense Savings Bonds in this way may do so by signing an Income Accumulation Order, which may be obtained from department heads, foremen, or the payroll department, or from J. W. Lewis, treasurer, Schenectady, N. Y., and deliver it to any of the foregoing.

Hutchins Appointed

Warren C. Hutchins has been appointed manager of sales of the General Electric Special Products Section of the Industrial Department, according to an announcement by J. E. N. Hume, G-E commercial vice-president. Mr. Hutchins succeeds Dr. H. A. Jones.

Gecode Conference Held At The Keenan Hotel

Fifty-five members of the Gecode Club attended the club conference held at the Keenan Hotel Saturday, October 4. Preceding the general discussion of the conference, impressive installation services, under the direction of Miss Irene Meyers, were held for the newly elected officers of the club: Ann Murtaugh, president; Mary Miller, vice-president, and Etta Amspaugh, secretary-treasurer. Past President Dollie Schladenhauffen represented the out-going officers. Each officer was presented with a red rose corsage.

At noon the participants enjoyed dinner in the main dining room. Piano selections were furnished throughout the conference by Miss Betty Zinsmaster.

Original ideas, numerous suggestions and extensive plans were revealed for formulating the following social program for the club year:

Nov. 15th—"Goblins Convention". Dora Miller, chairman.

Dec. 20th—"Poinsettia Christmas". Sana Kunkle, chairman.

Jan. (open)—Dinner in Fort Wayne, with an invitation from the Elex Club to attend a civic theatre production. Jane Uleman, chairman.

Feb. 14th — "Pioneer Party". Quintilla Fry, chairman.

March 4th—Book review, by Mrs. Harry Hogan. Mrs. Al Schneider, chairman.

April 4th—"Easter Shadows". Ethel Tumbleson, chairman.

May 9th—"Mother's Premier". Dorothea Schnepf, chairman.

June 13th—"Garden Party" (formal). Marjorie Johnson, chairman.

July (open)—Lake party at Wawasee. Dorothy Ray, chairman.

Aug. (open)—For vacation.

Sept. 12th—"Kid Frolic". Mary Jane Hamilton, chairman.

Oct. 10th—"Indian Pow-Wow". Lorena Reppert, chairman.

Special week-end trips will be arranged as highlights of the year's activities and will be announced when final plans are completed. The club expects to carry out some special service plan for defense.

The conference closed at 3 p.m. with the solemn candle-light service. James Allen's book, "Entering the Kingdom", was presented each of the following members attending: June Miller, Charlotte Andrews, Jean Uleman, Esther Fisher, Dora Wilkinson, Alice Sasser, Frances Straub, Alice Cook, Mary Hilton, Mary Furhman, Leota Reinking, Wanda Fry, Betty Zinsmaster, Cecilia Noonan, Revia Stauffer, Betty Schneider, Goldine Kreisher, Mary K. Holthouse, Eileen Dull, Ethel Cook, Anne Murtaugh, Elsie Brunnegraff, Phyllis Hunter, Betty Melchi, Ty Fry, Dora Miller, Hilda Gaunt, Ethel Tumbleson, Mina Lampy, Iva Teeple, Loretta Weiland, Bonnie Womack, Effie McGill, Verdella Everett, Francetta Everett, Lorena Reppert, Helen Colchin, Celeste Miller, Mary J. Hamilton, Dorothy Ray, Dollie Schladenhauffen, Olive Journay, Lucille Braun, Mary Miller, Bernadine Hackman, Jane Linn, Lucille Hudson, Mary Johnson, Betty Young, Dorothy Schnepf, Betty Ross, Etta Amspaugh, Linda Bultemeyer and Sana Kunkle.

The following committees were appointed by Miss Murtaugh: Finance—Quintilla Fry, chairman; Iva Teeple, Mina Lampy, Ethel Tumbleson, Dora Miller and Celeste Miller. Flower committee—Cecilia Noonan, Revia Stauffer, Dorothy Ray. Scrap book—Betty Zinsmaster.

Turn In Requests For G-E Club Cards

Employees who have not already done so are urged to turn in their requests for G-E membership and family cards at their earliest convenience. No family cards will be issued after November 1 with the exception of those to new employees.

Plan Resumption Of G-E Club Movies

Resumption of G-E Club free movies for employees and members of their family are planned for the coming season with the movie scheduled for Sunday, November 2. Through new arrangements a much better grade of pictures than offered during the past year has been made possible.

Credit Union Party At G-E Club Tonight

A benefit party is being sponsored this evening by the Credit Union to which all G-E employees and their friends are invited. The committee in charge of arrangements includes Charles Winans, Belle Buchan, Irene Meyers, Lee Cupp, Art Brockmeyer, and T. L. Wallace. The personnel of the Membership Relations Committee will also serve to make the affair a success.

∽ NEWS THROUGH THE PLNATS ∽

From The Feminine Viewpoint

This is National Letter-Writing Week—the week to revive those dying friendships, and to write to the boys in camp.

The very thought of writing letters makes most of us writhe in pain. We quickly think of the model letters in the 10c book we got from the Woman's Page of the newspaper: "How to Gush Gracefully When Writing a Letter." and we think, "Oh, golly, I could never do that! I'll just let it go until tomorrow."

There really isn't any secret to letter-writing, or even a magic formula. As for those model letters you're worrying about, don't give them another thought. You don't talk that way, so why try to write that way?

When you find you have a letter to write why not try this method?

1. Wait until you are in a good mood.
2. Get out all your letter writing materials.
3. Reread the last letter from the person to whom you are writing.
4. Take a deep breath and write Dear So-and-So.
5. Answer any questions which may have been asked you in your friend's last letter. Never start your letter with "I." Your friend will feel much more flattered if you mention him first.
6. Next write all the gossip in which you think your friend will be interested.
7. Sign it and there you are, with a finished letter someone will be glad to get. True, it will never win a prize, but it will probably go over with a bang when your friend receives it.

Above all, write as you speak! Just imagine the person to whom you're writing is in the same room with you and you are going to start talking to him. If he likes what you say to him, then he'll just have to like what you write to him, won't he?

If you don't write letters often, and hesitate to sit down and write your letters on stationery right away, make a copy of it first. That was a good method in school, and it's still a good method—even some veteran letter writers do it.

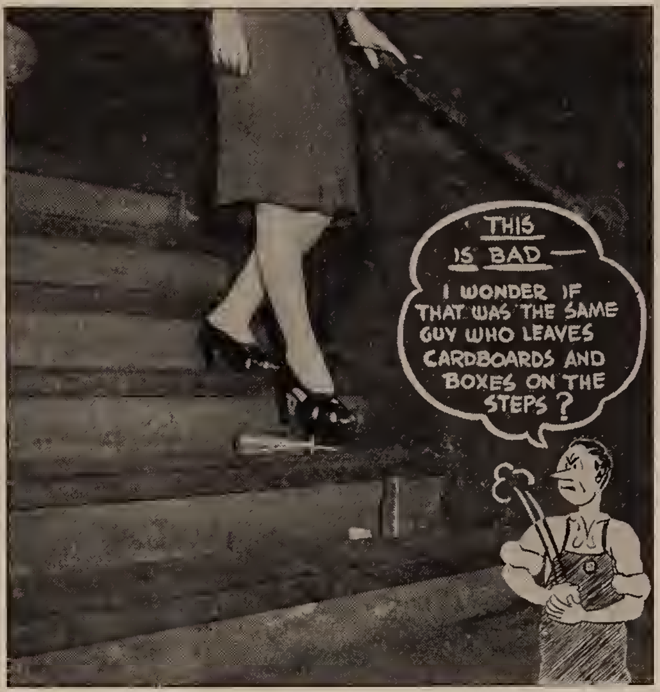
Letter writing isn't really so hard, is it? So let's sit down and write our letters now, and don't forget the Army boys.

19-5 Office Chatter

Ann Pressler, Bldg. 19-5, has had a time. Everything has happened to her from buns to phone numbers. Is it love or is it just mental laziness? . . . Badge—has anyone found one—if so contact Krumbigel. He did not mention a reward . . . Rain — Rain! Those attending (Myers, Richards, Shattuck) the Notre Dame-Indiana game know the fun of getting all wet to see a game. . . . Glen Fernwalt is back eating his usual order of three sandwiches. . . . Does Walter Larimore know that winter is just around the corner—and the white shoes should be parked?

What we would like to know is who the new boy friend is that is keeping Caroline Hans, Bldg. 4-3, out so much at night.

It's Hard To Believe—But It's A Fact



THIS IS BAD —
I WONDER IF THAT WAS THE SAME GUY WHO LEAVES CARDBOARDS AND BOXES ON THE STEPS?

Just what is a person thinking about who will create a possible "death trap" like that pictured above? I guess we must leave that to the psychoanalyst. To give the guilty person the "benefit of the doubt", we are inclined to charge it to thoughtlessness on the part of the person leaving the bottle on the step—but this will not clear his or her conscience after the accident occurs.

It's hard to believe but it's a fact that bottles have been left on our stairsteps just like those shown in the picture.

H. L. SMITH,
Safety Engineer.

Winter Street News

We wonder what R. King has on Oscar Mensch, as he was the recipient of six cigars. Oscar grabbed King's coat at quitting time and wore it out to the parking lot, where King cornered him and made him exchange. Oscar was glad to exchange but he forgot to exchange the six cigars he bought that afternoon and politely placed in King's pocket. Result was that Oscar had no smokes that evening while King had 'em to burn. . . . Barb Curtis: "Oh, boy, didn't they get a lot of runs in the fourth round." We wonder which quarter. . . . Herm Norr is back to his old tricks again. When paying off on the World Series pool, he paid Bob Bender instead of Ray Klotz. Bender refuses to refund and Klotz insists on being paid. Looks like Herman is behind the well-known 8-ball.

Monday evening was the proudest night that Winter Street girls have experienced in having the honor to install one of their girls as president of Elex. Girls, we give you Miss Helen Bleke. Miss Meyers presided at the impressive candlelight installation services. Ribbons were run across from the old officers to the new and then cut to show the giving over of the reins to the new "regime". Each officer was presented with a red rose. Mildred Atherton sang a song to Helen, telling her how she is appreciated by the girls and then she was presented with a portfolio as a token of our affection.

A few people in Bldg. 4-3 would like to know if the part in Fritz Bergman's (Bldg. 4-3) hair is just slipping down a little or if he's trying to hide something. What's the answer, Fritz?

Slips And Chips

Sir Viss Bldg. 4-4

The autumn season holds much in store for us. Football, world series, and many other enjoyable things. But the guys in this department don't have any news or else they are keeping it very quiet. I believe I will change the name of my column to "Leaks and Drips" or something because the only news I get leaks out in a very small stream. . . . Russell Grim passed the cigars the other day in honor of his new bride. Congratulations Russell and Mrs. Grim. . . . Did you know Uncle Louie Gessinger is moving to his recently acquired farm some time this month. . . . Joe Griffin beat Uncle Sam to the draw this time. Yes, he purchased the jewel of a maiden's dream and placed it on her finger. Joe doesn't know just when they will say "I do" but of course Joe won't have much to say about that anyway. . . . What was the special attraction at the Auburn Street Fair that caused Douglas (Our Blessing), Shorty Lawson, our ex-coworker, Enoch Hursh, and many others to attend the fair. Maybe I missed something, do you suppose? . . . Al Shoenheinz has purchased Grush's cottage at Pretty Lake. I suppose he will be known as Captain Schoenheinz next summer. . . . Walter Buesking had to have his car pushed out of the viaduct the other day. Walter you should know that Hudson never made a seaworthy car.

Sylvia Bowers, Bldg. 4-3, spent last Saturday getting a lot of new fall togs. We wonder where she is going to go now.

Frank Kimble, Bldg. 4-3, is spending a lot of his spare time looking at the new Buicks. We are afraid it won't be long until one will be in his garage.

Is Zat So?

Now that the excitement of the World Series is over, we can settle down to normal again, but I sure am glad that the football season is close at hand. Speaking of athletes, one of Central High School's former stars, Bill Hanley, is planning on walking up the "middle aisle" in the near future. Your co-workers wish you the best of luck, Bill! . . . George Mosshammer, who is in charge of the tool room in Bldg. 17-1 takes his job seriously. He was seen stalking in front of the gate swinging a large sledge-hammer the other day. Don't you know that the age of the cave-man is past, George? . . . It isn't probable that Nolan Lowden will forget his identification badge again right away. Nolan returned home after his badge only to find that his shirt bearing his badge had been sent to the laundry. About noon he finally recovered that precious button and arrived at work safely about four hours late. . . . Bldg. 17-1 office just isn't the same since our wise-cracking "Wally" McKay is on the sick list. We hear that he is recovering nicely since that "Bonded" blood transfusion. We are glad you haven't lost your sense of humor, "Wally"! . . . Have you noticed how queer Ollie Shookman has been acting lately? We still can't figure out why he carried his big tool box around filled with steel shavings. . . . Army life is greatly improving Walter Nix, both physically and spiritually. Reports are that Walter has now joined the Church choir. We will be glad when Walter gets back with our gang and maybe we can get him to join our quartette. . . . Barney Gausepohl is our most recent purchaser of a new pair of SAFETY SHOES. Bill Stout believes in wearing his SAFETY SHOES even around his farm. Bill was examining a new litter of little pigs the other day when the mother pig came after him. Bill tried to shove the pig away with his foot and consequently the pig bit his foot and tore the sole off his shoe. Bill says he sure was glad he had his SAFETY SHOES on. Bill's testimony should give the salesmen for SAFETY SHOES a new slant on the reasons for wearing their shoes, don't you think?

That's all for now. See you next week.

The Question Mark.

The golf tournament of Bldg. 4-2, 2nd shift, is over. Led by Harry Spahr, the players were as follows: Palmer Harper, Arlen Greiser and Tom Pauley of the Rotor Dept. The motor Assembly Dept., led by Ray Smith and including Bill Skevington, Rollie Wickliffe and Clifford Long, were evenly matched with the Rotor Dept. The winners by one stroke, the boys were kidding Cliff Long about blowing up. A suitable trophy was presented the winners. There still is some belief in the Assembly Dept. that the spelling on the trophy was right. The first time it was "The Chumps" but was changed to the "Champs".

Adelle Kuckuck, Bldg. 4-3, wears a new type of head gear. It displays a real headlight. But what we would like to know, where is the tail light.

Harry Parker, Bldg. 4-3, and Sam Allmandinger, Bldg. 4-3, did a pretty job of seeing a news reporter off on a T.W.A. plane last Saturday morning. The trouble was Harry didn't have a chance to get the family car because the fairer sex had it.

Suppose somebody in the General Electric Co. greets you with, "What's new?" If ye say, "I am," ye are the person I want tae write to this time.

If ye are a new employee ye are in a lucky spot.

Ye have no bad work habits here.

Ye are about tae start making your own "experience." Some o' us old timers wish we could start ours over again, with ye.

Ye have a training school, or a foreman, tae start ye off on the right foot. And I don't mean his foot, either. But remember, they can't be everyplace at once, either, tae watch ye. But ye can. Ye can watch yourself, all the time. Don't let yourself take a chance on how to do the job. Ask about it or figure it out until you're sure.

The place tae ask is the foreman. He may turn ye over to a leading operator or an old employee. Ye can always tell an old employee. He can masticate twice as big a wad o' "Workmans Scrap" as ye can, and can hit the mark every time without even taking aim. Ye can also spot him because he is doing good work, without wearing himself out, and is turning out a real quality product.

Our General Electric quality wouldn't be there if he didn't.

Watch him—ask questions—find out why he does it one way instead of another. BUT—don't take just everything without a grain o' salt. And I don't mean the left handed monkey wrenches and buckets o' juice, either. I'm serious. No matter how good he is, and how long he's been here, there still MAY be ways o' improving the job.

And it isn't strange for a new man tae come in and suggest something that everyone has overlooked for a long time.

Don't be afraid o' being laughed at, either. They laughed at Edison and Fulton. They also laughed at that great Scotch inventor — my Cousin Colin.

He told me, "Hoot mon, my inventive genipuss has ended one o' my pet annoyances. I've invented a hollow cake o' soap. Now. when it's worn down there won't be any little cake tae break up and annoy me."

Hermetic Office 17-2

This is the way it all started. We had one of those bountiful birthday dinners for Helen Crabill and then a few days later someone engineered a potluck. Despite all this food, Dorothy Rinehart, Luella Franke and Helen C. insisted on buying candy, so in the interest of these gals Merle Kirkpatrick, Audrey Huckunell and Mildred Spuhler put it this way: "Bet you a chicken dinner you can't stop eating candy until December first." The bet's on and if the candy lady complains about business you'll know who to blame . . . Is Karl Geller good! Well, who else could smoke a cigar and a cigarette at the same time? . . . Luella Franke has been going around in a daze lately. There must be an answer but she won't tell. . . . Ted Budecki and Bob Wefel went wading Monday noon. At least that's the way it looked to us.

Suzy Sleuth.

»» NEWS THROUGH THE PLANTS ««

Borings From 4-4 Office

Bill Skevington is mighty happy here of late, 'cause Notre Dame beat Indiana last Saturday, my own alma mater. (I'm not so happy though, to think we've been beaten two weeks in succession). Mike Brayer is also happy when Purdue came through and beat Pitt 6 to 0. A big upset of the season. . . . Virginia Plummer won a bet on the Yankee-Dodger baseball game. Now she is the proud owner of a certain young eligible bachelor. Latest flashes from that bet reveals that Plummer has given him his freedom. . . . Wilma Robb, Pinkie to you, and Doris Lamle spent last week-end in Chicago. Fun, methinks. I guess they got caught in the draft in the big windy city. Just ask them about the soldiers and sailors. . . . Mary Hakes was so excited one day she asked us if we had seen "Flowers in the Dirt". What she really meant was "Blossoms in the Dust." . . . I hear that one of these week-ends Betty Mougin is going to Purdue. Now I should think she would go to Bloomington, it's prettier there. That's where I was over the week-end. It certainly is beautiful there now. Betty, you'd better change your mind . . . Don Niles and wife went to the Auburn Street Fair and won three Indian blankets while playing bingo. Personally I think he hit the jack pot. Now he is going to try his luck at the other street fairs. . . . The rains came at last. I don't mind getting wet twice a day, but three times is too much. The rains came at the least expected times, too. Oh, well, I did need a bath, but that doesn't speak for the rest who were drenched in Monday's cloudburst. However, Art Wedler received a real bath from the drinking fountain. Dirty trick, eh, Art? . . . LaVon Price is going to have club tonight. The food sounds so good that I think I'll go out and crash it. And to think she is going to whip it up herself. The fact of the matter is she bought almost all of it at the Bon Ton Bakery, the bakery with the seeing eye door, and they couldn't figure out who was opening the door for them (so easily too) . . . Say have you all been to the jam sessions at the Community Center on Sunday evenings. Boy, can they give out on the Boogie. It's lots of fun. Well 'tis enough for now, I remain, Sincerely as ever,

Elmer, the field mouse.
The Rat to you.

Cleon Oyer, Bldg. 4-1, has a new table model radio. He had it plugged in the hall listening to the ball game. When he walked through the hall he forgot about the lead-in wire, eaught his toe, and kicked the radio down the stairs. Is that your football radio, Cleon?

Tales From Transformer

Barnum Was Right

Under ordinary circumstances we're not addicted to gambling; preferring the security of "winning" by not having played — the conservative model, you know, in a wide variety of dull browns. But starting with the Louis-Nova fiasco, we dug deep in our jeans and played all of the immediately available, betting pools, straight on through the World Series, and ending up picking Indiana University 13 points over Notre Dame in last Saturday's football picnic.

Brothers, we're convinced again. If you want a sure thing, just let us pick it for you—then play the opposition. You can't lose! No sir, you can't miss. That's our exclusive specialty.

When you start betting them to win, for keeps, there's no vice versa.

Science and Invention

Speaking of that fateful ninth inning in the fourth World Series game last Sunday, although the memory is still painful, when the third strike ball bounced off of catcher Mickey Owen's mitt putting Hienrich safely on first and turning certain victory into a Dodger defeat, we once again forwarded our repeatedly refused suggestion to equip all catcher's mitts with a built-in funnel just slightly smaller than a wash tub.

Mounted on a tripod it would probably earn us the eternal gratitude of all the game's catchers, who are undoubtedly in a constant state of mental depression, having to spend their working days, as it were, squatting through life behind a barred mask.

And if the oversize funnel was lined with an automatic scoring, deluxe, ball and strike attachment, we could revolutionize the game by giving the umpires time off to become acquainted and on friendly terms with not only the catchers, but also with their largest army of critics—the grandstand second-guessers.

What a boon! Imagine, if you can, the sight of a Brooklyn Dodger fan comparing notes with a comfortably-seated umpire as they both join in polite applause when the cigar-smoking catcher adjusts his mounted mitt and signals for more speed. With umpires and fans fraternizing like that it might well signal the return of sanity to Flatbush —a Nobel Prize achievement.

Or would we want that?!

Ellis Bleke, Bldg. 4-3, is preparing his "Castle" on Pretty Lake with all the latest gadgets. He is now building trenches around the place making it a truly modern castle of the mechanical age.

Building 26-3

Good old April showers are appearing rather late. Some of us don't mind, only when we get just inside the gate and then get drenched—drowned rats have nothing on us. . . . We had a lot of new pipes installed on our floor last week. Even a monkey would feel at home. . . . We are wondering if Dorothy Till still wants an adding machine? . . . Estella Merkle has a new ring. But don't be alarmed—Estella says it's her birthstone—and she does wear it on the right hand, third finger. . . . It's really a treat to come to work every day when the boy friend brings you. At least Katy Murfield thinks so. . . . Esther Babcock says cold weather sure shows up in her eating. Take it easy, gal— it's easy to put on but a bit hard to lose. . . . We'd like a little space to say "Hello" to Charley, our ex-set-up man. There are at least a dozen girls ready to go on the third trick— 'cause they sure do miss their Charlie.

Is it the rainy weather or the excitement of "Pouring" at the wedding reception of Thelma Court Saturday that caused Loretta Sheehan to come to work with one brown and one black shoe on.

WANTED: shipment of my new furnace or to buy 5 fur lined aviator suits. Les Hubbart.

Gossip From 19-5

Bea Stalter, Bldg. 19-5, is worried that she is not going to get enough meat in her chop suey at the chop suey supper she is going to. Don't worry Bea. . . . Marie Page and Rosemary Blust were doing all right at the Auburn Street Fair Saturday night. We heard a lot of noise and yelling, and thought it was several barkers from the show but it happened to be Rosemary and Marie. . . . We wonder where Rosemary Blust got the pear she ate the other day when she said she was just about starved. . . . Lloyd Garrison said for pastime he loves to sit in his cellar letting his money trickle through his fingers. How about letting us in on your pastime, Lloyd? How big is your cellar? . . . We wonder what kind of tires they are putting on the new Dodges this year that causes Rebecca Youse to be an hour late. Rebecca only had four flats in two days.

Florence Weimer, Bldg. 19-2, rode a T.W.A. plane to Chicago last Saturday morning. Even though the plane had two pilots and Charles Lindbergh was on the plane, Florence was scared to death because of the many fleecy clouds that made a rather choppy ride.

Sleuthing In 4-6

The moving around of office furniture in Bldg. 4-6 is not due to fall house cleaning. We are making room for the office force from Bldg. 4-5, who are coming up to join us. Welcome everybody! Glad to have you with us. . . . Helen Forst never realized what an important article her picture is until she went over to Bldg. 21 without it. On returning, she was not permitted to enter the gates, so she made an attempt to slip through Bldg. 18, but—"Foiled again", says Helen. In other words, she had to wait there until her picture was brought to her. Maybe she will appreciate that picture from now on . . . Having been addressed by L. N. Nelson as "Beautiful though bald", it was suggested that Leonard Roebel write an article on "How to be beautiful though bald". However, Roebel insists that his friend Nelson could do a better job of it. Why not compromise, and write it together, then you would really have something . . . Could it be that Dorothy Mueller is a little excited about her election? At least she was seen looking at her watch to see what month it was . . . We intended to ask Ruth DeWitt for information concerning certain letters in which she was addressed as "Dear Duchess". But since we hear that she didn't like the reference to that baby picture, we won't mention the letters. We won't tell a soul, Ruth. . . . Harriet White has announced that she is to become Mrs. Kenneth Lytle this fall. Our congratulations and best wishes to you, Harriet. . . . If you're shopping for raincoats, ask Harold Fremion where to buy. He'll get you the best water soaked raincoat possible . . . What would the Y.W.C.A. "Mixer" be without the Bldg. 4-6 office girls? Regular office force every Friday night! Well, girls, it's nice to know your money is going for a worthy cause, isn't it?

In view of the fact that he now is a member of the G-E Quarter Century Club, Charles Masel, Bldg. 4-3, is compiling a 25th anniversary anthology. No doubt it will contain many interesting epigrams. For over a period of twenty-five years many interesting things happen. Charlie is becoming quite a literary man and it would not surprise us to see him ranking with the best of our authors.

On Sept. 27th, Mary Ann Distel, Bldg. 19-4, became the bride of Ray Kissner in a pretty ceremony at 9:00 a.m. at St. Peters.

The West Creighton Avenue Church was the scene of another beautiful wedding where Thelma Court, Bldg. 19-4, became the bride of Jack Winebrenner.

The best of luck to the both of you.

Plastic Flashes

Since we've been getting all this wet weather, we think how swell it would be to lead a duck's life.

If the "glammer boys" don't stop parading the latest styles on the floor, how are the second shift workers going to keep normal?

It looks as if Grace is losing her grip, or else things just disappear.

Cecil is back from his vacation and the pleasant task of moving into his new home.

We'uns is all waiting for a piece of wedding cake from Florence Peters come October 25. Best of luck, Florence.

Everyone seemed to have enjoyed themselves very much at the bowling alleys Tuesday night. Alice Martin broke a fingernail and suffered a skinned ankle. Susie Jones certainly had a swell start in bowling, but she almost lost her balance. We wonder where Marie Smith learned to throw those curved balls. Mabel Alcott certainly had trouble keeping track of her special bowling ball. Stella Morrolf has a cute little phrase all her own when she bowls.

Ask Mildred Bair to tell you about her most embarrassing moment. That's all right Mildred, we all have them.

There seems to have been some tall hunting going on lately. The hand molders have a nice squirrel tail collection. Why not start a trophy room and you could also hang up some of those tall tales you boys are so good at, too.

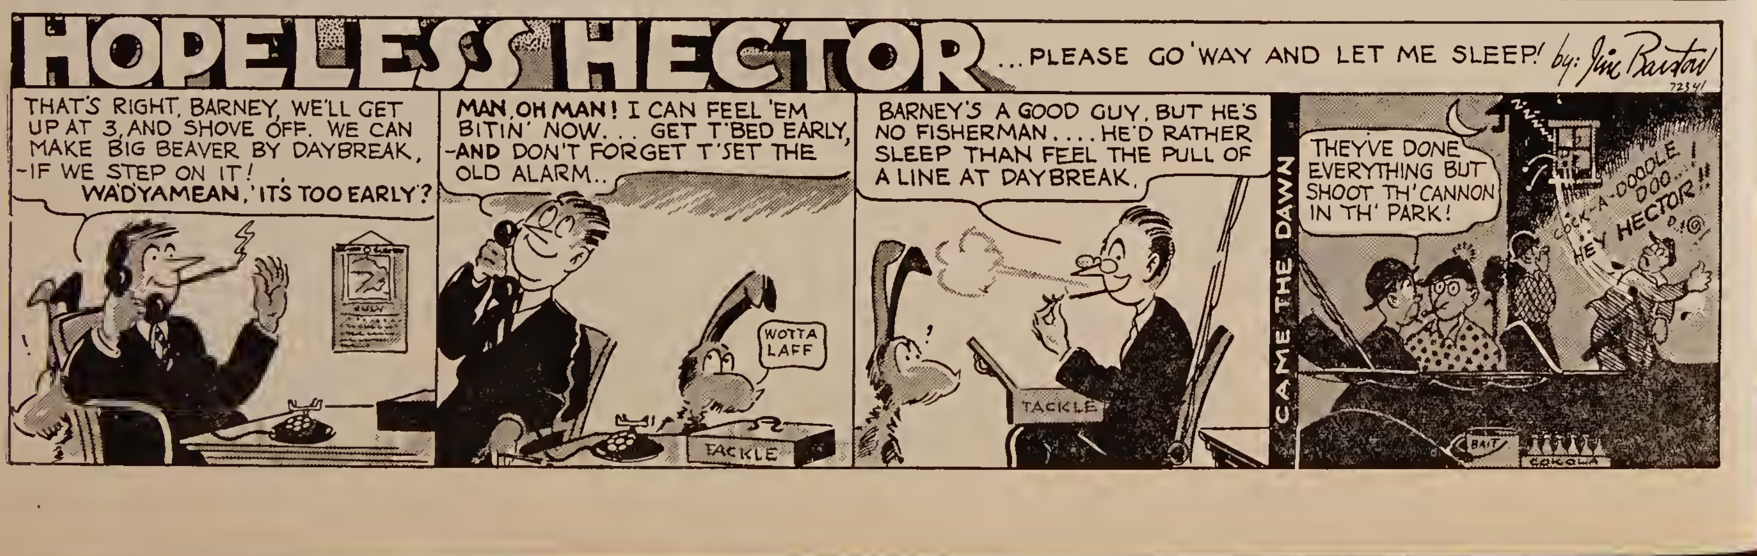
The first shift girls have that "cat that ate the canary" look since they had that chicken dinner. We weren't invited so we won't tell you about it—so there.

The Tillies.

26-5 Tool Bits

We hear C. Baker, Bldg. 26-5, is a cowboy now. He is working on the range (electric). . . . Margaret Schaefer had a good item for the WORKS NEWS but she couldn't remember what it was and who it was about. . . . Doris Windhorst had a birthday last week. The boys brought her a lot of candy and oranges and stuff like that, so she gave some of it away . . . Irma Wyneken is keeping the top of her car up now since it's raining. Last time she had a foot of water in it. But she won't lend her car to anyone. How come? . . . Dave Bartels, Bldg. 26-5, is the bouncing father of proud baby.

"Injun" Summer, its Balmy breezes seem to have the same effect as the first warm breezes of Spring for we have lost a couple of nice girls by the way of Cupid's dart.



HOPELESS HECTOR
... PLEASE GO 'WAY AND LET ME SLEEP!
by: Jim Barstow
THAT'S RIGHT, BARNEY, WE'LL GET UP AT 3, AND SHOVE OFF. WE CAN MAKE BIG BEAVER BY DAYBREAK, -IF WE STEP ON IT! WA'DYAMEAN, 'IT'S TOO EARLY'?
MAN, OH MAN! I CAN FEEL 'EM BITIN' NOW... GET T'BED EARLY, -AND DON'T FORGET T'SET THE OLD ALARM..
WOTTA LAFF
TACKLE
BARNEY'S A GOOD GUY, BUT HE'S NO FISHERMAN.... HE'D RATHER SLEEP THAN FEEL THE PULL OF A LINE AT DAYBREAK.
TACKLE
CAME THE DAWN
THEY'VE DONE EVERYTHING BUT SHOOT TH' CANNON IN TH' PARK!
COCK-A-DOODLE DOO...!
HEY HECTOR!!
BAIT

Returned to work: Solomon Andorfer, Victor Nahrwald, Wm. Kizer, Dorothe Roop, Mary Ellen Butler, Wayne Garton, Ellen Gerber, Bernard Rinier, Chris Doenges, Violet Dollarhite, Gladys Olinske, Wayne Dye, Harley Ridemour, Kathleen Butler, Donald Edgar, John Brandyberry, Carroll Powers, Betty Paul, Miriam Miller, Myra Meese, Barton Turley, Freida Browand, Clara Lake, Esther Saalfrank, Mary Higgens, Edna Fogel, Nellie Kelly, Leva St. Peters, Donald McCollister, Richard Garter, Oileen Steinbarger, Esther Hauke, Everett Keenon, Nora Coburn, Ruby Hendricks, Mildred Brown, Carolyn White.

Left the Hospital: Betty Griebel, Polly Ort, Eunice Turner, Lola McCague, Joe Bahr, Dorothy Leisey, Valeria Demske.

The Auburn street fair was responsible for all that stringy candy we saw on the inspector's table the other day.

A southern Negro upon receiving his draft questionnaire struggled desperately with the long list of questions. He looked it over for a long time, scratching his head and sweating profusely. Finally he gave up in despair and returning the blank questionnaire to the draft board, made this notation on the last page, "I'se reddy when you is."

His Twenty-Fifth Anniversary

No wonder there is a smile on Ed Glusenkamp's face, for he was pleasantly surprised on his twenty-fifth anniversary as a Fort Wayne Works employee with an informal reception by Bldg. 4-5 employees who not only decorated his desk and presented him with an anniversary cake but also with an excellent traveling bag.

Motor Generator Static

MORE ABOUT POISON PEN

Since starting his career as a columnist by authorizing the majority of "Motor-Generator Static," Don Schultz has acquired one title after another from his associates, some of the better known being "Poison Pen" — "Tooter" — and "Honest Don". It now appears that we shall have to bestow still another descriptive name to this author of pen poison, namely "Scavenger." It has been learned from a trusted source that Don, in his anxiety to learn the identity of those who enter articles in the column without the formality of permitting him to censor them, has taken to looking through the waste basket that reposes beside Dorothy DeHaven's desk, thus hoping to find the original articles after Dottie has completed the typing of same (Ye Editor cannot interpret everyone's scribbling). Don hopes through his knowledge of handwriting to learn who it is that takes the liberty of mentioning his various interesting performances.

Henceforth we shall know him as "Scavenger" Shultz.

THE BUZZARDS

"Poker Face" Ginder the man of the hour, (5:15) usually plays a good lone hand when he has a left bower and a nine spot, if he had any help from his partner he'd make a good solitaire player.

Professor "Jack" Skevington is looking for some more pupils for his bowling instructions. The way Jack instructs them, he shows them How Not to bowl. Jack occasionally breaks 111. Quoting Jack, "Never miss a spare. Some one may mark it down that way."

Bldg. 19-3 is famous for a record never equalled, or never will be equalled. MIZA Kaiser, who bowls on three leagues every night and six nights a week, actually got a strike, but lost it when he stepped over the foul line. The next ball of course went in the gutter. MIZA says he was disgusted. If anyone can equal the CHAMP please notify "Bones" Brandt. Tel. No. 400. Record . . . 1 strike in 54 games.

Chas. Thompson who is the best dressed man in Bldg. 19 with the exception of J. W. Felmlee, has been displaying some distinguished patches on his face. Also some skinned knuckles. Charley says it was a WEN. We know when it happened but on whose preserves were you approaching?

Jack Smith of Bldg. 19-3, dines at the Hobby House five times a day. Well, Jack, confess, is she good looking or do you think that two can live just as cheap as one.

Norman Jueschke, who has been married almost a year, says the old saying that married people live longer than single people is wrong. It just seems longer.

No WORKS NEWS is complete without a bulletin about Gene Roesner's mustache. The other morning when he got up and looked in the mirror, he was so scared of those fierce looking mustaches he saw, he ran down stairs and said, "Mom, there's a sheriff in the house, better call the fire dept."

The inventive genius of Bushong is astounding. He's going to invent a new bowling ball that you roll down the center of the alley right at the head pin, and just before it gets there two long sticks will shoot out from the sides the width of the alley and sweep all pins off. This will eliminate missing spares. You only roll one ball for each frame.

Now that Helen Moechberger has taken the bandage from her busted paw, she's using right handed pencils again.

MEMORY

"Chiseler" Berning, only rival of "Man Mountain" Bushong insofar as size is concerned, just naturally forgets to remember. It seems Berning is one of the main "drawbacks" on an Apparatus Bowling League team, so when 7:00 p. m. rolled around, his teammates were ready to bowl but no "Chiseler" was there. Naturally, his teammates wondered what was detaining him, but figured with him absent, they might win a game or two. The next day he explained: "You know, I never thought of bowling until eight o'clock." (There are some very fine ? # ? memory courses on the market.)

"What I'd like to know," said Somebody, "Is why does the Apparatus Bowling League team need a water boy?"

EVERY MINUTE

The World's Series started on Monday—so did the fishy smell that perfumes the air around our Wage Rate Group.

These boys are natural born slickers, and, on occasion, try to take advantage of their friends from the country. When someone told Wayne Johnson it was raining like ——— in New York, a thought flashed through his mind "Why not make some easy money?" So he, in his most nonchalant manner, approached Bob ("Daddy") Archbold and offered to bet that New York would not win (still figuring on rain preventing the game) that day. Bob, being innocent and gullible, not wise to city ways, accepted the invitation and put up a dime to back his conviction. As soon as the bets were placed, Wayne turned to Bob—gave him the well-known "Bronx Cheer" and informed him that, due to rain, there would be no game — hence New York could not win. But here is where the fishy smell comes in—it seems one city slicker fooled another—all was well in New York and the game went according to schedule. So, late in the afternoon, Bob picked up the twenty cents with the remark "Dad-burn it, I'll show those city guys."

Which brings us to the moral "One is born every minute and most of them grow up."

MECHANICAL PERFECTION

In spite of the rain, Mary Zimmerman was happy for she was walking to work under her cute little umbrella. This umbrella is Mary's pride and joy—or was until it double-crossed her. As she strolled along humming bits of popular melodies, she was so contented, until suddenly her dreams came crashing down upon her—yep, the trick umbrella folded up, sending streams of water down the back of her neck. Naturally, her spirits were dampened as well as other parts of her anatomy, but being a brave soul she untangled the umbrella and plunged ahead, only to have it repeat the performance, not once, but twice! By this time Mary was getting hot in spite of her water cooling system, so leaving the contraption as it was, she plunged into the doorway of Bldg. 19—unhappy, wet and mumbling to herself — the afternoon ruined, faith in humanity and umbrellas completly gone. Remarks Mary: "I have an iron constitution and don't want it to rust!"

COULD BE

The feud is on. Jack Hively, "Czar" of Bldg. 19-1, east end, received a note from the "Hornet" (reported to be Ned Foster) dictator of the west end, threatening grave disaster if the east end crew came up to the west end. Jack remarks "He can't scare me. If he is a hornet, his sting has been gone for a long time." Could be!

BUSY DAY

He really is just a boy at heart—"who" you ask? Why "Pappy" Archbold. One of the gals from our Service Bureau saw "Pappy" in a local ten cent store along with a group of lads, inspecting the toy soldiers, tanks, guns and airplanes on display. What I am trying to bring out is that these innocent days of childhood are the finest in life—but "little man, you've had a busy day."

SAYING OF THE WEEK

Jerry Frye remarks "A drizzle is a drip, going steady."

Birthday Party

Carrie Green, Bldg. 26-2 and Virginia Mollet, Bldg. 19-3, were guests at a birthday party last Thursday evening at the Chatterbox. Carrie and Virginia showed their appreciation by tripping the light fantastic with every girl in the party. Those present were Ruth Luther, Bldg. 26-3, Clara Gidley, Bldg. 19-4, Elsie Hoffman, Bldg. 26-2, Thora Archbold, Bldg. 26-2, Bertha Gruber, Bldg. 26-2, Thelma Oswald, Bldg. 17-3, Olga Driebelbiss, Bldg. 19-3, Helen Stahl, Bldg. 19-3, Hilda McClain, Bldg. 26-3, Grace Biedrzycki, Bldg. 26-3, Betty Stonestreet, Bldg. 26-3, Pat Chapin, Bldg. 26-2, Ceal Romary, Bldg 26-2, Dorothea Swank, Bldg. 26-3, Mildred Harber, Bldg. 21, Virginia Bowman, Bldg. 19-4 and Louise Metker, Bldg. 26-3.

Help! We hear that Lawrence Rickert, Bldg. 26-2, who stands umpty umpty in his stocking feet has a particular aversion to mice.

Harry Karr, Bldg. 26-2, disappeared from the foremen's picnic. The boys didn't know that Harry had a shower scheduled and had to be there.

Fred Gisler, Bldg. 19-3, had a closing out party at Loon Lake. The guests were Annette Thomas, Don Thomas, Carrie Green, Golda Mentzer, Roy Mentzer, Frank Schlotter, Joe Oswald and Thelma Oswald.

Violet Amacher, who up to a short time ago was an employee of the Works Cafeteria, was hostess to a number of her former fellow employees last Friday evening. Those present were Eva Lynn, Nettie and Bert Sellers, Erma Hofman, Flossie and Chet Straley, Ruth Thomas, Hazel and Sam Henline, Dorothy and Ernest Marks, Nora Tumbleson, Pauline and Walter Beaty, Irma Scheuman, Myrtle Delagrange, Bud Ringle, Mary and Henry Menze, Violet and Walter Amacher, Mildred Garett and Marie Lantz.

New Pocketbook Model G-E Radio

Three new versions of the popular table-type radio-phonograph combination, and a newly-styled "pocketbook" size battery-operated portable have been included in the General Electric radio receiver line for 1941-42, as announced by the G-E radio and television department, Bridgeport, Conn.

The new "pocketbook portable", designated model LB-642, presents still another version of the 6-tube battery-type receiver introduced by G-E early in the year. Weighing about six pounds with its complete battery complement, this model is less than 10 inches wide, about 6½ inches high, and less than 4 inches deep. In size about halfway between the camera set and the larger luggage-type receiver, this portable can conveniently be tucked under the arm and used around the house or out-of-doors. It is a "three-in-one" set, being operable on its batteries or on either AC or DC house current. The new model is styled in airplane cloth instead of simulated leather as heretofore.

News Around

Thisa And Thata 19-5

Congratulations to Dorothy Dunifon who changed her last name to Kaugh, Saturday, Oct. 4 at the St. Joseph Church at 9:00 o'clock. Then to Evelyn and Jack Archibold who are the proud parents of Linda Lou we give our congratulations; also Minnie and Edgar Doehrman who are the proud parents of Judith Dianne. All Arnold and George had to say about the football game was "That it was kinda wet"—

Margaret Feaster gave a surprise shower for Dorothy Dunifon. The bride-elect was presented with a beautiful table, a gift from Thelma Pond, Mildred Werling, Dorothy Craig, Margaret Wherle, Genevieve Frazier, Berniece Scheuman, Dorothy Kasner and Mrs. Leo Dunifon, the bride's mother.

Sunbeams From 17-4

"Aint it the truth", says Bess Geller, "when I carry an umbrella there isn't a cloud in the sky and look at me now." Boy was she soaked.

Helen Miller entertained the inspectors at her home last week. The evening was spent roasting wieners and playing games. Those present were Muriel Wetzel, Doris Lontz, Frances Wilkie, Aurelia Fortman, Helen Kreubuhlar and Catherine Hively.

Well the department party has come and gone and everyone had a swell time including our old faithful stand-by, Dave Slater. He can always be counted on to take charge and really deserves a lot of credit.

Thought for the week:.When you encounter stumbling stones along the way, step on them and go ahead.

Granny

Charlotte Sanford, Bldg. 4-3, is so very busy now since she has been elected to the Board of Directors of the Elex Club. She has appointed Nellie Williams, Bldg. 4-3, as her private chauffeur.

George Hahn, Bldg. 4-1, went fishing over the week-end. To make sure he would have fish to eat, he took some along. That's using the old head, George. It was rumored he didn't get out on the lake.

Some of our commuters in Bldg. 4-3, report to us that every time it rains the main street of Huntertown becomes a raging torrent and that it is almost an impossibility to get through the town. They suggest that Archie Boren, Bldg. 4-3, be appointed drainage commissioner and immediately take the necessary steps to relieve this condition.

A number of the boys in Bldg. 4-3 have become horse fanciers. The latest one to acquire horse fever is Pete Macke. He reports that his nags ran away last week and did considerable damage. Not to be disheartened by this, he is going ahead with the organizing of the Bldg. 4-3 Horseman's Club. An election was recently held and Pete was elected president. "Doc" Markley, vice-president, John Kramer, treasurer and Clarence Watterson, secretary. Eldon Mee was chosen to head the mule and burro division of this club.

Art Brandenburger, Bldg. 4-3, is wearing a most peculiar type of shoe, the toes of which turn up very sharply, making it necessary for Art to carry his chin high in the air to keep from scraping it on the toes of said shoes. This also gives him a very snooty appearance. He plans on using these same shoes as skis this coming winter. A better idea, we think, would be to use them as toboggans, as a lot more people could ride.

Dick Shorter is in the market for a couple of Pontoons to carry on rainy nights.

He got stalled in water over the running board on Thompson Ave. last Saturday night.

Attention Aviation Enthusiasts

Next Thursday, October 16, there will be a meeting in the Lounge Room of the G-E Club for both men and women interested in forming a flying club.

Already 20 persons have shown interest in this plan which will afford those interested in aviation a chance of learning to fly for a reasonable amount. The more persons showing interest in the club and joining, the lower the rates will be.

R. W. KENT,
G-E Club Publicity Chairman.

« «It's a Joke» »

A schoolteacher asked the pupils to write a short essay and to choose their own subjects.

A little girl sent in the following paper:

"My subjek is 'ants.' Ants is of two kinds, insects and lady uncles.

"Sometimes they live in holes and sometimes they crawl into sugar boles, and sometimes they live in with their married sisters."

Mountaineer: "Doc, I want you to look at my son-in-law. I shot at him yesterday and took a piece out of his ear."

Doctor: "Shame on you, shooting at your son-in-law."

Mountaineer: "Huh. He wasn't my son-in-law when I shot him."

A farmer visited his son's college. Watching the students in a chemistry class, he was told they were looking for a universal solvent.

"What's that?" asked the farmer.

"A liquid that will dissolve anything."

"That's a great idea," agreed the farmer. "When you find it, what are you going to keep it in?"

Thought for the Month: Old southern darkey soliloquizing: "When ah asks de Lawd to send me a chicken, ah hardly evah gets a chicken. But when ah asks de Lawd to send me after a chicken, ah always gets me a chicken."

ATTENTION, TABLE TENNIS PLAYERS!

If you are interested in playing in a league on Saturday afternoon in the G-E Club gymnasium please fill out this form, and mail it to Ed Yahne, G-E Club.

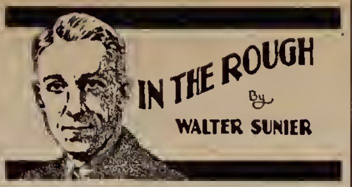
Bldg.____________________ Phone__________



IN THE ROUGH

by WALTER SUNIER

We have been maligned, humiliated, chagrined, mortified, prostrated, debached, abased, degraded, abashed and shamed by the statement in the WORKS NEWS which started "That mighty giant, that impressario of imperturbability, that suave and naive personality, that is, Walter Sunier, famous "In the Rough" scandal monger, finally ruined his reputation." The story is that we threw a club on No. 18 tee and on No. 18 green, cracked the ball clear over to the practice putting green when the putt missed by two inches.

Oh! the ignominy. Oh! the odium. Oh! the humiliation. We are covered with sackcloth and ashes. What a temper. Anyway, we didn't throw the club. As stated, it slipped out of our hands. How else could a club get out of your hands? We were broken of club throwing about six of seven years ago when with a mighty heave at No. 14 tee at Brookwood, we dunked one into the creek. It was a lot of trouble to get it out.

And the wild and ferocious crack at the ball on No. 18 green—we are remorseful about that too. Anyone that would show such a fit of temper should be—well, not just that—but he should be humidified or humored or do we mean humiliated. It was a pretty long shot with a putter, wasn't it? We'll bet you can't do it. Remember that you must do it one-handed and must not tear up the green.

In August we ran a picture of four G-E women golfers and mentioned others who played. Herewith we are showing you two others—Dotty Krick, Bldg. 4-5 on the left and Mary Ellen Stewart, Bldg. 4-5, on the right.

World's Record

A new world's record for pouring concrete by means of cableways was recently established at the Shasta dam project, Redding, California, when 11,790 cubic yards of concrete were poured in 24 hours. Three cableways equipped with General Electric motors and variable-voltage control played a large part in setting this record.

Rod-Gun Club Opens Indoor Range

Opening of the 1941-42 indoor season for the G-E Rod and Gun Club is announced by A. F. Bowers, club president. All employees are invited to become members of the organization. Meetings are held Wednesday evenings from 7:30 to 10:00 o'clock on the Armory range. Shooting is with .22 calibre rifles and any size pistol. Employees interested not possessing a .22 calibre rifle may use arms provided by the club.

SCIENCE FORUM

by L. A. Hawkins

Q. Is electricity solid, liquid or gas?

A. This question is like asking whether steel is a battleship, a buzz saw, or a needle. Electricity is the stuff from which all forms of matter are composed, but it cannot be described in terms of any of them. One element differs from another only in the number and arrangement of the electrical units which constitute it, and the natures of the elements determine whether, under given conditions, they exist in solid, liquid or gaseous form.

Q. What is the strongest type of alloy, and what is its composition?

A. That depends on whether the metal is in tension or compression. In tension, the strongest material is drawn tungsten wire such as is used in incandescent lamps. It takes a load of about 600,000 pounds per square inch to break it. In compression, the strongest alloy is tungsten carbide which is used in high-speed cutting tools. A pressure in excess of 900,000 pounds per square inch is required before it fails. Tungsten carbide, as the name implies, is made of tungsten and carbon; and in its commercial form it also contains cobalt. It is not only the strongest alloy under compression but it is one of the hardest.

Q. Is is possible to electroplate mercury with a coating of some other metal?

A. As far as we know, no method has been used to coat a globule of mercury with a film of another metal. Perhaps this is due to the fact that mercury is a liquid and any attempt to electroplate it would result in the formation of a mixture or an amalgam, which consist of particles of metal wetted or dissolved in the mercury. Mercury is used, however, to coat brass and copper before they are silver-plated so as to make the silver stick better. Silver electroplated direct on the copper or brass surface forms a spongy coating that is likely to peel off.

Q. Is it true that wherever we are we shall find there a prevailing wind?

A. Yes, these prevailing winds are found everywhere. Near the Equator the prevailing winds, known as trade winds, blow from the east. North and south of the trade winds there are latitudes known as the doldrums, where prolonged calms are frequent. Farther north, in the temperature latitudes in both hemispheres, the prevailing winds are in general from the west, though locally this may be subject to special conditions depending on the relative positions of such factors as large bodies of land and water.

Q. What is the difference between smoke and clouds?

A. There are many kinds of smoke, but usually smoke is made up of small particles of carbon and ash, sometimes mixed with condensed steam or water vapor. Clouds differ in that they are composed of condensed particles of water vapor so small and so numerous as to be opaque. The banks of thick, white material that come from locomotives—the steam—are the sort of thing of which clouds are made.

Q. Does a razor blade become any sharper when it is dipped in hot water before shaving?

A. It appears that the principal advantage of warming the razor blade is a psychological one. There is no reason to think that the simple warming of the blade could make it any sharper or that it would aid in any cutting through the hair.

Q. Is carbon dioxide used in electric light bulbs?

A. Carbon dioxide never was used in incandescent lamps. They are filled with gas, but the gas is usually nitrogen and argon. Carbon dioxide was used a number of years ago in a discharge type of an electric light which was similar in many ways to the neon-type signs you see so much of nowadays. It gave a white light resembling daylight and was used for color matching. As a light source, however, it was not very efficient; and when other more efficient white light sources became available, it ceased to be used.

ON - - the Alleys

R. W. Kent

Starting next Monday night, October 13th, the league will begin promptly at 6:45 p.m. instead of 7:00 o'clock as has been the starting time in the past.

Blue Print still holds on to the top spot, but it took some hot bowling to do it, winning one game by one pin, then hanging up a 932 game-handicap.

Don't worry fellows we'll cool off one of these days. (I hope not.)

Perry's 612 series topped the individual total for the evening, but several fellows turned in 200 scores. They are as follows: Goheen 224, Ulmer 206, Lamboley 205 and Townsend 204.

$3,000 Paid In Suggestion Awards

In Charge Of "House Of Magic"

C. E. Gluesing, associated with presentation of General Electric's "House of Magic" program since the first presentation at the Chicago Exposition will be in charge of the program to be presented at the G-E Club next month. In the above picture Mr. Gluesing is shown demonstrating how light can be heard.

Profits Available For Dividends Announced

Big Increase In Federal Taxes Is Listed

General Electric Company's profit available for dividends for the first nine months of this year amounted to $37,471,681 compared with $37,094,776 for the same period last year, President Charles E. Wilson announced today. These earnings, which were equivalent to $1.30 and $1.29, respectively, a share of common stock, were after provision for Federal income and excess profits taxes of approximately $82,000,000 for the nine months' period this year compared with $26,900,000 for the same period a year earlier.

A dividend of 35 cents a share of common stock is payable on October 25, making a total of $1.05 a share in dividends for the first nine months of this year, the same as was paid for the corresponding period of 1940.

Net sales billed by the company during the first nine months of this year exceeded the billing for any previous full year, amounting to $474,017,608 compared with $287,249,930 for the same period last year, an increase of 65 per cent.

The output of equipment known to be for defense purposes is increasing rapidly, Mr. Wilson stated, and during the first nine months of this year the billing of such equipment increased more than 250 percent over that for the same period of last year.

Apprentice Alumni Election Tuesday

The annual election of the Apprentice Alumni Association will be held next Tuesday evening October 21, following a banquet starting at 6:30 p. m. at the Shrine club rooms. Following the election of officers a social program will be held which will feature an address by the Hon. James Garfield Stewart, mayor of Cincinnati.

Candidates for the office of the association president are: Wallace Clayton, Bldg. 19-3; Frank Peternell, Bldg. 4-5 and Herman Korte, Bldg. 26-2. Tickets for the affair may be obtained from contact men.

Dr. Langmuir Honored

Two degrees in one week, and not in the traditional month of June either, is the record established this week by Dr. Irving Langmuir, associate director of the Research Laboratory at Schenectady. Tuesday, the 14th, he was made a Doctor of Laws by Queens University at Kingston, Ontario, and on Friday, the 10th, he was made an honorary Doctor of Science by Rutgers University.

Gluesing In Charge Of House Of Magic At The G-E Club

Arrangements Soon To Be Completed For Distribution Of Admittance Tickets

C. Edward Gluesing, who will present the General Electric "House of Magic" science show at the G-E Club on November 10 and 11, is a real magician and a master at sleight-of-hand tricks.

He has not always been a magician, however. During his lifetime he also has taught school, has been a private tutor, and has served as a sailor in Uncle Sam's Navy.

A native of Wisconsin, he was graduated from the State Teachers College at LaCrosse. Then after teaching science and mathematics to high school students for a few years, he decided to further his education. He attended the University of Wisconsin and was awarded a bachelor of philosophy degree. It was during these college years that he took up magic as a hobby.

The teaching urge took hold of him once more, however, and again he taught his favorite subjects to Wisconsin pupils. This vocation he followed for seven years. He then attended the University of Wisconsin a second time to receive his master's degree in education.

In 1934, when the G-E "House of Magic" show appeared at the Century of Progress exposition in Chicago, Gluesing assisted with the lectures and demonstrations. He thus obtained his first experience with the science show, an experience which was to serve him in good stead later on.

For the last few years Gluesing has toured his native Wisconsin and nearby states, displaying his skill at pulling rabbits out of a hat. Recently he was put in charge of one

Elex Conference To Open On Saturday

One hundred delegates will attend the annual conference of the Elex Club to be held tomorrow and Sunday at the Hotel Elkhart, Elkhart, Ind. The delegates will be divided in three groups to formulate proposals for a club program for the coming year. The formal program will be adopted at a joint meeting of the three groups on the closing day of the conference.

Private busses for the delegates will leave the G-E Club tomorrow morning at 9:00 o'clock. Upon arrival at Elkhart delegates are asked to report as soon as possible at the Hotel Elkhart for registration.

More Than Three Hundred New Ideas Are Accepted

M. R. Payne, Bldg. 19-4, Heads List With Award Of $100.00; J. J. Koble Second With Award Of $75.00

(Pictures on Pages 4-5)

A suggestion for saving tools netted an award of $100.00 for M. R. Payne, Bldg. 19-4, and places him at the head of the latest suggestion list which tabulates 385 suggestions bringing a total of $3,077.50 for the suggestors. Mr. Payne's suggestion involved changes to die cast mold stems. The list includes a number of large awards. Joseph J. Koble, Bldg. 26-1, on a material saving suggestion which called for the salvaging of capacitors from lamp auxiliaries, received an award of $75.00, while Eldon Braden, Bldg. 26-3, received an award of $70.00 for his suggestion for improvements in sawing multiple coils apart.

A suggestion to furnish wear plate material with the bright side out thus saving the time required for buffing brought an award of $65.00 to William L. Fisher, Bldg. 26-4, and an idea for treating certain paper spools resulted in an award of $50.00 for Dean B. Smith, Bldg. 26-2.

Emmit C. Ort, Bldg. 8-1, is among the suggestion leaders with an award of $45.00 for his idea to in-

Wire Department Maintains Perfect Safety Standing

Completes Third Quarter Of 1941 With No Lost-Time Accidents

At the close of the third quarter the Tool Division remained, as the only Fort Wayne Works division, with a perfect no accident record. With seventeen lost-time accidents in September the total for the first three quarters of 1941 now stands at 100. The 1941 all Works frequency now stands at 6.46 and the

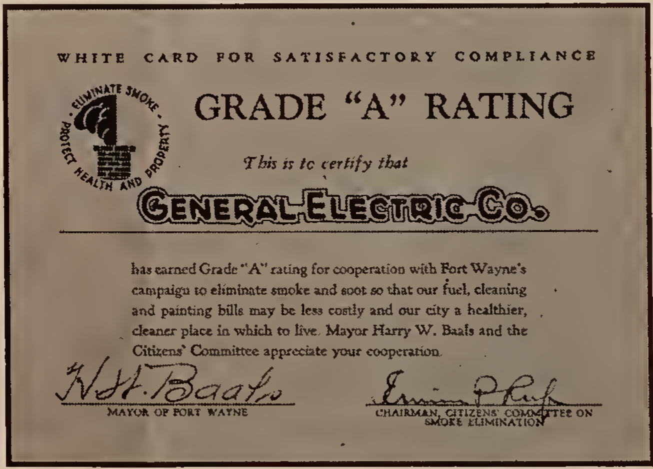
NOTICE

With the arrival of the season for outdoor wraps, the attention of employees is called to the necessity of displaying their identification badges in a prominent place on their outdoor garments when entering the Works. The practice of carrying the badges in pocketbooks or pockets has proved the cause of considerable inconvenience and delay during the rush hours.—George Doehla, Fire and Patrol Chief.

Recognition Given For Part In Smoke Elimination Campaign



WHITE CARD FOR SATISFACTORY COMPLIANCE

ELIMINATE SMOKE · PROTECT HEALTH AND PROPERTY

GRADE "A" RATING

This is to certify that

GENERAL ELECTRIC CO.

has earned Grade "A" rating for cooperation with Fort Wayne's campaign to eliminate smoke and soot so that our fuel, cleaning and painting bills may be less costly and our city a healthier, cleaner place in which to live. Mayor Harry W. Baals and the Citizens' Committee appreciate your cooperation.

H. W. Baals
MAYOR OF FORT WAYNE

Ermin P. Ruf
CHAIRMAN, CITIZENS' COMMITTEE ON SMOKE ELIMINATION

The above certificate has been presented to the Fort Wayne Works for its effectual cooperation in the campaign to eliminate smoke and soot. The presentation was made by Ermin P. Ruf, as chairman of the Citizen's Committee on Smoke Elimination, with the approval of Mayor H. W. Baals.

The card is a Grade "A" rating and states: "This is to certify that

Volume 24 Friday, October 17, 1941 No. 87

• Time Is Short

Time is THE ONE THING each of us has, to do with what we will. If we make the best use of it, we shall succeed in whatever purpose we undertake. We shall accomplish the objectives we seek. If we waste time, cast it aside daily in the countless ways that time can be misused, we lose out. It matters not whether the goal be building huge electrical equipments or war material for the government. Time is the most valuable part of any piece of equipment.

So today, right now, it is more obvious than ever that time passes swiftly. The time when America needs to be strong was never more pressing than at present. We must press on, faster and faster. We must not let delays hinder us. While dictators battle each other, while other nations lie fallen and beaten in the dust, it is America's job to bend closer to the job and DO the thing that must be done.

THE TIME FOR TALKING HAS PASSED. Idle conjecture over the outcome of the present state of world affairs can accomplish hours of wasted time . . . nothing more. Let us leave the issues to Old Father Time and redouble our efforts toward production of Uncle Sam's vital needs.

There is no other way!

• Sincere

There is an old Greek legend which defines the origin of the word "SINCERE." It seems that one of the principle industries was that of making and selling pottery. The crudeness of methods used would frequently result in flaws in the product, which the merchants would carefully cover over with colored wax, the Greek word for which is "cera." The Greek for the word "without" is "sine."

Merchants who were sure of the articles they offered for sale had signs made with the two words coupled together, reading "SinCera", or without wax.

In the work we are doing here for national defense as well as the apparatus we are building for the electrical industry, we must be mindful that our products must be without flaws—"without wax"—SINCERE.

The Greeks had a word for it—but we use the trademark.

—Schenectady Works News.

• Standards Must Improve

Whatever else we have learned during the years about forms and theories of government, we know definitely that any government, democratic, totalitarian, communistic, or otherwise, cannot long survive a backward trend in the economic condition and standard of living of its people. Although the starting point may be very low, a system of government under which there is a gradual improvement in the living standards of the great bulk of the people is reasonably secure against the forces of change. By the same token, although the starting point may be high compared with other countries, a system of government under which there is a gradual impoverishment and lowering of the standard of living of the great bulk of the people is vulnerable to the preachments and false promises of the crackpot and the radical.—Philip D. Reed, Chairman of the Board.

NEWS FROM THE CAMPS

We publish herewith with great pleasure extracts of letters sent to us by G-E employees now in government service. Address all communications for this column to the WORKS NEWS editor.

Dear Editor:

On our first day at camp in the Naval Training Station, Great Lakes, Ill., we received a physical examination and were given our clothes. The next day we received a regulation Navy hair cut, went to a lecture, and drilled on marching. We drilled on marching the rest of the week, and received guns and bayonets at the end of the week. We were given shots for different diseases, and also took a general aptitude test.

The second week was the week in which Rooster competition was started in order to determine the best company in the battalion. We also learned how to roll clothes and lay out sea bags for inspection; we learned the manual of arms and physical drilling; we took some more shots for prevention of different diseases. All companies had personnel inspection at the end of the week. We took test for trade school and had lectures on Articles of the Navy. My company, which is the 160th of the 4th Battalion in the First Regiment, was leading for Rooster honors. We took out service insurance during our second week of training. Everything is done with speed. Company 160 was first in personnel inspection, drill inspection, and marching inspection; also in military order, but second in barracks inspection. Company 160 also took bag inspection. We had a gas mask drill in which we used tear gas.

We started the third week off with our fourth shot for diseases and by cleaning up of the barracks. Had personnel inspection in which 160 again took first honors. We had physical drill and regimental review on Wednesday after having bag inspection on Tuesday. Rooster was awarded to Company 1 on Wednesday during review. Company 160 won regimental review on the Wednesday before the Rooster award, in its second week at Camp Barry.

After a liberty of from 12 to 36 hours for companies in the Fourth Battalion of the First Regiment, we settled down to mess hall, guard duty, and work detail, and are living on "paradise side" of the Great Lakes Training Center. We will march in Chicago the Sunday before Navy Day, October 26. During our fifth week, we drilled more on the manual of arms and physical exercises, also on marching. We learned column, oblique, to the rear marching, left flank and right flank, double to the rear. We took swimming qualifications, attended lectures and liberty parties. Everyone received some guard duty.

Our sixth week included a little training, with lectures, review of test for trade school, and practice for graduation exercises. We go on leave before joining an out-going unit.

Yours sincerely,
JOHN ROGER COX.
U. S. Naval Training Station,
Company 160, Great Lakes, Ill.

Dear Editor:

Ever since arriving here I have been receiving the WORKS NEWS each week. It is interesting to hear what is happening back in Fort Wayne and to read the experiences of the other men in the service.

Ever since arriving here I have been connected with the motor transport, first as an automatic weapons battalion motor officer and now with a provisional truck company on a six-hour stand-by order ready to move from here to the First Army maneuver area.

This regiment is a new one, in fact for the first few weeks building was still going on. Now we are well advanced in our training. It has been very interesting to have had the experience of entering and to help form a new regiment.

Very sincerely,
STANLEY E. TOMKINSON.
First Lieut. 99th CA (AA).
Camp Davis, N. C.

Dear Editor:

Every Sunday at noon I receive my copy of the G. E. WORKS NEWS. I am always glad to hear from Fort Wayne and the General Electric.

My three months training in Motor Mechanics, Class No. 16, is completed. These have been some of the best weeks in my life. They get right down to the bottom of everything down here. Every car and every part is covered completely. I can thank the government for the chance to learn what every car owner should know.

After October 7, I shall be back in Camp Shelby, Miss. We are leaving at noon tomorrow, so my address will be:

PVT. DARRELL E. KLINKER.
Service Co. 152d. Inf.,
38th Division, Camp Shelby, Miss.

G-E Club Dances Will Be Resumed

Announcement is made by the G-E Club Entertainment Committee that the popular Saturday night dances will be resumed starting tomorrow evening, October 18. G-E Club members and friends are invited to attend the dances which are held in the Club gymnasium.

Six Appointments In Manufacturing Divisions Announced

New appointees are, top row, left to right: C. W. Hale, N. G. Prince and Sam E. Baumgartner. Bottom row, left to right: George Spittler, I. W. Butler and J. S. Teeple.

The appointment of six employees to foremanships and general foremanships is announced this week. R. M. Hartigan, superintendent of the Motor-Generator Division, announces the appointments of N. G. Prince, I. W. Butler and C. W. Hale to general foremanships—Mr. Hale will serve on the second shift—and S. E. Baumgartner to foremanship on the second shift. E. W. Lankenau, superintendent of the Decatur Works, announces the appointment of Jack Teeple as foreman of all third shift operations at the Decatur Works, and C. A. Brenner, superintendent of the Tool Division, announces the appointment of George Spittler, as foreman of the second shift.

Mr. Spittler has had a considerable amount of experience in the manufacture of tools, having been engaged in special machine work in several outside concerns before joining the General Electric organization twenty-one years ago. His entire period of service with the Company has been in the Tool Division where he served as one of the leading die and mold makers. He has been a leading operator on the second shift for the past several years and has been very active in the training program for new employees in the Tool Division.

Mr. Hale started his service in 1917 when he enrolled in the Apprentice School. He graduated in 1922 as a machinist tool-maker and in 1926 was assigned to the planning department of the Motor-Generator Division. He continued on various assignments in this department up to the time of his present appointment. Mr. Prince became an employee in March, 1907, and was assigned to work in the armature department in Bldg. 8-2. He continued in AC and DC armature winding until 1920 when he was made assistant foreman. He was made a foreman in 1923 and assistant general foreman in Bldg. 19-2 in 1939.

Mr. Butler was first employed at the former G. E. plant at Madison, Wis., in 1904. He served an apprenticeship at the Madison plant and in January 1916 was transferred to Fort Wayne. His special training includes one year at Armour Institute, Chicago. Prior to his present appointment Mr. Butler served as assistant foreman, foreman and assistant general foreman.

Mr. Baumgartner joined the General Electric organization in 1915 and was assigned to the insulation department in 1915. Since that time he has served in various capacities including that of stock clerk, machine operator and automatic machine set-up man.

Mr. Teeple began his service in 1924 as an automatic screw machine operator and served in this department in various capacities until 1939 when he was promoted to set-up man. In 1940 he was made leading operator of the group and continued in this capacity up to the time of his present appointment.

$3,000 For Suggestions

(Continued from Page 1)

stitute changes in the method of cleaning enameling pulleys. He also received an award of $20.00 on a second idea during the same period. Awards of $40.00 each were made to Stanley Emery, Bldg. 26-3, for his suggestion for changes to insulation on certain capacitors and to Virgil B. Buchanan, Bldg. 26-3, for his suggestion to changes to spiral tubes.

One award of $30.00 is shown on the list. The award went to Henrietta F. Deck, Bldg. 19-5, who suggested winding REI on machines with leads.

Six employees registered ideas through the suggestion system which netted them awards of $25.00 each. They are Edgar P. Ort, Bldg. 19-4, who suggested omitting certain grinding operations; Martin L. Carl, Bldg. 8-1, who suggested installing partitions in wire enameling ovens; G. L. Santon, Bldg. 19-1, who suggested changes in testing certain alternator exciter sets; Wilber B. Smith, Bldg. 26-1, who suggested converting an idle tank to a baking tank; William Wollman, Bldg. 19-5, whose suggestion was for reconditioning screw machine clutches; and Fred J. Vachon, Bldg. 27, who suggested changes to rotor dies.

Awards of $20.00, numbering eight, were made as follows; Sam Sroufe, Bldg. 4-1, for improvements in cast aluminum fan blades; Lazern Hopkins, Bldg. 12-B, who suggested use of roll material for certain insulation washers; Emmit C. Ort, Bldg. 8-1, improvements at wire enamel machines; Paul A. Studebaker, Bldg. 26-2, for re-arrange-

(Continued on Page 5)

Leaders In Latest Suggestion Award List

Their Registered Ideas Brought Cash Returns

More than $3,000 was distributed to employees for suggestions during the past few weeks. Leading suggestors and the amount of their awards are as follows: Page 4, top row, left to right, Wilber M. Smith, Bldg. 26-1, $25.00; Joseph J. Koble, Bldg. 26-1, $75.00, and Stanley Emery, Bldg. 26-3, $40.00. Second row, left to right, Dean Smith, Bldg. 26-2, $50.00; Emmit C. Ort, Bldg. 8-1, $45.00, and Fred J. Vachon, Bldg. 27, $25.00. Bottom row, left to right, Henrietta F. Deck, Bldg. 19-5, $30.00; Edgar P. Ort, Bldg. 19-4, $25.00, and Eldon Braden, Bldg. 26-3, $70.00.

Above, left to right, William Wollman, Bldg. 19-5, $25.00; M. R. Payne, Bldg. 19-4, $100.00, and Martin L. Carl, Bldg. 8-1, $25.00. Below, Virgil B. Buchanan, Bldg. 26-3, $40.00.

$3,000 For Suggestions

(Continued from Page 3)

ments in Bldg. 26-2. William Rohe, Bldg. 8-1, for an idea to overcome rough enamel wire; George R. Doll, Bldg. 12-B, for a method of cutting soldering wedges; Harvey M. Owen, Bldg. 19-1, for a suggestion in connection with the use of a stroboscope to check speeds at test, and Norman A. Bender, Bldg. 17-1, for a suggestion to purchase certain rubber parts from an outside vendor.

A $23.00 award was made to D. Travis, Bldg. 26-B, for substituting grades of paper in preference to that already in use.

Other awards ranging from $5.00 to $17.00 were made as follows:

Glenn L. Carney, Bldg. 19-5; Rachael O. Luellen, Bldg. 19-1; Annette Thomas, Bldg. 27-1; Dewey Parkinson, Bldg. 17-1; Nine Andress, Bldg. 4-6; James W. Fleming, Bldg. 12-1; Lela Siebert, Bldg. 4-4; Valeria Harber, Bldg. 12-3; Robert W. Pion, Bldg. 12-1; Carl R. Tuerschman, Bldg. 12-1; Kathryn A. Gallmeier, Bldg. 4-4; Henry Muller, Bldg. 26-1; T. J. Kitchen, Bldg. 4-4; C. Noland Myers, Bldg. 27; Maxine Arter, Bldg. 26-3; James McCray, Bldg. 26-1; Edward J. Cade, Bldg. 19-4; Gifford Blain, Bldg. 26-B; E. Robin, Bldg. 19-5; Virgil H. Foland, Bldg. 4-4; Herbert C. Kruckeberg, Bldg. 22; Doyle D. Miller, Bldg. 26-1; Hilda Barthold, Bldg. 19-5; Robert L. Haslup, Bldg. 19-4; Earl L. Lash, Bldg. 6-B; Kenneth Erne, Bldg. 26-3; Walter V. Wohlford, Bldg. 19-4; Hilda A. Scott, Bldg. 4-4; Pearl Everly, Bldg. 19-4; L. H. Pequignot, Bldg. 26-2; Beeman Howard, Bldg. 26-1; Ford D. Burnau, Bldg. 27-1; B. Herrman, Bldg. 6-B; E. N. Thome, Bldg. 27; D. A. Winter, Bldg. 19-4; Robert F. Dressel, Bldg. 20-1; Clair A. Wiebke, Bldg. 26-B; George W. Pattee, Bldg. 12-1; Gerald O. Allgeier, Bldg. 26-B; Frances Fitch, Bldg. 19-5; Edmund A. Klausing, Bldg. 4-4; Carl G. Schultz, Bldg. 4-4; Donald H. Shoner, Bldg. 17-4; Robert E. Gruber, Bldg. 6-B.

Howard C. McVay, Bldg. 4-5; Cleon O. Oyer, Bldg. 4-5; Russell F. Berkheiser, Bldg. 17-4; Homer F. Wearley, Bldg. 26-2; H. Cochran, Decatur; Reinhold Frede, Bldg. 4-1; Clement B. Meyer, Decatur; P. Schemehorn, Bldg. 4-5; Wilbur Witmer, Bldg. 4-1; E. E. LaVine, Bldg. 4-4; Ralph Dunfee, Bldg. 26-2; Annabelle Blair, Bldg. 26-3; Clarence Drake, Decatur; Jack C. Dobson, Bldg. 4-3; Richard C. Ehrman, Bldg. 26-2; Marie Wickelman, Bldg. 4-4; Darrel M. Daniels, Bldg. 4-4; August W. Zollinger, Bldg. 4-4; Ralph Hursh, Bldg. 4-1; Joseph J. Cochoit, Bldg. 4-3; Anna E. Griebel, Bldg. 4-3; Joseph W. Steenman, Bldg. 4-1; Lewis G. Gessinger, Bldg. 4-4; J. H. Plescher, Bldg. 26-B; James A. Johnson, Bldg. 4-1; Gertrude Hose, Bldg. 4-5; Laverne V. Amstutz, Bldg. 4-4; Augusta Fuller, Bldg. 4-3; Ervin C. Huth, Bldg. 20-2; Virgil H. Royer, Bldg. 4-1; Ira W. Shaffer, Bldg. 17-2; Violet E. Ray, Bldg. 17-2.

Charles J. Ueber, Bldg. 26-5; Raymond Brown, Bldg. 4-2; Howard G. Welch, Bldg. 26-B; Walter MacGinnitie, Bldg. 10-1; William C. Jefferies, Bldg. 26-5; Louis C. »» NEWS THROUGH THE PLANTS ««

My Cousin Colin is an important branch in the grapevine I use to get my dope for this column. I was over to his house the other night tae check up on some free information he had picked up.

"Sandy," he lamented, "Do ye ken my Doctor is daft? He told me tae take this medicine upon retiring."

"Weel, what's the motter wi' that?"

"Hoot Mon, I dinna oxpect tae retire for 20 years yet!"

"Ye ken what he means, Colin. Take it tonight. It's to improve yer system."

"Yus, but me system is all richt. I win races by it right along."

"Now, Colin," I said, "Forget yourself, and other insignificant things for awhile. What do ye hear on the grapevine?"

"Weel, now, all I keep tuning in is Cost Reduction Budget, Cost Reduction Budget, Cost Reduction Budget—all the time."

"But I wrote about that two weeks ago, remember? I said instead o' calling it a Budget, it oughtta be called a Bogey, and the man who makes it should be called the bogey man."

"Right ye are gude cousin, but ye just said that there is one. How about meeting it, etc., etc.?"

"Weel, as far as I know, we are. Suggestions help a lot. Foremen, planners, engineers, and others work at it. In the offices they have meetings about it. Everybody should be thinking about it all the time and doing something to reduce costs.

"Cost Reduction isn't a side line that we are supposed tae do when we haven't anything else tae keep us busy. It's a part o' everyone's job, all the time, and today, we are even trying tae save material so as tae keep a job for ourselves.

"Cost reduction isn't making poorer quality goods, or cutting our pay. It's making MORE goods for MORE people, so MORE o' us can make them."

"Hoot Mon, Sandy, that's gude stuff, but de ye oxpect onnybody tae read it?"

"Sure, me lad, unless they are Scotch, and dinna need to."

"Weel, Cousin," said Colin, "In my Latin class I learned that all Gaul is divided into three parts, and now I believe ye hai at least two o' them."

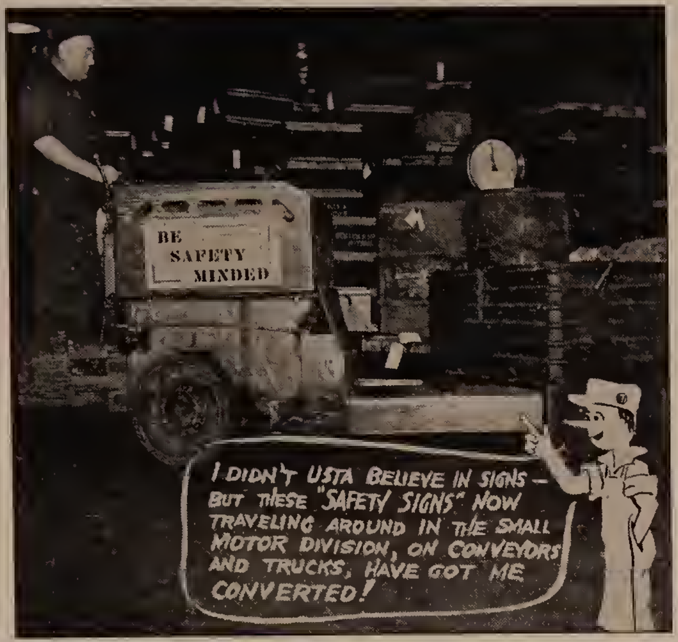
19-5 Office Chatter

Evelyn "Pink" Parkerson, Bldg. 19-5, had quite a time at a recent book review. Just a nail polish slip. . . . Never let it be said that the Bldg. 19-5 office gang missed any of the Palace review last week. . . . Phone calls do last, but they put Novelle in good spirits for a blue Monday. . . . Elizabeth Genther reports fair weather in Kentucky over the week-end. . . . Please, people, don't do that again to Alma Witte—paging her in a book review—outcome: slight heart-attack.

Margaret Simon, Bldg. 19-5, returned to work after two weeks' vacation spent at the Smoky Mountains and Louisville, Ky.

She's only a dentist's daughter, but she runs around with the worst set in town.

"And Now They Can Talk"



BE
SAFETY
MINDED
I DIDN'T USTA BELIEVE IN SIGNS — BUT THESE "SAFETY SIGNS" NOW TRAVELING AROUND IN THE SMALL MOTOR DIVISION, ON CONVEYORS AND TRUCKS, HAVE GOT ME CONVERTED!

"Conveyors and power trucks can be made to do almost everything but talk" is an expression you have no doubt heard. Well, this is no longer true in our Small Motor Division. F. C. Graffe, general secretary of the safety committee in this division, is making his conveyors and trucks carry safety messages to the thousands of employees in that division.

These safety messages are attached to the conveyors and trucks in Bldg. 6-B by Layton High and John Fulk. They pass through the various departments several times a day.

Ed. Lallak is shown in the above picture operating an industrial truck which carries a safety message of considerable importance to all of us.

H. L. SMITH, Safety Engineer.

19-4 Nibbins

Reporter Olympia Derlashan is on her vacation, and the girls at work are getting cards from Texas. . . . It has been reported that Edith Roller was seen down at Antwerp, Ohio, a few Sundays ago. She sure seemed to be enjoying herself. . . . Gordon Smith is back on the job again, after having a two-weeks vacation. Welcome home! . . . Leona, where is that new wrist watch? Not in the pawn shop, is it? Or did it fall off the other morning when you turned over three times in the car? . . . Margie Green, Bldg. 19-4, certainly had us fooled one morning last week when she walked in with what appeared to be a diamond but what proved to be department store merchandise. And we thought she was really beginning to get serious about this one. . . . Then Louise Sinn pops up and says that when she becomes engaged she wants a cow instead of a ring, because at least you can make a little money from a cow. Edna Braun then asked her how she could remember her boyfriend if she didn't have a ring. To which Louise replied that all she had to do is walk down to the barn and look at the cow. . . . Everyone would like to know what was in that precious package Bob Haslup was carrying around with him last week during the World's Series. . . . Reports come from Edythe Roller and Lorena Hahn that a certain person whose name appeared in this column last week is laying for me. Now all three of you can get together and dig in. . . . Congratulations to Jackie White for the swell job she is doing in taking over while Gordon Smith is on his vacation. . . . I will not be held responsible for anything appearing in this column the next two weeks. Signed, Nibby.

Decatur News

Dora Miller, well-known employee of the Decatur Works, died suddenly on Monday morning at 3:30 o'clock at her home. Her unexpected death was attributed to a heart attack. She had been in ill health for the past two years, but her condition was not considered serious. She had been employed by the General Electric for the past 23 years and the Decatur Works since the opening of the plant over 20 years ago. She was serving as a leading operator in the details and repair department, a position she had held for a number of years.

Mr. and Mrs. Edgar Kiess are the parents of twins, one boy and one girl, born October 9th.

Mr. and Mrs. Milton Hoffman of 415 South Fifth Street, Decatur, are the parents of a baby boy. Congratulations!

Two more Decatur employees were called to the colors by the Selective Service Act when Richard Hess and Robert Bowman left for Fort Benjamin Harrison. Where the men will be stationed if accepted has not yet been learned.

We hear that Jack Richards upon telling of the supposed speed of his Ford was presented with a certificate of membership from the Liar's Club granting him full rights in the organization.

The girls in the Telegraph Department had a dinner party for Kathleen Schafer, who planned to leave the department. They bought her a present and a pretty card and it was a wonderful party—a surprise party. But the surprise wasn't on Kathleen; no, it was on the Telegraph Department, because Kathleen decided not to leave. But they got rid of the present, and kept Kathleen, who had to pay for her own dinner. So everybody is happy!

Slips And Chips

Sir Viss, Bldg. 4-4

"East, West, North and South, but I don't know yet where I live" quoth William (Bill) Johnson. However, Bill says he lives east of the new road, west of the old road, north of another road and the sun rises in the south. The surprising part of this story is that Bill knows where he is at just as soon as he crosses the railroad. Bill, I suggest that you consult someone about your whereabouts, perhaps a geographer. Don't consult Dallas (Dave) Powers about it because he is the one who heard the church bells ringing and the whistles blowing at one o'clock a. m. on Sunday morning. But I just can't figure out what happened the day you saw two pheasants eat a peck of shelled corn. I know you said the farmer fed his chickens a peck of shelled corn and two pheasants came, frightened the chickens away, and ate all the corn. That is what I call being on time. . . . I was afraid some of us would be ill or severely shocked when I saw the window washers washing one of our windows. The only one who showed signs of collapse was George Hosek, and he already had colored glasses on to save his eyes from the abundance of light. . . . The strangest things happen up here occasionally, and like grapes, they come in bunches. The same week they washed our window, Don Otermet came to work and donned a new apron. Don apparently didn't have any trouble with his new purchase as did Bill Johnson. Bill purchased a new bed for his darling daughter. Bill proceeded to assemble it (the warehouse salesroom never have them assembled) but the screws refused to penetrate the wood and broke. After several attempts, Bill decided to drill the parts and use stove bolts. To anyone who reads this column and gets into a jam like Bill, just scratch the screws on a piece of beeswax or paraffin so a little wax will stick to the screw. You will find that they go in very nicely. Here I go casting out information you all know. If you miss your apron or tools, and you just can't seem to locate them, take a tip from me, look in Charley (Flash) Meyers' drawer. I found my hacksaw in it last week and my apron in it today.

26-5 Tool Bits

Henry Wittber, the boy who does things, and how! He is the proud possessor of a clear glass window and ten times each day he wipes and cleans the dirt away. When it rains, he washes it, and now he is working on an idea to install an electric wiper, "super deluxe." . . . Rufus Niblic has all the ladies (walking down Broadway) agog with admiration for his original, new styling of wearing his trousers tucked into the top of his prominently white sox. . . . Walter Elliot had planned on a shower installed in his basement but upon recent tests (via back-up water) decided it would make a better swimming pool. . . . Let's get this straight, boys. Ross Cohagen is not running a dude ranch. It's just one of his daughter's admirers all decked out, come to pay his respects. . . . Ed Steward and Barney Weber, Bldg. 26-5, each celebrated their birthdays on Tuesday, the 14th. Both are the same age, but all we could get out of 'em was that they were just past 21.

From The *Feminine Viewpoint*

Happy New Year! A new Elex year is just beginning you know. It got off to a good start at the banquet last week, the new officers have taken over the reins, conference comes up this week, so we're all set for a big year. By the way, you did join Elex didn't you? Even if you didn't sign up during the membership drive, it's never too late. Just speak to the contact girl on your floor.

Next to members a club, perhaps, needs ideas. Ideas for service, entertainment, parties, decoration, benefits of all kinds. If you have any ideas, even if they are still rather vague in your own mind, Conference is the place for them to be weighed in the balance. Even if they are found wanting, you may feel sure they were considered and discussed and not dismissed arbitrarily. It's lots of fun to attend Conference, but if that is impossible for you, why not jot down some idea that you have in mind, and turn it over to someone who is going to Conference.

There is an old proverb which states that to find the wealth of the Indies, one must carry the wealth of the Indies with him, which is just another way to saying that we get out of anything pretty much what we put into it. So if we occasionally hear someone complain that she didn't get much out of Elex, we feel quite sure that she didn't put much time, thought, or effort into working with and for Elex.

This is a critical period in our national life, and who can say for what services we may be called upon. But whatever the duty or sacrifices we can feel sure of one thing, Elex can be depended upon to come through, but remember too that this is possible only if each individual member, whether she is officer, contact girl, or if she has not office nor title, puts her shoulder to the wheel and helps to the best of her ability.

Thisa And Thata 19-5

It seems that Avinell Gailey is living in a topsy-turvy world. When she was hanging the new drapes she made, she found out that in one panel the flowers were growing upside down. Need we say that she was a little more than upset? . . . Is a person clumsy and awkward or does he lose his sense of equilibrium when falling down the steps? Whatever happens, Mildred Werling had a beautiful lace stocking and a black and blue knee to show for her fall. . . . As you know, we had a lot of rain last week and Eloise Rogers decided that she had gone long enough without that raincoat she wanted, so she went down and bought one, and since it was still raining, decided to wear it home and the store was going to send her coat out in the morning. When Eloise got to work the next morning, she discovered her badge was on her coat. After so long a time she got to work!

Everyone has a hobby and it seems like Roy Mentzer's (Bldg 17-2) hobby is collecting bottle caps, or could it be that he picked up the wrong package. They were nice and fresh after being in the refrigerator all night.

NEWS THROUGH THE PLANTS

Borings From 4-4 Office

Not too much gossip this week to pass on to the readers of this column. Too many people acting like they should to suit me. . . . Mike O'Grady has come to the conclusion that he will never bet with Mel Warner. Not only did he lose all bets on the World Series, but he also loses on the weather on a perfect day. Not a cloud in the sky, Warner bets O'Grady that it will rain. And by gosh it did. How did Warner know? Well, according to Warner, every time it is going to rain, Warner's wife's corns start to ache. O'Grady is going to rebel 'cause his wife has no corns and can be no prophet for the weather. . . . Doris Roe is disgusted with her new nephew, since she's aunt, that he can't walk as yet. Well, Doris, give him time, you see the poor little fellow is just a couple of weeks old. . . . Nathan Porter is back from the Ozarks. He really had a time. He sent me a card from Lover's Leap. Some place, I'd say. Also, I understand that Nate is going to have a wiener bake at his suburban home. Well, Nate, I'll be there with my best girl. . . . I can't understand why all these girls around the office have to spoil their beauty with scarfs around their heads. . . . Cliff Bowman is at last harvesting his crop of gourds. He is now taking orders for them. The only thing they are too small. According to the seed he bought, they were all going to be a yard long, which just goes to show you that you can't believe anything you read. Gee, what do you do with 'em, eat 'em? Cliff gave me one—I'm just a wondering. . . . Did I ever tell you the last time it rained that our cellar flooded? We are using it as a community pool and recreation center. Swell place for speed boats, too. . . . Vernon Daseler is home sick this week. We all hope he recovers soon so we can all get our work done. Well, am running out of ideas, so best I close. I remain, sincerely as ever,

Elmer, the field mouse,
The Rat to you.

Raccoon Hunter Of 4-2

Last week Glen Lewis, Bldg. 4-2, was driving toward Fort Wayne about 4:30 a. m. when something jumped in front of his car. He stopped to investigate and discovered it was a raccoon. He picked it up, thinking it was dead, and threw it in the trunk. Upon arriving home, he lifted up the trunk lid and discovered that the raccoon was very much alive. It took him quite a while to get enough courage to drive down to the Humane Society and have Wilfred Goss take the animal out of his car.

Irene Was "Way Up In The Clouds"

TWA
TRANSCONTINENTAL

An unusual honor was accorded Irene Meyers, Bldg. 21, last week when she was named a delegate to the convention of the exclusive Pilot Club. Irene added to her list of "experiences" a plane trip to Davenport, Ia., where the meeting was held. Irene says "everything was swell until fine weather induced the pilot to fly near the 'pearly gates', and then did my stomach protest."

A Tale Of Woe From 4-2

Well, folks, it seems that Ray Smith's wife finally induced Ray into buying a new stoker for the old boiler. BUT here is how Ray had it figured out he would pay for it. He had a bright idea that he would throw a poker party for some of the boys, and by hiding some extra aces in his trouser cuffs and shirt sleeves pay for the stoker. Well, in due time, the stoker was installed and Ray thought it was time to have the party (after he was billed two or three times) and the boys came in force (Ray had the aces all over the place). Well, the play went on and on and the farther it went the longer Ray's face became. It seemed the other fellows had aces too, all legal. Well, the game lasted until 7:30 the next morning and Ray was way down in the dumps, and also in cash. It was learned later that Ray tried to talk his wife into removing the stoker. He promised her a brand new scoop shovel for Xmas, too, but it wouldn't work with her. She said she had worn out three already and that's enough for her.

George Ely, Bldg. 20, reports there is nothing to fishing when his five-year-old son can go out and catch a twelve-inch bass. (And this is no fish story.)

Two new diamond rings came to work Monday morning. The happy wearers are Barbara Eikenberry, Bldg. 18-3, and Mary Wilson, Bldg. 16-3.

Is Zat So?

The gang in Bldg. 7-1 was anxiously looking forward to Clyde Crabill's return to work after his recent fishing trip. We have not as yet been able to find out what happened to all those fish he promised us but it is rumored that Clyde decided to eat his bait! . . . We wonder if Donald Redding ever wears that "Captains" cap when he drives his Buick. My! My! Donald, people might think you're just the chauffeur instead of the owner of that car! . . . Harry Kessler is undecided whether he can make more profit by taking in washings or by selling cotton candy since he got that new grinding compound. . . . Joe Eifrid surprised us the other day when he returned from the candy wagon with both arms full. We thought "good ole Joe" was gonna treat but the surprise came when Joe ate it all himself! . . . Our Bill Fisher was presented a very substantial suggestion award, consequently the WORKS NEWS photographer came to take Bill's picture, but "believe it or not" Bill declined. Whoever would guess that modesty and Bill Fisher were synonymous? Congratulations, Bill, we are very proud of you! . . . Dorothy Buhr couldn't understand what was holding her back from the candy wagon the other day. Was she surprised when she found that her dress was caught in the office door? . . . Have you seen that snapshot of Al Middaugh chasing butterflies? If not you are missing a rare treat which none of our gang should miss! Ask Al for particulars! . . . We are glad that Dale Goeltzenleuchter has recovered from his recent injury and has returned to work. Welcome back to the gang in Bldg. 17-1, Dale.

That's all for now, see you next week.

The Question Mark.

Josephine Callison, Bldg. 4-3, is bemoaning the fact that her new hat with a beautiful feather on it is ruined. She made a special trip to town to obtain said hat. Returning home, she removed it from its container and laid it admiringly upon the table. Now it seems that Josephine has one tough hombre of a dog at home who happened to come in at this juncture, lamping the hat with its gorgeous feather. He leaped upon the table, grabbed it, and began to disassemble it, much to the dismay of Josephine. Perhaps this pooch is also imbued with the same idea most men have regarding milady's present day headgear.

Marriages

Mae Rose Slagle, Bldg. 19-5, married James Tannehill, Bldg. 20-2, Saturday, October 11. Congratulations.

Sleuthing In 4-6

Did you notice Dwight Willits strutting around? He has just announced the arrival of a 7½ pound baby daughter on October 9th. Congratulations, Dwight! . . . Ralph Guenther would like to suggest that classes be started on "How to tell time." One day last week he came to work an hour ahead of time—maybe because nobody told him that Daylight Savings ended September 27th. . . . What has the floor got that chairs haven't? For further details ask Helen Frost. . . . Another new disease has come to the surface. Apparently Charles Gable is afflicted with "Zipper-itis." At any rate, zippers seem to have an irresistible appeal for him. Since this disease might prove fatal, maybe it is just as well that before long zippers will no longer be available. . . . What caused the change in Gerry Grim this week? Oh, yes, I know. Harry is back again. . . . If anyone has a taste for gingerbread, see Mary Rogers. I understand she is an expert in baking it. . . . We are all sorry to hear that Howard Reinking is in the hospital as the result of an appendectomy. We all wish you a speedy recovery, Howard. . . . The beauty salons in the city are getting a work-out. No less than five girls are displaying new and different coiffures.

6-B Cellar

We are very glad to have Mary Ogg back with us and with a new name, too. You will now hear us refer to her as Mary Drew. Well, good luck, Mary, and we wish you a lot of happiness. . . . We thought sure Wilma Cress was hunting for gold the other day or else giving a good imitation of a hunting dog. But we found out later she was only hunting for a pair of scissors which someone borrowed and never returned. . . . We all want to know why Luella Archbold bought that new rain coat. She never wears it when it rains; not even when the sun shines. Maybe she is saving it for old age. Who knows? . . . The girls of Bldg. 6-B held a wiener bake in honor of Laura Hoeflich and a good time was enjoyed by all—we hope! The rain tried to stop it but they just fooled the weather by having it over the old cook stove. . . . Any one hitch-hiking don't expect Wilma Cress or Mary Margaret Voors to pick you up, as they only wish to pick up handsome soldiers. But they do get fooled sometimes.

The girls in Bldg. 4-3 would like to see the cartoon Erma Linder, Bldg. 4-3, received last Monday morning. It wouldn't have anything to do with hearts and trees, would it Erma?

Anniversary

Egad! I did not wish it so! Truer words were never spoken, for when one year ago, while under an evil aspect in my horoscope, or obeying that impulse we are told to obey, I wrote an article for the Works News, little realizing it would go thus far. Yes, Chum(p)s, for one year, now passed, "Old Poison Pen" has cluttered the pages of our News with a varied assortment of more or less odoriferous attempts at writing. I hesitated to announce this anniversary before, fearing my many "admirers" might shower me with gifts, and, being a modest person, I waited until it had passed in order that there be no occasion for such a demonstration. However, in all sincerity, I do want to thank all who have contributed items of news. You have been good sports, taken my razzing and, in many cases, returned it with interest. There have been no hard feelings on your part or mine. We have had a lot of fun and stimulated some lively interest. However, I still feel that when I made my literary debut, I completely lost sight of that old proverb: "Fools rush in where angels fear to tread."

Egad! I did not wish it so!

Practice Makes Perfect

After shooting a healthy 410 Monday night, B. Bushong decided he needed some practice. As a sub in Apparatus League on Thursday night, he started with 158, then shot 245-243 for a handsome 646. More practice, Bush!

One of Those Days

Last Friday was another one of those days in the life of Everett Keese. To start the day, he forgot his button and made a flying trip home to obtain his pass to the Works. A little later he forgot "Pappy" Archbold (how could anyone forget him?) It happened like this. Everett met "Pappy" later in the morning and asked him if he wanted a ride home. "Sure," said "Pappy", "I'll wait at the gate for you". Came noon, "Pappy" rushed to the gate and waited; minutes sped away—and no Everett. Finally, after waiting most of the noon hour, "Pappy" took a street car home. That afternoon our two heroes met again. Their conversation was as follows:

"Pappy": What did you do this noon?

Everett: Went home. What did you do?

"Pappy": Waited for you!

Everett: Dog-gone! I forgot all about that.

Yup-yup-yup, just one of those days!

Can't Scare Me

Someone asked me, "Are you going to write anymore after that attack in last week's Works News"? While this "gem" lacked the foundation of truth, it was intended merely to razz me in the spirit of fun, and was so interpreted by me. If you are familiar with Greek mythology, you doubtless remember the "Three Gorgons", who were the bad girls of their day. When their three modern masculine counterparts, B. Fisher, W. Histed and F. Archbold, get their heads together, anything can happen; even I, on occasion, dread the outcome of their "pep" sessions. However, I refuse to be intimidated and will continue to bring truth to you by the printed word. THEY CAN'T SCARE ME!

Notice

Anyone who, on occasion, takes a "wee nip" is warned to keep away from Edna Volt's desk. It seems the young lady has a good luck "pink elephant" on her desk and, to date, seven of the boys, seeing this critter, decided things had gone far enough and signed "the pledge". So—be careful; don't believe all you see!

Saying of the Week

Jerry Frye remarks, "It takes 21 years to make a man of a boy, but some gal can make a monkey of him in five minutes!"

What is it that waddles like a duck and puffs like a steam engine? Answer: Bill Bright.

E. J. Gallmeyer has stopped collecting ice cream wrappers since his kid blew up part of the house with the chemistry set obtained by sending in 50,000 wrappers.

Dan Geary put pontoons on his trailer to get it out of the Bear Lake swamp. If it hadn't been for the pontoons Dan would not have been able to come to the big city.

26-3 Tidbits

At this time we wish to report that Ella Lawson has fully recovered from her ivy poisoning, with which she has been suffering since that hay ride. . . . What's this we hear about Don Poland's shoes walking back from Lake James by themselves. . . . Boy, doesn't Betty Clark look pretty with her new hair do? Tell us where you get it fixed, Betty. . . . Watch your step, June Craine. Patches aren't very becoming. . . . Gee! We hate to lose Molly Underwood to the first shift, but we wish her luck all the same. Don't we girls? . . . Huey Barr sure spends a lot of time around G bench. What's the attraction? . . . Eva Thomas sure gets around. Especially with that great big westerner we saw her with Sunday night. . . . Too bad about your leg, Kenny Erne. Right in football season, too, my! my! . . . It has been said Alma Alt has been seen at Bell's rink several times. You had better watch out or they will be charging you rent, Alma. . . . Never knew we had a poetess in our crowd.

"A Note of Appreciation."

I wish to thank each one of those
Who yesterday came to the aid of my nose,
Especially Anne, with the biggest roll
Of Special Deluxe—bless her soul.

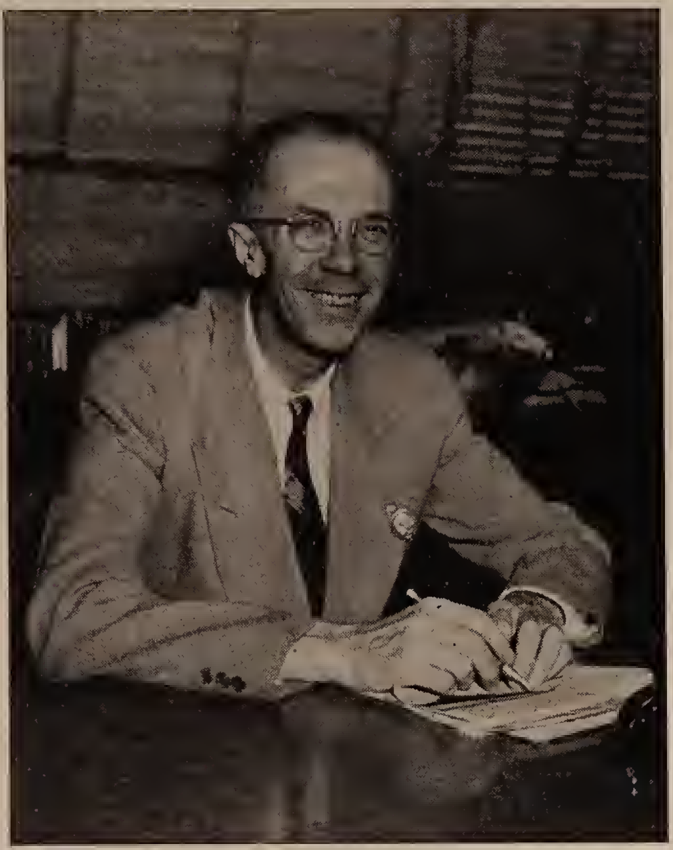
—Dorothy Marvin.

A recent bride's troubles begin. What and who? Well, Dawn Van Buskirk Hanson and her hubby have no way of going since their accident which happened Sunday and just about finished the V-8. Luck was on their side, as no one was hurt. . . . We wouldn't mind having birthdays if we could all receive as many beautiful gifts as Martha Putt did. Anyhow many more happy birthdays in years to come.

Waneta Chester, Bldg. 4-1, came in Monday morning with a new hair do.

Marjorie Doty, Bldg. 4-3, gave the gang a real treat when she went down the aisle the other day wearing a great big smile.

Quarter Century Club Member



S. C. Newlin, Bldg. 4-5, is the latest Fort Wayne Works employee to be enrolled in the ranks of the Quarter Century Club.

Gossip From 19-5

We wonder why Lorinda Beyerlein has that funny grin on her face? Could it be Florida? What has Florida got that Fort Wayne hasn't? . . . Kathryn Hepker has just gotten a new permanent wave for her vacation in Florida. Is it a round-trip ticket, Kathryn? . . . Ina Archbold says her chickens are laying red eggs now. Ina, delivering eggs the other night, sold her customer a sack of nice red apples for eggs. Ina was surprised when her customer told her she didn't know her chickens were laying red eggs. . . . Why is Violet Monroe all smiles these days? . . . Where did Henrietta Deck get that funny red mustache she was sporting around last week? From the way she looked, she would make a nice villain in a show. . . . We advise Louise Boehm to wear a suit of armour when she goes riding on her bicycle. Louise has been knocked off her bicycle twice so far; perhaps she'd better carry it. . . . Where was that new raincoat LaVon Ely said she bought? She must have it in moth balls, because when she came in to work the other noon, she looked as if she took a bath with her clothes on. LaVon, you sure looked drippy that day. . . . Rosemary thinks it's swell to get in the Works News twice in one month. You never used to be so funny, either. . . . Alice Freiburger and Roy Gordon were married October 4, at Yoder, Indiana. The young couple are now at home at Payne, Ohio.

Billy Stiver, Bldg. 4-2, has returned to work after a siege of the flu. We are glad to have her back with us.

Edna Crowe, Bldg. 4-3, really does things up in good shape when she forgets her badge. All she does is go home, have a cup of coffee again, and start out all over.

Sunbeams From 17-4

Edith Venrick sure takes her bingo seriously, she even trys to play all her neighbor's cards in addition to her own.

Dorothy Dix had better look to her laurels, for Nick Abbott is trying to steal her stuff, he is handing out advice to the love-lorn by the page.

From now on Cletus Lothaner is off women, so he says, but as soon as the girl friend smiles at him again the sad look will be gone, and we will all be happy again.

Talk about being happy, the sunshine has gone out of the lathe section since Ralph Dunlap has taken his happy laugh and gone to the hospital for appendicitis, we all wish for his speedy return.

Thought for the week: Nothing is really work unless you would rather be doing something else.

Granny.

Viola Moore, Bldg. 4-1, is all smiles. She received an engagement ring from the boy friend. Good luck, Viola.

R. Frede, Bldg. 4-1, thought his garage looked different one night when he drove in the drive and he made an improvised plumb of a string and piece of brick. The wind had blown the roof about two inches to one side.

Frank Lawrence, Bldg. 4-1, loads and unloads his outboard motor and fishing tackle several times over the week-end. He does this to keep in practice. Some day he is going fishing if he can get some bait, Eh, Frank.

George England, Bldg. 4-3, reports that the new arrival will be called Paul Eugene Caboose England as he is already a train man.

We have noticed lately that Ervin Blackburn, Bldg. 4-2, has been coming to work almost every day with a good looking girl.

M.B.A. PATIENTS

Transformer — Robert Bunyan, 1218 Wall St.; Virgil Lombard, 216 W. Superior St.; Joseph Ternet, 3333 Winter St.; Herbert Peppler, 3612 Leo Road; Betty Jacobs, 502 W. Berry St.; Lawrence Hilton, Bueter Road and New Haven Ave.; John Halcraft, 507 E. Jefferson St.; Dale Heersche, 424 W. Butler St.; Bette Gunther, 1415 W. Main St.; Richard Dawling, 454 Rose Lane; Glenn Baker, 2411 Euclid St.; Ann Bishop, 3104 Thompson Ave.; Delores Byroadle, 1902 Wayne Trace; Hazel Schulien, 2928 Broadway Ave.; James Cheney, R. R. 1 Roanoke, Ind.

General Purpose Motor—Mabel McClain, 1345 Taylor St.; Alma Geary, 1524 Sherman St.; Donald Walters, 2334 Weisser Park Ave.

Plastics—Rosella Swift, 3007 S. Wayne St.

Refrigeration—John Norris, Roanoke, Ind.

General Service—Harriet Dewart, 636 Russell St.

Office—Mary Habig, St. Joseph Hospital.

Returned to Work—Ann Fisher, Lucille Baker, Fred Sebring, Flossie Schmidt, Marine Pearson, Helen Marten, Walter Busick, Erma Harrison, Barton Turley, Leonard Hutson, Jack Kirlin, Charles Mills, Fred Dunlap, Gerard Allgeier, Mary Baumgartner, Dallas Dissler, Celia Krebs, Helen Ries, John Roesener, Russel Sealover, Bernita Witsaman, Frank Allen Margaret Brickel, Martha Schrader, Lucille Crum, Robert Frederick, Richard Bucher, Robert Armstrong, Betty Roesner, Walter Hetrich, Ruth Malay, Darrell Botts, Erma Bradford, Louise Walker, Dorothy Sales, Al Phillips, Hazel Greider, Herman Hilker, Frank Shidler, Elmer Warner, Robert Born, Mary Ogg, Oliver Sundsmo, Richard Gater, Dalphus Kaylor, Wm. Closson, Minnie McCaque, Petra McCollister, Thomas Hurley, Jeanie Hall, Edna Hergenrader, Miriam Bireley, H. Suelzer, John Roberts, Edwin Townsend, Fair Lee Walters, Harry Grem, Elmer Putt, Marion Denis, Jack Judge, L. Frank Voirol, George Blume, Geraldine Albert, Claude Jefferies, John Hall.

Left the Hospital—Carl Hower, Lola McCaque, Wallace McKay, Paul Schemeyer, Harold Richardson, Edna Hill, Julia Hilger, Aileen Steinbarger.

Everyone is wondering how Florence Shaeffer, Bldg. 4-3, is getting along with the two babies she was so proudly displaying at Bluffton several weeks ago.

Alma Kurtz, Bldg. 4-3, surely had her troubles when they had to set the clocks back. Alma changed hers Saturday to be sure of the time, as she was having guests for dinner on Sunday. Dinner was ready on time as Alma had set the clock ahead instead of back. Hope the company did not have to eat a cold dinner.

The Small Lot Section, Bldg. 4-3, had an awful disappointment when Ella Black, Bldg. 4-3, was on her vacation, as they thought Viola Grover would be the coffeemaker for the girls during Ella's absence. They have always heard Viola's husband rave about her wonderful coffee. As Bill always says. "Good till the last drop."

Walter Hazelett, Bldg. 4-1, is a confirmed bachelor but one day this week he had a piece of cake in his lunch bucket. It looked like wedding cake. Did you sleep on that cake all night Walter?

Lightning Investigator Ends A Five-Month Vigil With No Luck

Ingolf B. Johnson, believed to be the world's only full-time lightning photographer, has called it a season and sadly packed his variety of unusual cameras and scientific instruments after five months of living like a fireman without a fire to put out.

As far as Mr. Johnson, youthful General Electric research engineer, was concerned, the most striking thing of the summer of 1941 was the irony of it all.

Every season since 1935 the G-E "lightning laboratory" in Pittsfield, Mass., has sent an engineer down to Manhattan to take pictures of lightning strokes to the Empire State Building — probably the world's finest fixed target for lightning. Because of its structural steel frame, the skyscraper carries lightning strokes harmlessly into the ground. In the tower mast, General Electric has oscillographs, which record the intensity of each stroke. Eight blocks north, on the 39th floor of 500 Fifth Avenue, are three intricate cameras pointed at the tower to make pictures correlated with the scientific readings.

Johnson got no photographs at all, although the Empire State Building was struck six times during the summer. Two of the strokes were of a more or less freak variety —single strokes when there was no general thunderstorm. One occurred at high noon, and photographs must be taken in the dark.

Most ironical of all is the fact that the other three strokes happened on Friday, May 9, which was the day Johnson arrived from Pittsfield, and he was busy setting up his cameras and instruments.

There were some dozen nights during the summer when Johnson slept on the floor of his office because weather reports indicated there might be a storm.

The most rip-snorting storm of the entire summer was the evening of August 26, when a downpour flooded some of New York's subways and lightning strokes crackled and ripped in every direction. But most of them, Johnson explained, were strokes from one cloud to another, and few from a cloud to the earth. One prodigious stroke was to a flag pole atop the R.C.A. Building.

In addition to the oscillographs, which record several characteristics of lightning on the Empire State Building, G. E. has a simpler device, called a magnetic link, on its own building at 51st Street and Lexington Avenue, and on the R.C.A. Building. The magnetic link consists of a small strip of steel, about an inch long, inside an insulating tube. When a lightning stroke passes through the link, its intensity may be measured later in the laboratory by measuring the degree of magnetism caused by the lightning and calibrating this with known measurements made with artificial lightning in the laboratory.

Johnson spent the summer at a hotel where he was near his instruments in the Empire State Building. Two of his bitterest experiences were the night of July 8 when a single thunderclap at 4:30 a.m. sent him tumbling out of bed to rush to work, only to find there was no general storm, and a similar stroke at 6:13 a.m. on September 11. He did obtain an oscillogram, but no photographs.

The best year since General Electric started the studies under the direction of Dr. Karl B. McEachron was 1937, when 41 strokes to the Empire State Building were recorded. Last year there were 20 strokes, and usually there have been that many or more.

Johnson is a native of Brooklyn, and the son of Mr. and Mrs. John Johnson, of Merrick, L. I. He was graduated from Brooklyn Polytechnic Institute in 1937, and during the following two years he directed the high-voltage research laboratory there, before going to the G-E laboratory in Pittsfield, known in scientific circles as the home of high-voltage research.

His companion and part-time assistant on many fruitless night-long vigils this summer was Anthony B. Giordano, a former classmate and now an instructor at Brooklyn Poly.

"House Of Magic"

(Continued from Page 1)

of the four "House of Magic" shows which are touring the country. And he is happy at his work, for he combines his school knowledge with that of magic.

It was the late Floyd Gibbons, noted author, lecturer and foreign correspondent, who discovered a world of wonders in the General Electric Research Laboratory and called it the "House of Magic." Thousands of persons have visited this "House of Magic" in Schenectady, and many more thousands see it in the science show which is made up of the more startling discoveries of the scientists in the laboratory.

The name "House of Magic" was first applied to the science show at Chicago's Century of Progress. It proved to be one of the outstanding features of that exposition and since then has entertained more than 10,000,000 persons. At the recent New York Fair alone, more than 3,000,000 persons saw this show.

Keeping pace with the new developments of the G-E Research Laboratory, the science show offers new wonders every year. No more striking means could be found to tell the story of how industrial research is continually widening the horizons of American life. Many of today's everyday conveniences, such as radio, would have seemed nothing short of a magician's dream when the "House of Magic" Research Laboratory was established in 1900. Similarly, the current wonders of the "House of Magic" offer a hint of what new feats of "magic" may become part of tomorrow's standard of living.

ACCIDENTS DON'T "HAPPEN" they're CAUSED
—AND I CAUSE MOST OF 'EM!
CARELESSNESS

Distribute Booklet

A booklet "Food For Fitness" issued by the Metropolitan Life Insurance Company will be issued shortly. The booklet deals with the needs for health and lists those foods required.

Decatur Works Monday Night Bowling League

Bob Houser was the only bowler able to post a double century mark on the opening night of the reorganized Monday night league. His 222 was high single, and his 537 was good also for high three game series. The standings after the first night follow:

	W.	L.
Testers	3	0
Maintenance	2	1
Stators	2	1
Flanges	2	1
Assembly	1	2
Rotors	1	2
Production	1	2
Switches	0	3

Decatur bowlers were given something to shoot at last Sunday when E. Faulkner of Bluffton rolled a neat 289 for the highest score bowled on the G-E alleys this year.

Two teams of G-E bowlers are entered in the Industrial League which is using the G-E alleys every Thursday. Our bowlers are more than holding their own with the city's best.

Safety Standings

(Continued from Page 1)

severity at .16 as compared with 4.74 for frequency and .35 for severity for the same period in 1940.

The standings for the various divisions at the close of the third quarter are as follows:

	Freq.	Sev.
Wire-Insul.	0.0	0.0
Miscellaneous	1.01	0.02
Tool	4.40	.001
Decatur	4.87	.10
Gen. Purpose	4.97	.24
Series-Specialty	5.25	.06
Refrigeration	8.49	.41
Magneto	9.21	.09
Motor-Gen.	9.26	.19
Transformer	10.53	.09
General Ser.	14.14	.61
Distribution	14.65	.05

Smoke Elimination

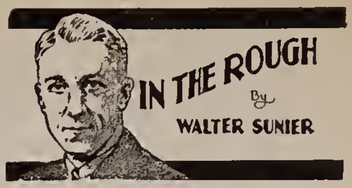
(Continued from Page 1)

General Electric Company has earned Grade "A" rating for cooperation with Fort Wayne's campaign to eliminate smoke and soot so that our fuel, cleaning and painting bills may be less costly and our city a healthier, cleaner place in which to live. Mayor Harry W. Baals and the Citizen's Committee appreciate your cooperation."

The certificate is accompanied by a letter signed by Mr. Ruf which states: "It is with pleasure that we hand you herewith your 'Grade A' Rating Card on Smoke Elimination, as you well realize it is a tremendous task to get a city the size of Fort Wayne cleaned up so there will be no smoke evils.

"You have shown cooperation, and we hope you will continue the good work, and that you will use your influence to interest others in this great cause."

THE TIME TO THINK ABOUT SAFETY IS BEFORE YOU GET HURT!



Jim Sternberger, Bldg. 26-4, won the championship at North Highlands handily, beating his opponent in the finals, 8 and 7. Jim played good golf throughout. He shot a 71 in his first eighteen-hole round. He won his monogram for four years in golf at Central Catholic and was captain of the team last year. Jim also played football for four years and won two monograms.

Gordon Harvey seems to be doing a good job of teaching Mrs. Harvey the honorable game of golf. Sunday before last at Brookwood she missed a birdie on the par 5 No. 16 by only a couple of inches.

Thirty-six holes in one day is about all the average golfer cares to indulge in for a big day of golf. In fact 18 holes is enough most of the time. William H. Evans, Jr., of Syracuse, N. Y., played 272 holes in one day or in other words 30 nine-hole rounds. He reached the course at 3:30 a.m. and played 162 holes before noon. He rested a half-hour but did not dare sit down, knowing that he would grow stiff and develop kinks in his leg muscles. He had to start the afternoon round at a slow pace and gather speed slowly. By 6 o'clock 243 holes had been played but the muscles were getting weak and the brassie felt like a heavy baseball bat. He then rested fifteen minutes and took a drink of hard cider. The last two holes of the 272 were completed in the dusk. Evans went home expecting to get ready for a celebration. He had to be awakened the next afternoon. It took four days in bed to get him in shape. Heart and foot trouble bothered him for two months. In case you are considering trying such a stunt, you may find that you never were the man you thought you were.

Frank G. Vaughen Completes 50 Years' Service With G-E

Leaders of the electrical industry and General Electric associates paid tribute to Frank G. Vaughen, October 2, at a dinner at the New Ocean House at Swampscott, Mass., on his completion of half a century of service with the company.

Mr. Vaughen, who started at 17 as a meter tester with the Thomson-Houston Electric Company, one of the parent companies of General Electric, rose through the ranks to be known throughout the industry as "Dean of the Meter Men."

In praising his long-time service, E. O. Shreve, vice president in charge of sales for the company, said that Mr. Vaughen had contributed to the advancement of the electrical industry as well as the General Electric Company, and at the same time had devoted liberally of his time to civic interests. Mr. Shreve relayed the honor of presenting Mr. Vaughen's 50-year pin to J. R. Waterman, president of the Schenectady chapter of the G-E Quarter Century Club. Mr. Vaughen is the 21st living General Electric 50-year man.

Have the time of your life in every room of your home with G-E self-starting clocks . . . Employee's store open 10 a.m. to 4 p.m.

NEWS THROUGH THE PLANT

6-4 Magneto Mumblings

By The Eavesdropper

A Letter to my—
Dear Aunt Agatha:

So much has happened down here in Magneto Valley since I last wrote you, that it perplexes me as to where I should begin.

Perhaps you would be most interested to hear first of all of the "Shindig" we held a week ago at the Log Cabin. Everybody was there, including "Uncle Elmer" Auman, who, believe it or not, consumed all of 14 hot dogs. He might have left the rest of us some, but, ah well, the buns were pretty good when flavored with mustard. I might add, too, that the sweet apple cider met with great favor in the eyes of our country cousin, Ray Ankenbruck.

Besides having a weiner roast in the great out-of-doors, and in the rain, we enjoyed dancing inside the Log Cabin. Nelson Kikly and Bill Shuler took top honors as "Jitterbugs", Bill having a slight edge over Nelson, due no doubt, to his experience. Perhaps I shouldn't tell you this, Aunt Agatha, but Bill won the state Charleston contest in his not so far gone youth, by yimminy! Quite a shock, isn't it, to discover that here we have had a celebrity in our midst all this time, and haven't known it. Howard Timms, who was until recently, you know, the most handsome and eligible bachelor in our valley, was at the party with his pretty wife, Evelyn, and beaming quite happily, too. Ah me, it brings out the sentimentalism in me, for it was indeed a lovely sight the way Delores Feighner and Don Bruick seemed to take to each other.

In the midst of our fun and gaiety, Mayor Dennison announced that, since all good lil' Magnetoites always go to bed early, we should bring our party to an end, which we did. Just to show you all the fun we had, I am enclosing some pictures which our camera fiend, Oscar Meyers, was very able to take.

You would have thought it cute, Dear Aunt, the way Stanley Prince, a loyal North Sider, came to work the other day, after the North Side-Central game, with a big printed sign, DEAF, pinned on the front of his bright red sweater.

In order to run our Magneto Valley Ladies' Aid to Society Sewing Circle some hot competition, Ivan Osterman, George Glenn, Roy Crum, and Joe Close, have formed the "Thank Goodness, It's Friday" Club. Can it be possible, Auntie, that these playboys have finally settled down to something worth while?

With something in the wind about a Magneto Valley (second shift) hay ride to take place next Saturday night, which sounds very exciting, I'm afraid, Dear Aunt Agatha, that I'll have to bring these incoherent ramblings to a close. Tell you more about that hay ride the next time I write. Until then I remain,

Your loving niece,
Vam.

Winter Street News

Frankie Mason showed up with a 1942 model the other day. He's been buying one every year. Well, Frank, you just keep on buying as often as you can; you'll get a good one eventually. . . . Ray Dumford is a proud father. Congratulations, Ray, and treat that boy well. . . . Dale Delagrange was using a little limp last week and after getting the old pump handle working, it was found that he hurt it with a pitchfork. Nobody knew he had a farm but sure enough, he has—a fishworm farm. . . . The way Leo Miller was directing traffic in the parking lot recommends him for the position of Tank Corps General. What a man! . . . W. Schmidt of the engineering department gave a lovely impromptu radio broadcast last Wednesday morning. Incidentally this must be his week off, since he got his army order for exam, and dropped his watch. A very full week. . . . Here's one for the books. Marge Scollard was asking what "CE" meant on the orders going out to the shop. She was told "cost estimate". "Well, what does 'DW' mean?" "That means day work." "Isn't that kind of silly, everybody works in the day time," she replied.

Art Brandenburger, Bldg. 4-3, our famous motor boat jockey and racing enthusiast, who always loses his boat races, due to the fact that he always carries too much ballast, has become air-minded. Last weekend he flew to Chicago taking along some ballast. Evidently he did not carry too much on this trip for the giant United Airliner arrived there on scheduled time. Upon his return, the boys of the Casting Machining Division presented him with a beautiful warm blanket to take with him on future ventures into the stratosphere because Arthur is very cold blooded.

When is a tie not a tie. Rex Oberlien, Bldg. 26-2, answers: "when Gladys Suter cuts it off with the shears." It was such a pretty necktie, too.

Shorty Solberger, Bldg. 4-2, has a Ford, and what a Ford. He says he drove from Lafayette to Fort Wayne in 85 minutes. What a Ford. We would like to see that, but don't want a ride like that.

Private Frank Schultz, Jr., former Bldg. 26 employee and son of Frank Schultz, Sr., Bldg. 4-2, is a patient at the hospital at Fort Leonard E. Wood, Mo.

Of course Melvin Keisling, Bldg. 26-2, is proud. Why not? It's a girl, and weighs seven pounds.

Plastic Flashes

This ghost-like figure we see moving around on Bldg. 12-1 is none other than Betty Perry. Is it really a bad cold, Betty, or a bad weekend?

Eddie is sure making a hit with the second shift girls. That smile of his would make any girl's heart go pit-a-pat.

Florence Peters is going to make a brand new discovery for Grace and Zoe in a couple of weeks.

Tom Cameron would never pass for a Frank Buck after what happened to him the other day. A tiny mouse jumped out of Tom's tool box into Tom's hand. Poor Tom all but fainted. That vicious beast just wanted to make friends with you.

Various members of the Plastics Department wish S. B. Jackson of the Detroit Office would come to Fort Wayne again to play golf as it seems that most of the boys clipped a good portion of Jack's money.

Somebody ought to tell Soap Summers to play customer's golf.

Charlie Harris must be losing out in his golf game when he lets a "dub" like Soap Summers tie his score.

Bayless Swift thinks Tony D'Agostino's slogan should be "Check the heat."

We hear that Clarence Lallow would win his bridge games if he just wouldn't overbid his hand. Well, maybe he'll learn through experience.

Signing off,
The Tillies.

Tales From Transformer

Stop! Look! Listen!

Having once read that if all of the Scotchmen in the country were laid end to end the line still wouldn't be long enough to reach for the nearest dinner check, we have always been cautious about accepting dinner invitations wae any o' the bonnie lads. Of course, Sandy or his Cousin Colin might claim that the Scots' saving instinct is best demonstrated in cost reduction of waste and spoilage, and we're willing to concede gracefully. But we still intend to think twice before saying "yes."

For instance, take Bob Meese, the Wage Rate curly-top, who almost took us. We're nearly positive that he's running under an alias—his real name being something like Angus McTavish McMeese—for he's the mealtime-menace who had us halfway out of the office, after a beguiling line of double-talk, before we realized that he had slipped this innocent line into his rapid-fire patter: "And I know how much pleasure buying our dinners is going to be, for you!"

Brothers, it was a narrow escape, and although not being enough of the athletic type to jump at conclusions, we now find ourselves so unnerved that we shy at the sight of Scotch plaid—while a scotch and soda is enough to upset our equilibrium. Hic!

Fighting Fire With Fire

It may have been that the girls in the office felt that they were not being properly appreciated. It may have been a tribute to Columbus Day. And then again it may have been that Lapidus was having his annual fire sale, "weet notting but tarrefik, ipsy pipsy, walues—and in all de Yankee Doodle colors too". At any rate, the girls blossomed out last Friday morning in enough RED wearing apparel to keep the office sizzling for weeks. Blouses, skirts, sweaters and dresses; jackets, hankies, and ribbons in their tresses! By mid-afternoon the brothers were reeling—blood-shot eyes peered out at a phantasmagoria of blurred crimson confusion. Aisle traffic all but ceased. Emergency calls were sent out for blinkers and last summer's sun glasses, which never arrived. The lights should have been turned off when the fans were turned on.

It was victory for the girls, complete and chaotic. But if it's competition they're looking for—just a minute—where in tarnation did we pack away those red flannels?

Wayne Weimer, Bldg. 26-2, bought a new bowling ball. Now he is looking for some easy bets—you know, "a sure thing"—to make the ball earn its keep.

Mary Willson, Bldg. 16-3, had that far away look in her eyes here lately. It had everybody wondering, but the truth came out Monday when Mary proudly displayed her new sparkler.

Skipper Meads, Bldg. 26-2, and Second Class Seaman Golda Mentzer, Bldg. 26-2, spent one Sunday morning riding all over Lake Gage trying to start their motor.

Frank Schlatter, Bldg. 26-1, is always taking people for a boat ride, and making them row back because he is always running out of gas.

Best wishes to two brides: Mary Snavley, Bldg. 26-2, who is moving to Muncie, Indiana, and Vivian Semler, Bldg. 26-2, who is moving to Barberton, Ohio.

Private R. Horstmeyer, Bldg. 4-3, now at Baton Rouge, La., reports that he gets quite a kick out of reading the WORKS NEWS and explaining it to the pretty girls down there.

If you see Bill Grover, Bldg. 19-3, just a mere shadow of his former self, it may be because he has gone in business as a weight reducer, and must look the part.

Will wonders never cease. Paul Miser, Bldg. 22, was caught buying a popsicle from the candy lady. Was it in the interests of someone else or are times getting better.

DORWORTH APPOINTED

The appointment of W. J. Dorworth as Assistant District Manager of the General Electric Company's Atlantic district has been announced by C. K. West, commercial vice-president. Mr. Dorworth assumed his new duties on October first.

We wonder if Edna Martin, Bldg. 12-B, really likes to walk in the rain, or if sbe is just forgetful enough to forget her button on a rainy day. At any rate, she had to walk back home just when it was raining the hardest to get her badge so she could work that afternoon.

Ralph Smith, Bldg. 4-2, has a new pair of bowling shoes. We understand that instead of his score coming down, it went up.

Bldg. 4-3 takes great pleasure in proclaiming Max Farrel and Marcel Gaut the champion bowlers of Bldg. 4.

Every morning about 6:15 a.m. a special street car containing only two persons arrives at the G. E. The two passengers are Herb Franke and Sally-the-pie-lady. Since this rendezvous has been started Herb has developed a ravenous appetite for pie. Last Friday he was the recipient of a delicious piece of lemon pie all tied with ribbon. After battling them off for twenty years, what does this mean, Herbie?

Al (Sherlock Holmes) Gerber's, Bldg. 4-1, lake cottage was looted last week. Every morning he has a new clue. He thinks he will have the guilty one in a few days.

The personnel of the Small Lot Section, Bldg. 4-3, held a dance last Friday evening at Poe, Ind. It was a gala event and everyone thoroughly enjoyed themselves. The roads were lined for miles and miles and the assistance of the State Police was enlisted to handle the traffic. The mayor of the community and his wife led the grand march. One of the highlights of the event was when they made Bob "Spitz" Klingle remove his shoes and dance in his stocking feet. The reason given was that his shoes took up too much room on the floor.

Now that the baseball season is over and football holds the spotlight, our genial friend Harold Gick, Bldg. 4-3, is reminiscing about the days when he was star fullback on the Barber College Varsity and he told us some very interesting things. As a lecturer on football, we think he is tops, and plans are now being formulated to have him talk on this great sport at the next luncheon meeting of the College Club.

Lessen the hazards of fire and shock from electric wiring. Have an experienced, electrical mechanic make all repairs and additions to your wiring.

It is dangerous to go into closets with lighted matches or candles.

A Housekeeping Prize In Reverse

"Holy smoke, Ralph, don't hang that broom and dustpan in my department," says Jim James, foreman in the Magneto Department. We admit it, the picture was posed, for Jim is really not a poor housekeeper. He was just obliging when this picture was taken.

A Housekeeping prize in reverse is credited with having much to do with the excellent Housekeeping conditions in the new Magneto Department. The stunt was originated by Superintendent Ralph Dennison. Each Friday, Mr. Dennison and a department member make an inspection. After the inspection is made the dilapidated broom and dustpan are awarded to the department not making the grade in good Housekeeping. The trophy is displayed for one week.

An elaborate placard is attached to the broom and dustpan which reads "Messy Section Trophy Presented Each Friday To The Section Having Poorest Housekeeping." It is interesting to note that for the past several weeks it was found impossible to present the unwelcome trophy because of high Housekeeping standards.

The above Housekeeping stunt is one of a number that have been inaugurated in an effort to create greater initiative in promoting both safety and housekeeping which to a great extent go hand in hand.

Tickets Are Available For "House Of Magic"

Tickets for the "House of Magic" performance to be presented under the auspices of the G-E Club in the Club gymnasium on November 10 and 11 will be available starting next Tuesday, November 28. Tickets are for employees and members of their families and will be issued at the stand in the Club basement upon presentation of membership cards. Tickets will not be issued unless cards are presented.

PAUL VOGT, Chairman.

General Electric More Widely Known To Public, Survey Shows

General Electric is more widely known to the public than any one of a group of five well-publicized industrial organizations in the United States, a recently completed survey reveals. The question, "Which of the following companies have you heard of?", asked of 1000 men and women in 12 typical American cities, brought the following answers: General Electric, 99.4 per cent; "A" company, 97.7 per cent; "B" company, 92.4 per cent; "C" company, 80.9 per cent and "D" company, 77.1 per cent.

The survey, made in all economic groups by the Psychological Corporation, reveals many other interesting thoughts held by the public about the General Electric Company. To cite a few for example, 42.3 per cent of the group queried thought the company made refrigerators and only 22.18 per cent thought the company made motors, turbines, generators, etc. Only 2.5 per cent didn't know what the company made.

Asked whether they thought favorably or unfavorably of General Electric as compared with other companies, General Electric received 90.4 per cent favorable mentions, higher than any other company. In this same group of companies, a large percentage thought

Baer Field Service Men To Be Elex Guests

Members of the Elex Club will play hostesses to service men from the Baer Field on October 31 when a dance will be held at the G-E Club. The affair will be in the form of a Hallowe'en dance, and considerable time and effort will be devoted in decorating the gymnasium to reflect the Hallowe'en spirit.

The dancing will be from 9:00 o'clock until 12:00 o'clock with Danny Yoder's orchestra providing the music.

All Elex members are invited to attend the affair. There will be no admission charge but those attending must present their Elex membership cards in order to gain admittance.

Design "Packaged" Power System For U. S. Air Bases

Packaged, designed-for-defense electric power systems have been developed for U. S. air bases by the General Electric Company. Planned as units, the systems have all their parts—generating equipment, load-center power units, unit substa-

Insurance Benefits Are $81,755 In September

Fort Wayne Beneficiaries Receive $4,650 Under The Free And $6,000 Under The Additional In Four Claims—Grand Total Reaches $19,201,772 Mark

During the month of September $81,755 was paid out to beneficiaries of employees in seven of the eight major apparatus Works on the terms of the Free and Additional Group Life Insurance Plans of the Company. The Schenectady Works had 13 claims during the month under which $11,275 was paid on the Free Insurance and $20,300 under the Additional Insurance Plan.

Lynn River Works was second on the list with $4,500 paid out under Free Insurance, and $9,500 under the Additional. There were four claims also in the Fort Wayne Works for $4,650 under the Free and $6,000 under the Additional. Erie Works had two claims for a total of $2,500 under the Free and $4,000 under the Additional. In Pittsfield Works there was one claim for $1,030 Free, and $2,000 Additional. Bloomfield also had one claim of $1,500 Free and $2,000 Additional, and there was also a single claim in the Philadelphia Works for $1,500 Free and $10,000 Additional.

The total of death claims paid through the entire Company for the first nine months of 1941 is $1,053,167. Since the Insurance Plan was started in 1920, $19,201,772 has been paid out to beneficiaries of employees.

Serious Picture On Shortage Of Steel And Iron

G. E. Science Forum Speaker Declares Acute Situation Is Developing

In spite of the Office of Production Management priorities on certain uses of iron and steel, there will be a shortage of steel in 1941 and for the next few years to meet the great demands of national defense, Dr. Matthew A. Hunter, professor of metallurgy at Rensselaer Polytechnic Institute, Troy, N. Y., declared in an address at Schenectady.

Speaking on the General Electric Science Forum, Dr. Hunter also said that the scrap iron bins of the nation are practically empty. Scrap iron is an essential in present practice in the open-hearth process for making steel.

"With production around 99 per cent of present capacity, the steel industry is producing about 90 million short tons of steel," he pointed out. "But this is eight million tons short of our requirements for this year.

"Next year it will fall short by 27 million tons. In 1942, direct military needs will jump to 27 million tons, and industrial and civilian needs to 100 million—a to-

G-E Apprentice Alumni Holds Annual Election

Frank Peternell was elected president of the G. E. Apprentice Alumni Association at the annual banquet Tuesday night at Mizpah Shrine clubrooms. He will take office January 1, succeeding Paul Merkey.

Other officers elected include Earl Plummer, vice-president; Arthur Davis, financial secretary; Ralph Hershberger, treasurer; Wayne Wiemer, secretary; William Crouse, Herbert Driftmeyer, Ellis Bleke and Ralph Dennison, directors.

Principal speaker was Mayor James Garfield Stewart of Cincinnati. Mayor Stewart, who claims to belong to more organizations than any other man in America, added one more to his collection when the association voted him honorary membership.

Elex Night Shift Girls Hold Party

The night girls of the Elex Club will hold a noon luncheon at 12 o'clock on October 28 at the West Creighton Avenue Church. The dinner will be called "Hallowe'en Dinner" and decorations and program will be in keeping with the Hallowe'en season. Tickets are fifty cents and reservations must be in by 5 o'clock on October 24th. The newly elected officers of the Elex Club will be guests.

NOTICE

During recent weeks the visiting service sponsored by the M.B.A. has been handicapped in many instances by the fact that the person to be called upon has changed address without proper notification. Employees whose addresses are changed should promptly notify their foremen and time clerks of their new addresses. This will insure better service and avoid much lost time in locating absent people.

• That Rolling Sound

That rolling sound you hear is the defense program of the United States going into high.

The Army's leading tank experts tell us that American industry has reached a point in tank production in one year only attained by Germany after five years of rearmament. At the same time, he declares that American tanks are the superior of those being produced in Germany.

Meanwhile, it is announced that machine tool production for the first six months of this year is 93.3 per cent ahead of the similar period in 1940, with companies working two and three shifts and subcontracting being greatly extended.

And the Secretary of War states that huge increases in production have taken place in the hundred days ending July 24, ranging from a 17.8 per cent jump in bomber production to a 475 per cent increase in the output of light tanks. And the Secretary adds: "The hundred days have passed, and I am very happy to report that with the hearty co-operation of American industry we have increased production of many of our vital items . . ."

That sound you hear is the noise of defense—defense rolling off the assembly lines in the form of guns and tanks and planes. The greatest industries the world has ever seen are getting into full stride, making America safe against all dangers!

"True happiness is the child of being and doing."—*Forbes.*

• Behind The Lines

Modern military machines have given the soldier of 1941 an effectiveness against the enemy unequalled in the history of man and war. Today's soldier fires his rifle three times faster than in the first World War. He travels, completely equipped, 10 times as far in a day as he did 25 years ago. His planes carry 32 times as much as they did then. Machines have given him this power.

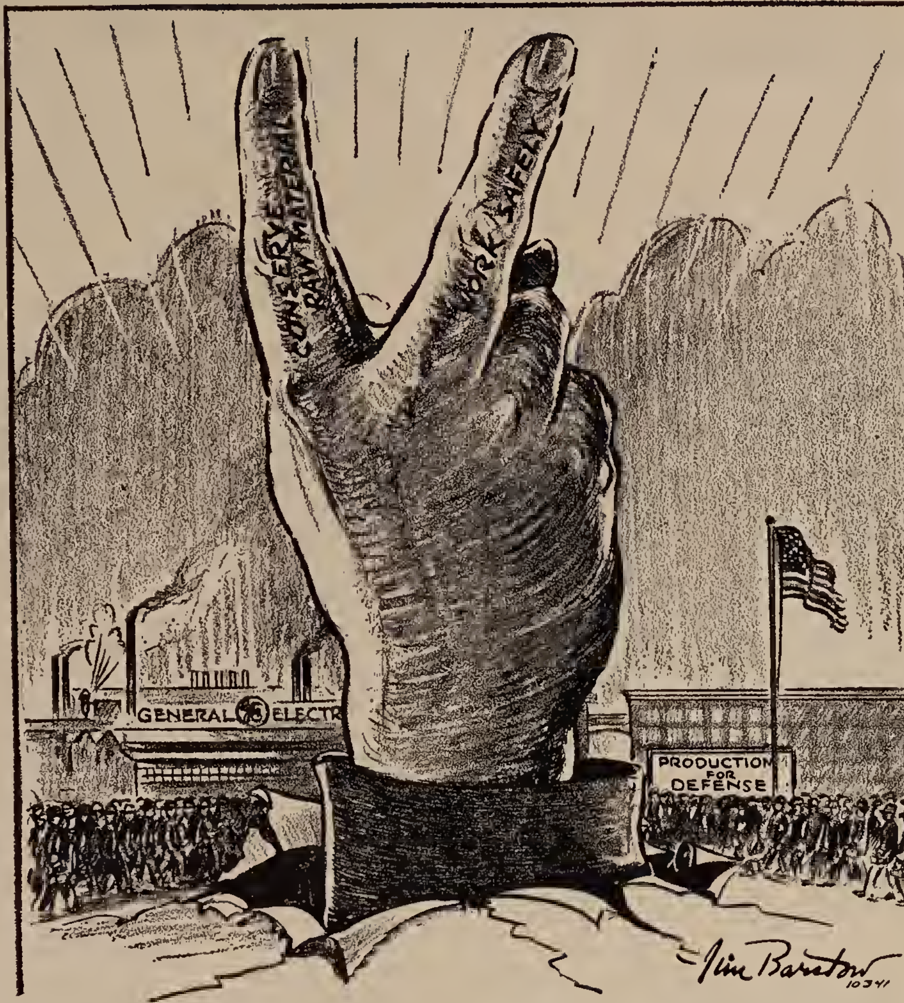
Who gives him the machines? The men behind the lines. You and I and all the rest of us who will never get even a whiff of smokeless powder, who will never even get a ride in a "jeep" or even an inside peek at a flying fortress. But write it down in your book that if we don't make the machines and get them in the hands of the boys who must use them, we won't be worth much as a people.

According to the latest estimates, it takes about 18 of us folks behind the lines to keep one soldier at the battle front. That's a lot of folks to keep one guy happy. Julius Ceasar's battlers took care of themselves. They had swords. Napoleon's legions had to have one man behind the lines for every man up front. In the last fracas of any moment across the seas, it took five men at home for every man at the front. And now it takes 18!

Think it over hard, all you folks in General Electric running the machines and doing the defense jobs we've undertaken. Remember . . . you are just as much a soldier in the service of Uncle Sam as if you had taken the oath of service.

"The measure of a man's real character is what he would do if he knew he would never be found out."—*Lord Macaulay.*

TWO *IMPORTANT* THINGS



There are two things all employed by the Company can do to speed the defense program, it matters not in what department they may work or what they may do. One is conserve materials and the other is work safely. These things are not hard to do. They do not call for superhuman effort, they do not require long hours of overtime, they do not insist upon objectives impossible of attainment. In short they are pretty easy to do.

If each one of us, acting within our rights as an individual were to decide to save even a tiny bit of material every day, be it a paper clip in the office or a few ounces of raw material in the shop, that effort multiplied by 120,000 every working day would produce an astounding figure. If each one of us decided every morning as we began the day's work, that we would not get hurt, not even get a scratch or a bump or let anything whatever happen to us in the way of physical injury, think what that would mean, multiplied by 120,000 every working day.

Remember, it's the little things of life that count, and if we accomplish these successfully, the big things will take care of themselves.

NEWS FROM THE CAMPS

Dear Editor:

I am now at my new address and wish you would send me the WORKS NEWS here. I would appreciate it very much if you would. I am living in a tent right now and it gets very cold at night. We have oil stoves in our tent to keep us from freezing to death. When we wake up in the morning we can see our breath. It is somewhat different than living in a barracks. We are sleeping six in a tent. It is pretty crowded with that many in one tent.

There were 263 of us moved down to San Luis Obispo by truck. We left Roberts at two o'clock and arrived at our new home at five o'clock Friday night. We did not do anything at all when we arrived at our regular army camp. We had off all day Friday, Saturday and Sunday and started our work on Monday. It was really a tiresome trip. We traveled about forty miles by truck. We had a convoy of fourteen trucks. Some of the boys left us in the morning and I was with the bunch that left in the afternoon. So that made a total of eighteen trucks they sent after us boys. We are scattered all over; some are in the 159th and some in the 185th and some even in the 160th. We were looking up each other all day Saturday.

Some of them went to town last Saturday; I went to Long Beach and had a very fine time. I was walking along the beach, when to my surprise I met a girl from Fort Wayne, Indiana. She seemed very pleased when I told her I was from there, too. She told me I was the first person she had met from her home town. This girl lives on Robinwood Drive, just three streets away from where I live. We had a very good time talking about ourselves. She was very interested in learning about the Army and the food we get. It is very good, I would say. We are getting much better food in our regular unit than we did at Camp Roberts. It can't be beat.

Well I guess that is about all I have to say now. You have my new address now. I would appreciate your sending me the NEWS here.

Private Richard C. Becker,
Co. B, 159th Inf.
San Luis Obispo,
California.

WITH THE COLORS

The following employees have entered the service of the United States for military training.

CARL GEORGE SCHULTZ, Bldg. 17-4, selective service.

RICHARD L. BUCHER, Bldg. 19-5, selective service.

HERMAN L. LUNG, Bldg. 26-2, selective service.

MAX LEROY CLUM, Bldg. 4-2, selective service.

ROBERT REGINALD BROWN, Bldg. 4-5, selective service.

JOSEPH WILLIAM REED, Bldg. 27, selective service.

CHESTER JOSEPH PENKUL, Bldg. 17-2, selective service.

RALPH REX CAMPBELL, Bldg. 26-2, selective service.

ROBERT WILLIAM DAMMEIER, Bldg. 6-B, selective service.

MELVIN ROBERT NEVILLE, Bldg. 6-B, selective service.

PAUL HERMAN KOLDEWEY, Bldg. 4-2, selective service.

Fort Wayne Works Well Represented In The Matter Of Twins

Top, left: Madelyne and Vera Drewett. Top, right: Jean and Jane Steinbacher. Center, left: Martha and Mary Fogwell. Lower, left: Joan Voors, Margaret Oddou and Velma Clements.

Did you know that there are four types of twins: girl twins, boy twins, sets consisting of a girl and a boy, and sets consisting of a boy and a girl? We had it on very reliable authority that such is the case. But, since anyone engaged in newspaper work is necessarily of a skeptical turn of mind, we packed up our little camera-man and set out to find if there really is any truth in the "four kinds of twins" statement.

First we discovered the Fogwells—we say "discovered" (and we mean what we say) because one is east of Broadway, and the other west of Broadway. It was a moment of triumph when we had them standing side by side, with Martha on the left and Mary on the right.

Martha is right-handed and Mary is left-handed. If we had been in a playful mood, we would have had them switch positions, and then we could have said: "Martha on the left is right-handed and Mary on the right is left-handed." It made us dizzy just to think of it, so in the interests of humanity, we decided to be logical about the whole affair.

Martha and Mary attended Lafayette Central High School, where they were cheer leaders. They say ordinarily people can tell them apart very easily. Neither do their boy-friends have any trouble, but their teachers had a terrible time.

The Fogwells enjoy the same hobbies; skating is their favorite. Mary attended Indiana Central College at Indianapolis for one year. She is now employed at transformer winding in Bldg. 26-3, while Martha works in 6-B at repair and return hand winding.

In Bldg. 26-4 we found the Steinbachers winding skeins. They were graduated from North Side High School with the class of 1941. In the past they formed a dancing team, but they have discontinued their efforts. They enjoy the same hobbies, which are music and sports, and find that they are more congenial temperamentally with each other than they are with their other sisters. People as a rule are confused as to which is which, but they too say that boys have far less trouble in distinguishing them than anyone else. These boys are really smart, aren't they?

Jean and Jane, who are vice-presidents of the Fort Wayne Lancer Twins Club, have always dressed alike, and had all their classes together. They have never been separated and so were very happy when they were put at the same work. They have a rather generous agreement about their pay. They pool their checks and divide them, so if the one is short, she still has as much as her twin. Aside from being twins, they think they are just ordinary people.

On the "twin trail" in Bldg. 19-3, we found no twins, but three halves of sets of identical twins in the same office—the other halves are not employed at our Works. They are Joan Voors, who together with her sister has won the title of the "most beautiful set of twins" at the National Twins' Convention; Margaret Oddou, and Velma Clements.

Next we visited old friends, Madelyne and Vera Drewett, the models for the Safety series which was run in the WORKS NEWS some time ago. Madelyne on the left is left-handed and Vera on the right is right-handed. They too are officers in the Lancer Twins Club, holding the offices of secretary-treasurer.

These twins are entirely different, in fact so different that they very seldom dress alike. Their opinions, too, are generally different, but they do agree that there is no mental telepathy between twins. They had all their classes in school together and have also had all their jobs together.

We have now definitely proved that there are girl twins; we saw no proof of the remaining three types. But our poor little cameraman was just all played out, so what could we do but pack him up and take him back to his darkroom, three more types or no? We're afraid we'll never know!

Design Packages

(Continued from Page 1)

tions, distribution transformers, and switchgear—co-ordinated electrically, mechanically, and thermally in advance of installation.

Experiences indicate that the time normally required for designing and building a conventional system can be reduced by from four to eight months through the use of the packaged units.

To assure reliable functioning under warfare conditions, the systems are designed so that power continues to be supplied to unharmed parts even after one area has been damaged. All apparatus in the systems are metal-enclosed for protection, safety, and reliability.

Each of the systems includes two or more regular sources of power supply, using tie-ins with outside generating facilities wherever available.

IT'S WHEN YOU LEAST EXPECT IT that an ACCIDENT MAY OVERTAKE YOU

Four Hundred And Twenty-Five Years Of Service In This Group

Four hundred and twenty-five years of service with the General Electric Company are represented in the above group of employees who have completed twenty-five years employment and become members of the Fort Wayne Works Chapter of the General Electric Quarter Century Club.

They are, top row, left to right: J. Ralph Fishback, Bldg. 4-4; Edwin R. Kaiser, Winter St.; John W. Trinen, Bldg. 26-1; George W. Glossop, Bldg. 17-1, and Ferman Pollard, Bldg. 20-2. Second row, left to right: William L. Gaskill, Bldg. 19-B; Herbert A. Franke, Bldg. 4-1; Edgar F. Waldschmidt, Bldg. 18-2; Fred Gerhard, Bldg. 6-4; Harold F. Briggeman, Bldg. 18-4.

Third row, left to right: Elmer W. Koehlinger, Winter St.; Elton Swank, Bldg. 20-1; Martin Kimble, Bldg. 26-5; Charles Fletter, Bldg. 17-2, and Edwin H. Lepper, Bldg. 19-3. Below: W. W. Winner, Bldg. 19-5, and John R. Heine, Bldg. 4-4.

AFTER FOUR YEARS

Four and a half years ago The Flint Trolley Coach, Inc., (Mich.) bought a spare motor and, at the same time, 46 trolley coaches, each equipped with two General Electric 1154 motors. The coaches have been in regular service since then, with all of them at work during the morning and evening rush hours; the spare motor remained on the inactive list.

The first motor failure on any of these coaches just occurred when a small hole was burned in the armature of one of them. With the spare motor available, the coach was out of service only a few hours because of the failure, and the damaged motor was rewound.

G-E Widely Known

(Continued from Page 1)

General Electric had good employee relations, treated its employees well, paid high wages, had good hours and gave a lot of employment.

As to where headquarters of the Company are located 30.4 per cent gave the right answer, Schenectady, while 40.6 per cent said they didn't know and the rest gave cities ranging from Erie, Pa., to Atlanta, Ga.

Newspapers and magazines gave 43.6 per cent of those interviewed their most recent contact with the name and activities of the Company. Displays accounted for 29.1 per cent and radio for 28.6 per cent.

In response to the question "What could the General Electric Company do to make you feel even more favorable to them?", 35.4 per cent said "Nothing, they're all right now and couldn't do any more; 29.2 per cent said they didn't know and 12.5 per cent said "reduce prices on appliances and products." The rest suggested various other ways, one person even asking for a job and a refrigerator.

These are the highlights of the survey which was made by a corps of 44 trained interviewers who visited 300 persons in the upper income groups, 400 in the middle income group and 300 in the lower income group. The interviews were made within a week.

Why Savings Are Vital

To the Men and Women of General Electric:

When the present national emergency is over, America will face a period of readjustment, while a large proportion of industry changes over from the manufacture of armaments to the production of civilian goods. Just how seriously this readjustment will affect each of us depends largely on what we, as individuals, do to prepare for it.

One of the most constructive things that we can do to prepare for this post-war period is to save a portion of our earnings now. As a result of the National Defense Program thousands of men and women are enjoying higher incomes due to overtime work and the general increase in wage levels. The end of the present conflict, however, will probably bring a sudden end to the need for overtime work—in fact, we may find ourselves working less than the normal 40-hour week during the readjustment period. This may result in hardship unless we have reserve funds to tide us over.

This article brings out forcefully the reasons why saving a part of our earnings now is of vital importance not only to the welfare of our nation, but also to the future security of our own jobs. I sincerely recommend that this subject be given serious consideration.

C E Wilson

PRESIDENT

MORE MONEY TO SPEND

During the last few weeks most of us have probably had trouble in buying something that we wanted—perhaps a new radio, refrigerator, automobile, or a pair of silk stockings. We had the money ready to lay on the counter, but the stores didn't have the things we wanted—and likely weren't sure just when they were going to get them.

People all over the country today are beginning to have the same trouble—more money to spend than they have had for several years, yet fewer products in the stores on which to spend it. And most people know that this is caused by the fact that our factories are busy turning out armaments instead of the things we are trying to buy.

In the months ahead this situation probably will become more acute. It has been estimated that when our armament production gets into full swing, we in America will be earning $34 billion a year we cannot spend.

The next logical question is "what's going to happen to this $34 billion?"

INCREASED TAXES WILL TAKE PART OF IT

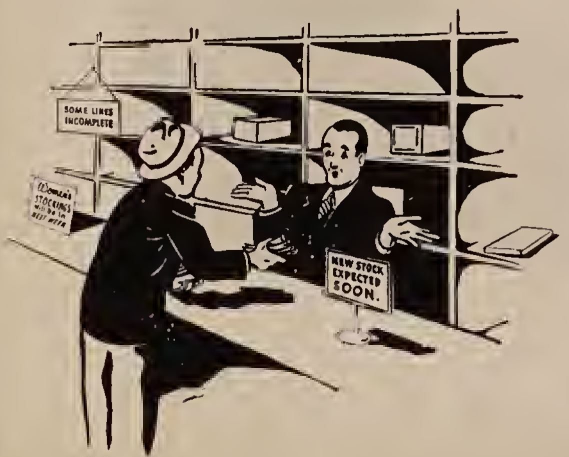
The Government is faced with the problem of paying for the National Defense Program and it will take part of the $34 billion. The new tax law will take about three and one-half billion dollars more out of circulation than taxes took last year. In 1942 and 1943 taxes may be still higher.

But in spite of this great increase in taxes, we'll still be earning many billions of dollars which we cannot spend, because there just will not be enough goods available.

What good are these "excess" earnings then, if they won't buy us the things we want? The answer depends on what we do with them. They can make us or break us depending on how we put them to use.

SPENDING CAUSES INFLATION

If we try to spend all we earn, it will break us. By trying to spend our total earnings, we will only push prices higher and higher because more and more less efficient manufacturing units must be brought into use to supply the increased demand. As a result it will take all of our increased income to buy the smaller volume of things available. If this happens we will not only get less in return for the money we spend, but this "inflation" would injure us in many other ways.



Forcing up the cost of shoes, clothes, groceries, rents, and so on, by trying to spend all of our present incomes would also force up the cost of raw materials and other items going into our defense armaments. In other words, the Government would have to pay more for the planes, tanks, guns, and other defense materials needed by our armed forces. All of this adds up to a bigger national debt which we would have to pay off in years to come, after the present war is gone and forgotten, through higher taxes. But there's still another point to consider.

VALUES WOULD SHRINK

Years of high living costs cause severe strains all through our economic system. Savings and life insurance shrink in value. Your life insurance that today may be adequate to meet the needs of your family would, if you died during the inflation, likely not be enough to take care of them because everything they would need would cost more. Money which people were setting aside for their old age would probably not be enough to take care of them. People who had been saving to buy a home would find that the cost was now too high to reach. Such strains as this would wreck the confidence which is so important to successful business operation, and would invite business stagnation and depression.

SAVINGS POINT THE WAY

The best solution—the best way to keep our extra income from becoming a "white elephant"—is to save it. In this way we can keep prices on an even keel, and prevent inflation at a time when all our energies are needed to speed the defense program. Saving now will remove the cause of inflation and all the evils that go along with it. We shall be spared many of the hardships that occurred during the last World War, when prices practically doubled. It was this inflation which sent land prices skyrocketing, and saddled the farmers with debts which have created a national problem for more than twenty years. If we had prevented that inflation by saving our money at that time, the business depressions which followed World War I would certainly have been less severe.

SAVINGS WILL CUSHION THE READJUSTMENT PERIOD

In the same way, saving our money now will cushion the shock when the present war ends. Then industry will have to sell civilian goods in greater quantities than ever before in order to take the place of the armaments it has been producing and which will no longer be needed. Unless we have the money to buy those goods in large quantities many factories will have to shut down, bringing on a period when the going will be tough for business and for all of us.

This matter of savings during a time when a country is at war is so important that England has put into effect a plan of enforced savings. This takes money out of circulation which cannot be spent and which might do great damage.

By taking the initiative and saving individually at this time we can prevent the price increases which may force our government to take such regulatory measures.

Motor Generator Static

Labor Saving

Mat Smith, Bldg. 19-1, makes the NEWS this week. It seems he had another birthday last week and his pals presented him with a small (of all things) "angel food" cake adorned with 36 candles. While 36 was not the proper number, the boys ran out of money, so Mat had to imagine the rest. As it was, the heat developed was so great he had to use an air hose to blow out the candles. Labor saving device, we calls it!

Sounds Bad

Ah! The pity of it, that, of all people, Poison Pen should be chosen to play the lead when someone has a bad dream. Yep, one of the girls in the Cost Department (name withheld) went to see the movie, "Dr. Jekyll and Mr. Hyde," and upon returning home covered with "goose pimples" from fright, went to bed and dreamed an "awful" dream in which Poison Pen was the villain. That sorrowing hulk of humanity is now at a loss to find words expressing the grief and agony he is undergoing—why, they might even ask him to frighten unruly children or the neighbor's dogs. Ah, the pity of it all!

Happy Birthday!

October 24 and 25 will be days long remembered in the Planning Group for they mark the birthdays of two of its outstanding members. October 24, some years ago, that big bird with the long beak fluttered over the residence of a family named Histed and deposited a bundle later known as "Walter" or the "Peck's Bad Boy" of the Planning Section.

The date of October 25 brought into being one Jerome or Jerry Frye, artist, wood carver and philosopher. By some strange quirk of fate, both found their way into employment in the General Electric Company. Here each found his niche in our hall of fame. Jerry established himself by his whittling, drawing and "saying of the week"; Walter by several outstanding literary contributions to our WORKS NEWS. We all prophesy a great future for both boys in their respective fields, and join in wishing them many more Happy Birthdays—and we do mean HAPPY!

Super Co-operation

The spirit of co-operation that blankets our Bldg. 19-3 Service Bureau is truly a thing of beauty. These gals will go out of their way to bring about the realization of their co-workers whims or fancies. Take the case of "Bouncing Bertie" Bultemeyer, a little girl who, dissatisfied with ordinary ways of life, demanded something more startling—out of the ordinary. "Bertie" decided that alarm clocks were all right, but that she preferred arising to the strains of martial music. A survey of the Bureau disclosed that none of the girls could play a bugle, so as the next best substitute for this instrument, Mary Thornberg volunteered her services. No, I do not mean Mary would give imitations, but rather that the Thornbergs would drive past Bultemeyer's residence on their way to work and attempt to play "reveille" on their auto horn. This worked beautifully, and "Bertie" came to work each day, smiling and contented. But, alas, one morning, through neglect of their obligations or because their tooter would not toot, they failed "Bertie," and when finally awakened, she was barely able to ring in on time. Suffice to say, this never happened again. The look of despair and disappointment on Bertie's face nearly broke their hearts.

Super-Cooperation, we calls it!

Double Feature

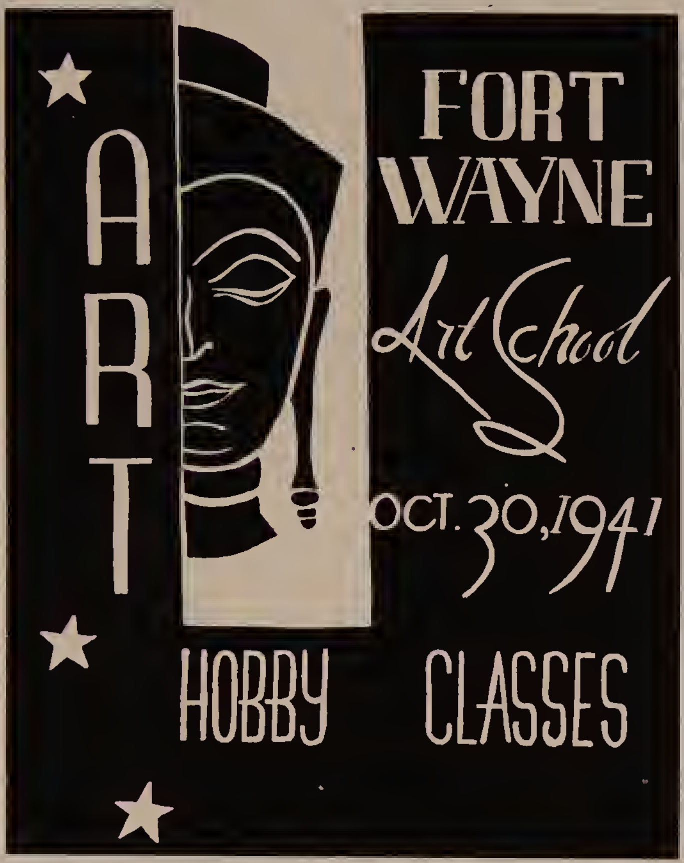
Last week when our Works Photographer visited Bldg. 19-3 to photograph our twins—yes, we have one member each of three pairs of twins working on this floor—Luke Martin viewed the proceedings with interest. His co-workers report Luke feels he should have been in the picture, as he is the father of twins, and, after all, there would be no twins if there were no fathers.

By the way—the twins photographed were Thelma Clements, Joan Voors and Margaret Oddou.

Saying Of The Week

Jerry Frye remarks "When you get something for nothing, it's usually worth twice what you pay for it."

Art School Presents Opportunities



For the third season the Fort Wayne Art School is presenting an opportunity to persons in this community to develop confidence and latent talent, and to further individual abilities and interests in the arts. Hobby classes will be held in figure drawing for beginners and experienced students under the direction of Homer G. Davisson. There will also be classes in modeling, practical design, and various other subjects.

The fees for the hobby classes are four dollars for a ten weeks' series. Classes will meet each Thursday evening from 7 to 9 o'clock beginning on October 30. For personal consultation or further information on the hobby art classes, employees are asked to call or see Walter H. McBride, director of the Fort Wayne Art School, 1026 West Berry Street, Telephone A-1382.

Pvt. Joe Kitson, selective service draftee, has been released from the U. S. Army under the 28 year rule. Mr. Kitson was inducted into the army January 27, 1941. He is an employee of the Punch Press Department. He is the first employee who has returned to work under the Company's policy of re-employment of Selective Service men.

On November 8th our good friends of Bldg. 4-3, Marjorie Kavanaugh and Richard Watt, will march away and come back as one. Good luck to both of you from all of us.

Gossip From 19-5

A group of girls visited Marie Page recently at her country estate for that long-awaited chop suey supper that she promised us in 1937. Before she would give us anything to eat, she made us visit her farm and barnyard. After giving us several demonstrations in hog calling (she could win any contest), we finally got something to eat. . . . Speaking about the absent-minded professor, Henrietta Deak is taking his place. Going shopping after work one night, Henrietta purchased a pair of hose and meat for her lunch next day. Getting ready to pack her lunch the next day, Henrietta discovered she put her hose in the icebox and threw her meat on the bed. . . . Don't ever have Rosemary Blust direct anyone in the car, because she doesn't know right from left, and she can't recognize the house after she has been there several times.

Neva Baker, Bldg. 4-3, spent the weekend in an air conditioned car from Fort Wayne to New York and return. The trouble was Neva almost froze to death.

Golda Mentzer, Bldg. 26-2 and Harry Karr, Bldg. 26-2, have been carrying sheet music back and forth to work all week. They intended to practice playing the drums and accordians over the week-end at the lake but finally forgot the music. Yes, they made a racket.

Is Zat So?

The gang from Bldg. 17-1 was certainly glad to see that "Wally" McKay had recuperated from his recent illness sufficiently to warrant his visiting us last Friday. We hope you will soon be back to work with us again "Wally." . . . Since our friend, Frank Quinn got married, George Mosshammer and Jack Leonard are the only bachelors we have left in our group. We are wondering which will be the next one to get into that "double harness." From all reports George has a head start! . . . Henry Papenbrock didn't seem very appreciative of someone's efforts to fasten his tool box by driving a large bolt across the corner. He did seem quite relieved when he discovered that the bolt was not through his box but just very cleverly attached so as to give that impression. It really had you worried for a while, didn't it, Henry? . . . Loyal Decker has returned from an enjoyable vacation spent in the Smoky Mountains and on the Atlantic Coast. Thanks for the card, "Decker" but we suggest that next time you send it Air Mail so that we get it before you return! . . . We wonder if that is a new fad or whether Veora Habig is trying to save her silk hose by just wearing one stocking at a time! . . . We wouldn't be surprised if Harold Fisher moved back to the city after his experience of getting his Buick stuck in the drive of his new suburban home during that last rainy spell. Rumors are that Harold is now beginning to realize the advantages of living in a city. Don't worry Harold, it can't rain like that forever!

I'll be seeing ya at Russell Gibson's party Friday night. So long for now!

The Question Mark.

Thisa And Thata 19-5

Margaret Ellen Whittmer changed her name—you know, one of these names that are hard to remember, Smith. She and William H. Smith were married October 23 at the St. Patrick's Catholic Church at ten o'clock. We wish them all the good luck and happiness that can be theirs. . . . Gussie Cushing gave us all a scare when she fell off her chair the other day. We thought she had fainted, but she only lost her balance when trying to pick something off the floor. By the way, they tell me she landed right in the wastebasket.

The girls are wondering why Martha Scherzinger came in at 7:00 o'clock Monday morning with her dog pinned on her pocket? We want a dog too, Martha.

If any of the girls want to know what to buy Ina Archbold and Ruth Thurer, we suggest a fan or don't give up, girls, cold weather is coming.

Blanche Conkel just returned from a week's vacation.

Clarice Fyock needs two watches to keep track of her dates. Good luck, Clarice.

Clarence Rentschler got a hair cut at the old price. We suppose that will be the last one for a long time.

Best wishes to Evelyn Kattas, Bldg 26-1, who was married on October 16.

What is that new nickname for Lawrence Richert, Bldg, 26-2? Will someone please tell us?

Fern Gilliland, Bldg. 4-3, has been on the sick list. We all hope she is back to work soon.

M. B. A. PATIENTS

General Purpose Motor: Howard Reinking, 3220 Oliver St.; Charles Zehrung, 1101 Packard Ave.; Maurice Petgen, 3919 Arlington Ave.; Eva Litzenberg, 2445 Oliver St.; Richard Kiefer, 1908 So. Harrison St.; Walter Hardiek, 220 Mechanic St.; Fern Gilliland, 1126 Nelson St.; Chester Feasel, 917½ Wilt St.; Ralph Dunlap, 1821 Thompson St.; Louis Dromond, 421 E. Washington St.; Freida Browne, 827 W. Dewald St.

Transformer: Margaret Kennig, R. R. 4, Waynedale, Ind.; Stephany Hilker, 2148 Weisser Park Ave.; Lillian Hegerfeld, 506½ E. Leith St.; R. Farrell, 2409 Freeman St.; Helen Emrick, 1115 W. Wayne St.; Ida Commers, 1121 Garden St.; Mary Armstrong, 2331 Pittsburg St.; Margaret Anspach, 1810 St. Joe Blvd.

Series & Specialty: Arthur Buchwalt, 2037 Henrietta St.; Ed Brockhall, 1912 High St.

Wire & Insulation: Andrew Heltzel, 318 E. State St.

Shipping: Wm. Closson, 1607 E. Wayne St.

Apprentice: Joseph Bex, 336 W. Gumpper St.

Winter St.: Ben Beaty, 1403 E. Lewis St.

Office: Mary Habig, St. Joseph Hospital.

Returned to work: Lewis Gessinger, Joseph Bex, Dalphus Kaylor, Lola McCaque, Robert Bunyan, M. Bloomberg, Astrid Anderson, B. Jackson, Mary Ellen Butler, Joseph Ternet, Rosella Swift, Harland Beaman, Betty Gunther, Geo. Telley, Harold Baehler, Donald Walters, Glenn Baker, Harry Bush, Clarence Mentzer, Ruth Olwin, Letha Shepherd, Darwin Lietz, Wm. Meeks, Dale Heersche, Melvin Riley, Eileen Porter, Melvin Overman, Francine Remmel, Lawrence Hilton, Louis Delagrange, Stanley Marquardt, Donald Johnson, Wilda Wolf, Mabel McClain, Ann Bishop, Anna Gaff, Theodore Warner.

Left the hospital: Dale Lytle, James Chaney, Richard Kiefer, Helen Emrick, Eileen Gemmer.

Like the "man on the flying trapeze," Fred Zehendner sure flies through the air with the greatest of ease, as fellow-workers in Bldg. 12-B can certainly testify. They looked on in wonder one a. m. last week as Fred executed a perfect landing on the hard cement floor, amid sundry pieces of insulation that rightfully belonged on a truck he was busily engaged in loading for delivery.

If you want to make George Huber, Bldg. 12-B, happy, just ask him to display his home-made manicure. He's that proud of it! It looks like George's "better-half" has got herself a weekly job shining up his finger nails from now on.

What we're all wondering now is what Lois Hagemann, Bldg. 12-B office, is going to do with all that money she receives from that suggestion she spent nearly all last Friday afternoon racking her poor brain over. Just ask us, Lois, we're past masters in the art of spending money.

Louis Fox, Bldg. 19-3, was observed walking toward a Kroger store last Saturday with a pair of trousers under his arm. Could it be he traded the trousers for a ham? For he was seen several days afterward eating ham sandwiches. We wonder where Louis got the trousers? Could you enlighten us on the subject, Louis?

NEWS THROUGH THE PLANTS

Winter Street News

Helen Wynn, one of Winter Street's new girls, believes in putting her best foot forward, even if it does happen to be in cement. Evidently she has no reverse, so instead of backing up, she plowed right on through. . . . Carl Brokaw hit the "jack pot" at the Palace last week. During the vaudeville act his number was called, the spotlight focussed upon him, and he was presented with a package which upon being opened turned out to be a beautiful granite pail with a nice little red handle on it. Now what will he do with that?

. . . Monday was a red letter day or we mean a red sweater day at the office. Don't know when we've seen so much red so often. There were only about 14 red sweaters worn that day and then they say it was a coincidence. Mabel Martin helped a little by wearing a red collar. And even then some forgot to wear them. . . . After getting back from her vacation two weeks ago, Marge Kohlmeyer is now back in the groove. She just had to relax and dream of her two weeks of "Ozark Memories." . . . The Winter Street Production Department had a "dog burn" at C. Harlow Lammiman's country estate located near Waynedale. The hi-spots of the evening were the community sings the whole gang put on. They kept on even though the neighborman complained and finally came over with a shot gun and almost scared the "songs" out of them. Later Charlie explained that that was a put-up job and the party resumed where it left off. . . . Les "Bid 'em up" Didier got his final graduation papers in the noon euchre sessions. He was set five times in one game in the morning and three more at noon. He states that they can just quit calling him "Bid 'em up" 'cause he ain't no more.

News From 6-B And 4-B

Fellows, if you get up around Pretty Lake hunting this fall, keep your hunting boots on because "Red" Renbarger has a dog now that eats rubber bands. It may like rubber boots but "Red" won't try him out with his own. . . . Fogwell, working in the Rip and Rare Section, is trying to join Tom Mix and his gang. He bought a balky western pony and tried to ride it. Now he stands up to work. Hi-ho Silver. . . . We wonder why everybody was so crabby in "Bill" Walt's Dept.? Maybe Bill didn't catch anything. How about it Bill? . . . Ruth Franzdorf was seen the other night practicing up for some kind of a steeple chase. Climbing over a fence at the Lutheran Hospital when they have sidewalks around the building. . . . We all wish you success on your new jobs Bob Wilson and Bill Putt. . . . It's more fun than a circus to watch Fred Lenz and John Boese feuding (verbal, of course) at the daily euchre game. We should charge admission. . . . Jack Carlin will never fall asleep again at noon. He got the hot-foot, but still insists someone used a blow torch.

Buck Adams, Bldg. 4-3, reports the excavation at Big Long Lake will be ready very soon for the large building that he hopes to see erected in order that he can entertain Harry Parker and company.

Traveler: "The train leaves in ten minutes. I have to buy a ticket, see about my bags, and get some lunch. Could you help me?"

Friend: "Sure. I could eat the lunch."

Of Course It Was A Success

MAGNETO. DEPT.
HAY!

Among the most successful department events of the season was the recent hayrack ride held by the Magneto Department. Members of the committee, to whom goes considerable credit for the success of the affair are shown above. They are, left to right: Ann Perry, Phyllis Closson and Betty White. The attractive poster shown at the left was made by Miss Perry.

Sleuthing In 4-6

That was not a sprinting contest down town one day last week. It was Dorothy Banks and Thelma Read running down the street chasing a street car. Each time, just as they thought they had won the race, the car was on its way again. After a two-block run, the girls decided that they had had sufficient exercise for one day, and gave up the chase. . . . On Wednesday evening at 5:30, a dinner party was given in Bldg. 16-2 honoring Dorothy Gerdom, who will be married on October 26th, Marge Kavanaugh, whose wedding day will be November 8th, and Mildred Gertz who is leaving today to take over a new job in the Supercharger Dept. in Bldg. 16-3. The party was given by the Cost Dept. girls, and also the Time Clerks from Bldgs. 4 and 17, who presented each guest of honor with a gift. . . . We really should have a brilliant crowd in Bldg. 4-6 from now on, judging by the number of Encyclopedic Dictionaries which were bought during the past week. The rest of us will never be able to keep up with them. . . . Jean Junk went all the way to Toledo to play volleyball and badminton. She said the weather was "wet". Virginia Selby also went places. We hear that she spent the weekend at Turkey Run State Park. . . . Ellen Heidbrink must have little feet. She bought a pair of "Red Goose" shoes, and they're really cute! . . . What's this we hear about someone trying to steal Voyce Brumbaugh's car from a parking lot Saturday night? Don't let 'em get away with it, Voyce. . . . We'll miss Maxine Ungerer who is leaving us today. Our best wishes to you, Maxine. May lots of luck and happiness come your way. Her work will be taken over by Jane Highlen, to whom we extend a hearty welcome.

Wonder if Edna Martin, Bldg. 12-B, has turned to the art of butchering or to pie baking. She was seen taking a box of pig knuckles out of her desk drawer, but for some reason or other she wouldn't open the box but had some one else do it. In the afternoon she was seen passing pie around to everyone who came in the office. They say, Edna, the way to a man's heart is through his stomach.

6-B Buzzes

Bill Walt attained the acme of checker perfection last Wednesday noon when he defeated Al Ray, Irwin Hower and Russel Isaacs in succession. We don't believe he used 13 checkers either—that day. . . . "Scotty" could win first prize at a masquerade party with the makeup he wears in the spray booths at night. A red bandana on his head and that black muzzle over his face, he surely looks like a monster. . . . The annual party that Fred Lenz has each year at his cottage at Pretty Lake we all know will be as good as last year or better. Let's make it another ox roast with beer. . . . For advertising space on the conveyor system, see Frank Graffe. Advertise your wiener bakes and Halloween parties, and we will all come. . . . The reason for the singing that Carl Steinbacker has been doing lately has been found out. He has become Uncle Carl over the week-end. "Muzzie" Steinbacker celebrated by burning part of his bar. . . . All those who didn't recognize the picture of Ruth Franzdorf in the WORKS NEWS should see her for an explanation.

The alibi that Henry Foley, Bldg. 4-1, used when he lost that ten dollar bill is an old one. Paul Monroe Bldg. 4-1 used that one ten years ago. "I lost it thru a hole in my pocket."

The clerk had just completed a quarter-century of faithful service with a big business concern. At the end of the day the boss handed him a big envelope inscribed, "In token of this memorable date."

The clerk opened the envelope and inside he found a photograph of his employer.

"Well, what do you think of my gift to you in recognition of your devoted service?" the employer asked.

"It's just like you," was the ambiguous answer.

Everyone in Bldg. 4-1 wondered why Max (Cloud) Archbold, Bldg. 4-1, didn't come to work when they called him. It is rumored that the sow and piggies are getting along fine.

Wanted: An old oil pulled Rumley engine. Arthur VanWald, Bldg. 4-1, has overhauled the motor in his car about three times this year. He says he should have a spare motor to bring him home in an emergency.

Slips And Chips

Sir Viss Bldg. 4-4

You have heard of people who awake at a certain hour every morning. Did you ever hear of anyone who can awake at any hour he chooses. We have one in our midst and he is Chris Delagrange. Chris tells me that just before he goes to bed he looks at the clock, decides the hour to awaken and he does. If Chris doesn't show up some morning, you will know he looked at the calendar instead of the clock. . . . Our ex-co-worker, Max Fielitz, thumbed his way home the other night because his car wouldn't take off. Max tried and tried but she just wouldn't budge. Max decided that it must be a broken axle. The next morning he sent the Zanesville garage mechanic and wrecker after his car. Max was indeed surprised when the garage man informed him that his rear wheel was blocked up on bricks. . . . Norbert Gase is just about ready for the cold west wind to blow. He is remodeling his home and has the bath room just about completed.

Flash! We are now going forward on a clean-up campaign in our department. I think it is grand, don't you? Let us all get behind it (not too far behind) and see how clean we can make our department and keep it that way.

Effie Wyatt, Bldg. 4-3, reported that some awful animal or wild beast was roaming around her house and sleeping on her porch. Effie decided to stay up one night and guard the house as she said by the looks of her porch every morning she thought it was an elephant, but it turned out to be the neighbor's dog, so Effie's worries are over.

John Trim, Bldg. 4-3, reports that his good old shovel is as good as any $1.50 horse whip that he ever bought.

An 18-5 Oddity

Is there a navigation course offered by any schools in town or neighboring vicinities? J. L. (Wrong Way) Fagan, after buying the best automobile compass on the market (so Lee Bernhardt says—I think it was salesmanship myself), took twenty minutes to decide which way was north while on a duck hunting expedition last week. After finding north he decided it wasn't north so a native of the north by name of Ray White finally had to convince the poor man he had been the victim of a swindle and north wasn't really north. Well, anyway, those compasses look nice in cars.

Incidentally, the ducks are still to be found safe and sound in their usual haunts.

Patient: "Doctor, is my mouth opened wide enough?"

Doctor: "Yes. You see, I always stand on the outside while pulling a tooth."

* * *

"See that boy over there annoying Mary?"

"Why, he isn't looking at her."

"Well, that's what's annoying her."

* * *

Preacher: "Rastus, do you take dis here woman fuh bettah or worse?"

Rastus: "Pahson, Ah shoots the works."

Borings From 4-4 Office

It is wedding bells in our office this week. Thursday, October 24, Delores Loveall was married to Private Everett Zellers of North Manchester, stationed at Ft. Bragg, North Carolina, by Rev. Van B. Wright. Good luck and much happiness to both from our whole office. You see, he is home on a furlough. . . . Bill Weber is back to work after a severe sick spell. We are all glad to see his cheery face again. . . . Did you notice that Indiana U. won their first football game last Saturday. Now I have hopes for the Alma Mater. . . . Art Wedler and Mike Brayer (Purdue-ex enthusiast) went fishing last week-end (Purdue lost 16 to 8 to Fort Wayne Business College). Nice going Art, as Art caught the most fish. . . . Ife Holmes has been in the process of remodeling his home for some time, and Saturday he went down into the basement with some boards. He knocked the water meter off the shelf, breaking the lead pipe, and couldn't get a plumber. Can you imagine that, no plumber since Saturday. Ife has carried water from the neighbors. What's Saturday night without bath night brigade. In his case, it is bucket brigade. . . . We now have increased our family again. Bob Turschman, Step and fetch it, and Clarence Shanebeck. Never a dull moment in our great big happy family that has increased by leaps and bounds in the last year. . . . Say folks, there's a good shindig at Valencia Gardens this Saturday night. Almost the whole office is going to be there, and you can bet your life that I'll be there too. Well 'tis plenty for now, I remain, sincerely as ever,

Elmer, the field mouse,
The Rat to you.

The director of the zoo was away on a short vacation when he received the following note from the chief assistant.

"Everything all right except the chimpanzee seems to be pining away for a companion. What shall we do until you return?"

A colored preacher, standing before his flock, stared in dismay at the red splotch on his white starched bosom, made by an overripe tomato tossed by an unruly member of the congregation. He departed from his prepared sermon about the pearly gates.

"Brothers and sisters," he said softly, "there is gwine to be jes' about ten mo' minits of this hebben business. Then you is gwine to see all hell break loose!"

A traveling salesman returning from a particular unsuccessful trip told his sales manager, "If Hitler still wants more territory, he can have mine."

Marjorie Hargrave, Bldg. 4-3, was seen holding a heated discussion with a well known Elkhart doctor during the evening recess of the Elex Conference last weekend. She wishes to announce at this time that for her supper and a nominal fee she is available for short medical talks for different group meetings.

Alva MacMaken and Genevieve Tuttle, Bldg. 4-3 had a lot of trouble the other day getting a certain name for the WORKS NEWS.

"Now, Willie," said the teacher to a rather stupid pupil, "listen to me very carefully. If I had five eggs in this basket and laid three eggs on the table, how many eggs would I have?"

"Eight," was the cheerful answer.

NEWS THROUGH THE PLANTS

From The Feminine Viewpoint

By Hilda Barthold and Frances Krauskopf

The seventh annual Elex Conference was held at Hotel Elkhart in Elkhart, Indiana on October 18 and 19. The theme of the conference was "Life."

The girls left Fort Wayne via chartered busses at 9:00 o'clock from the G-E Club and arrived at Elkhart in more or less a safe and sound state of health approximately two hours later. After checking in at the hotel and being assigned to their respective rooms, the girls went to Peacock Alley on the ninth floor for registration. Following registration they had half an hour to hunt souvenirs in downtown Elkhart. Lunch was served in the Empire Room on the Mezzanine Floor with Billy Fisher playing the Elex Club Song as the girls entered.

Conference opened officially at 1:30 with Irene Meyers presiding. Irene turned the meeting over to Helen Bleke, the newly-installed president, who presided at a meeting for the first time—and very well, too. The girls were divided into three discussion groups with a leader and a secretary for each group. Group one's leader was Helen Bleke with Dorothy Mueller as secretary; Eileen Foor lead Group two, while Bea Livingston acted as secretary; Group three was led by Irene Meyers with Vivian Hitchcock as secretary.

The various groups met from 2:00 until 5:30 discussing plans for the coming year. Dinner was served at 6 and the discussion groups continued from 7:30 until 9:00. The remainder of the evening was left free for the girls to do as they desired.

On Sunday morning, the girls assembled for devotions at 10:00 a. m. with Irene Meyers giving the thought: "Judging." General Assembly, during which time the groups worked on the program for the coming year, lasted from 10:30 to 12:30 and after dinner from 2:30 to 4:30. At the conclusion of General Assembly a candle-light service was held. Conference closed officially at 5:00 o'clock. As each girl left the candle-light service, she was given a copy of James Allen's book, "Entering the Kingdom." Busses left for Fort Wayne immediately after the candle-light service.

The poem, "Life's Clock," which appeared on the program, expresses very well the thought which guided the girls during the meeting:

LIFE'S CLOCK

The clock of life is wound but once
And no man hath the power
To tell just where the hands will stop
At a late or early hour.

To lose one's wealth is sad indeed;
To lose one's health is more;
To lose one's Soul is such a loss
As no man can restore.

The present only is our own,
Live, love, toil with a will—
Place no faith in "tomorrow"—for
The clock may then be still.

Of course, Conference had its lighter moments, too. A few of the highlights are:

Dorothea Swank's forgetting her pajamas, and filling her luggage with wadded paper to take up unused space.

Blanche Allen's corsage, which she claims came from her cousin. Everyone wondered why she got so excited about a "cousinly" gift.

Pat Chapin's mad dash for the bus, which started to leave without her, while she was getting another busload straightened out.

Dorothy Franke's first experience with chestnuts. After instructions lasting approximately five minutes, during which time a chestnut died a horrible death, Dorothy said: "I'll eat pecans."

Dorothy Barraclough's enjoyment of the Conference. Dotty took her vacation and came here from Pittsfield, so she could attend the Elex Conference.

Veora Habig's ingenuity in fixing up the loud-speaking system at the impromptu dance on the ninth floor.

Charlotte Stanford's exhibition dancing.

Wife: "The new maid has burned the bacon and eggs, darling. Wouldn't you be satisfied with a couple of kisses for breakfast?"

Husband: "Sure, bring her in."

A Few Interesting Shots From Camp Shelby

26-5 Tool Bits

After many months of writing short bits of news for our column, Carey Baker received the highest award for the year, a gold medal from the Liars' Club. It was presented in solemn ceremony with the accustomed group of on-lookers straining their necks to get a glimpse of the decoration. Mr. Baker left immediately thereafter to attend a convention meeting, the nature of which has not been disclosed. The only knowledge as to the kind of meeting it might have been was expressed by one of Carey's coworkers as the "Screwball Club of the World." . . . Johnny Allen "went and done it" and probably will be broke for months to come. He just purchased a little piece of hard rock for his girl friend. . . . Gordon McDougal has the positive solution on how to make a friend change his political sentiments. Just fill his basement full of water via the backup process. . . . Dick Wagner would like to be put in charge of all reference prints. You guessed it. "ATTRACTION." . . . Lloyd Dolan contends there's keener activity behind him. He has suggested turning the drafting boards around. . . . Walter Elliot invites all the fellows to come see the collection he brought home from his vacation. (Please do not wash before coming.)

As you all know, Ray Saul, Bldg. 4-3, is a great lover of pie and cake. He just can't let it pass his sight, no matter whom it belongs to. It seems as if he is out of luck these days, as Phil Tilford, Bldg. 4-3, doesn't take any chances of letting Ray eat his pie any more.

6-B Cellar

Hi Neighbor:

Well, here we are back on the map two weeks in succession. Surprise, eh? . . . First of all we want to correct our error made in last week's paper. The party which the girls held in the home of Laura Haiflich was given in honor of Clara Heston's birth, instead of Laura's. . . . Anyone having any information as to where Margaret Sampson got that beautiful "black eye" which she's trying to hide with her glasses, please tell us. Because we sure are curious to know. . . . Anyone passing through our neighborhood of 6-B last week and wondering why the sober expressions: it was because our songsters Roy Eberson and Byron Newman were on their vacations. We hope you had a good time, boys. . . . Brownie, we're sorry we missed you a few weeks ago. So at this time we want to congratulate you and Mrs. (Floyd) Brown, who are the parents of a baby girl. . . . Well, folks, we hope 6-B moves around a little this week and makes it possible for us to be back here next week. Keep looking for us.

Your friend,
The Cellar Rat.

"It's A Joke"

"And what," asked the teacher, "do two ducks and a cow remind you of?"

"Quackers and milk," said the little boy.

* * *

"During the war, my brother stayed home—worked on the farm instead. One day while he was milking a cow, a soldier came along and said: 'You slacker! Why aren't you at the front?'"

"What did your brother say?"

"He said: 'Because there isn't any milk at that end.'"

* * *

He: "I'm not a lazy man, Sir. I work when I can get work, but I've been out of a job."

Judge (to officer): "Look at his hands, Sergeant."

Officer (looking at prisoner's hands): "Why, Sir, it must be years since the old scoundrel did any work—his hands are as soft and white as mine!"

* * *

"I'm against this new fad—women wearing men's trousers. If you saw a man and woman walking down the street both wearing trousers, how could you tell the difference?"

"You can always tell the difference. The one who is listening is the man."

Dear Editor:

I am sending you a few snap shots of Fort Wayne Works employees now stationed at Camp Shelby. One (upper right) is of First Lieut. Harold J. Longsworth taken in Louisiana during maneuvers. He is not posing, he really is asleep. But that was a usual occurence for him. The other (upper left) is of Second Lieut. Vern E. Pray taken at Camp Shelby. Lieut. Pray is now stationed at Fort Benning, Ga. The other is a picture of the mascots of Service Company, 152nd Infantry. The dog belongs to Sergt. Kenneth P. Carr. The other is a very tame banty hen. I'd rather not say how we acquired her.

I am now stationed at Fort Benning, Ga., taking a three-month motor course. After January 13 I will be back at Camp Shelby.

PAUL M. NEUMANN.

First Lieut. 152nd. Infantry,
First Training Bn. M. M. No. 6,
Fort Benning, Ga.

Several weeks ago some tourists from sunny California were passing through the vicinity of Waynedale when they saw what they thought was an Eskimo. Not being prepared for cold weather, they stopped at the nearest place to inquire about the weather as they didn't know whether to travel any farther north or not. "Eskimo", exclaimed the grocer, "You must be mistaken." "Oh, no", said the tourists, "we saw a real one just a little ways from here." Before long everyone was driving down the Bluffton Road until traffic was so congested you could hardly get through. But arriving at said place, who was it but our friend Johnnie Deahl, Bldg. 4-3, with a big white wooly sweater, cap and little wagon digging his winter crop of potatoes.

Doc Markley, Bldg. 4-3, suggests that the company install a bulletin board in front of the works in order that he can pin his identification badge on it so that he doesn't have to make so many trips from Roanoke to Fort Wayne before starting his days work.

Foosh, mon—here it is, almost Halloween, and I haven't a ghost o' an idea—or an idea o' a ghost either. If I only had a ghost writer now.

Weel, ye dinna hai tae believe in ghosts tae have something haunt ye night and day.

But what haunts me are real ghosts—ghosts o' motors and transformers, or mangled torsos o' same. They leer at me from the scrap shed every time I go tae the employees' store.

Real ghosts are hard tae find. Cousin Colin says he couldn't find one even with a haunting dog.

But these Baling Barn Banshees are far too easy tae find. Any time ye'd like tae sneak out and see one, the ghost is clear.

O' course, while we are talking about the scrap shed, we ought tae get serious. I ought tae quit just flapping my trap and take a slap at scrap.

If ye read the pink, green or blue sheets o' last month, ye remember various articles telling how many motors per week could be—etc., etc., or how many carloads o' scrap were shipped out o' here per—etc., etc.

Remember too, that for each carload o' scrap, worth about 1¢ per lb., there has tae be a carload o' raw material sent in. Let's say it cost, say —10¢ per lb. Then we did work on it, say another 5¢ per lb. before we scrapped it, tae sell for say—1¢ per lb. Now, say we try tae figure our profit sharing from this kind o' business. Hoot mon—it's enough tae horrify a Scotsman.

But that isn't all. That carload o' scrap means just one carload o' products we can't make, now-a-days. One carload less that we can sell means just that much less pay for us. There's more labor in a carload o' finished motors or transformers than a car o' scrap.

So we lose all around. The only way ye could profit by it is tae be a junk man. But I hear now that ye can't even buy junk without a priority.

"Sandy."

19-5 Office Chatter

Magic, yes, magic ran riot in the 19-5 office the other day. By Webster magic is "the working of supernatural beings." Now that's where Richard fits in the picture. They, the Myers-Richard team, are ready to sign any contract. . . . Ann Pressler insisted she had the rabbit by the ears—but lo and behold, her desk light just didn't work that way. . . . Alma Witte has a little china pig on her desk with a pink ribbon—you know, a penny a day will buy a Christmas present someday. . . . Carl Alter is now home from the army all hale, hearty and happy. . . . Between E. Lindeman and Hubert Myers there was a name twisting session. Shall we introduce you two fellows so you will call each other by the correct names in the future. . . . Carl Rietdorf was "remembering back when" in 1918-19 every morning at 9 a. m. gymnastics were performed—Bend-1-2-3. Oh, my spine! . . . Virginia Winegart's banana diet — I mean for breakfast. . . . Yes, the "Poison Pen" should have a hand for his clever items.

We wonder why Gertrude Bertsche, Bldg. 4-3, always hurries out of work to the south gate.

NEWS THROUGH THE PLANT

Plastic Flashes

It looks as if Addie Masbaum is having competition as "Building 12's best driver" from Mildred Hartman. Mildred is running a close second by having a little "get-together" with another car.

Who ith that handthome lad from the apprenteth thkool who wisits Floradella?

What two second shift gents are battling for the hand of the fairest molder of the same shift?

Fred Schaefer has a chest expansion of "200 inches" since the arrival of little Phyllis Ann. Congratulations Mr. and Mrs. Schaefer.

Betty Perry wishes to take this means of thanking her ever loving and thoughtful co-workers who presented her with a rare floral bouquet during her recent illness.

Jim Fleming has finally dunnit. He's done got himself a gal. For proof see the convincing photo that Carmelita has.

From the way the "chillun" have been acting, Erma's giggle sure is contagious.

Gracie has become a defense widow. Her other half is in Detroit helping out with orders for Uncle Sam.

Just so you all know, that shadow wandering around Bldg. 12-3 is Joe Stuckey who is on a rigid diet.

Anyone desiring to know a sure cure for hiccups should ask Greba Rust and Susie Jones. They say it's "sure fire."

A sight never to be forgotten is Effie Yinger falling over a box and bouncing down the aisle.

Some girls of Bldg. 12-3 are wondering what Lois Drewett carries in the suitcase. Maybe it would be a good idea for you to label it, Lois.

Agnes Ryan celebrated her birthday this week and certainly was not forgotten. The cards she received served as a decoration for her work table.

The Tillies.

Mistaken Identity

Friends of Kenneth Reddig of Bldg. 17-4 wish to remind him that the manufacturers of the G. E. refrigerator do not guarantee their product to rejuvenate fish that have passed the age limit, fruits in the second and third stages of decay, nor used milk that has been drained from a butter churn.

They simply maintain that produce placed therein will remain status quo for a reasonable length of time.

On the same basis, we could assume that if Kenneth's wife presented him with a baby girl if Kenneth preferred a boy, the Doctor's life would probably be in greater danger than that of his patient.

Signed Butter Milk.

Beware Of Hitchhikers

A few nights ago there was a delightful "Weiner Bake" at the home of Laura Mae Haiflick in honor of Clara Heaston's ——th birthday. A car with a party of four girls, with Alvina Doehrman as chauffeur and Betty Skevington, Mary Margaret Voors, and Wilma Kress as passengers, started for Laura Mae's home. At the Broadway bridge, a tough-looking character, dressed like a "horrible example" for a flop house and a face which looked like a "veal cutlet," stuck a calloused thumb in the glare of Alvina's headlights.

Alvina very graciously stopped and took the stranger aboard. Amid a lot of scratching, screaming and pushing, he parked himself in Wilma Kress' lap. He picked Wilma because she probably had more lap than anyone else. After being "woman handled" and scruffed and kicked about for about five minutes, his wig and false mustache came off and lo! and behold!, if it wasn't Clara Heaston, herself, the honor guest.

Bernard Adams, Bldg. 26-2, says its very disappointing when you go out to get your car and find both back wheels missing. He said he felt like taking his hair down and crying.

Loretta Bloom, Bldg. 26-2, learned something about cooking noodles. The package did not look so large and so she dumped the entire contents in the cooker for her dinner. Now Loretta has been eating noodles all week so she can get some use out of her spare pots and pans.

It is reported that Keith Benward Bldg. 26-2, has a healthy respect for a mouse. Well, we have seen vicious ones tear a piece of paper in two just like nothing.

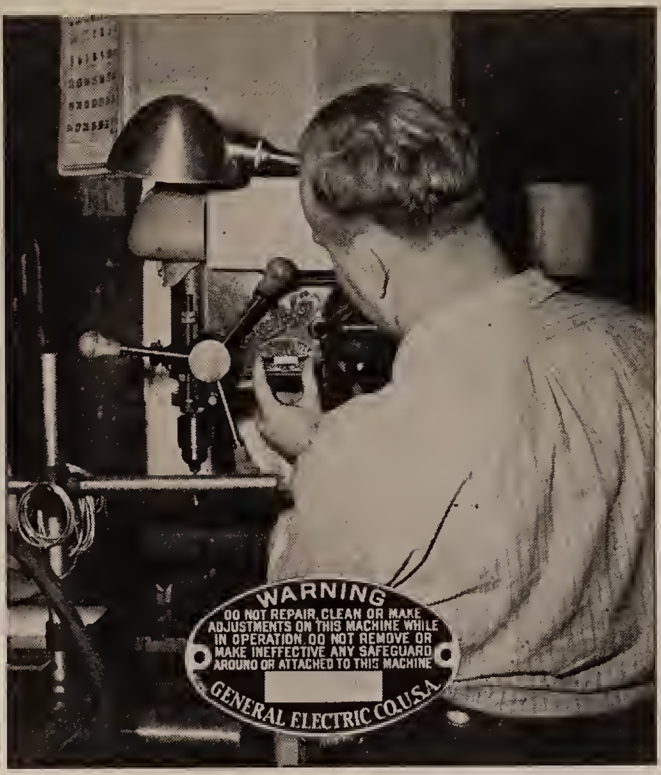
We'll let you in on a secret. Harry Karr, Bldg. 26-2, has been having unusual luck in catching pike whenever his friends are around. Strange to say the pike was always an eight-pounder and as time rolled on the quality of the pike seemed to stray farther and farther away from standard. Now it is reported that Harry used the same pike and kept him hitched to his pole for exhibition purposes.

Nope, not Jay Wickliffe, Bldg. 26-1, he's not slipping. At a recent dance, Jay is reported to have paid the orchestra to keep on playing after "Home Sweet Home."

Anyone wanting to take lessons on how to do acrobatics on horse back just see Margaret McMaken, Bldg. 4-2. She can ride with one foot in stirrup with her head down, then finally drop underneath the horse, let it walk right over her without getting even a scratch.

Aldine Bell, Bldg. 4-3, has gone back to her childhood days. She was seen playing leap frog around the entrance of Bldg. 4.

There's One On Every Machine



WARNING
DO NOT REPAIR, CLEAN OR MAKE ADJUSTMENTS ON THIS MACHINE WHILE IN OPERATION. DO NOT REMOVE OR MAKE INEFFECTIVE ANY SAFEGUARD AROUND OR ATTACHED TO THIS MACHINE
GENERAL ELECTRIC CO. U.S.A.

Catalog number plates such as that shown in above picture have been placed on machines at the Fort Wayne Works for over thirty years. The safety inscription appearing on this plate has not been changed since that date.

In looking over our records, it is apparent why this safety message has not grown out of date. We find that persons who violate this safety warning get in trouble today the same as they did thirty years ago.

Last month an employee in Bldg. 4-5 was cleaning his machine in violation of this safety warning and severely injured his hand. This department had worked nearly two million man hours without having a single lost time accident.

THERE'S ONE OF THESE ON THE MACHINE YOU ARE OPERATING.

Roger Pierson, Bldg. 20-1, is shown in above picture installing one of these tags.

H. L. SMITH, Safety Engineer.

Walter McCormick, Bldg. 4-3, will join the Kentucky Colonel Club as soon as he develops his southern accent. Three of his friends of the same floor are helping him along. Good luck, Mack.

Raymond "Don Juan" Heck, Bldg. 4-3, of the Small Lot Section evinces much interest in the fair sex of our floor. All the ladies of this department pass in review and Ray's critical eye misses nothing, and his reports to headquarters are very interesting. To date he has found nothing that measures up to his standards. We sincerely hope that one will come along soon for Ray is very desirous of taking unto himself a wife. We all take this opportunity to wish him the best of luck.

Fern Truelove, Bldg. 4-3, wishes to make it known she has not taken on any weight. It was really Forrest Whonsettler parading down the aisle with her apron on.

Ward Grim, Bldg. 4-3, spent last Saturday shopping around for a lovely wedding gift. This time for his daughter, Geraldine, in Bldg. 4-6.

Decatur News

Juanita Lautzenheiser, daughter of Mr. and Mrs. John Lautzenheiser of Willshire, Ohio, and Roger Arnold, son of Mr. and Mrs. Floyd Arnold of Decatur, were united in marriage Sunday, October 12. Mr. Arnold is an employee of the General Electric Company at Decatur.

Mr. and Mrs. Gayle Eley are the parents of a baby boy born October 13.

Corp. Joe Krick, Decatur G. E. employee who is in the quartermaster department at Fort Benjamin Harrison, recently underwent an operation for hernia. He is reported getting along O. K.

Lorena Reppert has returned to work after a week's vacation at home.

19-4 Nibbins

Marcelaine Girardot will certainly miss something next week. . . . Robert Haslup and Lorraine Hahn are now Mr. and Mrs. . . . Louise Simm has changed from a day owl to a night owl. . . . Edna Braun has really been lost since Derloshon and Simm have not been with her the past weeks. . . . Margie Green is moving to Fort Wayne. . . . Edna Braun will be a better housekeeper since she will have a home of her own in New Haven. . . . Helen Eager sure rates with wavy-haired boys. . . . Seems as though Betty Frazier has been making up for lost time since she is back on days.

On Tuesday evening, October 14th, the personnel of the small lot section gave a birthday party in honor of Edna Callow, Bldg. 4-3. A sumptuous repast was served and everyone had a grand time. Edna received many fine gifts and was the recipient of many spankings some of them (as the members of this section put it) were much deserved for misdemeanors allegedly committed by her upon different members of this now famous department. She is herewith commanded to come forth and to explain to all of us what they were.

A new organization, as yet unnamed, has been formed in Bldg. 4-3. The members of this outfit have chosen Walter Schelper as Grand Exalted Keeper of the Bulbs. His job will be to see that there is a bulb in every socket at the lodge hall, and bulb snatching will not be tolerated. Anyone caught snatching or switching them will have to purchase and present to said lodge one dozen bulbs, the size of which will be designàted by his Eminence, the Grand Exalted Keeper.

Wanted to rent or borrow by Lois Knepper, Bldg. 4-3, a horse and buggy. If anyone can help her out, please inform her at once as she seems to be very worried over the matter.

Neva Riley, Bldg. 4-3, is very desirous of working days. The reason given is that she is all out for National Defense and can do this more justice by working the first shift. We believe that she is very much interested in the army. She was recently seen (if our eyes did not deceive us) with a gentlemen in uniform. It could be possible that it was a policeman or a street car motorman.

Candidates For Volleyball League Asked To Report

Circuit To Open Week Of Oct. 27 With Nine Teams Scheduled For Play

Jim Johnson, manager of the G-E Club Volleyball League, has issued a call for all employees interested in joining a volleyball team to report to their department managers as soon as possible.

Nine teams are planned for the league with play starting during the week of October 27.

The teams, league managers and their locations are as follows:

Main Office, Ray Soughan, Bldg. 21.

Winter Street, C. Lammiman, Bldg. 1-2, Winter Street.

S. M. Factory, George Arnold, Bldg. 4-3.

Apprentice, Jim Kelly, Bldg. 12-2.

S. M. Office, Dick Snyder, Bldg. 4-6.

Apparatus, H. Lojek, Bldg. 19-3.

S. M. Production, Jim Oman, Bldg. 4-5.

Series-Specialty, Hubert Meyer, Bldg. 19-4.

Transformer, Merlin Sweet, Bldg. 26-2.

DECATUR SPORTS

G.E. Inter-Department Tuesday Night League

Spud Nelson topped the pins for 209 in his first game Tuesday night; but C. Keller was high for three games with a total of 529. Dick Steele had a 3-game total of 501.

League Standings

	W	L
Millers	3	0
Drillers	3	0
Grinders	0	3
Punchers	0	3

Men's Monday Night League

Ray Leitz's 214 was the best single game bowled in the Men's Monday Night League, while George Laurent rolled the high 3-game total of 569.

The 200 scores included: Leitz, 214; R. Johnson, 212; Laurent, 209.

Testers won 2 from Rotors.

Flanges won 3 from Production.

Maintenance won 2 from Switches.

Stators won 3 from Assembly.

League Standings

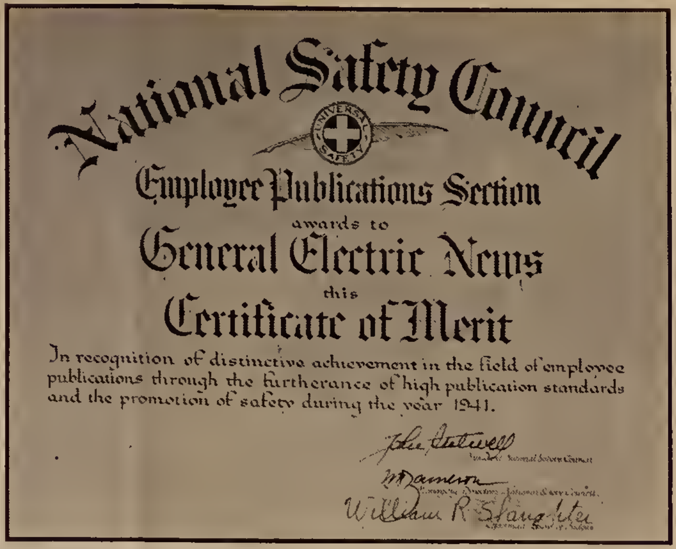
	W	L
Stators	5	1
Testers	5	1
Flanges	5	1
Maintenance	4	2
Rotors	2	4
Production	1	5
Assembly	1	5
Switches	1	5

G.E. Industrial League

R. Woodhall copped the honors in the G. E. Industrial league, with a neat 232 in his second game; B. Keller was right on his heels with 224 in his third game. Other 200 scores were: R. Heller, 203; A. Miller, 202; Snooks Marbaugh, 204.

In the team competition: Mutschlers won three from the G. E. Dodgers; Doc's Place won three from the G. E. Ramblers; and Burkes won two from West End Restaurant.

Awarded To Works' Papers



National Safety Council

Employee Publications Section

awards to

General Electric News

this

Certificate of Merit

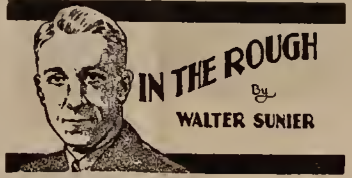
In recognition of distinctive achievement in the field of employee publications through the furtherance of high publication standards and the promotion of safety during the year 1941.

John Stilwell

W. Cameron

William R. Slaughter

The above certificate of merit was awarded to the WORKS NEWS, published at eight of the Company's major Works, at the recent meeting of the National Safety Council. The award was made in competition with employee publications from all sections of the United States.



It certainly warms the cockles of one's heart to have an appreciative public — a group so appreciative that some one will go to the trouble of sending a little present. A person drills along thinking that no one enjoys the weekly efforts and then some kind persons does an act that puts life in the old plug and repays all the work that has been done. One of the main reasons for mentioning the gift here is that the donor did not give his name and the only way we have of thanking him is by this means. The gift was forty golf tees and we hope this mention of the gift will cause the donor to reveal himself because the tees were not worth a tinker's dam or any other kind of a dam. How anyone would have ever given space to a collection of such battered, disreputable, mutilated, broken and dilapidated tees is beyond us.

W........ and J........, a couple of fellows having something to do with the MG department, defeated M...... and H........, located in Bldg. ....., in a close golf match Saturday before last. The match was all even up to the 17th. It was here that W........ sank such a long putt that everyone stood aghast with W........ standing the aghastest. This would have been a nice yarn and we were told that we were at perfect liberty to use the whole story but to leave out the names, which makes it an illuminating ditty.

In addition to being a golf addict, Les Didier is also a mushroom addict. He gave us a mess of mushrooms he picked at Brookwood last Saturday and, brother, were they good? A golf course is even good for something else than exercise.

Don't quit playing now. There may be several good playing days yet. Last week end we saw Miller, Lee, Edgar, Hemphill, Hamilton, Schoenherr, Didier, Schwanz, A. L. Johnson, Chas. Johnson, Wallace, Kellogg, Moffatt, Slater, etc.

Salesman: "Is your mother engaged, son."

Little boy: "I think she is married."

NOTICE

All G-E Rod and Gun Club rifle and pistol shooters who wish to enter their outdoor N. R. A. or military qualifications scores for medals should contact club officers before the first of November. Members may ascertain their ratings from the range officer at the Armory on Wednesday evenings.

A. F. BOWERS, President.

Serious Picture

tal of 127 million tons. Most of this industrial increase is due to plant expansion for military needs."

The steel industry has agreed to study ways in which it might increase its capacity by 10 million tons, according to Dr. Hunter.

"This is a formidable job," the speaker continued. "It may take ten years to complete. It may cost over two billion dollars. And even this would leave 17 million tons to be found by civilian conservation."

Dr. Hunter mentioned the OPM priorities on certain uses of steel.

"It (the OPM) has indicated that a 50 per cent cut in automobile production must be made in 1942, in order to divert some four and a half million tons of steel to national defense," he said. "But it cannot cut too far into civilian needs. Included in this category is steel for new plants, equipment, box cars, pipe lines and power stations. These are all items which are not classed as direct military needs—yet they are essential parts in defense."

Further restrictions will be necessary with regard to household appliances, such as refrigerators, washing machines, and ranges, which use some form of iron as a dominant constituent, according to Dr. Hunter.

"The volume of sales for these things will be greatly reduced," he continued. "The year 1942—and those that follow, if the emergency continues—are going to be tough ones for civilians. We'll have to do without a great many new things; and we'll be driven to studying ways to make the old ones do."

The situation on scrap iron is a sad story, Dr. Hunter pointed out.

"For many years, you know," he said, "a considerable proportion of our scrap iron has gone abroad. Political considerations were involved. Many of us were incensed at the volume being exported to a belligerent eastern nation, but we withheld criticism then because we were not directly affected. Now our sins have come home to us."

Dr. Hunter suggested a method of improving the situation. He said that the automobile graveyards, which so profusely dot the countryside, can be converted into useful materials.

"And there is no home which would not contribute at least 20 pounds of scrap iron to the cause," he added. "If the necessity becomes great enough, we may find that it is unpatriotic to have an iron grill or railing in our home, or a steel stadium on the college grounds."

SCIENCE FORUM – by L. A. Hawkins

Q. What happens to the light given off by a lamp when the lamp is a room is suddenly switched off?

A. After the light source is shut off, the light already emitted continues to travel, until it strikes some surface in the room. At this point, part of the light is absorbed, and part is reflected. The part reflected travels until it strikes another surface, at which point, again, part is absorbed (being converted into heat) and part reflected. This process continues until all the energy in the light has been absorbed. Since light travels at the rate of 186,000 miles per second, all the energy in it is absorbed before the eye can comprehend the process; therefore it seems that as soon as the light source is shut off, the light disappears.

Q. What is the difference between a mixture and a compound?

A. A chemical compound is the result of chemical action between its elements which cannot be separated again by any simple physical means. A mixture, on the other hand, involves no chemical combination; and the constituents can ordinarily be separated by physical methods.

Q. If both parents are midgets and the offspring is normal in every respect, is there any possibility that this offspring's children will be midgets?

A. The growth of the offspring's children would depend on the marital partner of the offspring. If the marital partner were of normal height, then the probability is that the grandchildren would also be of normal height. On the other hand, if the marital partner were a midget, the probability would be that most of the children would also be midgets. It is taken for granted that by midget is meant a person who is normal in every respect except in growth, and that lack of growth is acting as a Mendelian dominant characteristic.

Q. Does coal lose any of its gases or volatile matter when stored?

A. Yes, but this loss during storage at ordinary temperatures is so slight that the heating value of the coal is not affected appreciably.

Q. Can heat waves travel through a vacuum?

A. Heat or infrared is the same as light, x-rays and radio waves, except for wavelength. All such radiations—heat included—will travel through a vacuum at the same speed of 186,000 miles a second. The best proof of this is that the sun's rays have to travel through interstellar space before they reach the earth's atmosphere.

Q. Have chemists been able to make living tissue synthetically?

A. No. They have, however, been able to keep living tissue alive by keeping it in the proper environment. They can also make it grow by using the proper nutrients.

MORE ABOUT AVIATION

Anyone interested in any phase of aviation should be sure to attend a meeting which will be held in the G-E Club lounge room, Tuesday, October 28, at 7:30 p.m.

The purpose for calling this meeting is to form an Aviation Club. The purpose of the club shall be to provide instruction and flying time for its members at a greatly reduced cost compared to flying individually. Membership shall be open to any G-E employee whether he has had time in the air or not.

Aviation Clubs of this nature have been operating successfully throughout the United States for the past several years and their possibilities are only limited by their individual members.

For further information call H. Schultz, Phone 702.

R. W. KENT.

« «It's a Joke» »

"Are you the girl who took my order?" asked the impatient gentleman in the cafe.

"Yes, sir," replied the waitress politely.

"Well I'll be darned," he remarked, "you don't look a day older."

* * *

Puffing and blowing the young man just managed to get on the platform of the last car as the train left the station.

The middle-aged man in the corner eyed him with scorn.

"When I was your age, my lad," he said, "I could run half a mile, catch a train by the skin of my teeth, and yet be as fresh as a daisy."

"Yes," gasped the young fellow, "but I missed this one at the last station."

* * *

Army Sergeant: "Have you any preference?"

Draftee: "Yes, sir."

Army Sergeant: "What would you like to be?"

Draftee: "An ex-service man with a pension."

* * *

Mrs. Henpecked (sarcastically): "I suppose you've been to see a sick friend—holding his hand all evening?"

Husband (absently): "If I'd been holding his hand, I'd have made money!"

A. W. King Writes Magazine Article

The current issue of the Monsanto magazine, nationally distributed, has for its lead story an interesting article on fluorescent lighting, written by A. W. King, of the Specialty Transformer Department of the Fort Wayne Works.

The article is titled "Chemistry and Candlepower", and in an interesting manner easily understood by the layman, traces the origin and development of fluorescent lighting.

Mr. King points out that the phenomenon of fluorescence was accidentally discovered as early as 1602, but that it was not until 1938 that this new light source was per-

Machinist-Toolmaker

Dallas F. Smith

Dallas F. Smith, a graduate from Elmhurst High School in 1937, has completed the machinist-toolmaker course in the Apprentice School.

Foot Accidents Show A Big Decrease Here

A reduction of 34 per cent in the number of foot accidents at the Fort Wayne Works during the past three months is shown in the October report of the General Safety Committee. During the three months there were three lost time accidents caused by objects falling on the feet, out of a total of 44 lost time accidents.

This figure is considered particularly gratifying in view of the fact that during the past five years foot accidents represented 37 per cent, as compared with 17 per cent machine accidents.

Baer Field Men To Be Elex Guests At Club This Evening

A Hallowe'en dance will be sponsored by the Elex Club this evening with service men from Baer Field as guests. The dance will be from 9 o'clock until 1 a.m., the time being extended one hour in order to enable Elex members of the second shift to attend the affair.

Music will be provided by Danny Yoder's orchestra.

All Elex members are invited to attend the dance. There will be no admission charge but to gain admittance it will be necessary to present Elex membership cards.

G-E Club Dance

The regular Saturday night G-E Club dance will be held tomorrow evening in the G-E Club gymnasium. All employees and their friends are invited to attend.

The dances, always popular affairs, are drawing capacity crowds during the present season.

House Of Magic Tickets Being Issued At Club

Are Distributed To Employees Only On Presentation Of Membership Cards

Employees desiring tickets for themselves and members of their families for free admission to the spectacular "House of Magic" program to be presented at the G-E Club on November 10 and 11 are urged to apply for them at as early a date as possible. The tickets are being distributed at the stand in the Club basement and will be issued only on presentation of membership cards.

The human voice, light, the approach of a body, or humidity can control electric current as well as the familiar switch, and demonstrations of these less usual methods of control provide some of the most startling effects in the General Electric "House of Magic" which will be presented here.

The control of electric current by sound is demonstrated with a miniature electric train. Apparently endowed with the ability to understand a spoken command, a small locomotive obeys orders to "Stop," "Go ahead," and "Back up." But this unusual method of dispatching a train is less complicated than it seems at first. It is explained that the number of sounds and their timing when spoken into a microphone provide the electrical impulses which control the actions of the train.

Capacity control, or the control of current by the approach of a body, is another method which cre-

Major Changes Made In Company's Organization

Charles E. Wilson, president of the General Electric Company, has announced the election of five new vice-presidents by the board of directors of the Company. The new officers are: Walter R. G. Baker, Chester H. Lang, David C. Prince, Elmer D. Spicer, and Harry A. Winne.

The new officers were elected in connection with a major change in the company's organization. Under the new setup, the company will have four major operating departments: Appliance and Merchandise, under Vice-President Hardage L. Andrews; Radio and Television, under Vice-President Baker; Lamp, under Vice-President Joseph E. Kewley and the Apparatus Department which, because of its great volume of business and diversification of products, will be staffed by five vice-presidents, whose duties will be along functional lines. These vice-presidents are: Mr. Lang, in charge of defense activities and also continuing as manager of apparatus sales; Mr. Prince, in charge of application engineering, Apparatus Department; Earl O. Shreve, in

(Continued on Page 3)

Suggestions Show Big Increase For The Third Quarter

The amount of awards paid employees in all works of the Company under the Suggestion System for the third quarter of the year comprising the months of July, August and September was 36 per cent higher than for the corresponding three months of 1940. During this period $23,695 was paid out for adopted suggestions as contrasted with $17,476 paid out in 1940.

There was an increase of 37 per cent in the number of suggestions submitted by employees with 10,852 ideas turned in as against 7,923 for 1940. The number of suggestions adopted was 3,098 or 20 per cent more than in 1940 when 2,574 were accepted by the various Suggestion System Committees.

Elex "Call To Colors" Party Monday Evening

The November Elex party, titled "Call of the Colors" will be held on November 3 at the G-E Club with dinner at 5 o'clock. The program will include a concert by the Elmhurst High School band with baton twirlers as a special feature. The entire program will be of a patriotic nature, with a tableau as a finale, featuring Dorothy Franke.

Attractive table decorations in keeping with the patriotic nature of the affair are planned.

The party promises to be one of the outstanding club affairs of the year.

Free Movies Open At G-E Club Sunday

The annual series of free motion picture programs will open at the G-E Club next Sunday afternoon. Programs will be at 2 and 4 o'clock and admittance will be by club membership cards.

The entertainment committee has announced that it has been fortunate in obtaining a far superior grade of pictures than usual for independent programs.

Change In Works News Staff

Mildred Gertz

Ruth Kaiser

With the transfer of Mildred Gertz to the new Supercharger Division, Ruth Kaiser has been named as Works News division editor in the General Purpose Fr. H.P. Motor Division to succeed Mrs. Gertz, who has served as division editor for the past year.

Former Employees Of Thirty-Five Years Ago Form Unique Association

An unusual organization, formed by women who worked here approximately thirty-five years ago, came into being last Monday evening when more than ninety of the former employees gathered at the West Creighton Church of Christ hall. The principal purpose of the club will be to renew old acquaintanceship and talk over the old days at "the Lights".

Officers elected for the new organization, most of whose members worked in the Meter Department are Eva Elder Stahn, president, and Ollie Lamboley Rabus, secretary-treasurer.

Chairman for the coming year is Blanche Rayle Bell, who is assisted by a committee composed of Carrie Haag Barve, Blanche Lamboley Reese, Jenny Kraus Schaefer, Eva Elder Stahn, Nellie Bloemker Emerson, Esther Crummett Spitler, Luella Kellerman Heckman, and Nellie Grimme Homeyer. Committee chairmen and their assistants are Olga Borchert Hanauer, Mary Shivers Monce, Hazel Donnell Safford, Pauline Heidbrink Nahrwold, Edith Kaade Dreyer, Lois Koppenhofer Dick, Frieda Horstmeyer Schaaf, Helen Luessenhop Shaver, Alma Boley Meyer, and Louise Boester Schafenacker.

An entertainment program following the meeting included musical numbers by daughters of members, including Dorothy Fortmeyer, Jerry Schaefer and Doris Siebold and recitations and readings by Pauline Solleman.

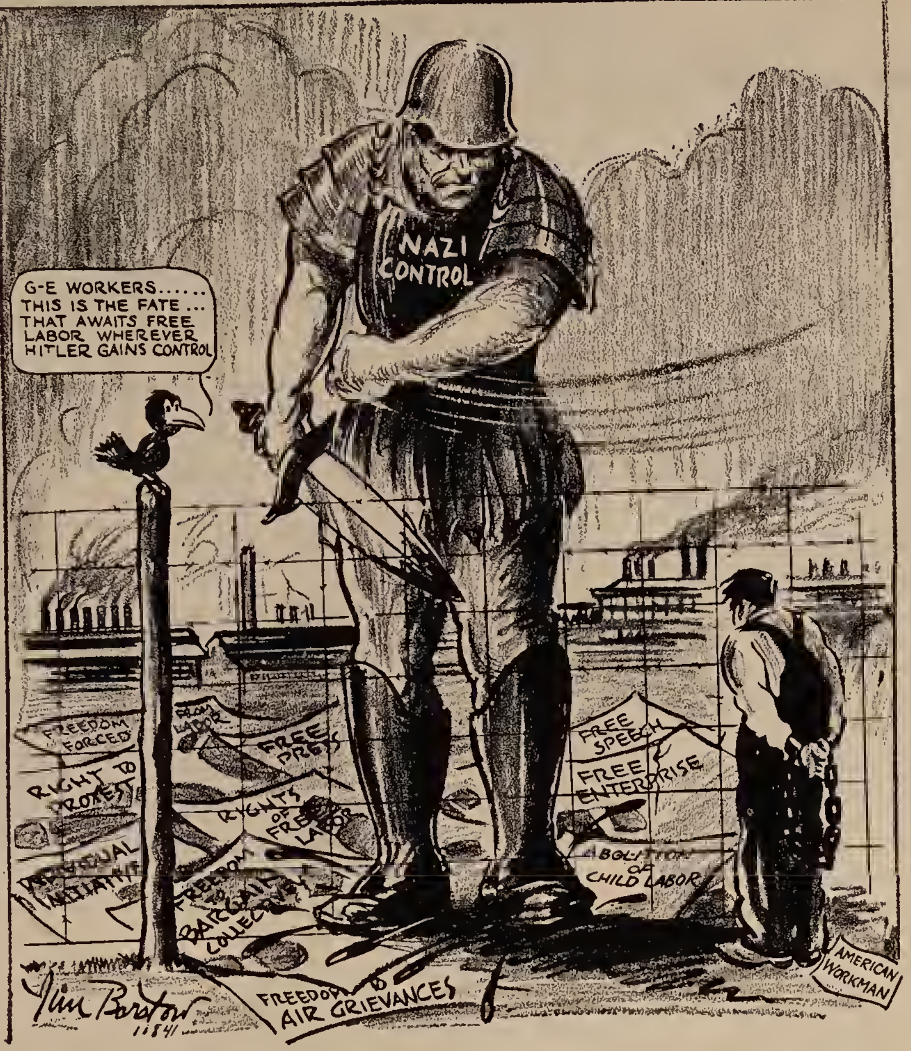
Interesting Article

(Continued from Page 1)

fected and made commercially available.

Emphasizing the future of fluorescent lighting Mr. King states, "The future of fluorescent lighting is very bright indeed. A recent editorial in a popular non-partisan electrical journal estimates that by the close of 1941 it will be a $250,000,000 industry—one that did not even exist three years ago. This is a baby to be proud of."

IT MUST NOT HAPPEN *HERE!*



Freedom of the press, freedom of speech, freedom of religion, freedom of assembly . . . all these are our birthright. No other land in all the world has all four. And there is a fifth freedom, so much a part of us that we don't often think about it . . . it is the freedom of a man to work for whom he wants to, where he wants to, and when he wants to. It is the freedom of labor. No other land in all the world today has five freedoms like these!

Consider what has happened in the fallen nations of Europe. Working men and women in these unfortunate lands are slaves in every sense of the word. They are slaves worse than the slaves of our own country before the Civil War. Worse because they once knew freedom, tasted its sweet fruit and have now been debased to the bitterness of lost hopes.

Consider what happened in Nazi Germany years before the war formally flared up into the worst human bonfire the world has ever seen. In that land, once the home of happy people, a brutal ruthless power took over the reins of government. IT SMACKED DOWN THE WORKING MAN FIRST. It told him whom to work for and where. It told his boss how much to pay him and told him how much to accept, neither to give more nor take less. It brought back child-labor, even forbade children from going to school above a certain age and permitted boys from 10 years old to go to work! It even made it a crime punishable by from two to eight months in jail for a worker to quit his job without permission of the government!

Is that the kind of thing we want? Do we want to exchange OUR FIVE FREEDOMS for that mess of bitter pottage?

No! WE DO NOT . . . and we are fighting now to hang on to what we have . . . come hell or high water!

NEWS FROM THE CAMPS

We publish herewith with great pleasure extracts of letters sent to us by G-E employees now in government service. Address all communications for this column to the WORKS NEWS editor.

Dear Editor:

As always I enjoy the Works News and want to inform you again of my new address. I always have enjoyed the Works News and sure would miss it if something were to happen that I wouldn't get it.

My new station is also an anti-aircraft battalion and is very much like the other ones I have been in. I am on the three-inch guns but not on the crew. I have been assigned to the height finder and find it to be very interesting. It will take lots of studying to know it well, but it does make the time go fast. Right now I haven't much time but will write later on and tell you the set-up of this place.

Again I want to thank you for the Works News and I will remain,

Sincerely yours,
PVT. RUSSELL FOX.
Btry. B. 423rd.
Sep. Coast Art. Bn. (A.A.)
Ft. Bliss, El Paso, Tex.

Dear Editor:

I received your letter of the 17th and was very glad indeed to receive the copy of the Works News. I would be very pleased to receive a copy of the News each week. I would like it. I have not only a brother and sister working there, but also several other relatives. Reading the Works News gives me quite a bit of enjoyment and takes up many a spare moment when I have nothing to do. I wish to thank you very much for sending it to me and hope you may see fit to continue to do so.

I am writing this story, or call it a letter, from Jefferson Barracks, St. Louis, Missouri. I am sitting on a foot-locker and writing on a comforter which is thrown across the foot-end of a regulation army cot. These cots are called, very affectionately, "sway-backs". They are not entirely unlike the hammocks used in the navy, in that they have the "sway" and definite sag in the middle. To get back on the subject. While I am writing, a fellow soldier, and incidentally, a fellow-employee of the Fort Wayne Works, is reclining very nonchalantly and very noticeably sloppy on his bunk. He is clad, to its entirety in his underclothing, namely, a G. I. (G. I. means General Issue)

(Continued on Page 7)

Five Fort Wayne Works Employees Are Granted Patents

Top row, left to right: H. L. Driftmeyer, Henry A. Smith and Wayne J. Morrill. Below, left: Robert T. Reardon and F. H. Fleischer.

Five Fort Wayne Works employees were granted patents during the month of October. They are H. L. Driftmeyer, Specialty Transformer Division; Wayne J. Morrill and F. H. Fleischer, Fr. H.P. Motor Engineering Division and Henry A. Smith and Robert T. Reardon, Works laboratory.

Three patents have been recorded in Mr. Driftmeyer's name. The latest relates to a device to wind a scroll core into a transformer coil in a rapid manner without physical distortion to the core, and maintaining the proper electrical properties. The device takes a pre-formed core and unwinds it into a large loop. The loops are then collapsed and wound tight, forming the exact shape held before assembly.

Mr. Fleischer's and Mr. Morrill's patent is issued jointly. It covers an improved type of vibrator motor for use in connection with electric razors. The motor makes use of two vibrating reeds moving simultaneously in opposite directions, and it is therefore free from such vibrations as would be transmitted to the hand. By inverting the vibrator from the position usually employed with such devices, the power is taken from the back end where advantages can be made of a favorable leverage to increase the force available for driving the cutter of an electric razor. In addition to being free from vibration, the device also operates with exceptional quietness.

Mr. Smith's patent was granted for an invention relating to insulated electrical conductors. It is concerned more particularly with electrical conductors provided with insulation comprising fibrous inorganic material (fiberglass, and the like) suitably combined with a synthetic linear condensation superoolyanide. This is the fourth patent taken in Mr. Smith's name.

Mr. Reardon's patent covers the invention related to improvements in magnetic tools through the utilization of high coercive force permanent magnet steels known as Alnico No. 1 to No. 5, inclusive. In the past somewhat similar tools were made of relative low coercive force steels and consequently had a large dimensional ratio that prevented their use in connection with small assembly jobs such as are found in the electrical industry. Such tools also were very sensitive to demagnetization as a result of aging, heating, vibration or when brought into an A. C. field. The new high coercive force inserts used for screw drivers, socket wrenches, holding fingers is resistant to all the former irregularity and is so much stronger that extremely small inserts will hold parts that formerly had to be so large they could not be used. Of particular interest is the fact that the steel can be polarized in any desirable direction to put all the available flux to work in holding a bolt, nut, rivet, or other steel part being assembled. Another valuable characteristic is the fact that tools can be used or packed adjacent to each other without danger of demagnetization, hence can be used in multiple assemblies, etc., such as might be found in cut-out switches, radio transformers, etc.

The above is the sixth U. S. patent issued to Mr. Reardon.

Vice-Presidents

(Continued from Page 1)

charge of commercial activities, Apparatus Department; Mr. Spicer, in charge of manufacturing, Apparatus Department; and Mr. Winne, in charge of design engineering, Apparatus Department.

Vice-President William R. Burrows, formerly in charge of general manufacturing operations, and Vice-President Roy C. Muir, formerly in charge of general engineering operations, will become members of the president's staff, carrying out assigned duties in these respective fields.

Following are brief biographies of the new vice-presidents:

Walter R. G. Baker

Mr. Baker is one of the country's pioneers in radio. After graduation from Union College in Schenectady, he joined General Electric's research laboratories in 1917, and in the following year his work with the new vacuum tube transmitters and receivers to meet requirements of the Army and Navy took him into the air and under the water. It included development and testing of radio apparatus for aircraft, submarines, captive balloons, torpedo boats, destroyers, and battleships. As the company's work in this field increased, a separate radio department was established and he was made designing engineer in charge of transmitters.

In 1924, this responsibility was enlarged to include design of all radio products, and in 1926, he was given complete charge of development, design and production.

On the formation of the RCA-Victor Corporation in 1929, Mr. Baker went to Camden to head its radio engineering activities. Within the year he was placed in charge of production and later became general manager of the RCA-Victor plant. In 1935 Mr. Baker returned to General Electric and became managing engineer of radio receiver activities in Bridgeport, Conn. In 1939 he became manager of the radio and television department.

David C. Prince

Mr. Prince, who is currently president of the American Institute of Electrical Engineers, was born in Springfield, Ill., February 5, 1891. He was graduated from the University of Illinois with a B. S. degree in electrical engineering in 1912 and an M. S. degree the next year. He joined General Electric in 1913, leaving the company from 1914 to 1919 to serve with the Public Utilities Commission of Illinois and as a first lieutenant in the Army Air Corps. In 1919 he began work with Dr. E. F. W. Alexanderson, G. E. radio pioneer, and in 1923 he was transferred to the research laboratory. He became research engineer of the switchgear department in Philadelphia in 1929 and in 1931 was named head of the engineering department. In 1940 he became manager of the commercial engineering department.

Mr. Prince has 78 patents to his credit, some of the more important of which involve electric ship propulsion, electrical switch apparatus, circuit breakers, rectifying systems, and protective means for mercury arc devices. His fundamental improvements in electronic tube circuit control have broadened the scope of resistance welding, vastly improving mass production of refrigerators, railway cars, and air-

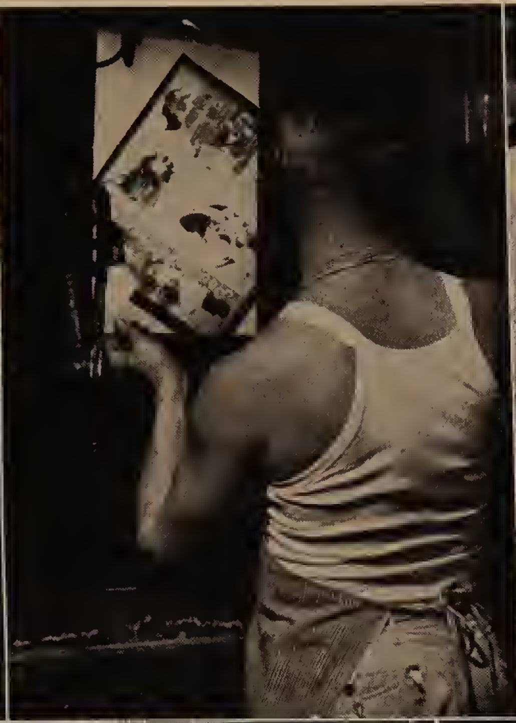
Summoned By Death

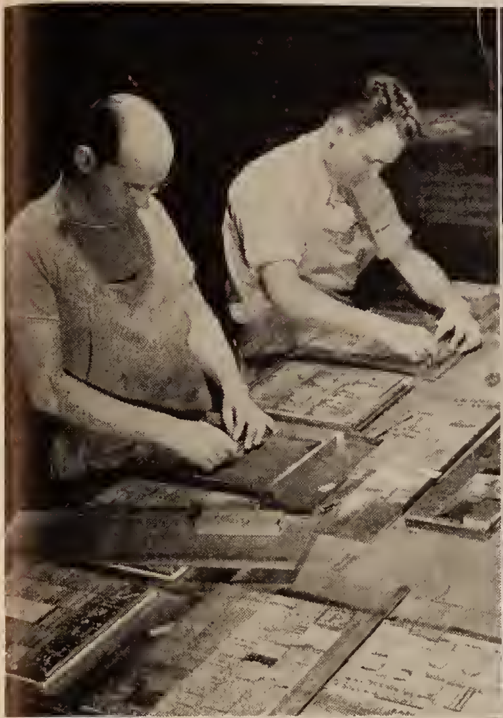
T. L. Wallace

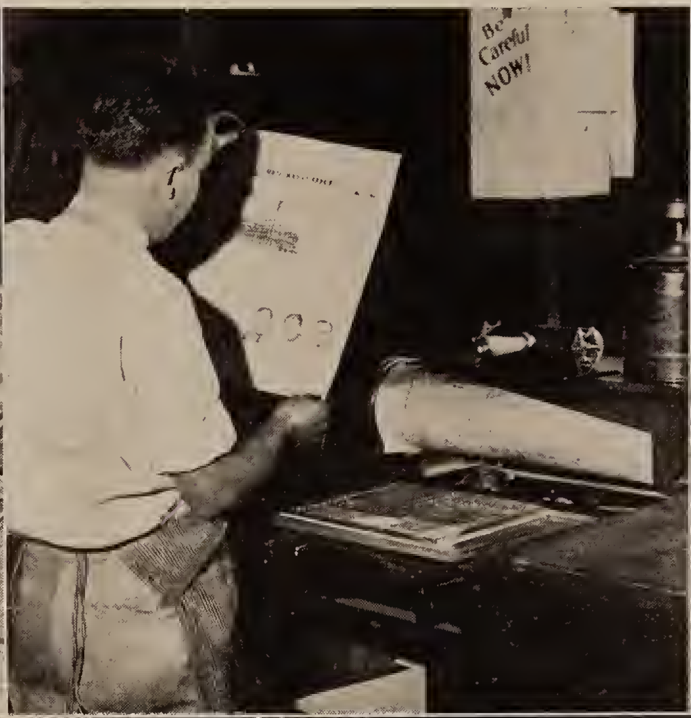
Thomas L. Wallace, who came to the Fort Wayne Works from Schenectady fifteen years ago, died unexpectedly Wednesday. Mr. Wallace, a mechanical engineer in the Motor-Generator Division, was active in employee projects and has held offices in the G-E Club, the M.B.A. and Credit Union. Funeral services were held this morning at Our Lady of Hope of Christians Catholic Church in Orange, N. J., with burial at Orange.

A Pictorial Review Of The Mechanical Processes

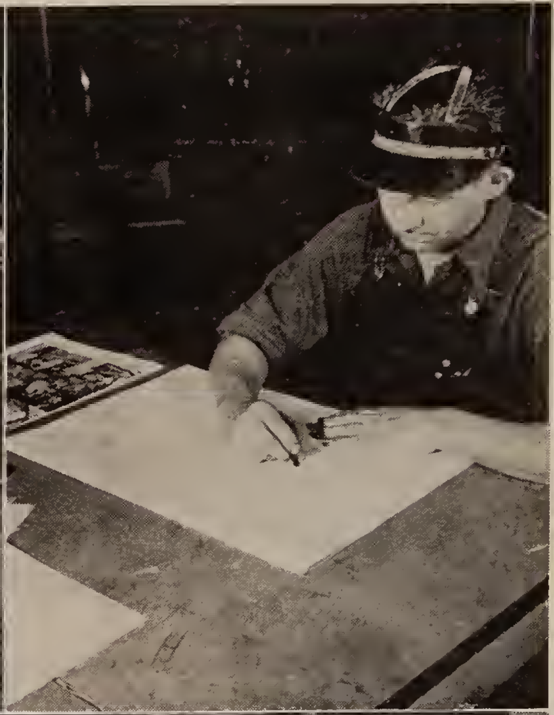


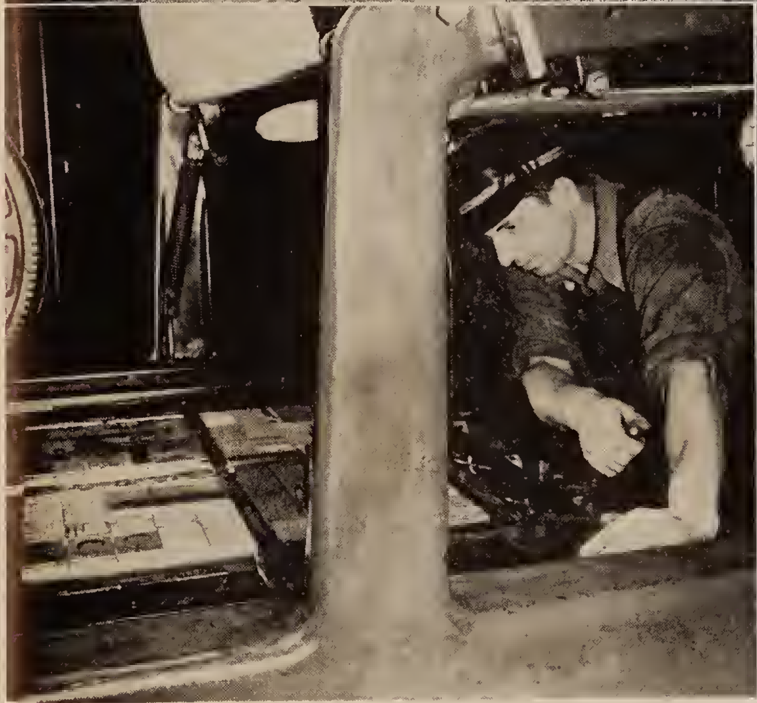
Followed In Publishing Your Works News

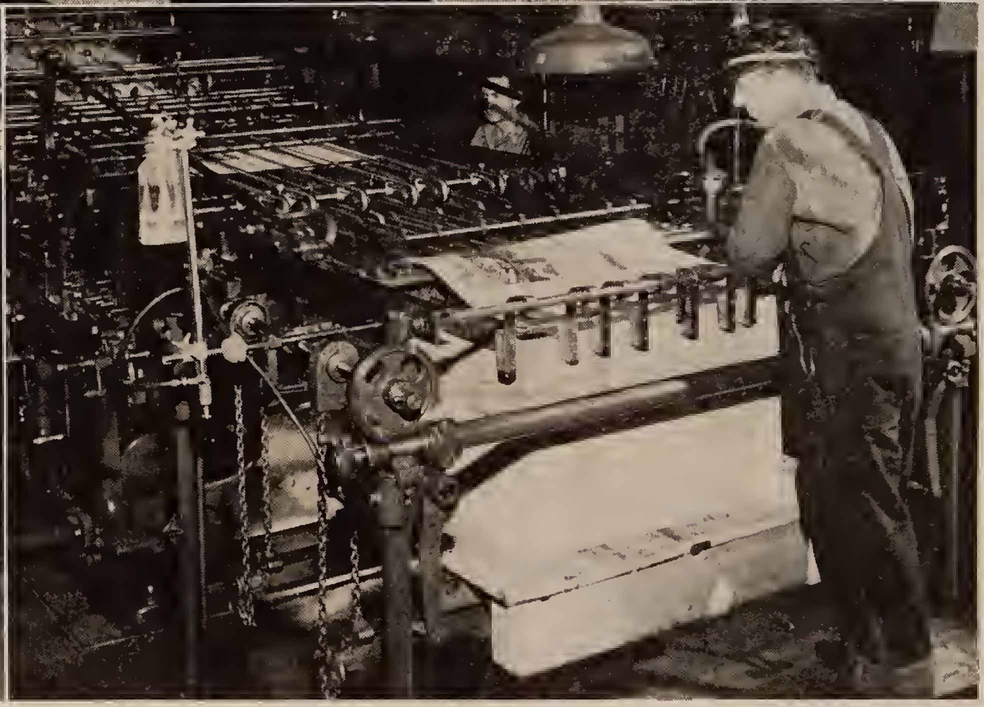




Be Careful NOW!







With the thought that some of our readers may be interested in the operations followed in publishing the WORKS NEWS each week, we are picturing some of the routine steps from the mechanical standpoint. We are confining our efforts to the mechanical angle because we can see no news value in pictures of the editor gazing off into space wondering where the news is coming from.

In the past few years pictures have become more and more the backbone of publications. If an item is published that Johnnie has the colic, nobody "gives a darn". But if the item is accompanied by a picture of a wistful Johnnie practically colicking his life away, but bravely smiling through it all, thousands of readers will rise up in arms for the succor of Johnnie.

And so we turn to the making of half-tones, commonly called "cuts". In the upper left picture on page 4 the engraver is making a negative of a picture to be published in the WORKS NEWS. The center picture shows the negative being developed, and the one on the right the negative being prepared for the printing.

In the second row left, the negative is being printed on the zinc plate, and center, it is being etched on the plate. To the right the plate is being proofed and, if found satisfactory, is ready for insertion in the NEWS. To make a plate covers a period of from four to five hours of skilled workmanship.

The "cuts" made, we turn to the reading matter. In the lower left, copy is being set into type on a linotype, one of the most intricate and remarkable machines ever produced. Although having a keyboard similar to a typewriter, the linotype operator has the disadvantage of a "no stop" system. As long as he keeps a finger on a key, the corresponding letter will continue to reproduce. Operating a machine is, therefore, entirely a matter of knowing or feeling the right touch. Each letter is cast by an individual mould which, after performing its job, is automatically returned to the proper slide for re-use.

The type is cast into proper width lines on the linotype and the complete articles are placed on galleys for corrections—in other words to eliminate the famous typographical errors that are the refuge of all editors. In the lower center picture such corrections are being made on a galley of type. Needless to say, none of the errors being corrected were the fault of the author.

A few heads or introductions to articles are set on the linotype but the majority are set by hand or with a machine called a Ludlow. In the lower right picture heads are being cast on the Ludlow machine.

After corrections are made and heads set, the paper is "made up"—that is, the galley type is set in page form and locked ready for the press, as shown in the upper left hand picture on this page.

The page proofs are then made for final inspection as shown in the upper center picture and, if approved, the forms are ready for the printer.

One of the first jobs of the printer is to "make ready", that is, by printing a sample sheet on the press to determine the low spots in the form and to bring them to a uniform level. This is done by pasting tissue paper on the bottoms of cuts and tissue paper outlines on the roller of the press. Requiring the highest skill and exactitude this operation consumes a considerable period of time. The operation is shown in the upper right picture.

Satisfied that his "make ready" will give the best possible reproductions, the printer is ready to lock the forms in the press bed (lower left)—a happy operation for most editors, for "putting the baby to bed" means finis for that particular edition to most editors. Of course, some editors are foolish enough to worry that something that should not have been printed found its way into the paper and that things that should have been printed failed to find their way in—but that is a minor detail. After all, when the presses start rolling (lower right), it is too late to do anything about it anyway.

Add News Broadcasts In Czech To WGEO

Expanding further its program of supplying to the war-torn nations of Europe unbiased news of the world, WGEO, powerful General Electric short-wave station in Schenectady, has added to its schedule of foreign-language news broadcasts 15 minutes of news in Czech six days a week.

The broadcasts, based on news of the world as it comes through the regular news channels, are strictly factual, and are translated and delivered by a native Czechoslovakian announcer, now a citizen of this country. Sent out over WGEO's European beam on 9530 kilocycles (31.48 meters), the programs are scheduled at 11:45 p.m., EST, Sunday through Friday, which in Czechoslovakia is 6:45 a.m., Monday through Saturday.

✤ NEWS THROUGH THE PLANTS ✤

Motor Generator Static

Cellar-bration

"A bunch of the boys were whooping it up—" remember that line from "The Shooting of Dan McGrew?" That celebration was mild compared with the Planning Group's binge in Jack Toole's basement. Ham, white man's cheese, over-ripe limburger, pretzels, potato chips, peanuts, onions, baked beans, pickles, pop and two eight-gallon kegs of "malted milk". Rogers came early. Tiddly-winks, euchre, pinochle, checkers, poker and darts, candid camera shots, got enough on some of those birds to hang them, the boss and several of our dignified co-workers on hands and knees playing tiddly-winks—looked like a bunch of Moslems at prayer hour—"Allah" same, some fun. Rogers drinks pop and plays checkers. Toole and Shultz take in the money. "Mack" disseminates information on "what is a metallurgist?" Wagner puts on a dance—boys sing "Sweet Adeline". Shidler collects burned out flash bulbs—just a "bulb snatcher". Metrailer wins much "geld" at poker. Rogers drinks a "malted", plays poker, sign says "Duck". Fisher does not believe in signs—too bad! Bill Hale crashes in. Frye calls for bar towel. Michel tosses a mean dart. Rogers drinks more "malteds", throws more darts, can't hit target—we don't understand why. Histed drinks all the grape pop. Rogers has another "malted", goes home. Most of the boys get home before breakfast — wotta head—speaking of that limburger, confidentially, "it stinks." Some cellar-bration.

Wanted to Buy

Anyone having a pair of tan button shoes, size 11, that they wish to dispose of, get in touch with George Gunther, Bldg. 19-3. George spent all day Saturday looking for a pair in our local stores, and was heartbroken when informed that button shoes passed with the horse and buggy. Our hero insists that shoe laces, zippers and automobiles are fads and will never last. He further states that we will still be buttoning things when these other items are forgotten.

Thanks, Pal

Old Poison Pen received a swell congratulatory letter following his anniversary number in the "News" from one of his old chums and a former writer of the Apparatus Division, no less a person than the famous "Uncle McWell". It is indeed a compliment when a literary genius, a master of the written word, such as "Uncle McWell", sees fit to recognize one's poor efforts and, in all sincerity, Poison Pen says "Thanks, Pal, a million!"

She Gets the Bird

When Helen Kelsey departed for the west, she was presented with a going away gift by the girls of the section. The gift was a beautiful red hat, decorated by four, yes, I said FOUR cute little birds. It's bad enough when a person gets the bird once, but four times in one day is heaping it on pretty heavy. However, a bird in the hat gathers no moss, or something to that effect!

Remember

When the children presented George Momper and his wife with presents Sunday, he was at a loss to explain the why and wherefore of these gifts. Then suddenly an explanation flashed through his mind. Monday, October 27, was their sixteenth wedding anniversary and the children were presenting gifts while the family enjoyed a day together. Reminisces George "Yes sir, 16 years ago there was eight inches of snow when we went to Chicago." I don't remember—do you?

A Man

On October the 27th, Bob Beyer departed from that stage of childish blissfulness and assumed the full responsibilities of manhood. Yes, "Our Hero" had his 21st birthday and passed candy to celebrate the occasion. While it distresses us to see children pass that period of adolescence, we all join in wishing Bob many happy birthdays and may they never raise the poll tax! Sez Bob—"Today I yamma man".

Something Fishy

When "Mike" Sorgen received a Christmas greeting last year signed "Minnie the Mermaid", he decided it looked fishy. Later he discovered that Miriam (Minnie) Lemke was the one who sent it to him and his mind was at ease. However, the other day Miriam (or is it Minnie?) paid Mike a business call and when she departed so did the card which he had placed in a desk drawer. Now Mike says "The whole thing looks fishy again". He wonders if he will receive the same card this year. Time will tell, my boy, time will tell!

Ain't It the Truth?

When Mary Lauer, "The Mighty Atom" of the Cost Department, visited a local riding academy to rent a horse for her Sunday afternoon canter, the owner took one look at her and led out "the cutest little colt". Was our heroine "boined up"—sez she "The idea of offering a little thing like that to a fully grown lady—it's disgusting!" Ain't it the truth?

Sure Is

Ray Moore returned home from a business trip East, reported things are all right, business good, "girl shows" same as usual (he remarks in his most philosophical manner, "When you see one, you see all"), didn't sleep well on the sleeper, spent most of the night trying to get into that little hammock and finally had to sleep on the bunk underneath, went to the "Planning Group" party the next evening. What a life!

Swell Idea

When "Bertie" Bultemeyer was inducted into a local sorority last Monday evening, the initiatory program included a window shopping tour of the downtown business district. This, in itself, was not so bad, but the fact that, on this tour, Bertie had to wear a long flannel night gown added color and novelty to the occasion. Now you folks may laugh, but I feel the girl has something there. Just picture the convenience of such raiment; you get up in the morning, slip on your shoes, wash your neck and ears and away to work; home in the evening, wash your neck and ears again, out for the evening; home again, off with your shoes and into bed, and so on. Think of the labor saving, the efficiency of Bertie's mode of dress. Think of the precious moments lost zipping this, snapping that, lacing or buttoning something else.

Swell idea, we sez.

Saying of the Week

Jerry Frye remarks "They say money talks, but it makes a heap of difference whether it says 'Hello' or 'Goodbye'."

The Buzzards

Wanted: One job, with a little overtime, in a harem. Have good references. Telephone 400, Gene Roesener.

His First Catch

No wonder George Henschen, Bldg. 20-2, pictured right, above, wears a broad smile. His first fishing trip, made in the company of Keith Wolf and Abe Martin, Bldg. 20-2, resulted in the catch of a 3½ pound bass, left, above. The other two members of the group report "no dice."

Last week there was a sign between Mannan and Moore, "Silence, genius at work". You guys can't fool the Buzzards, we know that noise you make is nothing but good snoring "In Harmony".

Frank Redmond keeps his watch in perfect running order. It's correct to the last second. When it's time to leave, the boys watch Frank and not the clock.

Jack Skevington is putting out a challenge. His row against any other row in the Bldg. 19-3 Drafting room. He has four fellows above the 170 mark and one beginner (Fuller). Bushong will take the challenge if he can use 6 men. He claims Welch is a handicap. Bushong's high man is "Cannonball" A. R. Hay.

Advice to the LOVE WORN is given out by Betty Wagner. So far she has worked only in the Navy Section.

Herman Hake, Bldg. 4-3, finally has received his Bob Hope book, which he will gladly loan to any one interested in reading it.

« «It's a Joke» »

A swanky chap applied at the recruiting office to enlist. "I suppose you want a commission," said the officer. "No, thanks," was the reply. "I'm such a poor shot that I'd rather work on straight salary."

The visitor paid his green fee, fixed up a match, and went out to the first tee. Taking his stance, he gave a wild swing and missed completely.

"By Jove!" he said to his opponent. "It's a good thing I found out early in the game this course is at least two inches lower than the one I usually play on."

"Did you hear about George drinking sulphuric acid by mistake?"

"Did it hurt him?"

"Not much. He said the only thing that bothered him was that it makes holes in his handkerchief every time he blows his nose."

Sleuthing In 4-6

To Joe Gardt goes the prize for the snappy come-back of the week. He was overheard in the following conversation with Henry Marahrens:

Henry: "Are you in the draft?"

Joe: "Not as long as you keep your mouth shut."

On Monday noon, while waiting for the elevator, Jeanne Nail remarked, "I hope we will be able to get a seat on the elevator." Hope she was successful, but it is rather doubtful. . . . We're wondering why Rosemary Pond returned one day late, from her vacation down South. Could it be that she acquired that slow, southern stride in so short a time—or did she find the South just too, too irresistible? . . . We've heard about the punishment a woman will take for the sake of vanity, but has anybody mentioned the hardships a fisherman will suffer for the sake of a "catch"? Paul Berghorn, Harold Sherbondy, Ernest Spaulding, and Charles Koomjohn drove over 200 miles to George Reker's cottage, just to catch one fish. Oh well, one fish is better than none—or is it? . . . Quiz of the week: When is an Irishman not an Irishman? Answer: When the name is O'Connor. For further details, see Katie O'Connor. . . . We see almost constant changes in Bldg. 4-6 lately. Nearly every week we say good-bye to one or more of our old friends, and just as frequently we see new faces among us. Ralph Woodie is leaving us for River Works, and Bill Muir and Bud Brant are leaving for the Army. Our best wishes to all of you, and a welcome to Melba Hanauer, Betty Weibel, Cliff Long, and Andy Keefer, who have come to join our Bldg. 4-6 "family."

Thisa And Thata 19-5

Sarah Chelf entertained a group of girls in her new home Friday night. She has one of those picture kitchens—the kind you dream of but never see. Lunch was served in the recreation room down stairs. Going down the corn-shock lined steps you could see at the bottom a big black cat—peering out at you from the darkness were dangling skeletons and weird lighted faces. Games were played throughout the evening and prizes won by Connie Zollinger, Viva Healey, Ruth Rosenberry, and Helen Engle. The hostess was presented with a beautiful white table lamp from Avinell Gailey, Ruth Harsch, Sue Thompson, Helen Weimer, Annabelle Dunlap, Margaret Haner, and Ruth Rosenberry, and the Misses Healey, Zollinger, and Engle . . . It always seems to me that whenever a fellow attempts to raise a mustache he is either trying to appear older or wanting to show "Today He Is a Man"—whatever the cause may be, the girls are going to buy an eyebrow pencil for Al "Blondie" Hertle. He claims it was just the 4 o'clock shadow! . . . Margaret Whitmer Smith was presented with an iron and a waffle iron and sandwich toaster combination from the group in white-armature. Here's wishing you a lot of happiness.

Maxine Marriotte, Marcille Passe, and Margaret Niblick, Bldg. 4-3, are so interested in their knitting that they wear the things they have already made as a dress ornament, to work.

Frank Martin of the Plant Protection Dept. has gone into railroading. He is showing his wife, nightly, how to operate toy electric trains at home.

Uncle McWell

With our editor's permission, we should like to return to the good graces of the Works News, hoping that our weekly stint of observations and comment will not be too far amiss to warrant at least a short glance, and the editor's indulgence.

And while we are aware that we are no "Sandy Says", or "In the Rough" with Walter Sunier, or "Poison Pen" out of Motor-Generator, we do have the chance of improvement—it's still a free country.

We sure would like to say something here now that would convulse our reading public (Hi, Mom!) with laughter, and keep them coming back for more punishment—but we've been seized with writer's cramp, and can't thing of anything funnier than:

First Tough—"Boy, oh, boy, do you look terrible run down!"

Second Ditto—"Oh, Yeah! Ya oughta see the taxi that done it!"

We'll go quietly!

TRUTH IS STRANGER THAN—

Dr. W. Reid Blair, director of the New York Zoological Park, advances the interesting theory that the more intelligent animals think in the same sense that man does, and talk among themselves. He says, "When animals are communicating with their own kind, it is possible that they are using some method that was available to man *in an earlier stage of development*, but which he has lost since he developed the power of speech."

We are sure that Dr. Blair will be highly pleased to learn that we have unearthed a specimen of man, Lloyd McNamara of the Transformer Cost Dept., who, undoubtedly, perfectly typifies the "earlier stage of development", referred to above—and in addition, has learned to talk, almost like other humans. From long and careful observation of Mr. McNamara, hereinafter referred to as Exhibit A, we have concluded that his daily murdering of the King's English is actually incidental to his real mode of communication—the same as was once used by pre-civilized man. Exhibit A has been known to sit at his desk in the corner, for hours on end, mumbling to himself in a strange tongue and occasionally uttering low, weird, guttural growls.

Wire - Insulation

Who was the hillbilly of Bldg. 8 who kept half of the crowd in convulsions in the stadium of Notre Dame last Saturday?

Banana Conrad, former wizard of Bldg. 8 should buy non-slip bananas for his next football skirmish.

Harold Hegerfeld, Bldg. 8-1, has a "no smoking" sign above his new bed since he burned up the old one with a ciggy.

Each Saturday A.M. Dorothy B. can be seen horseback riding. She sure cuts a queenly figure on the old gray mare.

Art G. is really a good looking fellow after a shave.

Harry P., Bldg. 8-1, is Mr. Kessler still staying at your house? If so, we would like to come over for a party.

Lloyd C., the best dressed man in Bldg. 2-E.

"See that bevy of quail in the underbrush?"

"Yes."

"Well, watch me shoot a hole clear through the red barn behind 'em."

CANDID CAMERA CAPTURES

BUILD
FOR
DEFENSE

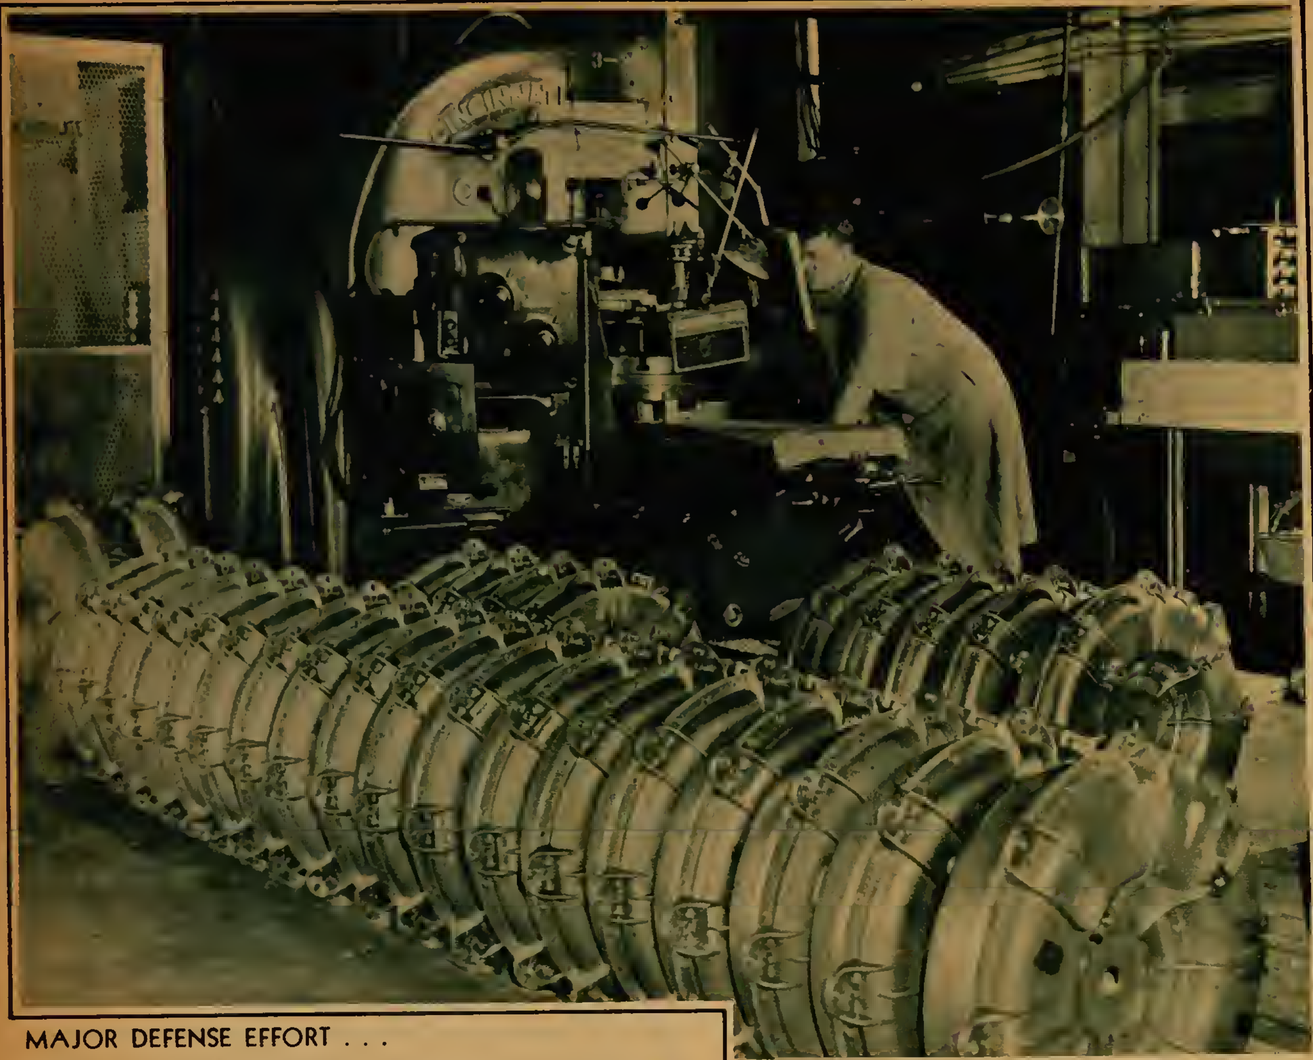
VOL. 6 October 31, 1941 NO. 10

WITH THE SKIES AFLAME

from the lights of U.S. Army 60-inch searchlights spreading more than 2,500,000 candlepower in a brilliant display, one of General Electric's newest and biggest national defense buildings was dedicated October 3. The new building is seen as the central object in the immediate foreground.

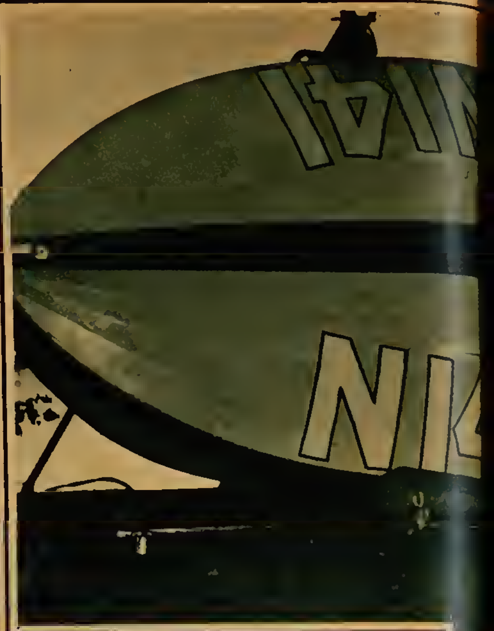
DEFENSE . . . Our Answer To Tyranny ! ! !

WORKS NEWS CANDID CAMERA CAPTURES



MAJOR DEFENSE EFFORT . . .

Speed up supercharger production—To meet the needs of Uncle Sam's fighting air forces, General Electric is turning out hundreds of turbosuperchargers, or airplane oxygen boosters, every week. Two additional plants for the exclusive manufacture of these superchargers are being built by General Electric, which will add more than 500,000 square feet of additional floor space.



SKILLED OUTBOARD CHAMP . . .

is John Schoolcraft, 20, of the machine repair gang in Schenectady Works. John has two of these "flying chips," a score or so of trophies, and the Canadian Amateur Outboard Championship to his credit. His home is along the Mohawk River, with 10 miles between locks to practice on. Here is John and his dog, "Sir."

●

SMART LOOKING GIRLS . . .

are these members of Bridgeport's Pioneer Products section, wearing their new blue smocks. Seated, left to right, are: Helen Jackowicz, Tessie Rojelsky and Fedela Grasso. Standing: Irene DeRoche, Margaret Hudak, Cecelia Rog, Laura Viscecchia, Josephine DeMoro, Ann Macura, Lorraine May and Marcia Geisler.

SAFETY AND GOGGLES . . .

go hand in hand, or should we say eye and eye. Here George E. Sanford, Schenectady, chairman of general safety committee, watches Dominic Massaro and Matthew Scannapieco properly protected in Philadelphia Works.

Vice-Presidents

(Continued from Page 3)

planes. His contributions in the field of circuit breakers enabled the building of the superspeed breakers at Boulder Dam, the highest voltage and fastest breakers in the world.

Chester H. Lang

A native of Erie, Pa., and a graduate of the University of Michigan, Mr. Lang joined the General Electric Company in 1919 as a traveling auditor after service as a first lieutenant in the field artillery overseas with the 35th Division. In 1922 he was made assistant manager of the Publicity Department. He served as comptroller of the budget from 1926 to 1932 when he became advertising manager and manager of radio broadcasting.

Mr. Lang served for two years as president of the Advertising Federation of America and later as chairman of its board.

In April, 1940, Mr. Lang was made apparatus sales manager and shortly afterwards was also named chairman of General Electric's defense co-ordinating committee.

Elmer D. Spicer

Mr. Spicer is a native of Wellsville, N. Y., and was graduated from Cornell University in 1912 with the degree of mechanical engineer. Before joining General Electric in 1924, he was chief engineer and factory manager of the Kerr Turbine Company of Wellsville. He served first on the staff of G. E.'s Manufacturing General Department and later on the staff of the superintendent of the Schenectady Works. In March, 1925, he was placed in charge of the insulator and carbon brush department. A year later he was named superintendent of the radio department.

In August, 1927, soon after the Company began the manufacture of refrigerators, he was made superintendent of the refrigerator department where he remained until August, 1929, when he was appointed assistant works manager in Schenectady. On October 1, 1934, he became Schenectady Works Manager, a position he held until May, 1941, when he was named assistant to the vice-president in charge of general manufacturing operations.

Harry A. Winne

Mr. Winne, a native of Cherry Valley, N. Y., was graduated from Syracuse University in 1910, and immediately joined General Electric as a student engineer in the testing department. In 1911, he became head of the large motor, generator, and synchronous converter test, and about a year later was made assistant general night foreman of the testing department. In 1916, he was promoted to the power and mining engineering department, and there worked on problems concerned with industrial heating, arc welding, and electric furnace equipment. He was transferred to the industrial engineering department's steel mill section in 1922 and became head of that section in 1930. In 1936, he was appointed manager of sales of the combined mining and steel mill section, the position he occupied until April, 1937, when he was named assistant to the vice-president in charge of general engineering operations.

Idea Brings $200 Suggestion Award

Left to right: R. M. Hartigan, superintendent of the Motor-Generator Division, Elmer N. Yordy and N. G. Prince, general foreman inspecting changes made through Mr. Yordy's suggestion which resulted in a $200 award.

An idea that helped to eliminate delays, reduced the number of improperly made armature coils, and provided better formed coils, making winding easier and resulting in a better product brought a suggestion award of $200 to Elmer N. Yordy, Bldg. 19-2.

Mr. Yordy's suggestion covered simplified adjustable armature lead formers which eliminated making permanent finger for each different job. He has had five awards adopted previous to the one described above.

News From The Camps

(Continued from Page 2)

undershirt, a pair of very loud, blue and white undershorts, and a pair of G. I. wool stockings. This dress is very formal at this hour, the general run of dress being shorts without shirt or socks, or nothing at all. The reason for this is the lack of reasonable weather here at J. B. You see, it rains here nearly every day. I almost forgot, the fellow employee and, at present, soldier, is none other than Private Verlin Smith, formerly of the Carpenter Shop, Bldg. 10-1. He is the proud possessor of the only civilian motorcycle and side-car outfit here at J. B. That is something, take it from me. Well, I think it's about time to include myself in this epistle, don't you? The food here is fair. The boys here have some very interesting names for some of the dishes served here, but these titles are of such nature that I am prohibited not only from writing them on ordinary paper but also from writing them to ladies and gentlemen. The U.S.O. and other commendable organizations here in St. Louis are really doing fine work in their efforts to entertain the soldiers. We are privileged to view at least one vaudeville performance of great quality every week and quite frequently to see more than that quota.

We are very fortunate in that we have dances held here on the post every night. There is a large open-air dance pavilion and it is usually well crowded. The girls come out from St. Louis in special busses and are fairly good dancers on an average. We have a bowling alley, three theaters, a pool room, tennis and badminton courts, a football field, two dance halls, a baseball field (as well as all the equipment needed), several places where the soldiers can sit and drink 5 per cent beer or any soft drink that he may so desire. These are the forms of recreation that we may enjoy on the post itself. There is, of course, the city of St. Louis, with all its form of enjoyment and hell-raising in general. The soldier can reach the city in about 10 minutes by bus, which comes right to the center of the post; this service costs the soldier only 10 cents each way, in and out. The post here has its own radio station and newspaper, which keep the soldier well informed on the subjects and life that has enveloped him like a cloud of grasshoppers on a field of Iowa corn. J. B. has its own football team and just last Sunday defeated a very formidable opponent, Fort Riley, Kansas, to the tune of 13-6. The army life at J. B. is very ceremonious. Every man, not on K. P., detail or sick-call is required to stand "Retreat" at 4:30 on the days on which it is held. This ceremony is very impressive and awe-inspiring. Imagine thousands of soldiers clad in snappy formal uniforms marching in review led by the Post band, color guard and riot squad wearing steel helmets and under arms. It is very, very impressive. The formations are first lined up and, at a command from the commanding officer, all either give the hand salute or present arms in unison as the flag is lowered. Following this procedure the columns pass by the reviewing stand all marching twelve abreast and all in step, presumably. Following this we are all marched back to our headquarters and dismissed. Immediately after dismissal there follows a general melee and mad rushing for "chow" line. After chow we all retire to our barracks to finish a long day by writing letters or other menial tasks which are necessary to comfort.

Then comes 9 o'clock and the call "lights out", thus ending another day. This is my cue, also. So-long. (I formerly worked in Plastics, Bldg. 12-1, under Johnny Sowers.)

Yours very truly,

PVT. DUANE H. DUFF.

Flight 1026 School Squadron,
Jefferson Barracks, Mo.

"House Of Magic"

(Continued from Page 1)

ates seemingly mysterious effects. A "kidnap detector" is used to demonstrate this method. Whenever a body approaches the "baby," a bell rings and so it is impossible to steal the baby without setting off an alarm.

Humidity control is demonstrated with a light which can be turned on by blowing a moist breath or turned off by blowing a dry breath, making it possible to "blow out" an electric lamp just as a candle flame is blown out.

With the aid of the electric eye, a variety of novel demonstrations are given to show how light can control electric current. An electric lamp is turned on by striking a match. An electric eye attached to a loudspeaker makes it possible to "hear" light, and changes in light are heard as changes in sound. In combination with a special lamp, music is sent across the room on a beam of light and heard at the opposite side of the room. This experiment of carrying the human voice or music on a beam of light has been performed in Schenectady for a distance of more than 25 miles, and also from an airship to the earth and from a moving train to a station platform.

The control of electric current by light through the use of the phototube or electric eye is gaining an increasingly wide use to perform all kinds of functions, such as automatically turning on the lights of an airfield as darkness approaches, controlling the operation of printing presses, opening doors, and many others.

SCIENCE FORUM

by L. A. Hawkins

Q. When metals are magnetized, how long a time can they keep their charge?

A. That depends on the kind of material. Soft iron, for example, can be magnetized by subjecting it to a magnetic field, and it will lose its magnetism almost immediately when the field is removed. If the iron is hardened by quenching it from a high temperature, internal strains are set up and it will retain its magnetism much better. In fact, this was the way the first permanent magnets were made. It has been found that iron alloyed with one or more metals such as aluminum, nickel and cobalt will have a much higher retentivity and will retain its magnetism almost indefinitely. One such magnet material is known as Alnico.

Q. What happens to turtles during the winter?

A. They hibernate. In the fall of the year they go downhill toward water, and for the winter they dig themselves in at the bottom of the lakes and streams. In the spring, along about April 7, the turtles dig themselves out after their long sleep and travel in an uphill direction.

Q. How much thinner can an automobile engine's gasoline mixture be when traveling under a light load than when under a heavy load?

A. In general, the amount of gasoline used is directly proportional to the load at a given speed. For example, in going up a hill when the speed is constant, the engine will be under a greater load and will use more gasoline than when traveling along the level at the same speed.

Q. If an electric refrigerator preserves foods by taking the heat out of them in the summer, why does it not keep them from freezing in the winter?

A. An electric refrigerator is a one-way heat pump. It pumps heat from the inside of the box to the outside. Pumping is necessary only when the temperature of the inside is lower than the ambient temperature outside the box. This is the condition existing in the summer. Now, if the box happens to be where it is cold in the winter, the temperature outside the box will be lower than the temperature inside, so that heat will naturally flow out of the box without having to be pumped. This will keep on until the temperature inside and outside are equal. This will not keep foods from freezing in the winter when it is cold.

26-5 Tool Bits

It is suggested that the next time F. Hoffman shaves Otto Bachman that he shave both sides of his face. Did you get tired, Frank, or couldn't Otto stand any more.

J. Franke should start wearing skirts if he wants to quit at 4:55.

Earl Lenz spent the week-end at Sandusky, Ohio, again, same route, same lay-off early, so as to arrive for supper.

H. Wittber spent a quiet week-end at home.

Walter Elliot's claim to distinction as a corn husker was quietly settled when Rufus Niblick came out with the retort: "Shoot! My dad, 82 years old, can shuck you down in an hour.

We all know H. Breidenstein enjoys his early morning walks through Foster Park, but why the walk back, Herman?

What young lady wished she still owned her "Crosley auto," when it comes to parking? By the way, Irma, I hear the garage has a special can of paint saved for your car.

Ross Cohagan has his ups and downs on the filing machine but he was moved horizontal recently when someone tagged him coming out of the parking lot. Did you find that driver's license, Ross?

Is Zat So?

The main topic of conversation in Bldg. 17-1 this last week was the party given last Friday night at the home of Russell Gibson in honor of the newly-wed, Bill Hanley. Here are a few of the high-lights: Art Conrad was afraid to leave his car standing on the street because of Halloween pranksters, so he put it in a downtown garage and then proceeded to the corner of Calhoun and Wayne street to catch a South Calhoun street car. After waiting for twenty-five minutes, Art gave up in disgust and hailed a taxi. When he arrived at the party, he was informed that we now have a bus line on South Calhoun street that turns east at Washington Boulevard. You should come to the city more often, Art, and get acquainted. . . . Jack Leonard was unable to attend the party because of the illness of his Aunt Mary but he kept telephoning to see how the party was progressing. We hope your Aunt Mary is well on the road to recovery, Jack! . . . The new Mrs. William Hanley made her entrance with the able assistance of Claude Kelly at the piano playing "Here Comes the Bride." . . . Friday was also the ....th birthday of George Mosshammer. We are wondering if he will still be a bachelor on his next birthday! . . . Loyal Decker seemed to have a lapse of memory while he was introducing "Herbie" Habig to the gang. It was with difficulty that Loyal finally recalled the last names of his co-workers. Loyal says that if you think it's so easy, just try it yourself sometime! . . . Henry Gollmer and Henry Wichern just couldn't seem to keep up with the high-class card playing of Harry Kessler. Better luck next time, boys! . . . The gang was glad to have our supervisor, Bill Franke, join so whole-heartedly in the fun! . . . Mr. and Mrs. Gibson were such wonderful hosts that it was with a feeling of regret that we realized that it was time for us to go home. After wishing Mr. and Mrs. Hanley a long and happy married life the party finally broke up so that "Burney" Gausepohl got home in time to bring in the morning's milk!

Now for the more serious side of our gang. . . . We were happy to see Mabel Lieberenz and "Wally" McKay return to work after their recent illness. We were just beginning to get acquainted with the new inspector, Mary Gray, and now we hear that she met with an accident on the way home from work recently. We hope that you will soon be back with us, Mary.

Till next week, I'll remain, I hope,

The Question Mark.

Gossip From 19-5

Rebecca Youse, Bldg. 19-5, gets her leads oven fresh now—just like Chase & Sanborn . . . Helen Meese things it's fun to make up—less "Pancake makeup" . . . Mary Cowan says when it comes to "making up" to the boys, a baby knows better . . . Violet Monroe passed the candy. Is it wedding bells, birthday, or what? . . . Since Louise Boehm has taken up yodeling, the girls in the Golden West haven't a chance . . . Dwight Williams invited all the girls in the Field Dept. out to his house for Halloween. What are we going to get, Dwight? . . . Mildred Mitchell and Roy Ellingwood were married Friday evening at the Emmaus Lutheran Church. Congratulations and best wishes!

They Must Be Pals

We would say off-hand, judging from the picture above, that Al Gerber and Paul Monroe, Bldg. 4-1, must be pals. It also appears from the nature of the picture that Al and Paul took in a street fair.

News On The Nose 4-5

We're feeling very lonely these days after losing over 40 of our fellow workers to the Bldg. 4-6 office—but we still have Andy Lee—some consolation. . . . Which reminds us of the little conversation Frenchy Le Gras overheard recently. It seems that Red was trying to put over a deal with the neighborhood barber so that he might save a little money on the advancing price of haircuts. He wanted to get two cuts in advance—the crafty rascal. . . . Speaking of rascals, Ruth Walda's new spaniel puppy is a runner up in rascality, we hear. She confesses that most of her spending money is converted into playthings for the pup, but his prime favorites are still two pairs of houseslippers, a ball and a mouse. . . . It is apparent that Joe Parent is a mighty proud parent these days since the arrival of the new Parent child. Another proud, but slightly dazed, pappy in Bldg. 4-5 is Myron Wappas who welcomed a boy baby into the family recently. It must be an epidemic. Word has just reached us that John Breeze will soon be buying hair ribbons for the young addition who arrived Tuesday, October 28. . . . Co-workers on Bldg. 4-5 are regretfully bidding goodbye to the genial strawberry blonde in the test department, but our loss is another Works' gain. We wish the best of luck to student engineer John Lambert, who will soon be transferred to another works of the General Electric Company. . . Happiness and sorrow must walk hand in hand. We share the happiness of Maurice Petgen, whose wife underwent a serious operation successfully this week; and in great sorrow, we extend our sympathy to Al Ulmer in the loss of his beloved mother.

It's Disgusting, Hain't It?

Marie Page, Bldg. 19-5, bought a red hat with a lot of fuzzy red feathers, to sit parked on the top of her purty black curls. When she came out of the store, there was friend husband to meet her. He took one glance, then a look, at the purty hat—and said, "Either you take that hat off or we don't go to the football game." So off came the purty hat.

Borings From 4-4 Office

Top coats are showing, now that the cold weather has gone, and Warner no longer wears his straw hat. Another good sign of winter. (Oh, Boy! I've got my love to keep me warm.) . . . Any one considering a visit to Bldg. 4-4 should be armed with sun glasses for the protection of their eyes, since the film of the ages has been removed from the windows. . . . The girls of our office are in fine fire drill form; note, I did say the girls (the fellows have to work), since the practice they had last week walking up and down the stairs while waiting for a certain other department to repair the elevator motor. What do I mean by saying last week? It's out again today. Oh, me. . . . Jean Johnson has been among the missing on account of toe trouble. . . . Purdue had their homecoming this last week end, and Pinky Wilma Robb and Betty Mougin went down to add their presence to the gang. All are happy, as Purdue came through with another win. Mike Brayer is happy, too. . . . Now that the advance of hair cuts is in progress, all the men in our office took advantage of the low prices a week ago—all except Glenn McAtee. He really can't tell the difference—but I can. The hair line is much higher. Boy! He's going to get his money's worth. . . . The Valencia Gardens was the scene of a real dance last Saturday night. Almost everyone from our office was present. All had a wonderful time. (But I don't remember). . . . Virginia Plummer had a birthday; in fact, it was her twenty-first. The office surprised her with a party. She received some very original gifts—especially the ones from LaVon Price, Jean Johnson, and Betty Mougin. . . . Earl Greenlee is quite a hunter if you didn't already know it. Hunting season will open November 10, and we are all expecting a big feed. Did you know that Earl has a hunting hound, and his girl friend keeps it for him? So what does Earl do but go out and see the dog four nights a week and his girl, three.

Must close for now,
I remain sincerely as ever,
Elmer, the Field Mouse
(The Rat to You.)

19-4 Nibbins

Louise Sinn, Bldg. 19-4, sure has faith in her electric clock. She can't figure why she was an hour late to work when she left home at 3:05. She almost insisted the clocks here all be turned back 'cause she knew hers was right . . . Betty Smith, Bldg. 19-4, claims she has the best husband in the world but Edna Braun didn't agree with her. She also thinks she has the best husband in the world .
. . . Rosemary Coovert, Bldg. 19-4, wouldn't trade second trick with anyone . . . Paul Olson, Bldg. 18-5, brought Jean Grant, Bldg. 26-2, a big pair of ear rings from Texas as a joke. But I guess the joke was on him, because Jean happened to like the ear rings. Next time buy her a nose ring and see what happens.

Mary Kleber must be in her second childhood already, or is there another reason for her playing with rubber dolls?

Lowell Arnold found out that he was more of a grown-up man than he thought he was, when he tried to crawl under the conveyer belt—or was it that the space wasn't large enough?

Slips And Chips

Now that the price of shaves and hair cuts has advanced we can let our hair grow a little longer. Like all other changes, some people are affected by this one more than others. The change made a very distinct mark on Virgil (Potts) Alderson's face. Potts was trimming his beloved soup strainer with an electric razor. The razor slipped, became entangled, and before it could be loosened, several members of the strainer "family" were extracted—not the painless way. . . . George Townsend is very particular who touches his curley hair. George doesn't take any chances of getting his hair disordered. He has a very good reason: Several good-looking girls ride with him to and from work. . . . Forest Gee usually rides to work with Douglas (our Blessing), but on one occasion last week he came with Mrs. Gee, instead. Gee had been peacefully waiting for Doug at the usual place when he discovered the absence of his molars.

Anyone wishing to know how to play pinochle, ask La Verne Goeglien, Bldg. 4-3. How does it go, La Verne?

A few days ago two of the Bldg. 4-3 insulation girls made an agreement not to spend any money buying candy. What prompted them to make this agreement is not known to others, but we are sure it was for a good reason. Pearl Childs, one of the two insulator girls, has very weak will power; therefore, it has been quite a struggle for her. She was curbing her appetite wonderfully when Elva McMaken ups and buys her an ice cream bar. It was Pearls' weak moment. Does Elva realize the crime she has committed of breaking an agreement of two friends with ice cream? Upon investigation it was learned that on the wrapper of said ice cream bar was a valuable coupon. Elva is saving these coupons to get a dictionary. Why? Has someone been calling Elva names? If anyone has a dictionary they could loan to Elva until she has enough coupons, it might save a lot of trouble.

We wonder if Lula Kline was practicing singing for the U.S.O. the other day. Anyway, the hand-winders still prefer Kate Smith.

Bldg. 4-4 welcomes Harold Amstutz back after being in training in the Army.

Aviation Meetings Are Scheduled

The meeting held for aviation enthusiasts last Tuesday evening proved a great success. Fifty-five people attended the meeting at which the organization and prospects of a Flying Club were discussed. One unit of twenty members has been organized and will purchase their plane in the very near future. New units of the Flying Club will be organized at future meetings.

There will be two meetings this coming week for all aviation fans. The first will be held Monday, November 3rd at 1 p.m. The other, Tuesday, November 4th at 7:30 p.m. Both will be held in the G-E Club lounge room.

If you have the urge to fly and feel you are financially unable to take it up, here is a real opportunity.

HOWARD A. SCHULTZ,
Pres. Fort Wayne Flying Club, Inc.

NEWS THROUGH THE PLANTS

From The *Feminine Viewpoint*

By Hilda Barthold and Frances Krauskopf

There are about a dozen towns in Pennsylvania bearing names beginning with "Green", which probably doesn't mean much to you but if you should have occasion to write a letter or direct a package to somebody living in one of those towns it means a lot to the various post office employees if the address isn't clearly and legibly written. How easy to confuse Greenstown, Greenston, and Greenstone unless each name is distinctly written, also Greenbrier and Greenburr if carelessly inscribed may look alike to some hurried mail clerk with consequent delay and inconvenience.

Just about every state of the United States has a town or city named Washington or Franklin, so it seems like a good idea to write out the name of the state in full rather than trust to an abbreviation, for here again unless written with unusual care "Okla." and "Ark." or "Ind." and "Md." might be mistaken one for the other and an important letter or eagerly awaited package delayed or even lost.

In addressing mail, whether letters, cards, or packages if the person to whom the mail is sent has a title such as "Doctor", "Reverend", etc., this title may well be considered as a necessary part of the address, as a means of identification; on the second line write the number of house or office, and the street name, and always add the proper designation, that is, street, avenue, road, or boulevard; on the third line, of course, the name of the city and state written in full and spelled correctly. In the upper left hand corner the sender should always place his name and full address.

If more care were taken to address mail as carefully and completely as possible, we believe there would be less mail go astray, perhaps after much time and effort on the part of postal officials, to be sent to the dead letter office at last. A word of caution, don't try to be too careful and write names and addresses on both sides of a parcel post package. If this is done, the package may have to be checked countless times by busy mail clerks to see if there are stamps affixed, for if he sees an address and no stamp, he must stop, turn the parcel over, to see if the postage has been prepaid.

Building 26-3

A dinner party was tendered Ruth Motz, Huntington, Saturday at the Oriental Gardens. Ruth was given a beautiful gift and is well on her way to Texas . . . A wow of a hayride was given in honor of Katy Bitler's birthday. On the hayride the gang sang songs, ate apples, and threw straw and apples. Some one got the bright idea and landed Katy in the middle of the hayride and gave her the spanking of her life. There was an attempt made to make a scarecrow out of Elsie Pedersen, but it was not quite successful. Just before the long hayride ended, all were entertained by the newly married couple, Dawn and Carlisle Hansen in singing a duet. Following this a wiener and marshmallow roast was enjoyed by all. Nothing exciting happened, only one of the fellows climbed up a tree, but he came down faster than he went up. (The tree snapped in two.) And Lucy Niemeyer spilled her sweet cider. Everyone ate and drank so much sweet cider that after a while all that could be heard were sighs of deep content . . . Could there be romance in the air for our Daisy Mae, alias Violet Schurg—or what other reason could there be for her coming to work "decked out" every Monday evening? . . . You can always tell Friday from the 'tother days—the girls come to work with funny gadgets tied on their heads like Hindus . . . Alberta Reiger didn't get much dancing done last week. Lee has a little bit to say about that . . . Little did we realize that we were associating with a celebrity until we heard that no other than our little songstress, Patricia Panas, is making her debut this week end. Good luck, Pat . . . Anyone wanting to know the definition of a ringworm, ask Alice Norris.

If you are uncertain as to the amount of postage necessary to carry a piece of mail, take a few minutes to inquire at post office or substation and find out the correct amount and stamp accordingly. It will take such a little time to check, while if mail is sent with insufficient postage there is almost sure to be more or less delay and inconvenience for the post office, your correspondent, or yourself.

Now a final word of warning, don't try to send letters enclosed in parcel post packages! It's very much against postal rules and regulations, and while we don't know that anyone breaking the rules would be subject to a fine or prison sentence, he might very well be made to pay first-class letter rates on his package in which he enclosed a letter.

Decatur News

E. W. Lankenau, R. Leitz, W. Heim, and F. Braun motored to Lafayette Saturday to attend the Purdue-Iowa football game.

Mr. and Mrs. Lawrence Beal and Mr. and Mrs. J. K. Eady started their vacation trip by attending the Purdue-Iowa football game.

Bert Gage and Esther Strickler visited friends at Columbus Saturday.

Dick Ehinger and Lohnas McIntosh attended the Illinois-Notre Dame football game at South Bend Saturday.

Decatur's ace souvenir hunters, Jerome Keller, Jerome Omlor, Charles Omlor, Bob Gass, and Jerry Gage, returned from the Illinois-Notre Dame football game with additional spoils for their trophy room. While they are quite elated with the results, they are still concealing the identity of the trophy.

Winter Street News

Fun Soiree (Fun Fest)) was the theme of the Winter Street girls' party in honor of their "Big Sister", Helen, now the president of Elex Club. This party was held on Tuesday evening at the Y.W.C.A. The theme was carried out in cheerful community singing of both oldtime and popular songs, bingo and dancing. Refreshments were served throughout the evening.

Other honor guests present were Irene Meyers and Mildred Harber.

The girls on the second shift in Bldg. 19-2 gave a baby shower for Mary Applegate this week. Mary was presented with baby shoes, a rattle, bottles, nipples and practically everything which goes to make up a baby's layette. The blessed event occurred at Mary's home Monday evening, October 21st, at which time a baby girl weighing 55 pounds, 4½ ounces was born to Lilly, a registered cow at Mary's farm. The new animal was of course named Lilly, the Second. At last report mother and baby were both doing fine.

Mr. and Mrs. George Auer, Mr. and Mrs. R. McVay, and Mr. and Mrs. Wallace Beer of Bldg. 4-3 went to the Purdue football game last Saturday, but the gang cannot imagine why Mr. Beer wore a vest of another suit. Probably he wanted them to know that he has more than one suit.

George Cooper, Bldg. 6-4, gave the Nickel-Plate railroad boys a little thrill in how to operate freight trains. He really puts up iron bars and special equipment in the "cabooses," so all the boys are very well protected.

Plastic Flashes

Lillian Hatfield got tired of being a country lass, so now she's one of us city slickers.

That downhearted look on the faces of the second shift hand molders is because their best gal friend went back to the first shift.

For instructions on how to play a new game popular with the second shift, see Zola "Zip" Hetrick.

My! my! Why do all these gals fall for Eddie "Pappy" Bickmeyer?

Jim Fleming, our favorite fashion advertiser, startled our floor by shedding his customary winter wardrobe and wearing a green shirt. What's the matter with the old faithful sweater, Jim?

There seems to be a sudden absence of Tony "Grandpa" D'Agostino from the first floor.

Since you've told us you do not want your name in print, we won't say a word about you, Erma.

Lois Drewitt has a lovely new nickname. Just call her "Cuddles", folks, she just adores it.

Dorothy Lebrecht believes in killing two birds with one stone. She sits in the stadium at South Bend watching the Notre Dame game and has one ear glued to her portable radio rooting for South Side at home.

When Agnes Ryan comes to work with her hair flying with the wind, is it (as some say) because she wants to look like a little girl, or (as others say) did she get up too late to comb it?

The Tillies.

Lucille Baker is still hoping she has some more friends so she can get some more quilt blocks for her friendship quilt. Come on girls, let's help her out.

W. Hansbach, Bldg. 4-3, has a car that has a name or names all of its own. Anyone interested in the latest name, just see him about it.

Mac Farrell, Bldg. 4-3, has gone into the car repair business during his spare time. His motto is, "I wreck 'em, you get 'em fixed elsewhere."

Notice To Bowling League Secretarys

Tentative plans for a bowling column in this paper have been discussed, which will include all leagues.

Please contact R. Kent, Bldg. 18-5, or phone 221 for further details or to offer your suggestions.

My Uncle Angus just got a new suit from his favourite Scotch tailor, McGinsburg — Three Flights Up Where Suits are Down.

"Uncle Angus," I said, "Why do ye always send east for your clothes?"

"Weel, Lad", he answered, "I like tae read the New York papers he wraps them in."

So we all sat down tae enjoy this new addition tae his free library. Cousin Colin and I scanned the headlines. Everywhere were items o' shortages due tae defense, such as:

"All Eyes Are on Potatoes this Fall."

"Finger Nail Polish Brushes in the Red."

"Onions Strong in Foreign Markets."

"Glue Users To Be Stuck."

There was one article tho, that we really read clear thru, seriously. It's headlines were:

"204% Tax Rise Limits General Electric Profit."

The article went on tae say that the General Electric Company has sold more goods in the first nine months o' 1941 than it has in any previous whole year, but that the increase in taxes ate up all the profits on the increased business. O' course it was referring to the dividends on common stock, but it might just as well hai' been about our profit sharing. Now besides warning us about the size o' our next profit sharing checks, we felt that it was another way o' saying that this entire defense program is costing every one o' us. Every time the General Electric Company pays out another tax dollar, you and I feel it. (At least Colin and I do.)

O' course it's for a good cause. And tae help that good cause, let's remember that we're paying for it, and every time we can keep from spoiling a piece o' work, or can turn in a suggestion that will save time or material, we're saving our own money, yes, and maybe our own homes and freedom, too.

While Cousin Colin and I were studying this article, Uncle Angus was looking at the pictures in the Rotogravure. "Lads," he said, "Here is a picture o' a new defense highway. I'll bet you two couldn't drive my tractor doon this road."

"And why not," we wanted tae know.

"Weel, see this sign? It says, 'Tractors With Lugs Prohibited".'

NEWS THROUGH THE PLANTS

Sunbeams From 17-4

Well, the hep little piggie had nothing on a little mouse that was trying so hard to entertain Clara Gehrig, but Clara doesn't appreciate boogie woogie rhythm, so it turned out to be a Lindy Hop for both of them.

If you smell a peculiar odor, it ain't hay, it's Bob Rehr's new cologne.

Does Dick Lare ever look cunning with his head in a waste-paper can? If he ever has to march in the army he will sure look all right bringing up in the rear.

The girls on the tiers table had a surprise birthday dinner for Beryl Kolkman. The dinner was served at the Oriental Gardens after which the group enjoyed a theater party. Those present were Marjorie Rice, June McCoy, Bonnie Shoner, Ann Rentschler, Mabel Clark, Mabel Murray and Dorothy Wilhelm.

Thought for the week: I will speak ill of no man, and speak all the good I know of everybody: Benjamin Franklin.

Granny.

A hamburger and wiener roast was held last week at the cottage of Irene Taggart, Long Lake, in honor of Lenora Luttman, Bldg. 26-2, who observed her something or other birthday. The guests were Mr. and Mrs. Harry Freeman, Bldg. 26-2; Mr. and Mrs. Ray Feller, Bldg. 26-2, George Odey, Bill Marx and Elizabeth Furge. It appears that Ray did full justice to the hot dogs and the "Wimpys".

Mr. and Mrs. Bill Hanley wish to thank the employees of Bldg. 17-1, for the lovely gift and party given in their honor, and to extend to Mr. and Mrs. Russell Gibson their most sincere appreciation for the use of their recreation room.

Bldg. 17-4 is at ease once more after the rescue of Edith Venrick. It was thought for a while that Edith would be entombed indefinitely in the elevator but when the rescue gang shoved a stepladder through the elevator opening Edith scrambled to safety as slick as a whistle.

It is rumored about Bldg. 6-B that Bert Herrman in a fit of absent-mindedness the other day mortgaged his home so that he could get a shave and a haircut, and when he returned home, his dog mistook him for a bond salesman and bit him.

Irene Lazar, Bldg. 26-2, came in with a big smile Monday morning that sparkled almost as much as the new diamond she was wearing.

Glenn McNamara, Bldg. 26-2, insisted that his radiator was frozen Saturday morning. It is reported that he discovered later that he had no water in the radiator.

Elton Swank, Bldg. 10-1, had his picture in the WORKS NEWS recently for joining the Quarter Century Club. He is very proud of the honor and also very proud of the picture. He wants to thank everyone for the kind congratulations and wishes to inform his friends to just be patient and he will present them with one of the pictures just as soon as he can collect some more old WORKS NEWS. He has expressed a desire for anyone having any of these old NEWS to send them to him, as they will be gratefully appreciated. The boys in Bldg. 10 also smell a mouse. They think Elton is going to throw a party, maybe.

Genevieve Nuttle, Bldg. 4-3, was so excited last week when she heard that her name was in the WORKS NEWS that she tore it in two grabbing for it, but wants everyone to know her name is Nuttle and not Tuttle.

19-5 Office Chatter

Many of us have heard of snipe hunting, but the prize last Friday was "Snipes a la Mushroom Sauce", that is the dish that Ann Pressler was so anxious to try. But someone put too much pepper in the dish and Ann went around to be put wise . . . Lew Gossman believes everything is happening to him—from badges to keys . . . Don't know why the gals have to diet—only think they are training for the Christmas rush —or should it be dinner . . . Hugh Neely just could not come in the last day to say adieu, to have us give him a rousing send-off, but we promise to let him have all the news regardless : . . What is Carl Reynolds wanting with red flannels, and gold braid? Oh! Halloween! . . . Dottie Ross certainly has a way about her when she can always ride the street car for nothing.

All those tents pitched at Big Long Lake are not owned by a circus. They are merely Brick Adams', Bldg. 4-3, equipment for erecting that huge cottage about which we cannot figure why only one shovel is present at the large dugout.

Phil Gilford, Bldg. 4-3, seems to have taken a great interest in giving news to a certain reporter on the floor. Well, it must have been the "Big Scoop" of the week for this reporter was so thrilled when he received the news from Phil that he made one mad rush to the office. It surely would have been too bad had he told any of the others, as there might have been a panic getting to the mail sack.

Night prayer said by a little girl some place in Europe: "Dear God, take care of Mother and Daddy, my brothers and sisters, our soldiers and sailors, and don't forget the air men; but most of all, God, take care of yourself because if Heaven's bombed, we're sunk.

Roy Ellenwood, Bldg. 4-3, believes in picking out his own birthday present. Last Friday was his twenty-first birthday, so he took unto himself a bride, Mildred Mitchell, Bldg. 19. Well, here is wishing good luck to both of you from all of us in Bldg. 4-3.

Alta Rybolt, Bldg. 4-3, has applied for a patent on a new method of killing bees, wasps, etc. Anyone interested in how it is done just ask Alta as she will be glad to tell you.

Anyone wishing to enjoy a wiener bake without doing anything, take Flossie Davis, Bldg. 4-3, along. If it hadn't been for Flossie, Freda Bunnell might have starved.

Alberta Steiner, Bldg. 4-3, was recently discovered suffering from acute gastritis. At first, we thought it was something else, for she clutched a bottle in her hands. Upon closer examination we found it to be a bottle of a famous cola drink. We also discovered that she had been eating candy, hot dogs with pickles and onion, ice cream, and was topping it off with a cola drink. Will these young folks never learn?

Ora Farrell, Bldg. 4-3, wishes to take this opportunity to insert the following want ad in this paper: Wanted—One shop apron in fairly good condition. Will trade for it my famous bathing suit, the one in which I did my spectacular dive at Tri-Lakes this past summer. We suggest that he see Art Bushing, who has aprons for sale, trade, rent or what have you.

June Juday can surely prove the old axiom that trouble always comes in pairs. Last Friday she ran out of gas on her way to work and had to walk a mile for gas. Friday night she lost her car keys and had to wait until one o'clock in the morning for a new set.

Unique Safety Display Board

THEY'RE ON THE HOME STRETCH AND I'M BETTING MY BOTTOM DOLLAR THEY MAKE IT
SAFETY
WIRE & INSULATION
77 DAYS TO GO FOR A PERFECT SAFETY RECORD
HELP REACH THIS GOAL
WORK SAFELY

As they near the finish for a perfect no lost-time accident year, employees of the Wire and Insulation division are redoubling their efforts. As a reminder to constantly keep safety in mind, safety display boards have been installed in the department.

One of these boards is shown in the above picture with LaVern Lee, Bldg. 12-B, and our old friend, Hopeless Hector, admiring the unique method of calling attention to safety. The board is constructed so that a red and green light flashes on and off throughout working hours.

The board is equipped with letters and numbers so that a different message can be mounted each day. The boards will be moved to various locations in the department at regular intervals.—H. L. Smith, Safety Engineer.

Harry Bailey, Bldg. 4-3, who is always in a big hurry, was observed a few days ago in the Cafeteria collecting his noon-day meal. A bottle of milk was included in the assortment; and Harry, in a hurry, as always, jabbed viciously at the bottle cap and received the contents full in the face. For his benefit we herewith quote from Shakespeare: "It is wiser to go slow and be sure; for he who runs, stumbles." Take warning Harry.

Forest Whonsetler, Bldg. 4-3, was observed last Sunday afternoon walking down the road near Cree Lake. In each hand he carried a gallon jug of cider. Following close on his heels was a big old hound dog. It reminded one of scenes in the Kentucky Mountains. For instance, that of a mountaineer coming out of the hills carrying two jugs of mountain dew and followed by his coon dog.

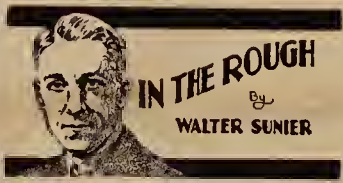
Lucille Baker was seriously thinking of going on a diet. But since she read in Dorothy Dix's column last Monday that fat women make better wives because they are better natured and better cooks, she decided to keep on eating.

We wish Marie Wechelman, Bldg. 4-4, and Opal Cuney, Bldg. 4-4, would wear their twin dresses on the same day so that we could know for sure whether they each have one or if they trade the same one back and forth.

Basketball Notice

Employees interested in playing on West Side basketball teams are asked to report for practice at the G-E Club next Wednesday evening, November 5.

INFRINGEMENT ON RIPLEY
Sign in Whistleberry, Kentucky:
KORN and BUNYAN
REGISTERED PODIATRISTS



IN THE ROUGH

By WALTER SUNIER

George Cooper, Bldg. 6-4, Magneto Department, would appreciate very much hearing from anyone who, at some time during the Golf League matches, accidently traded clubs with him. As is usual, the bags and clubs were leaned against the outside of the clubhouse at Brookwood. Someone accidently picked up George's bag and George has a set of clubs and a bag that do not belong to him. The bag is much like his own which evidently accounts for the mix-up. He would like to trade back for his own bag and clubs. If anyone has an outfit he picked up by accident at Brookwood or knows anyone who did, George would appreciate it very much if he was notified by a note addressed to him at the Magneto Department, Bldg. 6-4, or through a telephone call to phone 551.

When it rains it pours. Clem Schneiders had all of his bad luck at once at the Quarter Century outing at Lake Wawasee. When he drove from the tee he lost his head—not his real head but his clubhead. The clubhead went one way and the ball another. It would have been better if the ball had gone one way and the clubhead another way because the ball was finally found in a man-made hole where it was impossible to hit it out.

Pat Hayes says he can still hear the groans which came from his playmates when his drive on No. 6 at Brookwood landed three inches from the cup.

Pars are tough to acquire on No. 9 at Brookwood and many of the ones which are snared come from getting the ball down in one putt. Birdies are rare birds. Erne got his birdie here on September the ninth the spectacular way by sinking a 250-yard brassie shot.

Decatur Sports

Tom Haubold was the big gun in the Monday Night Inter-Department League as he led the Maintenance to three victories over the Stators. His 220 was high single game, and his 581 was high 3-game series. His teammate, R. Shackley, was close behind with a neat 571 for 3 games.

Maintenance won 3 from Stators.
Flanges won 2 from Testers.
Production won 2 from Switches.
Assembly won 2 from Rotors.

200 scores included Haubold, 220; Shackley, 209, 217; J. Omlor, 202.

Standings

	W.	L.	Pct.
Flanges	7	2	.778
Maintenance	7	2	.778
Testers	6	3	.667
Stators	5	4	.556
Rotors	3	6	.333
Production	3	6	.333
Switches	2	7	.222

K. Woodhall led all the keglers in the G-E Industrial League last night, posting a 264 for high single game and 589 for high 3-game series, and led Burke's to victory in 3 games over the G-E Dodgers. Hez Cochran was best for the losers with a 3-game total of 568.

The West End Restaurant won three from the G-E Ramblers. Don Stump leading his team with 217 for high single game and 558 for high 3-game total.

200 scores included: K. Woodhall, 264; H. Cochran, 225; Bun Keller, 222; D. Stump, 217; R. Woodhall, 203.

Brokaw and C. McIntosh bowled 3-game totals of 552 and 549 respectively in leading the Drillers to three wins over the Millers.

The grinders nosed out two wins over the Punchers.

The team standing follows:

	W.	L.	Pct.
Drillers	6	0	1.000
Millers	3	3	.500
Grinders	2	4	.333
Punchers	1	5	.167

Decatur Club Plans Basketball Team

The Decatur G-E Club will have a strong basketball team in the newly organized City Industrial League which opens the season November 4. Candidates have been practicing for the past two weeks, and the players are fast rounding into shape. The team will be composed of ex-high school stars from Decatur and surrounding communities.

The players who have been trying out for the team are: A. Baker, B. Braden, C. Andrews, H. Blythe, K. Chilcote, K. Jackson, N. Lose, R. Hess, A. Heller, J. McConnell, W. Smith, F. Kunkel, Hakes, Owens, and V. Hill.

Besides the regular league schedule, the team will engage some of the stronger teams of the surrounding towns.

TIME IS SHORT

GENERAL ELECTRIC NEWS

BUILD FOR DEFENSE

FORT WAYNE WORKS

Volume 24 FORT WAYNE, INDIANA, FRIDAY, NOVEMBER 7, 1941 Number 90

Tri-State Teachers Guests At Club

Boy Meets Girls, And What A Problem

This service man from Baer Field attending the Elex Club dance is evidentally in a quandry and no wonder. If he has definitely decided between Marilyn and Joan Voors for a dance partner he faces the task of determining which of the twins is the one he has decided on. *(Other pictures on Page 3)*

Amended Defense Saving Plan Offered In December

On May 1, 1941, the sale of G-E employee bonds was suspended and G-E Defense Saving Plan was offered to employees so that they might fulfill a twofold mission by continuing their savings and at the same time, assist their Government in its efforts to finance the Defense Program.

It has been the practice for some years to offer G-E employee bonds for subscription under a payroll deduction plan in December. In furtherance of the Company's efforts to assist in every way in the Government's Defense Plan, there will be no offering of G-E employee bonds this year. Instead an amended Defense Saving Plan will be announced effective December 1, 1941 offering a comprehensive program for continuous savings in U. S. Defense Bonds and Defense Postal Saving Stamps.

This program in conjunction with the Income Accumulation Plan, will enable employees to continue to increase their savings out of the higher incomes they are now enjoying as a means of building protection for their own future and that of their country.

Protect Your Badge At All Times

Employees are cautioned to protect their IDENTIFICATION BADGES when left on garments they are not wearing, particularly when in restaurants or other public places.

Some person not having the Company's or the government's best interest at heart could very easily steal one of these badges and thereby obtain access to the plant.

Identification badges have been loaned to each employees for identification purposes, and should be guarded carefully at all times.

Foremen's Club Hears Navy Man

Approximately two hundred members attended the dinner meeting of the Foreman's Association of the Fort Wayne and Decatur Works held Wednesday evening in Bldg. 16-2. Following a "Thanksgiving" dinner the foremen were addressed by Works Manager M. E. Lord who gave an interesting talk on the part played by our Works in the Defense Program.

Mr. Lord introduced Captain J. S. Evans, U. S. Navy who is inspector of naval materials at the Schenectady, Erie and the Winter Street plant of the Fort Wayne Works. Captain Evans emphasized the importance of a sound understanding of the needs of our Navy and the important part that those in attendance can play in helping supply these needs. Captain Evans supplemented his talk with several interesting naval films.

Several Hundred See G-E "House Of Magic"

Approximately three hundred teachers and school authorities from Indiana, Ohio and Michigan attending the Eighth Annual Tri-State Conference on pupil personnel in Fort Wayne this week, were guests of the Fort Wayne Works this afternoon, and enjoyed an interesting program held in the G-E Club gymnasium.

Feature of the program was a "House of Magic" presentation under the direction of Howard Miller and Claude Summers of the Works Laboratory. Additional features were motion pictures prepared by the General Electric Company showing interesting phases in the operation of our various plants.

The visitors were welcomed by local Works officials.

Committee chairmen who had charge of the conference which opened last Thursday are: Local arrangements, Merle J. Abbett, local superintendent of schools; Program, Patricia S. Downs, attendance department, Evansville public schools; Membership, Dr. David J. Wiens, chief of Bureau of Attendance, Cleveland public schools; Finance,

(Continued on Page 4)

Capacity Crowd Expected For House Of Magic

Six Performances Will Be Held At G-E Club On Next Monday And Tuesday

With the demand for tickets to the "House of Magic" program to be shown at the G-E Club on November 10 and 11 exceptionally heavy it is anticipated that capacity crowds will be present at each of the six performances. The affair is open to all G-E Club members and their families and tickets may be procured by presenting membership cards at the stand in the Club basement.

The performances will be at 1:15 in the afternoon and at 7:00 and 8:00 in the evening on both days. The presentation will be in charge of C. E. Gluesing, who has directed hundreds of the programs in the past few years.

The approach of a body, light, sound, or humidity can control electric current as well as the familiar switch. Demonstrations of these less usual methods of control provide some of the most startling effects which will be presented here.

Capacity control, or the control of current by the approach of a body, is another method which creates seemingly mysterious effects.

(Continued on Page 4)

Fishing Tackle Makers Help Speed G-E Defense Contracts

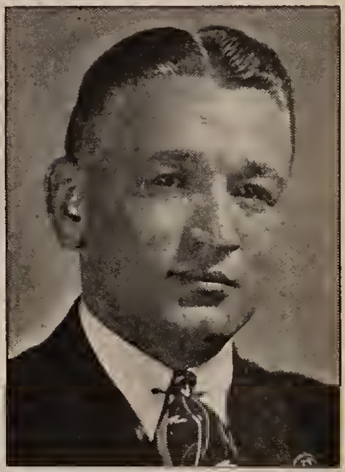
Two fishing tackle companies, a watch manufacturing concern and a carpet mill are among the more than 400 manufacturers working with the General Electric Company in a $20,000,000 subcontracting effort to speed the production of defense items, company officials announce.

The Pennsylvania Fishing Tackle Company and the Ocean City Manufacturing Company of Philadelphia, both manufacturers of fishing reels, are producing delicate machine parts.

The Waltham Watch Company of Waltham, Mass., is supplying taper pins for precise machinery.

(Continued on Page 4)

DIVISION EDITOR



Robert Brodrick

Announcement is made by C. A. Brenner, superintendent of the Tool Division, of the appointment of Robert Brodrick as WORKS NEWS division editor for the Tool Division. He succeeds Paul Berlien who has successfully acted in this capacity for some time past. Mr. Brodrick is an apprentice graduate, having completed the machinist-toolmaker course. Keenly interested in sports the new division editor is an active member of the Southwest Conservation Club.

Volume 24 Friday November 7. 1941 No. 90

• Return Of The Native

At first glance, Artist Barstow appears to have turned up this week with a far-fetched cartoon. However, a moment's study of the picture will reveal a far deeper motive, one fraught with meaning and laden with possibilities. Let's assume that every associate of a careless workman who has had an accident were to foregather around the machine to welcome back the hapless one. Let's assume they did greet him with all sorts of banners and devices as pictured above.

Wouldn't it be logical to continue the assumption and wind up with the conviction that the hapless one would henceforth walk the straight and narrow path?

Wouldn't it also be logical to assume that a hitherto hapless one might also become the most careful workman in the place?

There are none so learned as those who learn the hard way. But the cost is much too high for most of us. It's much easier to learn the safe way and then keep within it.

In spite of the fact that the ladder tapers to one-man rungs at the top, the roomiest part is farthest up.—*Charles R. Gow.*

• "Pretty Good Way"

"This is your country and my country. All of us belong to it; all of us own it; all of us help run it.

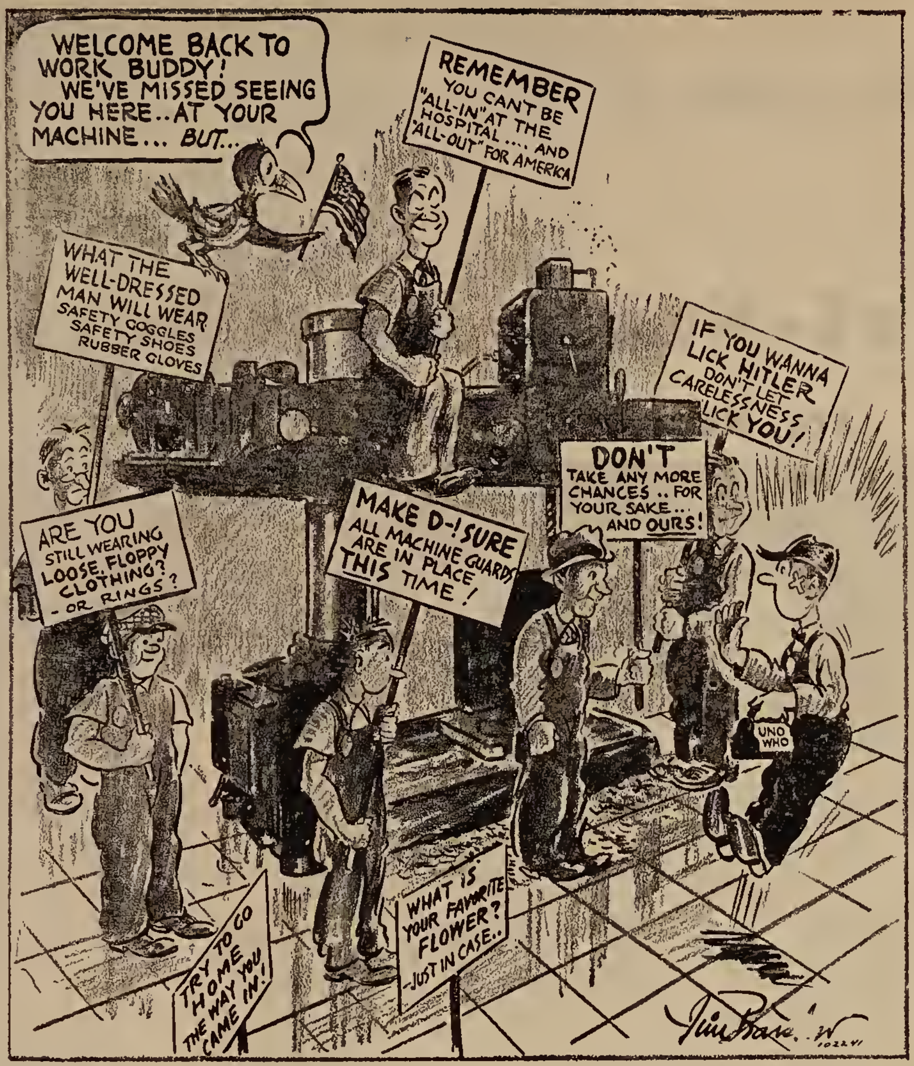
"You have a home here and I have a home here. We want to keep our homes. We want to keep on living in them—pretty much the same way we always have. With all our faults it's a pretty good way of living."

In those words William S. Knudsen summed up the things that America is preparing to defend. Today our factories are turning out growing mountains of defense materials and we are girding ourselves for sacrifices so that we can preserve this "pretty good way of living."

If that way is "not worth working for," Mr. Knudsen says, "then nothing is worth working for. Suppose we do have to work harder than we like to; suppose our muscles do get tired; suppose we get some callouses on our hands; suppose we lose some sleep. Suppose we haven't got time to play—even on Saturday afternoons. Suppose we never get another vacation until this war is over. Suppose we can't get a new car for a few years; or we have to put off building a house; or have to go back to brooms instead of vacuum cleaners."

Suppose we do? Mr. Knudsen says he thinks our way of living is still worth defending. So does every other American who knows the value of liberty—the value of being free to select the kind of job he wants and train himself for it, free to say what he likes and read what he pleases, free to do all the things that have always made the American way of life the best way in the world.

RETURN OF THE NATIVE



WELCOME BACK TO WORK BUDDY! WE'VE MISSED SEEING YOU HERE.. AT YOUR MACHINE... BUT...
REMEMBER YOU CAN'T BE "ALL-IN" AT THE HOSPITAL.... AND "ALL-OUT" FOR AMERICA
WHAT THE WELL-DRESSED MAN WILL WEAR SAFETY GOGGLES SAFETY SHOES RUBBER GLOVES
IF YOU WANNA LICK HITLER DON'T LET CARELESSNESS LICK YOU!
DON'T TAKE ANY MORE CHANCES .. FOR YOUR SAKE... AND OURS!
MAKE D-! SURE ALL MACHINE GUARDS ARE IN PLACE THIS TIME!
ARE YOU STILL WEARING LOOSE, FLOPPY CLOTHING? - OR RINGS?
UNO WHO
WHAT IS YOUR FAVORITE FLOWER? - JUST IN CASE..
TRY TO GO HOME THE WAY YOU CAME IN!

NEWS FROM THE CAMPS

We publish herewith with great pleasure extracts of letters sent to us by G-E employees now in government service. Address all communications for this column to the WORKS NEWS editor.

Dear Editor:

I want to thank you very much for your fine cooperation in sending me the WORKS NEWS. I receive the WORKS NEWS regularly every week and sure do get a lot of enjoyment out of it.

Things have been breaking pretty lucky for me, and I have been advanced from corporal to sergeant. I received my sergeant promotion August 13.

I completed my schooling in Carburetor and Ignition and have been transferred to the 53rd Motor Pool, where I find my work very interesting.

Yours truly,
Sgt. Lawrence Bresler
Co. B, 60th Q. M. Bn.
Fort Benning, Ga.

Dear Editor:

Just a few lines to give you my correct address so that I may continue to receive the WORKS NEWS. The NEWS is very welcome and gives us some idea of what goes on at the General Electric.

If you are interested, I would like to give you briefly some idea of my activity since entering the Army.

On Feb. 10, 1941, I reported in at Fort Benning, Ga., and assumed command of Co. A 205th Quartermaster Battalion (Gasoline Supply). This Company was then a newly activated Regular Army unit and assigned to the Third Army. The only officer assigned until I assumed command was 2nd Lieut. James F. Heckin, of Jacksonville, Fla. We launched a training program on our own idea of what a Gasoline Supply Co. should do as no Training Manuals were available at that time.

This training program included the training of truck drivers and mechanics as well as the basic military training. On March 12, 1941, I was ordered to Fort Knox, Ky., to assist in writing a Technical Manual on Gasoline Supply. That Manual is still the "Bible".

During the period up to the first of June we gradually acquired our equipment and also participated in several Field Maneuvers with the 2nd Armored Division and also the 4th Division (motorized) as well as our own Training Convoys and field problems.

On June 13, 1941, we left Fort Benning attached to the 2nd Armored Division and participated in the Tennessee Maneuvers supplying the Division with gasoline. In the two weeks following our arrival we pumped, and placed in 5 and 10 gallon cans and distributed over 300,000 gallons of gasoline. The greater part of this work was done at night without lights and included Motor Convoy operation in Blackout.

We arrived back at Fort Benning on July 1 and began preparation for the Louisiana Maneuvers. Took off for Lake Charles, La., at 5:00 A.M. on July 8 and arrived at destination at noon on July 10 and set up the Third Army Gasoline & Oil Distributing Point. Our mission there was to supply all Third Army Non-Divisional Troops with regular gasoline, white gasoline for field ranges, kerosene, all grades of motor oils and greases.

Our original distributing point was Lake Charles but after the maneuvers got under way our Company set up other D.P.'s at Eunice and Crowley, La. All of these units operated 24 hours a day and seven days a week. In addition we sent out details with gasoline and oils as far west as Kirbyville, Texas, and north of Alexandria, La. In addition to all the oils, greases, etc., we distributed over 1,200,000 gallons of regular gasoline.

The Company arrived back at Fort Benning on October 5 and began preparation for the Carolina maneuvers, leaving Benning on October 24 and arriving at Chester, S. C. on October 25. On the afternoon of the same day we established a gasoline D. P. at Evans, S. C. and on Monday, Oct. 27, another at Rodman, S. C.

These Distributing Points will provide the Fourth Army Corps Troops with gasoline and are operating on a 24 hour basis for the duration of these maneuvers. The present schedule calls for us to return to Fort Benning about Dec. 5.

Upon our return to Fort Benning at the completion of this maneuver we will have spent 21½ weeks out of 25 weeks in the field which establishes something of a record in sustained field operations.

While the Louisiana Maneuvers were in progress I took time out to attend four weeks of intensive schooling in motors conducted by various manufacturers of Army Ve-

(Continued on Page 4)

Attention! "On With The Elex Club Dance"

Approximately five hundred service men from Baer Field attended the Elex Club dance given in their honor last Friday evening at the G-E Club. Many of the boys took the opportunity to get the feel of "civies" but most of the guests appeared in uniform. Slightly outnumbered by girls the boys had no difficulty in finding dancing partners.

The dance was the second of a series planned by the Elex Club and part of the program to help entertain the men stationed at the air base. Other events to be held during the winter months are planned by the Club.

Is In Charge of House of Magic

C. Edward Gluesing

C. Edward Gluesing, Schenectady, will be in charge of the House of Magic program to be shown for employees and their families at the G-E- Club on November 10 and 11.

BULLETIN

On Tuesday, November 11, there will be a general observance of Armistice Day in commemoration of the ending of the World War and as a tribute to our soldiers who made the supreme sacrifice.

All ex-service men who plan participation in the Armistice Day observances will be excused from duty during such period of time as may be necessary. They will, however, make arrangements in advance with their foremen or supervisors.

All employees are asked to observe two minutes of silence at 11:00 A.M. To aid in this purpose horns throughout the factory will sound a warning signal at 10:55. Five minutes later at 11:00 sharp the signals will again be sounded, power will be shut off and all work will stop for the duration of two minutes during which time employees are asked to maintain a respectful silence.

Foremen and others responsible will see to it that individual switches in and around the shop, switchboards, etc., are thrown out so that power may be restored at the expiration of the two minute period.

M. E. LORD,
Works Manager

"House Of Magic"

(Continued from Page 1)

A "kidnap detector" is used to demonstrate this method. Whenever a body approaches the "baby," a bell rings; and it is impossible to steal the baby without setting off the alarm.

Humidity control is demonstrated with a light which can be turned on by blowing a moist breath or turned off by blowing a dry breath, making it possible to "blow out" an electric lamp just as a candle flame is extinguished.

With the aid of the "electric eye," a variety of novel demonstrations are given to show how light can control electric current. When an electric lamp is turned on by striking a match, an "electric eye" attached to a loudspeaker makes it possible to "hear" light—and changes in light are heard as changes in sound. In combination with a special lamp, music is sent across the room on a beam of light and heard at the opposite side of the room. This experiment of carrying the human voice or music on a beam of light has been performed in Schenectady for a distance of more than 25 miles, and also from an airship to the earth, and from a moving train to a station platform.

The control of electric current by light through the use of the photube or "electric eye" is gaining an increasingly wide use to perform all kinds of functions, such as automatically turning on the lights of an airfield as darkness approaches, controlling the operation of printing presses, opening doors, and many others.

News From The Camps

(Continued from Page 2)

hicles in Detroit and Pontiac, Michigan.

There have been numerous letters written by various men in the Army concerning the conditions under which they live and work. We do not have the modern conveniences of home while we are in the field but if the morale of the soldiers is what it should be, you will find no complaint, the condition being accepted as temporary and the men will make the best of the situation. My observation is that the attitude of the men is a direct reflection of the attitude of the officers.

I started out to write a short letter but when I got started there was no stopping. Below you will find my address and again thanking you for the WORKS NEWS, I remain,

Yours truly,

Captain W. K. Boltz,
Co. A 205th QM Bn.
Fort Benning, Ga.

Fishing Tackel Makers

(Continued from Page 1)

The Mohawk Carpet Mills of Amsterdam, N. Y., are manufacturing thermal tubes.

There are dozens of such unusual examples among the firms that are contributing by means of subcontracts to General Electric's defense effort.

Nor does this co-operation extend in only one direction for General Electric also serves as a subcontractor to other companies. General Electric, for example, makes magnetos, superchargers and other parts for airplane manufacturers.

General Electric's procedure in connection with a contract for radio transmitters and receivers for one of the armed services is an excellent example of the co-ordination of the efforts of many companies to produce equipment in the huge quantities required. Hundreds of potential subcontractors were surveyed in order to obtain a group of suppliers who could provide a large percentage of the needed parts. By the time the new designs had received government approval, assembly lines were ready and parts began to flow into them from more than 150 selected subcontractors.

Many other defense articles lean almost as heavily on the work of suppliers and subcontractors. General Electric's powerful 60-inch searchlight represents the combined efforts of a score of firms. The metal mirror is ground and polished by companies in New Jersey, Virginia or Ohio. Its front-door glass is made by concerns in Pennsylvania or in Michigan. It uses arc-carbons from Ohio and arc-switches from Michigan. The aluminum castings come from still another concern in Ohio.

In other fields of defense manufacture, the number of contributing firms is equally great. General Electric foundries, which in normal times rarely ask for outside help, have given work to 35 concerns with which they never before did business. About 75 companies contribute to the manufacture of a turbine.

Some firms have been provided with tools, dies and machinery to produce work of the desired quality or to speed up production. Others have been furnished engineering and executive talent, inspectors and skilled supervisors. Subcontractors have been assisted in locating sources and in securing deliveries of raw materials.

Most of these subcontractors are supplying parts that normally would be manufactured by General Electric. The work ranges from delicate machining operations to the making of castings weighing more than 40 tons.

Stone Age Tribe Hears First Radio Program Via G-E Station

Working as missionaries in what is described as one of the "earth's remotest spots" among a newly discovered tribe in Netherlands, New Guinea, the Rev. and Mrs. C. Russell Deibler have written General Electric, expressing appreciation for the news reports and other programs which are broadcast from the company's short-wave station, KGEI. Located in San Francisco, this is the only short-wave station in the United States west of the Mississippi and for that reason is the one American station heard best in the Far East.

"These tribesmen saw and heard radio for the first time when I invited them in my bamboo and tree-bark hut," Rev. Deibler writes. "As they heard voices coming from the receiver, they crouched over close and jabbered back, utterly bewildered as to where the strange voice was coming from. This tribe was discovered but three years ago. They know nothing of the outside world, use stone axes in hunting animals for food, do not know what money is. In fact, they are still very much of the 'stone age'.

"My wife and I have been here as missionaries for two years. Our home, or hut as it is, is an almost inaccessible place 6000 feet high in the rugged mountains of New Guinea. We are mainly dependent upon an occasional airplane for our supplies and contact with the outside world; so you can see why radio is our very best friend, for through it we have our only means of knowing what is going on in the outside world. I doubt if there are any listeners to radio in a more remote spot than this. Reception is good at all times but occasionally your programs are interfered with by some Asiatic station operating on the same frequency."

The Rev. Deibler mailed his letter from Makasser, Celebes, but says his "home" address is Wisselmeren, New Guinea, via Ambon, Netherlands East Indies.

Named Engineer In Magneto Department

H. B. Carter

Announcement is made by P. O. Noble, Engineer of Fractional HP Motor Division, of the assignment of Harold B. Carter of the Engineering department to serve as magneto engineer in the recently organized Magneto department.

Mr. Carter graduated from Kansas State College in 1927 with a Bachelor of Science degree in Electrical Engineering. He became connected with the General Electric Company in the same year. Since 1928, he has been in the Fractional Horse Power Motor Engineering department in charge of split phase motor design and for the past two years was section engineer for Decatur Works.

Mr. Carter is a major in the Coast Artillery Anti-aircraft Reserve and president of the local chapter of Reserve Officers.

G-E Makes Longest Plastics Mold For Fan Blades For Towers

The longest mold ever made by the plastics department of the General Electric Company, largest molder of plastics in the country, is being used at West Lynn, Mass., to produce fan blades formerly made of metals. The fan blades, four and a half feet long, are made for the Foster Wheeler Corporation for cooling tower fans.

The fans are used in large cooling towers required for cooling great quantities of water needed for power plants, condensing oil refineries, air conditioning, and similar applications. For the most efficient and economic operation, a light fan blade is particularly important. The new plastic blade is lighter than the metal blade it replaces, but is of about equal strength.

✤ NEWS THROUGH THE PLANTS ✤

From The Feminine Viewpoint

By Hilda Barthold and Frances Krauskopf

Emily Post has been appearing in the newspapers for such a long time that everyone should be familiar with the technicalities of introductions. However, the dear lady isn't very helpful when it comes to filling in that awkward pause that follows.

Now, we're anything but an expert on etiquette, but from sad and bitter experience, we have arrived at a certain stage of wisdom and so we shall pass a few hints along to you.

In the first place, don't worry about what to say to a person whom you're meeting for the first time. Just say "How do you do?" in your best manner, smile your sweetest smile, and look expectant. Nine times out of ten the introducee will come through with a remark, and you can continue the conversation from there. The tenth time it's your turn to say something, and surely anyone's brain will click once in ten times.

If a man is being introduced to you, you have smooth sailing. Just follow the above procedure, but look a little mysterious and expectant. Murmur something—it doesn't matter what—with "you" in it. The "you" must be emphasized very strongly. The dear fellow won't listen to what you've asked him. He'll take up that "you" and follow through with his life history, all the way from what a pretty baby he was when he won the beauty contest to his experiences as a star football center! There just isn't a man made who can resist telling a gal all about himself.

Don't worry what people think about you. They're so busy worrying about themselves they haven't time to think about you. Just start them talking about themselves, listen with an interested expression, ask a few questions (be sure they fit in with what is being said), and people will rave about "that charming conversationalist."

Here's a little hint about your smile. Smile with your eyes! Nothing is more chilling than a glimpse of rows of teeth between taut, open lips and absolutely no eye expression. So smile with your *eyes and mouth,* girls, follow the above hints, and you'll be the belle of the ball.

All experts are baffled when Harry Parker, Bldg. 4-3, runs around in a circle and won't talk to anyone. We can't figure out whether he has lost his false teeth, or if he is just on another rampage.

If Hildebelle Warren, Bldg. 4-3, appears to be sleepy these days, it is because she has to sleep standing up. Hilda reports that all the slats have fallen out of her bed.

Marie Gelvin, Bldg. 4-3, was the recipient of an "especially nice" piece of candy recently. Come on, Marie, let us know who your secret admirer is.

Evelyn Baker, Bldg. 4-3, seems to have an irresistable charm. We would like to know how to get it, Evelyn.

Maxine Mariotte, Bldg. 4-3, spent the weekend in another city. When she awoke in her hotel room, she could hardly imagine where she was.

John Deahl and Ellis Bleke of Bldg. 4-3 have a heavy bet with one another. We are wondering if it is a love affair that is costing the boys so much.

An Everyday Occurence For Jim

Looks like a nice catch but pulling them in is just an everyday affair for Jim Sivits who retired on pension in 1937 after thirty-two years of service at the Fort Wayne Works. Jim will probably be glad to tell where he caught the above mess. If interested write E. J. Sivits, 943 Poppy Avenue, Los Angeles, Calif.

Kitchen Korner

Now that November has been duly ushered in, we find ourselves catering to her serene and serious quietude. Fallen a victim of the mood for meditating, we'll try to elevate our minds to a more serious trend of thought and an aim for achievement. This accounts for our plunge into an unknown field; we feel we would like to play our part in the publication of the General Electric News.

Rivalling Ripley is the strange fact that practically all new-comers to our department complain of acquiring additional avoirdupois, so to speak, after a short period of time. We wonder why. There is an exception to this phenomenal phase, however—"Marse" Garrett reports a loss in body weight. But Mary, Thelma, and "Micky Mouse" Marie would like to eliminate their none-to-welcomed excess baggage.

Deep from our dreamery come these memories at random:—of Amy and how nicely she wears her bright red turban;—Nettie's enormous, black, floppy hat;—the perfect color schemes red-haired Ruth uses to accentuate her lovely hair;—"Marse" Garrett's soft-as-a-soap-ad complexion;—that spontaneous laughter coming from dark-haired Ruth and Hazel;—in striking contrast to all of our gabby girls;—Seth, our Silent Lad;—Ray's new haircut and Jakey whistling "Amapola";—also sweet little Alyce T. in her blue gown (we mean uniform);—Eva Lynn combing her long, blonde tresses;—and our pet the back cat in white boots, slinking in from nowhere and captivating the affections of all the kitchen kids.

Along the poet's row we find our little niche and contribute the following:

"On Gum"

There is nothing so distressing
And nothing quite so glum
As to find so unexpectedly
That nasty wad of gum.
We find it on the dishes,
We find it on the trays;
It plays havoc with knife and fork,
And it tears our nerves to frays.

That's all now,
The Kitchen Kid,
Bldg. 16-1.

Famous Last Words: "How about that?"—uttered by Jack Kearney, Bldg. 19-5.

Winter Street News

Jerry Gage (Bert's son) must have had a very good reason for sitting so quietly at the Notre Dame game. And the lady near so very kindly slipped him a hair pin. . . . George Charleston wants everybody to know about the arrival of his new baby girl. He reports that he would have called all his friends on the telephone, but that he ran out of nickels. . . . Bluegill Rockhill, Crappie Ellinger and Hill Billy Thomas have bragged about their fish so often that when they were shown an honest to goodness catfish, they just turned up their noses, and we mean turn up because this catfish had four legs and plenty of whiskers. They hope they never see or smell anything like that again. . . . A group of girls from the office gave a farewell party for Vange Robinson, who left the company last Friday to take up housekeeping in Lima, Ohio. Everyone wishes her all the luck possible and hope to see her again soon. . . . Rita Wagner is definitely and indubitably planning to take a one way trip to the altar next Saturday. Her department pals don't know whether to hang castanets or bells on her that morning because there's going to be a lot of trembling going to waste that could be utilized for incidental music. Anyway, a lot of good luck, Rita, and don't buy any of those buildings for sale in New York.

Sunbeams From 17-4

When the census taker comes around again there is a question that Bob Bennett and Dave Slater are going to ask him, and it doesn't pertain to the weather.

Gladys Balyeat had a birthday last week and passed the candy, but she wouldn't say how many birthdays had gone by.

Is Dorothy (Eve) Wilhelm trying to get herself an Adam with all those delicious looking red apples?

There is nothing slouchy about little Bess Geller, when she goes out to get her man she comes home with a Sergeant. The lucky fellow is Sergt. Ray Fleischer of Camp Shelby. They were married at the Rectory of St. Peter's church on October 21.

Thought for the week: The men who try to do something and fail are infinitely better than those who try to do nothing and succeed.—Lloyd Jones.

Granny.

Sleuthing In 4-6

"Now I have the floor," said Denton Manecke as his boarding-house reach failed him; and over he went, chair and all—thereby presenting a graceful tumbling act to an entranced audience. . . . Norma Sutorius is spending the week at home in an attempt to recuperate and to feel better. We hope she will come back feeling very fit. . . . Dorothy Gerdom Crosbie returned from her honeymoon to find her desk all decorated in pink and white. She was presented with a lovely pair of lamps as a gift from her co-workers. Again, our best wishes to you, Dorothy. . . . Vera Berning really got in everybody's hair at the Elex Halloween dance last Friday night. She made the rounds of the dance floor with a basket of confetti on her arm, and saw to it that all the dancers were well decorated. . . . Congratulations and best wishes to Mr. and Mrs. William Hessert, who are the proud parents of a new daughter. . . . With all the changes going on in Bldg. 4-6, perhaps we ought to set up an information booth. Oh, well, just find your way around—that's our motto. . . . Another red head comes to Bldg. 4-6 in the personage of Harold (Red) Braden, who will take up his work in the Raw Materials Section. We welcome you, Harold, and hope you'll find Bdg. 4-6 the best place in which you've ever worked.

Waneta Chester, Bldg. 4-1, wears the ring the boy friend gave her about three weeks ago. We wish you luck, Waneta.

Will somebody please help in the search for Percy, Roxanna Richey's, Bldg. 4-3, dream man? So far, the Romeos have all proved to be nightmares.

A prominent magazine tells us in one of its columns that a good way to preserve eggs is to place them in liquid glass. In this manner you can keep them anywhere from six months to a year. However, the writer neglected to add that when you opened them after a period of six months, you should do so with a revolver at fifteen paces and then jump on a fleet chestnut horse and get out of the county before the nut-brown flavor catches up with you.

Virgil Foland, Bldg. 4-4, must think winter is almost here as he is starting to grow a mustache.

Elex Announces Social Program

With last Monday evening's party "Call of the Colors" officially opening the new Elex social program, a full calendar of events is announced for the coming months. These include the annual Christmas party, a theater party at the Civic Theater when "Smiling Through" is presented, an amateur night program, the annual Easter party, a fathers' and mothers' party, and a garden party. Other events include dances for service men, excursions, socials, and the collection of gifts for distribution to orphans on Christmas.

G-E CLUB DANCE

The regular G-E Club dance will be held tomorrow evening in the Club gymnasium. All G-E employees and their families are invited.

Hoot Mon! Next Tuesday is November 11, the day 23 years ago when the world was made safe for democracy temporarily. But dinna think ould Sandy will make jokes about the day, or speak lightly o' the heroes who gave their lives in World War No. 1.

But, like as not, and it's more like than not, we will start out with Armistice Day and end up with old Sandy's favourite topic. Weel, then, why drub around the shrubs—let's get right doon tae business.

There are two good reasons why the Armistice didn't last. And these same reasons would upset our Cost Reduction efforts, too, if we'd let 'em.

Reason No. 1. WE ALL TOOK IT FOR GRANTED. Everybody who assumed it was all fixed up and we could quit our everlasting vigilance may also assume that we are O.K. on our costs, we've got our competitors on the run, we're not wasting any vital defence material, everybody is satisfied, etc., etc. Weel, that's one good way NOT tae keep everybody satisfied long.

Reason No. 2. WE DIDN'T ALL CO-OPERATE. If we had all, as nations, cooperated, and had worked together tae make it a success, it would hai been a success. Need I even say that tae make cost reduction a success, we ALL must get into it. We ALL must watch every possible violation o' good design or workmanship (especially in ourselves) and we ALL must never let ourselves lapse into carelessness.

Ah, yes, tae make an Armistice, or a Cost Reduction program work, ye hai tae use the same tactics, BUT, there'll never be an armistice in our fight tae reduce costs, reduce waste, or conserve material.

Cousin Colin, for one, couldn't stand such an armistice. He thumbed a ride with McNamara (Uncle McWell's friend who mutters tae himself).

"Hoot Mon", Colin told me afterwards, "What a wasterel. He was sae busy muttering tae himself that once he forgot tae shut his motor off going doon hill."

Decatur News

Donald and Eileen Bieberich, son and daughter of Arthur Bieberich, Decatur G. E. employee, will broadcast over station WKRC, Cincinnati, Sunday, November 9, on The Amateur Review from 10:00 to 11:00 A.M. Central Standard Time.

Most of you have heard these children play their accordians, and we ask you to listen in and vote for them if you think they deserve to win. Prizes will be awarded according to the number of "fan mail votes" received.

Pvt. Pat Murphy returned to Camp Shelby after enjoying a ten day furlough with relatives and friends. Pvt. Murphy was among those who were with the army in the recent maneuvers in Louisiana.

The second shift girls of Section 13x81, Bldg. 4-3, held a wiener roast after work last Friday night. Several ate too much, but other than that everything was O.K. Those present were: Sylvia Bowers, Norma Beach, Martha Ruhl, Esther Craghan, Edna Wolf, Dolores King, Lillian Bergman, Lee Jacobs, Don Beers, Chet Ruhl, Carl Goodwin, Don Keck, Bob Allersmeyer.

NEWS THROUGH THE PLANTS

Motor Generator Static

Horses . . .

"Give a man a horse he can ride". This is also LaVerne Englebrecht's sentiment, for she has encountered plenty of horse trouble of late. It seems that last Sunday, "Sunshine" (her pet name) decided to enjoy an exhilarating ride in the crisp Fall air. So, she, together with some of her pals, made a trip to a local riding academy and obtained steeds for the afternoon canter. This ride had hardly started until the horse looked around, saw who was on its back, stopped, braced all four feet, started to eat grass, and no amount of persuasion would cause the critter to move. This was most embarrassing to the owner and he immediately gave her another horse. After traveling a few hundred feet this animal repeated the same performance as its predecessor. This was too much for "Sunshine", who in righteous anger dismounted and spent the afternoon sitting by the stable door while her chums rode and rode. Horses are funny critters.

The Gleamer . . .

If you folks have noticed a light bobbing and flickering on Broadway near the Pennsylvania elevation, do not be alarmed; it's neither spirit lights nor a will-o'-the-wisp. According to his pals, Lewis Fox visited a restaurant the other evening and after storing away a hearty meal handed the cashier a fifty-cent piece and received two dimes in change. Dropping the change in his pocket, Lewis started his trek down Broadway; but arriving at the elevation thrust his hand into the pocket and discovered not two dimes but one hole. His chums report Lewis was frantic, he rushed back to the restaurant, borrowed a flash light and began his search, but of no avail. However, his Scotch blood continued to itch and he returned in the evening for another look hoping against hope that the dimes would still be there—hence the light we mentioned.

Ha! Ha!

Fred Paul has discovered a way to beat the shortage of anti-freeze. Fred (the slicker) has contracted with several service stations to save the discarded anti-freeze solution drained from car radiators. Just how our hero processes this waste material is a secret known only to him, but he claims when the work is done, it is as good or better than new—and look at the savings. Remarks Fred—"You guys can come around this winter with both your radiator and yourself steaming, but me, why my old buggy will think it's June in January. Ha! Ha!

Famous Last Words

We, too, have famous last words, such as uttered by Leonard Gruber. Quote "Hello! Yes! No fooling!" Unquote.

Sayings of the Week

Jerry Frye remarks: "It's usually the fellow who doesn't know any better that does the thing that can't be done. The poor guy doesn't know it can't be done, so he just goes ahead and does it!"

Note. Because of the wisdom of his sayings, Jerry has gained the title of "Confucius" among his co-workers.

Poison Pen

Several persons have written in requesting counsel on questions pertaining to the daily problems that arise in their lives. Old Poison Pen being a humanist will attempt to answer these queries and return joy and sunshine to such worried folks.

Dear Poison Pen: I am fifty-five years of age, married three times, am fat, have false teeth, five children and $150,000 in the bank. A man twenty years younger than I wants to marry me. Do you think it's me or the money he is interested in?

"Hopeful"

What a smile Florine McMichael, Bldg. 26-3, has been wearing. Suppose that big diamond on her left hand has anything to do with it?

The girls from Bldg. 26-2 send their congratulations to Vona Redding.

Dear Hopeful: How could you ever think it is the money? Even Poison Pen feels a strange emotion after reading your letter. Send name of your bank.

Dear Poison: My husband on occasion hits me in the eye. Why?

"Urgent"

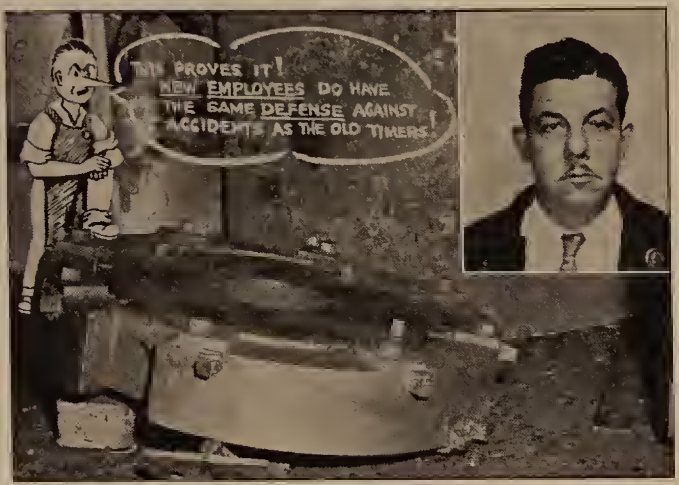
Dear Urgent: You keep your guard too low.

Dear Poison Pen: A friend reports he saw my wife down town with a tall, handsome man. What do you think?

"Worried."

Dear Worried: It's a lie. I don't even know your wife.

600 Pounds Of Steel . . .



THIS PROVES IT!
NEW EMPLOYEES DO HAVE THE SAME DEFENSE AGAINST ACCIDENTS AS THE OLD TIMERS!

. . . fell on a New **Employee's** toes in Bldg. 27 recently. The x-ray picture of his toes taken after the accident shows only a slight fracture of the bone. Did he have unusually tough feet? No! Just ordinary toes—but protected by the tough steel in the toe cap of his Safety Shoes.

The employee, Harry Beam, and the 600 pound steel ring are shown in the above picture. Harry has approximately six months' service. He started the Safe Way.

H. L. Smith, Safety Engineer.

6-B And 4-B Buzzes

"Jake" Sappington bought a pair of trousers Saturday that were too long, so he had "Uncle Levy" shorten them. Monday "Jake" came in wearing the right pant leg at half mast. They were shortened twice on the same pant leg. We suggest painting your leg, "Jake," and it won't be noticed. (Much.) . . . Bill Walt and his checker players enjoyed a drubbing from Al Ray and his number boys last Thursday night at the G-E Club Room. Maybe we ought to have more checker boards at the noon hour or study the book of plays a little. . . . Rip Van Winkle had nothing on Walt Waltzer when it comes to sleeping. He can stop working for a minute and be sound asleep the next. . . . Our "strawberry blonde" in the Repair & Return Section surely gets a lot of attention from the fellows. . . . Suelzer has become the proud father of a nine and one-fourth pound baby girl. Congratulations, Bernie! . . . We are happy to hear that Bonnie Garrell has been released from the hospital.

News From 17-2

A wiener bake was enjoyed recently at Foster Park by the following girls in the insulating core department: Charlotte Blauvelt, Margaret Doctor, Irene Winnicke, Marge Ponsot, Adele Klench, Miriam Bireley and Ina Smith. Ask any of the girls what a river rat is. . . . We think there should be more talent scouts around Fort Wayne so that when Irene Winnicke does her stuff on the ivories her efforts are not all in vain. . . . Why doesn't someone suggest that the telephone company change their charge from a nickel to one cent on pay telephones. If this were done Charlotte Blauvelt wouldn't have so much trouble trying to make a call. Just too many pennies in Charlotte's purse.

19-4 Nibbins

Olympia Derloshon is having quite a lot of trouble trying to keep awake. As you can guess, the boy-friend is home on a vacation. . . . Workers in Bldg. 19-4 would like to know what Robert Haslup's real job is. . . . Louise Sinn is holding down two jobs, husking corn in the daytime and working in the factory at night. It's O.K., Louise, if it don't get you down. . . . Vilena Herbst is now back to work after being in an automobile accident. Glad to have you back again. . . . Here's hoping Cecilia Pranger, Bldg. 26-2, gets up in time to get her own breakfast, so her husband can sleep longer in the morning. Good idea, don't you think so, Eddie?

Gene Fosnaugh, Bldg. 4-3, is really kept so busy taking in the Ossian Bears' and Northwestern games that he does not get to any really good football games at all.

George Auer, W. Beer, and R. McVay of Bldg. 4-3 are still trying to solve the mystery of the disappearing quarter.

Don't be frightened girls. That black fuzzy object hovering near George Reker's desk, Bldg. 4-3, is only Ivo Bubb's sweater.

Herman Hake, Bldg. 4-3, was seen having great difficulty in finding his clock card the other day.

Uncle McWell Of 26-2

GENIUS AT WORK

We've been dipping into a collection of epigrams by Ambrose Bierce, entitled, "The Devils' Dictionary". For your pleasure, here are four typicals that tickled our funnybone. Now we'll tickle yours.

BAROMETER. An ingenius instrument which indicates what kind of weather we are having.

PEACE. In international affairs, a period of cheating between two periods of fighting.

PATIENCE. A minor form of despair, disguised as a virtue.

BORE. A person who talks when you wish him to listen.

Not to be outdone we've had the colossal nerve to dash off a couple of quickies ourself. It means nothing to us that a certain minimum of hairpower is required to generate definitions as pungently witty as those conceived by Mr. Bierce. Nothing at all. Why, our favorite stamping ground is that same enclosure—"where angels fear to tread." And believe us, brothers, we get into some terrible jams too! But back to our own handiwork:

BUDGET. As helpful as yesterday's racing form — a financial statement which shows how your salary was misspent—an accounting theory based on the unhappy premise that your wife can resist bargain sales—a delightful device that helps two to starve as well as one—a thing, with or without which, you're just as broke.

VACATION. A two week institution, sponsored by resort bureaus and travel agencies, in collaboration, to produce national exhaustion —the great annual migration from the rigors of civilization to the joys of lumpy beds, mosquitoes, sunburn, indigestion, and the inevitable frantic search for Junior who "was standing right here a minute ago!"

BEFORE ME, ALPHONSE!

Much like the infernally polite French twins, Gaston and Alphonse, we should like to publicly thank our compatriot, "Poison Pen", for his flattering approval via last week's "Motor-Generator Static" column. After all, he didn't have to be so nice, unless he meant it. Yes sir, brothers, he is the salt of the earth—a friend to the end—nothing, we tell, you, is too good for him.

And now he can send us back our quarter!

QUESTION AND
ANSWER DEPT.

In order to satisfy the hundreds of readers, who doubtlessly are troubled by many perplexing problems, we are opening up our Question and Answer Dept. That's right, lady, at no extra cost! Just send your questions to "Uncle McWell", c/o the WORKS NEWS, Bldg. 16-3. No question is too slight to merit our fullest consideration. Remember—if we can't answer it—no one else will. We'll hide it first!

And look, here is our first customer:

Dear Uncle McWell,

The girl of my dreams is close at hand, but I can't have any dates because she already has a boy-friend. What can I do?

Gale (Sleep-Walker) Meeks,
Bldg. 26-2.

Dear (You Must Be Tired) Gale)

Just send for our special pamphlet entitled "Eliminating the Middleman", or "Two is Company and Thee's a Crowd!"

Uncle (I'm a Dreamer) McWell.

John Zimmerman, Bldg. 4-3, would make a good traveling salesman. For reference ask the girls in the Small Lot Section.

McKenzie, Marie Francies, Vilena Herbst, Clifford Smead, Velma Neumann, Edward Brockhall, Howard Reed, Willard Arnold, Richard Gayer, Mildred Fredricks, Lois Hedges, Harry Prange, Jr., Ed. Auth, Ruth Lesh Stockman, Russell Johnson, Richard Kiefer, Gladys Castor, Stephany Hilker, Andrew Heltzel, Mildred Steward, Kathleen Meyer, Betty Crum, Jean Rowan, A. Blomberg, Patricia Timme, Virginia Romey, Geo. Fann.

Left the hospital: Bess Brown, Elva Platter, Hollie Hosler, Mary Peterink, Loretta Taylor, Helen Cooper.

Deaths

Earl K. Spiker, engineer in the Motor-Generator Division, died on October 31 of a heart attack. Mr. Spiker, a General Electric employee for the past twenty-two years, was ill only a few days. He was a member of the Simpson Methodist Church, and a member of long standing of the American Legion Post No. 47 drum corps. Funeral services were held at Coon Rapids, Iowa.

Employees of the Tool Division extend their sincere sympathies to William Milledge in the death of his son.

George Arnold of Bldg. 4-3 put a lovely diamond on Lillian Hitzeman's, Bldg. 4-3, hand last Saturday. Do Lillian's eyes ever sparkle now! Mr. Ellis Bleke of Bldg. 4-3 is speeding up the Castle at Pretty Lake to receive the wedding party.

NEWS THROUGH THE PLANTS

Is Zat So?

We think Elton Throndsen, Bldg. 17-1 office, should be warned against winking and flashing that million-dollar smile as a way of greeting. You had better be careful Elton, or some of these Middle-western gals might take you seriously. . . . Because of his streak of bad luck Dan Hoover gets our sympathy this week. First he has a streak of absent-mindedness, climaxed by his placing a pail under a barrel, turning the faucet on and then forgetting about it. Secondly, Dan gets a sty which causes his eye to swell nearly shut. Dan says "Everything happens to me." . . . Harold Hoffman, who was home on leave from Camp Shelby, Mississippi came in to visit us the other day. He looked really handsome in that uniform and we're a bettin' the new wife is proud of her soldier husband. The gang wishes you both lots of luck and happiness, Harold. . . . We wonder what has happened to Bldg. 17-1's other contribution to the Army by the name of Walter Nix! The gang is anxious to hear from you Walter so get busy and write us a line or two. . . . If you have noticed that tired expression on the face of Henry Papenbrock don't be too alarmed! Henry explains that he and the Mrs. are moving into a new home. . . . Hoy Bastian, who is an instructor of First Aid and two of his pupils from Bldg. 17-1, Joe Kramer and Ernie Lawyer, contributed their services at the State Corn Husking contest recently and were placed in charge of a First Aid Booth. Fortunately, there was not enough need for First Aid to keep them busy so Joe and Ernie decided to take some pictures. Presently a distinguished looking man appeared in front of the First Aid booth and Joe proceeded to get this gentleman to pose for a snapshot. Later in the day Joe and Ernie were quite surprised to learn that this man was none other than Governor Schricker. We hope that picture was good, Joe. . . . John Siemik is back to work and seems to be none the worse after his recent accident but he says he is just a little wiser. . . . We hear that the little blonde inspector's name is Laura Haiflich. Welcome to the gang, Laura! All we need now is a red-head. . . . By this time, Frank Hickman should be a Thirty-second Degree Mason if he was able to "ride the goat" and receive all his degrees at the Scottish Rite Convocation. Congratulations, Frank. . . . The gang wishes Ellis McMullen a speedy recovery and hopes that he will soon be back to work.

I am still,
The Question Mark

26-5 Tool Bits

Earl Lenz, who has many accomplishments to his credit, has added another one to his list. He has performed the marvelous feat of how to bend a hole. P.S. (Pressing out guide pins on different height parallels).

Mouse—Gebert took a trip to Brown County over the week-end. After his return he said that he followed the back roads around the park and saw better scenery than was in the park itself. We are wondering whether the scenery was all landscape. We hear that he took some pretty nice scenery along.

The following Want Advertisements are urgently requested for aid to the following:

A draft proof ventilator for Ross Cohagan.

A frigid zone for polar bear Hank Wittber.

A new song sheet for Henry Gick.

A better South Side Football Team for Rufus Niblick.

A new bobber for Art Dicke.

A larger hole under the hood of Fred Fitch's car.

D. Windhorst to H. Breidenstein: "One of these days you'll kick the bucket from smoking that old pipe of yours. Whew! It smells like burnt potatoes."

Breidenstein: "Well, you ought to know. You do a lot of cooking around home."

Did wearing a pair of George Schlemmer's overalls or was it the Halloween party that he wore them to, make Lyman Steele forgetful. Anyway he forgot his identification button the following morn, and returned home to get it and couldn't find it 'till noon.

Jack Schemehorn has his dog well trained. He says when he wants the dog to go out of the house all he has to do is open the door, yell loud enough to be heard three blocks away, and throw half a dozen wieners outside and the dog goes right out. We wonder what Jack would do if he got laryngitis or run out of wieners?

George Karns has a new system for bowling. He mixes bowling with politics. Ask George what he has named the head pin.

That dreamy look in Paul Brinkroeger's eyes and the sketches on his bench do mean something. Little wifey wants a cupboard under the kitchen sink.

Johnny Allen has a new way of disposing of candy for the lucky girl friend. He steps on the box and then eats it himself. Shame Johnny! Shame!

Another one of the Transformer gang has pledged his life and liberty away. Carl Swaim has given one of those bright and polished stones to his beloved.

Thisa And Thata 19-5

After giving it much thought, Thelma Pond decided that she didn't like to get up so early in the morning to get to work at the crack of dawn, so she is going to stay at home and sleep, cook and clean to her heart's content. We hope she will be very happy in her role of housewife. . . . Congratulations to Al and Evelyn Bierbaum, who are the proud parents of a baby boy.

Well, we are glad to report that the Waynedale bus is perking at its best again, and that Johnny Deahl and Charlie Sherland, Bldg. 4-3, look very rested. One day last week they and John Trim had to push the bus from Waynedale to Fort Wayne. Both Johnny and Charlie thought it a very hard task, but John didn't seem to mind at all. Could it be that he is so used to resting with a shovel under his arm that he forgot he was to push when leaning against that bus. Better watch John the next time boys, and perhaps you won't have to work so hard.

We wonder if Ivan Butler, Bldg. 4-4, was walking in his sleep the other morning. He came to work with his bedroom slippers on and did not notice them until the cold air struck his little feet. Anyway, we are glad he didn't come to work with his pajamas on, too!

We advise anyone working in the Winding Section, Bldg. 4-4, to hold on to their candy bars as Mary Kleber, Bldg. 4-4, surely thinks they taste better if she can walk up and take a bite.

We wonder who taught Delores Byansky to jitterbug so well.

Rumor has it that the office force in Bldg. 4-2 are talking about a collection to buy C. Sible a high chair. Of course, a high chair seat is farther from the floor than the seat of an ordinary desk chair; but then, if one is strapped into a high chair, there is not much danger of a person falling out of it, which should be an inducement to C. Sible after what happened last Friday, October 31. Anyway, we are hoping Sible was not trying out for the parachute division of the Air Corps.

A group of girls from the Switch and Mechanism Department, Bldg. 4-3, enjoyed a wintry weekend at Adele Kuckuck's cottage at Rome City recently. Everyone seemed to have a good time, even if they spent most of it keeping Adele from getting lost. The girls finally decided the thing to do was to hang a bell around her neck, which proved quite successful. Those who attended were: Fern Truelove, Caroline Hans, Leora Carpenter, Dorothea Kopp, Adele Kuckuck, Charlotte Stanford, and Lois Drewitt of Bldg. 12-3.

19-4 Spot Jottings

Miss Ruth Bieber, of Bldg. 4-3, will become the bride of Max L. Sitton, Bldg. 19-4, at 7:15 P.M., Friday, November 7, at the First Baptist Church. . . . Bertha Kraus of Alexandria, Indiana, has promised to Love, Honor and Obey Art Witzigreuter of Bldg. 19-4. The wedding will take place Saturday, November 8th, at 2 P.M. in the Rectory of the Cathedral.

Scientists who are continually on the hunt for a nail-proof leather for soling men's shoes should extend their research to include some kind of a nail-proof metal to insert in the seat of a man's breeches. Ed Witte would gladly purchase one, and if it stood the test, I am sure he would gladly recommend it to his friends.

The co-workers of Frank Hickman, Bldg. 17-1 wish to extend him their sympathy in the death of his mother-in-law.

"Red" Noyes, Bldg. 12-B, sure spent a hectic week trying to catch up with his trusty brown derby. When the familiar blast of the five o'clock whistle sounded in Bldg. 12-B, last Tuesday evening, Red made a bee-line for the side of the hat rack where he always parks his head-gear, only to find to his ire, that his hat was gone. Red took his stand at the door suspiciously eyeing fellow workers' hats, as they filed by, but still couldn't locate his. So he trudged home bareheaded, on the coldest night we've experienced this year, bitterly bemoaning his fate. Red's search was finally rewarded late the next day when a stray hat was reported found in the cafeteria, which Red never frequents. Red's offering a generous reward for the apprenhension of the guilty party. We can only suggest that you carry a spare after this, Red.

The other day we wondered why Bernie French, Bldg. 4-4, had such a big smile, but we soon found out. Someone had just given her some more buttons to add to her collection. She only has 19,000 and hopes to get more.

"Ace" Cowan, former employee of the General Electric, now stationed at Patterson Field, Dayton, Ohio, visited Fort Wayne last weekend. He receives the WORKS NEWS every week and enjoys reading about folks back home.

Herb Driftmeyer and Lawrence Schuster, Bldg. 26-2, are already talking about the checkerboard cake for Christmas. Herb was for a plain chocolate and Lawrence for a checkerboard—so they compromised on a checkerboard.

Franklyn Keck, Bldg. 26-2, has a nice way about him. No matter how much he is teased, he still can smile. That is what we call a man.

17-2 Office

"Mister Policeman, have you seen a hat blowing down the street?" quoted Luella Franke. It was a brand new one, too, so we can't blame Luella for trying to find it. P.S. She didn't. . . . The girls in the office had another potluck last week—calories galore, but the candy bet is still on. . . . We are glad to welcome Franklin Bercot, a new member of our Planning Department.

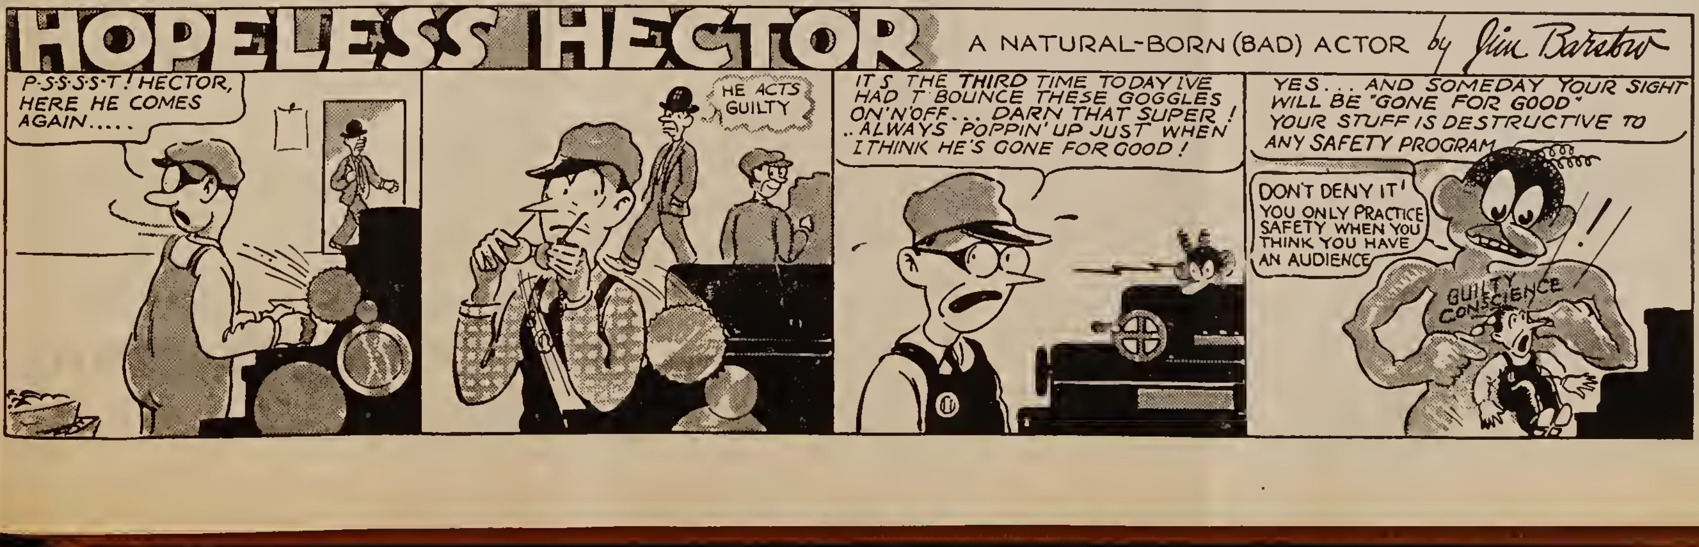
The dog fanciers of Bldg. 4-3 are planning to give a dog show this coming winter. A meeting was recently held and plans formulated for such an event. Art Brandenburger will exhibit his famous hog-dog, Pansy of Cloverdale VII, and hopes to run off with the first prize. Forest Whonsetler will enter his two exceptional Siberian Swamp hounds, Ivan of Ekaterinburg XIV and Sergi of Vladinvostok IX. Harry Parker's famous dog, Sir Buck of Sangehamps will also be on the bench. Many others will be there, as they will have a super display of leaders in the pooch kingdom; and a goodly turnout is hoped for from the members of our floor.

Carl Clevenger, Bldg. 4-3, has forsaken his abode on Wabash Ave. and has moved his family to a new home on the banks of the St. Joseph river. When asked why he moved so close to the river, he explained to us that he likes to be close at hand where the big trout swim—the kind with those big scales; also, that the cooling breezes off this great body of water will act as an air conditioner during the summer months.

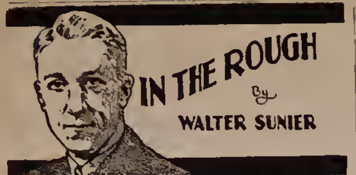
Our literary critic, Alva Biggs, Bldg. 4-3, when reviewing two books of merit recently published, "The Day's of Our Years" and "The Key's to the Kingdom," was very enthusiastic over these two publications and highly recommends them to the literary minded of our floor. Alva is so "hepped" up over good literature that it would not surprise us to see him writing a book himself.

Buck Adams, Bldg. 4-3, is very much impressed with present day methods of manufacture (that is, progressive operations and assembly of the finished product) so much, that he tried it out on his excavation project at Big Long Lake. He used four men and one shovel. He said that he wanted to see if four men using one shovel could accomplish the same amount of work as the same amount of men using a like number of shovels. Not so good, he tells us.

Could it be that Effie Wyatt, Bldg. 4-3, gets special rates from the U. S. Government. Seems as though she can mail an enormous package for only three cents.



HOPELESS HECTOR
A NATURAL-BORN (BAD) ACTOR by Jim Barstow
P-S-S-S-S-T! HECTOR, HERE HE COMES AGAIN.....
HE ACTS GUILTY
IT'S THE THIRD TIME TODAY I'VE HAD T' BOUNCE THESE GOGGLES ON 'N' OFF... DARN THAT SUPER! ..ALWAYS POPPIN' UP JUST WHEN I THINK HE'S GONE FOR GOOD!
YES... AND SOMEDAY YOUR SIGHT WILL BE "GONE FOR GOOD" YOUR STUFF IS DESTRUCTIVE TO ANY SAFETY PROGRAM
DON'T DENY IT! YOU ONLY PRACTICE SAFETY WHEN YOU THINK YOU HAVE AN AUDIENCE
GUILTY CONSCIENCE



IN THE ROUGH

By WALTER SUNIER

The Lord is my shepherd; I shall not want.

He maketh me to lie down in green pastures: He leadeth me beside the still waters.

He restoreth my soul: He leadeth me in the paths of righteousness for his name's sake.

Yea, though I walk through the valley of the shadow of death, I will fear no evil: for thou art with me; thy rod and thy staff they comfort me.

Thou preparest a table before me in the presence of mine enemies: thou anointest my head with oil; my cup runneth over.

Surely goodness and mercy shall follow me all the days of my life: and I will dwell in the house of the Lord forever.

Now and forever, Leo Wallace and Earl Spiker dwell in the house of the Lord, in the house where it is a pleasure to add up the pars and birdies that appear on the score card. Outside of the house the fairways are always green and the waters are still. The greens putt perfectly true and there are no sand traps in the wrong places.

DECATUR SPORTS

G. E. INDUSTRIAL LEAGUE

Art Miller was tops in the G. E. Industrial League last Thursday night as he rolled high single game of 224 and high 3-game total of 597. Art led Mutschlers to three wins over the G. E. Ramblers.

Don Stump's 3-game total of 580 led the West End Restaurant to two wins over the G. E. Dodgers. E. W. Lankenau's 575 was best for the Dodgers.

Bun Keller had two 200 scores and a 3-game total of 572 as Burke's took two games from Doc's Place.

200 scores included: A. Miller 224; Mutschler 200; Marbaugh 202; Laurent 204, Keller 201, 202; McIntosh 213; Appleman 212, 203; Stump 203; J. Richard 203; Cochran 209; E. W. Lankenau 215.

Standings

	W	L	Pct.
Mutschlers	8	1	.889
Burkes	8	4	.667
West End	8	4	.667
Doc's Place	5	4	.556
Dodgers	3	9	.250
Ramblers	1	11	.083

Mutschlers and Doc's Place have three postponed games to play.

MONDAY NIGHT INTER-DEPARTMENT LEAGUE

Bill Heim's 204 was good enough to cop the high single game in the Monday Night Inter-department League. S. Jackson rolled the high three-game total with 548.

Maintenance won 3 from Flanges.
Assembly won 3 from Switches.
Rotors won 2 from Production.
Testers won 2 from Stators.

200 scores included Heim 204, Jackson 202, Howard 202, Roop 203.

Standings

	W	L	Pct.
Maintenance	10	2	.833
Testers	8	4	.667
Flanges	7	5	.583
Stators	6	6	.500
Assembly	6	6	.500
Rotors	5	7	.417
Production	4	8	.333
Switches	2	10	.167

Second Shift Girls Will Hold Party

Elex Club members working on the second shift will have an Autumn Fun Fest on November 12 at the Sears-Roebuck pavilion. Dinner will be at 12:00 o'clock noon and reservations must be in by 2:00 o'clock Tuesday, November 11. Those planning to attend are directed to ride a Broadway car to Oakdale. Signs will be placed on the west end of the Broadway bridge directing guests to the pavilion.

NEW DEFENSE AIDS

A device for indicating to airplane pilots the intensity of electricity in a nearby thundercloud has been developed in the general engineering laboratory of the Company.

Called a "Cloud Charge Indicator for Airplanes," it is a delicate instrument containing a Neon tube and a micrometer and can be mounted on the panel board of the plane. The glow of the Neon tube serves as a signal for the pilot.

While searching for a special loading resistor to be used in testing diesel-electric sets for submarines, engineers of a large diesel engine company recently evolved a novel application of General Electric Calrod heaters.

The requirements called for a resistor that could be operated continuously at varying loads and voltages over long periods with few shut-downs. Continued shut-downs would require the tests to be started over at considerable cost. Another requirement was light weight, as the resistors were to be located between the roof trusses, throwing all the weight on the roof.

Five hundred and sixty welding trainees are being instructed in the fine points of arc welding at the Banning School, Los Angeles, so that they can do their part in welding the proposed "bridge of ships" from the United States to England. Thirty General Electric arc welding machines are being worked 24 hours a day, 6 days a week, at this school, to help prepare the students for work in nearby shipyards. The Banning School is a division of the Los Angeles City School District. It is operated out-of-doors, and is lighted by floodlights at night.

News Around

Gertrude Bertsche, Bldg. 4-3, was so anxious to see her name in the Works News last week, but failed to do so. Try your glasses this time, Gertie, and you may have better luck.

The girls of Bldg. 4-3 wonder if Phil Tilford ever heard the old saying, "Practice what you preach." Do you suppose he put those tubes on the floor just so Ethel could pick them up?

Clara Zemper, Bldg. 4-3, discovered that she has a twin working here, for one night her coat disappeared. It returned the next morning adorning the shoulders of the guilty culprit, Viola Grover, Bldg. 4-3. Were you so anxious to see Bill that night, Viola, to try and explain how sorry you were for exchanging lunches with him again. All Bill gets is a slice of bread, no butter, several stalks of celery, and an orange; while Viola has three or four meat sandwiches, pie, cake, fruit, etc.

SCIENCE FORUM – by L. A. Hawkins

Q. Why don't fluorescent lamps turn on instantly the same as incandescent lamps do?

A. Fluorescent lamps always hesitate for a short time before turning on so that the filaments will have time to warm up. This is accomplished by means of a small thermal timer which opens a contact a few seconds after the power is applied. Now if this contact should open a little too soon, the lamp will flash for an instant and then go out again until the starting switch recycles.

Q. How is it possible to tell if a scratch on a rock was caused by the ice during the Glacial period?

A. A student should familiarize himself with the appearance of glaciated rocks by studying known specimens and comparing them with those suspected of being of glacial origin. After a little study, one can readily detect genuine glacial scratches.

Q. Is the value of radium based on its properties of radioactivity or its scarcity?

A. The high cost of radium is based on both its desirable radioactive properties and its scarcity. If it did not have desirable properties it would not be in demand, and if it were abundant it would not be expensive.

Q. Is there any limit to the extent of getting power from the compressed fuel in a gasoline engine?

A. There is a limit. It is the ignition temperature of the fuel, the temperature at which the mixture spontaneously explodes. If you compress an explosive mixture, its temperature increases. By carrying this process far enough, the mixture will explode without any ignition. This is the principle of the diesel engine, and it is what can be called the limit to which the fuel can be squeezed.

Q. In an electric circuit with capacitance only, the current leads the voltage by 90 degrees. If you must have voltage or pressure before you have current, how can the current ever lead the voltage?

A. It is because the capacitance must be charged in order to build up a voltage across its terminals, so that the flow of charging current must precede the rise of voltage. A rough mechanical analogy is that of a force acting on a body through a spring. Although force is needed to produce motion, if a force is exerted through a light spring, the spring must be compressed before the pressure can build up; so in a cyclic application of the force, the motion of the spring leads the force or pressure in phase.

Q. Why does cellophane curl when it is held near a flame or held in the hand?

A. Cellophane curls because one side of it takes up moisture. When membranes of plastic material absorb moisture they become limp, and when they dry out they become taut. When cellophane is placed over the palm of the hand, the moist heated air from the hand makes the side of the cellophane closest the palm stretch while the opposite side remains taut. This causes the edges to curl up. On the other hand, if cellophane is held over a flame, it will curl in the opposite direction, indicating that the side closer the flame dries out more than the other side. If these experiments are tried with moistureproof cellophane very little, if any, curling will be noticed.

Q. What is the difference between phosphorescence and fluorescence?

A. Both of these are words and the distinction between them depends on how they are defined. The generally accepted definition of fluorescence is the emission of light by a luminous substance while it is being acted upon by some exciting agent such as x-rays, ultraviolet, electrons, and alpha particles. Phosphorescence is the continuing emission of light, or afterglow, of a luminous object after the excitation of the exciting agent has stopped.

"It's a Joke"

A policeman was questioning a man pinned under his car in an accident.

"Are you married?"

"No," was the answer, "this is the worst fix I was ever in."

* * *

"Doesn't this ship tip a great deal?"

"Not that I've noticed, ma'am. She leaves that to the passengers."

* * *

"What are you children playing?" asked mother.

"We're playing at church," replied Jackie.

"How nice!" said mother. "But worshippers shouldn't whisper in church."

"We know that, mother," said Jackie, "but we're in the choir."

* * *

"Who was that peach I saw you with last night?"

"She wasn't a peach—she was a grapefruit."

"Why a grapefruit?"

"I squeezed her and she hit me in the eye."

"Hum, just a little squirt."

NOTICE

Gecode Club is still taking orders for Christmas Cards—a box of twenty-one cards for one dollar. Orders may be placed with Anne Murtaugh.

"Hurry Up Now! Pa's Waiting!"

THE kitchen stove used to feel pretty good on a winter's Saturday night when the thermometer was down around zero. So did the heated flatiron in the foot of the bed. But how many of us would trade the comfort and privacy of our modern, heated bathrooms for the cramped discomfort of the wooden tub and the sting of the homemade soap? And who wants to lug out the water afterward and mop up the kitchen floor?

There are a lot more of today's home conveniences that we wouldn't trade for their counterparts of the "good old days." The electric washer, for instance, for the scrubbing board; the electric light for the messy coal-oil lamp; the furnace for the parlor base-burner.

Most of us are incomparably richer than the people of a generation ago—not so much in money, perhaps, but in the things our money will buy. And in most cases these are the products of American industry—manufactured articles that have been developed by industry, improved, made less and less expensive so that more millions of people can afford to own them.

In almost every manufacturing improvement that has made this progress possible, electricity has played a vital part. And the scientists, engineers, and workmen of General Electric, who have done so much to make electricity more useful, are still seeking ways for electricity to help in the creation of still More Goods for More People at Less Cost.

G-E research and engineering have saved the public from ten to one hundred dollars for every dollar they have earned for General Electric

Rubinoff On Elex Club Program

New Administrator

Chester Lichtenberg

Announcement is made by Works Manager M. E. Lord of the appointment of Chester Lichtenberg, staff assistant, to the position of Administrator of Product Quality. Mr. Lichtenberg, a graduate of Columbia University, joined the General Electric Company in 1907. He holds the commission of colonel in the Engineer Reserve.

G. E. Plastic Products Receive High Honors

The Plastics Department of the General Electric Company received highest honors among the country's producers of finished plastics products in the annual modern plastics competition conducted in New York by the Modern Plastics magazine.

Among the first prizes awarded was one for a clarinet reed engineered and developed in the Fort Wayne Plastics Department and an honorable mention was given for a duplicard being manufactured here at the present time.

General Electric was given four top awards, and two honorable mentions for products manufactured during the past year. This gives the company representation in six of eighteen classifications from which the judging was determined. The awards represented products made in each of General Electric's five plastics plants and included articles made from each type of plastic molding.

G-E Squares Hold Hard Times Dance

One of the most enjoyable affairs in the history of the G. E. Squares was held last Friday evening in the form of a "hard times" dance. Approximately fifty couples attended the dance which was held in the Log Cabin with Dannecker's orchestra providing the music. Prizes were awarded dur-

Million Dollar Phenol Plant At Pittsfield Works

To Counteract Shortage Of Ingredient Used In Manufacture Of Plastics

Plans for the construction of a million-dollar plant for the manufacture of synthetic phenol were announced this week by William H. Milton, Jr., newly appointed manager of the Plastics Department at Pittsfield. The action is being taken at the request of the Office of Production Management, to counteract the shortage of phenol, a principal ingredient in the manufacture of a certain type of plastics.

The proposed plant is expected to be in operation by September, 1942. It will consist of four structures resembling the layout of an oil refinery. The principal buildings will be single story structures located east of the Company's present plastics plant in Pittsfield.

The phenol plant is the outgrowth of experimental plant development, conducted here for the past two years under the direction of Dr. G. F. D'Alelio, director of the Plastics Department laboratory. It is expected to produce about 75 per cent of present requirements for this material.

Famed Violinist To Be At Annual Christmas Party

Appearances Sometimes Are Quite Deceiving

George Sanford of Schenectady, chairman of the Company's General Safety committee, a truly staunch advocate of all forms of safety devices, is taking a gentle ribbing these days for his apparent disregard of the safety rules he so earnestly espouses. It all happened because of a picture published in the October Candid Camera Captures,

(Continued on Page 9)

Works News To Far Northern Reaches

The Fort Wayne WORKS NEWS will add to its distribution points the snowbound shores of Iceland when this week's issue reaches Francis W. Zuber, G. E. employee in the service. In a brief note to Frank Goetz, Bldg. 18-B, Francis says, "I suppose you wonder why I haven't written, but have been on the go. I'm up in Iceland now, and having a swell time. Will you change my address for the WORKS NEWS. This sure is some experience for me."

Dave Rubinoff, famed violinist, will be the major attraction at the Elex Club annual Christmas party to be held on December 10, it is announced by Club officials. "Rubinoff And His Violin" became a familiar expression in almost every American home some years ago when the maestro was first starred on one of the leading radio programs, and his masterful playing and strong personality won him a following that has endured during the succeeding years. This is probably Rubinoff's first appearance before a group of the nature of the Elex Club and the organization's officials feel elated in being enabled to bring him here.

In addition to Rubinoff's concert the regular Club Christmas program will be presented. There will be two parties, one in the afternoon for the second shift members, and one in the evening. The same program will be presented at both parties.

The parties will be open to members of the Elex Club only and those that attend will be required to present their Club membership cards before gaining admittance.

Owing to the popularity of Rubinoff a capacity attendance is anticipated.

Building A Career Through The Apprentice School

NOV. 3, 1941
FORT WAYNE

Front row, left to right—Charles Zolman, George Horner, Mervil Lowden, Marion Bailey, James Kelley, Albert Schaaf, Glen Reynolds, Clifford Dunten, Albert DeVaux, Jamse Young and Matt Wiegand. Back row—Woodrow Hursh, Richard Clancy, Harmon Westrick and Elmer Ueber.

We are pleased to present in this issue an article on the Apprentice School prepared by Jim Kelley, a member of the school. Each year a limited number of young men are admitted to the school and given a four year course of intensive training that offers them almost unlimited opportunities for a successful career. The above group represents a metallurgy class, which is under the instruction of C. D. Dilts, of Central High School. The article will be found on page 2, as well as additional pictures on pages 2 and 3.

Apprentice School Performs Important Function • • •

Training selected students for skilled work the Apprentice School is playing an important part in our National Defense Program. Some idea of the training given its students is offered in the above pictures.

In the foreground, top row, left to right—Clarence Freeman, Lewis Pooler, and Richard Tobias operating screw machines. Right—Lewis Becker and Richard McNiece operating shapers and roughing out punches for punches and dies. Second row—Bench men, Clarence Meyers working on tension devices. Merwood Dunlap putting the finishing touches on aluminum cases, Albert Schaaf working on a punch and die and Mervil Lowden completing a special type winding machine. Right—Elbert Fuhrman and Max Buckmaster operating cylindrical grinders.

Bottom row—George Lambroff turning a flange in a boring mill. Right—James Young grinding a shaft in a cylindrical grinder.

Apprentice School

By Jim Kelley

The Apprentice Department of the Fort Wayne Works was organized in 1913 with eighteen young men starting as apprentices. Since that time the school has progressed considerably both in size and type of education which can be obtained. In the history of the school there have been 538 graduates, of whom 327 completed the machinist-toolmaker course, 124 the draftsman course, 76 the electrical tester course, 9 the pattern maker course, and 2 the plumbing course. Of these 538 graduates, approximately 75% are still employed by the General Electric Company.

The school is quite unique in that it not only prepares these young men for the future by enabling them to hold responsible positions but pays the apprentices a very substantial wage while in training.

The young man who is choosing his life's work has a difficult problem before him. His parents, teachers and friends often share his responsibilty in arriving at a conclusion. He may be influenced only by the immediate financial returns to be obtained by following a certain line of work. Often the selection proves to be a position which does not advance beyond his starting rate of pay.

Obviously, in selecting a trade for life's work, it is far better to consider the future and to investigate the possibilities for development.

The General Electric Company offers to young men, through its apprentice courses, an opportunity to receive a practical education and a training which fits them for a useful, interesting, and profitable life in the electrical industry.

The apprentice courses have been carefully developed under the direct personal supervision of practical educators until they have reached a high standard which is recognized throughout the industrial world.

The courses consist of intensive training in shop and class room work for a total of 7,065 hours or approximately four years.

All young men who obtain admission to the Apprentice School must be between the ages of eighteen and twenty and have satisfactorily completed four years of high school training. After graduating from high school, they have placed their applications with the Apprentice Department, which in turn has sent for transcripts of their high school grades, which have been given very close consideration. Their high school grades being satisfactory, and if they are otherwise good prospects, they are then given an entrance examination consisting of arithmetic, elementary algebra, plane geometry, physics, and mechanical aptitude. Upon passing the entrance examination, they are given an opportunity to become students of the Apprentice School.

Two courses are now given, namely, the machinist-toolmaker and the draftsman courses. Upon entering the school, the student is assigned to a certain machine for which he is given instruction as to the operation and he is also taught the use of measuring tools and instruments. He is responsible not only for the operation of the machine but for keeping it in good running condition by oiling, keeping clean and caring for the machine in general. After spending ample time on this machine to enable him to operate it efficiently and accurately, he is then transferred to another machine which will perform a different type of work. This procedure is followed until the apprentice has learned to operate all machines used in machine shop and tool room work such as drill press; bench lathe; engine lathe; turret lathe; boring mill; milling machines; surface, tool, internal, and cylindrical grinders; shapers; slotters; gear shaping equipment; planer; heat treating equipment; and other miscellaneous machinery. Upon completing the machine training, he spends the remainder of his time on the bench as a tool-maker. There he makes all types of tools, fixtures, dies, special machines, and miscellaneous equipment for use in various departments throughout the plant.

The draftsman course differs from the machinist-toolmaker course in that it consists of at least two years of machine shop training and two years of prac-

"Don't Worry About Lightning" Says G. E. Authority On Subject

Dr. K. B. McEachron Gives Interesting Talk At Joint Meeting Of Engineers' Clubs

Lightning is not dangerous to man if simple precautions are taken, said Dr. Karl B. McEachron, director of the General Electric lightning laboratory at Pittsfield, Mass., in an address here Thursday.

Discussing lightning phenomena before a joint meeting of the Fort Wayne Section of the American Institute of Electrical Engineers, and the Fort Wayne Engineers Club, Dr. McEachron disclosed that lightning deaths since 1924 have averaged only about 390 annually—just a little more than deaths from attacks by animals and only a small fraction of the number of people killed annually by automobiles.

"Don't worry about lightning," said Dr. McEachron. "If you can see the lightning, it hasn't hit you. If it hits you, well—you won't be in any condition to worry about it anyhow.

"The real danger of lightning is to property. The distinction, though, is that property can be protected whereas an individual only can be taught how to protect himself."

The principle of protection is simple. If one is completely surrounded by metal, as in a steel railway coach, automobile, or steel frame building, the current is diverted and flows through the metal rather than through the person. In a home, one would not be wise to sit on a radiator or to be in a bath tub during a storm, since if the building were struck, the current might flow through the person's body on its way to the grounded metal. It is better to stay away from large metal bodies that are grounded.

"As a rule, office buildings and factory buildings offer excellent protection to their occupants. Suburban homes are not as likely to be struck as are isolated buildings on the farm.. Lightning rods can be applied so as to make any building safe from lightning damage, both as regards the building and its occupants.

"The advances in our knowledge of the effects of lightning on transmission and distribution circuits, coupled with our further understanding of how to properly dispose insulation within transformers and other equipment, together with the proper design of protective means, have made possible a very great reduction of outages during lightning storms. This is of very real importance to the user of electricity who has become accustomed to always getting an immediate response when he turns the switch.

Dr. K. B. McEachron

"The ordinary lightning flash seen by the observer is not a brilliant bolt from the sky but rather a union of a cloud streamer with another streamer from the earth," the speaker said.

"When the voltage in the cloud reaches a certain degree, a streamer starts toward the earth in a hesitating manner, becoming longer after every stop. In a series of jumps, this streamer approaches the earth. When the streamer is within a short distance of the earth, the ground is positively charged and a leader leaps from the ground toward the 'leader' coming from the cloud. For a brief interval there is a sustained current between air and earth and it is this flash that the observer sees."

Dr. McEachron, who once was hospitalized for nine weeks because he got in the path of a 33,000 volt artificial bolt, scouted several of the more common beliefs about lightning phenomena.

That "lightning never strikes the same place twice" is a fallacy was proved by Dr. McEachron in an illustrated discussion of the research carried on by General Electric at the Empire State Building in New York City since 1935. Each summer a watch has been kept and some 112 bolts have been recorded in that time.

Oscillograph equipment in the building records the strength of the strokes and cameras on the roof of the Printing Crafts Building on Fifth Avenue and from the 39th floor of the 500 Fifth Avenue building take pictures of the bolts.

Lightning rods do not keep lightning away, Dr. McEachron continued in a discussion of another common belief, but served to attract the electrical discharge and to lead it safely into the ground.

Every lightning flash is not accompanied by a clap of thunder, Dr. McEachron said.

"Thunder is the result of a pressure wave caused by the sudden expansion of air created by a quick lightning discharge. All flashes do not release energy with the same speed. Our studies during the past few years have revealed that in some cases the electrical current is built up and released slowly; that is, in one or two tenths of a second in other discharges. This so-called slow lightning produces no thunder. To the human eye it looks the same, and during a general storm the fact that one has heard no thunder in connection with any given stroke generally is overlooked."

Numerous slides were shown by Dr. McEachron to explain the studies in lightning phenomena be-

(Continued on Page 10)

NEWS FROM THE CAMPS

We publish herewith with great pleasure extracts of letters sent to us by G-E employees now in government service. Address all communications for this column to the WORKS NEWS editor.

Dear Editor:

I am now at my new address at Ft. Lewis, Washington, and it would please me very much to receive the Works News down here, as I would like to hear all about the gang I used to work around. It was kind of hard to get accustomed to this army life, but I have almost five months in the good old U. S. Army, and find it does a lot of good. I am in a swell camp now, and the fellows down here are swell as well as the officers.

I don't think there is a climate that is as nice as this one. It is a bit cool at times, but when the sun comes out the scenery around here is very pretty.

I can't seem to tell you everything about this camp yet, as it is so large and we have been so busy, I have not had a chance to see it all myself, but I thought I would write to you and let you know how much I appreciate the Works News. We have a lot of fun down here, and some of these soldiers can make you laugh till your sides ache. It is nothing to hear someone talking in his sleep and telling tales out of school, ha, ha.

But, I don't think it will ever take the place of good old Fort Wayne and the General Electric and it's many activities.

So, in closing, I would like to thank you again for the Works News and hope you will keep on sending it to my new address.

Private Paul G. Rowan,
Hq. Co., 99th Inf., A-T Bn.,
Fort Lewis, Wash.

Dear Editor:

I want to thank you very much for sending the Works News. It is very pleasurable to read and know what the old G-E gang is doing. I never quite appreciated the paper 'till I received my first copy down here. I have been transferred to Co. B, 56th Bn., otherwise the address is the same.

We are now in our fifth week of the training cycle which usually runs 13 weeks. We hope to be home for Christmas but know nothing definite about it at the present time. I believe that this army is the most indefinite place I have ever known. By that I mean you never know what you are going to do next.

Now a brief synopsis of my activities.

For the entirety of the first week we were on the rock pile. We carried rocks, by hand, of all sizes and shapes from a nearby hill to our Bn. area. We then used aforementioned rocks to line ditches, build mop racks, and construct walks. It sure was tough.

In our five weeks we have fired the 1903 model Springfield rifle, the Browning Automatic Rifle, and the 45 calibre Automatic Pistol. We have received instruction in bayonet and Grenade.

Our company is a Heavy Weapons Company and our main weapon is the machine gun, calibers .30 and .50. We will be trained in the use of the 60 m.m. and 81 m.m. mortar also.

We have received shots for typhoid and lockjaw as well as vaccination for small pox.

I have been attending the school for Non-commissioned Officers as a few of the men attending this school have opportunity to compete for Officers' Schools.

Well, I guess I'll have to cut this short now, so thanks again for the Works News.

Yours sincerely,
H. E. Webb, Jr.
56th Bn., Co. B, Inf. Tng. Bn.
1st Platoon,
Camp Wolters, Texas.

Dear Editor:

I was very glad to receive the Works News. I will be very pleased if you will keep on sending it. The address is okay. Today I had gas mask instruction. Tomorrow we have to go through the gas chamber. I have been out on the rifle and pistol range twice.

I am going to take training to be a Gun Mechanic. The army has all your history of past jobs you have worked at and they give you a mental examination and then place you where they think you are best suited. December 23, we have to march 18 miles. I think we will have to sleep in our half shelters and the next day march back. We have not had so much drilling yet. We have been working mostly, digging ditches and such. I have been on K.P. (Kitchen Police) twice. It is not a punishment. Somebody has to do the work. I will get K.P. about every two weeks. K.P. is setting the tables, mopping the Mess Hall three times a day, washing dishes, and peeling spuds for the next day. Some fellows have done K.P. two days in a row. I have seen a few deer since I have been here.

The lights are put out at 9:00 and then the stories are told. There is supposed to be bed check at 11:00. I do not know as yet that the guard has checked us. I am usually asleep. When you go into the mess hall for chow, there are twelve men to a table, each man that sits on the end facing the

(Continued on Page 9)

NEWS THROUGH THE PLANTS

From The Feminine Viewpoint

By Hilda Barthold and Frances Krauskopf

Next week we celebrate Thanksgiving, with that time-honored American custom of a feast. Wouldn't you like to serve on your table as a fitting climax to dinner a dessert that is as American as Plymouth Rock or Independence Hall? If so, we offer the following recipe for baked Indian pudding. We are not sure that Indian pudding was served at the first three-days long Thanksgiving feast of the Pilgrims, but it's been baked, served and enjoyed in New England ever since. Tradition has it that the Pilgrim mothers learned to make the pudding from the Indian women.

The recipe which is given is from the St. Johnsbury House, at St. Johnsbury, Vermont. This is a well-known hostelry throughout New England and deserves its fame, and baked Indian pudding is one of the specialties of the house. We are not certain whether the pudding takes its name from the use of Indian meal (no, Sandy, you and Colin will not have to capture an Indian) or whether it is so-called because the early settlers had it from the Indians.

This is the St. Johnsbury House recipe: One quart scalded milk, five tablespoons granulated Indian meal, two tablespoons butter, one cup molasses, 1 teaspoon salt, three-quarters teaspoon cinnamon, one-half teaspoon ginger, two eggs, and one cup cold milk.

Add meal gradually while stirring constantly, to scalded milk and cook in double boiler fifteen minutes; then add butter, molasses, seasonings, and eggs, well beaten. Turn into a buttered pudding dish and pour on the cold milk, bake in a moderate oven for one hour.

Raisins may be added and, of course, the seasoning may be varied according to your taste in spices. The pudding is delicious served with whipped cream or vanilla ice cream. If the Indian meal cannot be secured, ordinary corn meal may be substituted.

Rendezvous For Information

Hundreds of G. E. employees have found dozens of different places to carry their identification buttons, but it remained for Ed Witte to come up with the prize package.

It seems that Ed has a clever little cache in his overcoat pocket that permits various articles to filter through, including his credentials badge, to a secluded spot somewhere between his overcoat lining and the outside material.

Last Monday morning when Ed came to work and the guard asked to see his badge, the pantomine Ed put on delving for his photo would have made Sally Rand look like a plater.

What a pleasant half hour one could spend pouring over the debris that could be uncovered in this private safety deposit vault. Besides his button, I'll bet one could find reliable tips on how to successfully bet the horses, football and baseball games, and perchance a treatise on how to play "good euchre" with "bad cards".

G-E Patrolmen In Armistice Parade

Led by Fire and Patrol Chief George Doehla the above platoon of Fort Wayne Works patrolmen formed an interesting unit in the Armistice Day parade.

Winter Street News

Joe Carrier was overheard telling someone that he gave all the credit to his wife for what he is today. All we can say is it must have been a tough job. . . . Freddie Zurcher and a gang went to Chicago for a football game. During the exit he lost his pals. Freddie didn't drive up and he wouldn't pay a cab driver $12.00 to bring him to Fort Wayne so he came back alone on the train. And we mustn't forget the two hours he spent walking around trying to get his bearings. . . . Charley-horse Spice is going to meet himself coming when he's going one of these mornings. He didn't believe the alarm clock and since we start at 8, he was plenty late. He claims he heard the alarm clock but assumed it was the banty roosters. . . . Nope, that wasn't a fire along the banks of Cedar Creek near Leo. That was a flashlight Herm Norr and Hoot Gibson had trying to find a place to fish. At that time of night and in that rain. . . . Harry Kaehr of Dust Proof Room has been wondering quite some time just what was wrong with his digestive organs. After having some expensive X-rays taken the proofs showed something that looked like App's Junk Pile. . . . "Patriotism Plus" is the motto of Dust Proof Room. A Baby Bond is presented every five weeks to the lucky employee holding the lucky check number. Keep it up, boys, we're proud of you. . . . A new nickname has been applied to Johnnie Heine of Punch Press. After consuming a loaf of rye bread and ½ pound of butter, he then wondered the next day why no rye bread was on the table, so meet "Rye Bread Johnnie". 'Sall right, Johnnie, rye bread doesn't put on weight.

Esther Koeneman, Mildred Blume, Fern Sonnenberg, Marjorie Krueger, Janice Mueller, Marjorie Kuns, Wanda Bingle, and Leona Bales of the Spring Section of Bldg. 4-3 are wondering who will be the first to get her name in the WORKS NEWS since moving to Bldg. 4-3. Well, here it is; so congratulations, girls.

17-2 Notes

A chicken supper at the Bungalow Inn was enjoyed recently by the ole gang of Insulating Core girls from Bldg. 17-2, but who are now scattered to the four winds. Those in the party were Margaret Doctor, Miriam Bireley, Charlotte Blauvelt, Adele Bleich, Irene Winnicke, Ina Smith and Marge Ponsot. Dancing and singing by the whole gang with Irene at the piano was enjoyed by the girls after which a treasure hunt was next and what a treasure hunt it turned out to be; if you don't believe this just ask any one of the girls. . . . Why is it that we always hear Ann Johnson, Bldg. 17-2, talking about T-bone steak along about 10:00 or 11:00 A.M.? . . . Oh, yes, Margaret Doctor, now of Bldg. 26-4 but one of Bldg. 17-2's old crowd, still celebrates her birthday, even if it didn't reach the society editor until just now. She celebrated by entertaining her club at a chicken supper with all the trimmings, the first of September. . . . Well, it takes Jap Voirol, Bldg. 17-2, to get even with Alreita Wafer after she plays a joke on him. She will probably be a little more careful the next time as Jap doesn't stop with one joke; he keeps right on. . . . Now that Marge Ponsot has left Bldg. 17-2 and gone to Bldg. 26-4, maybe some one will take the time and trouble to explain to Marge just what stop lights are for.

19-4 Spot Jottings

The reception held after the wedding of Art Witzigreuter and Bertha Crouse, Saturday, November 8 at the home of Art's uncle was well attended. Plenty of refreshments and a good time was had by all. . . . After the wedding at 7:15 P.M. Saturday, November 8, of Ruth Bieber and Max Sitton, a reception was held at the home of the bride's grandmother. About 50 guests were present. The bride and groom left early for a trip to Chicago. They will be at home to their friends in their home in Arcola. . . . Anyone wishing further information on PIN TAIL DUCKS, see Otis Clark.

Kitchen Korner

Excitement ran rampant when the members of our department discovered our debut into print last week. For us it was a first-rate fun fest; the comments, criticisms, and compliments (incidentally, there were a few) were directed mostly toward our identity. 'Tis said the truth hurts, that truth is stranger than fiction; and truthfully, we agree with these ancient adages. No one accused us of wearing the Kitchen Kid's clothes; we only rate the dunce cap.

The second-shift workers extend "goodbye" and "good wishes" to our co-worker, Susan Webb, who completed her beauty culture course and is about to embark upon her new career in Bourbon, near her home town, Logansport. For a farewell gift, a box of sweets was given to "Sweet Sue," who will be more than missed by all of us.

Deep from our dreamery come more memories at random: of sing-leaders Stell and Davidson of the serving girl's nightly serenades; Sally's delicious pies and Nettie's cranberry relish; quiet, little Flossie; "Another day gone by—another dollar earned," Art's famous last words; Marceil S. attired in a mannish, striped shirt; an epicurean's dream, those turkeys fixed by Marie H. and Amy; "Marse" Garrett's enthusiasm for our column; Floyd, our ambitious lad.

From an old master we borrow the beginning line for our place in the poet's row:

Stake or Steak

And what is so rare as a day in June?
A steak as my father fries it.
And the money it takes
To purchase the steak,
Is as rare as the guy who buys it.

The Kitchen Kid,
Bldg. 16-1.

Phil Tilford of Bldg. 4-3 is really having a swell time trying to get his hands on just one WORKS NEWS.

We are wondering why Alva McMaken of Bldg. 4-3 is losing her ability to get information nowadays.

My Cousin Colin always has, and probably always will, drive his Model T. On the other hand, my cousin Malcolm shows more human tendencies. He gets a new car every few years. When the new models come out he has tae look 'em over—and ye know what that does. He reads the ads and sees where each year they get bigger and better than last year's, and the seats get 2" wider, etc.

One day he was bragging tae Colin and me, and knocking the Model T.

"Hoot mon," countered Colin, "Every year your car gets bigger and bigger, and the seats get 2" to 4" wider, etc., etc. Noo, tell me, I've been figuring backwards, and I wonder how a full sized human like yourself ever got into one o' the 1922 models."

"Well, the last time I was in your Model T, I got paralysis."

"Pair o' Alice's what?" asked Colin.

When I said my cousin shows human tendencies—by getting a new car every so often, I wasn't joking. It's human nature tae demand bigger and better things all the time. And this trait has made possible the big industrial system we have today.

But this tendency can't always be allowed tae run wild. We must curb it when our country needs the materials and machinery more than we do.

Another time we should curb it is when we can't go on getting better and better goods for less money. But that time never comes, outside o' short stretches when prices go up, due tae some cause, like our present emergency. Weel, even now we are going right on with improvements. If cost reduction efforts were stopped, ye'd see costs REALLY go up. If things didn't get better and cheaper right along, my relatives would never buy anything.

Weel, the answer tae the whole problem is tae make "More Goods for More People at Less Cost."

Or, tae put it in my Cousin Colin's words, "More people with more goods they'll let me borrow."

Thisa And Thata 19-5

That bright light seen in the west end of White-Armature is caused by the ring on Ruth Bennett's left hand. Congratulations and much happiness. . . . Your reporter would like to know who answers to the names of "Baby Dumpling" and "Grandma"? If anyone finds out, please let me know 'cause I've heard tell that there are two people who will answer if called that! . . . A cousin of George Auer, Bldg. 4-3, found a quarter near Bldg. 4; we think this may solve the mystery of the disappearing quarter mentioned in last week's NEWS.

Ernest Close, Bldg. 4-3, has a new job; not a full time one, but one to fill in the blank spots of his regular job. Art Brandenburger has engaged him to act as lamp shade "duster off'r" and machine handle wiper.

Ellis Bleke, Bldg. 4-3, reports that the Castle at Pretty Lake is now closed for the duration of the cold weather.

NEWS THROUGH THE PLANTS

6-4 Magneto Mumblings

Of course I know that no one contracts hunting fever these days, but, just in case anyone should happen to see a big man tramping through the woods with a dog which prefers sniffing airplanes to quail, please, don't be alarmed. It's only Elmer Auman, all decked out in a new hunting jacket while trying out his new doublebarrel shotgun, both farewell gifts to him from the Magneto Department. And, speaking for all of us, we're really going to miss you, Elmer—And, speaking for myself, who am I going to "rib" in the column, now that my most valuable material is gone? . . . With all those purty gals in the Magneto Department (who don't go steady and are not married) it is with great wonderment that I listen to the pleas made by Stanley Prince for more gals who are not going steady. Girls, shall we pounce on him all at once? . . . From all indications, the Magneto Second Shift had a rollicking good time at their hayride gingham and overall party held at the Ossian Clubhouse recently. Funny thing, though, Chester Elliot never could figure out why the guys he came with didn't show up. . . . We had ourselves a good ha ha on this woeful tale of a woman driver. It seems that Mary Jenkins' car got stuck on a tie in the parking lot the other day, and Anne (Good Deed) Perry went sallying forth to the rescue. However, she was laughing so hard that it took a man, Joe Ranic, to do the talking, and not one man, but three, to gallantly aid the two lil' "damsels in distress" by lifting the car off the tie. . . . We bid a fond farewell to our old standby, Ivan Osterman, who has left our valley to take on new duties, but we say, "Hi, Neighbor", in a friendly welcome to Norman Haugk, a great little guy, who has come to take Ivan's place. . . . "Sink those baskets one by one" is the current theme song of our basketball enthusiasts who are rooting for the Magneto Department basketball team. And it ought to be some team, too, boys and girls, with Charlie Winans as coach and with all of those strict (?) training rules. . . . Another theme song of two Magnetoites, Irene Schultz and Eileen Horman, might well be, "Oh, Happy Christmas Vacation Time", for both of their friends, one in the army and the other in college, are coming home at that time. No wonder you both look sooooooh happy these days.

Sam Allmandinger, George Arnold, Everett McKee, and Herbert Cowan of Bldg. 4-3 made the usual trip for the poor birds of the air that are good to eat. The only trouble was that they all scored a no score game and the birds are still flying around.

Lillian Hitzeman, Bldg. 4-3, a time clerk, was so thrilled after seeing her diamond that she even forgets to ring her card in and out.

Deaths

William Schultz, a charter member of the Quarter Century Club, who retired in 1927 after forty three years of service died Monday of a heart ailment. Mr. Schultz, who served as a foreman prior to his retirement, lived at 2511 Weisser Park Aveune. Funeral services were conducted Thursday afternoon at the home and at the Emmaus Lutheran Church with burial in Concordia cemetery.

Slips And Chips

Sir Viss Bldg. 4-4

Several of our co-workers celebrated Halloween and the last week of October in various ways. Shorty Lawson had a cold shower on Friday, a sort of tempering process for his usual Saturday bath. This shower was unexpected because Shorty had fixed it for someone else. . . . Robert Till started wearing those bright plaid shirts, the kind that cowboys wear in the movies. We were going to call him Gene, after Gene Autry, but dispensed with the idea suddenly when we thought he might start singing. . . . August (Gustave) Wisenberger went home Saturday leaving two dressed chickens standing in cold storage. However, I think he returned for them on Monday. Virgil (Potts) Alderson is still under the impression that ducks can be found under the caps of a certain popular Fort Wayne beverage. . . . Jerry Briggs proudly announced the arrival of a son and heir. Congratulations, Jerry, we know he looks like you. . . . Marie and Opal wish to inform all who are interested that each of them have a dress with the same pattern. They do not have anything in common with Ralph Waldo Emerson and his brother, who wore the same overcoat. Of course, you know that quantity purchases have a good discount. . . . Shorty Lawson had quite a time getting to work one morning. He started walking, then rode on a truck until it stopped, and finished on foot. Shorty didn't say how long he worked trying to get the truck started again, but he made it to work on time. I wonder if the truck is having ignition trouble. If it is, we'll never know.

Bertha Gruber, Bldg. 26-2, is getting absent minded these days. She made a date with one of the girls to meet her at a certain corner and when her friend failed to appear, after a long wait, she went to the party alone. She arrived at the same time as her friend who had been waiting on a different corner.

Gossip From 19-5

Rosemary Blust says from now on she wants to be called pretty girl. We don't know why, you better ask Rosemary. . . . Kathryn Hepker was asked if she had only a one-way ticket to Florida she hated to disappoint her friends so she decided to come back. . . . Speaking of Florida we hear La Von Campbell is leaving in a week for Florida. What's going on down there anyway, could it be the climate? . . . Anyone having any bingo tickets to sell or give away, see Malinda Gehle, she says she is just crazy about that game. . . . We wonder what the girls did to Dwight Williams when they went out to his house to Halloween him for when he did come back to work, he had a swollen jaw. Was it trick or treat, Dwight, and you got the trick? . . . Why was Helen Smead wearing a halo on her head the other day? You looked very becoming in it. The halo is all right but we don't see any wings sprouting on you yet. . . . Elsa Frede returned from a week's vacation.

19-5 Office Chatter

It is said that Alma Alter is interested in uniforms of any kind. Many suggestions came forth, but Alma still likes the gold braid. . . . Lieut. Harold Longsworth stopped at the office when he paid us a visit. He certainly looked fine. . . . Ralph Hare arrived a week early for the "House of Magic" show—nothing like getting a seat . . . Everything happens to Rea Kuhn—yes, this time an auto accident. We hope she will be back to work by the time this is published. . . . Harold Hughes, Bldg. 19-4, gave his check a washing.

Howdy Gramps

Congratulations to Ray Hoffman, Bldg. 18-1, who recently became a grandfather. Ray doesn't seem to feel any older, but after all it's the first grandchild—bet it will be spoiled.

SCIENCE FORUM – by L. A. Hawkins

Q. Is is possible to turn water black and then turn it clear again?

A. Yes. Take a solution of starch and water and add a drop of tincture of iodine, such as you get in drug stores. That will make the solution dark. If you add a little sodium thiosulphate to this solution it will clear up and form a clear, colorless compound.

Q. Are rayon rags suitable for paper making the same as rags of cotton and linen?

A. Rayon rags are not as suitable for making paper as cotton and linen rags are. The reason is that the individual rayon fibers are solid or homogeneous, and they are smooth and slippery. They do not felt or mat together as readily as cotton or linen fibers do.

Q. What alloys are used in making anti-aircraft guns?

A. There are probably two dozen or more alloys that enter into the manufacture of those guns along with their apparatus for firing and the shells that are used. The alloys would include carbon steels, alloy steels for wear and corrosion and heat resistance, brasses, bronzes, aluminum alloy castings, cast iron, and probably electro-plating of nickel, copper, and chromium.

Q. If a compass needle were to be enclosed in a vacuum, would it still be attracted by the earth's poles and would such a compass be attracted by electrical appliances?

A. Yes. A magnetized compass needle that is free to move will be attracted by the earth's magnetic field no matter if it is in a vacuum or not. The position of such a needle will also be altered if iron or any other object that is magnetic is brought up close to it. Because of this, on board ships that have a steel hull, corrections in compass readings have to be made.

Is Zat So?

We must admit that we were rather surprised when the starting whistle blew Monday morning to find that every man was at his machine ready to go to work, since that was the opening day of the hunting season. When the men working on the second shift came in, they had to relate their experiences and let us know that at least this once they were glad that they were working nights. . . . Clyde Crabill brought in a long feather to prove that he had at least caught a pheasant. . . . We were disappointed to find that Paul Heinrich lacked originality and explained that he received that black eye by running into a door. Was someone chasing you, Paul? . . . The Bldg. 17-1 gang will lose two more of their co-workers to the Army, Lloyd Mason and Joe Adamski. When Lloyd left last Friday he was presented a fine leather utility kit and the best wishes of his friends in Bldg. 17-1. Joe will remain with us until Thanksgiving Day. We are going to miss you, boys! . . . Everyone is trying to find out what kind of a car Ed Huhn just bought since he says he did not grease it until after 1400 miles and it still runs. . . . We know that we have at least one honest man in our department. Bill Stout proved that when he returned the billfold that he found to Harold George, the rightful owner. . . . At first we thought perhaps Olin Shookman had worked the third shift when we saw him leaving the plant with his lunch bucket about 8 o'clock the other morning. We later discovered that "Shookie" forgot his identification badge. . . . The M.B.A. election on our floor is causing quite a lot of comments. The candidates for the office of director are Henry Papenbrock and "Pat" Von Eichhorn and it seems to be a rather close race so far. Papenbrock's platform is "No more Class 3 fits. I aim to introduce one of my own every-day fits." Eichhorn's platform is "A rubber 3 point gauge. Make the gauge fit the work." Notice to mothers: Mr. Eichhorn has set aside the day before election to kiss the babies, especially all girls between the ages of 18 and 24. Results guaranteed. Mr. Eichhorn will give the boys a promise or a kick, it all depends on the election to be held next day after Sadie Hawkins Day. For complete election returns, read this column next week.

The Question Mark.

Will someone kindly request the Indiana Service Corporation to furnish Basil Bowley, Bldg. 4-3, with an up-to-date schedule and routing of their street cars and trolley busses? He was observed at the transfer corner one evening last week standing around in the rain for half an hour. A kindly bloke, thinking perhaps he was lost, stepped up to him and inquired if he might be of some assistance. Basil said, "Yes, I am waiting for an East Washington car; can you rustle one up for me?" Whereupon the bloke said, "My good man, you will have to walk two blocks south to catch the proper coach."—Much to the chagrin of Sir Basil.

Orville Ellingwood, Bldg. 26-2, says the cup cakes the neighbors gave the kids on Halloween are really good.

Another member of the skunk club, George Ely, Bldg. 26-2. Now George what will the Shady Nook boys think.

26-5 Tool Bits

In Chicago it's Maxwell Street for your junk parts, and in Fort Wayne it's Carey Baker. . . . What is the mystery connected with Ralph Steward wearing his Sunday shirt and tie to work lately? . . . John Roesener is the proud possessor of a new grandson, and has his chest expanded? . . . Frank Prezbindowski is still on the trail of that airplane. Be sure and save your "Wings" cigarette coupons for him. . . . Jim Jewell and Fred Fitch are "boys" in disguise. Those guys can dance all night and ask for more. (?) . . . If Kenneth Doell could get the auto away from the garage some morning he could get to work on time. . . . Hank Wittber was on the verge of wearing his sport oxfords to work again since Glenn Kline was transferred to the office, but upon observing the color of Berny Byanski's heels decided it is still unsafe. . . . Minny Mennewisch claims he is no relation to Minnie the Mouse. . . . Gordon McDougall has a good chance to become a Senator or Congressman judging from the way he explains Social and Foreign affairs with the fellows. . . . Russell Huffman, the old speed king between Fort Wayne and Bluffton, is in a dither these days wondering how he can make better time getting to and from work. He claims his time is very much affected by the close watch the police are making on the speeders. We believe he is more concerned about the stiff fines now imposed on the offenders than the time lost. . . . Heed this warning all you former victims of the fiend, better known as the "Red Heel Artist". This mad painter has added another victim to his list when on the night of November 3 Harold Wherry of the Bridgeport gang found to his dismay that his nice new heels had been painted a very bright red. He claims nothing will stop him from tracking down this demon. Any clues will be greatly appreciated.

19-4 Night Owls

Seems as though Bob, over in final test gang, better known as Cuddles, wants to meet one of the gals over in Bldg. 26. He won't point her out, so how can we help him out? . . . There's never a dull moment when Dilly-dally Patton—better known as Pat, back in Small Lot section—is around. Pat, aren't you ashamed of yourself? . . . Can anyone tell us where Darwin Stuart graduated from — if he graduated. We think he's spoofing. But then maybe that's what's the matter with the school. Once having Darwin around, a place is no longer the same. . . . The kids back in small lot section guessed at T. Sheets' age. They really shot wide. "Scuse up please" . . . Wonder why Agnes Parcher always wants to know if the test boys are working. Ask her what her favorite song is. . . .

Famous Words:
T. Sheets: "In other words."
D. Patton: "Hi, kid."
D. Stout: "Good evening — girls?"
W. Ballard "Cut that stuff."
M. Roe: "Oh—now."

Dr. Garton must have been doing some pretty strong concentration on a distant subject to walk right smack into a stop sign at Berry and Webster streets.

Jerry: "It took me twelve lessons to teach Sylvia to swim."

Terry: "Why, the little flirt; I taught her in six."

Large Crowds Attend "House Of Magic" Programs

A gratifying attendance marked the "House of Magic" programs presented under the auspices of the G-E Club for employees and their families this week. Above left shows a portion of the crowd at one of the programs. Right, C. E. Gluesing, Schenectady, who was in charge of the programs, is shown performing one of his demonstrations.

Motor Generator Static

What?

"Monkeys have more fun than anybody". I bet the fellow that made this statement never observed some ladies at a movie theater where there favorite "hero" was doing his stuff. Take for example two girls from the production department who for the purpose of late identification we will call Ruth and Mary. These two girls dote on a well known actor named Gable and his appearance on the screen causes ripples of exotic goose pimples to race up and down their respective spines. When his recent picture named "Honky Tonk" appeared at a local theater these two gals were there for the opening. As the hero slew countless bad men and bestowed lavish endearment upon lucky ladies in the picture our two co-workers were enthralled. The one named Mary began chewing her finger nails, which were long when the feature started, but short when it ended. Not so, the one called Ruth. She was hypnotized into a rigid immovability until the last villian bit the dust and the heroine was nestled in the hero's arms. Later she was heard to murmur, "When Gable looks at a girl she is well taken care of." Which causes some of the young blades to inquire, "What has that guy got that I haven't except large ears and a mustache?"

Come one, come all . . . Pappy Archbold, our "Home Avenue Hill Billy", attended the Boone County Jamboree last week and since that time has displayed evidence of some great emotional urge at work in his system. It so happens Pappy has "Kinfolk" back in the wild mountain country where hog calling, barn dances, the making and drinking of "mountain dew" are the favorite indoor and outdoor sports. Seems mountain music brings back memories of those happy childhood days with the "razor back hogs" and "hound dogs" and Pappy is all set to burst forth with some of those old "home spun" songs of the great backwoods. When he starts—come one, come all, a treat is in store for you. You ain't heard nothing 'till you hear Pappy.

Don't Believe It

In spite of high pressure advertising over the radio and in the newspapers, it is an established fact that cigarettes are not always cooler, soothing, refreshing and easy on the nerves. Perhaps our most definite object lessons on this subject are a series of happenings in the life of Stan Marquardt. Take for example the time Stan lit one of his favorite brand and as he smoked, his lips, yea, even his teeth took on a vivid scarlet hue. The fact that someone had planted lip stick in the tip of this cigarette was in no manner soothing or refreshing. Or again when he gave Wilbur Saalfrank one of his favorite brand only to have the cigarette disintegrate with a loud "bang" when the victim lit it. And while Stan disclaimed all knowledge of this sabotage it did not soothe, refresh or cool Wilbur, neither was it easy on his nerves. So we feel the moral to the whole thing is don't believe anything you hear or read and only half of what you smoke if Stan furnishes the cigarettes.

The Buzzards

The reason Virginia Mollett is wearing glasses is that she can see those large dog fishes which she specializes in catching.

We must not forget to mention "Chuggy" Mungovan, who has purchased a new hat. Such a becoming looking lid. Helen Stahl and Moechberger helped him buy it.

Since "Gene" Roesinger has his new gas buggy, he has taken quite some extensive trips—one time to Van Wert and one time to Monroeville. He says the car certainly stands up under this grilling treatment.

Carl Vizithum is now a proud papa. Carl passed out candy and cigars. He wants to start a new system, instead of a man passing out cigars and candy, it would be well to take up a collection ahead of time for expectant fathers.

Tom Stoner lost everything but his shirt matching half dollars the other day. His wife caught up with him and now he has a new slant on life.

Famous Last Words

A. Shull: "Down with up."

Carl Vizithum: "I guess I showed 'em."

Blair Bushong: "What's he got that I ain't got."

Charley Thompson: "Money talks, fellows."

Helen Hoelle: "Hello child."

Bones Brandt: "I wonder if the bank will lease-lend me a thousand."

Wally Clayton: "That's nothing, did you ever hear this one?"

We have a new file clerk, namely, Korn. Isn't he cute girls? He can do two things well, both of them is sleep.

If you want chicken in the raw, see R. M. Rigel. Chickens are cheap—25c dressed plus a $3.00 tax.

Good Idea

Thurman Leichty, hunter extraordinary, celebrated the opening of the hunting season by taking a jaunt through the fields and forests in search of wily game. By some turn of fate our hero observed a pheasant fast asleep, so observing every caution he crept upon the unsuspecting bird and caught it with his hands. Placing the bird in the hunting coat pocket, he returned to his auto, but when the little feather friend saw this conveyance, it broke out, flew away and was immediately shot by some other hunters not so tender-hearted. Now Thurman wonders if this business of being kind of dumb animals isn't the "bunk". Sez he, "The next time I catch a pheasant, I'll wring its darn neck."

To which we reply, "It's a good idea, my boy, a good idea!"

Tough Luck

Some folks do have the worst luck, take for example Dick Weaver and Ed Horstman, who with Art Lange and a score of beautiful girls were trapped in the elevator of a local store when that medium of transportation stopped several feet short of floor level. Dick and Ed, inspired by that Boy Scout slogan "Do a good turn each day", dropped to the floor and prepared to assist the score of beautiful girls to descend. But fate sure laughed that day—two male employees of the store were there to attend to this duty and all the boys could do was stand and watch. Tough luck, we sez.

Sunshine Section

Several more requests for advice have been received and "Old Poison Pen" will attempt to answer them in his usual efficient manner.

Dear Poison Pen:

Two girls want to marry me; one I love but she is poor, the other is rich but I do not care for her. Which should I marry?

"Bothered."

Dear Bothered.

By all means marry for love and send "Good Old Poison Pen" the name of the girl with riches.

Dear Poison Pen:

My husband eats so much he is literally "eating us out of house and home"! I can't pay the grocery bill anymore. What shall I do?

"Flat Broke."

Dear Flat Broke:

Napoleon said, "An army marches on its stomach." From your description the husband must be well equipped — start him marching.

Dear Poison Pen:

I am simply wild about a certain male but he isn't very interested in me. What can I do to make him fall?

"Cuddles."

Dear Cuddles:

Why not trip him or scatter banana peelings in his path?

Saying of the Week

Jerry Frye remarks, "While almost everyone has an aim in life, very few pull the trigger."

Double "X" Shultz

From time to time our old friend Poison Pen complains in his column about how he is slandered and falsely accused by his friends.

Now November 11th is celebrated nationally as Armistice Day, but in the Bldg. 19-3 Planning Section, it will be longer remembered as the day on which Poison Pen tried to cover up some of his undercover (picture and letter to Wagner) work by the simple expedient of double crossing one of his friends, Bud Fisher. It worked thusly: Don had someone copy the letter so as to eliminate all possibility of handwriting experts catching him—then he carefully tore up the original and while pretending to talk business with Dagwood, he carefully permitted the incriminating scraps of paper to fall in Bud's waste-paper basket, thus, as he thought, diverting all suspicion from himself. However, one of the planners often accused falsely by Don witnessed the entire scene—Was Don's face red? Old Double "X" Schultz.

Decatur News

Mr. and Mrs. George Helm of 318 North Tenth Street, are the parents of a baby daughter named Nancy Lee. She was born at the Adams County Memorial Hospital on Monday, November 10.

Katherine Weiland, Helen Gerke, and Louis Webert attended the opera, "The Barber of Seville," at the Shrine Auditorium Friday evening.

A shower was given in honor of Hilda Rebber and Irene Lazar, Bldg. 26-2. The guests were Helen Coryell, Martha Castion, Margaret Truelock, Rita Schaefer, Gladys Freeman and Betty Roesner.

NEWS THROUGH THE PLANTS

Uncle McWell

Remember

We were thinking back to the days when we used to clip out the available coupons for free samples from all of the family magazines. It mattered little if the current serial happened to be on the other side of the coupon we wanted. The neatly scissored hole conclusively proved that the reading matter had been misplaced, not misused. It was no concern of ours if the publisher wanted to fill in the back side of our coupons with stories—or maybe it was sort of a game to make the finding of the coupons more interesting and exciting. After all, books were the places for stories. How did we know. Well, there weren't any coupons in books, were there? And that settled it as far as we were concerned. Reminds us now of the sign in a restaurant that read: "If the steak is too tough for you, get out. This is no place for weaklings!"

The coupon that finally cured us of our fervor and restored a semblance of temporary peace to our household was the innocent looking ad that advertised a booklet on etiquette instructions: "What To Do at the Table". The envelope came back—inside, a single piece of paper—on the paper a single word—"EAT"! We've never forgotten—or stopped!

The Visitor's Corner

"Friendship is a mighty factor in this world, since by friendship comes self-forgetfulness, and no man can do great works unless he forgets self."

—Anonymous.

Question and Answer Dept.

Dear Uncle McWell:

There are a certain few young ladies who come to me each week seeking my advice on forecasting the weekly football pool. It's a swell set-up, and I appreciate the honor, but, gee whiz, Unk, I haven't pulled a winner yet! What'll I do?

Bret(They're losing faith in me) Young, Bldg. 26-2.

Dear (Ain't it hoomiliating?) Bret,

Your problem is not an easy one, nor is it one that lends itself readily to a single, simple solution. Accordingly, we have listed a number of possible remedies, any one or combination thereof, which should help you out of your distressing dilemma.

1. Rent a new set of spooks to work your ouija board.
2. Stop reading the football experts.
3. Go see a game.
4. Confine yourself to picking either Minnesota, or any I. U. opponent.
5. Slip out and ask Ceal Romary.
6. Send for your copy of Uncle McWell's confidential report: "Eleven Men in a Huddle and What They Talk About"—phone numbers and addresses optional at a slight cost!

Uncle (Block That Hat!) McWell.

Corn Out Of Season

From Bldg. 4-4 Office

Elmer, the Field Mouse, has retired—or did he go on a sit down strike? At any rate, he has deserted us. Elmer can be forgiven though, for after all, it's probably too chilly for a po' lil' mouse to be snooping for gossip without his "longies" on. When the little rodent left the field, all he left behind was several ears of corn he hadn't nibbled—so from now on, you will find the corn in this column. . . . Speaking of corn, why must I laugh at those lousy jokes of Art Wedler's? Quote, Give me those papers or I'll tear up the child—or—Now that you're in my horse power, you cannot fire escape. Unquote. Always he is saying "them" words. LaVon Price's favorite saying seems to be, "Now you can go back to sleep," which she says after some one answers her questions. A bit of Indian maize, yes? Doris Roe doesn't do bad with her often heard, "If I've done anything I'm sorry for, I'm glad of it." That's strictly off the cob. But isn't it fun being corny. . . . Emmy Stock was really beginning to resemble Sherlock Holmes this week. The way he threatened us all when he couldn't find that inventory card. Was I ever disappointed when the culprit was apprehended. There wasn't even any blood shed. Not even a single poke in the nose. And to think I was so scared, I cleaned out my desk 15½ times in two days just looking for that card. . . . The entire Bldg. 4-4 office is intensely interested in finding out who murdered whom in the mystery book Mary Hakes has been reading for the last six months. Not that Mary is a slow reader or anything—much. I tried for five years to finish reading a continued story in the Journal-Gazette by Adele Garrison before I found out it had been running for twenty-three years already and would probably continue for twenty-three more. . . . I see by the papers that the price of corn has gone up on the bushel. This column should be worth millions. G'bye,

The Corn Bore.

Mother: "Sally, I saw you deliberately put your arms around Fred's neck and kiss him."

Sally: "Well, he had to have it somehow. He's too honest to steal and too proud to beg."

19-4 Nibbins

Marjorie Reincke, Bldg. 19-4, will become Mrs. Arnold Flaig on November 15. Assisting at serving will be Irene Talba, Mary Greer, Ruth Holt, Mary Menze and Alberta Keel, all of Bldg. 19-4. . . . We wonder what's been wrong with Lorena Haslup, Bldg. 19-4, these last few days. She just can't seem to keep her mind on her work. . . . Funny Happenings: Peggy Bandt went downtown one day last week and bought some drapery material. She brought the package back to work with her and left it in the shanty. When the 5 o'clock whistle blew, Peggy dashed out of work and over to the shanty, grabbed a package and trotted home. Upon getting home, she opened the package and pulled out two large union suits. So, naturally, Peggy wrapped them up again and trotted back. (Here," she said to the watchman, to which he answered: "What's the matter, didn't they fit?" much to Peggy's embarrassment. Too bad they didn't fit, what with winter coming on. . . . Wonder why Marcel Surface doesn't want her name to appear in the WORKS NEWS. Is there a special reason? . . . Jackie White innocently walked past the watchman last Tuesday, not knowing someone had pasted a piece of tape over her picture with a crude face on it. Maybe the watchman noticed the resemblance.

Sunbeams From 17-4

If it is a riddle, just ask Ella Arn, she knows all the answers, especially about matches, stoves and lamps.

If anyone sees a one-legged chicken running around, the chances are that the other leg is in the hands of Nick Abbott, who would be nibbling on it, it is a toss-up between him and Wayne Worman, which one can stow away the most food.

The department is certainly sorry to have on its sick list, Edith Farrel, who is in room 461 at the St. Joseph hospital and she would enjoy having the girls visit her or send a card.

Poor Mr. Bunny Rabbit has gone into hiding and if he could hear all of the bragging that is going on around Bldg. 17-4 about being good shots, he will stay hid for the duration of the hunting season.

Thought for the week:

If we notice little pleasures, as we
notice little pains,
If we quite forgot our losses and
remember all our gains,
If we look for people's virtues and
their faults refuse to see,
What a comfortable, happy and
cheerful place this world would
be.

Granny.

General Purpose Motor—Ethel Koehlinger, 3305 Smith St.; Marjorie Hargrave, 1419 W. Main St.; Geraldine Habig, R. R. No. 9, Fort Wayne, Ind.; Clarence Roberts, 415 E. Wayne St.; Edith Farrell, 1103½ Maumee Ave.

Transformer—Alfred Meyer, R. R. No. 2, New Haven, Ind.; Reinhard Benzinger, R. R. No. 1, Hoagland, Ind.; Louise Cramer, 1442 Broadway Ave.; Freida Cummings, 2104 Kenwood Ave.; Jean Fogwell, Markle, Ind.; Juanita Gibson, 2502 New Haven Ave.; Beaman Howard, 3216 S. Barr St.; Harold King, Markle, Ind.; Hilda McClain, 524 W. Brackenridge St.; Warren Spurling, 1156 Packard Ave.; Bette Gunther, 1415 W. Main St.; Earl Romey, 604 Fifth St.; Leon Gurwsky, 1022 Swinney Ave.; John Casten, 1823 Winter St.; Louise Todd, 3218 Smith St.; Jeanette Lauer, 1302 E. Berry St.; Willodean Mitchell, 1425½ E. Wayne St.

General Service—Harold Roche, 330 W. Taber St.; Ray Lahrman, 2820 S. Barr St.; Albert Bauermeister, 137 Cumberland Ave.

Plastics—Rosella Swift, 3007 S. Wayne St.

Apprentice—Everett Slaffer, 1727 Franklin St.

Series and Specialty—Geraldine Smith, 3012 Bowser Ave.; Dorothy Craig, 4610 S. Hanna St.

Apparatus — Christian Doenges, 804 Walnut St.; Roy Hinshaw, Waynedale, Ind.

Patrol—Harry Feaser, Methodist Hospital.

Returned to Work—John Fulton, Edith Brudi, Lawrence Duke, Kathleen Meyer, Audrey Coles, Ann Gombert, Earl Griswald, Bonnie Gorrell, Yvonne DeCamp, Chester Feasel, Dorothy Dennis, Mary Brown, Wallace McKay, James Chaney, Anna Bendele, Jeanette Adams, Loretta Ruch, Gladys Gable, John Seimik, Betty Ruth Wickman, Gifford Blain, Rosella Vogeding, Eunice Turner, Dave Lytle, Jim Harris, Kathryn Zimmerman, Betty Griebel, Margaret Anspach, Irwin Adams, Martha Walker, Carl Kleemeyer, Ann Riley, Mary Rupp, Mary Peterink.

Left the Hospital — Gertrude Hockemeyer, Kenneth Miller, Iona Peffley, Geraldine Habig, Virginia Buesching, Vivian McConnell, Harry Feaser.

Would some one be kind enough to inform Dorothy Goshorn, Bldg. 4-3, each morning about the menu at the cafeteria, as she has to walk back and forth several times past the food to make up her mind what to eat.

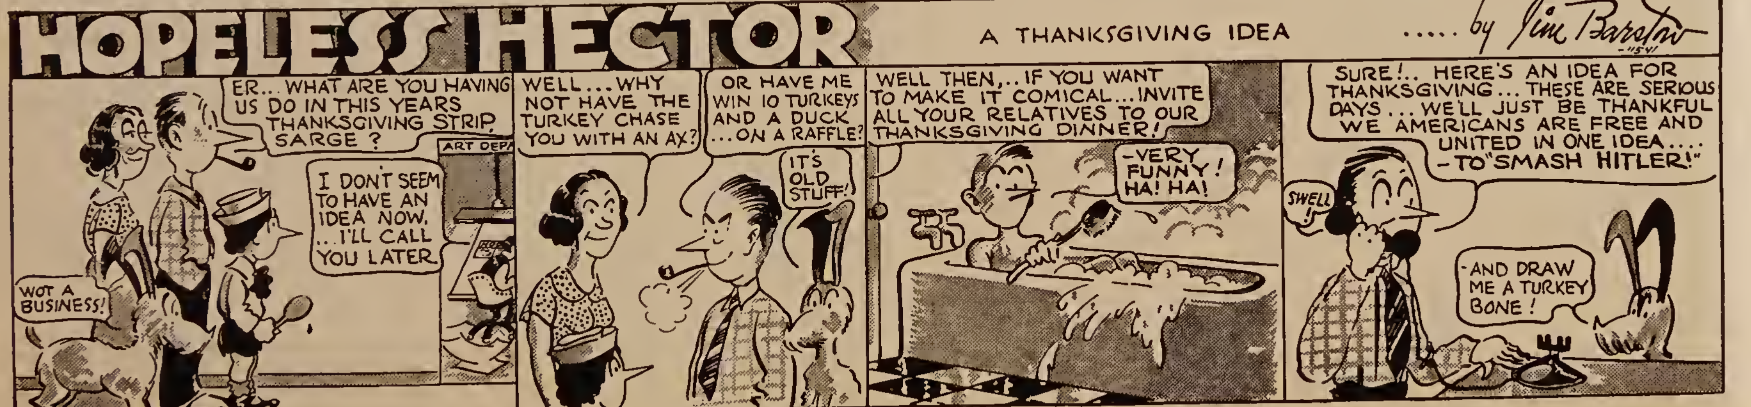
Sleuthing In 4-6

We are happy to report that M. G. Norris, who is a patient at the Methodist Hospital, is getting along nicely. His condition is reported as good. Bill Ryan, who is at the St. Joseph Hospital, recovering from an appendectomy, is also reported to be on the mend. . . . We offer our sympathy to Virginia Selby in the loss of her grandfather, who died during the past week. . . . We welcome another co-worker to the large staff of Bldg. 4-6 employees. Ruth Kiep comes to us from the Refrigeration Department in Bldg. 17-2. . . . When George Denner came back to work last Friday night, he was just too sweet for words. He had paid a visit to the barber, who was more than generous with the hair lotion. Ah, what fragrance! George would have put any self-respecting rose to shame. . . . Walter Whonsetler was really in a "picklement" last Friday afternoon. Upon returning to work, he tried to remove his raincoat, but—no sale! One of those temperamental zippers with which the coat was equipped, chose to stick at the neck, and no amount of coaxing would budge it. A rescue squad came to his assistance; and after quite a struggle with screw drivers, knives, and what not—Walter was finally extricated. We suggest that he carry a can opener in the pocket of his coat. . . . Previous to the past week, Dorothy Mueller had little to say about the Defense Program. Suddenly, however, she has begun to talk quite freely on the subject. Well, there's an answer to every problem, and Dorothy can answer this one. . . . How about it, everybody? Got your appetites all sharpened, ready for Thanksgiving? We hope so, and wish to each and every one of you our very best wishes for a very happy holiday.

Walking down Broadway one afternoon, Glyda Yoder, Bldg. 4-3, was carrying a check and an advertisement in her hand. She stopped for the traffic light, and as she started across the street, she tore up the advertisement—or rather she thought she did. Imagine her embarrassment when she discovered she had torn up the check instead. Don't mind that, kid, we do funny things when we concentrate too hard.

John Trim, Bldg. 4-3, was seen thumbing his way to work Tuesday morning. Had it been Friday no one would have thought anything about it; but being Tuesday, everyone had the same idea. Were you too extravagant over the week-end, John?

Irene Lozar, Bldg. 26-2, was married on November 1.



HOPELESS HECTOR
A THANKSGIVING IDEA
..... by Jim Barstow
-11541
ER... WHAT ARE YOU HAVING US DO IN THIS YEARS THANKSGIVING STRIP, SARGE ?
I DON'T SEEM TO HAVE AN IDEA NOW. ...I'LL CALL YOU LATER.
WOT A BUSINESS!
ART DEPA
WELL ... WHY NOT HAVE THE TURKEY CHASE YOU WITH AN AX?
OR HAVE ME WIN 10 TURKEYS AND A DUCK ...ON A RAFFLE?
IT'S OLD STUFF!
WELL THEN,.. IF YOU WANT TO MAKE IT COMICAL... INVITE ALL YOUR RELATIVES TO OUR THANKSGIVING DINNER!
-VERY FUNNY! HA! HA!
SURE!.. HERE'S AN IDEA FOR THANKSGIVING... THESE ARE SERIOUS DAYS... WE'LL JUST BE THANKFUL WE AMERICANS ARE FREE AND UNITED IN ONE IDEA.... -TO "SMASH HITLER!"
SWELL!
-AND DRAW ME A TURKEY BONE!

News from the Camps

(Continued from Page 4)

kitchen has to wait table. We sure get good meals here, and we sure eat a lot. We get up at 5:00 a.m., sweep and mop out the barracks, when the whistle blows we tear downstairs and outdoors for reveille.

At 6:30 is time for chow. About 7:30 we are called out and either go to the field and exercise and drill or we are put on a detail and work.

Pretty soon we will exercise and drill every morning. I was inducted at Ft. Benjamin Harrison, Ind., and sent out here to Oklahoma. When we first got here, we stayed in tents for nine days. We wear overalls during the day while working but at 4:30 p.m. we get off to shave and clean up, and put on our uniforms for Retreat. Retreat is around 10 minutes after 5:00. Chow is at 5:30. If your shoes are not shined and the Captain notices it, you will get a demerit.

I like the Army swell but I sure wish I could be closer to home. I am about 1100 miles. I doubt that we will even get off Christmas. It wouldn't surprise me that I would be on K.P. or guard duty. Well, I think I will close now and thanks for the WORKS NEWS.

Truly yours,
Richard L. Bucher,
Battery D, 33rd Bn.,
8th Tng. Regt.
Fort Sill, Okla.

Dear Editor:

I am receiving the G-E NEWS and enjoy reading about the plant. I had only been in camp one week here in my new location when I had to go out on maneuvers for two weeks. At first the Captain said one week. None of us took our shaving outfits or cigarettes with us, only enough to smoke for one week. Anyway I had the experience of learning how to roll cigarettes with Bull Durham and got pretty good at it when we were ready to go back to camp. Well, I guess you can't be choicy when you haven't anything to smoke. I am now beginning to smoke a pipe. I have smoked everything, even cigars. Well, I mustn't forget to tell you the whole company of the 159th is going to Los Angeles for Armistice Day for the parade. We will be there for four days, starting with a convoy of trucks November the eighth and will get back to camp on the twelfth. I am beginning to know Los Angeles like a book. I've been there three times already and this will make the fourth time when I go for the parade. You should have seen the boys when we got back off maneuvers. We all looked like a bunch of hermits with long black beards. It took me two hours to shave mine off and did I feel like a different person, I'll say I did.

I guess I won't be here much longer the way I understand now the whole company of the 159th is going to Fort Ord the tenth or fifteenth of December.

Sincerely yours,
Pvt. Richard C. Becker,
Co. B, 159th Inf.,
San Luis Obispo, Calif.

The New G-E TRAVEL IRON weighs only two pounds—has folding handle—convenient to pack—easy to carry. Employees Store. Open 10 A.M. to 4 P.M.

NEWS THROUGH THE PLANTS

Plastic Flashes

Last Tuesday A. D. D'Agostino, proprietor, held a formal opening of "Tony's Kitchen." The daily menus are posted at the entrance. For example, dinners like the following are served: Free soup, roast beef a la chicken, hash, gowumpkies, duck (you bring the duck), sea foods (try to see your portion), fresh meats killed before your eyes, fruits of the seasons (rabbit, duck, pheasant, and bass). Many friends called at "Tony's Kitchen" during the formal opening especially to see the lovely floral decorations which so beautifully graced this little "diner." Although we have not as yet had the opportunity of enjoying any of the above mentioned dishes, we know that Tony will do a boom business. We think afternoon snacks would be most welcome, and "Grandpa" sure would look cute in a chef's hat and apron. Good luck, Tony, we are looking forward to being daily customers.

Lucille Evans should get a larger alarm clock for Monday mornings. Her husband went hunting last Monday, and Lucille overslept.

The first shift girls would like to know how Clara Shipe's new plant is growing. She hasn't said a word about it for about a week.

A never ending source of amazement is Ralph Foust's ability always to trump his opponent's ace in the daily euchre match.

Favorite (?) slogan of the Plastics toolmakers: "Here's that mold again."

We hope Olive Meyers will soon have the splint off her toe so she can start walking normally again.

Will someone please show Bob Pion how to chew tobacco and talk at the same time?

We never knew that it took a half day to drive to Huntington and back, but Charley Coles proved it to our satisfaction. Maybe it took two hours to find your badge, huh, Charley?

What we want to know is: How can we have those sweet dreams like Carl Sleppy has been telling us about? Or are they just pipe dreams? ? ?

Here's one for Ripley. We actually saw "Favie" with his hair combed.

We saw Carl Saaf burning up the alley at the Club recently. What was the official score, Carl, or ain't you talking?

Our nomination for absent-minded professor medal is Cecil Young. After waiting around about half an hour for Zola to show up, he was informed she was on her vacation.

Addie was telling us about her Uncle Worthless' latest job. He makes those quandaries people are usually in.

We're very pleased to note that Olive "Gramma" Meyers' rheumatiz is better.

It seems that two of our "boys" left their appetites at home from what we noticed at the Foremen's dinner the other night. Otherwise, Carl Saaf and Lamont Buckmaster, why weren't you eating? ? ?

Agnes Ryan wonders why the red light burns when some people bowl. Just step over the foul line Agnes and then watch the light.

Susie Jones would like to know what is wrong with her bowling. Maybe she isn't getting her vitamins.

As ever,
The Tillies.

Wife: "Dear, I saw the sweetest 'ittle hat downtown today."

Husband: "Put it on; let's see how you look in it."

Well, as the hunting season opened, Effie Wyatt, Bldg. 4-3, has shouldered her gun and set out to capture some wild game. As for rabbits, Effie is a sure shot, but as for bigger game, we just hope she doesn't run into any bears.

Al Kissinger, Bldg. 4-1, and Roy Mentzer, Bldg. 17-2, have joined the skunk club. We hear that Roy joined all over again with Solly Lawrence, Bldg. 17-2, two games without a point.

With winter rapidly settling down upon Big Long Lake and its activities, the fleet that has operated there during the summer months is to be added to the U. S. Fleet now operating in the Atlantic. The fleet is to be moved through the Great Lakes, thence, the Great St. Lawrence waterway into the Atlantic. Commodore A. R. Hall, Bldg. 4-3, tells us his boat will mount three 12-inch guns, two forward and one aft, and will be used as a Coast Guard vessel. Art Brandenburger's sub-chaser will also be put to its proper use which is implied in its name. Buck Adam's fire boat will be used to extinguish fires at sea. He regrets very much that the color of his ship will have to be changed from red to grey. Sam Allmandinger's luxurious ship, "The Dolphine," will be used as an auxiliary cruiser.

The governing heads of the Bldg. 4-3 division of the Confirmed Bachelors' Association of America are very much worried due to the inroads that Dan Cupid has made in their ranks. A week from Sunday they will hold a memorial service at "The Grotto of the Woods" honoring their departed sons, departed in a sense, that of having become affiliated with "The Loyal Order of Benedicts." The High Priest, George Arnold (about whom we are much worried), will conduct these most solemn rites.

Apprentice School

(Continued from Page 2)

tical drafting in the drafting department.

The class room work for both courses is the same, consisting of arithmetic, algebra, blue print reading, descriptive geometry, trigonometry, elements of mechanics, prime movers, strength of materials, machine design, metallurgy, electricity, English, mechanical drawing, tool design, and industrial management.

After graduating he is placed in either a tool or drafting department, depending upon the type of work for which he has prepared himself.

At the present time the Apprentice School has an enrollment of 130 apprentices.

Athletic functions of the Apprentice School consist of softball, basketball, volleyball, bowling and golf.

For social entertainment the boys have parties, outings and the first Friday of each month is reserved for a skating party at the Lincolndale roller rink from 8:30 to 11:30. Proceeds from skating parties go into the general fund which is deposited in the Employees Federal Credit Union and used for welfare work in the Apprentice Department.

Southern Colonel: "What have you in the way of a room, suh?"

Room Clerk: "How about something with a northern exposure?"

"How dare you!"

G-E Club Closed Thanksgiving Day

The G-E Club quarters will be closed on Thanksgiving Day, Thursday, November 20. Regular club activities will be resumed on Friday, November 21.

Appearances Deceiving

(Continued from Page 1)

monthly WORKS NEWS rotogravure section.

In the picture, Mr. Sanford is shown standing alongside two employees in the Philadelphia Works, engaged in grinding operations. The men are wearing goggles with side-shields to safeguard their eyes from flying particles of metal. Mr. Sanford wears glasses.

But, Mr. Sanford's glasses are not the ordinary kind of spectacles which shatter upon slight impact . . . indeed no, they are the shatter-proof spectacle type of goggle worn by every well dressed safety man whom Nature has doomed to wear glasses all the time for corrective purposes. So, the joke is on Mr. Sanford's ribbing friends . . . for Mr. Sanford wears his safety glasses all the time when in a plant . . . a walking, talking example of a man who takes his own medicine.

Squares Dance

(Continued from Page 1)

ing the evening for the most unusual costumes.

Arrangements for the affair were under the direction of a committee composed of W. S. Muir, chairman, and W. D. Martin and R. E. Johnson.

"It's A Joke"

The scene was a Hollywood film studio. Thousands of "extras", attired as French revolutionaries storming the Bastille, filled the middle distance.

In the foreground, on a rostrum, was the director, bawling through a megaphone: "We're going to do this over and over again—until the guy shouting 'whoopee' decides to cooperate."

* * *

Tommy (reading from book): "It says here, dad, that in olden days folk were pounced upon by outlaws.".

Dad: "Yes, and in these days folk are pounced upon by in-laws."

* * *

Mrs. O'Jawsh—"Well, Mrs. Murphy, I'm glad to see you. How did you like your trip abroad this summer?"

Mrs. Murphy—"Well, I liked Paris, London and Rome, but the best part of the whole thing was the trip over. Don't miss that, whatever you do, if you ever go to Europe."

* * *

Southern Mistress (to colored maid): "I had thought of giving you this blouse this morning, but then I recalled that you were dressed in mourning, and it would be too bright for you to wear."

Magnolia's reply: "Now, ain't dat funny? Ah says to mahself jes' this mawnin', ma'am, Ah believes Ah'll go out of mawnin' today from de wais' up."

* * *

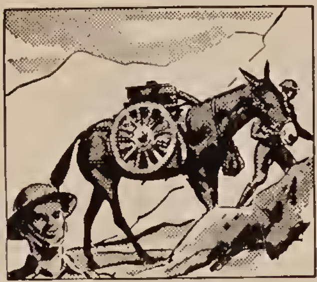
Jones: "He got rich in six months by writing poetry!"

Miss Brown: "Indeed!"

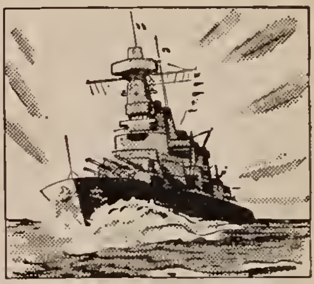
Jones: "Yes, wrote love sonnets to a rich widow!"

Fall in!

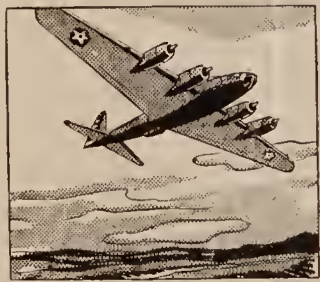
With more than 60 per cent of their efforts devoted to defense work, General Electric workmen, scientists, and engineers are in the front rank of America's defenders.



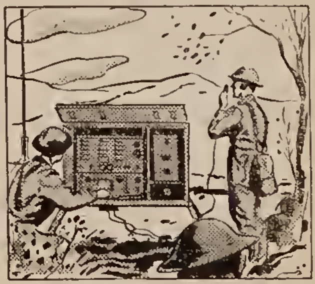
1. The U.S. Army carries pack howitzers wherever man and mule can go. General Electric is making them on machines that once made electric motors.



2. Big as a house is a battleship's transmission. General Electric made the gears, and the turbines that drive them, for four U.S. battleships launched recently.



3. Plane engines smothered for lack of air at high altitudes until the turbosupercharger, largely developed by G-E engineers, enabled them to fly seven miles up!



4. You depend on your radio for entertainment, but in the Army and Navy lives depend on radio communication. General Electric makes sets for the Signal Corps.

General Electric believes that its first duty as a good citizen is to be a good soldier. General Electric Company, Schenectady, N. Y.

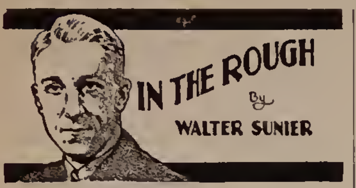
Major Basketball League To Play At Club



IN THE ROUGH By WALTER SUNIER

The fatal time has come. We can not delay any longer in publishing the averages of those who played in the Golf League this season.

Therefore, herewith is the good and the bad news. As Lady Macbeth said, "Here's the smell of blood still." May peace be with you.

FINAL AVERAGES—1941

Notice To "Miniature" Tennis Players

Another G-E Club activity will get under way this year. In response to a number of requests, a Table Tennis League has been formed and will open its schedule tomorrow, November 15.

The Club has ordered four new tables for use in the league in addition to one now on hand. With five tables in play there will be a minimum of waiting since players do not all report at one time. The schedule has been made out for forty players and each man will be sure of playing at least three matches in each session.

Since table tennis (ping-pong to Ed Yahne) is played more often than not in basements, any players who feel the need of furnace pipes for head bumping are asked to bring their own as such things will not be furnished.

On behalf of the league, the committee in charge wishes to take this opportunity to thank the directors of the G-E Club, the athletic committee, and Ed Yahne and his boys for their co-operation in making this league possible. Also, the committee wishes to pay tribute to the memory of Leo Wallace, to whose efforts the league directly owes its existence.

Elex Bowling League Party On November 24

Members of the Monday and Friday evening Elex Bowling league will hold a party next Monday evening, November 24, at the Y.W.C.A. The affair will start at 6:00 o'clock and reservations must be made by Friday, November 21. A business meeting and social program are planned. The committee in charge includes Wilda Click, Merle Kirkpatrick and Charlotte Stanford, the league presidents.

Dr. W. R. G. Baker Honored At Dinner

At a testimonial dinner in the new General Electric television studio, Dr. W. R. G. Baker was recently honored in recognition of his election as vice president in charge of the Radio and Television Department of the General Electric Company. G. W. Henyan, manager of sales of G-E transmitters and radio tubes, was toastmaster.

More than 200 members of the Radio and Television Department and Company officials from the Schenectady and Bridgeport Works attended. Dr. Baker was presented with a gold belt buckle and a scroll bearing the signatures of all those present.

Dr. Baker spoke of the establishment of the radio and television operations of the General Electric Company as a separate department as marking the "coming of age" of the department. He further stated that the future of the radio and television industry is limited only by the imagination, vision, and ability to plan of the men engaged in it. C. A. Priest, engineer of the radio transmitter engineering department, recalled the history of the Radio and Television Department, and made the presentation.

DECATUR SPORTS

A well-filled gymnasium greeted the six City Industrial League basketball teams for the opening games at the Lincoln School.

The G-E Club got off to an auspicious start defeating the Merchants by the lop-sided score of 36-7. The G-E offense centered around Art Baker who led in scoring with 13 points. The highlight of the game from the G-E standpoint was the rigid defense set up allowing the Merchants but one field goal. Every one of the ten members of the team saw considerable action and gave a good account of themselves.

Next Tuesday the G-E Club stacks up against the tough C.Y.O. team.

Summary of the G-E-Merchants Game:

G-E

	FG	FT	TP
A. Baker, f.	4	5	13
S. Jackson, f.	0	4	4
W. Smith, c.	2	1	5
J. McConnell, f.	1	2	4
C. Andrews, g.	1	1	3
Chilcote, f.	1	0	2
Kunkel, f.	0	0	0
Fleming, g.	2	1	5
Owens, g.	0	0	0
Hill, g.	0	0	0
Totals	11	14	36

Merchants

	FG	FT	TP
Brooks, f	0	2	2
B. Kitchen, f.	0	0	0
K. Schnepp, c.	1	2	4
Faulkner, g	0	0	0
Moses, g	0	1	1
Hazelwood, f	0	0	0
J. Kitchen, f	0	0	0
Totals	1	5	7

G. E. INDUSTRIAL LEAGUE

The first 600 series of the season on the G-E Alleys was bowled last night by Art Miller of Mutschlers, and incidentally this is the second successive week that Art managed to lead the parade. Art's total was 610 on games of 189, 218, 203. However, Miller had to share some of the spotlight with H. Lankenau who had high single game of 219. The bowling of C. DeBolt, who barely missed the charmed 600 circle, with a 597, is worthy of comment.

200 scores included Miller 218, 203, Ahr 213, McIntosh 206, DeBolt 211, H. Lankenau 219, G. Gage 214, O. Lankenau 201, Geimer 201.

MONDAY NIGHT INTER-DEPARTMENT LEAGUE

Bill Dellinger's 206 led all of the bowlers in Monday night's Inter-Department League.

Assembly won two games from the league leading Maintenance team.

Production won two games from the second place Testers.

Rotors won three from Stators.

Switches and Flanges games were postponed.

200 scores included Dellinger 206, Jackson 202, Laurent 200.

Standings

	W	L	Pct.
Maintenance	11	4	.733
Testers	9	6	.600
Flanges	7	6	.583
Assembly	8	7	.633
Rotors	8	7	.533
Production	6	9	.400
Stators	6	9	.400
Switches	2	10	.167

Locals To Compete In Strong Six Team Cage Circuit

Games To Be Free And To Be Played On Wednesday Evenings Starting Dec. 3

A basketball league that will embrace most of the leading clubs in the city outside of the Zollner Pistons, representatives in the National league, has been formed and will open its schedule on Wednesday night, December 3.

This will be the Fort Wayne Major Basketball league. It will be composed of six clubs and will play a series of three games each Wednesday night at the G-E club gymnasium.

Teams in the league will be International Harvester, Zollner Reserves, Essex Wire, G-E Club, Kuhner Packers and St. Joe A. C. In most cases the players will be employed by the industries or commercial concerns for whom they play, exceptions being made in certain cases.

The league will be placed on an amateur basis and no admission will be charged for the games. It is planned to have games at 7, 8 and 9 o'clock. Opening night ceremonies are being arranged. Abe DeVol of Columbia City and Louis Diek of this city have been signed as game officials.

Officials of the league are Les Durr, International Harvester company, president; Bob Kessens, G-E club, vice-president and Lieut. Anahu, Baer Field, secretary.

Armory Range Open For Second Shift Shooters

Arrangements have been completed for the use of the Armory rifle and pistol range for second shift employees, it is announced by A. F. Bowers, president of the G-E Rod and Gun Club. Mr. Bowers, states, however, that a sufficient number of enthusiasts must enroll to warrant the use of the range. All second shift employees interested are asked to contact A. F. Bowers, Bldg. 6-4, H. Hyndman, Bldg. 19-5 or E. Pion, Bldg. 4-3.

Second Shift Elex Bowlers Hold Party

The Wednesday afternoon Elex Bowling league members will hold a party tomorrow noon, November 15, at Gunnar Elliott's. Those attending are asked to meet at Elliot's at 12:00 o'clock noon. A varied program is planned with Sophia Bodigan, chairman, in charge.

About Lightning

(Continued from Page 4)

ing conducted at the high-voltage laboratory in Pittsfield and at the Empire State Building and to illustrate several of the more curious effects of lightning strokes in various parts of the country.

The meeting was held at the Chamber of Commerce with Gordon Harvey, Bldg. 4-6, president of the local section of the A.I.E.E. and Wayne Kehoe, president of the Fort Wayne Engineers' Club presiding.

G-E CLUB SPORTS

By Dick Kent

Inter-Department Volleyball

After two weeks competition of spikes and serves, last year's champs, Winter Street, have been able to salvage only three games out of six. This may be due to the fact that Rodewald, their star southpaw spiker is on the injured list, with a broken finger.

Jerry Schlund, a veteran of many campaigns and one of the best spikers in the game is back this year, showing the boys how it should be done.

Series Specialty and Transformer, two new teams in the league this year, have shown that before the season is over they will be worrying the old timers plenty.

Team managers are still welcoming candidates. Anyone interested should contact James V. Johnson.

League Standings

	Won	Lost	Pct.
Small Motor Office	4	2	.667
Small Motor Factory	4	2	.667
Main Office	4	2	.667
Apparatus	4	2	.667
Series-Specialty	3	3	.500
Winter Street	3	3	.600
Transformer	1	5	.167
Apprentice	1	5	.167

Inter-Department Basketball

The first contingent of the largest number of teams ever to participate in an Inter-Department Basketball League at the G-E Club will take the floor December 2 to open hostilities. The league will operate on Tuesdays and Thursdays of each week, with six teams playing on each night.

Considering the number of teams entered and knowing most of the players participating, the quality of ball being played this year will match any B league in the city.

Anyone interested in playing should contact any of the following team managers.

Walter Lamboley, Bldg. 18-5, Main Office; C. L. King, Bldg. 4-6, Squares; Wm. Miller, Bldg. 26-3, Transformer; Louis Voirol, Bldg. 17-2, Small Motor; Dick Holmes, Bldg. 19-5, West Side; Wm. Borscherding, Bldg. 4-6, Messenger; Jim Kelly, Bldg. 12-2, Apprentice A and Apprentice B; Tom Hutsell, Bldg. 8-1, Wire and Insulation; K. Crabill, Bldg. 4-4, Bldg. 4-4; E. Huth, Bldg. 20-2, Bldg. 20 and 10; Don Bruick, Bldg. 6-4, Bldg. 6-4.

Volume 24 FORT WAYNE, INDIANA, FRIDAY, NOVEMBER 21, 1941 Number 92

Unique Heirloom Becomes Property Of Elex Club

Left, R. T. McDonald, founder of the Fort Wayne Works. Right, the improvised table bell made from one of Mr. McDonald's sleigh bells.

Visions of the good old days when the first snow brought out the tinkle of sleigh bells, and the young red bloods of Fort Wayne looked forward to the sleigh races on Washington street, are invoked by a recent gift made by J. M. Pierre, local merchant, to the Elex Club. The gift is nothing more or less than a sleigh bell, silver plated, inscribed, and fitted with a handle to make it a table bell.

The bell is of special historic significance, inasmuch as that it once was the property of R. T. McDonald, founder of the Fort Wayne Works. The sleigh to which the bell was attached was purchased by Mr. Pierre's father.

It will be remembered that Mr. McDonald was the man who gave James Jenney and his son Charles an opportunity to demonstrate their arc lamp some sixty years ago, and who as a result of the demonstration formed a company which later became the Fort Wayne Works. An interesting account of the incident may be found in the book "Men and Volts" published this year by the General Electric Company.

Wire-Insulation Maintains Perfect Safety Standing

Starts On Last Lap Of Year With Record Of No Lost-Time Accidents

With but a little more than a month to go during 1941, the Wire-Insulation Division continues its perfect safety score with no lost-time accidents at the close of the tenth month. A united effort is being made by employees to keep their record intact. Second lowest in accident frequency is the Miscellaneous Department with a frequency of .09 while the Tool Division is third with a frequency of 3.87.

The total number of accidents at the close of the tenth month stood at 115 compared with 48 for the same period last year. The all-department frequency at the end of October of this year stands 6.48 compared with 4.46 for the same period last year.

Eighteen lost time accidents are recorded for the month of October and of this number eight occurred to new employees with one year or less of service.

Standings of the various divisions at the close of October were:

	Freq.	Sev.
Wire-Insul	0.0	0.0
Miscellaneous	.09	.02
Tool	3.87	.01
Series-Specialty	4.53	.07
Gen. Purpose	5.19	.22
Decatur	5.23	.09
Magneto	6.98	.07
Refrigeration	7.44	.36
Motor-Generator	10.29	.19
Transformer	10.40	.09
Gen. Service	12.41	.54
Power Drive	15.55	279.98

Free Boxing Show At The G-E Club

Employees and members of families are invited to a free boxing show to be held at the G-E Club on Tuesday, December 2, starting at 8:30. Ten three-round bouts will be presented and the contestants will include some of the most outstanding of the Golden Gloves entrants of the past year. An interesting program is assured for the evening.

G-E Plastics Department Announces New Table Top For Heavy Duty Use

A new type plastic table top, designed for heavy duty and especially suitable for use by the military services, is announced by the General Electric Plastics Department, Pittsfield, Mass., and its distributors, Modern Traders Co., Inc., New York.

By a unique molding process, the new material is manufactured in one molding process. G-E Textolite-laminated surface sheets are bonded to a synthetic resin-bonded plywood core.

Because it is shock proof, wear resistant, scratch resistant, light weight, and capable of withstanding the most severe field conditions, the new material is considered ideal for numerous army, navy, and air force installations such as: mess tables, desks, conversion tables, cafeteria and dining tables, examining tables, adjustable and folding instrument tables, office tables, pedestal, equine, and folding operating tables, tilting tables for radiography and fluoroscopy and X-ray tables.

The material can be used indoors or outdoors regardless of heat or humidity. It is unaffected by longtime immersion in boiling water and is not subject to mold or fungi. It can be cleaned with hot water or steam.

It is available in widths up to 36 inches, in lengths up to 110 inches (or unlimited by joining), and in any standard thickness for plywood. Colors include solid black, red, brown, green, white, sky blue, dark blue and terrain.

Many New Products After the Emergency

G. E. To Build Mobile Power Plants For Navy

The Bureau of Yards and Docks, Navy Department, has ordered two 10,000-kilowatt mobile steam-electric power plants mounted on special railway cars from the General Electric Company to supply emergency power wherever its projects may require. The Bureau will locate one unit centrally on the West Coast and the other on the East Coast.

The "mobile" power plants will be the first of their kind to be built, but the turbine generators, boilers, and electrical equipment used in them will be apparatus of the types proved in service in regular central station and industrial installations.

Each of the units will be housed in two specially built railway cars which can be hauled over the rails at speeds up to 40 miles per hour.

The power-generating car will contain a 10,000-kilowatt turbine-generator and its accessories, a condenser, and the necessary switchgear. The boiler and its auxiliaries, along with a starting engine generating set will be housed in the second car. A mobile substation constructed on a standard car, will be used in conjunction with each generating unit to permit proper voltage to be obtained for any Naval Shore Establishment.

General Electric engineers estimate that the mobile power plants can be put "on the line" within 24 hours after they are shunted into a siding.

Bunker C fuel oil will be used to fire the boilers, and each unit will consume about three tank cars a day when operating at full load. A sufficient fuel supply for two hours' operation will be carried in the boiler cars of each of the units, however, so that they can generate power before the tank cars are hauled up and connected.

The two specially designed cars of each unit will be duplicates. They will embody fabricated welded steel girder construction of the drop frame type. The total weight (about 200 tons) of each car will be carried on eight axles, thereby obtaining an axle loading within the limits of good railroad practice.

(Continued on Page 4)

Elex Board Meets

The Elex executive board meeting will be held next Wednesday evening, November 26, at 7:30 p.m. in Room 28 at the YWCA. All board members are urged to attend in order to help complete plans for the Christmas party.

Philip D. Reed Points Out The Saying "Necessity Is The Mother Of Invention" Is Still Heavy With Truth

The "bright stars in a dark night" which justify faith and confidence in the future were described by Philip D. Reed, chairman of the board of the General Electric Company, and also deputy director, materials division of the OPM, in a talk before the Sales Executives' Conference of the St. Louis Chamber of Commerce.

This faith, Mr. Reed said, is "a product more essential to our future than all of the strategic materials combined."

The topic of the conference was "Selling in a World Under Arms," and Mr. Reed urged that the most important "selling job" in these times is "the over-all one of pointing out to and convincing the American people that when this emergency is over, private industry can, and, if permitted to function

(Continued on Page 2)

Alloys For Permanent Magnets Improved

New alloys for permanent magnets are about thirty times better than the best carbon steels used a decade or more ago, William E. Ruder, head of the metallurgical and magnetic section of the General Electric Research Laboratory, states in a recent address.

Part of this advance, he explained, has been achieved by heating the magnet material and then slowly cooling it in the field of a powerful magnet.

Until about 1930, said Mr. Ruder, permanent magnets, which have many applications in electrical equipment, were made of alloy carbon steel. Then alloys free from carbon were devised. Some of the most effective are those known as "alnico."

The latest alnico, an alloy generally consisting of iron, aluminum, nickel and cobalt, he stated, was first proposed by a laboratory in Holland and developed by the General Electric Research Laboratory. This may contain a small amount of copper as well. With magnetic cooling, its maximum energy is about five times greater than that of the best alnico alloys of a few years ago.

The new alnico contains a higher percentage of cobalt than the old, making the cost per pound relatively high. However, Mr. Ruder declared, "the high energy content

Volume 24 Friday, November 21, 1941 No. 92

• The Most Precious Thing

When the Pilgrim fathers "first footed" on Plymouth Rock back in 1620, the most precious thing they brought with them was the "spirit of freedom". From the day they landed, they fought for it, bled for it, and plenty of them died for it.

No thinking citizen of this land can let himself believe that the United States of America as she stands today was ever built by a race of slaves. True, perhaps, we have been resting on the oars and true, perhaps, we have let the old ship of state more or less find its own course. But we have stopped all that and we are paying attention to the job once more . . . the job of maintaining that spirit of freedom.

All over the United States today, men and women are vitally alive. They are busy night and day turning out the things it takes to prove to a world gone mad, that freedom means just as much to us today as it did to the Pilgrims in 1620. We are not going to let *anybody* tell us anything different.

We are thankful today that war has not come to our shores. We are thankful that we still have strength and time to build stoutly against any encroachment of our fundamental rights as a free people.

Indeed No! We are not going to let the days of Plymouth Rock fade from our memories . . . *No! Not Ever!*

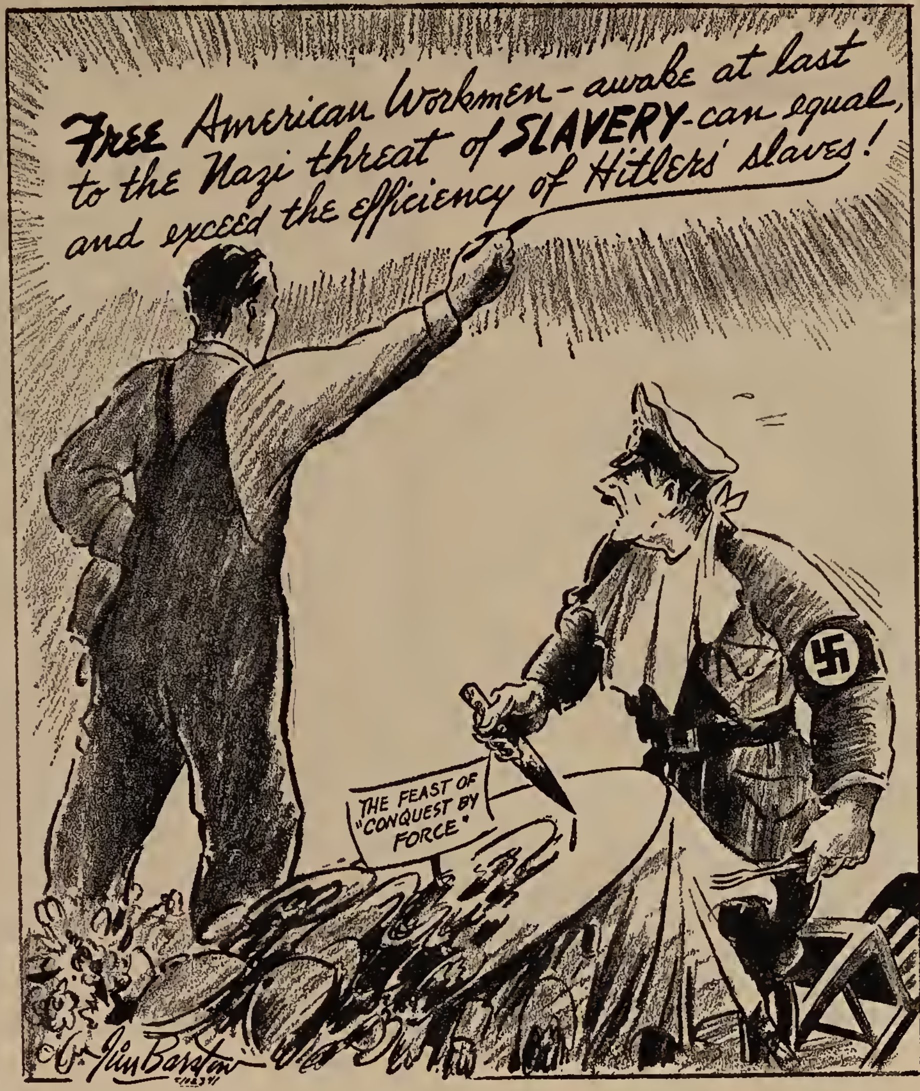
• American Holiday

America already has an Independence Day to memorialize its freedom. Perhaps it should also have an Inter-dependence Day to serve as a reminder of how greatly every American depends on every other American for the preservation of that freedom.

The fact is that liberty, if it is to be preserved at all, must be preserved intact—by all of us, for all of us. Deny it to any one group, and the chances are that in time it will also be denied to others. President Roosevelt's statement that "the rights of free labor as we know them today could not survive without the rights of free enterprise" serves to illustrate that fact.

Today we are arming to defend free enterprise and all our other freedoms. To do that successfully every one of us—and every group—must surrender some liberties temporarily. But we must make sure that we surrender them only temporarily. We must resolve now that the emergency controls over our freedom must end with the emergency, and that no one group shall be permitted to use the current crisis to obtain unfair advantages over another. Unless we do that we may learn too late that we have thrown away the very liberties we are making sacrifices to defend.

THE HANDWRITING ON THE WALL



Free American Workmen - awake at last to the Nazi threat of SLAVERY - can equal, and exceed the efficiency of Hitler's slaves!
THE FEAST OF "CONQUEST BY FORCE"

When Walter D. Fuller, president of the National Association of Manufacturers said recently that, "Free men working together at a known task in free lands can do any job," he wasn't fooling, nor was he talking just to hear the sound of his own voice. America, just now beginning to get into its stride on defense production is about to prove that statement.

Already America has sent to Britain nearly twice as many combat planes as were lost defending the British Isles in 1940. Already the flow of munitions to Britain has exceeded anything that Britain received during the last war.

And remember folks, it's only the beginning. In the months to come, America's assembly lines will pour forth such a flood of war materials that the whole world will stand aghast. As the greatest example of a free democracy in the world, America can do no less. She is torch bearer for the world and make no mistake about it.

Many New Products

(Continued from Page 1)

with no more than the demonstrably necessary, desirable and constructive intervention of government, will produce at lower and lower costs a veritable flood of exciting, useful new products, and tens of thousands of improved old ones, whereby this country can, after a long pause, resume the march toward an even higher standard of living for all our people.

"The things we are learning and will continue to learn during the period of hostilities, in every field of scientific research and production, are simply astonishing. The old cliche, "necessity is the mother of invention," is still heavy with truth," Mr. Reed said. "Manufacturing techniques, mass production methods, business procedures all along the line are undergoing important changes which give promise of more efficient and hence lower cost operations later on. Materials, both natural and synthetic, are being studied as never before. New ones are being developed, old ones improved. Conservation is being effected by new designs, by substitutions and by reduction of waste and spoilage. Scientific laboratories, concentrating today on new and challenging problems vital to both defensive and offensive military operations, are making discoveries not by tens but by hundreds, the greater part of which will have direct and fascinating bearing on the kind of homes we shall be living in, the clothes we shall wear, the food we shall eat, the vehicles we shall travel in, the methods of communication we shall use—in short the kind of world which shall be ours in which to work and to play after the war.

"America has always been profligate in the use of materials, for the reason that materials were plentiful and relatively cheap. Europe, on the other hand, never so fortunate as us in her supply of raw materials, has for many years been learning to use as little as possible and to use it with maximum efficiency. America has nevertheless been able to compete with foreign manufacturers in the markets of the world because carefully planned production lines and power tools have enabled our workmen to turn out a great many more products per hour of work than foreign workmen could produce. Thus the labor cost per product, even with far higher wage scales, has frequently been lower than in other countries.

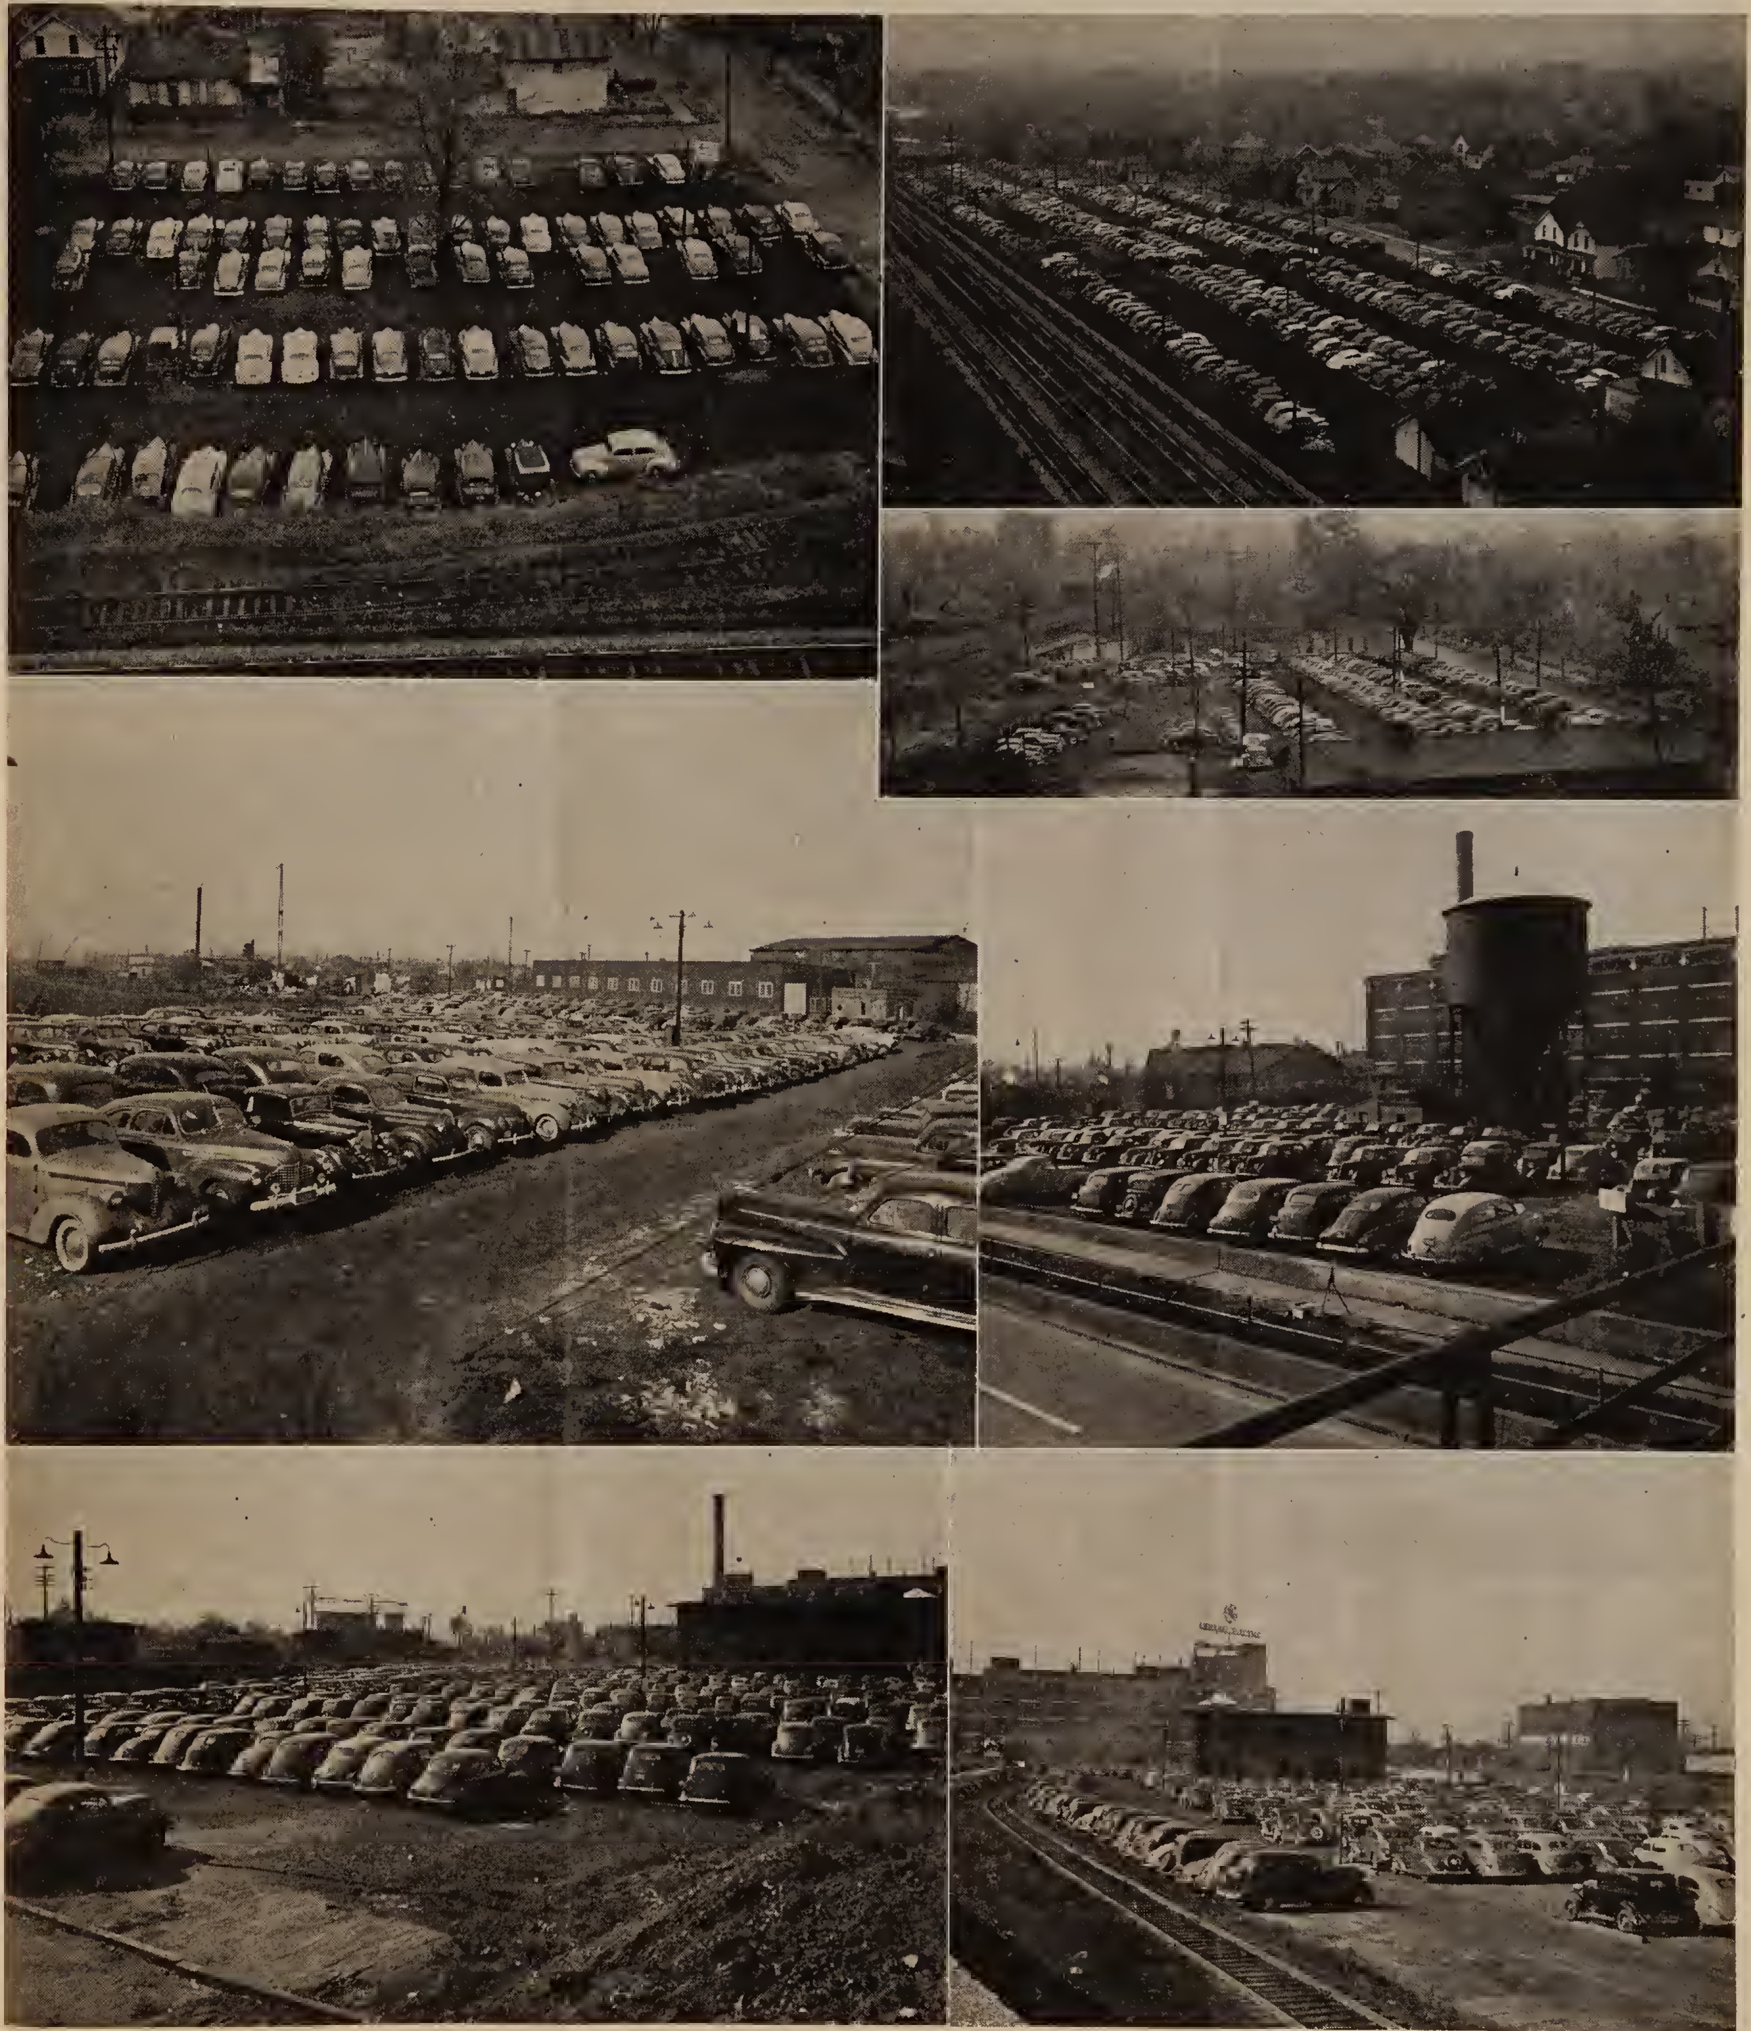
"Learning, as we now are, perforce, to conserve materials to the utmost, we shall apply that knowledge with real benefit in the post-war period, for it will enable us not only to sell our products more cheaply at home, which makes for increased volume and a higher standard of living, but also to meet the inevitable foreign competition of low wage scale labor in the markets of the world.

"These things, these few bright stars in a dark night, should be seen and understood by all the people. Courage and confidence in the future, based on the preservation of our existing principles and institutions, is in my judgment supremely important. To tell that story, to help instill that confidence, is the job of everyone who believes that opportunity for self-betterment under the enterprise system is a greater stimulant to the production of more goods for more people at less cost than is the fear of governmental purge in a profitless economy.

"It is, I submit, both the duty and the opportunity of every person and every enterprise that expects to be with us in the post-war

(Continued on Page 4)

Parking Lots Play Important Part In Traffic Problem



With more than twenty-five hundred cars driven to and from work each working day, parking near the Works would be a physical impossibility for many employees were it not for the conveniently located Company parking lots. A glance at the above pictures clearly shows how the parking problem has been solved and gives some idea of the extent of motor traffic to and from our Works. The lots shown above are—upper left, the center Jones Street lot and right, the west Jones street lot. Directly below is the Lindley Avenue lot. Center left shows the Winter Street lot and center right, the West Fairfield Avenue lot. Lower left shows a view from the north of the East Fairfield lot and lower right a view of the East Fairfield Avenue lot from the south.

New Assignments In Magneto Department

Top, left to right—R. F. Wilson and R. E. Pinkham. Below—Gale Stripe.

Three appointments in the Magneto Division are announced by Ralph Dennison, superintendent of the division. Gale Stripe is named general foreman, R. F. Wilson, foreman of inspection and R. E. Pinkerton, foreman of second shift in charge of miscellaneous operations and final assembly.

Mr. Stripe, the new general foreman, joined the Fort Wayne Works in 1927 when he became a member of the tool department in Bldg. 17-4. He continued to serve as a toolmaker in Bldgs. 17-4 and 17-1 until 1937 when he was named foreman in the tool department. He continued in this capacity until May of this year when he was made a foreman on the second shift in the Magneto Division, which position he held up to the time of his present appointment.

Mr. Wilson is a graduate of the Apprentice School, having entered the school in September, 1925 and graduating as an electrical tester in 1928. He served for a time as supervisor of transformer developmental test, assistant foreman of inspection and test in Bldg. 4-1, and foreman in the motor section in Bldg. 6-8.

Mr. Pinkham is also a graduate of the Apprentice School, having joined the G. E. in 1929 and graduating from the Apprentice School as a machinist-toolmaker in 1934. He was employed for some time as a toolmaker in Bldg. 26-5 and Bldg. 17-4. He was appointed a foreman in the Magneto Division in July of this year and continued in this capacity up to the time of his present assignment.

Hydraulic Control Building Dedicated

The new General Electric hydraulic control building at Schenectady, New York, was dedicated recently at ceremonies attended by high-ranking Navy officials and General Electric executives and employees. Among the Navy officials present were Under-Secretary of the Navy James V. Forrestal and Captain J. S. Evans, Naval Inspector of Ordnance for the Schenectady.

Principal speakers of the evening were Under-Secretary Forrestal, Charles E. Wilson, G. E. president, and Chester H. Lang, chairman of the General Electric Defense Advisory Committee. In true Navy style, the new defense building was christened with a bottle of champagne by Miss Ruth Ann Evans, daughter of Captain Evans. The ceremony reached a climax when two huge bombs exploded in the sky, releasing American flags.

Alloys For Magnets

(Continued from Page 1)

with the resultant saving in size brings the cost per unit of available energy to a figure quite comparable with the other alnico compositions."

He also told of the achievements reached with another kind of magnetic alloy, used to make the thin steel strips for cores of transformers. Research has made it possible to line up the metallic crystals in such a way as to be most effective.

"The application of these two outstanding recent developments in magnetic materials calls for radical changes in each case if their use is to be justified," he stated, "but in all applications where such changes are possible, considerable savings in material and reductions in size and weight of apparatus can be made.

Many New Products

(Continued from Page 2)

era, to do its part in picturing the vast untold opportunities that lie ahead for men who are free to dream, to plan, and to act on their own initiative. Faith in the future, faith in your own institution as a part of that future! Here, gentlemen, is something to sell in a world under arms, though profits on these sales may be deferred and hard to identify. It is a product more essential to our future than all of the strategic materials combined, a product which every self-respecting enterprise in the country can make and distribute through thousands of commercial outlets and through every medium of promotion. In a world under arms we must build for tomorrow."

When the end of the war will come, Mr. Reed said, depends largely upon this country. The war's duration will be determined by the time it will take to "swamp the totalitarian powers with planes and ships and tanks and guns," and "no one but the United States can produce these things in anything approaching the desired quantities."

This can be done in two ways, Mr. Reed said: by devoting only about twenty per cent of manufacturing facilities and taking years and years to do the job, or by tightening our belts and devoting perhaps fifty per cent of our national capacity to producing armaments.

"I fervently favor doing it the short, hard way," Mr. Reed explained, because "it will in the end produce less lasting dislocation, less suffering and want, many billions less dollars, and less likelihood of a permanent government bureaucracy, entrenched, housed and happy in Washington — a bureaucracy ready to perpetuate the extensive war-born controls over industry that are essential under the abnormal conditions of a wartime economy in which speed, not cost, is the controlling factor, but which in peace time would stifle and perhaps destroy the system which made this country great."

Although this country is not faced with immediate invasion, Mr. Reed added, it must recognize the fact that "until Naziism and all that it stands for is crushed, we shall be forced, simply for self-protection, to divert a substantial part of our production to implements of war. The extent of that diversion will not be governed by our wish or desire but by the collective armament production of all aggressor nations and the vassal states they forcibly occupy and rule. And were Russia, Britain, China, the rich islands of the Dutch East Indies, or any of them, to fall by reason of inadequate fighting equipment from us, the need of all kinds of armament and of trained soldiers and sailors to operate them would be correspondingly increased, ending ultimately, it is my belief, in further devastating warfare and further international impoverishment."

Mobile Power Plant

(Continued from Page 1)

The natural circulation type boiler for each unit will furnish 140,000 pounds of steam per hour. The turbines will be of single-cylinder design. They will be designed for 550-lb. steam at 825 F.

The generators operating at 3600 rpm will produce 60-cycle, 3-phase power at 13,800 volts. They will be forced air cooled.

SCIENCE FORUM

by L. A. Hawkins

Q. Is it possible for certain Februaries to be without a full moon?

A. Yes. The average interval between successive full moons is 29.5 days, whereas the month of February in ordinary years has 28 days. Hence, about every 20 years this phenomenon should occur. There was no full moon in February, 1934.

Q. What are sun spots?

A. They are huge tornadoes much like the tornadoes we have on the face of the earth. But instead of being a whirlwind like our tornadoes, the sun spot is a huge whirlpool of electrically charged particles. These particles are ejected from the sun spot at high velocity into space. Those reaching the earth go in the general direction of our magnetic meridians, toward the North Pole in this hemisphere.

Q. Where do eels go to spawn?

A. The true or fresh-water eels of North America and Europe spawn only in blue water of the open Atlantic at considerable depth. The place is south of Bermuda; there may be other places, but they are not known.

Q. Can static electricity when produced by combing one's hair be heard in a radio receiver?

A. Yes. The reason for this is that when a person combs his hair with a rubber comb, tiny sparks from static electricity are produced. These sparks act as miniature broadcasting stations, sending out radio waves in all directions. If the receiving set happens to be tuned to a weak station, the automatic volume control makes the set exceedingly sensitive, so that feeble radio waves are easily detected and can be heard in the loudspeaker.

Q. Would capillary action cause a mercury barometer tube, which is very small, to read one inch less than the day's reading?

A. If the inside diameter or bore were small enough, it could read as much as an inch out of the way because of capillary depression. Barometer tubes, however, are usually more than one-fourth of an inch in bore diameter, and the correction is almost negligible. The amount of correction for capillary depression depends on bore diameter and on how clean the mercury and glass are. Unless one has an extremely small barometer, the incorrect reading could be due to air that has gotten into the tube above the mercury column.

Q. Since the half-life of a given quantity of radium is 1760 years, why will the quantity left after the first 1760 years disintegrate to half its weight in the same space of time?

A. Just why nature picked 1760 years for the half-life of a certain kind of radium no one knows. The rate of disintegration depends on the number of atoms present. When half of it disintegrates in 1760 years, it takes the same length of time to lose half of what is left because it disintegrates half as fast.

✤ NEWS THROUGH THE PLANTS ✤

From The Feminine Viewpoint

By Hilda Barthold and Frances Krauskopf

Now that Thanksgiving is a thing of the past, we can look forward to left-overs—and Christmas shopping. When you start out on the yearly grind, resist that impulse to put on any old thing that's comfortable. Be brave and put on your best bib and tucker—you'll be surprised at the difference in the service you get. It's purely a matter of psychology. The more prosperous you look, the more money you have to spend (supposedly), and the harder the clerks try to get it. A marvelous system! Many is the time we have brazenly sallied into a Swanky Shoppe, tried on gowns, demanded (and got) ultra service, with nineteen cents between us and starvation and no charge account—purely a matter of appearance. Glamorous and uncomfortable.

But to get back to Christmas. Now is the time for all good girls to come to the aid of their budgets by starting to do their seasonal shopping. In the first place, there is a larger choice now than later and secondly, articles are still appearing in their common packagings. Later they will be dressed beautifully, but you'll pay for it—much more than if you'd wrap them yourself.

The Annual Modern Plastics Competition recently brought to light many things to delight the heart of the shopper, things which will make Christmas gifts which will be remembered a long time.

If you have children in your home who are in the pencil years, they might like a new electric pencil sharpener now on the market. This sharpener doesn't object to most types of colored pencils; in short, a very handy gadget for the school children.

If your child is a future star of the rinks, he might like a pair of the new shoe skates with plastic wheels, which eliminate a great deal of noise. The G-E had its finger in this pie, for it designed and manufactured the wheels.

For the baby there are educational toys of plastic materials, which can be kept absolutely sanitary because the color is in the material and cannot come off. Consequently they can be washed as often as necessary. They are practically unbreakable and completely resistant to gnawing and chewing.

For the men, bless their hearts, there are plastic cigarette cases, tobacco pouches with humidor construction to keep the tobacco moist; neckwear which is durable, stretchable and wrinkle resistant; suspenders; belts; and pocket secretaries.

And now for the women. There is a new plastic fruit juicer in several colors—red, green, and yellow—with a black strainer and handle to contrast with the white bowl, arm and reamer. One especially good feature of the plastic juicer is that there are no metal parts coming in contact with the citrus juices.

Here's news—a Christmas tree entirely of plastic materials, down to the last little ornament. That makes it fire-proof, unbreakable, weather-proof, and unaffected by temperature and humidity. Therefore the tree can be used on the lawn or in the living room. Decorations include stars, gems, bells and balls, small clusters and spheres. There is also a considerable saving of electric power by the use of some special lighting feature which we do not understand, but the manufacturer says so, and who are we to argue with the manufacturer?

After months of experimenting, a plastic rosary has been produced which is unbreakable. The beads have the appearance of gems and purely as a work of art, it is an achievement.

For the woman interested in interior decoration, there are interesting plastic bookends and a beautiful vase. The vase is made from three sheets of material. A thin circular sheet is worked into a fluted, tapering shape which forms the bowl of six flutes in which flowers can be arranged. The bowl is set on a lathed ball about two inches in diameter, which in turn is set on a flat base about four and one-half inches square and three-eighths of an inch thick. The three parts are firmly cemented together and form a striking piece.

We were especially intrigued by a pair of candlesticks made in a faithful reproduction of the contours of a calla lily in bloom. The sticks are made from clear plastic material which is washable. A petal-like sheath tapers into the spirally wound stem (which holds the candle). The whole business is set on a flat round base. It is attractive because of its unusualness and the grace of its design. Most women would be delighted to own a pair.

Plastics have even invaded the field of cosmetics. One manufacturer has aimed his efforts in keeping Milady's nerves calm when she is carrying perfume while traveling or even in her handbag every day. He has made a plastic perfume container that will not spill, leak, or allow bits of cigarette to enter. The perfume is concentrated in a stick very much like a lipstick in appearance, even down to the turning and revolving elevator inside. Over the perfume stick a fluted plastic top fits snugly. It is as easy to use as a lipstick and comes in bright red, brilliant green and light blue.

A complete line of cosmetics has been packaged in translucent containers. Each container is a permanent dressing table necessity designed for refills. Together they offer a complete boudoir set including everything from soap to rouge and lipstick. They are decorated with a lovely desert flower carved by hand into the pink plastic covers of the containers. What girl wouldn't be glad to own a set?

But here's a hint to the wise—plastic products are going to be scarce very soon, and the woman with an eye to the future will be shopping for her plastic gifts very shortly while she can still have her choice. (All products mentioned are described and pictured in *Modern Plastics* for November, 1941.)

Employees Store open 8 a.m. to 5 p.m. until Christmas.

* * *

Tool Design Supervisor

A. J. Richert

A. J. Richert, a graduate of the Apprentice School in 1928, has been named supervisor of tool design and drafting in the Tool Division it is announced by C. A. Brenner, superintendent of the Division. Following Mr. Richert's graduation as a machinist-toolmaker he was assigned to the Tool Drafting Department, then located in Bldg. 17-1. Later he was transferred to the Winter Street plant and in 1933 to Bldg. 26-5. In 1934 he went to the tool design section in Bldg. 18-4 and continued in this assignment up to the time of his present appointment.

19-4 Night Owls

Ross Strodel, night boss in Bldg. 19-4, was sure surprised when he was presented with robe, slippers, cigarettes, and tobacco from the whole floor last Friday night. Ross is being transferred to Bldg. 19-5. Lots of luck, Ross, wherever you go. We'll miss your kidding and big hearty laugh at night. . . . Something ought to be done about this. The only time Frances Allen comes back to the small lot section is when she is selling Elex tickets. What's the matter, Frances, don't you like us nohow? . . . The boys in test are going to take up a collection to get Gale Jones a razor. So Jonesie, you had better shave it off yourself before the boys take drastic measures. . . . W. Zack, one of our smartest testers, has a good way of opening up a door when it is locked. He slides a coat hanger through the place where the rubber is, and forces it open and then sticks his hand in and unlocks the door. Sounds complicated, but I guess it's O. K. Sounds like an experienced man. . . . Someone tell Pondo Vlaschoff that he doesn't exactly resemble Clark Gable. There is a slight difference. It's small but it's there. . . . Wonder if Vic Watters in Bldg. 19-4 knows that the girls in Small Lot section have a nickname for him. They call him Dimples. Isn't that too cute for words. We heard that Dimples has a girl in every port also. But I guess those dimples get the girls. They're just too, too divine. . . . Ross said he took three shots and got two pheasants and a rabbit the first day of the hunting season. Not bad shootin', pardner. Not bad at all.

Decatur News

Mrs. Al Schneider and Millie Acker attended the Beta Province convention of Delta Theta Tau sorority held November 14 and 15 at the LaSalle Hotel in South Bend, Indiana.

Sgt. Joe Krick, of the 85th Quartermaster Division at Fort Benjamin Harrison, Indianapolis, arrived home on Monday, November 17, on a 30-day furlough.

Eileen Bowman returned to work on Monday, November 17, after enjoying a week's vacation.

Mr. and Mrs. Ray Leitz and family visited in Kankakee, Illinois, over the week-end.

The night girls of the flange department enjoyed a chili dinner with Iva Teeple Thursday, November 6. Names were drawn for a Christmas exchange. Those present were Portia Burkhead, Marcile Jones, Martha Strahm, Betty Noll, Esther Meyers, Selma Strahm, and Mrs. Iva Teeple.

A number of night girls of the winding department enjoyed a restaurant and roller skating party Friday evening, November 14. Those girls who attended the party were as follows: Kathryn Hook, Florence Affolder, Gyneth Hill, Jane Linn, Marjorie Johnson, Germaine Lengerich, Frances Frite, Dollie Schladenhauffen, Alice Cook, Bernadine Hackman, Delores Bentz, and Lorena Reppert.

Our friend Henry Pappenbrock must think that the office he is running for is a man's sized job. Ever since he was nominated for the office of director of our M. B. A. section in Bldg. 17-1 he started raising a mustache. You can't fool us "Pappy", that mustache still won't make a man of you.

According tae the latest trickle from the grapevine, this column has been discussed by the Central Cost Reduction Committee—whoever they are. They think it ought to have more about C. R. (cost reduction) in it. Weel, it's highly flattering because: 1. Somebody must have read it. 2. It must be the official C. R. column. 3. They are practicing what I preach—more or less—and they're still getting this column for nothing.

Weel, C. R. we have wi' us always, whether we know it or not. One o' the first C. R. committees tae visit America met in Holland about 321 years ago. They wanted tae reduce the cost o' living and worship as they please. So they came tae America. The first year was full o' hardships. Materials were scarce and they who did not work didn't eat. Sounds like today.

But C. R. won out. Their crude industries prospered, the grain multiplied, their animals multiplied—all except the snakes—they were adders. So after the first prosperous harvest they proclaimed a day for THANKSGIVING. Using their C. R. instincts once more they selected the most available material—turkeys—and got their friends, the Indians, tae shoot some with bow and arrow tae save gun powder.

Now-a-days we can't go out in the woods and shoot a turkey—the farmer wouldn't like it. But even if we buy one, we spend less effort, in hours o' lahor, than the Pilgrim did, if ye count his gun powder, shot or the hours he spent persuading, in sign language, the Indians tae do it for him.

O' course, most o' us (my relatives, anyway) get ours on a raffle or in a bowling league. Or we just go home tae Mother and Dad.

My Cousin Bonnie goes home tae her folks in Edinburgh—Indiana. She went tae the station and filled out a blank tae get wholesale prices on the bus.

The ticket man looked at it and said "Your form is not filled out properly."

"Foosch, ye upstart," said Bonnie, "must ye discuss my anatomy?"

19-5 Office Chatter

Jack Kearney came into the public eye last week—in fact, why not use Jack and save the wear and tear on the siren. Jack promises to render for the behalf of the office very soon. . . . Was Mae Rose Tannehill dreaming of what to have for supper when her smock got caught in the ditto machine. No one hurt. . . . If anyone would care to write to Private Hugh Heely, here is his address: Camp Wallace, Texas. . . . The inventory cards are found and everyone is happy in the Cost Department. . . . Famous last words from Larimore: "Don't you think we should have at least had a tie?" (Speaking for Northwestern).

Talk about graft in politics, no one has a thing on the Bldg. 4-3 reporter, Elva McMaken. If you don't want your name in the WORKS NEWS, just produce a piece of pumpkin pie and that will hush up almost anything except what she doesn't tell Mr. Tilford and Art.

✤ NEWS THROUGH THE PLANTS ✤

News On The Nose From 4-1 And 4-5

My, oh my—what excitement we do have around here. Once we had one office, then we had two, now 'tis three. But we're very happy to welcome back into the family C. J. Nussel and his Bldg. 26-5 "aircrafters". . . . In the big move it seems that one unhappy person was left very much in a turmoil. When the desks were taken, Viola Wyss was much taken aback to find herself without one. Now, like the man without a country, she finds herself racing to any desk that is left vacant. Her motto is, "Any port in a storm." . . . Violet Henderson won a duck at a bingo game recently, and then her troubles began, so she called him Clarence, the Problem Child. . . . Harriett Storm is so delighted with the new office in the Bldg. 4-5 Production Department that she says they'll have open house as soon as they get the new drapes and slip covers. Incidentally, she calls it "the bungalow." . . . In case his many fans want to know, Bachelor Jim McGill has been very well behaved lately. No boners for at least a month. . . . Comes the first breath of winter and Bob Merrill is worrying because the girls in the Bldg. 4-5 office are finding the cool blasts too much for their Nylon clad toes. They have been seeking the added comfort of heaters, and he's afraid his profit sharing will go down as they burn away the kilowatt hours. . . . Lena Maxfield, our second shift office clerk, is still wondering why all the construction men acquired southern accents the other night after hearing her sweet Texas drawl. Could it be that they were "putting her on" just a little? . . . And now to make way for a newcomer to the ranks. It seems that our sister floor, Bldg. 4-1, is also making a bid for public print, so-o-o-o- we gladly greet Gabby Gussy, who will relate the events of the day from down Bldg. 4-1 way.

Gossip From 19-5

Anna Pearson was so disappointed about the wiener bake that was cancelled, after buying a pair of heavy long underwear, she didn't even get to wear them. Cheer up, Anna, you can wear them to work this winter. . . . Marie Page thought sure there was going to be meat on the table this Thanksgiving. She is very sad these days. After winning a big nice fat turkey, Marie thought: "After all these years, I'm going to have a turkey dinner." But the turkey had other ideas. After Marie fed and babied the bird, what did it do but up and left her one day. "That's gratitude for you," Marie thought. The next time you win a turkey you better eat it right away. Any one seeing a stray turkey, please see Marie Page. . . . Dwight Williams says he wished he had lived in the days of "Billy the Kid" out west. Dwight says there's nothing he likes to do better than hunt rattlesnakes. He just loves to hear them rattle. . . . Why does Clarice Fyock's face light up when you ask her where she is going to spend her vacation. It couldn't be the man with the long beard in New Jersey. (Or could it be?) . . . We thought Pat Steup looked awfully cute with that all-day sucker in his mouth. Did that remind you of your first day in school?

If anyone wants to know how to get a red nose without a bottle, ask Margaret Jane Ray, Bldg. 4-3.

Is Zat So?

The M. B. A. election in Section 31 turned out to be a very close race for all offices. The newly elected officers are: Edward Brosche, chairman; William Hanley, vice-chairman; Edward Kronmiller, secretary and Elmer Brown, director. Elmer Brown won the election in spite of the campaign promises of his worthy opponents. "Pat" Von Eichhorn, however, proved that he was no amateur in the art of campaigning. We can now readily understand how "Pat" got to be a State Senator. . . . George Mosshammer had us fooled one noon hour recently. We thought George was practicing a new dance routine but later we found out that he was just trying to get that mouse out of his pants leg. . . . If you feel that something is missing from Bldg. 17-1 office, it is Mabel Lieberenz, our time-clerk. We hope that you will soon be well enough to return to work Mabel, the office isn't the same without you. . . . Joe Eifrid and his wife are on their delayed honeymoon. They are visiting New York, Philadelphia, Washington, D. C. and Detroit. I'd say that is a trip worth waiting for. . . . Joe Kramer is no longer "foot-loose and fancy-free", as he took unto himself a better half on Thanksgiving Day. So you thought you would surprise us, didn't you, Joe? We knew it all the time but it sure will be a disappointment to some of the girls, I betcha! Lots of luck, Mr. and Mrs. Joe Kramer. . . . "Dan" Hoover and Paul Geiger are the most recent persons in our gang who are in the market for a set of "store boughten" teeth. It's getting to be quite a joke and we are all wondering who will be next. . . . If you noticed a large group of people in Bldg. 17-1 last Friday and wondered what all the excitement was about, I'll tell ya! Henry Gollmer bought a new pair of shoes! He is still accepting bids on his old pair but he wants to be certain that the next wearer can fill the shoes as well as he did. If you ask me (and even if ya don't) I'd say Henry filled them too well—he was even bursting through on all sides! If you are in need of air-conditioned foot comfort, please contact Henry Gollmer, Bldg. 17-1 office. . . . Harry Mentzer caused quite a lot of comment in our office recently and as a result Dorothy Buhr lost a bet to Lillie Pion. Dorothy has decided that she isn't so good at guessing peoples' age. You sure had her fooled, Harry!

That is all till next week.

The Question Mark.

19-4 Nibbins

It's about time the boys are doing something to get even with the girls for wearing slacks, but there was only one who had enough nerve to try it. Joe Prange, Bldg. 19-4, came to work Monday morning with curly locks which he said he got over the week-end, but which quite a few girls agree he got over his weak-end. Slacks have not been seen on girls since. He ought to have Bob Hope try it on Hollywood Blvd. . . . "My house" is the main talk heard coming from Edna Braun these days, now that she has all her furniture bought and has moved into the apartment. . . . Charlotte Frankart and Rosemary Coovert were certainly surprised last Saturday afternoon at a dinner given for them at Miller's Tea Room. Charlotte will become Mrs. Wayne Buckmaster on November 29, and Rosemary will become Mrs. Wayne Smith sometime soon. She will not say though just how soon.

Is Distribution Foreman

W. G. Demsey

The appointment of W. G. Demsey as foreman of second shift in Bldg. 6-1, 2 and 3 is announced by J. C. Grosjean, superintendent of the Distribution Division. Mr. Demsey started as a checker in the Division nineteen years ago and has served in that Division throughout the period of employment. He served as leader on the second shift and foreman on the third shift. After the third shift was discontinued he was made leader on the second shift and continued in this capacity up to the time of his present appointment.

News On The Nose From 4-1

The people in Bldg. 4-1 have finally decided that they are old enough and wise enough to have a column of their own in the WORKS NEWS, so we make our initial debut after the hunting season has officially opened. . . . Several of the hardier men in Bldg. 4-1 have ventured out and bagged some pheasant and rabbit. Sam Stoufe and J. Wilmer LaVine are two of the so-called hunters. Mr. LaVine had a schedule lined up for himself that read something like this:

7:00—Kicked one up.
10:00—Finished rolling up sleeves.
11:00—Killed game (four rabbits).
Back at noon.

That certainly is an interesting schedule, and it seems to get the desired results. . . . Bob Neeb, another sportsman, went up into northern Michigan to fish for trout. Something evidently went wrong, for Bob came back with pigeons instead of those nice juicy Rainbow Trout. . . . From the trout we jump to monkeys. It seems that in Bldg. 4-1 Shirley Trowbridge and Katie Edgar can be seen at any time climbing boxes looking for work. If this type of thing keeps on, we'll soon have enough oddities to start a zoo. . . . Now we know why Cleo Favourite is walking around as though she owned the place. Last week she received a little sparkler for the third finger, left hand. . . .

Thisa And Thata 19-5

I guess we'll have to tack a red ribbon on both sleeves of Hazel Herons' coat so she will be able to find it with less difficulty! . . . We wish a very speedy recovery to Dorothy Mae Craig who is on our sick list! . . . George Diffendorffer celebrated his first wedding anniversary by taking his wife on a second honeymoon to Chicago. They went dancing at the Trianon ballroom, quite a jump from the square dances at Zulu! . . . How many saw "Two-Gun Terry" at work last Friday? Dick sure makes a swell cowboy with his guns, belt and lariat!

Dale Stuts, Bldg. 26-3, has established himself as a patriot and a hunter at the same time. He conserved on his shells by not using a single one. Also he shot nothing.

Ed Leitz, Bldg. 26-2, is going big on his art school hobby. Wonder if he is in the still life class.

John Leeth, Bldg. 26-2, must have had himself a good time at the wedding.

If you ever see someone dashing down Fairfield Avenue looking like Dagwood when he comes out of the front door, it will be our own Viola Moore. She'll be rushing home to get her letter from Eddie, who's in the Army. . . . We'd like to tell you about George Chandler and his beautiful, twenty-five cent, carnival stripe necktie; but we know that he'd rather tell you about it himself. So—why don't you ask him all about it?

M. B. A. PATIENTS

General Purpose—Harland Beaman, 826 Madison St.; Cathryn Hoffman, R. R. No. 1, Fort Wayne, Ind.; Mabel Lieberenz, R. R., Huntertown, Ind.; George Miller, 1111½ Park Ave.; Frank Phillips, 921 Rockhill St.; Flossie Schmidt, 2018 Brooklyn Ave.; Harry Savage, 716 Walnut St.; James Thompson, 512 E. Pontiac St.

Transformer — Harriette Augsburger, 2707 Broadway Ave.; Iona Arnold, 1432 Boone St.; Rachel Gaunt, R. R. No. 5, Fort Wayne, Ind.; Jean Knowlton, 1212 Holton Ave.; Ralph Van Osdale, 517 Mechanic St.

Apparatus—Keller Graves, St. Joe Hospital; Margaret Oddou, 2613 S. Harrison St.; Floyd Swihart, 1310 Canal St., New Haven, Ind.; R. Voltz, 1912 Harrison St.; George Wolf, R. R. No. 3, Fort Wayne, Ind.

Apprentice—Paul Kleber, 618 W. Jefferson St.

Winter St.—Joe Horstman, St. Joe Hospital.

General Service—Kenneth Christie, 407 W. Brackenridge St.

Plastic—Ralph Barnett, 514 E. Berry St.

Series and Specialty — Rea Kuhn, 2707 Broadway Ave.; Howard Neuhaus, 1608½ E. Wayne St.; Gertrude Scherer, 3803 Clinton Court.

Office—Isabel Bartholomew, 345 W. Wayne St.; Alice Nichens, 1501 Columbia Ave.; William Ryan, 621 E. Jefferson St.

Wire and Insulation—Mabel Alcott, 2515 Brooklyn Ave.; Gwendolyn Feaser, 2830 S. Lafayette St.

Returned to Work—Paul Clum, Warren Spurling, Martin Walsh, Harold Roche, Louise Todd, John Schvieker, Waide McCutchen, Delores McCoy, Theresa Blanchand, Jack Judge, Harry Beam, Calvin Hapner, Ruth Chandler, Terrace Calvin, Gladys Gable, Marjorie Rasor, Doris McGinley, Vena Baker, Juanita Gibson, Lowell Welker, Frank Connor, Nora Avey, Bette Gunther, Mary Hambrock, Earl Romey, Paul Schirmeyer, Leon Gurevsky, Beeman Howard, Cecil Mitchell, John Goings, Willodean Mitchell, Harold King, Mary Martin, Don Otermat, Herbert Kurtz, Lyle Frederick, Jean Knowlton.

Left the Hospital—Mary Gray, Ralph Van Osdale, John Norris, Alice Nichens, Iona Arnold.

19-4 Spot Jottings

The new desk in the Assembly Department, Bldg. 19-4, is not that of the manager but it is now assigned to our own Howard Such, who has climbed another step on the G-E ladder of success. The flowers and decorations were in appreciation of the fine job he did for the girls in keeping their trays filled when he was in charge of stock. . . . We still don't know where the party who has been seen washing Howard's desk fits into the picture. . . . Christmas must be pretty close as the Test and Inspection of Specialty Motors have the petitions out for their annual party at the Indiana. . . . "Deacon" Schmidt and "Einstein" Shorter are reported to be working on another new invention.

Famous last words in Bldg. 8: "When I was at the Pennsy," Ed Bucher; "When I drove a truck," Parky; "When I bowled 600," Loui; "When I ate horsemeat," Bill; "When I pay everyone pays," Cholly.

NEWS THROUGH THE PLANTS

Sleuthing In 4-6

We welcome to our midst Roger Zwayer, who is replacing Paul Swinehart as messenger in Bldg. 4-6. . . . We have good news from all of our patients. M. G. Norris shows daily improvement. Bill Ryan was given a promise that he would be home in time for his Thanksgiving dinner; and Alice Nichens was brought home from the hospital last Saturday and seems to be getting along quite well. . . . We are continually discovering new talent in Bldg. 4-6. Harold Adams proved his ability in writing a poem last week. Although the poem was short, it was very much to the point. . . . Dale Fisher, Harold Fremion, and George Denner all became sick after smoking a wedding cigar. My, my! What is this world coming to? They say each generation is becoming wiser and weaker. We wonder. . . . Evidently Fort Wayne lacks adequate modern dancing facilities, for Bonnie Ervin found it necessary to jaunt to the beautiful Aragon in Chicago, where she danced to the smoothness of Gene Yergen's orchestra. . . . Melba Hanauer provided a very pleasant week-end for Eloise Greiser by taking her home with her. She saw to it that Eloise didn't have a dull moment. . . . The wedding bells certainly got a work out during the past week. Last Saturday morning, Thomas Doell and Mary Louise Hennessy were married at St. Patrick's Church. On Saturday evening, Howard Reinking stole a march on us and was married to Ruth Bultemeier at Bethlehem Church. On Thanksgiving the following couples took the final step: Harry Richardson and Geraldine Grim, Harriet White and Kenneth Lytle. We offer our best wishes to all of them.

Bldg. 26-B Lines

We know it is news, this column staging a comeback—and starting out with a bang. The column this week is dedicated to all of the Big Game Hunters.

Probably the one who had the greatest catch was Wayne Staley, with the thrilling capture of Jerry the Mouse. He invented a sure-fire trap and really did bag him, but someone hated to see Jerry suffering by his close surroundings, and set him free. Quoting Wayne, "I got the right idea—see this one won't miss"—referring to his new trap.

The third shift has a hunter in their midst. Russell Golliver bagged 2 pheasants, 10 rabbits, and to top that off he won a turkey at work.

It's so odd—one day you hear all of the men talking about their hunting trips—the next day just try and find someone who actually went. Then of course, there are the hunters who got buck fever, or their gun sight was off, or after driving miles and miles, only got one rabbit or worse yet got none.

It's too bad, we started out to write up all the hunters and their game, and this small bag was the extent of our hunt.

Lawrence Rickert, Bldg. 26-2, does a good imitation of Little Jack Little. If anyone wants a talent demonstration Harry Karr, Bldg. 26-2, has promised to preside at the ball.

Come ye men young or old who want to learn to knit. Loretta Bloom, Bldg. 26-2, is nominated for instructor.

Why Ten Miles An Hour?

SLOW
SPEED LIMIT

This question is easily answered when we study the records of motor vehicle accidents. The number of fatal or disabling injuries occurring at ten miles an hour or less are so few that it is difficult to find a record of such accidents.

For a number of years we have attempted to regulate traffic in the yard by merely displaying "SLOW" signs. This method gradually became ineffective because there is considerable difference of opinion among operators of motor vehicles as to what rate of speed is "SLOW". Consequently, our Plant Protection Department has installed these signs indicating ten miles an hour as being maximum speed permissible anywhere in the yard.

As pedestrians, all of us should appreciate this effort to reduce traffic hazards on our factory streets.

Earl Fusselman, patrolman, is shown in the above picture observing Sam Henline, one of our veteran truck drivers as he passes under this sign.—H. L. Smith, Safety Engineer.

Plastic Flashes

We wish to express our deepest sympathy to Ruth Shoup in the death of her father.

Helen Hauser's hobby is making toy airplanes. Could it be that you are air-minded, Helen?

Nora Roehm would have had a good excuse for coming late to work the other day. It seems Nora was cornered by a mouse, and she couldn't call for help for fear of waking the neighbors.

Every day occurrences: Herb Schwartz going around to all the girls and saying "Good morning." Louie Slack saying, "I have to take that mold out."

We hope Lucille Wood has a nice vacation. She is spending the week in New York.

If young Ed Roesener doesn't grow into a railroader, it won't be his pappy's fault. Well founded rumor says Santa's pack may have the beginnings. Some say 10 months is too young.

Some people have all the luck. say we, as we saw Betty Perry win the turkey that Elex gave as a door prize at a luncheon the other day.

Zola is back from her vacation and reports that she has finally found Yehudi. He's the little man who pushes up the next piece of Kleenex.

The Tillies hope that everyone had as nice a Thanksgiving as we had. We really have a lot for for which to be thankful.

All the news we can get from the hand molders are words like: pheasants, rabbits, quail. So from that, we take the hunting season is in. Now don't get excited, Mehitabel, they don't mean man hunting.

Bill Schwartz seems to have a big interest in Bldg. 4-6.

The Tillies have heard that Greba Rust spent a most enjoyable vacation.

6-B Buzzes

Flash! Bingo Bill Walt and Jake Sappington, hardy nimrods of Bldg. 4-B, were on hand early last Monday for the hunting season—rabbits, pheasants, and, oh, yes, one "mallard." Jake's neighbor at the lake is disgusted because his decoy rides off side due to a load of buckshot. . . . Latest cigar and candy "passerouter" is Mrs. Bonnie Garrell Grawcock of Bldg. 6-B. . . . Emeric Renbarger, tester in Bldg. 6-B, treated the gang to the usual fine time at his Pretty Lake home. Bob Moore and Bob Ellingwood left earlier than the rest of the gang, due, some said, to deflation of the dollar. Art Bashelier had difficulty calling home to check in, although ably assisted by Bill Grubb. Milt Raller carries his loose change in his hip pocket. He says it's the safest place in any game where you sit down. Bill Putt and Jim Johnson didn't believe in signs and donated the pot. They are not sure whether it was the chicken or poker pot. Red Renbarger was treated rather badly considering the fact that he was the host, as the boys took all the profits, Harold Mettler taking a good plane, leaving Red with chicken bones, ash trays and long necked bottles. Dallas Smith and Cecil complained of the slow game (some fellows just can't get rich patiently). Byron Neuman reassured Milt that Red's dog only ate bones from rabbits and chickens, whereupon Milt ventured to open the back door. . . . James Showalter, formerly a stock clerk in Bldg. 6-B, has been transferred to Bldg. 19-1. Well, our loss is their gain, but we'll miss that curly hair and infectious grin.

Who's face got red in Bldg. 26-3 when the cooing voice said "Hi Dickey baby."

26-5 Tool Bits

We sure have one happy Scotchman in our midst. He added another dollar to his coin bag as a result of a bet on the Notre Dame-Navy game.

The high cost of hair cuts is showing its effects in the toolroom. You would think they had all joined the "House of David."

Herb Thiele spent last week hunting and fishing in the vicinity of Clear Lake. The gang expected plenty of stories but Herb has not let any out—yet.

Slim Dolan returned from his vacation and reported hunting was fine. He said he saw a lot of pheasants (hens) but didn't know that he was allowed to shoot them.

Now that the bird season is closed all you rabbit hunters who wish to save money see Chuck Fruechtenicht. He just runs them down and cracks them over the head with his gun stock. "Rather hard on the stock isn't it Chuck?

Henry Wittber was the guest of the Quest Club and Dr. Eberly who teamed it to enlighten the club on the intricate parts and resulting joys of possessing one of the finest stamp collections in this vicinity.

Why does Jim MacFeeley risk catching a cold by sticking his head out of the window every day between 1:00 P.M. and 1:15 P.M. Could it be a member of the fair sex?

After having been skunked on two previous fishing trips, Gran Gorrell decided he would try some canned bait (shrimp) the next time he went. He reports the results are the same.

Cliff Clapesattle reports pheasants and plenty of rabbits his first day out.

John Ebert must be slipping as he claims it is too cold to sit in a boat this time of the year. Maybe he has lost the art of catching the big ones.

Ross Vaughn and Gus Mittermaier intend to form a "Dissatisfied Car Owner's Club". For further information, see Vaughn.

Bill Wedler is sporting a new '32 gas buggy, and is it ever a keen looker. Oh, yes, even a whistle on the gas tank.

Frank Druhot is looking for a large hat to play pinochle with instead of his present partner.

These Indian Summer days have brought about the following happenings in the Rotor Stator group: Ross Cohagen shedding his vest and sweater; Henry Wittber displaying honest sweat upon his brow (From the Village Blacksmith); Dick Lenz with a far away look in his eyes; Earl Lenz and Christ Kaiser getting their ears set out; Wilson Garman singing barn-yard tunes; Dick Hemrick humming the glories of his girl friend, Margie; Art Thieme dreaming of the large ones he should have caught this year, etc.

Gather around boys. The smokes are on Bob Brodrick, our WORKS NEWS Division Editor. Of course it's a boy. The name—why naturally Robert Michael Brodrick.

Very late one night two chaps who had been imbibing too freely were sitting on the pavement with their feet in the gutter. One was heard to say to the other, "What does your wife shay when you shtay out late like thish?"

"Haven't got a wife," the other replied.

"Then why do you shtay out late like thish?"

Stranger at the party: "Dull, isn't it?"

Other: "Yes, very."

Stranger: "Let's beat it for home."

Other: "I can't; I'm the host."

Winter Street News

If anyone has any turkey buzzards on their farm that you know of, just invite Joe Deck out to go hunting. Last Saturday Joe went hunting, and he thought when he shot that he had himself a nice pheasant, until he got it home and showed it to his neighbor, and between the two they discovered it was a turkey buzzard. . . . Unaccustomed as she is to machine shop expressions and phrases, won't someone please explain to Marie Johnson what the word "pickled" means when applied to eccentrics and omitting persons or pickles. . . . Observing the large bandage on Don Brighton's head, we're wondering, since there's no ice to slip on, there's always the possibility of the rolling pin, but we'll take your word for it, Don. . . . Margaret Stillwell wishes someone had informed her of the rapid increases in the "rabbit family". Instead of housing for two, they had multiplied so fast that when they began to roll out of the nest, she had to call for help. . . . C. Kriescher and Bob Meyers had their annual hunting expedition and Bob made a beautiful shot at a pheasant. After Kriescher found a rabbit sitting, he called Bob to get ready. Bob was making upon the poor bunny when a pheasant flew out from under his feet. It scared him so bad, he just naturally pulled the trigger never even aiming. Was Bob surprised when he heard the pheasant fall, shot through the neck. That's really getting them Western style.

Deaths

Lucille Frances Jockel, an employee for the past eighteen years, died at her home Monday morning after an extended illness. Funeral services were held Thursday morning at the home and at the St. Mary's Church with burial in the Catholic Cemetery.

Early Monday morning, November 10, found the nimrods of Bldg. 4-3 far afield in quest of game. Led by Harold Hart, that fearless slayer of big game who never comes back without something. This time he succeeded in bagging quite a few pheasants and did not have to buy guinea hens from a farmer and then try and kid his wife into believing that they were pheasants, as he did a year ago. George Arnold captured one skunk alive and plans to tame him. George Cowan, more fortunate than the rest, came home with one hog, a duck of the domestic variety, also, two chickens that had been well flattened by his automobile. Sam Allmandinger got a few crickets that had not left for the south yet and plans to feed them to the fish next week-end. Oh, well, do not be disheartened, boys. Better luck next time.

We understand that Lawrence Schuster, Bldg. 26-2, is not very reliable on his hunting reports. He fails to make them regular although it must be admitted that those reports he does make show that there is a plentiful supply of game—sometimes.

And then they tell the one about the supersalesman who was selling automatic milking machines.

One of his prospects was a farmer who only owned one cow. This boy was so good that he sold the farmer two machines and took the cow as a down payment.

NEWS THROUGH THE PLANTS

Motor Generator Static

It seems that Marcella Brackman dotes on cheese sandwiches of the vintage "Limburger" and has arranged with Elmer Wagner to bring her one of these odoriferous tid-bits every time he attends a stag where the men are strong enough to take it. Now days when the girls see Elmer give Marcella a package, they begin opening windows or leaving the room when the lunch hour arrives. Just a bunch of "sissies" she sez! We reply "wise is the man (or woman) who knows her own strength."

Should Help

The following definitions are given to assist hunters in general and George Moses in particular. According to Mr. Webster's dictionary, Owl "any member of a well defined group of birds of prey distinguished by their large, more or less forwardly directed eyes, short hooked beak, strong talons with reversible outer toe, etc." Pheasant—"Any of numerous large, long tailed, brilliantly colored gallinoceous birds constituting "Phoseanus" and several allied genera, etc." Reports are that George went out hunting and after tramping over the fields for quite a time finally flushed a "pheasant" which he felled with two blasts from his trusty gun. Rushing forward our hero picked up his "pheasant" only to find it was a "hoot" owl. This was very disconcerting to George for while he had heard such expressions, as, "blind as an owl", "wise as an owl" or "tight as a boiled owl", he never tried to eat a "boiled owl". Now George is very unhappy and the owl doesn't give a hoot about anything, all because our hero was never given proper definitions of the two birds. We feel the above description should help.

They Sure Do

Bill Grover believes in conserving material in these trying days. It seems Bill has an old family tea kettle which has seen better days, in fact it was in such a condition that Grover had to flip a coin to decide whether to use it for a sieve or have it repaired. Bad luck seemed to be trailing Bill that day for the coin decided repairing this fugitive from a junk man was the course to follow. Accordingly our hero called in Joe Henry, welder deluxe, for consultation, and after a thorough examination, Joe explained that the kettle was too far gone, there was no use in wasting time on it. But Bill refused to be discouraged, he took the family prize to a welding establishment and had it rebuilt. But alas, the old relic was so far gone that repairs were of no avail—it still wanted to be a sieve and for several days after Bill could be seen mumbling in his beard. Which proves that, "The best laid plans of mice and men, oft go astray."

The Tie That Binds

Jim Mitchell feels very low, for it seems he made an error, one of those errors in dress that prove costly and embarrassing. Jim, along with Harold Federspiel, started out early in the morning on a hunting expedition and after traveling for a while decided to stop for breakfast. When Jim removed part of his outer wrappings, Harold observed that he was wearing a tie—of all things a tie on a hunting trip. Now wearing a tie on a hunting trip has much the same effect on Harold as waving a red flag at a bull, but with all he displayed wonderful self control—did he rave, tear his hair and attempt to rip off the offending article of raiment? Definitely not, he calmly went about eating his meal, then in his most nonchalant manner said, "Jim, let me see your knife." Jim passed the requested weapon across the table and Harold very deliberately grasped the offending tie and sliced it off with one whack of the knife. Jim's lament is given in the following poem, composed by him and dedicated to Harold:

My song is short
My story sad
You be the judge
If good or bad.
I went out hunting
I cannot lie
Federspiel's knife
I—minus tie.

A tie that binds, we calls it.

Saying of the Week

Jerry Frye remarks, "Failures are the most severe critics of the parade of progress, they aren't marching in it.

Can You Beat It?

When Dorothy DeHaven appeared at work last week wearing a swell diamond ring and a happy smile, the girls all gathered to "ooh!" and "ah!" as they looked at it. Remarked June DeWitt, "I'll be the next to get a diamond or bust!" Replied Jean O'Connor, "Who's going to pick up the pieces?"

Can you beat it?

A unique surprise party was held last Monday evening in honor of Lois Daugherty, formerly of Bldg. 12-B, who left the city Friday to make her home in Erie, Pa. The guests, all 12-B co-workers, arrived at the appointed time and eagerly awaited their chance to cry "surprise" when Lois showed up to keep her date with Edna Martin at Edna's house for what she expected would he a last visit with Edna and her family. After a good half hour had elapsed from the time Lois was expected, the girls began to get a bit uneasy, wondering if perhaps Lois had changed her mind and gone to the Armistice parade instead. Marjorie Degitz was preparing to call Lois' home to see if anything had happened to detain her, when in walked Lois from the direction of the kitchen where she obviously had been waiting all the time for the right moment to surprise the surprise party. It seemed that she had beaten everybody there, and Edna, determined that somebody should be surprised, stuck her out in the kitchen with a magazine until all the girls had gathered. Anyhow, an enjoyable evening was had by all.

Those present were Marie Gehle, Lois Hagemann, LaVerna Lee, Marjorie Degitz, Edna Martin, Mary Coggeshall, Evalena Dunbar, Olga Ehlerding and the honor guest.

Why is it that John Collins, Bldg. 26-3 makes little round marks on his ram. Suppose he is trying to imitate the ring worm.

John Figley, Bldg. 19-5, would like the people from the Punch Press Department to know that he is not hen-pecked but that his wife will not let him out after dark.

Al Hambrock's, Bldg. 2-2, worrying days have ended. Some kind sympathetic soul sent him a "Floogie Boo" lucky worry bird to absorb all his worries.

Christmas Cards

As in former years, the Elex Club will again offer a wide selection of Christmas cards for sale to employees. A display of the cards may be inspected by contacting any member of the Elex contact group.

Uncle McWell Of 26-2

Money—And Where It Goes

Money is peachy stuff—especially if you have some. At an early age we decided to make money our life's work. Business has been terrible. We first acquired a vital interest on the subject of money when we swallowed a penny under the erroneous impression that it was a piece of graham cracker. We have never since gained such intimate association.

However, our keen interest never abated. Not even when someone kicked out the ladder from under us and we went to work for a living. We were sublimely confident. Hadn't we spent our childhood learning that "a penny saved is a penny earned"? Didn't we remember the late John D. Rockefeller's admonition that "three cents represented one whole year's interest on a dollar"? Yes, indeed, brothers, we were loaded to the brim of our new Sunday hat with gems of wisdom on thrift. Knew 'em all by heart. Could quote slogans until blue in the face—and quite often were.

But here we are, slogans and all. And we don't even have the penny we started with! No, we haven't been gamboling on the green all this time because we found out early in the game that they play for keeps. But we did find out that:

If money is the root of all evil, the gophers we know are in the wrong pasture.

2. The Federal Government has an exclusive monopoly on making money, and is very narrow-minded about friendly competition.

3. Paper currency is printed in denominations from $1.00 to $100,000.00. This last is purely known by hearsay.

4. The equal distribution of capital got all mixed up shortly after Adam and Eve. Not even Russia has been able to straighten it out since.

5. Gold is the basis of our monetary system. Gold is evaluated in terms of karats. Vegetables and rabbits get all the breaks.

6. "Silver Threads Among the Gold" is a propaganda song, designed to sabotage and undermine the Treasury Department.

7. People who hoard their money and do not tell Uncle Sam are often known as "missing persons".

8. As for the old saying—"There's a pot of gold at the end of the rainbow"—strictly a pipe dream. Not even a pot.

9. Money talks—but not loudly enough to insure happiness.

10. Lastly, we'd better leave the subject of cost reduction and "More Goods for More People at Less Cost" in the capable hands of our colleague, "Sandy", who firmly believes in telling the truth because then he doesn't have to remember what he said.

The Good Old Days—

"When there was only one man in Europe who thought he was Napoleon."

Question and Answer Dept.

Dear Uncle McWell,

Maybe you can answer a question on first aid for me. If a man was pale, sweating profusely, unconscious, bleeding from the mouth, eyes and ears, and had a fractured skull and arms, what would you do?

Lane (Safety First) Breidenstein.

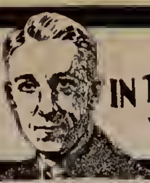
Dear (Are You Kidding?) Lane,

Shucks, chum, that's a cinch. I'd bury him!

Uncle (Next Please) McWell.

Due to the fact that the horse population is ever on the increase in this vicinity and especially so around Huntertown, Archie Boren, Bldg. 4-3, tells us that the citizens of that community have revived that extinct organization, The Horse Thief Detective Association, in anticipation of a recurrence of horse thievery. A goodly number of the citizens of this community have joined. In a meeting held recently plans were formulated to give one of those famous Horse Thief Detective dances that were so popular in the late nineties and early 1900's. For further information, contact Archie, who, by the way, is chairman.

Carl Clevenger, Bldg. 4-3, proceeded to prove to us that he really can catch Willow Trout back of his home on the banks of the St. Joseph river. He brought his pet trout, Oscar, to work and presented it to your reporter; but during the noon hour Oscar mysteriously disappeared. We have a sneaking suspicion that he graced Art Brandenburger's frying pan Sunday morning.



IN THE ROUGH

By WALTER SUNIER

Allen and Lee were matched against Edgar and Hemphill last season, which is a somewhat different combination than usual, since in each case there was an engineer and a commercial man teamed together. Anyway, however the combination was conceived, they was a fueding in them thar hills of Brookwood. Evidently the combination of an engineer and a commercial man is unbeatable because neither could win the series. Each team won a match and then they played a tie. There was a rumor that Allen and Lee finally won. As for us, we would not know whether to pick the commeerings or the enginercials.

There is a saying that goes something like, "He who is burned is twice as shy". Apparently that one was made up by Indians because it does not seem to apply to white men. On August 10th Ray White had a 48 on the first nine, but after three putting No. 16 he burned his thumb when a whole card of matches ignited. He drove into the right hand trap on No. 17 which is a long poke even if you are hot. He parred this hole and No. 18, finishing with a 40. Apparently for a white man the saying should be changed to, "He who is burned is twice as spry". Maybe a good way to get hot is to light a fire under yourself. However, we will take the old-fashioned way of being even tempered and concentrating on every shot. We are very even tempered, being raving mad all the time.

The golf courses really hummed again last Saturday and Sunday and play was much like it is in the summer except for the greens and in some places the greens were the same as in the summer. By that we mean that the dandelions were in blossom in profusion on the slope of No. 16 fairway at Brookwood.

Editor: "I wish you'd type your poems before you bring them to me."

Contributor: "Don't be silly! Do you suppose I'd waste my time writing poems if I knew how to type?"

Seeing Is Believing

During the celebration here on November 11, our friend, Joe Cochoit, Bldg. 4-3, a member of The Forty and Eight Organization, tried to borrow a box car from the Nickel Plate Road to see if he really could get 40 men and eight horses into it.

DECATUR SPORTS

Inter-Department League

Tom Haubold was the leading bowler in Monday night's Inter-Department League. Tom had 212 for high single game and 528, 3-game series to lead the Maintenance to two wins over the Testers.

Rotors won three games from the Switches. W. Hein had a big 210 in his third game.

Assembly won three from Production.

Standings:

	W.	L.
Maintenance	13	5
Assembly	11	7
Rotors	11	7
Testers	10	8
Production	6	12
Switches	5	13

G-E Club Wins Another

The Decatur G-E Club basketball team turned in another high-class performance last Tuesday night in the City Industrial League, walloping the CYO team 38-17. The scoring for the G-E was well divided, with Blythe leading with 10 points.

Next week the locals will stack up against the strong Cloverleaf Creameries. Both teams have won their first two starts, and a battle royal is in prospect.

The results of the other games were:

Summary for the G-E team:

Name—	Points
Baker, f	4
Owens, f	0
Blythe, f	10
Heller, f	4
Smith, c	0
Andrews, c	5
Jackson, g	8
Chilcote, g	4
Hill, g	3
Fleming, g	0

G-E Industrial League

The G-E Ramblers, tired of being the doormat for the other teams in the league, let loose all their fury on the tough Burke team; and when the smoke cleared away, the G-E boys had three more wins to their credit. Laurent's 235 in his second game and 610 series led the winners.

Jack Richard had a big night for the G-E Dodgers with a 602 series; however, he failed to receive sufficient help from his mates, and the Dodgers lost 2 of 3 to Doc's Place.

In the other league contest, West End Restaurant skyrocketed to first place by three wins over Mutschlers, the leaders up to this time. R. Woodhall was best for the winners with 618 series.

200 scores included: R. Woodhall, 205, 224; Stump, 223; Hoffman, 222; Richard, 201, 212; Laurent, 235.

Rod-Gun Club Notice

Due to other activities at the Armory it is necessary to suspend shooting during the coming week. However, regular weekly shooting will be resumed the following week. Employees interested in using the Armory range one morning each week are asked to contact the club officers as soon as possible.—A. F. Bowers, president.

Apprentice Makes Flying Record

Jim Kelley, Apprentice School, ready for a solo.

To Jim Kelley, a student in the Apprentice School of the Fort Wayne Works goes the honor of being the first in his class of civil pilot training under the Civil Aeronautics Authority to solo. Jim's solo came after but eight hours of training. The original candidates numbered seventy but of this number but ten qualified, and of the ten six are Fort Wayne Works employees. The five from our works who qualified in addition to Jim are Harold Britton, Bldg. 6-4; Albert Geisler, Bldg. 20-2; James Johnson, Bldg. 17-2; Paul Koenig, Bldg. 19-2 and Joseph Prezbindowski, Bldg. 19-5.

Jim's instruction, typical of other members of the class, consists of ground work lessons five nights a week with each session lasting three hours. Jim will finish his ground work on December 9 and will get his pilot's license by the first of the year.

Asked about his reactions in connection with flying solo, Jim said the first time up the instructor used some acrobatic stunts, including a five turn spin with a fall of 1,500 feet. After the apinning, everything else was just plain flying.

$49,765 Paid In Insurance During Oct.

Fort Wayne Beneficiaries Receive $4,650—Grand Total Now Stands At $19,320,137

Beneficiaries of 17 employees in six of the major apparatus works of the Company were paid a total of $49,765 in death claims under the terms of the Group Life Insurance plans during October, according to the monthly compilation from the office of the secretary.

The largest payment was in Schenectady works where there were seven claims for a total of $21,555. River Works had four claims for a total of $12.650. There were. two in Fort Wayne for

(Continued on Page 4)

Cafeteria Notice

Starting next Monday, December 1, the cafeteria at the north end of Bldg. 16-2 will be closed. The cafeteria will remain closed for a period of about six weeks to permit alterations.

Sale Of Defense Bonds To Replace G.E. Bond Issue

There will be no offering of G-E Employees Securities Corporation Bonds this year but instead the Company will continue to support the U. S. Government Defense Savings Bond program. In order to do this a revised plan is soon to be announced which will again permit Defense Savings Bonds Series E to be purchased by employees on a payroll deduction installment basis.

In making this announcement President Wilson said "you will recall that last April announcement was made of the adoption by our Company of a Defense Savings Plan which made it as convenient as possible for you as employees to acquire United States Defense Savings Bonds on an installment basis as well as for cash.

"The plan is being continued—and I therefore wish to take this opportunity to express again my hope that all of you will take advantage of its provisions and thus acquire more United States Defense Savings Bonds.

"Please remember that by investiog in such bonds you not only save for the future but you also help our government to provide for national defense."

Details of the new defense savings plan will soon be released. The U. S. treasury department is interested in a large subscription to these bonds and details of the new plan will be presented individually to each G-E employee.

Apprentice Alumni Hard Times Party

The Apprentice Alumni Association will hold a hard times party at Zulu on Friday evening, December 5, for its members and their guests. Reaervations may be made with contact chairmen.

The program for the evening includes a dance as well as games.

Attendance Of Record Crowd Is Anticipated

Five Programs To Be Presented. Ticket Distribution Will Start On Monday

The G-E Club Christmas party for children of employees, probably the most greatly attended annual event of the club will be held on Saturday, December 20, it is announced by Paul Vogt, chairman of the entertainment committee.

Approximately ten thousand are expected to attend the affair, which will be open for children between the ages of two and twelve years. As in previous years a limited number of tickets will be issued for each performance to insure that the program may be enjoyed in comfort by the youngsters.

Five Programs

Five programs will be presented during the day. They will be at 9 and 11 o'clock in the morning and at 1, 3 and 5 o'clock in the afternoon.

Tickets for each performance have been printed and will be distributed at the stand in the Club basement starting next Monday,

(Continued on Page 2)

Stockholders Increase

General Electric stockholders on November 20, record date for paying the December 20 dividend, totaled 218,434, an increase of 5,594 over a year ago, W. W. Trench, secretary of the company, announced last week.

Construction Started On Lynn Gear Shop

$16,000,000 Building To Be Devoted To Manufacture For Maritime Commission

Erection of a new $16,000,000 shop at the Lynn River Works that will add 300,000 square feet of floor space to General Electric's facilities for manufacturing reduction gears for the propulsion sets of Maritime Commission ships is officially under way. The building is being financed with Defense Plant Corporation funds.

Construction was started in a brief ceremony November 10 before workmen and a group of 100 invited guests representing the navy, the army, and business and civic interests of New England.

The first rivet in the first steel column to be hoisted into place was set in a dual operation performed by J. W. Belanger of Schenectady, assistant manager of G-E's Federal and Marine Department, and C.

(Continued on Page 2)

New Broadway Gate House In Operation Starting December 8

Construction of the new gate house, on the east side of Broadway, south of the Main Office building, is drawing to completion, and will be in operation starting Monday, December 8. The new gate will provide entrance and exit for employees of the Main Office building, a considerable number of employees from Bldg. 17 and of other buildings on the east side of Broadway. With the opening of the new gate, the gate between Bldg. 17 and the Main Office will be closed. It is anticipated that many employees now using the Lindley Avenue pedestrian gate will also find the new entrance more convenient.

Promotion Made In Order And Stores

H. F. Briggeman

Announcement is made by N. S. Tilman, supervisor Order and Stores Department, of the appointment of H. F. Briggeman to the position of assistant to supervisor in that department. In his new position Mr. Briggeman will coordinate the ordering of all raw material for the Fort Wayne Works.

• Wait 'Till He Wakes Up

Procrastination is the thief of time!

Now that's a mouthful for this department to utter, for it has long been standard practice not to use two-dollar words in this column. The principal reasons are, they are too long, too hard to remember how to spell and sometimes too darned hard to understand. But, here's one case where a two-dollar word is justified.

Procrastination simply says in one word: "Put off until tomorrow what should be done today." It's a case of one word taking the place of nine and in this day of conservation of materials, its use seems quite in order. Anyway, now that we know what it means, we can console ourselves with the fact that is a common failing of mankind, not restricted to race, color or creed. But consolation is cold turkey where cash is concerned.

Right now we are face to face with a situation which will bear no justification or qualification if we fail. Next March we face income taxes . . . unlike anything we've ever faced before. When we sit down and figure it all out . . . as sit down and figure we must . . . we are going to get a collective sinking feeling in the pit of the stomach worse than any roller coaster ride or airplane power dive. It's going to be bitter medicine. The longer we put off planning for it, the tougher it will be. So . . . begin right now to get some dough set aside for those taxes. One way to help make March 15, 1942 a much pleasanter day in your life, is to start now buying U. S. Defense Bonds in addition to laying away some strictly tax money. START NOW . . . don't wait for the alarm clock.

G-E Club Free Picture Shows

The following are given as the dates for the remaining schedule of the ever popular free movies sponsored by the G-E Club on Sunday afternoons: November 30, December 14, January 18, February 1, February 15, March 1, March 15, March 29, April 5.

Christmas Party

(Continued from Page 1)

December 1. In order to obtain tickets it will be necessary to present family membership cards.

Those in charge of the party state that the program to be presented at each performance will be one of the most outstanding ever attempted by the club. No details of the program are being revealed, it being planned to keep it in the nature of a surprise.

Construction Started

(Continued from Page 1)

W. Fleshner of Washington, chief of engineering and design specifications of the U. S. Maritime Commission. The rivet was heated in a nearby forge by Nelson J. Darling, Lynn Works manager.

By January 1, the enclosing of the huge L-shaped building, utilizing 250 tons of structural steel, is scheduled to be completed. Five months later—June 1942—the shop is expected to be turning out gears for one C-3 cargo ship per week. Production will be exclusively for these vessels, which are of the 1200-ton, 8500-horsepower type.

Employees Store Hours

Regular store hours, that is from 10 a.m. to 4 p.m., from Monday through Friday will be maintained during the coming week.

However, beginning December 8 and continuing up to and including December 24 the store will be open from 8 a.m. until 5 p.m.

NEWS FROM THE CAMPS

We publish herewith with great pleasure extracts of letters sent to us by G-E employees now in government service. Address all communications for this column to the WORKS NEWS editor.

Dear Editor:

I have been receiving the WORKS NEWS regularly since my address was given to you. Please continue sending it, as I have missed reading it very much.

I was inducted into the army April 7 at Fort Hayes, Columbus, Ohio. After going through a training program and getting all my equipment, I was shipped down here to Camp Shelby.

Upon reaching here we were greeted by a band playing, very ironically, "The Old Gray Mare Ain't What She Used to Be"! We then were taken to the induction center and were given an interview to find out where we would be best fitted and after this I was placed in my present location, 113th Ordnance Co. Spec. Trps. 38th Division.

An Ordnance Co. has the same job that a maintenance section has in a factory. They have all the repairing on pistols, rifles, howitzers and mortars to do and all of them must be kept in firing condition, as they are fired almost continuously, with exception of the big guns and these are fired only enough to keep them in shape and also to conserve on ammunition.

My company is equipped with special trucks with a complete shop mounted on each and with the best tools available. We have a shop truck with lathe, shaper, drill press and milling attachment for the lathe.

In the automotive line we have a truck with arc and acetylene welders, valve grinder, hoist, body and fender tools, and paint sprayer with portable air pump.

My line of work is in the repairing of medium weight artillery. Although I would rather work in the shop section, I find my work very educational and I've learned more about guns than I ever knew before.

An Ordnance Company does not take part in actual warfare, so our weapons are limited to sidearms and automatic rifles.

We were very active during maneuvers and I am very glad I participated in them.

Here in camp our recreational activities have gotten off with a bang. Our football team has chalked up two victories over the 37th division already. In our area we have day rooms furnished with furniture bought with money from our company fund and also a combination record player and recorder.

We have organized a photography club and do all of our own developing.

In closing I want to thank you for sending me the WORKS NEWS and until I inform you otherwise, my address will be,

P. F. C. Roger S. Williams,
113th Ord. Co., Spec. Trps.,
38th Division,
Camp Shelby, Miss.

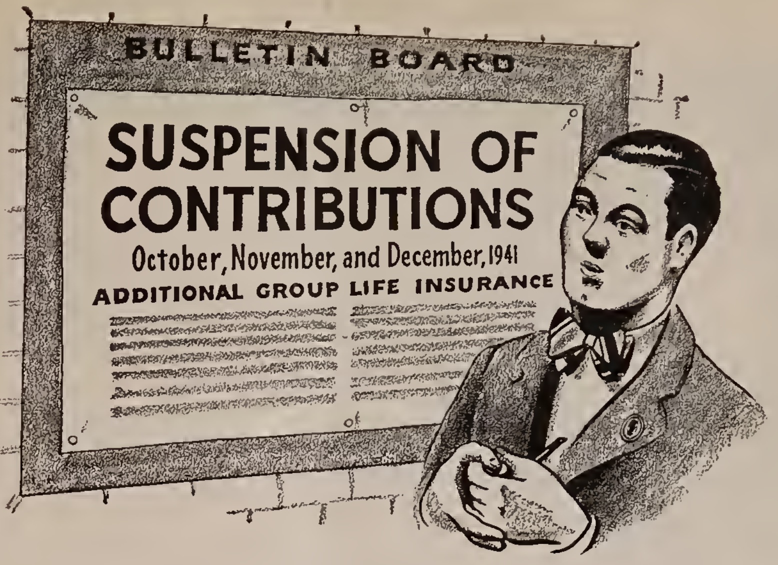
(Continued on Page 4)

The two camp views above were contributed by Roger Williams, Camp Shelby, whose letter appears herewith. The top view shows Private Williams' camp area and the lower view a crew working on a gun with the repair shop showing in the background.

Good News . . .

. . . appeared on the Company's bulletin boards late in September. For the first time since the Group Life Insurance Plan was adopted by General Electric 21 years ago, contributions are being suspended for as long as three months.

Among those who read the notice and wondered what it was all about was Joe Newcomer, who, like many of our other new people, has a lot of questions about the Company's Group Life Insurance Plan he'd like answered. On this page of the WORKS NEWS we'll try to answer Joe's questions and, we hope, those of many other members of the G-E family who already have this insurance.

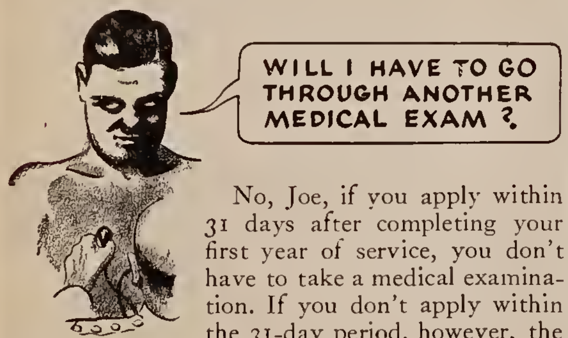


BULLETIN BOARD
SUSPENSION OF CONTRIBUTIONS
October, November, and December, 1941
ADDITIONAL GROUP LIFE INSURANCE

SAY - I'M NEW AROUND HERE! WHAT'S THIS GROUP INSURANCE ALL ABOUT ?

That's a good question, Joe. Several years ago the Company arranged with the Metropolitan Life Insurance Company to offer group insurance, at the lowest possible cost, to all G-E men and women who wanted it. Arrangements were made to deduct premium payments from the pay checks of those who desired this "Additional" Insurance (so named to distinguish it from the other forms of insurance we'll discuss later).

This insurance is low in cost because the Company takes care of the job of keeping records, issuing certificates, and practically every other routine detail except writing out checks to pay claims. Also, agents' commissions are eliminated, and the risk is spread over a wide area and a great variety of age groups.



WILL I HAVE TO GO THROUGH ANOTHER MEDICAL EXAM ?

No, Joe, if you apply within 31 days after completing your first year of service, you don't have to take a medical examination. If you don't apply within the 31-day period, however, the insurance company will require a satisfactory medical examination at your expense.

COME ON NOW; THIS IS INTERESTING TELL ME MORE!

First of all, Joe, anybody who's been with the Company one year is eligible for this insurance.

Secondly, the beneficiary may be anyone you choose. Later on, if you want to change your beneficiary, simply notify your payroll department in writing.

THE AMOUNT of Additional Insurance you can get is based upon your annual earnings according to the following schedule:

AMOUNT OF ADITIONAL INSURANCE AVAILABLE TO G-E PEOPLE

Annual Earnings	Amount of Additional Insurance
Less than $1200	$500
$1200 up to $1800	1000
$1800 and over	2000

When increases are made in your salary or wages, Joe, the amount of Additional Insurance automatically increases on the first day of the next January or July. Contributions, or the amounts you pay, are deducted from your pay check once a month. They are figured on the following basis:

AMOUNT PAID BY EACH PERSON INSURED UNDER THE PLAN

Age (Nearest Birthday)	Monthly Contributions For Each $1000 of Insurance
Age 30 and under	$0.60
Ages 31-40 inclusive	0.75
Ages 41-50 inclusive	0.90
Ages 51-55 inclusive	1.05
Age 56 and over	1.20

The reason that the younger people pay less is that fewer deaths occur in these age groups. Full payment is made regardless of the cause of death or where it may occur.

Now, here's another very important point, Joe. This insurance is intended to give you the maximum amount of protection only during the time you're with G.E. At age 65, when you retire, the amount of the Additional Insurance will be reduced to $500. You can carry this insurance, however, as long as you desire to do so.

DOES THIS INSURANCE pay dividends? Yes, in a way, Joe. From time to time the Company suspends monthly premium payments, as is the case during October, November, and December of this year. This is really equivalent to paying dividends. The Company may or may not be able to suspend payments for a month or so every year, however; it depends on how the number of deaths fluctuates from year to year.

Something else to remember about this insurance, Joe, is that this is one-year term insurance, and, as with all term insurance, you're buying pure and simple *protection;* you're not paying enough to provide a reserve against which you can borrow.

AND WHAT'S THIS I HEAR ABOUT FREE INSURANCE ?

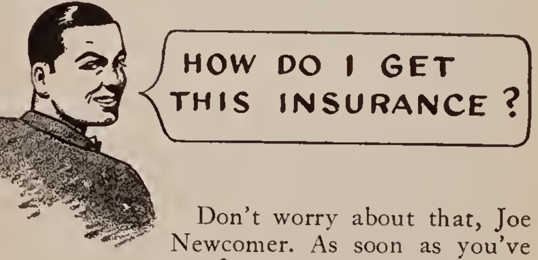
Now, that really is something, Joe! As an incentive for you to take the Additional Insurance, the Company gives you an amount of Free Insurance providing you take the Additional. Below are a few examples of the amounts of Free Insurance those in various age groups get if they take the Additional Insurance.

AMOUNT OF FREE INSURANCE AVAILABLE TO G-E PEOPLE

Age at Taking Additional Insurance	After Continuous Service of				
	1 Year	2 Years	3 Years	4 Years	5 Years
28 or below	$500	$750	$1000	$1250	$1500
30	490	730	970	1210	1450
40	440	630	820	1010	1200
50	190	330	470	610	750
60 or over	150	150	150	160	250

There are two provisions about this Free Insurance that you must remember, Joe. First, if your beneficiary, at the time of your death, is not a dependent, the amount of Free Insurance will be limited to $150.

Second, when you retire at age 65, the face value of your Free Insurance policy starts to decrease at the rate of 2½ per cent each month. After three years and four months the amount of this insurance will be reduced to zero.



HOW DO I GET THIS INSURANCE ?

Don't worry about that, Joe Newcomer. As soon as you've completed one year of service, your supervisor or department head will supply you with a card on which you can make your application. And those few "old-timers" who haven't yet taken this insurance, and want it now, can get the cards from their paymaster.

Six Appointed In Power Drive Division

Top, left to right—O. W. Rodenbeck, W. J. Stoppenhagen and L. S. Burtzner. Below—H. A. Norr, F. C. Mason and E. W. Auman.

Six employees have been appointed to supervisory positions in the Power Drive Department at the Winter Street Plant it is announced by O. L. Weitzman, superintendent. They are E. W. Auman, general foreman; O. W. Rodenbeck, foreman of inspection; F. C. Mason, foreman of test, casting preparation, finishing and heat treating; W. J. Stoppenhagen, foreman of general machining; H. A. Norr, foreman of sub and main assembly and L. S. Burtzner, foreman of the second shift.

Mr. Auman, who was transferred from general foreman in the Magneto Department to his new position, began his services with the General Electric Company in 1915. A toolmaker graduate of the Apprentice School he was assigned to the meter stock room and later served as a general foreman in Bldg. 4-3, as foreman in the Bldg. 26-5 Tool Department and as foreman in the Tool Department at Winter Street.

Mr. Burtzner, also an Apprentice School graduate, was employed in 1924 and graduated from the Apprentice School in 1927 as a machinist-toolmaker. Mr. Stoppenhagen began his services in 1927 and graduated from the Apprentice School in 1931 as a machinist-toolmaker. During the past few years he has served as supervisor on the second shift in the Refrigeration Division.

Mr. Rodenbeck graduated from the Apprentice School as a machinist-toolmaker in 1926 having become an employee in 1922. He served as a toolmaker and as an inspector in the tool inspection department and prior to his present assignment was in charge of inspection in the model aircraft department. Mr. Norr is also a graduate of the Apprentice School, having finished the course of machinist-toolmaker in 1926.

Mr. Mason is a graduate of Carnegie Institute of Technology and was employed at the Fort Wayne Works in 1930. He enrolled as a student engineer and continued on this course until 1932. He was then made process engineer in the Refrigeration Department and continued in this capacity up to the time of his present assignment.

Promotion Made

(Continued from Page 1)

Mr. Briggeman became employed with the General Electric Company in 1916, and after about a year was transferred to the Refrigeration Department where he worked on development of the household refrigerator. Later he was assigned to the Engineering Department in charge of commercial contacts. In January 1940 he became a member of the Order and Stores Department, Broadway plant, where he engaged in material cost reduction activities and other assignments.

If your family seems to pass a winter cold from one member to another, remember that dishes are washed hygienically clean — at pasteurization temperature in the General Electric Dishwasher.

Foremen's Club Will Meet On Wednesday

The G-E Foremen's Club will hold its December meeting next Wednesday, December 3, in the Gunnar Elliott club rooms, 923 South Harrison. The meeting will open with a luncheon at 6:30 p.m.

All members are urged to attend the meeting which will be in the form of an old-fashioned "get-together". A special invitation is issued to all retired members of the club. A small charge will be made to cover costs.

Insurance Payments

(Continued from Page 1)

$4,650, two in Erie for $6,400, one in Pittsfield for $3,010 and one in West Lynn for $3,500.

The total of death claims paid throughout the company from the first of the year is $1,053,167. Since 1920, the grand total of death and disability claims paid stands now at $19,320,137.

Advanced First Aid Classes To Be Held

Beginning Tuesday, December 2, a class in Advanced First-Aid will start in the G-E gymnasium. Only those who hold an active Standard First-Aid card will be eligible to enter this class; that is, the Standard Card must have been issued within the past three years. This class will be for second and third shift employees. It will be held twice a week, Tuesday and Thursday, from 1:00 to 3:00 P. M., for the first three weeks of December. Mr. Hoy Bastian will be the instructor. Several have already signed up for this class; others who wish to do so should report to the G-E gymnasium on Tuesday, December 2, at 1:00 P. M. The course will be completed before Christmas.

H. W. GARTON, M. D.
Works Physician.

Coming Events

G-E CLUB CHRISTMAS PARTY at the G-E Club on December 20. Tickets for children from 2 to 12 years available at the Club stand.

ELEX CLUB CHRISTMAS PARTY at the G-E Club on December 10. Open to Elex Club members only.

G-E CLUB FREE MOTION PICTURES at the Club on Sunday, November 30. Admittance by membership cards.

G-E CLUB DANCE on Saturday evenings. Open to employees and their friends.

News From The Camps

(Continued from Page 2)

Dear Editor:

I really appreciate receiving the WORKS NEWS every week as it makes me feel that I am still a member of the G. E. family. I enjoy reading about the activities of the Fort Wayne Works and get a special kick out of the news when I read about some of my former co-workers.

I am stationed at Camp Wolters, Texas, which is about 45 miles from Fort Worth, a nice town about the size of Fort Wayne but it is a lot cleaner. The buildings are mostly white. The town is full of Texas A. &. M. college boys. This is a military school and they sure have swell uniforms.

The time sure goes fast here. It is less than two weeks until our next pay day. The funny part is that there is nothing to spend your money on and we don't feel much like going any place at night. I will probably be so lazy when I leave here that I won't want to work. We all chipped in 15c and bought an iron. It is a lot of fun watching the fellows try to iron but I manage to get by inspection. Our clothes have to be hung in the right order. Our shoes have to be shined and put on a line so they all sit straight. The enclosed snapshot of myself in uniform was taken outside our barracks.

We have been studying the machine gun and are going to practice shooting tomorrow. We have had practice on the 45 caliber pistol, a new Garand rifle, an automatic rifle, a 30 caliber machine gun and a light 60 mm. mortar.

I just heard that about 1,000 fellows from Indiana are due here soon. There may be somebody I know. The weather here is sure changeable. Last Thursday it got so cold that we had to build fires and they sure felt good. We even put on our long underwear. Then the next day it was real warm again.

Well, one of the fellows is thru with the iron so I had better close before someone else gets it.

Give my regards to my former co-workers of Bldg. 12.

Kenneth Habig

Tangeman, manager of G-E's Ontario Works; Herbert Snider, G-E Safety chairman and Oscar Harris, G-E first aid instructor.

OUT OF SEASON? . . .

Yes, so far as the weather is concerned but a darned good picture. The girl is Eunice Lockwood of Bridgeport's Pioneer Products Section and the fans are one of the G-E's smallest and one of its largest.

DEFENSE . . . Our Answer To Tyranny ! ! !

✚ NEWS THROUGH THE PLANTS ✚

From The Feminine Viewpoint

By Hilda Barthold and Frances Krauskopf

It's time to shop for Christmas and once gifts are bought it follows that they will be wrapped; already the stores are displaying enticing stocks of holiday wrapping paper, cords and ribbons of all colors, amusing stickers and tags. Whether your taste is conservative or daringly modern it's possible to satisfy it, and of course, we want our Christmas packages to reflect our individual selves, but what shall it profit anyone if the package which you wrapped in such a fascinating manner arrives at its destination with contents broken, lost or just doesn't arrive at all because the outer wrapping was so poorly done that the string broke, the knots slipped or the paper was torn so that in spite of the best efforts on the part of the postal officials the package was sent to the Dead Letter Office.

We might say here that extremely fragile articles or those that are large and unwieldy had better be packed by the store where they are bought. It's more fun to wrap all your gifts yourself, and one sent through a store is rather impersonal, but for the best interests of all concerned it's wiser to have glass or china articles packed by people experienced in handling them.

For successful wrapping of parcels to mail, there are three essential things to have at hand, plenty of strong cord, not too stiff, durable wrapping paper, and stout boxes. Those boxes having a lid which covers the top and sides of the box are best. For wrapping boxes which are not very large, we find that the brown paper sacks from the grocery when split and laid flat make excellent wrapping paper; they do not tear easily and are practically water-proof.

Typewritten or printed addresses are best, but if this is impossible write them as clearly as possible in water-proof ink—never in pencil! If your wrapping paper is dark, it's well to write the address on white paper and glue the label securely to the package, taking care that it does not cover the cord at any place nor the edges of the paper wrapping. If you can get a strong box having a lid which fits securely, this may be sent by parcel post without an outer wrapping, but the spaces for sending and return addresses must be clear and the box tied so firmly that there is no chance of the knots slipping.

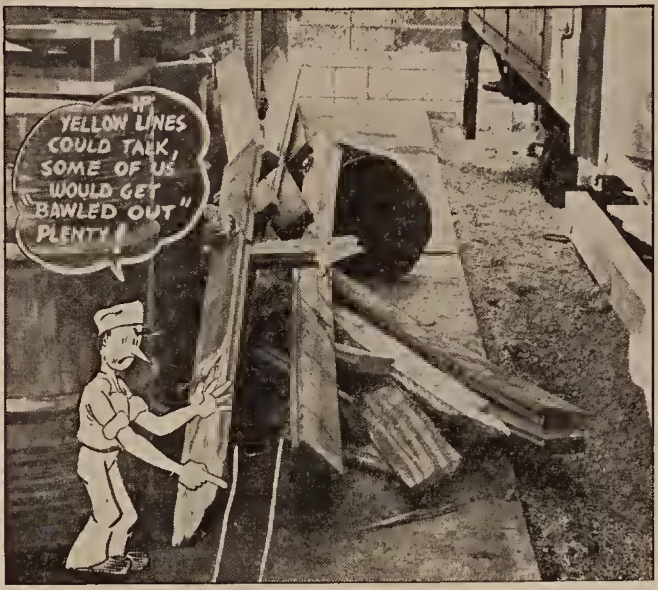
If you send a large box wrapped, it's a good idea to write the address on the box itself, and under no circumstances forget the return address on each and every package mailed.

Transformer 26-2

Betty Griebel and Sally Bowers, both minus their appendix, are with us again. Glad to see you back on the winding section again girls. . . . Has anyone seen the deacon? It is alleged he only drives 85 or 90 so you have to look fast. . . . We hear Gracie and Marg toured Toledo. We're hoping you caught up on your lost sleep girls.

Did you know that Sid Fletcher, Bldg. 4-2, bought himself a sparkling new Ford?

Hard To Believe — But It's A Fact



"IF YELLOW LINES COULD TALK, SOME OF US WOULD GET "BAWLED OUT" PLENTY!

This picture was taken shortly after a trainman narrowly escaped a serious leg injury due to this pile of "rubbish" extending out beyond the "YELLOW" line into the "SAFETY ZONE."

This near accident should again remind ALL OF US of the extreme importance of "YELLOW LINES" as our silent partners in accident prevention.

Whether they indicate "SAFETY ZONES" such as lanes of pedestrian or truck traffic, etc., or zones for piling material, yellow lines merit our respect from the standpoint of safety to ourselves and co-workers.

It is hard to believe that a condition such as shown in the above picture would ever exist but here it is!—H. L. Smith, Safety Engineer.

Gossip From 19-5

The reason that Thelma Steenman gave for coming in late (only one hour and a half) was that her car froze up and it took so long for it to thaw out, it sure must have been frozen up.

Louise Boehm sure has a lot of names; first it was the yodeling cowgirl, now it's "Captain Kid." She came to work with a black patch over one eye, and a striped sweater—she sure looked dangerous.

Did Martha Scherzinger and Ella Hartnett's faces light up when they found out they got tickets for the Notre Dame game, they sure looked pretty sad for a while.

Marie Page wants everyone to know that she did have meat on the table Thanksgiving day, after losing her turkey. Marie said, "I sure am not going to take this sitting down," so she took the week off and went gunning for her turkey. After hunting for several days she found it, and Marie said, "I sure did eat on Thanksgiving day." We believe you did, Marie, because you even gobbled like a turkey when you came in.

Malinda Gehle would like to know why they don't dress the mascot for Notre Dame in gold and blue, instead of green.' Will someone please enlighten Malinda.

There is only one page in the morning's paper that attracts Ilene Burkett's attention and that is the sports page. The team on which he plays seems to be quite popular.

Margaret Woodard, Bldg. 4-3, surely believes in making before breakfast calls. You see, the truth of it is, girls, she lost her button and didn't want to go all the way home, so she kept calling until she could get into the office to get another. The only comment Margaret made was, "Surely was an awful expensive pin."

Decatur News

Mr. and Mrs. Gerald Smith are the parents of a baby boy born Saturday, November 22, at the Adams County Memorial Hospital. The baby has been named Joseph DeLynn.

Tom Haubold attended the Purdue-Indiana football game at Bloomington Saturday.

Phyllis Hunter was injured in an automobile accident while enroute to Camp Shelby, Mississippi, to visit Pvt. Pat Murphy.

The announcement of the marriage of Sylvia Ruhl to Edward Musser on Wednesday, November 19, comes as a pleasant surprise to her many friends. After a short wedding trip Mr. and Mrs. Musser will be at home at 416 E. High St., Portland, Indiana.

Mr. and Mrs. Russell Fleming are the parents of a baby girl born at their home on Sunday, November 16. The baby has been named Joan.

Betty Melchi and Etta Anspaugh attended the Notre Dame-S. California football game at South Bend Saturday.

Mrs. Ed Young announced the marriage of her daughter, Betty, to Charles Cook on August 30, 1941, in the St. Mary's Catholic Church. Imogene Bright and Bill Coffee attended the couple.

Mr. and Mrs. Henry Kruekeberg are the parents of a baby boy born Monday, November 24. The baby has not as yet been named.

The hunting season stirred the hunting blood in Frances Brown's veins. She was out to bring home a deer or two and perhaps a few rabbits. But all her dreams were washed away when she fell into a creek while she was pointing out a cluster of nuts she was going to bring down with one shot.

Gerry McGregor, Bldg. 26-2, sure gets a kick out of riding the new escalator in a local department store.

26-5 Tool Bits

Carl Swaim's mind is really on his work. Recently he was amazed to find the toes of his shoes painted red and he don't know when or how it happened.

If you tell a joke to Carl Einsiedel, don't put it in the form of a poem. He is sure to get it mixed up when he tells it again.

The toolroom's "Dagwood" is Paul Brinkroeger. The way he arrives with the whistle every morning he must upset several postmen plus a few other things for good measure.

Kenny Doel has an uncanny way of retrieving dimes at someone else's expense via the "Have you a dime to give for the etc., etc., etc."

Wilson Garman has a new fad in the line of work aprons. He wears the baby or bib size every Monday morning.

Christmas spirit is in the air and Henry Wittber's generosity just can't be quelled. He is now endeavoring to present a kitten to Rufus Niblick disguised as a Christmas gift. Of course, he does not expect any returns.

Lloyd Dolan joined the ranks of absent-minded professors when after an hour's work on the carburetor of his car and that of a friend towing him for several miles in an effort to start it, he pulled into a gas station and upon inserting some of the precious fluid the car leaped away, and *did he go to that skeet shoot!*

Is there anyone who has not met the rotor gangs' two quiz kids, Campbell and Palmer? If you haven't brother, stay hidden, for their typical question is, "Can I crack the paint on your new hammer?" or "Did ja get a new drill for the one I broke yesterday? I wanna use it agin."

Dick "lil Abner" Lenz has become quite an amateur photographer. He goes to a party, takes pictures, and then sells them to the victims of whom he took the pictures. What is it Abner, business or a hobby?

The morale of Don McAlleece has been pretty high this week due to the feminine visitors at his bench, no doubt.

19-4 Nibbins

A bride of Thanksgiving is Rosemary Coovert who became Mrs. Wayne Smith on that day. And may you two eat many more turkeys together. . . . Mary Roebuck may have been transferred, but she can't seem to stay away from her old friends here in Bldg. 19-4. . . . It sure is wonderful the things a reporter can get away with. So says Edith Roller. . . . The girls on second trick would like to know how Vera Wells keeps that schoolgirl complexion, especially with the average consumption of two candy bars a night. Just plain soap and water do the trick, girls. . . . Ed Fiedler found out what kind of operation to get for a growth on his head. But then he's afraid he won't have any hair left at all then. . . . We see Magdalen Hook is sporting one of those new Yehudi pins.

Our big game hunter, Belva Imel, Bldg. 4-2, did a little target practicing with his shot gun. He started with a tin can, throwing it up into the air; and when it came down, he got a bead on it and pulled lustily on the trigger. After the smoke cleared away, Mr. Imel found the tin can and a chicken—both were dead.

SANDY SAYS

Scotsmen are not really allergic (not Scotch) tae luxuries or high quality goods—if they can get them free. In fact, this column has spasmodically plugged for sporadic improvement in quality with concurrent reduction in costs. (Ye will note carefully that I even use two-bit words—when I hai the free use o' same).

Weel, Quality Improvement with Reduction o' Costs, I've been harping on the subject for months, and now they are doing something about it. Does that remind ye about the rooster, Chanticleer, who thought his crowing brought the sun up every morning? Weel, anyhoe, the sun did come up—and we DO have something DONE.

Ye saw the announcement in the WORKS NEWS about our new Administrator o' Quality. Now, if I know him—if I even know his 44th cousin, I'd like tae make a prediction: If ye want tae improve Quality at the oxpence o' an increase o' costs—ye'll probably hai tae do it over his dead body. He has, and will keep on, improving quality and reducing costs at the same time.

How does he do it? Does he get an Aladdin Lamp, rub it, and bring forth the genii wi' the light brown hair?

No, he'll just do what he, and some other gude Scotsmen hai been doing around here for years. He, and we, can improve quality AND reduce costs at the same time. It's been done, and will be done again.

I could refer ye tae monny oxamples, or I might mention a few men who hai done it. Take, for instance, a couple o' gude Scotsmen, Sir Edward McKlomp, or Otto (Model T) McRoehm, who hai made outstanding double plays.

Don't take my word, ask 'em, and ye might also ask Cousin Colin, too, if ye ever catch him, about his latest scheme. He and one o' his "close" friends hai a new system for hunting rabbits. They will pin lettuce leaves all over their clothes and let the rabbits hunt them. Colin says "Tis a very intelligent scheme, and we will try it out—as soon as my friend can slip past the guards on State Street."

After three seasons of trying to bag a pheasant, Jake Sappington, Bldg. 6-B, appeared over the hill with the tail feathers of a big cock pheasant projecting from his hunting coat. He tried hard to make the boys believe that he achieved his ambitions, but that evening he had to hand it back to the fellow who shot it, so that ends another season for "Jakie" without the much coveted bird. P. S.—Will some one please tell Jake the limit for rabbits is ten and not two?

Newton Poland, Bldg. 4-3, comes up with the prize hunting story of this season. He tells us that while driving along a little-used country road up pops a rabbit. He paces this rabbit at fifty-five miles per hour, then up with his trusty rifle and gets Sir Bunny with one shot, thus repeating his performance of last season when he got a pheasant on the wing with one shot. Shades of Buffalo Bill, Annie Oakley, and Daniel Boone—this boy is some shot.

NEWS THROUGH THE PLANTS

Is Zat So?

We have a little correction to make on last week's item regarding the new car that Ed Huhn bought. Believe it or not but he drove it 14,000 instead of 1,400 miles before he finally decided it was about time to give it a grease job! . . . If you happen to be in the vicinity of Bldg. 17-1 and hear noises that closely resemble that of a group of Apache Indians, don't be alarmed, as that is just the way the gang notifies Harry Greider that his machine is out of stock. . . . Mabel Lieberenz was pleased to find a large bouquet of 'mums on her desk when she returned to work after her recent illness and wishes to thank all her thoughtful co-workers. We are glad to have you back, Mabel! . . . Al Middaugh and Paul Lehman recently drove a truck load of live stock to the stock yards for Al's brother-in-law. It seems that Al discovered that although he was pretty good at "throwing the bull" here at work he had a little difficulty when put to an actual test. . . . Bill Stout and Ed Huhn put on a boxing exhibition in the washroom the other day, and Bill went down for the count. He still claims he slipped on a wet spot on the floor but that "ain't the way I heard it". Wotcha doin', getting ready for the Golden Gloves, boys? . . . We are glad to have Ellis McMullen back to work after his recent injury.

See you next week.

The Question Mark.

Deaths

Anthony W. Federspiel, employed in Bldg. 17-1, died on November 20 following a short illness. Funeral services were held last Monday at St. Andrews Catholic church with burial in the Catholic cemetery. Mr. Federspiel had been an employee for the past eighteen years.

The employees of Bldg. 17-1 wish to express their sympathy to Elmer Jockel on the death of his sister and to Darrell Wilson on the death of his uncle.

Horseback riding on strange horses just doesn't appeal to Lucinda Fitch. In order to satisfy her desire for riding she bought herself a horse. Wonder where she keeps it?

The employees of Bldg. 4-3 have a vaudeville star in their midst and they don't fully appreciate him. It is none other than Don Wiebke, who made his debut Saturday night at the Palace Theater. He rather enjoyed the girl singer pulling on his tie. That's the signal girls, start pulling!

Reflections From Bldg. 4-1

There are only twenty-three shopping days until Christmas. So eat your Wheaties and prepare yourself for some struggling through the downtown shopping district. I was so trampled and pushed around last year that I resolved never to go through such an experience again. But here it is almost the first of December, and I am again getting the fever. . . . Along with Christmas one usually associates parties and dances. C. Watson is starting out early this year. Two weeks ago he went to a barn dance. He was a little confused at the time, and he's still trying to figure out if the floor came up to meet him or if he went down to meet the floor. . . . Adam Flager wants to tell you about the newest method of hunting pheasant. The pheasant kept running ahead of Adam, so he lay down along the side of a fence and some obliging cows drove them back right into his lap. He said he got the limit. . . . We can't figure out if Al Ringle layed off Friday to get his corn and hog check, or if he went fishing. . . . Brice Hamilton doesn't know what he would have done this season without his bird dog, Fido. The dog's score is about four, while Brice just talks about his without giving any definite figures. The boys think that Fido should have an extra dog biscuit—on second thought, maybe we should give it to Brice. . . . Cleon Oyer bought a new gun case the other day. When he opened it, he didn't know what to do with the long strap which was fastened to the case. In case you had any peculiar ideas on the subject, Cleon, it would be better to use the strap to carry the case rather than as a belt for your trousers. . . . The girls in Bldg. 4-1 welcome the new girls from Bldg. 17-2. They seem to be getting along all right with both the girls and the fellows. . . . Some people are always popping up in the Works News column, but we do wish that Lucille Smithley would do something wrong so that we could get her in the news column more often.

One day last week Morrie Evans, the "life-line" of Bldg. 4-2, made elaborate arrangements to take Frank Hemrick, Bldg. 4-2, and Ray Smith, Bldg. 4-2, on a pheasant hunt. He guaranteed the presence of many birds and told them that he had secured the proper permission for the use of the grounds. However, after about the second fusillade of shots the irate land owner unceremoniously and rather roughly chased them out. Better luck next time, boys.

Sleuthing In 4-6

M. G. Norris was pleasantly surprised last Monday with a shower of birthday cards from his co-workers. He is getting along very well, and expects to be taken home from the hospital at the end of the week. . . . We are firmly convinced that the drafting room gang can really take it, judging by the way they survived the shower of wedding treats which came their way on Monday. Our newlyweds, Geraldine and Harry Richardson, and Thomas Doell all returned to work laden with candy and cigars. In fact, it looked as if Santa Claus has paid us an early visit. . . . This seems to be the time of vacations again. Despite the steadily increasing coolness, Toni Kennedy, Marge Weibel, and Harold Fremion decided to pull out the ear muffs and go adventuring. Jerry Zehendner shouldn't worry that he'll need any, since he is spending his vacation in Florida. . . . Early Tuesday morning we thought for a moment that we were going to be entertained by a chorus. But it turned out to be Joe Anderson, Jerry Duryee, and Kermit Manecke, who all chose the same moment to wish each other a happy birthday. . . . Another employee enters the lengthy hall in Bldg. 4-6 to take her place in the Army office. Phyllis Barrows comes to the Fort Wayne office as a transfer from South Bend. We hope you'll like it here, Phyllis.

Thisa And Thata 19-5

Dorothy Kasner was quite upset last Friday. She thought it was Monday! . . . What made Al Hertle let out such a yell and jump as though he were shot? It couldn't have been a rubber band from the Commutator Section, could it? . . . We wish Mildred Werling a very speedy recovery and hope that she soon will be back at work. . . . Cora Kice and Maud Erhardt sure were disappointed when Bill called them in to work last Friday. You know Santa arrived at 1:50 o'clock and they both wanted to be down there to greet him so they would be sure of getting their order in first.

The hand winders have been greatly worried over Edna Crow's absence the day after Thanksgiving. It seems that Edna had a tremendous appetite that day. She got up and fried herself several chickens for breakfast, "four in the morning." Then she went out for a turkey dinner at 12 o'clock and another dinner at 6. Surely it couldn't have been that she ate too much. How about it, Edna?

Winter Street News

Saturday found Bill Franke, Rockhill and Herney on one of their famous hunting trips. Rockhill was the smartest hunter as he promptly lost his two buddies. Later they started down the road "in vehicle" looking for their lost friend, thinking how good a rabbit dinner would taste, if they had a rabbit. Suddenly they spied four rabbits all lined up along the road. As they stopped the car and prepared for the massacre, up pops Rockhill and picks up *his* rabbits . . .Bob Sherer came in the other a.m. brandishing a hand full of "checks" from the "Waynedale Cafe". He states it is his will power that keeps him from spending the checks but his friends say: "Phooey, he can't spend them, the place has been closed up." . . . One of Winter Street's notorious men spent last week in the north woods deer hunting. Due to poor marksmanship, he finally had to resort to a shotgun so he could bag himself a deer. Anyhow we're glad he got his deer and are anxiously awaiting an invitation to a venison dinner. . . . Friends of genial Harry Chesmsure figure that he must do a heap of thinking and very little mind resting because Harry always is telling the boys, "Say, while I'm thinking about it." . . . The great feast of deer meat promised to the Tool Room boys by their fellow-worker, Howard "Venison" Bennigin, will have to be called off on account of lack of material or venison. "Venison" returned from a two-weeks' deer hunting trip in Canada with but one black mallard and his wife does not think this a sufficient quantity of meat for twenty-five men. (Frank Smith will lend him a deer hound next year.) . . . The love bug seems to flourish some place with the toolroomers. Two very handsome eligibles have made themselves unavailable to the lonely hearts by getting married. Glen Castle and Carl Walden are the newlyweds.

Bob Moore, Bldg. 6-B, must be building a suburb to Roanoke with all the material he purchases at the scrap shed. How about it, Bob?

The gang in Bldg. 6-B were glad to see Bob Dammeier drop in for a visit. Those army uniforms certainly attract the girls. Bob claims he has lost a few pounds—if so, it was in the right places.

The employees of Bldg. 4-3 are wondering what Marcile Passe is always watching on the floor. Maybe she lost her diamond some place and is trying to get the credit for finding it all alone.

Sunbeams From 17-4

To stand in with the inspectors, one must measure up to a certain standard, or rather to certain inches, and Doris Lontz holds the measuring tape, boy, oh boy, am I glad I am within the boundary lines.

Well, well, Ralph Dunlap may have left his appendix in the hospital, but thank goodness he brought that happy laugh back with him, and we are glad to have him back again.

Alreta Wafer might be heard going around singing this refrain: Any bottles today; any bottles today; if there are, by gosh, don't put water in them next time, period.

In honor of Lois Burry who is leaving the company this week, Edith Brudi of Arcola entertained with a pot-luck supper and cards later in the evening. The girls attending were Grace Koch, Esther Glusenkamp, Bea Drummond, George Ann Mahrt and Bess Justus. The honor guest was presented with a lovely gift from the department.

Thought for the week: The man who says in his heart, "I will teach all men, and learn from none," will neither teach nor learn whilst he is in that frame of mind, but will remain in his folly.—James Allen.

Granny.

December's outstanding event will be when Lillian Hitzeman of Bldg. 4-3, becomes the wife of Mr. George Arnold of Bldg. 4-3, at 6:30 p.m. on December 18, 1941, at the Third Presbyterian Church.

Bill Walt, Bldg. 6-B, says that when hunting or fishing makes as big a prevaricator out of him as it has Jake Sappington, Bldg. 6-B, he'll be ready to quit. It won't be long now! Jake told the boys he got his coat full of rabbits. They must have run into his coat, because he was shooting shells all day without shot in them, or was he? We'll never know.

The outstanding event of Thanksgiving day was the marriage of Geraldine Grim and Harry Richardson, both of Bldg. 4-6. All went well until Mr. Ward Grim, Bldg. 4-3, just couldn't keep his feet off the bride's dress in order to give her away. At the Grim home after the wedding, Toni Kennedy, Bldg. 4-6, just couldn't resist any longer and kissed the groom. Did he ever look good with his face covered with lipstick. (Editor's Note: By the way, it was an extra helping of the bride's lipstick.) After the reception the couple boarded a TWA plane for Chicago for their honeymoon and are now at home to their many friends on West Creighton Avenue.

✣ NEWS THROUGH THE PLANTS ✣

News On The Nose 4-5

Another interesting story about Ruth Walda's dog came to us the other day, via the grapevine. It seems that they opened the door to see him standing there proudly holding a dollar bill in his mouth. Since the owner couldn't be located, the Walda family is one dollar richer and pet pooch is receiving great encouragement. . . . By some strange coincidence, Ed Gebhart seems to have that same canine instinct for finding money because he picked up a dollar bill out of the street the other day. . . . We hope that bugles won't be sounding too soon for them, but we heard Walter Lorenz, Cyril Poiry, and Bob Landick comparing notes on the preliminary Selective Service examinations that they recently underwent . . . From some source comes the story that Bob Lowe reported for work Monday wearing finger nail polish on his "purty" nails. . . . Ed Glusenkamp had the tables turned on him. As he desperately dashed into the tool coop to lock himself away from production followers and dispatchers, the door locked on him and no one would let him out. . . . Sparkling eyes and a twinkling left hand tell the world that happy Hilda Shears has recently joined the ranks of those who will say, "I do." . . . And wedding bells rang out for Lorena Colvin on November 15; Dorus Ely is the lucky man. . . . Still swapping tales of the hunting season—we mustn't miss our Brownie's claim to several pheasants and many rabbits bagged during his recent vacation. . . . Bonnel Clanison also claims that he brought an end to Eugene Kiser gives this version of a Scotchman's yell at a football game:

"Give me that quarter back.
Give me that quarter back!"

We see that the air corps hasn't changed Kenny Simmers any. In his last letter home he stated, "If you see any of the girls, give them my love." . . . We are hoping to see Ethel Koehlinger back with us as soon as that eye injury will permit. . . . We've been waiting for a story like this to tell on Herb Siebold. He was invited to the weiner bake at Harold Freuchtenicht's home near New Haven, but somewhere along the difficult way he lost himself completely and never arrived. Tsk, tsk. . . . The girls of Dept. 15x63 held a potluck on November 19. They had as their honored guests Mr. Ray and Mr. Tibbits. My, weren't the other fellows envious. . . . Wilbur Tibbits, forgetting one noon that he is a gentleman, rang out on the girls whistle. Was his face red? . . . Kenneth Young spent his Thanksgiving week-end at Quebec, Canada. As he entered Canada his wife wanted some candy. After his purchase he handed the cashier five dollars and received 25 cents worth of candy and $5.40 in change. He has decided to turn all his money over to Canada and get more in return. . . . Robert ViHorn had a very exciting moment when a wheel came off his car on a bridge. Lady Luck held fast and no one was hurt. . . . John Leach has been waiting to go to Evansville for days. He finally got there Thanksgiving week-end. . . . This week we introduce a guest columnist, the Bldg. 4-5 Gadabout, who has a special feature for us this week but wishes to remain very, very incognito. So, it's all yours from here, Miss Gadabout!

News By 4-5 Gadabout

Every floor has its inhabitants who in turn have their habits and personalities by which we all know and remember them. Here is just an idea of what the casual observer would notice on our floor:

Bob Price, tall, dark, and darker. . . . Frieda Shady and her dark glasses. . . . Joe Trentadue's walk. . . . Roger Sawyer's big brown eyes. . . . Ruth Walda, the girl with the unusual costume jewelry. . . . Cliff Long, a daily visitor from Bldg. 4-6, who has a mustache. . . . Mary Felber, the time clerk, who knows everybody's name and how many days they are or are not there. . . . Herbie Landstoffer, the man with the twinkle in his eye and the trick up his sleeve. . . . Roger Shuster and Mamie Allen, who vie with each other for the honors in the "rusty" hair division. . . . The blond, blond hair of Betty Boldt. . . . John Leach's uncombed mop. . . . Mr. Lowe (pronounced "low"), who is built way up high. . . . The sparkling personality of Jeanne Fox, who will not have to take the blame for this column this week. . . . Paul Happner, who always seems so serious about it all. . . . Jean Herman, her pulse is quickened by the sight of a soldier. . . . Leland "Pete" Parker's snappy new clothes, especially the overcoat and hat. . . . Jovial Ed Klomp. . . . Absorbed in his own private worries, Mr. Legras. . . . Vi Scott's cute pink corduroy dress . . . Martha Glock, who is alway so neat looking. . .

It Would All Be Different If:

Tommy Wilkensen didn't call "Hello, Gorgeous" to all the girls. . . . Merrill and Petgen wouldn't razz McGill. . . . Elaine Althoen was ever seen without a cheery smile. . . . Ray Swartzel didn't have his ear to the ground for material for this column. . . . Carley Schroeder, newly married, would come back to this wordld. . . . Ditto, Ilo Baumgartner, who says, "I do," on the 28th. . . . Claude Roser and Frank Peternell would get better smelling stogies. . . . If someone else would win the check pools beside Jim Oman. . . . If Irene Patterson didn't have a Bob Hope book which she so generously passed around. . . . If Helen Rumbaugh Welborn would have told her fellow workers before getting married last Saturday. . . . There—this is Bldg. 4-5 in a nut shell, and we're all just one big happy family.

General Service: Ira Swank, 2710 Florida Drive.

Returned to work: Kenneth Christie, Ralph Gaff, Joseph Jenkins, Martin Thullen, Bert Caley, Anna Bunn, Howard Reinking, Gertrude Scherer, Jack Judge, John Shanahan, Kathleen Felger, Dorothy York, Hilda McClain, Geraldine Habig, Marjorie Hargrave, Mary George, Cathryn Hoffman, Frank Phillips, Howard Neuhaus, Reinhard Benzinger, Samuel Daily, Margaret Oddou, Geo. Wolf, Iona Arnold, Harry Savage, Marjorie Cairns, Gordon Thomley.

Left the Hospital: Alma Geary, Joe Horstman, William Ryan, Aileen Steinbarger, Edith Farrell, Rachill Gaunt.

Kitchen Korner

In Or Out

The hunting season is the major topic of conversation these days. We hunt, too—for information. Apparently, Lady Luck failed to favor our hunters with success. No one reports "bringing in the birds," not even our feminine fans, Marie H. and Thelma. Incidentally — it takes an outsider to do the trick; our congenial Coca?Cola man boasts of bagging five pheasants and a number of rabbits. He must believe that:

A pheasant a day makes it pleasant
to say
"We need no meat from the
butcher today."

A Bird in the Hand

Is worth two in the bush, or so they say. At any rate, Jakey almost attained the height of hilarity with a bird in his hand recently. He galloped about gleefully and his efforts to frighten the members of the fairer sex were none too successful.—So you dote on details; you want further information? The bird was a dead turkey's head. "Where did he hunt it?" you ask. He didn't, he merely lifted it out of the refuse can.—"And how do we know?"—A little bird told us.

A Look at Look

Reveals an article on the story of a modern Kitty Foyle, a new Kitty Foyle whose job in the factory as a skilled worker places her status in industry over that of the white-collared office girl. We see countless Kitty Foyles daily—our own G. E. girls, happy and confident, doing their duty for defense. Here, too, one finds all types of beauty; our girls do their part in presenting a panoramic parade of pulchritude.

Feet First

Ordinarily might apply to a lecture on the pedal extremities—not so now. Ray recalls that on his first day he had to send food down the elevator—so, in due time, the food was arranged and ready to go. Then Ray wondered where he was supposed to ride since the food occupied all the space. From then on little time was wasted on such wishful thinking—poor Ray soon learned the unhappy truth. The elevator was intended for freight only; he had to trot his tootsies down the stairs.

A Suggestion to Santa

As the month of December is about to descend upon us, we feel we're doing a good deed—informing Santa what our co-workers want for Christmas. Hazel wants a doll, (we like dolls, too), and Jake would appreciate the ducky little quacky family, seen in Toyland. We realize a duck differs from a turkey, but a sort of a shirt-tail relationship exists between them. Both are birds of the fowl family.

Goodbye and Good Wishes

Marked the occasion for farewell to Betty Heeters who returned to North Manchester. Betty was feted with a box of chocolates from her co-workers who wish her all sorts of good luck in her new undertaking.

The Kitchen-Kid.
Bldg. 16-1.

The phonetic spelling of "the Pledge of Allegiance," printed the other day, brought in another written version from a school marm—written by a pupil who had learned it orally:

"I pledge a legion to the flag of the United States of America and to the republican for which it stands. One nation invisible, with liberty and judges for all."

Dyna's In The News 26-4

Kinda feel like we should don top hat and tails and celebrate our debut into the columns of the Works News.

We, too, had a Thanksgiving bride. Congratulations, Pauline Corbat. Wednesday Pauline remarked that she wasn't a bit nervous.

Freida Knocke, Connie Renollet, and Pauline Selking are the sleep lovers of our great little group. We must write Santa about three sure-awake alarm clocks.

Margaret Hilgemann just couldn't go around continually telling us how fearless she was. With great effort she broke down or broke up and admitted her fear of fire. One very nice slumbering night she was awakened by the shrills of a number of fire trucks. The neighbor's house was on fire and some of the sparks were blown onto her house causing it also to catch on fire. Margaret hasn't had a good night's sleep since then and she still hasn't quite gotten over the shock and excitement of it all.

I wonder why I can't wake up when my sis calls me? It seems that night life doesn't agree with Ann Jezenski. Ah! but she won't admit it. Her latest excuse is the change of climate. Ann is spending a week at her sister's house which is about a mile from Ann's house.

17-2 Notes

Ina Smith entertained her birthday club to a chicken supper at Bonnie Oaks recently, the occasion being her —th birthday. Afterwards the evening was spent playing cards with Catherine Gallmeier and Margaret Doctor winning prizes. The girls presented Ina with a beautiful gift and departed at a late hour wishing Ina many more such birthdays. . . . My, my, how aristocratic Fern Monroe looks these days with that new hair-do. . . . Several of the girls in this department are thinking seriously of moving to Leo, for after seeing what that pure country air has done to Miriam Bireley's cheeks, they think maybe some of that long-gone bloom might appear in their cheeks once again. . . . "Who's afraid of a little mouse?" says Violet Brower. She sure isn't. . . . After the main winders and core insulating girls had their Christmas exchange for gifts and a pot luck dinner, all you could hear for a while was "What do you have to fix for the dinner." . . . There's a pretty good sign placed near a corner by a bunch of lockers and no one seems to know who put it there, although they seem to know who it's for; it reads: "If you spit in the corners at home do likewise here, for we want you to feel at home."

Elsie: "My husband is an efficiency expert in a large office."

Naomi: "What does an efficiency expert do?"

Elsie: "Well, if we women did it, they would call it nagging."

Housewife: "And are you really content to spend your life walking about the country, begging?"

Hobo: "No, lady, not at all. Many's the time I wished I had a car."

The fortune teller was addressing one of her clients: "You will be poor and unhappy until you are 40."

Client: "And after that?"

Fortune Teller: "You'll get used to it."

NEWS THROUGH THE PLANTS

Motor Generator Static

A Sad, Sad Story

Thanksgiving morning one shot Weaver and Daniel Boone Korn went way, way, far away to get Mr. Hare. The first rabbit was shot by one shot Weaver. He holds the trigger back and empties the chamber by a little pumping action. Weaver pulls the trigger twice and a box of shells are gone. After four hours of intensive hunting Daniel Boone Korn was without a bunny rabbit. He was getting very disgusted. When they were close to the farm house, Brother Korn emptied his gun at a wee, wee rabbit. When he arrived at the car, he laid the wee, wee rabbit on the bumper. By and by they were ready to leave. Mr. Daniel Boone Korn could not find his rabbit, then he cried and cried. One shot Weaver, being good at hide and seek, found that the wee, wee rabbit was being eaten by Mrs. Cat and family. If you have a cat don't let Korn see it for he will skin it alive. . . . MEOW!

The Buzzards

Earl Morrell had his girl friend cut his hair. She took everything off but the part.

Boy! Did the fellows ever sob when they had to work Saturday, November 15. During the day everyone was doing some imaginary shooting. Walworth and Briggs brought down four pheasants. Berning got the limit. Cooper bagged four fans. Remmers shot a cat. Weaver, one BABE. Korn, the prize of the day, two skunks. Bones Brandt was shooting bowling bones.

Dear Roesener got his third (3rd) deferment. He celebrated by asking the following girls for a date: Mollet, Wagner, the red head, Clemens, Hoelle, Tilbury, Brackman, Agnes and Vivian. He figures this will hold him for at least a week and a half.

Flash ! ! ! ! !

Have always had a hankering to do as Winchell does,'tap a telegraph key and in clarion tones announce to the world that "so and so had a bundle from heaven", "he and she were secretly married", or "the whosis were contemplating a divorce" etc., etc.

At last that opportunity has arrived and while I have no "ticker" and can't broadcast this news, I write as follows: FLASH—The stork visited the home of Mr. and Mrs. Wayne Hutchison on November 16 and left seven bundles from heaven, four girls and three boys. Mother and children are doing well. Yep, Edlen's Irish Setter "Ginger" had seven cute little pups last week. And so at last I have had the opportunity to indulge my secret ambition. FLASH!

Hard to Believe

Talk about embarrassing moments. Jeanette Adams had hers recently. It seems Jeanette was busily engaged in cleaning up the home when a rap sounded at the door. Relates Jeanette, "I went to open the door and there was a perfect stranger, and I stood with one hand on the door knob, broom in the other and a dust pan in my mouth." While we can understand the broom and door knob it's hard to believe or at least understand the part about the dust pan.

The writer would appreciate further information as to how one accomplishes such a feat.

What Is It

Yes, we have the answer—a few weeks ago an article concerning two gals called "Ruth" and "Mary" and their reactions to a guy called Gable, appeared in this column.

It ended with the question by the young men of the department as to "what" he has that they haven't. Apparently someone has the answer. Remember the other evening when it rained, snowed, the wind blew, and it was cold? Well, that night five of the girls went for a ride and came back to remark, "The weather was wonderful", "a beautiful night", etc. Now, anyone who can change an evening like that into the glory of a June night does not need to take a back seat for anyone, Clark included.

But the rest of the boys still wonder what it is.

As You and I

The boys in Bldg. 19-2 report that Charley Brockhall, "Iron Man" of the Apparatus Section is slipping. Yep, one of the boys saw Charley buy an ice cream bar from the candy wagon and slink into an obscure corner to eat it. The boys were shocked no end, as they felt Charley was the last person liable to indulge in such soft diet. Live and learn, boys, each has a weak spot in his armor, even as you and I.

Saying of the Week

Jerry Frye remarks, "The value of anything to you, is just how much you put into it."

Belated Greetings

November 18 was a red letter day for the Cost Department, for on that day, Dwight Myers, genial division editor of our WORKS NEWS, celebrated his birthday. When Dwight returned in the afternoon, there on his desk was a fine "Devils Food Cake" (is this significant?) adorned with a multitude of candles, this gift along with three packages of gum, one cup of ice cream and a candy bar, gifts of the "seven flames" (as listed on the greeting card) "Raydeen, Dorothy M., June, Jean, Virginia, Miriam, and Dorothy D." While you have read of various birthday cakes being "lit" up like a forest fire, etc., nothing in the history of this department ever approached its brilliancy and even the Chicago fire or the burning of Rome were small fry compared with Dwight's cake. Now while ye writer feels that Dwight has figured in several double crosses that resulted in much embarrassment to him there is something about the guy you like and with old age adding a touch of mellowness to his disposition we feel justified in saying and sincerely meaning it—

"My dear old friend this toast I send,
"Oh! may this birthday be,
"The best of all you can recall
"And the worst you'll ever see.

A shower honoring Nadyne Tierney, now Nadyne Recht, was held at the home of Mary Zimmerman. The assisting hostess was Alberta Bultemeyer. It was a kitchen shower and prizes were won by Helene Trentadue and Edlen Hutchison which were in turn given to the honored guest. Those present were Edlen Hutchison, Marcella Brackmann, Phyl Corell, Phyl Geller, Phyl Farrel, Phyl Culver, Kathryn Gruber, Florence Peters, Doris Siebold, Helene Trentadue, Helen Forker, Mary Zimmermann, Alberta Bultemeyer, Nadyne Tierney Recht, and Mary Jane Smith.

Another One

The "Planning Club" held another of "those" meetings at the new home of Walter Histed. While it is on our mind we want to congratulate Walter on the strength and stability of his home; a less substantial structure would never have taken the beating his home did. The main item of food was "hot dogs" with all the trimmings, reinforced by potato chips, buns and assorted drinks. We wish to apologize to Rogers (in the account of our last party we stated he missed the target while throwing darts) he really was good compared to Jack Toole, who not only missed the target but the whole wall (it's a big wall) and almost "harpooned" one of the boys in the other room. The usual poker, tidlywinks, euchre, shuffle board, and darts provided the entertainment of the evening. One of the boys who claims he never drinks was photographed by our cameraman with a very suspicious drink in front of him (he is a nice guy so we won't give his name). Took one picture of "Pappy" Archbold with a "hot dog" (you can tell Pappy; he has his glasses on) which is really a masterpiece. For a change Rogers behaved himself, which in itself is worth a column. By the way, we had "mountain music" on the radio and "Pappy" (the Home Avenue Hill-Billy) was perhaps the happiest person at the party (you know how he reacts to this type of music). Some of us left the party late, others stayed early—silly isn't it, but all agree that it was a grand affair—and we do so like to muss up new homes, so this is another one.

Slips And Chips

Sir Viss Bldg. 4-4

H. Kroemer, the second trick tool crib attendant, works here ten lollipops a night. He claims that ten of these bits of confection will see him through the night's work. While Mr. Kroemer thrives on sweets (the edible kind), our coworker, Joe Griffin thrives on sweets of a little different nature. You see, Joe will march down the aisle some time in December. . . . This kind of weather makes one chilly when he first steps outside. This is not the same chile that Chris Delegrange had for lunch the other day. Chris came back to work with his coat open, sweating, and spitting. Between spits he would say that was the d---- hottest stuff I ever ate. Chris has found a way around the heat (of the chile) by simply adding an ounce of vinegar. Chris claims it is good, but I'll never know. . . . Orville Young, the latest addition to our tool section, has developed an automatic attachment for one of the lathes. It is very fast and fairly efficient, too. Why, only today it completed one job in fifteen minutes while he was grinding his tool bit. These things don't happen everyday, so we shouldn't expect too much from this lathe. . . . If you want any theft-proof cupboards made, see Gee and Stoll. Take a tip and don't put your valuables in it until they have completed the job or you won't ever be able to use them. . . . What kind of party did Don Otermat attend the other night? He came to work without any money and no voice. They certainly put the bee on you, Don.

Goodbye now,
Sir Viss.

Golda Lyndall Draggo, Bldg. 4-3, was united in marriage to Carl Conrad Lochner. The Rev. LeRoy Geiger, pastor of Crescent Avenue Evangelical Church, officiated. The wedding was the feature of the opening night's exhibit of the annual fall ower show of the Allied Florists of Fort Wayne at the Valencia Gardens. The attendants were Mary Louise Draggo, Joseph Heffellinger, Mary Jan Lochner, and Ralph Rosenberry.

The captain of a sailing vessel was questioning a new hand regarding his knowledge of ships and the sea. After repeatedly receiving wrong answers, he asked, in exasperation:

"Hang it all, man, tell me this: Where's the mizzen mast?"

"I don't know," replied the aspiring seaman. "How long has it been mizzen?"

Corn Out Of Season

From Bldg. 4-4 Office

Life in Bldg. 4-4 has finally drifted back to normal. For a while things were happening so fast, I was inclined to feel a bit dizzy. This little worm's head was swimming around so fast, and I was getting so twisted I began to feel like a licorice stick. . . . Jean Bugert Johnson gave up the life of the Bldg. 4-4 office to become a household drudge. Now, we don't really mean that. We think "housewifing" is a very nice occupation, and we all miss her so much that the entire office force plans on dropping in for a seven course snack very soon. Unexpectedly, of course. . . . Pauline isn't Young anymore. She's Mrs. John S. Cunningham now. She and Johnny took the fatal step on Thanksgiving Eve. I must learn her technique so I can get my feller before Uncle Sam gets him. Anyway, I think Pauline looks mighty pretty and happy for losing her brand new hubby back to Pine Camp, N. Y. He's a sergeant in the U. S. Army, you know. Some of those obnoxious little gifts from the office may have done something to cheer her up. We can all go over to her house and eat waffles now, too. . . . The oddities in the news, or is it Believe it or Not: Art Wedler finally paid Mike Brayer the four bits he has had on the cuff for the last six months. Mike is starting a petition for Mrs. Wedler to give Art a dime a day so he can buy his own meal Friday noons. Personally, I'm agin it. Art just might turn into a spendthrift that way. . . . A certain fellow in the office was bragging about his wife's cooking the other day. "You should taste her home-made mayonnaise," he said, as his chest swelled six inches. Ralph Fishback, who is so quiet, asked, "You mean the kind you make with egg and salad oil and vinegar and seasoning?" "Yep," was the answer. "Never even heard of it," said Ralph, as he resumed his work. Gosh, a guy can't win these days. . . . It didn't make any difference to Marge Boerger that every one else in Indiana ate their Thanksgiving dinner last week. She ate her turkey gobbler the twenty-eighth. One Thanksgiving was enough for me. There should be a law against morning afters. . . . Marjorie Brown is blonde again. For almost a week she had purple hair. Hectograph ink finds its way in the oddest places. Her hair really is much more becoming a la natural, though. . . . Vern Daseler moved into his new home last Saturday. Now we're all hinting for a house warming. With all the hints that have been dropped, the Bldg. 4-4 folks should get at least one shindig between Jean, Pauline, and Vern. Mr. Daseler did invite us out to watch from the outside. No blinds, well, well, imagine that. . . . All this dirt digging just wears a worm to a frazzle. Think I'll put on my woolens and go back to sleep.

G'bye,
The Corn Bore.

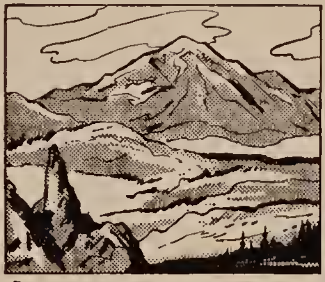
Ray Smith, Bldg. 4-2, certainly gained much prestige since he was pheasant hunting. We're for you, Ray—the mustache at least enables you to keep a stiff upper lip.

G-E Club Dance

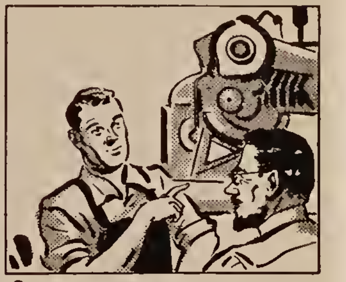
The G-E Club will hold another of its Saturday evening dances in the Club gymnasium tomorrow evening. The affair is open to all employees and their friends.

Bombers Must Breathe

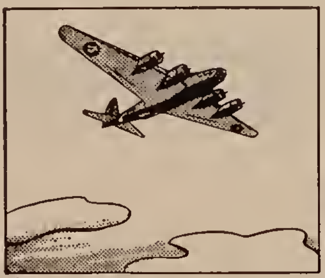
Today American-made bombers can fly at the unbelievable height of six miles. Here is the story of the small but all-important device that helps make stratosphere flying possible.



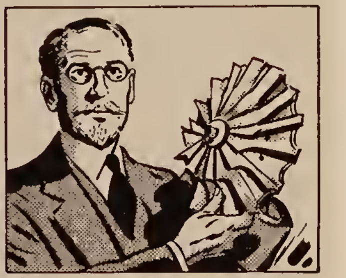
1. It started on Pike's Peak in 1918, where Army Air Corps engineers showed that an airplane engine could be made to run efficiently 2¼ miles above sea level!



2. This amazing feat was possible because a "turbosupercharger"—developed by the Army Air Corps and G-E engineers—pumps extra oxygen into the carburetors.



3. For 22 years these engineers have worked constantly to improve this vital device. As a result, U.S. bombers can fly above the reach of anti-aircraft fire.



4. Dr. S. A. Moss, G-E engineer who pioneered in this work, now at 69 has the thrill of watching the supercharger help carry *our* fliers higher than *any others!*

NEWS THROUGH THE PLANT

Uncle McWell Of 26-2

Winter Wonders

We will never cease to be amazed at feminine attire during the Winter season of course some articles of milady's wardrobe confound us the reason around—those hats, for instance, that droop down over both eyes, effectively obscuring any remote chance of even a partial idea of whom they're bumping into, in which case we've recommended that a Seeing-Eye Dog be made standard equipment with each floppy fedora—but our greatest fascination is their winter-time apparel. Or lack of it.

One feature is its deception. Now when the male decides that cold weather is here to stay, there is no doubt left in any observer's mind that something has changed. Out come the mufflers, galoshes, gloves, overcoats, heavy suits and socks, and the still-with-us "longies" in many cases. You can be sure, brothers, that this is the cold season. There's no ambush here. But the ladies! If it wasn't for the half-frozen, bundled-up-tighter - than - Grandma's - corset men, and four inches of snow, you'd never know by looking at them that it wasn't still just one of those chilly summer days.

In the dead of Winter we've seen women put on no more than a medium-weight coat, don a pair of paper-thin gloves, and step blithely out into near-zero storms. It makes a strong man quail to see them defy the rigors of freezing weather like that! Scientists tell us that woman has a protective layer of fatty tissue which accounts for both her lithesome curves and ability to withstand cold weather, but no scientist can persuade us that a practically bare leg and a dress with its free-blowing manner is anything but an open invitation to pneumonia. There must be some other secret that the scientists have overlooked.

But the pay-off comes when the gals slide into those slinky, winter formal gowns that are cut clear down to here, fore and aft, slip their feet into sandals with four-way exposure, stuff their gloves into their always-too-small purses, and then sally forth into Siberian temperatures wearing fur jackets that reach only to their waists! Heaven help the man that ever tries it. Three steps past the front porch and you could set him up for the rest of the Winter as a totem pole!

And yet the ability to resist cold is perhaps a mental process. Any man with average intelligence, or better, could probably attack this problem from a logical standpoint, and by proper application of the male's superior ability—pardon us, some dope must have left the window open a half an inch in here. The temperature is 'way down to 70 degrees! Brrr! !

Quote for the Week

"Once there were things people couldn't talk about, but now they can't talk about anything else."

—Toronto Daily Star.

Question and Answer Dept.

Dear Uncle McWell:

My date took me out for dinner a few nights ago, but we had a very peculiar incident occur at the meal. After the waiter had brought in the entree, roast chicken with sage dressing, it was quickly obvious that the bird was no good. When we complained, the waiter merely shrugged and explained that this chicken had been in a tough fight. What should we have done then?

Evelyn (I'm still hungry) Siebert.

My dear Miss (Shall we say, luncheon, tomorrow?) Siebert:

You should have asked him to bring you the winner!

Basil Bowley, Bldg. 4-3, is making the scope of his activities wider. He has become very much interested in the manly art of self-defense and has established an academy to further promote the art of boxing. Classes will be held every week day evening from 6:30 to 11:45 p.m. Anyone interested may enroll in one of the many classes now forming. There will also be classes for the ladies. It is surprising to note the amount of young girls and women that are interested in this great sport.

That lovely little blonde, Eileen Gemmer, from the Switch and Mechanism Group, Bldg. 4-3, is back with us again and looks better than ever. Best of health, Eileen, and we do hope you stick around.

On November 13 Gretchen Webb, Bldg. 4-4, entertained a group of friends, complimenting Beulah Tumbleson, who had chosen November 19 as her wedding day. Those present were: Nora Kern, Lucile Baker, Lulu Kline, Golda Young, Cleo Young, Dorothy Young, Sally Merriman, Frieda Ramm, Berneil French, Hilda Scott, Zella Shehann, Ethel Poorman, Louise Roberts, Leona Scheiman, Martha Kruse, Betty Skevington, Mary Skevington, Stella Fagan, Hazel Martz, Louise Tumbleson, Mrs. Florence Miller, Mrs. Ronadia Robinson, Mrs. Gwen Brooks, Miss Tumbleson, and Mrs. Webb. Prizes were presented to the honored guest. The dining table was decorated with a pink and white umbrella. Underneath the umbrella were the miniature bride and groom. Surrounding the centerpiece were the shower gifts of friends. Gifts were also sent by Ann Mangon and Gwen Miller, who were unable to be present. Refreshments consisted of ice cream and cake, each serving of cake containing some fortune charm.

Last Friday Carl Steinbacher, Bldg. 6-B, and a couple of boys were playing a game of button, button, who has the key to the aluminum cage? Walt Walzer lost because he had it.

We herewith present a little drama in one act, entitled "The Unprocured Tickets," starring Gene Fosnight, Bldg. 4-3. It seems that Gene, his wife, and George Arnold and Co. traveled to Columbus, Ohio, to witness the Ohio State-Northwestern football game. Gene failed to procure tickets before leaving Fort Wayne; George did. The result: No tickets available at Columbus; George and Co. went inside; Gene and wife sat outside the stadium in their car and listened to the game on the radio.

John Bickley, Bldg. 4-1, after reading the article appearing in this paper a few weeks ago regarding the removal of the Big Long Lake Fleet (manned mostly by seafaring men of Bldg. 4-3) into the Atlantic, was highly incensed and severely reprimanded this person for not including his powerful ship, "The Goliath," in this fleet. John, we humbly beg your pardon and assure you that this oversight was purely unintentional. However, we are going to recondition your ship, fit it with a powerful new Diesel engine and a steel prow and assign it to service as an ice breaker in the White Sea to keep the Port of Archangel open this winter.

Everyone in Bldg. 4-3 seems to have the same idea about Phil Tilford's being so extravagant while his wife is away. The other week he threw his button away so he could buy a new one; then, too, everyone has noticed the pies, cakes, candies, etc., he has been purchasing from the candy lady and now to think he wants to hire a dishwasher to wash his dishes the day before the little "wifie" arrives home. If any one is looking for a job, contact Phil. As far as wages are concerned, price doesn't mean a thing.

The other day an article appeared in the paper telling of one of our governors delivering papers for his son. Do you suppose that was why Katherine Shaeffer, Bldg. 4-3, was passing papers?

Mary Rupp, Bldg. 4-3, is back on the old job again and says she is feeling fine except that the old power plant isn't just up to par yet.

Dorothy Goshorn—"I've been thinking for the last six months, now."

Max Farrel—"Better not put my name in there."

John Trim — "Just what I thought."

Alice Pflueger—"No kidding."

Ruth Fuller—"Oh, that's cute!"

Elmer Pion, Bldg. 4-3, had a lot of trouble last week trying to figure out what November 11 stands for.

Grace Ledbetter, Bldg. 4-3, instructed her husband the other day to have plenty of car keys this winter so she will not miss any of the basketball games.

Irene Roberts, Bldg. 4-3, is now champion pumpkin pie eater, with Elva McMaken as close runner-up.

The people in Bldg. 4-3 have noticed some bottles with different kinds of labers on them around Anna Griebel's place of work. Some were labeled poison, and we see that one was labeled "Mountain Sunshine." Upon questioning her about the contents of the latter bottle, she explained it was for middle aged maidens with lonesome hearts. She didn't explain the purpose of the ones marked poison, but it is assumed that they are used as in the old story of the Spider and the Fly.

Everyone in Bldg. 4-3 is wondering why it is that Phil Tilford always has some kind of bad luck while his wife is away on a vacation. Last week he had a terrible time getting back into the factory after going out to lunch. As for what happened last spring while his wife was away, we just won't tell every one; but if you would like to know, just ask him as he will be very glad to tell you all about it.

We understand that Jack Leith, Bldg. 26-2, went hunting pheasants over in Ohio over the week end. According to him he shot five; no one has seen any proof, not even his Ohio hunting license.

What's this about Ed Glenwith, Bldg. 26-4, getting burned by a lamp? We all wonder? . . . Wonder why Eunice Lahrman, Bldg. 26-4, didn't want her name to appear in the WORKS NEWS? What are you trying to hide, Skippy? . . . Everyone in Bldg. 26-4 wonders if Donna Lindley is really in earnest when she says she is going on the diet. . . . That new glint you see in Eileen Goddard's eyes these last few days is caused by the ring on her third finger, left hand. Congratulations, Eileen! . . . Frieda Cummings, Bldg. 26-4, hurt in an auto accident recently will soon be back with her fellow workers. . . . Some of our day owls of Bldg. 26-4 have gone in for night owl life—they are Frances Tilbury, Mary Lamont, Dorothy Hanselman, Betty Gunther, Lucy Neu, and Marjorie Guethe. Good luck, girls!

On November 16 a pot-luck supper was held by the Tool Supply in honor of L. D. Platt, who is leaving the department in order to assume new duties in the Supercharger Plant. Following the supper, Mr. White presented the honor guest with a gladstone bag and brief case and Mrs. Platt with a bouquet of chrysanthemums. Later in the evening community singing and dancing was enjoyed.

Fills Unexpired Term As Club Director

G. R. Lindemuth

G. R. Lindemuth, Bldg. 4-6, active in G-E Club affairs for many years, and at one time president of the organization, has been appointed on the board of directors. Ray fills the unexpired term of the late T. L. Wallace.

Defense Program Film Issued By Company

General Electric has produced a new motion picture called "Beating Time," a dramatic presentation of the Company's part in the national defense program. With more than 60 per cent of all production by the Company devoted to defense materials ranging from turbines to gun mounts, the picture is very timely and highly informative.

The picture is being scheduled in all Works cities for showing in downtown motion picture theaters in addition to showing in various Works auditoriums. Dates will be announced in the various WORKS NEWS. All employees are urged to see this new picture "Beating Time" and gain a new appreciation of the gigantic task America faces —to rearm in time.

DECATUR SPORTS

G-E Loses Thriller

The G-E Club basketball team lost a thrilling overtime battle to the Cloverleaf Creameries in the City Industrial League last week. The final score was 30-26. The G-E boys led throughout most of the game only to have Jack Schnepf of Cloverleaf throw in a one-hander to tie up the score with only five seconds remaining. In the overtime period Cloverleaf sank two fielders and held G-E scoreless.

Incidentally this was G-E's first defeat. Next week they meet the fast Decatur Castings, and this game should be a thriller also.

Free Boxing Show At The G-E Club Tuesday Evening

Many Prominent Amateurs Of Golden Gloves Fame To Appear On Card

Employees and members of their families are offered an exceptional sports program next Tuesday evening, when a free boxing card, including ten matches, will be presented at the G-E Club. Starting at 8:30 o'clock the matches will present such favorites as Tommy Burns, Casey Love, Bill Terry, Bud Thomas and many others.

Frank Newport, chairman of the club Boxing Committee, announces six of the teams. Negotiations for the four remaining matches are being completed at the present time.

The matches scheduled are: Tommy Burns, 1941 Golden Gloves bantam champ vs. Casey Love, runner-up; Trendall Terry, 1941 lightweight champ, vs. Harold Kramer, Huntington; Bill Butler, Albion, vs. Morris Taylor, Fort Wayne; John McGuowen, Garrett, vs. Jimmy Calland, Fort Wayne; Bill Sullivan, Fort Wayne, vs. Bill Terry, Fort Wayne; Bud Thomas, Fort Wayne, vs. Harold Falk.

Elex To Distribute Christmas Baskets

This year the Elex Club will again distribute Christmas baskets to needy families in Fort Wayne. The baskets will contain Christmas gifts for youngsters as well as an assortment of foods. Fort Wayne Works employees are invited to contribute to a fund which will make the distribution possible. Donations may be given to contact girl.

Employees having knowledge of families who should share in this distribution are asked to contact Irene Meyers or Mildred Harber, phone 555, give the name and address of the family, the number of children, their age and sex.

SAFETY'S REWARD
for CAREFUL MEN:
A FULL LIFE SPAN
of 3-SCORE, TEN!

FORT WAYNE G-E CLUB SPORTS

By Dick Kent

Bowling

At this writing we still hope to maintain a weekly column on Americas' favorite winter sport. Please send all league scores and oddities to R. eKnt, Bldg. 18-5, or call 221.

Inter-Department Basketball

Robert Kessens, chairman of all basketball activity, announces the naming of Bill Straub as head man for inter-department basketball this year. Ward Staley will be the assistant in charge of all equipment for both the inter-department and Club teams. These fellows have both been closely associated with the basketball program for several years and we know that with proper co-operation from the teams and managers, that we will have a swell league this year.

Having seen several of the teams practice we might add that a newcomer this year, the team from Bldg. 6-4, will be a tough outfit to stop. Main Office, a runner-up in both halves last year, remains an unknown power, due to the fact that Krieg is playing on the Club team and O'Brien is out with injuries. West Side, always strong, looked fair against the Club in a practice session this week.

The big question is Small Motor, last year's champs, who will have to rebuild an entire team due to the new ruling that one playing with the Club cannot play Inter-department ball, but under "Jap" Voirol they will probably come up with another power-house.

As yet we haven't seen the other outfits in action, but will have the dope on the other nine teams next week.

Club Wins Opener

Playing before a good sized crowd, the G-E Club quintet opened the invitational home season last Sunday with a 41-39 victory over the strong Columbia City Merchants.

The Club was never in any serious trouble at any time up until the last minute, holding leads at all the quarters. Columbia City's inability to hit at the charity line when the pressure was on probably cost them the game, blowing four chances when the clock was ticking away the last two minutes.

Braden's 10 points and Krieg's 9 led the Club scoring while Overdeer and Chapman with 17 and 10, respectively, paced the visitors.

Two G-E Club regulars, Wilkin and Marquette, were missing from the line-up or the margin of victory would probably have been larger. This might also account for the poor ball handling that showed up on several occasions.

In the prelim, two inter-department teams, Squares and Messengers fought a hard battle with the oft-beaten Squares finally winning over their younger opponents 28-25.

These games are free and will be held every Sunday afternoon when the free movies are not being shown. If you like good basketball entertainment come and bring your family and friends.

Table Tennis

In spite of work schedules, football games, and the hunting season, the table tennis league got off to a good start. The new tables and nets seem to be well liked and there are enough good and bad players to give every one in the league the kind of competition he likes.

Among the old-timers are Michel, Hanna, Whearley, Sunier, Fox, Hart, Hancher and Laurent, the last two being from Decatur. Outstanding among the newer employees is Jack Kirlin, who can beat most of us without any more practice.

While it is too early for averages to mean much, some of the boys have maintained perfect records. Hanna, Kirlin and Sunier have weathered the first two sessions without losing a match. Some of the other fellows have also maintained perfect records but we will not name them here, as some of those boys are pretty husky.

So far, the play has been singles and some real matches have been fought. Later in the season it is hoped to arrange some form of team play, and perhaps schedule some matches with other organizations.

Gymnasium Classes Offered To Employees Free

Trained Instructor To Hold Classes At G-E Club For Both Men And Women

Announcement of the schedule for gymnasium classes being offered at the G-E Club this season, under the supervision of Donald Porter, Bldg. 26-3, has been made.

Women will meet on Monday evenings from 5:30 until 7, providing proper interest is shown, and the men on Wednesday and Friday evenings from 5 to 7.

For the benefit of those who have missed previous notices on this new feature the classes are offered free to all persons over 18 holding G-E Club membership cards. All those interested are urged to get in touch with the instructor at once in order to smooth out enrollment difficulties. A number of persons have signified their intentions of enrolling and at the last minute changed their minds. It is necessary that those at all interested give their support now! It is further explained that if the men can attend only one of the two classes a week, they are welcome to participate as often as convenient. The course will consist of calisthenics and mass events and later all those interested will be given instruction in apparatus work. Only those wishing will be urged to take up this phase of the program and will be allowed to progress according to their ability.

Mr. Porter is well qualified to handle this phase of Club activity, having attended the gymnastic school of Indiana University. For the past 15 years he has been a member of the Fort Wayne Turners and has instructed various groups in that organization. He has held the City Gymnastic Championship for the last two years and will be remembered by many as one of the Turner crew which put on volunteer exhibitions at the Club basketball games several years ago.

Due to the small attendance at the opening class for women on Monday evening, November 24, there will be no further meetings, pending a larger enrollment. If you have not signified your intention to enroll, please fill out the blank below and mail to the instructor no later than Wednesday, December 3. Men will meet as scheduled. Girls will please see next week's WORKS NEWS for further details.

IN THE ROUGH

By WALTER SUNIER

We type these columns. We are not an expert typist. The manuscripts look like something little Junior tangled with. Editor Baade deciphers them. He has agreed to reprint last week's column as originally typed by the pile driving system.

Allen and lee wer hatched against Edga and hemphill last season twhich is an somewhat different comvination then usual since i n each case therewas a engineer und a commercial man yeamed to gether. Any way: how ever he combinayion was conceixed, they was a pueding in them thar hils of Brookwood. Evidently the comination of a engineer and a commercial amn is unbearable betause neither couldwin fhe series. Each teamxx 3on a match and then they @layed a tie. There was a rimor hat allen and Lee finally qon. As for ush, we would nit know wether to oick the co mmineerings or the enginercials.

There is an saying hat gos somefing like, "he who is bufned is twize az shi". Apparentlythatone was made up be the Indians betause it do not seem t oapply to whxxite men. On Aug. 1), XRay White hda an 48 in fhe foist nime bit after 3puttinf Bo.16 he burned his rguni wen an wholw pard od matchez ig nited. e druve into the rite hant trape on no. :7 which is an long pike efen if you are ghot. He purred this pxhole an NO .18 finishing withqth a 4p. Apparently far a white man the sayeing shoule he changed ta, "hE who id birned is tw ice as SPRY*. Maybe a goof way ti xxxxxxxxx git hot is to tight a fiire unfer yourwelfk. Howeber, wewill talke thw old fashioved way of being even temnpered all rhe tine and concentwating on every zhot. We ars vwey eben tempered, beinf ravin made all the tine.

Major Circuit To Play Wednesdays At G-E Club

Locals To Meet Kuhners For First Game. No Admission Charge To Be Made

By RICHARD KENT

Impressive ceremonies will mark the opening of Fort Wayne's major basketball league at the G-E Club next Wednesday evening, December 3, it is announced by Bob Kessons, chairman of the committee. Admission will be by membership cards.

The G. E. Club Band, under the direction of Perry Shober, will play before the games and between the halves.

All players and officials will be introduced to the public before the games. Letters have been sent inviting all officials and clubs interested in the league to attend.

The old flag of Fort Wayne, the largest in the state, that used to hang in the North Side gym when the Hoosiers were considered the best basketball team in the country, will be hung in the Club gym. Under this old banner the best in the game used to match baskets.

The Club team has definitely been named and is comprised of the following:

Harold Braden, better known as "Racehorse", former Central and Butler University star, will be at a forward position. The other forward post will be capably filled by Russ Wilkin, also a Central graduate and the city's leading prep scorer of last year. The center will probably be Dor Kreig, former North Side player and a well known figure in independent circles. Bill Hanley and Marlet Marquette, also Central grads, both being well known as basketball and football stars, will probably start at the guard positions.

Johnny Allen, a member of the team last year, Shaw and Wickliffe, former Central players, Garton of Columbia City and Stemmlar of New Haven comprise the rest of the team.

Pres. Slack, former pro with the great G. E. Club team of a few years back has taken over the coaching duties, while Bob Kessens, known in sports promotions since way back when, is managing the team.

The schedule for opening night is as follows:

7:00—Essex Wire vs. International Harvester.

8:00—Kuhner's vs. G-E Club.

9:00—St. Joe A. C. vs. Zollner's Pistons.

These games are open to the public. Support "your" Club.

G-E Inter-Department Basketball Schedule

The G-E Club inter-department basketball schedule for the opening session on Monday, December 1 has been announced as follows: At 7:30, Bldg. 4-4 vs. Transformer; at 8:30, the G-E Squares vs. Small Motor; at 9:30, the Wire-Insulation vs. Main Office.

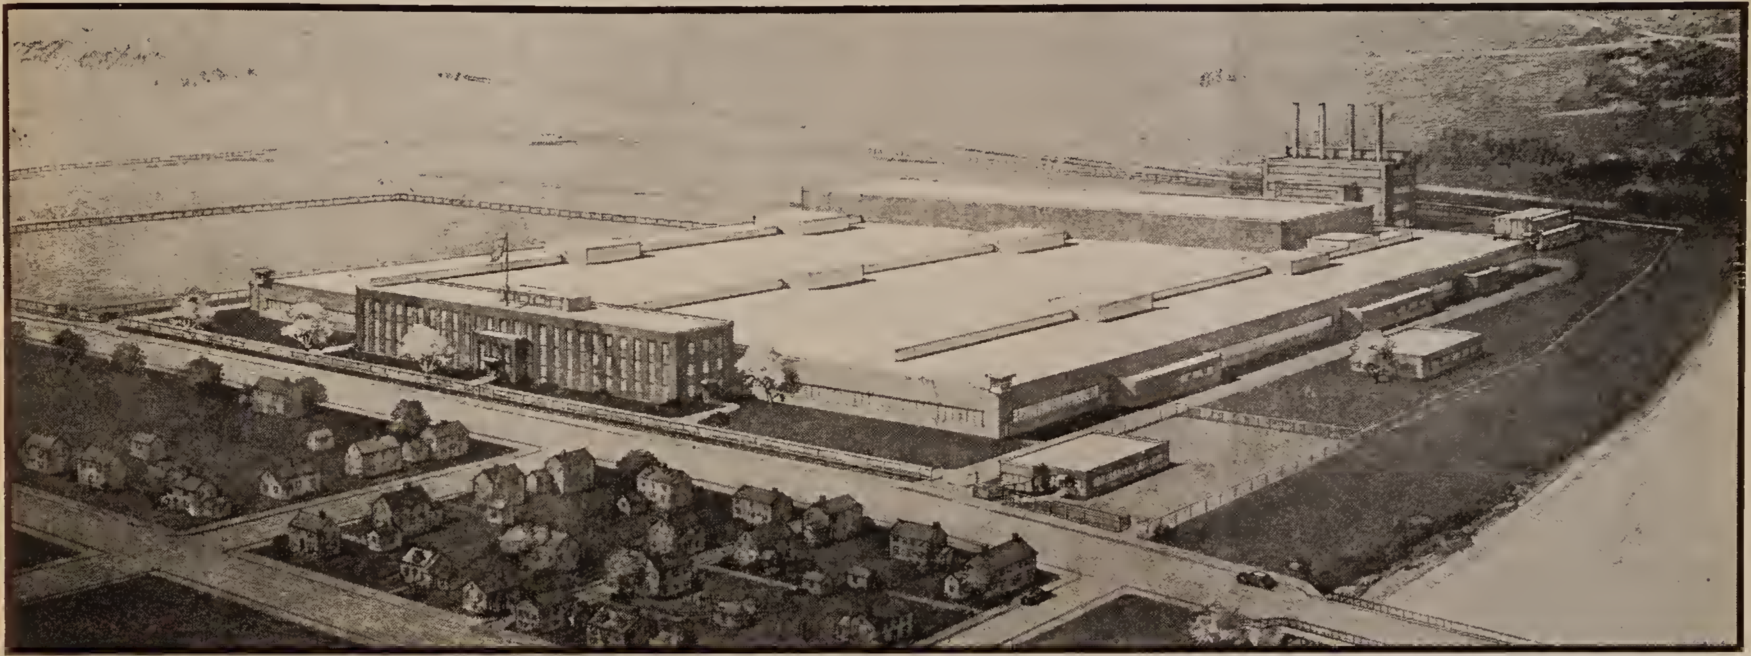
Supercharger Plant Plans Complete



The architect's drawing of our new plant to be erected for the manufacture of superchargers is shown above. The plant is to be erected on the Company's Taylor Street property with the Stone and Webster Engineering Corporation of Boston as general contractor.

Name Supercharger Plant Appointees

With the beginning of operations in connection with the building of the new supercharger plant announcement is made by Lisle D. Hodell, superintendent of the new division, of the appointment of seventeen employees, forming the nucleus of the manufacturing force of the new department. The appointments are made as follows: M. A. Smith, supervisor of accounting, cost and payroll. K. H. Huyette, supervisor of production and stock. L. A. Erickson, supervisor of inspection and test. W. E. Beer, supervisor of relations.

F. L. Schafenacker, supervisor of mechanical equipment. Martin Kimble, in charge of tool design and drafting. L. D. Platt, supervisor of non-durable tools and shop supplies. F. A. Arnold, supervisor of rotor planning section. R. L. Spitler, in charge of impeller planning. P. R. Weitzman, supervisor of small parts planning section. W. H. Connor, supervisor of forging planning section.

R. J. Bangert, supervisor of nozzle box planning section. C. G. Diver, supervisor of aluminum parts planning section. G. E. Hicks, supervisor of wage rate and time study. D. D. Brayer, plant engineer. J. H. Jennings, in charge of ventilation and W. G. Yopst, in charge of piping and test.

The organization will be located in Bldg. 2-3 during construction of the new plant.

Graham McNamee In New Defense Film

The film entitled "Defense for America", industry's graphic report on defense progress, will be shown at the Paramount Theater starting today and continuing until December 11. In the picture Graham McNamee takes the movie public inside the factories which

Plastics Jewelry Again Offered To Employees

The Fort Wayne Division of the Plastics Department is again offering a complete new line of Parkwood Textolite novelties and jewelry for sale to employees. A similar sale was received with wide acceptance during the Christmas shopping season last year.

The jewelry is made up of very fine flitches of rare woods which have been impregnated with Textolite plastics. The wood is then molded into various shapes.

Sample boards displaying the novelties have been placed in the Employees Store and in Bldg. 12-3. However all sales will be made in Bldg. 12-3 and will be under the direction of Alice Thompson. Purchases may be made during the lunch hour from 12:30 until 1:00 p.m., and every evening—Monday through Friday from 5:15 to 5:45 p.m.

New Broadway Gate House In Operation Starting Monday

Construction of the new gate house, on the east side of Broadway, south of the Main Office building, is drawing to completion, and will be in operation starting Monday, December 8. The new gate will provide entrance and exit for employees of the Main Office building, a considerable number of employees from Bldg. 17 and of other buildings on the east side of Broadway. With the opening of the new gate, the gate between Bldg. 17 and the Main Office will be closed. It is anticipated that many employees now using the Lindley Avenue pedestrian gate will also find the new entrance more convenient.

G.E. Exhibits Are Removed From National Academy

Area Will Be Used By Scientists Working On Defense Problems

After 18 years of public display, during which they were seen and operated by a million visitors, the push-button scientific exhibits of the General Electric Research Laboratory have been removed from the National Academy of Sciences in Washington "for the duration." The room they occupied, like other

(Continued on Page 4)

Begin Building Of Supercharger Plant

Construction of a $25,000,000 factory, as part of the Fort Wayne Works, erected for the purpose of the manufacture of turbo-superchargers, will be started within the next few days it is announced by Works Manager M. E. Lord. The building will be erected on the Company's Taylor Street property.

The new structure, to be built by the Stone and Webster Corporation of Boston, as a Defense Plant Corporation project, is expected to be completed by July 1. As indicated in the architect's drawing, it will be one story high, 800 feet long, 700 feet wide and have 560,000 square feet of floor space.

The building will cost $8,000,000 and machinery and equipment to be installed will cost more than $16,000,000. Approximately 4,000 employees will be required at peak production.

A G-E Development

The history of the supercharger should be of interest to all G-E employees since Dr. Sanford A. Moss, of General Electric, is recognized throughout the world as the "father" of the turbosupercharger.

In a recent address R. G. Standerwick, chief engineer of the Company's supercharger department at the River Works, gave the following interesting information on the development of this device.

"When the European war broke out Dr. Moss was called out of re-

(Continued on Page 5)

"Hour Of Charm" Recordings Offered

Through special arrangements made with the Lamp Department, at Nela Park, employees may obtain at a special bargain price an album of eight double face recordings of the hymns sung on the Hour of Charm by Phil Spitalny and his All Girl Orchestra. These recordings may be obtained in the Employees' Stores and all employees desiring to purchase them are urged to get their orders in early.

Material Shortage On Employees Sales

Employees contemplating purchases at the Employees' Store are reminded of the fact that stocks of merchandise available to them have been greatly reduced owing to the present emergency and they are advised to be prepared to change their minds upon appliances they may wish to buy, or at least to have second or third choices. The store management is bending every effort to provide all possible stocks, but production requirements are not able to keep pace with orders.

In other words, employees are urged to shop very early at the Employees' Store this year if they expect to purchase the appliances they have in mind.

• Invest In Freedom

Next week there will start in all Works and offices of the Company a campaign to interest all employees in the purchase of United States Defense Bonds. It will be an orderly, reasonable campaign based upon common sense. There will be no forcing the issue. The program will be presented to each and every employee on its merits and the final decision of whether or not to buy bonds will be left entirely with the individual employee.

What a difference in this way of raising money as contrasted with the way they raise money in the war-blighted lands of Europe. Over there they stick a gun in your face and say "Give . . . or else!" Over there, they take and don't even ask! Over there, the people have no rights. Only the state has them and it guards them with guns. Over there, they don't pay interest on money they take from the people either!

United States Defense Savings Bonds are not only excellent savings mediums, they are an investment in freedom. Their purchase helps the government provide the sinews of war to defend that freedom. Men, women and children all over the United States are asking "What can I do to help?"

The answer is clear: "Buy Defense Savings Bonds!" It's YOUR COUNTRY and YOUR FREEDOM you are investing in! ! ! !

• Save It

Enough aluminum to build ten two-engine Army bombing planes is being saved every month from machine shop leftovers alone in one large manufacturing company.

Another firm salvages 75,000,000 pounds of non-ferrous scrap metal every year from parts of its equipment that have outlived their usefulness. Copper, lead, zinc, antimony, tin and even gold and platinum are reclaimed in this way.

A large steel company recently sponsored a three-day collection campaign for scrap iron in its community and then bought the 8,400 tons that were collected.

Such examples are typical of industry's economy today—economy that is more important now than ever before. America needs vast supplies of raw materials for our defense program, and in some cases there is a scarcity of those materials. Organized collection, saving and reclamation campaigns are being used to help stretch existing stocks as far as possible.

Every one of us can help in these campaigns. Indeed, if they are going to be completely successful, every one of us must help. And we can do our bit in several ways.

Most of us have magazines, newspapers, waste paper, corrugated paper containers, scrap iron and other materials that can be used in the defense program. Instead of throwing them away, sell them to junk dealers or donate them to authorized collection agencies. And in your work, be extra careful not to waste. Remember, in the current defense program every little saving helps.

NEWS FROM THE CAMPS

We publish herewith with great pleasure extracts of letters sent to us by G-E employees now in government service. Address all communications for this column to the WORKS NEWS editor.

Dear Editor:

I am writing you this following letter. We had a very good Thanksgiving dinner last Thursday. We had mashed potatoes and gravy, cranberry sauce, and salad with sauce on it and also had pumpkin pie. After the meal they gave all of the fellows a handful of candy. That was the best meal I have had since I have been here in camp. We are moving the whole company of the 159th Infantry to Fort Old. As far as I know now we are moving next Saturday up there, which will be closer to San Francisco. We were closer to Los Angeles here in Camp San Luis Obispo, California. Maybe I'll get my chance to go up to San Francisco some week-end; I am getting a fifteen-day furlough. But instead of coming home for Christmas, I am coming home to celebrate the New Year at home, as I've always done. I hope everything goes ok so I can see the old year out and the New Year in. I worked in Bldg. 26-1, and if some of those fellows working there could see me now, I bet they sure would change their opinions of me. I have taken a twenty-mile hike and a fifteen-mile and took both of them where some of these fellows who have been in longer than myself have had blisters all over their feet. Monday the twenty-fourth we got a shot in the arm. There are five of us in a tent. Well, out of five there were only three of us could take it. We went out to the field, the other two had stiff arms. We three were very lively for getting a shot in our arm. We have a double shot coming in two weeks, then two weeks after that a triple shot. I bet we will all be sick when we get the triple shot. We are starting to pack some of our clothing now to move up to Fort Old. You can still send me the NEWS at this camp and it will be forwarded up to Fort Old to me. We are in the fortieth division now. But when we move up there, we will be in the Seventh Division. Our insignia was the Sunburst, but will be changed to the Hour Glass. I was wishing they would let us keep the Sunburst for it is a lot better looking than the Hour Glass.

Well, here November is almost gone and another month has passed. I will soon have my six months in the Army and to think it is only five weeks until Christmas—how the time has gone since I was inducted into the Army on June 17th, 1941. It seems as though these months have flown past me in no time. Well, if everything goes as I expect I'll be home in about six more weeks to spend New Year's Eve with my folks and I am looking forward to it. Will close for now.

Sincerely yours,
Pvt. Richard C. Becker,
C. B. 159th Infantry,
Camp San Luis Obispo,
California.

Dear Editor:

I want to thank you very much for sending me the WORKS NEWS. It makes me very happy to read how the things are coming along.

I am just in a training camp at the present. I am about through with my basic training and all of it has been very interesting. I went to school to be a spotter and observer for the automatic weapons. This battalion is in the anti-aircraft division. We fire the .30 and .50 machine guns and the 37 mm. anti-aircraft guns. The next couple of weeks we will fire them at a target towed by an airplane at Ft. Crockett, Texas. Monday, the 17, we fired and shot the target down. We sure were proud of ourselves.

Preston H. Hille

The 20th was our Thanksgiving Day and we had everything that anyone could think of to eat. The fellows hardly ate anything today. We sure have good food down here.

Appointments In Supercharger Department

Maitland Smith

Kenneth H. Huyette

Donald Brayer

Jim Jennings

Walter Yopst

Willard Connor

Florian Arnold

Martin Kimble

George Hicks

Gordon Diver

Robert Spitler

Lloyd Platt

Robert J. Bangert

Leonard A. Erickson

Fred Schafenacker

Wallace Beer

Paul Weitzman

SuperchargerAppointees

(Continued from Page 1)

Mr. Schafenacker completed his training as a machinist-toolmaker in 1908 and was assigned as a toolmaker in the Fr. H. P. Motor Department. In 1911 he was transferred to the apparatus machine shop and then to the general tool shop. In 1913 he was made foreman of the special machine shop and he continued in this capacity until 1920 when he was appointed supervisor of machine tool operations. In 1927 Mr. Schafenacker was made general foreman of the Meter Department continuing in this capacity until 1934 when he was appointed superintendent of the Apparatus Department. In 1939 he was placed on special assignments in the General Purpose Fr. H. P. Motor Department and when the new Supercharger Division was organized he was assigned to that division.

Mr. Smith majored in industrial engineering at Carnegie Tech and became a G-E employee in 1929. He entered the student training course at the Erie Works and in 1931 was transferred to the accounting department at that works. In 1937 he was transferred to Schenectady on special assignments in the offices of the auditor and works accountant. He came to Fort Wayne in 1940 and with the beginning of the organization of the Supercharger Division this year was assigned to that Division.

Mr. Huyette attended Indiana State Normal and graduated from Purdue University in 1924 with the degree of Electrical Engineer. He was employed by the Company and was assigned to the refrigeration engineering section. Mr. Huyette took part in the sales and servicing of the first G-E household refrigerating machines sold in this city. When the Refrigeration Division was established at Winter Street in 1925 he engaged in developmental engineering work at that place. He continued in this capacity until 1939 when he was appointed production supervisor of the Refrigeration Division. He continued in this capacity until assigned to the Supercharger Division.

Six Employees Are Appointed To Supervisory Positions

Top row, left to right—M. L. Hartman, E. Hott, P. Hapner, and H. McVay. Below—R. Hursh and A. Ray.

Six appointments of employees to supervisory positions are announced this week. One of the appointments in Bldgs. 4-2 and 4-3 names M. L. Hartman as supervisor of planning and wage rates. The balance of the appointments are in Bldgs. 4-5 and 4-1 and are as follows: E. Hott is named foreman of small lot, P. Hapner, foreman of aircraft fields, H. McVay, foreman of black armatures and commutators and A. Ray foreman of aircraft assembly—all in Bldg. 4-5. The sixth appointment is that of R. Hursh, Bldg. 4-1, who is named foreman of punch press, shafts and brush holders.

Mr. Hartman began his services in 1929 in the tool equipment engineering section in Bldg. 4-6. He later engaged in time study activities and from 1935 to 1938 served as an instructor in time and motion study. He was made supervisor of planning and wage rates in Bldg. 17-3 in 1938 and two years later was placed on special assignments.

Mr. Hapner was engaged in 1926 and entered the Apprentice Training School. He was later assigned to the Winter Street plant and then transferred to Bldg. 4-5 as a lathe operator. In 1934 he was placed on special assembly and in 1940 was made leading operator and assistant supervisor in aircraft field assembly.

Mr. Hott's service began in 1924. After special machine training he served as a machine operator for ten years and later as a production dispatcher.

Mr. McVay was employed in 1928 as a precision grinder in the meter department. After four years in this department he was transferred to Bldg. 4-4 as internal and external grinder. Two years later he was transferred to Bldg. 4-5 where he worked in the black armature section on special precision grinding.

Mr. Ray was employed in 1916 as an inspector in Bldg. 8-2. In 1917 he was transferred to meter test in Bldg. 16-1 and later to general test in Bldg. 17-1. During the period following he was engaged in meter developmental work and in 1922 was assigned to the Fr. H. P. Motor Department where he worked on test and inspection. He continued in this work up to the time of his present appointment.

Mr. Hursh attended the Apprentice School, enrolling in 1929. In 1933 he was made a lathe operator in Bldg. 17-2. Later he worked in Bldg. 4-1 and in 1934 he was transferred to Winter Street as a grinder. In 1935 he returned to the Broadway plant and worked as a grinder and automatic lathe operator. In 1937 he was assigned to the Bldg. 17-4 tool room and later to Bldg. 4-4 and 4-1 tool rooms. In 1941 he was made assistant foreman on the night shift and continued in this capacity to the time of his present appoint ment.

G-E Exhibits

(Continued from Page 1)

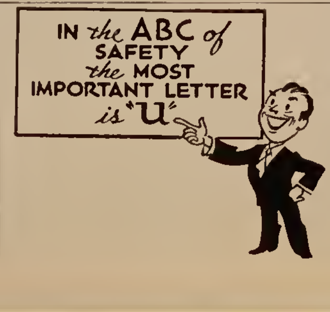
Academy exhibit areas, will be used as office space for scientists working on urgent defense problems.

However, Dr. W. D. Coolidge, General Electric vice president in charge of research, announced that these exhibits will continue on their career of illustrating scientific achievements in a spectacular manner. A few of the most striking, including the famous "levitator," which makes a metal dish float freely in the air without visible support, will feature the G-E exhibit at Dallas, Texas, in connection with the annual meeting of the American Association for the Advancement of Science during Christmas week. Later, these, as well as certain others, may be shown in museums and schools throughout the country, where they will be seen by many who were unable to come to Washington.

If the Academy reopens its exhibit rooms after the present emergency has passed, said Dr. Coolidge, it is fully expected that the G-E Research Laboratory will again be represented. By then, he added, the exhibit will probably be entirely new, showing results of discoveries and developments now in progress.

The exhibit was brought up to date each April at the time of the annual meeting of the Academy in its building. This followed the aims of the late Dr. George Ellery Hale, chairman of the Academy building committee, that it should become a center to show the progress of science in industry.

During the past year, the G-E exhibit has included 37 items. In addition to the levitator there was shown the sun motor. Light from the sun, or an electric lamp, is converted into an electric current capable of running a small motor. Another popular exhibit was a high frequency demonstration Tesla coil, which gives sparks of many thousands of volts, though they are harmless when touched with the fingers. A neon stroboscope makes a rapidly moving wheel appear to stand still. All these exhibits were operated by the visitor when he pressed a push-button.



IN the ABC of SAFETY the MOST IMPORTANT LETTER is "U"

Defense Savings Plan Amendments Announced

Series E Bonds May Be Purchased At Any Time Through Payroll Deductions

Under terms of the amended Defense Savings Plan, all employees of the Company may purchase on the payroll deduction plan, at any time, Series E, United States Defense Bonds.

The denominations of the Series E bonds are $25, $50, $100, $500, and $1,000. Announcement of the amended plan was made last week by Charles E. Wilson, president of the Company.

A copy of the amended plan in pamphlet form, GEQ-138, will be delivered to every employee. In a foreword in the pamphlet Mr. Wilson says: "You will recall that last April announcement was made of the adoption by our Company of a Defense Savings Plan which made it as convenient as possible for you, as employees, to acquire United State Defense Savings Bonds on an installment basis, as well as for cash.

"The plan is being continued, on the amended basis described in this pamphlet, and I therefore wish to take this opportunity again to express my hope that all of you will take advantage of its provisions and thus acquire more United States Defense Savings Bonds.

"Please remember that by investing in such bonds, you not only save for the future, but you also help our Government provide for national defense."

Only Series E bonds may be bought on the payroll deduction plan. All bonds including Series E, Series F, and Series G, as well as Defense Postal Savings Stamps, may be purchased for cash.

Authorizations for the purchase of Series E bonds on the payroll deduction plan will be accepted at any time. Deductions will begin as soon as possible after the authorizations, properly filled in and signed, are received by the payroll department. Deductions will continue until the authorization is cancelled in writing by the employee, or until the employee leaves the service of the Company. The authorization must specify the denomination of bonds desired and the amount to be deducted each pay period.

Each employee will receive an authorization form and additional ones may be secured from department heads, foremen, payroll departments, or from the Bond Office in Schenectady. Bonds will be delivered to home addresses, hence employees should notify payroll department promptly of any changes in address.

Employees may cancel their authorizations in writing at any time and their accumulated installments, which have not been used for the purchase of bonds, will be refunded.

For full and complete particulars regarding any and all purchases of Defense Savings Bonds, the attention of all employees is invited to the special pamphlet, GEQ-138.

SuperchargerAppointees

(Continued from Page 3)

Mr. Arnold is a graduate of Purdue with a degree in Mechanical Engineering and joined the Fort Wayne Works organization in 1925. He was employed in the maintenance section until 1927 when he was transferred to the Tool Division. In 1936 Mr. Arnold was transferred to the General Planning Department continuing in this work up to the time of his present appointment.

Mr. Platt became an employee in 1911 when he was made shop clerk in the arc lamp department. In 1912 he was transferred to the Tool Supply Department and in 1913 to the machine section where he worked with turret lathes and later on automatics. In 1916 he returned to the Tool Supply Department and in 1920 was made assistant foreman of that division. In 1932 he was named foreman of tool cribs, forges and heat treatments continuing in this work until assigned to the Supercharger Division.

Mr. Brayer is a graduate of Purdue University receiving a degree in Civil Engineering in 1928. That same year he was employed in the Plant Engineering section of the Fort Wayne Works. He engaged in developmental test work in 1931 and was transferred to the Transformer Division in 1933 on planning work. He returned to the Plant Engineering Section in 1936

(Continued on Page 5)

Supercharger Appointees

(Continued from Page 4)

and was employed in that department at the time of his present appointment.

Mr. Diver graduated from the Apprentice School as a machinist-toolmaker in 1928. He supplemented his training with considerable Extension work. In 1929 he was assigned to the Fr. H. P. Motor Division and engaged in tool equipment planning. In 1933 he was employed in the pre-planning department on special assignments and in 1936 was transferred to the Aircraft Department in a supervisory capacity on sample model work.

Mr. Kimble started his work with the company in 1916 in the Tool Department. He was later transferred to the tool drafting section and when tool design was separated from tool making in 1919, he was transferred to Bldg. 16-3. All of his 25 years of service has been connected with this kind of work. When the tool drafting and tool making divisions were consolidated, he was transferred to that department in Bldg. 26-5. He continued his activities there up to the time of his present appointment.

Mr. Spitler is a graduate of the Apprentice School, having graduated as a machinist-toolmaker in 1937. He supplemented this training with Extension work. Following graduation he was assigned to the General Tool Division, and in 1939 placed on tool design in Bldg. 4-3. The next year tool design work in Bldg. 4-4 was added to his duties.

Mr. Connor is a graduate of the University of Vermont, completing the course of mechanical engineering in 1936. He entered the test course at Schenectady that same year, and later came to the Fort Wayne Works on test work, and was then assigned to the Plant Engineering Department. In 1938 he was transferred to Motor-Generator Planning Department. For two years he was engaged by the Boeing Aircraft Company of Seattle, returning to the Fort Wayne Works in 1940.

Mr. Weitzman is a graduate of the Apprentice Training School, completing the machinist-toolmaker course in 1924. He was then assigned as a toolmaker in Bldg. 26-5, and in 1926 was placed on tool design and special machine design at the Winter Street Plant. In 1937 he was transferred to the General Purpose Fr. H. P. Motor Division as tool planner and designer. In 1939 he was made tool and equipment planner for the General Purpose Fr. H. P. Motor Division.

Mr. Bangert graduated from the Apprentice Training School in June, 1917, as a machinist-toolmaker. He was a member of the first class to graduate from the school. Following graduation he was assigned to the main tool room as a toolmaker and in 1920 was transferred to the Manufacturing Superintendent's Department. In 1927 Mr. Bangert was assigned to the Works Laboratory on laboratory welding work.

Mr. Erickson entered the Apprentice School in 1916 and after graduation was transferred to Fractional H. P. Testing Department in Bldg. 4-6 and Bldg. 3-3. In 1939 he was assigned to the office of the Supervisor of Waste and Spoilage, and he continued in this work up until the time of his present appointment.

Mr. Hicks graduated from Kentucky University with a degree in Mechanical Engineering. He became a Fort Wayne Works employee in 1929, engaged in the factory training course. In 1930 he was made a supervisor in Bldg. 26-1 and a year later was transferred to Winter Street as an inspector. In 1933 Mr. Hicks was assigned to Bldg. 4-6 on Planning, Wage Rate and Time Study, and in 1939 was transferred to Bldg. 18-1 as Time Study Engineer, which position he held up to the time of his present appointment.

Mr. Beer is a graduate of Purdue University, completing the course in Mechanical Engineering. He joined the organization and engaged in micro-motion study, and then enrolled as a summer student in 1925. He continued his studies for one year and rejoined the General Electric organization in 1926 as a student engineer. In the same year he was transferred to Bldg. 4-2. Later he was made a section superintendent.

Mr. Jennings is an Apprentice School graduate, completing the electrical tester course in 1926. Prior to entering the Apprentice School, he had been employed in the Payroll Department for one year. In 1926 he was made assistant foreman of the Switch Gear Division and the following year was transferred to the Plant Engineering Department. In 1929 he was transferred to the Planning Department of the Transformer Division and returned to the Plant Engineering Department in 1930, which position he has held up until the time of his present appointment.

Mr. Yopst attended Purdue University and was employed at the Fort Wayne Works in 1928, when he joined the Plant Engineering Department. He has served in this department during his entire career with the company.

First In Flying Club To Solo

To Margaret Jane Ray, above, employed in Bldg. 4-3, goes the distinction of being the first member of the Fort Wayne Flying Club to make a solo flight. The club includes a considerable number of Fort Wayne Works employees. Margaret soloed at the Smith Municipal airport after eight hours' instruction. She is one of two girls who are members of the club.

Build New Plant

(Continued from Page 1)

tirement and is at present acting as consulting engineer in supercharger manufacture for General Electric."

"In the 35 years prior to Dr. Moss' retirement three years ago he was awarded 40 patents on mechanical devices including the centrifugal compressor, the exhaust-driven super-charger, and the gear-driven supercharger," continued Mr. Standerwick.

The turbosupercharger is used to overcome the effect on an airplane engine at high altitudes, according to Mr. Standerwick. The density of air decreases very rapidly as one ascends, and this affects the performance of airplane engines, just as it affects human beings. For instance, the average person will lose consciousness at 18,000 feet unless artificially supplied with oxygen; and at that same altitude an aircraft engine will lose more than half of its power, and the speed of the plane will drop sharply. The turbosupercharger offsets this and persuades the engine that it is flying at sea level.

The operation of the turbosupercharger is easily explained. The waste gases coming from the exhaust manifold of most internal-combustion engines are allowed to pass to the outside air without doing any work, and this, in the case of a large engine, represents a considerable amount of power—as high as 350 horsepower.

On a turbosupercharger engine, these red-hot gases are directed by nozzles against "buckets", or vanes, arranged around a wheel, and the wheel is thereby made to revolve. On the other end of the shaft is an impeller, or centrifugal compressor, which compresses the rarefied air of the upper atmosphere and thus delivers a good, rich "shot" of air to be mixed with the gasoline vapor. The engine is thus enabled to "breathe" normally at any altitude and maintain its rated horsepower.

The red-hot gases are around 1500 degrees. This scorching heat, combined with the terrific speed of the supercharger rotor, is the problem whose solution has made possible the use of superchargers, according to Mr. Standerwick.

Performance Lauded

Performance in Europe of American-made Boeing bombing planes equipped with General Electric turbosuperchargers was praised recently in a radio program of the government-operated British Broadcasting Corporation.

A. H. Wigan of the B.B.C staff described on the air a visit to an air field where he inspected the big four-motored crafts powered by Wright engines and said:

"The Boeing—or to give it its English name, the Fortress I—is particularly important to us just now—and all because of four insignificant pieces of mechanism fitted below the engines—the turbosuperchargers, or blowers which are driven by the exhaust.

"The job the R.A.F. have to do and are doing now, is to bomb the enemy, not only by night but by day, wherever he is to be found. Day bombing is a risky business unless you have the right plane, but the Fortress fills the bill completely and the men who have flown them over here can't say enough in their praise.

"As I said, the Fortress' secret lies in those blowers. To perfect them has been the ideal of aircraft engineers for years, but the snag has been to find a metal which would stand up to the exhaust gases which provide their motive power."

"American engineers have succeeded where others failed, and one of the results is the great performance of the Fortress with its speed of over 300 miles an hour at 25,000 feet. We build bombers which will go as fast as that, but none, so far as I know, which will do it at that height.

"You know that we hope to use the Wright Cyclone engines, which drive the Fortress, on one of our own four engined bombers—the Stirling —of which the Germans know quite a lot already. Well, that's what we want for our day raids—bombers which can come in high over targets, comparatively safe from the enemy's ground defenses—bombers which can drop four tons of bombs or so, as the Fortress can, and which can be halfway home before the enemy's fighters can get up to their level."

The turbosuperchargers represent 23 years of research dating back to 1918 when Dr. Moss, took a Liberty motor equipped with one to the top of Pike's Peak. Without the turbosupercharger, the engine, which had produced 350 horsepower at ground level, gave only 230 horsepower in the thin air of the mountain top. With the device attached, however, the engine produced 356 horsepower.

Molecules Wriggle — Revealing Important Facts About Themselves

Some molecules wriggle like worms when an alternating electric field is applied to them, Dr. Raymond M. Fuoss, of the General Electric Research Laboratory has found.

These long worm-like molecules have many useful applications and they are becoming increasingly important. Artificial silk and rubber are made of them—so are many plastics, especially those with electrical applications because of their insulating ability.

The force required to make them wriggle gives the scientists such important information as their weight and structure. Knowing how they are built, new molecules can be designed, with properties to meet specific needs.

Dr. Fuoss explained that such molecules, like many in nature, are electrically lopsided, or "polar." The total electric charge on such a molecule is zero, but one side is positive, the other negative. Thus, in an electric field, they tend to line up, just as compass needles line up with the magnetic field of the earth.

Water is an example, he said. The molecule forms a triangle with the two hydrogens, which are positive, at the base, and the single oxygen, which has a double negative charge, at the apex. Because unlike poles attract, these line up in the electric field with the negative oxygen pointing in the direction of the positive electrode.

"In effect," said Dr. Fuoss, "this electrical lopsidedness gives us an atomic handle we can grasp with the electric field. We can reach inside a solid or liquid and move its molecules around. Then, by measuring their resistance to the force we apply, by studying the speeds with which the molecules respond, by investigating the effect of temperature on this response, we can learn many things about the shapes and sizes of the molecules.

"This information, in turn, gives us a model on which to base the internal mechanics and hydrodynamics of matter. At first glance these are primarily subjects of academic interest, but they have a definite bearing on practical problems."

Many of the plastics which have come into such wide use in recent years consist of chains of atoms, called "polymers." Though the entire molecule may consist of hundreds of thousands of atoms, the separate links contain relatively few—a dozen or less. Some of these links are unaffected by the electric field, while others are polar, and they respond. The entire enormous molecule is too big to move as a whole but, when an alternating field is applied, the separate sections move to and fro. The molecule wriggles like a centipede with St. Vitus Dance. Actually, however, the chains are never stretched out at full length, but are snarled up like a ball of twine.

These polymers are important as dielectrics, used either as insulating materials or in electrical condensers. Their resistance to wriggling causes heating of the dielectric, which means a waste of cur-

✤ NEWS THROUGH THE PLANTS ✤

From The *Feminine Viewpoint*

By Hilda Barthold and Frances Krauskopf

This past week we happened to think of a story which we read once upon a time—a story which we think is self-explanatory. It was called "Portraits of Women."

The author of the story one day found himself in a company in which there were also four women: one of eighty, one of sixty, one of forty, and one of about twenty; the woman of forty was aunt to the woman of about twenty. As the gentleman circulated—as all men will—he approached the gal of twenty. She was all a-twitter. Said she, in effect: "What do you think of my aunt who acts as if she were a gay young thing in her teens?" To which he replied, with a smirk: "Those are pleasures meant only for the young and beautiful like you!" Then he drifted on to the aunt, who said to him: "What do you think of a woman of sixty spending more than an hour in getting dressed?" To which he replied, with a smirk: "Lost time—wasted energy; one must have such charms as you possess to think of doing that!" With malice in his heart—he was a cynic of the first class—he went to the woman of sixty and, to quote him, pitied her in his heart when she said to him: "Could there be anything more foolish than this woman of eighty putting light ribbons on her dress?" (Can't you hear the scorn in her voice?) "She wants to be young, and she succeeds in making herself childish." Said our hero to himself, with a smirk: "Oh, good heavens! Why do we always see the foolish and the ridiculous only in others?"

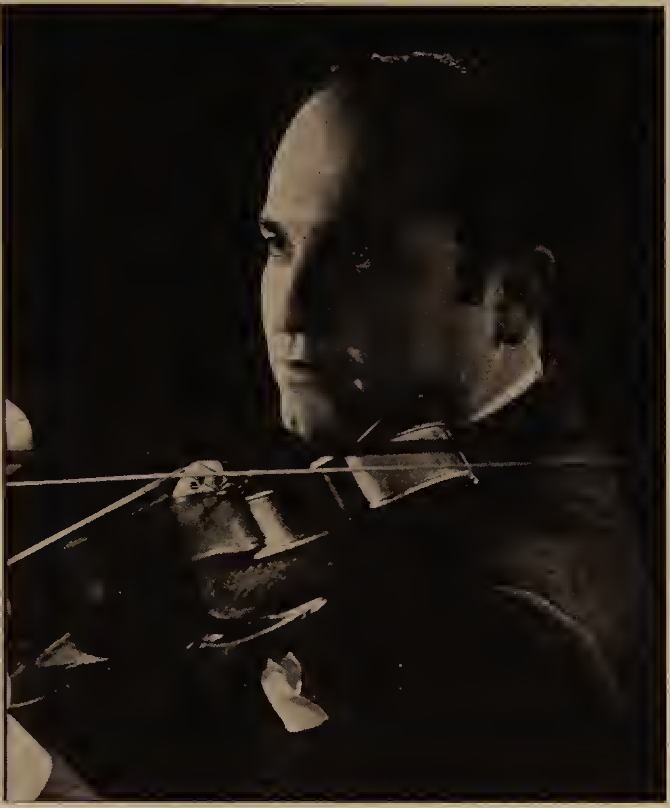
The story was written by a Monsieur Montesquieu, who is a Frenchman, which accounts for some of the peculiarities of the story. But M. Montesquieu had the right idea. We women might be more charitable. If someone wants to wear purple flowers on a scarlet blouse, it really isn't a matter of life and death—in fact, it shouldn't concern anyone but her. If she is happy, that really is all that matters. And maybe she is fortunate because she doesn't worry about trivialities.

Clothes, the latest hair-do, a shade of nail polish just a wee bit lighter, etc., after all aren't so important as the high-pressure stores would have us think. It's the person who counts most, or at least should count most. When you can come home after seeing a friend, and say honestly to yourself that you don't know what she was wearing, you have triumphed over another of the major worries of life.

And while we're in a reforming mood, our gentleman friend of the story gives us another starting point. If you noticed, as he went from one of the women to another, he always had a smooth, oily, flattering remark on the tip of his tongue—and he didn't leave there! He'd probably call his suave flattery diplomacy; we'd call it hypocrisy. But be that as it may, flattery is an art which few people can practice so well as not to be detected. So it's usually a much safer practice, as well as more charming, to be sincere. Remember that old saying:

"Oh, what a tangled web you
weave
When first you practice to
deceive."

Rubinoff And His Violin



Rare indeed are the famed people of our time who, in being presented to an audience, have an inanimate object linked to their names. Almost always it is just Arturo Toscanini or Lawrence Tibbett or Somerset Maughan. Yet "Rubinoff and his Violin" are the words that will introduce this famous violinist-conductor when he appears at the G-E Club on December 10 in a concert of popular music under the auspices of the Elex Club.

The unusual thought of an inanimate object being given mention, and more especially in the field of entertainment, is evidence enough of the importance of this instrument.

Rubinoff's violin is of supreme importance today—for there have been but four in his 25 year career. The first cost his mother exactly $1.75, the fourth is insured for $100,000.

Working hard on his first violin in Europe, Rubinoff finally won a place in the military garrison band and a scholarship to the Royal Conservatory at Warsaw. At 14 he embarked for America with his second instrument, a Klotz worth $500—the gift of his old teacher and still treasured.

The Klotz served him well, introducing him into his professional career in America. It carried him into the middle-west where he spent years in study and performance in Minneapolis and St. Paul.

With the first rays of success he wanted a better instrument; his work required it. With the assistance of his employers who advanced him several thousand dollars he bought a Guadognini.

Then came the pride of his musical career . . . the "Strad". This violin bears the elaborately engraved coat-of-arms of the Romanoff family and the identification mark of its maker. A deep brownish-red lustre, it is perfectly formed, and even though its distinguishing marks make it impossible to resell in case of theft, Rubinoff has had it insured for $100,000.

This valuable instrument will be used in Rubinoff's concert presentation of poular music which will include his own original compositions and adaptations, music from his motion pictures and some of the lighter classics.

Thisa And Thata 19-5

I've been doing a bit of detective work on that "Baby Dumpling" and "Grandma" item and the way things have been going, I'm sure I'll have the answer by next week! Here's hoping! . . . If I had known that by having Mildred Werling's name in the NEWS would have brought her back to work so soon, I'd have done it a few weeks ago! Glad to see you're back, anyway! . . . Ask Ann Hershberger why she got off the street car and walked back home the other morning? Yes, we have another member of the "Forgotten Badge Club!" . . . Why was it that Hazel Burnett couldn't find her coat the other evening? Couldn't she recognize her picture? . . . So sorry I misspelled two names last week, it is Rice and Hertel and not Kice and Hertle! Excuse, please! . . . Ruth Harsch had a party for Betty Long the other night! Games were played and prizes won by Avinell Gailey, Margaret Honer, Connie Zollinger, and Annabella Dunlap. Others present were Veva Healey, Ruth Rosenberry, Helen Engle, Helen Weimer, Ethel Hoyer, and Sarah Chelf.

Badges do have a way of disappearing, eh Marge Taylor? One hour late isn't so bad though.

Employees' Store open 8 a.m. to 5 p.m. until Christmas.

M.B.A. PATIENTS

General Purpose Motor: Vena Baker, 1212½ Broadway; Leona M. Dennis, 2020 St. Marys; Estella Fagan, 1841 Broadway; Irl A. Goss, R. R. No. 2, Leo Road; Ezra Garringer, 3921 Buell Drive; William Hanley, 2510 Hoagland; Carrie Murray, 509 Locust St.; Helen Phillips, 2516 Hoagland; Clarence Pratt, 1304 McClellan St.

Transformer: Don Grothaus, 918 Schick; Norma McCullough, 2526 S. Calhoun St.

Winter St.: Matt Krebs, 224 E. Masterson; Crates May, R. R. No. 1, Fort Wayne; William Wiegman, R. R. No. 10, Wayne Trace.

Series and Specialty: Helen Ryan Leffler, 1109 Edgewater Ave.

General Service: Herbert Carman, 409 Brackenridge St.

Apparatus: John Dennis, 344 W. Berry; Irvin Koontz, 1115½ Broadway; Donald Mann, Methodist Hospital.

Magneto: Glen Cutler, 2315 Weisser Park; Mildred Frame, 3225 Thompson Ave.

Tool Room: Paul Menze, 2818 Bowser Ave.

Returned to work: Frank Neuman, Dick Mendenhall, Carleton Clem, Ellis McMullen, Margaret Kennig, Geraldine Smith, Robert Voltz, Christian Doenges, Joyce Lee, Eileen Gemmer, Mabel Lieberenz, William Closson, Ralph Dunlap, Betsy Beard, Mary Louise McMullen, Ralph Van Alsdell, Emma Meyer, Henry Fackler, Carl Miller, Gloria Prough, Tom Haviland, Roy Hinshaw, Catherine Bitler, Arthur Archer, Arthur Swain, Verna McMillan, Collette Furge, Martin Carl, Marjorie Dugan, Richard Wells, Harriet Augsburger, Loretta Taylor, Clarence Haskins, Harry Feaser, Albert Givens, Howard Conner, Lillian Bergman, Virginia Garrison, Paul Menze, Mildred Werling.

Left the hospital: Geller Graves, Ruth Nuttle, Iona Peffley, Maynard Norris, Herbert Ort, Vena Baker, Donald Mann, Marvin VanSkyock.

Sunbeams From 17-4

We have heard of people seeing pink elephants, but green eggs, well that is different again, and it wasn't only Bea Drummond that saw it, we all saw the thing.

Bob Bennett just hasn't got what it takes to get candy from the girls, twice last week they passed him up. You must be slipping, Bob.

Grace Koch is going to tell Santa Claus that Joe Jensen wants a new hair brush for Christmas.

Lavonna Lydy says that next time she is going to get up a little earlier so she need not come to work with part of her clothing on backwards.

Beulah Tumbleson and Wilbur Huff of Warsaw were married November 19 at Huntington. Later the young people will make their home in Warsaw, where Mr. Huff is employed by the Dalton Foundry.

Famous last words: "Outen the fire," Lydia Scheiman.

Thought for the week: Howsoever a man works to right the world, it will never be righted until he has first put himself right.—James Allen.

Granny.

Bill Fisher is the most persistent person imaginable. He still has not consented to having his picture taken. What's the matter, Bill, are you afraid you will make the screen actors jealous?

I hai been told that ye shouldna' cross your bridges until ye get to them. Perhaps our gude Uncle McWell said that. Anyway he could explain it better than I. Tae be sae wise, he must be very old, and in gude health. Being sae old, he must hai false teeth. Being sae healthy, he must drink lots o' water—but thats water under the bridge. (Hope thats subtle enough tae be worthy o' him).

But,—bridges—ye canna cross them 'till ye get to 'em. (Or until they come rushing at ye, like one did tae Cousin Colin on the way haim from the Bucket O Blood saloon, and he turned out for it.)

Weel, at least we can try tae make sure that there'll be a bridge there, even if we can't cross it now. One bridge ahead o' us is the change back tae civilian business when this emergency is over. But we can begin crossing it now. Here's what I mean. We build lots o' things for Defense today that will also be built for peace time service later. Fluorescent Ballasts, Motors and Generators of all sizes and shapes, Transformers, Plastics, are a few o' them. Also, lots o' things we are just developing now will be peace time products later. And then, more than ever, will COSTS be important. Lots o' smaller companies, who haven't time now, or can't get materials, will start copying our products then. It will be tough for us then,—IF—we don't get the jump on them in costs as well as design and quality.

How do ye do it? Weel, ye ken Sandy's answer tae everything—Cost Reduction—NOW. If we can find cheaper methods or designs NOW, we'll be ready THEN. If we can suggest dies, fixtures, or tools that our large production NOW can afford, we'll have the jump on everybody THEN. And THEN, when we get tae the bridge, we'll find that we're already half way across. (Don't forget, too, that by doing these things NOW, we're helping Uncle Sam, too, which is reason enough, sans bridges.)

Speaking o' this now, and then, stuff reminds me o' Colin the other day.

I said, "Now, a certain lad gets in my hair."

Colin said, "Then, he must be a louse."

19-4 Nibbins

Rosemary Smith has returned to work after spending her honeymoon in the Smoky Mountains. She had a surprise visit from Magdalen Hook and Mary Roebuck. . . . June Adams and Virginia Kaminitsas are afraid they'll soon be on the list of "left behind" since their boy friends' names appeared in the paper for being examined for Uncle Sam. . . . Margie Green ought to go in the beauty shop business during noon hour fixing other girls hair. From what we've already seen, she'd sure have a lot of customers. . . . Edith Roller spent a week-end as the guest of Lennabelle Arnold at the Muncie State Teacher's College. They attended a football game together. . . . Betty Frazier can hardly wait till her 19th birthday because she thinks she'll be old enough to get married then.

✚ NEWS THROUGH THE PLANTS ✚

News From 4-3

By "HERE AND THERE"

The men in Bldg. 4-3 are surely having their troubles these days. Art Brandenburger started the week off with reporting that some rat must have stolen his cheese sandwich of special variety. Well, Art believed it was a rat until he heard that Phil Tilford was eating one of this special make—"Eating it, and how!" . . . Wednesday, Marcil Gaut's wife came to Fort Wayne on bargain day to buy a new dress; but like all men, Marcil didn't think she needed any. Marcil was to meet her after work, but instead hastened home to Payne, Ohio, where he found everything very quiet on the eastern front. Then suddenly the phone rang and who was it but Marcil's wife informing him that she was still waiting at that certain corner. . . . Well, we are glad to inform you that Phil Tilford has the dishes all washed and that Little Wifie is back on the job again, so that is the reason for the big smile. . . . . . . We wonder why Byrl Miller made the remark, "I am almost ashamed to ask for an electric train this year for Christmas." Miller made the remark, "I am almost ashamed to ask for an electric train this year for Christmas." . . . The guests at the Noodle and Beef dinner given by Greba Rust on Saturday, November 29, were Lois Drewitt, Susie Jones, Charlotte Stanford, and Marjorie Hargrave. The main event was the self-recording machine. . . . Everyone is wondering why Johnnie Driver always speaks of his wife as "Dear Soul" here lately. Could it be Christmas is coming? . . . It is reported around Bldg. 4-3 that Anna Gaff, our candy lady, is taking a trip to Florida and that one of our Star Reporters is accompanying her on this trip. No wonder her mind has been wandering lately. Someone asked her for cough drops the other day and Anna, looking dense, said, "You mean those vanilla flavored ones?" . . . The men in Bldg. 4-3 are all anxious to know where Margaret Woodard gets those Dagwood sandwiches she has been mowing down lately.

Dyna's In The News 26-4

Wayne Smith of Bldg. 26-4 and Rosemary Coovert, Bldg. 19-4, were married Thanksgiving Day. Congratulations, Slim and Rosemary! Best of luck to you both! . . . What's this we hear about B. G. having backaches? Don't try and tell us it is from exercise, Betty, we know better. . . . Where have our days of chivalry gone? It seems that these days have changed hands in Bldg. 26-4 because it's the girl that gives up her chair to our "strong curly" he men now. Aren't you ashamed, boys? We all hope you like your new chairs, though. . . . We wonder if Dortey, Bldg. 26-4, is practicing his high jumps for the spring session. We saw him doing the jumps very neatly one night last week! Keep up the good work, Dortey—and Dortey, are you going in for roller coasting, too?

Willard Hull, Bldg. 4-3, has a new musical instrument, as yet unnamed, which he plans to turn loose on an amateur radio program in the near future. He will play the finish of the Unfinished Symphony as his initial offering. All of us are anxiously awaiting this event, so it had better be good.

To Make War Planes Fly High

These are airplane turbosuperchargers, now being turned out by the hundreds in General Electric plants to meet the needs of Uncle Sam's fighting air forces. Superchargers feed extra oxygen into the engine's carburetor, maintaining sea level atmospheric pressure at altitudes of five miles or more.

Without a supercharger a 1000-horsepower engine would deliver less than 400 horsepower at 25,000 feet; with one, the full power. Superchargers are of two types. One is gear-driven by the shaft of the engine. The other is the turbo type shown. This operates on the exhaust gases of the engine which turn a small turbine connected to a compressor or impeller which forces the air into the engine.

General Electric is building two additional plants for the exclusive manufacture of superchargers which will add more than 500,000 square feet of floor space.

Hermetic Motors 17-2

I wonder what Helen Crabill has on her mind these days! The other day she wrote out an order for "one pair of ghost skin gloves". It's a new one on us.

Recently the girls in Bldg. 17-2 office entertained for two of their former associates at the Berghoff Gardens with a dinner party. The party honored Mildred Spuhler, who was a bride on Thanksgiving Day and Helen Buuck who will be married during the Christmas holidays. Both girls were presented gifts from those present who were: Emma Sherbondy, Audrey Hickernell, Luella Franke, Merle Kirkpatrick, Dorothy Rinehart and Helen Crabill.

Dorothy Rinehart was honor guest at a birthday dinner given at the Oriental Gardens by the girls in the Bldg. 17-2 office. She was the recipient of a lovely gift for her new home.

For some time now George Langenberg has been promising to bring a rabbit to one of our girls. Don't worry, Merle, the season isn't closed yet.

We're very sorry to lose Jolly Jack this week. He will begin working in Lynn next Monday. Good luck to you in your new work, Mr. Clarkson, and we hope to see you back in Fort Wayne soon.

The boys in the north end of Bldg. 17-2 are patiently waiting for an invitation to a dinner. The main course to be a turkey on which Bill Mills sold chances. Wonder who was the lucky winner? Could it be he doesn't want to be host if he furnishes the turkey.

Suzy Sleuth.

Kitchen Korner

The month of November makes its exit into nowhere and leaves an impressionable record with us. Still in the midst of Indian Summer days and a mist of foggy nights we drift into December.

December! Marked with magic and with mystery, with gayety and gladness, and music, a medley of melody, carols in the sky, brassy-sounding bells, and noisy people, the continuous flux of traffic in a decorated down-town, all this and the great melting pot of humanity meditates on the one, gala day to come, feted with festivity to commemorate the birth of our One and Only Prince of Peace.

We add to the list of things new in our department, the incessant clatter and clang of the carpenters' remodeling, our streamlined, white wash machine, Nettie's name monogrammed on her pans and uniforms, dark-haired Ruth and Marie L. donning a new hair-do, Mary's escalloped oysters, a miscellaneous assortment of upstairs things brought down stairs, the oft-repeated "Oh, Doctor!" to our would-be-dieters, caught with their meal too high in calorie content, our new serving girls, Fran and Nancy, the look-alike auburn-haired twins.

The Kitchen Kid, Bldg. 16-1.

Information please: We would like to know of the whereabouts of the moose that none of us saw or tasted. It was supposedly caught by Joe Miles, Bldg. 19-5, while he was fishing.

Ruth Dehlia is reported to want a farmer. It's just our guess that she got the idea from Anna Johnson.

19-4 Night Owls

We always thought Ruth Moser knew what she was talking about, but the other night proved it a question. Ruth couldn't quite make up her mind whether shoes went over boots or boots went over shoes. Now, now, Ruthie, sit down and think it out. . . . If Harry Berry is going to provide peppers for some, he ought to give some to all. We like them too, Harry. . . . Hooray! James shaved, but he still has those chin whiskers or whatever you call it. . . . The girls in Small Lot section were so cold the other night. But then you can't expect to get warm if you don't turn the heat on in the radiators. . . . Oh, girls! They have the nicest fellow in Small Lot section. He's so young and handsome. . . . How come you don't have a system like some of the boys, Ed? Ed Bowser never can find a hanger for his coat. Tish tish. Find out where the boys put them. Then give them to the girls. That's a Boy Scout's deed. Are you a Boy Scout?

While perusing the columns of the Fort Wayne Daily Growl we happened upon this interesting item in the Lost and Found Section. Notice to all nimrods: Any one finding a lower set of teeth kindly return to Fred May, Bldg. 4-3, and receive reward. Freddie, while on a hunting expedition north of the city, became terribly annoyed due to the discomfort caused by his lower plate. Removing it, he placed it in his shirt pocket. Now there was a large hole in said pocket unbeknown to him. The result—exit lower plate, the loss not being discovered until his arrival home.

Is Zat So?

The gang from Bldg. 17-1 welcomed Walter Nix as he returned to work after serving in the Army for seven months at Camp Shelby, Mississippi. Walter can't keep his age a secret anymore, because now we know that he is over 28. Oh well, the Army's loss is our gain and we sincerely hope that you are back to stay, Walter. . . . We can't understand how that dog got through the gates without an identification badge, but we were glad that he found his way into our department as it caused a little excitement and broke the monotony. The dog took a special liking to George Mosshammer. George said that proved that he was a man's dog. "Curley" Sprague shared his sandwiches with the dog and John Simec furnished the dessert by purchasing a pie from the candy lady. After his lunch the dog even ate the candy offered him by Laura Haiflich. The dog seemed to approve of our gang as he hated to leave. . . . Oscar Schelper and Paul Geiger and families were the guests of Argend Denney recently. "Denney" was entertaining the children with some of his sleight-of-hand tricks. After several clever handkerchief tricks, Paul Geiger's daughter wondered if "Denney could make a cow give coffee." You had better study up on your Black Magic, "Denney." . . . The Bldg. 17-1 gang misses "Kenny" Szink but we wish him the best of luck on his new job at the Winter Street plant. . . . If you have heard that Mickey Rooney was working at the G-E now, don't be too surprised as it is none other than Donald Redding who could easily pass for Mickey's twin! . . . Have you seen Loyal Decker's red plaid cap? He is really going collegiate but it is regrettable that he doesn't have the physique to go with it. It has been suggested that "Decker" refrain from eating that Oh Henry candy bar every day, but suggestions along that line fall on deaf ears, as Decker admits that he is past the age of worrying about his waistline.

That is all until next week.

The Question Mark.

Gossip From 19-5

We wonder what the attraction is in Bldg. 19-5 for Don Lauer. . . . We thought Reba Boyer looked awfully cute in the hat she was trying on the other Saturday. Did you buy the blue and red hat? That's our favorite color, too. . . . What makes Doris Kleber blush so when her friend talks to her, or do those blushes come from the fresh country air. . . . From what we hear Rosemary Blust bought a new dress with gold tassels on it. That didn't happen to be your wedding dress, or are we too nosey. Anyway I bet it's nice if it has gold tassels on it. . . . We wonder what became of Ina Archbold and her chickens. We haven't heard a word about them for months. How about that pet rooster you used to have, Ina? . . . Jean Doan thinks it's awfully funny that she doesn't even get her name in the WORKS NEWS. Well, here it is, Jean. . . . Ruth Beulow and Virgil Smith were married Saturday evening in Trinity English Lutheran Church.

"I've got a dress that's blue green—more bluish than greenish," says Florence, Bldg. 26-2. "Hey, what color is that?" asks Dot Smith.

✣ NEWS THROUGH THE PLANTS ✣

Executive Assistant Attends Launching Of Indiana

Invited by Governor Henry F. Schricker of Indiana, J. W. Crise, executive assistant, was an interested spectator at the recent launching of the 35,000 ton battleship Indiana at Newport News, Va. Mr. Crise, by the governor's appointment, is vice-president of the Indiana Employment Security Division. The ship, which utilizes a considerable amount of equipment manufactured at the Fort Wayne Works, was christened six months ahead of schedule. Mr. Crise, who was accompanied by Mrs. Crise, was seated on the guest platform shown in the foreground.

Motor Generator Static

Birthday Greetings

Helen "Pinky" Parent celebrated anything from her seventeenth to her twenty-fifth birthday the first day of December and passed out delicious cake to all comers. While she did not mention which birthday it was we all are happy that it was her birthday, for after tasting that cake we could stand a sample every week. So we all say happy birthday "Pinky" and many more of them! And we do mean many.

An Error

Helen Hoelle, genial head of our central blue print station, made an awful error the other day. One of my spies reports that Helen went to the candy wagon, intent on the gratification of her hankering for pop corn. As she walked around the wagon she picked up a sack of what she thought was corn only to discover, almost too late, that what the sack contained was not corn but "chawing" tobacker. We feel it is well that she discovered this error in time to make an exchange, for it's hard to imagine Helen with a large lump in her cheek and a cuspidor on the floor beside her.

New Fad

The best news item in the Apparatus Section and the hardest to keep out of print is "Pappy" Archbold. That guy seems to have a way of doing something so different, so extreme, that one just feels obliged to mention it in our "NEWS".

This time it's ear rings. Yes, you heard me, ear rings. Reports are that Pappy borrowed a pair of those long dangling type from "Sammy", one of the girls, and was seen admiring himself with these trinkets applied to his ears. I've heard lots of girls express the desire to be men, but this is the first time I ever observed a man, by either word or deed attempting to copy the ladies. Or could it be a new fad?

House Warming

A group from the planning section held an informal house warming at the home of Mr. and Mrs. Carl Hartman on the Wallen Road. The evening was spent playing games, and all were fortified by plenty of food and drink. Toole acted as door man, and scared as much as seven years growth out of some of the boys. Pappy Archbold remarks that, "He, Ray Moore and Jerry Frye were not there because of choir practice," while he explains, "Shultz had to buy groceries."

Otherwise than these four the group was there whooping it up. Everyone had a swell time and are waiting for another invitation to visit the Hartmans.

Hi, Suckers

How the wise have tumbled. Yep, John Kaade sold a "G. E. Washer" to John Rogers, Jerry Michaels, Bill Meyers, Viola Schwartz and Pappy Archbold for ten cents a chance. When John started talking about selling these chances Rogers and Meyers begged for theirs, yes, literally begged.

A little sales talk was required with Schwartz and Archbold but they finally parted with their dimes and as luck has it, each of the four won a washer—one of scrap washers of the plain steel variety—but a G. E. washer. Hi, suckers.

Saying of the Week:

Jerry Frye remarks, "Thrift is not being miserly, it's just good management."

19-5 Office Chatter

Ceiling zero, so Bill Winner had his lights on and they stayed on. . . . So it was the street car at noon. . . . An S.O.S. tapped out—Leo Didier was in distress. "Broken suspenders" came the frantic call. Now we know what Leo needs for Christmas. . . . Virginia Winegart is having a time making up her Christmas list—of all things she wants a "case of coke" . . . Louisa Haugh and Ann Pressler are still true to their alma maters even to the extent of colors in clothes. . . . Esquire is now begging for the services of Hubert Meyers when he started the "keep the gravy off your tie" campaign, and now he has two followers of the great organization "Gravy Lovers." . . . Wonder why the office has not been invited to see the wonderful volleyball games. . . . Kathryn Hepker's mouth was just watering for that steak dinner Lorinda Beyerlein was setting her up to—but lo and behold a high number came forth—no steak.

Mel Kessner borrowed Art Brockmeyer's rabbit hound to go hunting recently and accidently shot the dog in the leg. After having the veterinary remove the buck-shot, Mel returned the dog and has been buying soup-bones and hamburger to feed the dog while he is recuperating. Mel says that from now on he is going to stay home and buy the soup-bones and hamburger for himself. What, no rabbit?

Christmas secrets are leaking out already. Some one saw Fritz Bergman, Bldg. 4-3, at a local department store last Saturday asking Santa for a bottle of "hair grower." Be a good boy, Fritz; maybe you'll get it!

26-5 Tool Bits

Well! well! Earl Lenz finally got off to a bowling start. Where have you been the rest of the season, Earl?

Art Thieme, after being absent for a half day, returned chewing gum instead of that Kentucky Horse Shoe. Please explain yourself, Art.

It seems that several of the boys bit on the gag of ten cents for a chance on a G-E washer (you know, those round pieces of steel with a hole in the center): Charlie Bracht (The Indian giver) bought one from Johnny Lauer. Ross Vaughn bought one from Gus Rogge and sold it to Gus Wiedelman, who in turn sold it at one cent profit to Carl Ahlersmeyer. Al Holthaus gave twenty-five cents for three (½" G-E Washers). Even DeWayne Schele got ketched.

Russel Dunten tells us that he knows of one Christmas present that he will get. We won't tell Mrs. D, er we mean Santa, that he has been peeking.

Ralph Steward spent a quiet week-end at home in the basement making sawdust with that new saw that he just bought.

Kenneth Sefton reports for work earlier since he has moved farther from the shop.

Earl Brandon borrowed a street car pass last Friday just before he got to the car, then got on the car and paid his fare cash. Something important must have happened to make him forget so soon. What was it, Earl?

Reuben Riker reports that he is nearly all in from bringing the cows from the back pasture at 5 a.m. They always go to the farthest corner of the farm when you can't see for fog, says Reubin.

Our little, agile Carey (Cyclone) Baker really crashed through the other day—and we mean crashed, when he gingerly lifted the gallon jug of Blue Vitrol and tapped it for a tune. Alas and alack, the bottom came out. Carey's shoes, apron, and pants were blue. His neck, ears, and face were very red. The jugs can't take as much of you as you of them, Carey.

Since the price of meat has gone up, Dick Florent's carnivorous instinct will not be subdued. He seems to have an over-whelming appetite for ears. We suggest to the fellows that have to work around him to either buy him some "pickled pig's ears" or wear ear muffs.

John Ebert and Frank Druhot accomplished the impossible last week, winning six straight pinochle games. The opposition refuses to talk.

The Bridgeport gang wishes Cliff Clapesattle a pleasant vacation and plenty of game.

Gus Mittermaier is quite a conversationalist. His two aces in the hole are, "That punk car of mine and those tenths limits."

Chester Burgette claims that he is a hermit, but we saw him take six girls home from Bell's, Saturday night. How about that, Chester?

Dale Amstutz's famous last words: "Who stole my mics."

Eileen Stemmler, Bldg. 4-3, was seen last Saturday doing her Christmas shopping in the dime stores and enjoying it immensely. If she could only pass the toy counters without picking up the teddybears, dolls, etc., even the clerks wouldn't mind her coming in the stores.

A Tragedy

Tragedy has entered into the life of Al Topp, Bldg. 26-2. And it's all because of a dog, a hunting dog. It seems that Al is a hunting fan, and anyone who really is interested in hunting, is interested in hunting dogs. A hunting dog is a "must have" for a hunter. Al heard that down Kentucky way they raise good huntin' dawgs—the best that can be had. So Al packed up himself and his brother-in-law and he journeyed down to Kaintuck and got himself a dawg.

Full of the joy of living, one day he took his dawg and his gun and went hunting with his trained (supposedly) huntin' dawg. We heard nothing about the hunt, but when Al got home again the dog came up missing. So they started out to hunt the huntin' dawg. At long last they found him—found him in a farmer's chicken-coop flirting with the hens, eating eggs and lapping up the chicken's mash. With a drooping head and a lagging step, Al (who by this time was losing faith in the critter) got him out and started out for home again. But the dawg was elusive and got away again. This time night overtook them as they were hunting the huntin' dawg and they had to get a lantern to see by. They scoured the countryside, searching in the highways and byways. Finally in the last corner of a woods they found him—fast asleep in a fence corner, so full of eats he could hardly move. This time they got him home.

Al thinks he got gypped.

6-B Bits

The Rip and Rear Section crashes through with some news this week. Bob Ellington, our young aviator, also of the Rip and Rear gang, would like to join the U. S. Air Corps, but he hasn't had two years of college education. When asked why he didn't join the air corps in Canada, he replied, "I can't speak the Canadian language." . . . 'Twas a warm sunny noon hour that found Miriam Valentine strolling carefree through McCulloch Park toward the Lindley Avenue gate when lo and behold she remembered leaving her badge on her desk; was her face red when she thought of her clock card, too. . . . Ruth Franzdorf will have to tell Fred Lenz when she is trying to get Jim Johnson on the horn signal so he won't pick up the alarm clock on his desk and shake it, thinking there is something wrong with the alarm. . . . Willie Overmeyer and Virginia Drummond are spending sleepless nights thinking how they can improve upon last year's Christmas decorations. Frank Graffe, no doubt, will come to their rescue with some real ideas. We hope the apples and peanuts are again on the free list; also we would like to see the mistletoe hanging up again. We missed that last year. . . . Bill Eisenacher, who should know all about costs, was host to "the relation" Thanksgiving Day with a large turkey and all the trimmings. As proof of Bill's estimate of the folks' capacity, he was seen on market Friday night restocking the larder. Bill says there wasn't enough left for hash. . . . Harold Mettler's constant pride in his son's ability with the shotgun the last few years received a severe jolt last Saturday. It seems the boy bagged all the rabbits but one. Claim it's your fine teaching, Harold?

NEWS THROUGH THE PLANT

News On The Nose 4-5

A fine bunch of Beau Brummels we can claim in Bldg. 4-5. When the Works News photographer came up to shoot Erv Hott, Al Ray, Howard McVey, and Paul Hapner, not one of them could find a tie to make their pictures look unnatural. After much scrambling around and borrowing, they were outfitted. Now's the time to bring on some of those Christmas ties you wouldn't be caught alive in. . . . Ed Glusenkamp's pet complaint, "Why does Claude Roser always have to wait 'till I'm clear to the door before he calls me back to his desk?" It shouldn't happen to a dog. . . . Incidentally, Ed's the fellow who was asked to play Santa Claus at the Office and Foreman's Christmas party and answered, "Aw, who wants to sit around in long whiskers and pants all evening." Tsk, tsk, Ed, it's much more conventional that way. . . . Says Bill Beuman as he eats his second morning snack, "No, I'm not hungry, it's just a pleasant habit." . . . Blanche Allan is still feeling very foolish; it seems that they put a glass door up one night and the next day Blanche tried to plunge her hand right through. That's a rather messy method for putting mail in the tray Blanche. Try it and see. . . . Cleo Bunner and Park Schemehorn spent the week-end at the lake with some of the boys from Bldg. 4-1. Cleo reports that he more than broke even—while Park didn't play. Maybe that's why Cleo bought his wife a fur coat the other day. . . . Chicken in the Rough at the Yacht Club was the scene of festivities for a party honoring Helen Rumbaugh Welborne last Tuesday evening. Wedding bells rang out for Helen, Saturday, November 22. . . . Charley Schroeder and lovely wife, Betty, vowed eternal faithfulness on Thanksgiving Day. . . . We'll wager that Helen Moore will remember that the little blue and red button is to be worn all the time in the future. It's not so good to report at noon—or is it? . . . "Now I yamma man," say three pale youths after their first chaw of tobacco, but you don't feel so well, do you, Johnny Beals, Eugene Kiser, and Wilber Hinton? . . . The parting time has come when we are about to lose another chum. It's Evelyn Oman this time. Our every wish for good luck goes to you in your new home . . . Doris Garr spent the week-end in Virginia. Lucky gal. . . . They say that Jim Cox went fox hunting two weeks in a row and came back without seeing even a rabbit. Maybe Charlie Trey can give him a few pointers—or can he? Charlie has had the same pheasant feathers hanging over his bench for three years and as each hunting season comes around, he proudly displays them as the season's catch. "It's gettin' so we can't believe him," bewails Ernie Krom. . . . Tom Wilkinson's wife only packs four whole sandwiches in his lunch so he's always hungry. But if they all smell like the fish one we saw him eating, we quite agree with the boys that enuff's enuff when he starts bringing out onion, garlic, and limburger delicacies. . . . Helpful Harriett Storm decided to help the painter, Ted Waggoner, paint our new office. So—very, very helpfully she picked up his dusting brush and plunged it deep into cream-colored paint, which left poor helpless Ted speechless. . . . G'bye for this week and we'll see you all next week Thursday at the Office and Foreman's Christmas party.

Come single or bring a date;
If you're married bring your mate.

Winter Street News

We find that broken arm of Mart Thullen's resulted from trying to empty apple cider from a keg. The rumor states that while drawing from the spout, he dislodged the keg and it fell on his arm. . . . Pete Liebig and Roy Minser are wondering why the big boys don't razz anybody but them. Well, it could be because they are so small, then again maybe they can't take it. . . . A hawk (Frank Hawk) has been released from the dog house in order to "ketch back" a .00002 of an inch lost by Bernie English. Maybe he mislaid it in another pair of "mics". . . . Vic Cartwright "has got himself something." He states he can run his car on air and is willing to demonstrate to all doubters. His patent is pending too. You'll have to show us, Vic. . . . The next time Louise Schwartz and Joyce Harwood board a street car, they are going to get on at the same time. It's cheaper. While they were waiting, a car pulled up and Liz gaily tripped and deposited her token, got a seat and looked for Joyce. There she was outside, looking the other way and away went the bus. Liz rode two blocks and got off. Joyce caught the next bus and Liz boarded and deposited another token and there we are together at last. . . . Bill Franke just loves hunting, so the boys took him out last Saturday a.m. early. Bill works till 4:30. They picked him up at 5:30. Bill had his hunting clothes but no gun and no license. The farmer showed him a bed and Bill piled in. At noon he piled out and dug himself a mess of vegetables and gaily returned to town. Some hunting trip.

Plastic Flashes

Fashion Note: Latest in men's head dress is a beautiful oversea style cap of paper toweling adorned with wide strips of off-color brown fastening material (commonly known as sticky tape). Modeled only by appointment with Tom Cameron, Bldg. 12-3.

R. Lepper, Bldg. 12-3, says "To obtain that orange peeling skin try oak poisoning".

Nobody can get ahead of Mildred Bair, Bldg. 12-3. She celebrated Thanksgiving twice with a duck dinner.

Why was Alice Hahn's face red when Nora walked in the office and asked her where she put Herb Schwartz's lunch?

Grace Burris came back from Detroit with a woeful look on her face. Her other half underwent an emergency operation there.

Have you noticed how good the boys and girls are lately? We've got a sneaking suspicion its because Christmas is just around the corner.

Johnny Sowers returned from his vacation and showed the folks a deer tail. We're from Missouri, Johnny, where's the deer.

One of our boys in the service has been transferred to Denver, Colorado. We're speaking of Duane Duff. How is the wild and woolly west, Duffy?

Now that the pheasant season is closed, you should hear the boys talk about the ones that got away.

Jim Fleming is radiating happiness now that he can bet on his favorite "bang tails" again.

We have noticed that Betty Perry is the proud possessor of one of those sparklers. Good luck, Betty.

Politeness is to do and say the kindest thing in the kindest way.

So long,
The Tillies.

Receive New Assignments

H. C. Wiegman

A. L. Foellinger

The appointments of A. L. Foellinger as general foreman of the Dynamotor section in Bldg. 26-4 and Herbert C. Wiegman to succeed Mr. Foellinger as general foreman in Bldg. 4-5 have been announced. Mr. Foellinger has been with the Company since 1915 and has served in supervisory capacities since 1918. He was named a general foreman in 1920 and has served in this capacity in Bldg. 4-5 since February 1921. Mr. Wiegman began his service in 1911 and has served in the Fr. H.P. Motor Department during almost his entire period of service. He has served in various supervisory capacities during the past few years.

Reflections From Bldg. 4-1

Mistaken Identity

We are positive that Richard Graber has finally learned his lesson (much to his regret). Dick was walking down Fairfield Avenue the other day when he came upon a friend who was innocently walking down the same street and minding her own business. He decided to be playful and started to gently tug at the friend's purse, which lay tucked under her arm. The more he tugged the more she pulled the purse back into position. Finally when she thought that the fun had gone far enough, she turned around and glared. Much to Dick's dismay, it wasn't the friend that he thought she was. She was a total stranger. We know that Dick won't pull that stunt again for many a moon.

Sleuthing

Bob Neeb, the unsung hero of Bldg. 4-1, has the unofficial title of detective. We still can't figure out why—Bob was just about ready to make his departure from the Cafeteria the other noon, and he glanced around very cautiously to see if any one was watching him leave, as all good detectives do. He reached for his hat as he looked about and grabbed the wrong one. Bob says that it's a toss up as to whether he gained or lost the better hat.

Famous Last Words

Not those of Washington, but of Edith Williams, are: "I'll tell you, but don't you tell anybody."

So Long!

The girls in Bldg. 4-1 will say farewell to Shirley Trowbridge on Friday. She is leaving for Arizona. We wish you a lot of luck, Shirley.

Glorified Farming

The farming industry must be going down hill. Max Archbald and Florence Lemper went out to look at a used disc and ended up by throwing the dirt out of Mr. Temper's cellar. What a system!

Where to, Please?

Warren Harding says that the next time he asks to take a girl home, he's going to find out where she lives first. Is that right, Warren?

CHRISTMAS SEALS

1941
MERRY CHRISTMAS

Protect Your Home from Tuberculosis

Corn Out Of Season

From Bldg. 4-4 Office

Only 20 more days until Christmas and only 15 more shopping days. I wrote my letter to Santa and asked for an ear of corn. That's all I want besides a Buick, mink coat, radio, check for a million, and a pair of shoe strings. "Man wants but little here below."

The Christmas spirit is already edging its way into the Bldg. 4-4 office. The girls are having a party all to themselves on December 22, while the entire office plans one for December 20.

Speaking of parties, that was a humdinger the females had at Boerger's for the new Mrs. Cunningham. Everyone just ate and ate. We played bingo, then every one turned their prizes of kitchen utensils over to Pauline. We gave her a bee-youtiful card table, too.

The intelligent conversation winner for the week's Art Wedler. This conversation was overheard:

Art: "I'm just walking around in a trance today."

Mike: "Why, Art, I didn't know you could trance."

Art: "Well, I ain't no fancy trancer, but I can trance a little bit."

There's a new fellow running around the Bldg. 4-4 office temporarily. Charles Bray is his name. He's so quiet, though, I couldn't dig up any dirt about him.

One of the most important events of our office is the fact that Mary Hakes finally finished her murder story. It took her exactly three months to read it. The book was so fascinating she just couldn't lay it down for a moment.

For weeks the great mystery of Bldg. 4-4 was who has been cooking fudge in the office. We waited and waited for some one to pass the chocolate delicacy, only to find it's the rum and honey tobacco Bob Turshman smokes in his pipe.

Pinky Robb is limping around with a bandaged ankle. She must have been practicing for some Yuletide fancy prancing.

Denton Faye Manecke from Bldg. 4-6, we hear, received a very real mouse in an eye lash curler box. I'll wager he was disappointed in not finding a curler. A couple of people from Bldg. 4-4 deny knowing anything about it.

I refuse to admit knowledge of the case. I promised Santa I'd be good, and I do love corn—so much.

G'bye,
The Corn Bore.

Sleuthing In 4-6

M. G. Norris was brought home from the hospital last week, and he seems to have stood the trip quite well. We are hoping that it will be only a short time until he will be back with us again. . . . After a couple of weeks of healthful recuperation, Alice Nichens comes back to good ol' Bldg. 4-6 just as perky and lively as ever. Better take it easy, Alice. . . . There seems to be a contest in Bldg. 4-6 as to who shall have the floor. Our latest contestant, Chris Flanigan, was quite successful—at least for the moment. These chairs simply will not stay put, so it seems. . . . One morning last week, as Nina Andress was starting out on her way to work, she took with her one brown glove and one black one. Now it may be that she couldn't decide which color to wear, and compromised by wearing one of each. Or again, maybe she is trying to gradually become accustomed to the variety of colors and styles which the papers tell us the women will be wearing in the near future. . . . Dwight Willits is out again. Nothing serious, folks—just a tonsilectomy. You'll just have to become accustomed to his voice all over again. . . . The Bldg. 4-6 Birthday Club had a dinner party at the Bonnie Oaks on November 26. Helen Hardy, the guest of honor, was presented with a bottle of cologne as a gift from the girls. . . . Jeanne Nail certainly knows food value and the true cents of a dollar. Just ask Mr. Manochio if you don't believe us. . . . Florence Sutorius had car trouble last Saturday. After spending weary hours in the car, waiting for assistance, she finally walked to her sister's home, got her out of bed, and made her take her home. Better ride a bicycle, Florence. . . . Attention, everybody! The Order Service and Drafting Christmas party will be held at the Log Cabin on December 19. Be sure to be there, because a good time is in store for you.

Charley Penn, Bldg. 26-2, was really left in the fog Friday evening when he left work. Charlie was in a hurry to go home, so he hurried out to the parking lot and then Charley discovered that he had left his lights burning all day. He was still in the parking lot when the 6 o'clock boys left to go home. He had no luck in calling the garages, but finally one of the boys pushed him to get him started. He was happy, but late!

Deaths

The employees of the Series and Specialty Motors extend their sympathy to William Wallman on the death of his brother, Adolph Wallman of Grand Rapids, Mich.

NEWS THROUGH THE PLANTS

Uncle McWell Of 26-2

One of the most informative articles on the care of your hair and scalp that we've had the pleasure of reading is the one entiled "Hair Notions and Bald Facts", written by a Lois Mattox Miller upon the results of a series of scientific experiments by Drs. C. H. Danforth and Mildred Trotter at the Washington University School of Medicine. If you like to test your knowledge on quizzes and feel that you, too, are an expert, we have outlined a set of questions below, based on this article, which should give you a thorough opportunity to qualify as a first class dermatologist. If not, have a cigar, and wait for us in the lobby.

There are ten questions, each counting 10 points. A score of 50 or below indicates that, (1) you just don't give a hoot, (2) it's a lie! (3) the contest is fixed. From 50 to 80, not bad, brothers. From 80 to 100, (1) you must have peeked at the answers (2) a free haircut at the nearest barber college (3) why aren't you in the business? The answers are at the bottom of the article. Ah—ah there—wait until you've tried the questions first! In case of ties, we'll knot 'em for you.

1. Exposure to sunlight will raise a crop of superfluous hair.
2. Shaving causes hair to grow out thicker and more bristly than before.
3. Singeing "seals" the hair and prevents the escape of its "vital fluid".
4. Hair should be shampooed as seldom as possible.
5. Hair is not an independent structure growing out of the skin.
6. Each hair has a life from six months to four years.
7. Once the hair loses its color, there is no means known to science of restoring it.
8. Dandruff is actually only bits of dead skin, naturally shed.
9. Baldness can be entirely hereditary.
10. Brunettes have the highest hair count on their heads.

OK now, if you'll step into the next room we'll give out with the answers.

1. Ah, no. Prolonged baking in the sun has no effect on the growth, in number or texture, of the hair. Mmmm!
2. Sorry again. Microscopically speaking (sounds buggy, doesn't it?) the illusion of a stubble, when hair sprouts again after shaving, is caused by the changed ratio of the hair's diameter to its length. From steel bristles to silky beard with same face. (And it still ain't pretty!)
3. Nope. Only Chrysler has the sealed-in fluid. Each hair is a bone-dry Prohibitionist.
4. Not unless you don't mind the joys of having near-sighted robins trying to establish squatter's rights on your top thatch. However, their eggs are small and not very heavy. Gives one a sense of community responsibility.
5. That's right. It's not even a fraternal structure. Hair is simply another form of the horny layer of skin itself, growing up through a firm tubule, or follicle, from a tiny papilla (not to be confused with papoose) that lies deep in the corium, or body of the skin. What could be simpler?—besides the Materia Medica and our third cousin, Hanky.
6. You're right, that's right again. These many months spent by our slender friends, the Head Hairs, are the happiest in their brief but full lives. Getting curled up night after night, knocked down by brushes and combs, growing up to see the world only to be cut short, jammed under hats, electrocuted in permanent wave machines, soaked in hair oil—it's a wonder they stay with us as long as they do!
7. Yes—disheartening, isn't it? "Hair restorers' are no more than dyes, and as such are to be regarded with suspicion. The best thing to do about grey or white hair is to admire it.
8. No, sir. Not on your coat collar! That's a full fledged attack of bacteria. A plain tincture of green soap shampoo is effective. Persistency of attack is best met by a doctor's advice.
9. Yes. This is so sad that we'll pass on to the next answer.
10. They would, with 102,000 hairs, if it wasn't for the blondes with 104,000. Gentlemen may prefer blondes, but the barbers like the red heads best—only 88,000—practically bald, you might say.

Well that's all for now. We have to leave. Our barber just called and said that he has a dandy new "tonic" that is guaranteed to grow hair on a billiard ball. He doesn't know it yet, but we have a billiard ball.

Harriet Augsburger, Bldg. 26-3, suffered injuries in an automobile accident and is back with us with one of the "purtiest" black eyes you have ever seen.

Katy Bitler, Bldg. 26-3, our reporter, is back to work. 'Tis said she won't even look a spool of wire in the face.

The members of Bldg. 4-3 casting matching division held a mock trial one evening last week which was thoroughly enjoyed by all. Art Brandenburger, the accused, was charged with sabotage. Newton "Sherlock" Poland, our Scotland Yard operative, uncovered the damaging evidence. The culprit was tried in Judge Frank Kimble's court. Herman Doehrman acted in the capacity of prosecuting attorney and did a swell job; Buck Adams was state's attorney and, through a document written by Harry Parker, was able to turn state's evidence. Edward Smith was attorney for the defense; Joe Cochoit, as foreman of the jury, was quite impressive; Gerald Gehl acted as court reporter; and Willard Hull as court bailiff. The jury after some hours of deliberation found the culprit guilty, so Judge Kimble immediately sentenced him to serve from 5 to 20 years in Sing Sing.

The spirit of Christmas must be coming early this year. There must be something in the air to create that feeling of generosity that prompted Elva McMaken to buy sandwiches for two individuals in Bldg. 4-3. It is hard to understand though why one sandwich was devoid of that substance which when left out reduces a sandwich to two buttered slices of bread, while the other was so, so luscious and of such a quality that the eater deemed it necessary to fortify himself with a pill to insure digestion. The Christmas spirit manifests itself in strange ways and Elva has us worried.

Congratulations to Russell Waters, Bldg. 26-2, who is the father of a new baby girl.

Walter Niemeyer, Bldg. 4-4, attempted to pay a visit to Ezra Garringer, who was in the hospital recuperating from a tonsilectomy. Walter was told that Ezra was on the fourth floor of the St. Joseph Hospital, but you know Walter—anyway he ended up on the fourth floor of the Methodist Hospital, which if you know your hospitals, wasn't the same at all. Imagine his consternation.

New Appointments Announced

G. W. Auer

W. K. Williams

Announcement of the appointment of George W. Auer as supervisor of planning attached to the office of Planning and Wage Rate Administrator and the transfer of Mr. Auer's former duties in the General Purpose Fr. H. P. Motor Manufacturing Department to W. K. Williams is made by C. H. Matson, assistant manager. Mr. Auer will devote full time to new Fr. H. P. Motor Department products and Mr. Williams will serve as superintendent of Bldgs. 4-2, 4-3, 17-2, 17-3 and sections of Bldgs. 17-4 and 2-2.

Mr. Auer was transfered to Fort Wayne as superintendent of Bldgs. 4-2 and 4-3 after being employed several years as supervisor of planning and wage rate at Decatur. He is an Apprentice School graduate having completed the machinist-toolmaker course in 1929 and was then employed as a tool planner in Bldg. 4-1. During the succeeding years he was engaged as a tool and equipment planner, process or methods planner and in time study, routing and cost estimating work.

Mr. Williams is also an Apprentice School graduate having completed the machinist-toolmaker course in 1928. He was then assigned to wage rate work and later was transferred to the Specialty Transformer Division where in 1934 he was named supervisor of planning and wage rate. He continued in this work until December, 1940, when he was made assistant superintendent of the Specialty Transformer Division. In 1941 he was made superintendent of the Hermetic Motor Department when L. D. Hodell, who held that position was named superintendent of the new Supercharger Department.

Mothers Of Elex Members Invited To Yule Party

Rubinoff And His Violin To Be Major Attraction At Afternoon and Evening Programs

The annual Elex Christmas party will be held on Wednesday, December 10, 1941, in the G-E Club. The major attraction on the program will be a concert by Rubinoff, famed violinist of the concert stage and radio. There will be two performances, one at 1:00 p.m. for the girls working on the night shift, and one at 7:30 for the day girls.

Mothers of Elex girls who would like to hear Rubinoff's concert are cordially invited to attend the 1:00 o'clock performance only as the guests of Elex. Admission for mothers will be by special tickets, which can be secured from Elex contact girls by the daughters. Tickets will be given out with the understanding that they are for the mothers of Elex girls only, and therefore are not transferable. Elex has also invited all clergymen of the city, and their wives, to be its guests at the afternoon performance.

Admission for members of the Elex Club will be by membership card. These cards will be punched at both performances. All who are planning to attend are asked to be punctual, since no one will be seated after the beginning of the concert.

Christmas Distribution

Each year Elex distributes to needy families Christmas baskets which have been filled by Elex members. This year all Elex members are asked to give canned goods (fruits and vegetables) or staple goods, such as sugar, coffee, salt, and potatoes. If any girl desires to bring a toy, she may do so. All contributions should be brought to the Christmas party. Arrangements have been made to take the canned goods at the door.

After the evening concert, the regular Christmas party for the day girls will be held. Plans for the regular Christmas Party for the night girls will be announced later.

The annual ten cent collection, used to buy toys and the perishable food for the Christmas baskets, will be taken by the contact girls shortly before Christmas. All persons having knowledge of families who should share in the distribution of Christmas baskets please contact Irene Meyers or Mildred Harber on phone 555.

We are afraid that Sylvia Bowes, Bldg. 4-3, will have to go easy on those new winter togs or the boy friend just won't get any Christmas present.

Here's something new in birthday parties. In honor of the birthday of Thelma Oswald, Bldg. 17-2, Fred Geisler, Bldg. 19-3, put on his chef's cap and fried the rabbits, while Herman Wegman, Bldg. 17-2, entertained everybody. From all reports the rabbits were edible, and the entertainment was all right, too.

Gerry Habig of Bldg. 4-3 really needs a rear bumper to keep from just getting bumped around so much in the mechanism division.

News From The Camps

This camp is just a new one; it is located in a large swamp. The roads and walks are made with oyster shells. It sure is plenty muddy, but the climate has been swell until yesterday it got down around 60. This is a very damp climate.

The officers and non-commissioned officers are very nice. They get out and play ball with us on our sport day. We have one afternoon off each week for sports. They help keep the fellows more satisfied. We have a picture show close to the 35th Battalion and a P.X., that is Post Exchange, where we can buy beer, candy, tobacco, and lots of other things.

But I don't think it will ever take the place of good old Fort Wayne and the General Electric and all its activities.

Well I have to close and get ready for inspection. We have one every Saturday morning. They are getting more stiff as the weeks go along.

I want to thank you again for the WORKS NEWS. If I change my address I will write and let you know what it is.

Yours truly,

Pvt. Preston H. Hille,
Btry. B. 35th C.A.T.B.,
Camp Wallace, Texas.

Dear Sir:

I am sorry I did not write sooner; we are very busy down here at Camp Wolters, sir. I would like to keep on getting the paper you sent me.

About the camp down here—it is all right and everybody treats you good down here. It is the best training camp in the service and the officers are good to you too. We use the 30 c. machine gun and the 50 c. gun, the 37 gun, all big guns. We will take a 3-day hike December 21, will come back to camp on the 24th, three days later. Will be sent out January 5, don't know where we will go.

They give good eats; we go to bed at 9 when taps blow and get up at 6 at reveille. We can go to town and stay out till 12 o'clock and go out Saturday and stay till Sunday at midnight. Well, that's all we do in camp, so I guess I will close for this time. Hoping to hear from you real soon.

Pvt. Curtis Bowers,
Co. A 56 Inf., Th.Bn.,
Camp Wolters, Texas.

BULLETIN

Due to the Elex Club party featuring Rubinoff next Wednesday, the city-wide Basketball League, which is composed of G-E Club, Kuhner Packers, Essex Wire, International Harvester, St. Joe A. C., and the Zollner Pistons, will hold its games Monday, December 8 with the same schedule prevailing. Spectators will be admitted on presentation of their club cards.

Kimbals Engage G-E Club Sunday

Strong Defiance Team To Meet Locals In Invitational Basketball Game

Next Sunday at the G-E Club Gym, the General Electric Club basketball team will oppose the powerful Kimbal Aces five of Defiance, Ohio. The game will start at 3 o'clock with a preliminary between Small Motor and Waynedale, one hour before.

The Kimbal Aces team defeated the G-E Club in a very close ball game last year and the local outfit is out to take the Defiance boys into camp. The starting team averages slightly over six feet with only one Last year's game ended with the fellow under 5 feet eleven inches. Ohio five having a one point margin in their grasp so Coach Slack and Bob Kessens promise a very thrilling game.

Chide Weisgerber, Bob Vogel, Dick Sweitzer, and Dick Humbert are all veterans of the Aces for several seasons, while Bus Berry, Red Moore, Joe Ott, Jim Maag are all former Defiance high school athletes who have joined the team. Dal Winn, former Hicksville high and Palace of Sweets flash, is also a newcomer to the team.

Doctor C. W. Kimble is the sponsor of the Aces and he has already admitted that they are out to beat the Fort Wayne boys in a clean scrap. The Kimbal Aces have had some very creditable victories so far this season and they are eager to continue this pace.

Coach Slack has been grooming his boys every night this past week and he is almost certain that they will be in full strength for the game Sunday. The same lineup will prevail.

The Ace's lineup and heights are as follows: Red Moore, 6 feet 1 inch; Joe Ott, 6 feet 2 inches; Chide Weisberger, 6 feet 4 inches; Dal Winn, 5 feet 11 inches; Bus Berry, 6 feet; Dick Sweitzer, 6 feet 11 inches; Bob Vogel, 5 feet 11 inches; and Jim Maag 5 feet 10 inches.

Graham McNamee

(Continued from Page 1)

ar turning out America's vital defense needs and explains the amazing advances in machines, processes and production methods which are speedily making our nation invulnerable.

"Defense for America" opens with pictures of typical Americans in all walks of life—all enjoying the freedoms assured us by our form of government. As the story unfolds, we see this peaceful way of life threatened by the march of aggression and oppression overseas. Then we are shown how—out of the very freedoms which Americans cherish — grow the strength, the adaptability, the resourcefulness and the determination which make possible our swift and formidable preparations for defense.

"Defense for America" is produced by Paramount Pictures in collaboration with the National Association of Manufacturers. It is directed by Leslie Roush, Academy Award winner.

G-E Club Cagers Ready For Strenuous Season

According to the schedule arranged it is going to be a busy season for the G-E Club cagers, shown above. Top row, left to right—Slack, coach; Garton, Krieg, Staley, Braden, Wilkin, Hanley and Bob Kessens, manager. Bottom row—Shaw, Stemmlar, Marquette, Allen and Wickliffe.

ON -- the Alleys

By DICK KENT

Most of us dubs (I don't think Sunier has that word copyrighted) would be satisfied with a 200 count, but Walt Mertz, bowling in both the Owl and Inter-Department leagues, ran up two 700 series with games of 256, 199 and 278 in the Inter-Department circuit and a total of 721 in the Owl League.

In the Office League, Blue Print, Designers and Data Bureau are running 1, 2, and 3 respectively. Patterson ran up a 224, while Scherer, Kent and Peterson had 215, 204 and 200 in that order.

The Small Motors, Apparatus and Screwballs dominate the Inter-Department League. It seems funny that with the firemen bowling in this league that they would let Mertz burn up the alleys and get away with it. Last week's high series was, of course, bowled by Mertz, but the following had mere 600's: Somers 642, C. Rose 634, and Doehrman 616. Richard's 204, Mugg's 223, Dicke's 203, Ludeman's 200, Patterson 200, Seity 203, Ponsot 205, White 202, and R. Rose's 205 were the high single games.

Bldg. 17-4 leads the Small-Motor keglers, holding a two-game margin over their nearest rivals, Bldg. 6-B. Hazelett 625, Koch 620, and Reese with a 608 were the "over 600" boys last week. High singles were as follows, Burman 200, Patterson 209, Seidel 224, Daley 211, Kaade 209, Bodeker 200, Dewitt 211, May 205, Haver 203, Sheridan 212, Mullins 204, Haugk 204-208, and Townsend 215.

Lenz led the Tool Room League with a 619, while Steinacker with a 217, Redding's 202, Weber 209, Tennison 208, Franke 207, Houser 202, Steinacker 217 and Bailey's 201 were high single scores.

In the Elex Afternoon League "Tea-Time" or is it two-time, Click, Costion and Wiese had 179, 173 and 178 respectively,

Team No. 8 holds a five-game margin in the Apparatus League. R. Lawrence with a nice 697 count and O. Huge's 609 were high totals last week. Wyatt and Landis had 244 and 242 in that order, while Sitko, Schlink, Hanson, Busian and Merten were over the 200 mark.

The G-E Owl League No. 1 had four 600 bowlers, as follows: Putman 674, Gitter 619, Hitzeman 608, Mertz (again) 600. Cook's 207, Suelzer with a 224, Masters 202, Stark 222 and Blank 208 were high for single games.

Ten High Series—All Leagues

1.	Mertz	733
2.	Lawrence	697
3.	Putman	674
4.	Sommers	642
5.	C. Rose	634
6.	Hazelett	625
7.	Koch	620
8.	E. Lenz	619
9.	Gitter	619
10.	Doehrman	616

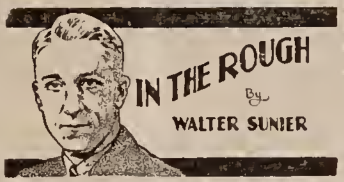
High Single Games—All Leagues

1	Mertz	278
2.	Lawrence	249
3.	Putman	248
4.	Wyatt	244
5.	Landis	242
6.	Koch	239
7.	Sommers	238
8.	Gitter	235
9.	C. Huge	234
10.	C. Rose	225

There are still some leagues who haven't turned in scores. Please turn them in at the G-E Club to Ed Yahne who will forward them to me. List any unusual shots or oddities and we will publish them.

Elex Second Shift Bowlers Hold Party

The annual Christmas party for Elex afternoon bowlers will be held on Saturday, December 13, at 12 o'clock noon in the Yacht Club. Sophie Bodigon and Mary Kay Armstrong are chairmen for the affair, which will include a gift exchange between members. Decorations in the spirit of the holiday season are being planned. Reservations must be in by Thursday, December 11, at 2:30. All girls who participate in the afternoon Elex bowling leagues are urged to attend.



IN THE ROUGH

By WALTER SUNIER

In the amount of equipment purchased, the sports rank:

Fishing, Hunting, Golf, Skating, Tennis, Baseball, Skiing, Basketball.

$40,000,000 is spent yearly on maintaining golf courses in the United States. 75,000 persons are employed. 2,162,000 golfers walked about 238,000,000 miles on golf courses which is equal to walking 10,000 times around the earth. What a lot of walking if you had to carry the groceries or the garbage.

This does give some indication of the vast sum that is spent each year on sport equipment alone. This does not include the amount spent in transportation, special clothing, playing fees, etc. Sports really rank in the big business class. They must fill a definite need in life or so many persons would not be willing to spend so much of their hard earned money in order to indulge.

Including 1940, there have been nine annual hole-in-one golf tournaments held around New York City. There has been an average of 580 players try to make a hole-in-one each year. During the nine contests only three aces have been scored and peculiarly two of these were scored in 1937. One was scored in 1933. Since each player takes five shots, there has been a total of 26,160 shots. Three aces places the odds at 8720 to 1 on your chances to get a hole-in-one. If you play 50 nine-hole rounds in one year there are two par three holes played in each round, you have 100 chances each year. On this basis you should get your hole-in-one after you have played 87.2 years. If you began to play after you were twenty, you had better sell your chances at a bargain price.

Owl Basket League To Start Play On Thursday Morning

Six Teams From Second And Third Shifts Employees To Participate

Six teams have entered into the Owl League which has just been organized by Bob Kessens, chairman of basketball activities. This league, called the Owl League, is made up of six teams of fellows who work on the second and third tricks. Mr. Kessens has appointed Dick Holmes, Bldg. 19-5, as league manager.

The six teams will play round robin style, meeting each other once to complete a half. There will be two halves and a champion will be declared for each half. The two winners will then meet in a championship game to decide the league champion. In event that one team sweeps both halves, that team will be declared the champion with no play-off necessary.

The league will open its schedule Thursday morning, December 11, in the club gym. The first game will start at 10 o'clock with the others coming at the conclusion of the first game. Three games will be played each morning.

Any fellows working on the second or third shift should report to the managers of their building or call Mr. Holmes in Bldg. 19-5. The league managers and the buildings they are in are as follows: Specialist, B. Van Horn, Bldg. 12-1; Aircraft, F. Bell, Bldg. 26-1; Winders, M. Cook, Bldg. 19-2; Magneto, H. Kiel, Bldg. 6-4; Generator, S. Fisher, Bldg. 19-3; Flanges, P. Hitzeman, Bldg. 4-2.

Rod-Gun Club Again Affiliated With N.R.A.

Re-affiliation with the National Rifle Association is announced by officials of the G-E Rod and Gun Club. Inasmuch as that it is only through association with the N.R.A. the club can obtain benefits from the Government, the notice of acceptance guarantees the club members a well-rounded out program. In addition to receiving aid from the N.R.A. the Rod and Gun Club through its affiliation lends its support to the national association in promoting rifle and pistol marksmanship.

Awards Approved

Announcement is made that the following outdoor awards have been approved by the N.R.A. and that medals have been issued therewith; Oral Emrick and R. Neale, rifle sharpshooters; E. J. Pion, rifle expert and Clifford Fell, rifle and pistol expert.

Marksmen may now work on their indoor qualification scores for medals in 1942. The military course will be shot indoors at the Armory range this winter instead of outdoors as in past seasons.

Opening of the competition season will be held in a short time with the Waynedale Conservation Club as the first opponent. The match will be open to all club shooters. All persons interested in rifle or pistol shooting are invited to attend the club sessions which are held each Wednesday evening at the Armory.

DECATUR SPORTS

Celtics To Play Decatur G. E.

The New York Celtics, one of the country's first professional basketball teams, will play an exhibition game in Decatur, Monday, December 8, it was announced today by George F. Laurent, recreation director for the G-E Club which is sponsoring the appearance of the famed pro team.

The Celts have been one of the outstanding attractions for net fans throughout the nation for many years, and in their appearance here next Monday will have three players who have starred on hardwood courts in all sections of of the country for many seasons.

The Celtics will meet the Decatur G-E Club team as opponents in the exhibition game.

The tilt will be played at the Lincoln School gymnasium at Fifth and Adams streets, and is scheduled to start at 8:30 o'clock. In the preliminary game, Decatur Casting will play Lima Westinghouse at 7:30 o'clock.

A low admission price of 25 cents, including tax, has been established for the outstanding exhibition.

The pro team will be led by Davey Banks, for many years one of the quintet's leading scorers. Banks is acting as player and coach again this season. Other veterans of many seasons are Nat Hickey, Birch, and McDermott. The Celts' lineup will be rounded out with Pelkington, Milkovich, and Johnson.

The Celts' wizardry in ball handling, passing and floor work, and their uncanny basket sniping from all angles of the court have long delighted and amazed net fans; and Decatur basketball enthusiasts are in for a real treat at this exhibition December 8.

Decatur Basketball News

The Decatur G-E basketball club after leading more than half the game found the going too tough and allowed the Castings team to come from behind and win by a score of 35-29. Clark was the big thorn in G-E's side registering 16 points. Baker was G-E's leading point getter with 13 points to his credit. The G-E boys seemed to miss the dependable service of Jackson, Hill and Braden and lacked some of their usual fire.

G-E now has 2 wins and 2 loses in league competition. Their next game will be with the McMillen Feed five.

SUMMARY OF G-E CASTING GAME:

G-E	Points	Castings	Points
Baker	13	Melchi	10
Blythe	6	Longenberger	0
Heller	0	Gaunt	1
Andrews	5	Bates	2
Chilcote	1	Fuelling	2
Smith	2	Clark	16
Richard	2	Painter	0
		Wendel	4
Total	29	Total	35

G-E Inter-Department League

Ray Leitz had a big night in the G-E Inter-Department Bowling League, registering 619 pins as he led the Switches to three wins over the Testers.

Maintenance also made a clean sweep of three games over Production.

SPORTS SPOTS

By STAN PRINCE

Basketball

Many interesting events have happened since the last writing but I believe the most important is the forming of the new Owl League under the supervision of Dick Holmes. This league will consist night with Transformer shading past Bldg. 4-4 by a close 20 to 17 score; Small Motor outshooting the Squares 33 to 22; and Main Office trouncing Wire and Insulation, 41 to 29.

The opening game proved to be the class of the evening as Transformer defeated Bldg. 4-4 by a slim margin of three poins, 20 to 17.

also, winning all three games from the Rotors.

200 scores included Leitz, 203, 217; Shackley, 223.

G-E Industrial League

Russ Woodhall once again led the bowlers in the G-E Industrial League rolling a 244 for high single and 613 for high 3-game series. The West End Restaurant ran roughshod over the G-E Ramblers, winning all three games.

The G-E Dodgers also ran into a stone wall; Burkes winning 3 for 3 mainly through the efforts of B. Keller who had a 225 in the second game.

Mutschlers won 2 from Doc's Place. Fred Ahr was Mutschler's leading bowler.

200 scores included: R. Woodhall, 244; Zelt, 204, 208; McDougal, 223; McConnell, 210; McIntosh, 203; Keller, 225; Hoffman, 208; Ahr, 209.

TEAM STANDING

	W	L	Pct.
West End Restaurant	18	6	.750
Mutschlers	15	9	.625
Burkes	13	11	.542
Doc's Place	11	10	.524
G-E Dodgers	7	17	.292
G-E Ramblers	5	16	.238

Doc's Place and G-E Ramblers have 3 postponed games to play.

of athletes who work on the second and third tricks and the games will be played in the mornings. The first game will start at 10:00 with two other games following at one hour intervals. The six teams that have entered are Specialists, Aircraft, Winders, Magneto, Generator, and Flanges. Good luck, fellows, and may the best team win.

The Kimbal Aces will appear here next Sunday afternoon at the G-E Club when they will engage the Club five. The game is open to the public and they are warned to get there early to get a seat. The Aces have a large, fast team and are certain to give the Club a lot of trouble.

Inter-department League is one week old but already they are shouting to stop the Main Office five. The office five is paced by Dick Kent and Paul O'Brien. Next Thursday they will meet the Magneto five and this clash is certain to be named as the outstanding game of the week. Transformer and Small Motor also looked good in their clash. In this league they are playing a round robin series with an elimination tournament being staged at the conclusion of the meeting of all the teams.

Table Tennis

Table Tennis has again proved a worthwhile sport as a record crowd turned out last Saturday to participate. Many upsets were registered and some of the fellows defeated the loop leaders with ease. Ceulin, Sunier and Hanna were all eliminated from the unbeaten class. If any more are interested in entering, they are cordially invited to come to the Club gym next Saturday afternoon from 1 to 5:00 p.m.

The Inter-department League opened its activity last Monday The game was close at all points until George Golden netted a cor-

Molecules Wriggle

(Continued from Page 5)

rent. Consequently the best dielectrics are those in which the wriggling occurs most easily, or in which the polar groups are entirely absent.

Dr. Fuoss discovered that the hotter the material, the more easy is the wriggling. But the response can also be varied by changing the size and length of the side arms which are attached to the backbone of the molecule. In making plastics it is usual to add a "plasticizer," which softens the product and makes it more elastic. Like heat, Dr. Fuoss has determined, this also reduces resistance of the molecules to motion.

He foresees materials with a wide variety of properties as a result of these researches.

"At present," he said, "the design engineer is forced to adapt a limited number of materials to a multitude of applications. The field of high polymers seems to suggest the possibility of designing matter with predetermined electrical and mechanical properties, much as the metallurgist now designs alloys with special properties for specific purposes."

ner court shot to sew things up for the Transformer five. Golden and Arnold were tied with top honors with five points each while Vonderhaar was high for Bldg. 4-4 with a like number.

Bruce Augsburger paced the Small Motor outfit to a 33 to 22 victory over the Squares. The game was close throughout the first half but when Small Motor began to play a fast break, the Squares were unable to hold up and gradually fell back. Augsburger was high point man for the evening gathering eleven points while Ed Langenberg had eight points for the losers.

In the final game of the evening Main Office handily defeated Wire and Insulation 41 to 29. Main Office held a lead of 14 to 5 at the end of the first quarter and Wire and Insulation fought back hard but they were unable to cut into the lead the office quintet had built up. Kent was high point man for the office by garnering eleven points while Zuber, Harp, and Bales each gathered in eight points for their efforts.

The summaries for the games:

Transformer	G	F	T	Bldg. 4-4	G	F	T
Golden	1	3	5	Anspach	2	0	4
Arnold	2	1	5	Warnement	1	2	4
Wiegand	0	0	0	Gemmer	0	2	2
Doerffler	1	0	2	Langas	1	0	2
Sitko	1	1	3	Vonderhaar	0	5	5
Foulks	0	1	1	Ummell	0	0	0
Collins	2	0	4	Latham	0	0	0
	7	6	20		4	9	17

Half Score—Transformer 9, Bldg. 4-4 8.

Main Office	G	F	T	Wire & Insulation	G	F	T
Love	4	1	9	Gardiner	1	1	3
Kent	4	3	11	Harp	2	4	8
O'Brien	4	2	10	Singer	1	0	2
Scherer	1	0	2	Parkerson	0	0	0
Imel	4	1	9	Zuber	4	0	8
Neidhart	0	0	0	Bales	4	0	8
	17	7	41		12	5	29

Half Score—Main Office 23; Wire & Insulation 15.

Squares	G	F	T	Small Motor	G	F	T
Langenberg	3	2	8	Wickliffe	1	1	3
Clugstone	1	2	4	Spencer	0	4	4
Hans	0	3	3	Augsburger	4	3	11
Hellenhal	0	1	1	Archer	0	0	0
Singleton	0	2	2	Gaff	1	1	3
King	1	1	3	Liddy	2	0	4
Edgar	0	1	1	Rush	2	0	4
	5	12	22	Braun	1	0	2
				Beager	0	2	2
				Harding	0	0	0
					11	11	33

Half Score—Small Motor 19; Squares 12.

Elex Bowlers Hold Annual Yule Party

The Elex night bowlers will hold their Christmas party at Gunnar Elliott's on Saturday, December 13, at 5 p.m. The program will include a gift exchange. Chairman Polly Ort and her committee, consisting of Merle Kirkpatrick, Ruth DeHaven, Charlotte Stanford, Marge Ponsot, Wilda Click, Edna Etzler and Helen Bleke, are planning novel Christmas decorations. The committee in charge promises a gay party for all girls attending. Tickets for the party are 75c and all reservations must be in by Thursday noon, December 11.

No Smoking In G-E Club Gymnasium

Officials of the G-E Club call attention to an edict which forbids smoking in the club gymnasium. A clause in the insurance contract covering the G-E Club building provides that smoking is not to be permitted in the gymnasium. The co-operation of all employees and their friends is asked.

"It's A Joke"

"Doctor," he said, "you've got to help me. I swallowed a quarter 25 years ago."

"Good heavens, man!" ejaculated the doctor. "Why have you waited all those years? Why didn't you go to a doctor the day you swallowed it?"

"To tell the truth," replied the tramp, "I didn't need the money at the time!"

* * *

A couple who had lived together in peace and harmony for 40 years attributed their success to an agreement made early in their married life. It was to the effect that whenever one of them started an argument the other was to walk out of the house until the arguer's anger had cooled. The man was the perfect picture of health, it was said, due to the fact that he had spent so much of his life outdoors.

* * *

A local church was making a drive for funds, and two colored sisters were bearing down hard on old Rastus Jones.

"I can't give nothin'," pleaded the old Negro. "I owes nearly everybody in dis here old town already."

"But," said one of the collectors, "don't you think you owes the Lord somethin', too?"

"I does, sister, indeed," said the old man, "but He ain't pushin' me like my other creditors is."

* * *

Athlete (boastfully): "I've had my nose broken three times in the same place."

Fair Coed (sympathetically): "You really ought to keep your nose out of that place."

* * *

Customer: "I warn you, I sha'n't be able to pay for this suit for three months."

Tailor: "Oh, that's all right, sir. Don't worry."

"Thanks. When will it be ready?"

"In three months, sir."

* * *

Someone wrote to Mark Lemon and asked for instructions in the writing of funny paragraphs.

Lemon replied: "It is not at all hard to write funny paragraphs. All you have to do is to procure a pen, some paper, and ink, and then sit down and write them as they occur to you. It is not the writing, but the occurring, that is hard."

B & T

GENERAL ELECTRIC NEWS

FORT WAYNE WORKS

Volume 24 FORT WAYNE, INDIANA, FRIDAY, DECEMBER 12, 1941 Number 95

To All Employees Of General Electric:

Last Sunday morning war came to the United States in a treacherous and unprovoked attack on the Hawaiian Islands. By that base act the enemy rekindled that unquenchable flame of resolution that burns nowhere else as it does in the hearts of free Americans. From that moment on no American was working for himself alone, but for the whole of our country, for the future of that country and of humanity.

Charles E. Wilson

The first and most natural reaction of each one of us to the awful impact of this event has been to act, to strike back in the full force of righteous anger and of our armed might.

But there are many ways of inflicting damage on our enemy, and of helping to hasten the inevitable triumph of our cause.

We do this when we perform the job that is our responsibility better and quicker than anyone else could do it.

Of course, there are taxes to pay, there are bonds to buy. But, above all else, we have to deliver to our own sons and our neighbors' sons the machines and equipment that will destroy the forces that have attacked us. That can be done only by doing more work each hour and each day than has ever been done before in any place in the world.

The skills and spirit of G-E men and women will be unstintingly devoted to the task before us. Seven-day-a-week operation of plants will be the rule rather than the exception whenever this will produce more weapons for those fighting on the front line for us. This is the job, the fighting job, for every one of General Electric's one hundred and twenty thousand people.

We know the job before us. We know that our cause is the greatest for which man has ever fought. Let us remember that our every thought and act is vital to that cause. We are producing for victory.

C.E.Wilson

The attention of all employees is invited to an important talk by President Charles E. Wilson to be given Sunday night on the General Electric Hour of Charm from 9 to 9:30 central standard time.

Defense Bond Campaign Offers Every Employee An Opportunity To Help Our Country To Victory

Several days ago, in his frank statement over the radio to the people of our country, President Franklin D. Roosevelt said: "We are now in this war. We are all in it—all the way. Every single man, woman and child is a partner in the most tremendous undertaking of our American history. We must share together the bad news and the good news, the defeats and the victories—the changing fortunes of war."

Yes, we are all in it. In the crisis which we are now facing, every citizen of the United States must do his part. We all, as loyal Americans, know that and are prepared to do our part.

Our Government requires huge sums of money to finance the sinews of our defense program. Some of the money for these expenditures is being raised by the sale of United States Defense Bonds, to which many of us have already subscribed.

These bonds give each person an opportunity to express his loyalty to his country, and to do his share as an individual in the gigantic struggle to come. They also give him an opportunity to provide for his own security in the future by investing, and saving his money with the best security in the world, namely the integrity of our own country.

The General Electric Company is now offering a plan to its employees whereby these bonds may be purchased through payroll deductions. Every employee of the Fort Wayne Works will be given an opportunity to purchase one or more Defense Bonds, through an organized campaign by a committee of employees. They may be purchased through weekly deductions of 50 cents per week or multiples thereof.

We all realize the vital importance of doing our part in this program. The employees of the General Electric have always gladly done what the need of the hour requires. The need now is pressing! Let each of us do his part!

• Defense Bonds Buy Tanks

THE TANK is to the Army what the tackle is to the forward line of a football team. It is the "break-through". Head-on, it crashes timber, houses, enemy fortifications. Once it has opened the way, the attacking force follows for the "mopping up."

The Nazis, using these great steel pachyderms which they produce in vast quantities, have been able to break through every fortified line in 14 conquered countries.

In America, the medium-sized tank is the popular size. A medium-sized tank weighs 30 tons. To make it takes as much steel as would be used in 500 refrigerators, as much rubber as goes into 87 average automobile tires.

The planning of a tank takes as great skill as a large-scale construction job. One recently converted automobile plant, faced with retooling for tank production, had to put 200 engineers to work in day and night shifts for one month, mapping out machinery requirements and plant layout.

To match the mechanical might of aggressor nations today, America needs thousands of these tanks. They're rolling off the assembly lines now. They cost real money. Every time you buy an $18.75 Defense Savings Bond or a 10c Defense Savings Stamp you give your country money enough to buy a vital part for another new tank.

NEWS FROM THE CAMPS

We publish herewith with great pleasure extracts of letters sent to us by G-E employees now in government service. Address all communications for this column to the WORKS NEWS editor.

Dear Sir:

I have been wanting to write to you and thank you for sending me my WORKS NEWS. It has brought me many hours of enjoyment and it has helped me keep in contact with the weekly happenings around the plant. I have been transferred out to Ford Ord, California, and it is rather different than what I had at Ft. Leonard Wood, Missouri, but I think I will be able to get into the swing of things around here pretty quick. Thanking you for sending me my WORKS NEWS, I remain,

Pvt. Frank F. Schultz, Jr.
Co. B 19th Engineers
Ft. Ord, California.

Dear Editor:

I want to thank you very much for sending me the WORKS NEWS and let you know how much I appreciate it. While in the Army, one knows very little of what is taking place out in civilian life. Also, while in civilian life, one knows very little about the truth in the Army and its activities. Very much of the news that the people receive is pure propaganda. There seems to be some propaganda everywhere, but that heard at the G-E wasn't in disgust. All of those working at the G-E or those who had worked there previously say it is a very good place to work. This goes for me also, and I hope to work there again in the future.

Army life about Camp Grant is probably a little different than what it is at most camps. About half of us are taking the regular basic routine while the other half of us are in special schools.

Those taking the regular basic routine spend about an average of one hour a day for drilling and spend the rest of the day in classes learning such subjects as anatomy, physiology, applying first aid, etc.

I was very fortunate in getting into the Veterinary Department This was the kind of a course I was taking in college. This may be one reason why I like the Army much better than I thought I would. I think, for a newcomer entering the Army, the best thing for him to do would be to choose something he has interest in and best qualified. My subjects are about the same as those of a medical student. We also cover very much on meat inspection.

I made my first trip through Armour's Meat Packing Company last week. Also we went through Chapel Brothers' Plant in Rickford. When food shipments come into camp, we look it over. After seeing all this food bought by the Government, I will say that we get the best of food. Here, we do have a little difficulty with the work of the student cooks, but they still do better than what I would.

I only have one more week of school here and then will be eligible to be sent anywhere. At the first of January, the Camp will move somewhere near Monterey, California. I sure wish I could stay with this camp.

So far as I know now, we will get a five-day furlough New Year's. During this time I hope to visit some friends of the G-E which I left behind. I have enjoyed the letters I received from them very much and hope they continue to write. While I was there, I worked in Bldg. 26-2.

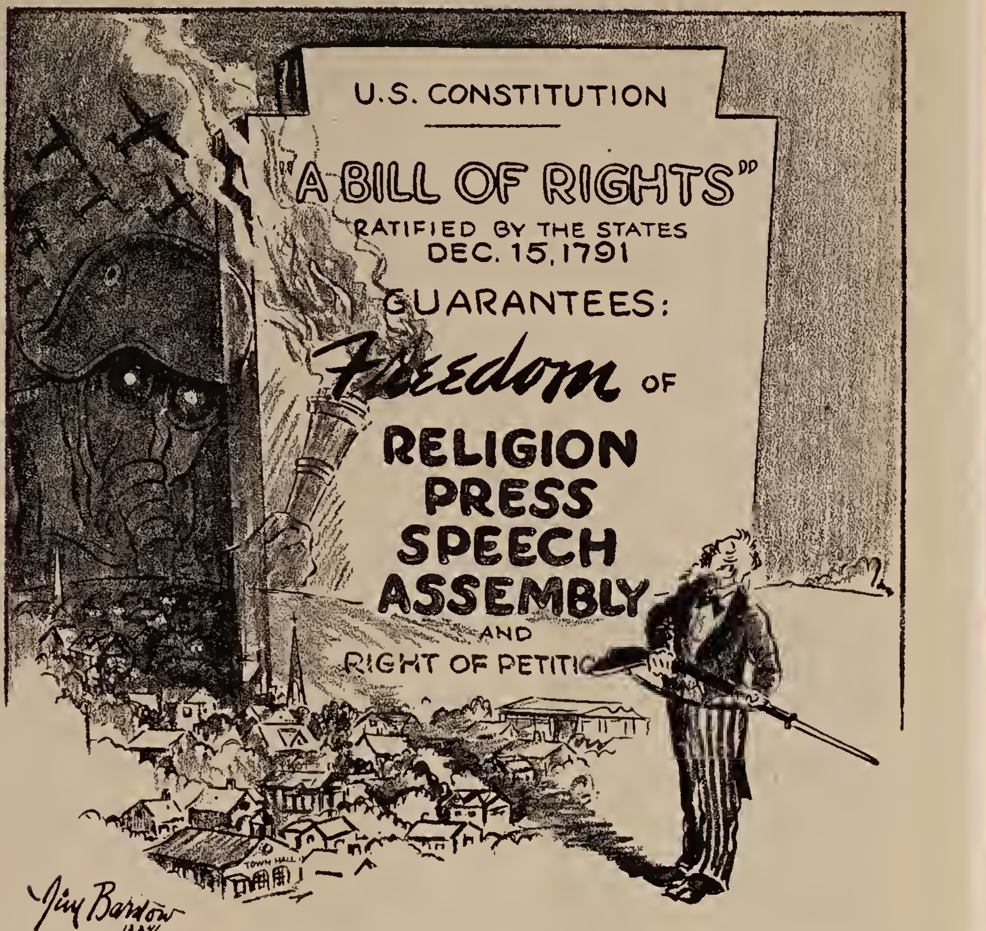
We have free access to athletics and amusements of all kinds. Have competitive sports with other camps and organizations. If the G-E Club Cagers would want a game with Camp Grant, I'm sure it could be arranged.

Our superior personnel are all very nice. All of them that I know are young doctors. We are told that this camp has one of the highest rates of morale than any other camp in the United States. If this isn't true, I can see that it should be nearly so from what I have heard of other camps. We all work together very good. Have won inspection honors three times and it takes cooperation to do this. It's surprising to see how many of us have changed our attitude toward the Army. Most of us by now have realized the purpose for which we are here and are out to make the best of it.

Again I want to thank you for the WORKS NEWS and I sure will appreciate it.

Sincerely yours,
Pvt. Herman L. Lung,
Co. B 26th Med. Trng. Battalion
Building 205
Camp Grant, Illinois.

WORTH FIGHTING FOR



Last week, when this cartoon was drawn, Artist Barstow had no more idea than you did that the nation would be at war today. His cartoon, drawn to commemorate the ratification of the Bill of Rights 150 years ago, could not have been more timely, in the light of events now a part of history.

With the clarion call to action still ringing in our ears, with the armed forces of the nation in swift pursuit of the treacherous enemy who sneakingly attacked everything the Bill of Rights stands for, with the gathering strength of 130,000,000 people, we in General Electric have also squared our shoulders again, taken up our belts another notch and are wading into our job of giving Uncle Sam the tools to fight with. We are redoubling our efforts. We are just as mad as anybody else about this business and we are doing something about it.

The shadow of the torch and bomb has fallen upon our heritage. We must help remove it . . . FOREVER!

Pay Station At G-E Club To Be Discontinued

In 1938 many employees were working on restricted schedules of work hours, which did not include Friday, the regular pay day.

As a matter of accommodation, the Payroll Department established a special pay station in the Employment Department so that pay drafts could be distributed to these employees without their having to go to their foremen.

Gradually many second and third shift operators also called at the special pay station for their pay drafts and eventually the special pay station was moved to the G-E Club building to take care of the increased volume.

The problem of insuring a correct distribution of pay drafts to the proper employees has become increasingly difficult.

Recent events have demonstrated that this method of distributing pay drafts is faulty and positive assurance of correct distribution is practically impossible.

Therefore, to protect the employees by insuring positive identification, the special pay station in the G-E Club will be discontinued after Friday, December 26, 1941. Thereafter, each employee will receive his pay draft from his own foreman, while at work.

Employees who are not at work on the regular pay day may contact the Payroll Department, Bldg. 18-2, where [illegible] being properly identified, they can get their pay drafts.

W. C. WICHMAN,
Works Accountant.

— REMEMBER PEARL HARBOR —

Defense Bond Campaign Under Way

Large Attendance At Club Christmas Party Expected

Early distribution of tickets indicates that the 1941 G-E Club Christmas party will probably set a new record for attendance. Figures at the present time indicate that approximately 10,000 children will attend the affair, which will be held on December 20, in the Club gymnasium.

Five programs will be held to accommodate the large attendance. They will be at 9 and 11 o'clock in the morning, and at 1, 3 and 5 o'clock in the afternoon. A limited number of tickets will be issued for each program to prevent crowding.

The tickets are being issued at the stand in the G-E Club basement and all employees wishing to obtain tickets for their children are asked to do so as soon as possible. To obtain the tickets it will be necessary to show club family membership cards.

Details of the program have not been revealed by the entertainment committee, the program being planned as a surprise for the youngsters. However, Chairman Paul Vogt announces that it will be one of the most interesting presented in recent years. For the information of the guests it is announced that Santa Claus will appear at each of the programs.

Free Movies Sunday

A free motion picture program will be presented at the G-E Club next Sunday, December 13. The shows will be at 2 and 4 o'clock. The program is free to all G-E employees and their families, admittance requiring only presentation of membership cards.

Suggestions Bring $2,200 In Awards

Two Hundred Forty Ideas Are Adopted During Period Of Six Weeks

Two hundred and forty ideas netted Fort Wayne Works employees a total of $2,200 during a period of six weeks, it is announced by the Suggestion Department.

Leaders in the latest list, other than those already announced, are: Max F. Fielitz, Bldg. 4-4, who received an award of $65.00 on his suggestion for changes to carboloy milling cutter grinder, and Grace Biedrzycki, Bldg. 26-3, who suggested changes to insulation to certain transformer coils, receiving an award of $60.00.

Awards of $50.00 were made to James J. Jewell, Bldg. 26-5, who suggested that special work tables be provided for die repairs; to William L. Fisher, Bldg. 17-1, who suggested changes to clip material; and to J. Ray Snyder, Bldg. 12-3, who presented an idea to cold form certain mica cones. Mr. Snyder's award is in addition to a previous award of $25.00.

Vern Gratts, Winter Street, received an award of $40.00 following his suggestion for bonderizing and painting evaporator supports, and C. Blair, Bldg. 9, an award of $35.00 on a suggestion to re-arrange piping on water tanks.

Three awards of $30.00 were made as follows: Pauline Baker, Bldg. 26-2, on a suggestion for improvements in finishing coils; Elmer H. Haugk, Bldg. 18-2, on improvements in material gate pass routine, and Robert F. Tieman, Bldg. 26-2, on use of tape to hold solder margins. An award of $25.00 was made to John Shanahan, Bldg. 6-B, on a suggestion for improvements in baking pre-nite washers.

Other awards ranging from $5.00 to $20.00 were made as follows:

Harold Stirlen, Bldg. 20-1; Cecelia Noonan, Decatur; Alfred F. Reese, Bldg. 17-1; Hugo Wengert, Bldg. 4-1; George F. Ely, Bldg. 20-1; D. D. Miller, Bldg. 26-1; Paul A. Studebaker, Bldg. 26-2; William Fisher, Bldg. 17-1; Charles H. Francies, Bldg. 17-2; Floyd W. Hapner, Bldg. 17-1; Ellis McMullen, Bldg. 17-1; Dorothy Parrot, Bldg. 26-3; E. Schrantz, Bldg. 20-1; Harold C. Fisher, Bldg. 17-1; E. W. Hesher, Decatur; Hugo Wengert, Bldg. 17-1; Albert E. Middaugh, Bldg. 17-1; Howard Fretz, Bldg. 26-2; James Stafford, Bldg. 17-1; William C. Bender, Bldg. 26-3; Harold George, Bldg. 17-1; Fred R. Boehm, Bldg. 17-1; Herbert Brockmyer, Bldg. 17-2; William Oberlin, Bldg. 17-2.

D. Long, Bldg. 4-2; Edwin G. Kortum, Bldg. 19-5; Mary C. Brown, Bldg. 4-4; Gayle Griffith, Winter Street; Barney Zuber, Bldg. 12-B; Raymond H. Bailey, Winter Street; John F. Wilson, Bldg. 4-4; B. J. Pearson, Bldg. 4-4; Clifford R. Schwartz, Bldg. 26-2; Louis F. Rosselot, Bldg. 4-4; Frances J. Fitch, Bldg. 19-5; Gerald E. Bosserman, Bldg. 12-B; D. D. Miller, Bldg. 26-1; Matt Krebs, Winter Street; Morris Gage, Bldg. 4-4; Angela Adams, Winter Street; Lillian Magner, Bldg. 4-4; Betty J. Hambrock, Bldg. 26-3; Frank D. Mann, Bldg. 4-4; Olka Johnston, Bldg. 19-4; H. Kurtz, Bldg. 19-4; Gerald O. Earlywine, Bldg. 19-4; Lorene E. Foltz, Bldg. 4-2; Luella A. Guy, Bldg. 4-2; C. S. Long, Bldg. 4-2; Charles Faulstick, Bldg. 4-2; Justin W. Heaston, Bldg. 4-2; Fred Alles, Bldg. 19-4; Olive R. Coovert, Bldg. 19-4; Carrie E. Menges, Bldg. 19-4; P. Baker, Bldg. 26-2; Ralph J. Begue, Bldg. 4-1; Louis C. Pfleuger, Bldg. 4-2; Don E. Wiedman, Bldg. 4-4; L. Schuster, Bldg. 26-2; Wayne H. Bellinger, Bldg. 4-1; Harry C. Berry, Bldg. 19-4; Gerald E. Bosserman, Bldg. 12-B; George F. Huber, Bldg. 12-B; Charles H. Gordon, Bldg. 4-2; Elmer Diemer, Bldg. 4-1; Joseph H. Hahn, Bldg. 10-1; Martin Carl, Bldg. 8-1; Erwin Richter, Bldg. 19-5; Floyd Wilson, Bldg. 19-5; Ralph C. Olinger, Bldg. 8-1.

Virginia E. Davis, Bldg. 26-3; Jesse W. Hahn, Bldg. 4-2; W. H. Wooley, Bldg. 4-1; Bruce D. Roger, Bldg. 26-B; Earl A. Meagher, Bldg. 4-1; Catherine M. Didrick, Bldg. 18-4; George T. Brown, Jr., Bldg. 26-2; Virgil Buchanan, Bldg. 26-3; Oscar Baals, Bldg. 26-B; William C. Bender, Bldg. 26-3; C. Clawson, Bldg. 4-2; Clifford H. Geller, Bldg. 9-1; John J. Hensler, Bldg. 26-2; Max E. Powers, Bldg. 6-B; Robert E. Hull, Bldg. 26-1; Richard W. Kent, Bldg. 18-5; Kenneth J. Petgen, Bldg. 18-B; Josephine Fogel, Bldg. 4-2; Martha J. Arnold, Bldg. 4-2; F. E. BULLETIN

Under the national emergency, as a plant protection measure, it seems inadvisable to continue our former custom of employees bringing packages into the plant. If it should be continued, it seems necessary that each package be left in the gate house for inspection.

Lack of facilities makes that course impractical, especially at this time of the year. Therefore, arrangements have been made with the G-E Club to use a room in the Club Building where packages may be left while employees are at work. An attendant will be there to assist employees.

Recognizing that this new regulation will interfere with the customary Christmas parties and Christmas exchanges, arrangements have been made whereby parties of this nature may be held in the G-E Club Building by making reservations in advance with the Club Manager, Ed. Yahne, Phone 742.

We regret this action is necessary, but trust that each employee will understand that we believe it is essential as one of the helpful insurance measures that we can, and should take, to protect the continuity of employment and production which is vital to our common interest.

M. E. LORD,
Works Manager

Bonds May Be Purchased By Payroll Deductions

Heads Bond Campaign

J. W. Crise

J. W. Crise, executive assistant, is manager of the Defense Savings Bond campaign which was launched at the Fort Wayne Works this week. Selected employees in each department will serve as solicitors.

Every Fort Wayne Works Employee To Be Given Opportunity To Subscribe

With J. W. Crise, executive assistant, as manager, the cam paign to sell Defense Savings Bonds at the Fort Wayne Works, is under way. Employees in all departments of the Works have been appointed solicitors and every employee will be given the opportunity to do his or her part in aiding our country in the present emergency by subscribing for the bonds.

It will be recalled that for the purpose of contributing full support to the government's Defense Savings Bond program, the company decided some time ago not to offer G-E Employees Securities Corporation Bonds this year. In their stead the amended plan whereby all may buy Defense Savings Bonds by payroll deduction is being offered.

Full information on the purpose and nature of United States Defense Savings Bonds will be given to all employees in the form of pamphlets which will be distributed by the campaign solicitors. Page 6 of this issue of the WORKS NEWS sets forth in a clear and concise manner facts about Defense Savings Bonds and every employee is urged to read this article carefully.

Why Buy Bonds

With our country at war the necessity for buying Defense Savings Bonds is obvious. Every citizen should invest in these Bonds for the safety of his own future. By doing so he will be lending his money toward the successful conclusion of the war, and will be helping to make our country strong and safe. He will be helping to keep factories running and men working—turning out fighting planes, bombers, battleships and tanks.

From an economic standpoint the investment is also thoroughly sound. As outlined in one of the pamphlets being distributed:

"If we try to spend all we earn today, inflation—high cost of living—will inevitably follow. This is true because our factories are busy turning out armaments and cannot produce all the things we would like to buy. Unless we save a good share of our income we will force prices up until we shall find it hard to get along.

"Billions of dollars are needed by the Government to pay for the ships, planes, guns, tanks and other armaments so urgently needed today. This money is obtained in two ways—taxes and borrowing. Unless we are willing to lend our money to our Government, the result will be higher taxes than would otherwise be necessary.

"When the war ends, a large part of industry will have to switch from the production of armaments to the production of peacetime goods. This period of readjustment will be hard on many people unless they have savings to tide them over. When the war is over, we must all be

✤ NEWS THROUGH THE PLANTS ✤

From The *Feminine Viewpoint*

By Hilda Barthold and Frances Krauskopf

Our Country is at war; naturally the question that arises in every American's mind is, "What can I do to help?"

In the days of Indian warfare, the pioneer woman stood by to load the rifles that the men fired. In modern warfare we perhaps are not called on for service as direct as that, but modern warfare makes huge demands on industry and we women who work at the General Electric Company are a part of industry. We may be called on to work long hours at tasks that seem monotonous and on products that may seem far removed from military use, and we can submit to these demands made upon us willingly and work as efficiently as our ability permits.

We can help by guarding our own health and so the health of the community, for a healthy nation is a strong nation. As well as physical health, there is mental health to consider also, the morale of the nation. This is maintained best, perhaps by living as normally as possible during trying days that lie ahead of us. We firmly believe that we can keep up the national morale by reading, hearing good music, even by seeing the movies.

We cannot keep keyed up to a high tension for an indefinite period, and a slump is apt to follow and it is then that the person, and the nation, who had resources within themselves is able to carry on.

These will be times to try men's souls, so let us so live and work so that we can truthfully say, "I have fought the good fight; I have kept the faith."

Reflections From Bldg. 4-1

We have heard of people stumbling over huge rocks and boulders and falling as a result, but we haven't heard for quite some time of a person falling down apparently over nothing. Gertie Kasimier had that novel experience last Friday. She was coming across the Fairfield parking lot, trying her best to beat ol' Father Time when suddenly she found herself down on her knees in the cinders and gravel of the parkway. When questioned, Gert said that she would have to admit that she fell very gracefully, if nothing else. Due to the rise in the price of silk, that fall cost her approximately $1.35. Mighty expensive falling, I'd say. We tried to find out what caused the fall, and finally concluded that it must have been a small pebble about a half inch in diameter that caused her downfall. . . . Jesse Bachelder has changed his form of recreation now that Christmas is practically upon us. He is now cleaning chimneys, hanging wall paper, and doing odd jobs of carpenter work. Anyone wishing to have any of this type of work done, please see Jesse. . . . Sam Stroufe grew tired of taking baths at home, so he took an oil bath at the shop on Saturday morning. How did the oil compare to the proverbial soap and water, Sam?

Ora Farrell, Bldg. 4-3, spent last Saturday hunting with a tom cat as Mascot or hunting cat. After tramping for hours he finally shot one rabbit and said cat ate Mr. Rabbit.

A Busy Forman, But Not Too Busy

Black Betty

(Picture of Dwight Jackson and Donald Poland in Bldg. 26-3)

. . . to discuss safety "appears to be the motto of Donald Poland, foreman in Bldg. 26-3, shown seated at the desk in the above picture, discussing safety with Dwight Jackson, recently appointed Secretary of the Transformer Division Safety Committee. Dwight is explaining a "brand new" safety stunt known as the "Black Betty" recently started in their Division. It is not the purpose of this article to explain "Black Betty", because you will soon be hearing a lot about her from employees in the Transformer Division. We all wish Dwight success in his new venture and believe he will find all employees "not too busy" to co-operate in preventing accidents.—H. L. Smith, Safety Engineer.

Winter Street News

Art Slane came in the other A.M. and pushed his tie at the watchman and nonchalantly strolled on until he was stopped. He couldn't see his button either. So home he went to hunt for it. Even then he couldn't find it, so he disgustedly jammed both hands in his pockets and "thar she was"; so back to work came Art . . . J. Murray is so busy watching the food at the Y.M.C.A. at noon, he picks out the wrong coat and even puts it on and wears it outside. We're all waiting for the day he comes out wearing a "pumpkin pie" derby. . . Wayne Cook evidently hasn't found out how to read road signs as yet. While attempting to go to Harry Chism's house in Waynedale, Wayne made the wrong turn and ended up in the outskirts of Roanoke . . . Shorty Redding, otherwise known as "Overstuffed" has quite a difficult time in trying to persuade his wife to please leave the radio off in his car. Nine chances out of ten, Shorty is seen pushing his car to the Winter Street G-E . . . Jack Herney and Clark Scheid leave their homes at 4:30 A.M. and return at 6:30 P.M. from a successful hunting trip—three little "wabbits" and probably all out of shells. . . The Winter Street girls had their annual Christmas party and exchange last Monday at the Old Fort Room at the Indiana Hotel. They all enjoyed a nice turkey dinner. The community singing was the high spot of the evening.

Theres' one thing Esther Croghan, Bldg. 4-3, especially wants for Christmas; and that's a Donald Duck.

Thru The Window Of 17-3

What in the world is a person to
do?
First it was news from 17-2.
Then came the column from 17-4,
And now alas, that is no more.
But I can still tell tales from 17-3,
Boy, I do get around, are you telling me?

Things we see in our new department: Charley Rice with his glasses on his forehead. Walter Kryder trying to find his way out; all of us gazing at the wonderful new windows.

We are almost certain that if none were looking, Vern Castle would ride the new conveyors, the full length of the floor, but wouldn't we all?

Edith Venrick is going to ask Santa to bring her a pair of roller skates, she sure could use them now.

Thought for the week: The secret of success is not in doing what we like, but in liking what we have to do.

Granny.

Decatur News

Fern Passwater attended the ice show at the Coliseum at Indianapolis last Friday.

Jack Teeple returned to work Monday after enjoying a two weeks' vacation in Florida.

Mr. and Mrs. Carl Smith motored to Indianapolis last Friday to see Sonja Henie and her ice show.

Ulysses B. Woods who has been a patient at the Veterans' Hospital at Indianapolis is reported as getting along as well as can be expected.

Punch Press 19-5

By Slug

Peace and tranquillity have reigned long enough in this department. In fact things are so bad that people are smiling in high or low glee. As this state cannot continue indefinitely, we might as well cast a dark shadow over the peaceful domain at once. Although many loud nays may be heard, it will do no good, as the green light is on. Having picked a staff of the best sprained brains, at large, and at a tremendous sacrifice to them by risking their reputations, we shall toss over the heavy anchor and yell: "Full speed ahead." John Figley as first lieutenant and John Putnam, (the chief caller-outer) have kindly consented to act as consulars, whose duties are to insert the needle when the thinking power is turned off. A full time job, we are afraid. Great things are expected from the staff (we promised to discontinue the rod) especially Senator "Hammer-Handle" who is indeed a learned man. So when we get under way, look out plus beware, for anyone who comes within or without our jurisdiction shall not be spared, up to and including O. J. himself.

Owing to the prelude which covers considerable acreage, we find ourselves short on space for news, so will just take a few little digs to feel out the opponents' power—How would you like to see "Heinie" Kammer "hot-footin'" it down the street after a delivery wagon. Picture him, if you can, with his hair flying wildly in the breeze, letting forth loud bellows at the top of every leap. That's just the way it happened, for the equipment that gets us through the gates was never meant to be dry-cleaned.

William P. Schultz made a drastic error in purchasing two boxes of aspirin because up to and including now, he has been unable to find the time to take one. . . . Our staff has advised us that "Pinky" Sordelet will be available at our special functions since the tomato season is over. I still don't believe that guy could can tomatoes. . . . Old "Bessie the boiler" has been acting up something fierce this week. In fact, she openly defied me, so thinks I to myself, as I grabbed a big hammer: "Ole girl, me and you are going to have a little talk," so we proceeded to arbitrate. I emerged a much wiser gent, for now I know just what ails Bessie. Bessie, you know, is the middle machine from the aisle and she is just lonesome for Louis Davis who is at present in the Methodist Hospital. So you sec, Louie, we are all united in wishing you a speedy recovery.

Be it known that reference to any person or place is purely intentional and we shall be more than unhappy to assume the responsibility thereof.

P. S. Ignorance is the most delightful science in the world because it is acquired without labor or pain.—Bruno.

Slug.

Walter Sunier sure got "In the Rough" with that worn-out typewriter of his. Looks like the putt-putt system with no stroke toward the cup. But what worries us is that Dick Kent uses the same system, but does not get so far with it. We hope it is not catching.

Where did Ruth Dehlia get that farmer idea. Bet it was from Ann Johnson.

Hoot Mon! Only a couple o' weeks left 'till Christmas, and Colin and I haven't finished our shopping. But it isn't all our fault. The ten cent stores hai been sae crowded.

Now don't laugh, (if ye did). The Ten Cent Store represents something in our modern age that I hai been trying tae tell ye about for a long time. It represents Cost Reduction on a grand scale. Years ago ye paid lots more for the same things ye now get for a dime. Without Ten Cent Stores there wouldn't be the tremendous outlets for all these goods, but without C. R.—there wouldn't be the things tae sell.

In other words, C. R. delivers the goods.

But getting back tae our shopping,—next year Colin and I are going tae do our shopping "Earlier". This year we tried tae do it early, but everybody already had the same idea.

Among other things, Colin wanted tae get a pet rabbit for Douglass. He knew a farmer who was selling out, so we went out tae look for a bunny-bargain.

"Now, here's a nice, big one", said Herman, the farmer.

"Hoot Mon", said Colin, Not that one! Douglass has never had over a nickel at a time. He wouldna ken what tae do with a 'buck'."

"Well, then", said Herman, catching on, "Here's some smaller ones. You pick out the size you want."

"Yus," said Colin, "I'll decide how much 'doe' Douglass should have."

Gossip From 19-5

Regmore Engeman has her stocking hanging up for Santa Claus already; from what we hear it sure is a whopper of a stocking. . . . Marie Page was seen kissing her own finger the other day. We asked her why she had to kiss it herself. Marie said she hurt her finger, and she was too far away for her mommy to kiss it. That's too bad, Marie. . . . Helen Meese made the remark that if and when she received a diamond engagement ring, she would treat her table with chocolate cake. Well, Helen came in last week with the diamond and chocolate cake. Did you think you would try out your baking on us before you tried it on Paul Ginder? Anyway, it was good cake . . . Ask Thelma Steeman what she is going to do with the washer she won the other day. We hear she is going to put it in the basement till she gets married. From what I've seen of the washer, it's going to be kind of hard to find in a big place like that. . . . La Von Campbell has just returned to work after two weeks down in Florida and Virginia.

It is surprising how the girls of the Small Lot Section of Bldg. 4-3 are going in for aviation. The latest one to succumb to the thrills of flying is Norma McCoy. She surely is all hepped up over it and plans to own a plane of her own in the near future. You do not suppose that the establishment of the U. S. Army Air Corps Base here has had something to do with it, or perhaps the girls are a little jealous of the boys out there and plan to show them up. Well, go to it, girls, for there is many a girl who is just as good at operating a plane as a man.

Left the Hospital: Frank Soule, Robert Lehman, Helen Berghorn, Ezra Garringer, Anna Bendele, R. W. Groot.

19-4 Night Owls

Famous last words:

Pauline Baumgardner: "You could have fooled me."

"Dimples" Waters: "Yes, dear."

"Cuddles" Ostman: "Naaaah."

Ray Loren: "I'll scream."

Wilbur Winchell: "Blub--blub--spfft."

Somebody ought to stop those fellows from that washer idea. Ray Loren bit—as did others. . . . Now, Ross, what's the idea of laughing 'cause some one bit on that washer idea. You didn't need to laugh so hard, did you?

Promotions In Personnel Department

L. C. Swager

R. E. Zook

The appointment of L. C. Swager as assistant personnel administrator, and the appointment of R. E. Zook to succeed Mr. Swager as supervisor of employment is announced by I. H. Freeman, Fort Wayne Works personnel administrator.

Mr. Swager graduated from Purdue University in 1917 and immediately entered the service, being enrolled in the first training camp. He was discharged with the rank of first lieutenant in 1918. He joined the General Electric organization in 1925 and was assigned to personnel work. He continued in this work during practically his entire period of service, serving as an instructor in the Apprentice School and on other educational activities. In 1936 he was made supervisor of employment and he continued in this capacity to the time of his present appointment.

Mr. Zook graduated from Purdue University in 1929 and entered the student factory training course. Two years later he was assigned to the Fr. H. P. Motor Division planning section and he continued in this work until 1936 when he was placed in charge of employment in that department. In 1938 he was transferred to the Employment Department in Bldg. 21 as assistant to Mr. Swager and he continued in this capacity to the time of his present appointment.

Sleuthing In 4-6

Dorothy Mueller has been displaying more pictures lately. If it isn't herself, it's the army. . . . Bob Groot, who has been taking treatments at the hospital, has been brought home. We send him our best wishes for a very speedy recovery. . . . Another proud father appears in the scene. Elmer Sherbondy has announced the arrival of a daughter. Congratulations and best wishes, Elmer. . . . We just can't understand Ruth DeWitt. A short time ago, she was running around here with a couple of cigars in her pocket. Now she tells us that she is getting a doll for Christmas, because she wanted one so badly. Figure that out if you can. Could it be that Ruth has a dual personality? . . . Once more we repeat the words, "Welcome to Bldg. 4-6." This time it is Doris Jacobs to whom we offer the assurance that we are very happy to have her with us. . . . We extend our sympathy to Martha Kimmell in the death of her father. . . . The girls of the Cost Department held their annual Christmas party at Gardner's Colonial on December 11.

Elva McMaken, Bldg. 4-3, surely has her troubles with her sandwiches. She really should not hide so many, and then forget where she hides them.

If you ever have Leora Carpenter over for a meal, be sure to have baked apples with raisins. She's very fond of them as long as the raisins don't have wings.

Lawrence Rickert, Bldg. 26-2, says vest buttons cause a lot of trouble and is surely for the abolishment of hair nets. A sudden straightening up, a vicious vest button, and there you have a tangle.

6-B Cellar Rodents

Sorry we forgot to mention Howard Brooks last week in the Bldg. 6-B news after having all the rest from the office in our column. We may be able to get a picture of Howard playing with a train after Christmas. . . . Freddie Lenz says, "I'm too old to join the navy, but I will join the Salvation Army." . . . We've found a new partner for Bill Walt's "escapades." Last year Bill almost got Jim Funk's shotgun at a bargain price. Now he's feeling out Harold Mettler on a rabbit-dog deal. Speaking of swapping technique, you should see them spar for a point. All they need is a couple of jackknives and a post upon which to whittle. . . . For some reason the girls in the Winding Section have kept their news items from your reporter, but since Christmas is approaching, maybe they'll loosen up.

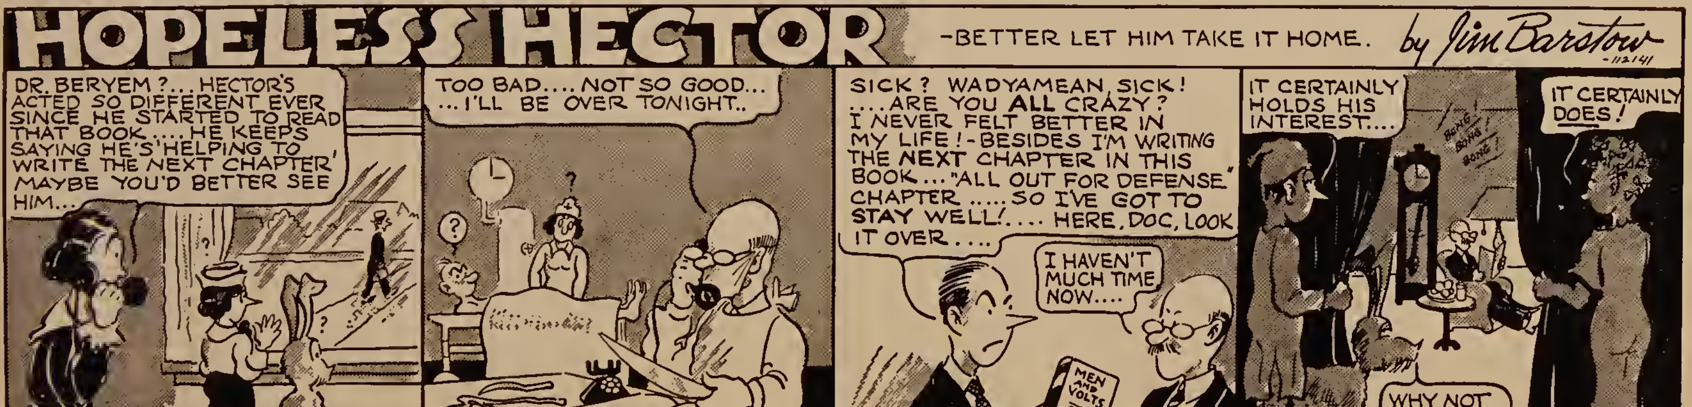
Thisa And Thata 19-5

I've heard that Glen Venz has had a desire all his life to be the owner of a brand new car, so at last his dreams come true—do you know where Glen's new car has spent most of its time? Not on the road but in a repair garage—me-thinks you had better trade it in on a good used car! . . . We can't imagine what Ann Hershberger was thinking of last week when she got ready to go home at 2:30. Someone should turn in a suggestion for a brighter light on the clock, maybe that would help! . . . Congratulations to Mr. and Mrs. C. Kleber on the arrival of a new daughter, Betty Marie! . . . Mildred Friedrich had a big surprise the other day when she discovered she had buttermilk for the girls' coffee, instead of regular milk. . . . Ruby Wall is on our sick list. We hope she is well real soon. . . . Too bad. "Baby Dumpling" and Grandma eluded me again. . . . Wonder if Mildred Wherling's trip to Chicago was too much for her; she didn't show up at work Monday morning!

Mary Uhlrick to Rosa Smith: "Say, Rosemary, you have a runner, 2, 3, 4." See Rosie, that's what you get for being in such a hurry, even to grabbing the wrong coat and going half way down the building before noticing it.

Ed Fiedler sure was surprised to have the whistle blow at 1 last Thursday. He knew he hadn't been working long enough to go home 'cause he had only been working for about 5 or 10 minutes. Guess he had mistaken the 10 till 1 whistle as the 1 o'clock . . . June Adams and Virginia Kaminitsas are happy all over again since their number 1's have been rejected. A happy day! . . . The pounding noise Mildred Wright mistook for being the Salvation Army turned out to be Arnold Greider pounding on a tray. And just as she had her purse ready.

Some one in the Small Lot Section of Bldg. 4-3 played a practical joke on Enid Grate. He or she placed a neatly printed placard on the back of her chair bearing the words, "Man Wanted." Naturally, all the boys flocked around her chair anxious to be of assistance and inquiringly asked what kind of work she had for them. She was somewhat puzzled, as the boys were quite persistent, and repeatedly chased them away. Finally, in a huff she got up and left her place of work, but upon returning discovered the sign. The result: An embarrassed Enid and a good laugh by all. Oh, well. All's well that ends well.



HOPELESS HECTOR
-BETTER LET HIM TAKE IT HOME.
by Jim Barstow -12/2/41
DR. BERYEM ?... HECTOR'S ACTED SO DIFFERENT EVER SINCE HE STARTED TO READ THAT BOOK.... HE KEEPS SAYING HE'S 'HELPING TO WRITE THE NEXT CHAPTER' MAYBE YOU'D BETTER SEE HIM...
TOO BAD.... NOT SO GOOD... ...I'LL BE OVER TONIGHT..
SICK? WADYAMEAN, SICK! ....ARE YOU ALL CRAZY? I NEVER FELT BETTER IN MY LIFE! - BESIDES I'M WRITING THE NEXT CHAPTER IN THIS BOOK..."ALL OUT FOR DEFENSE" CHAPTER .....SO I'VE GOT TO STAY WELL!.... HERE, DOC, LOOK IT OVER....
I HAVEN'T MUCH TIME NOW....
MEN AND VOLTS
IT CERTAINLY HOLDS HIS INTEREST....
BONG! BONG! BONG!
IT CERTAINLY DOES!
WHY NOT GIVE IT TO HIM FOR CHRISTMAS?

REMEMBER PEARL HARBOR

NEWS THROUGH THE PLANTS

Motor Generator Static

See "Doc"

Girls, do you want to preserve that perfect figure? Men, do you want to retain that he-man build that attracts the ladies and makes you the envy of all who see you? If you do, see "Old Doc" Dwight Myers, division editor of "Motor Generator Static," that uplifter of humanity, who has the interests of all men at heart. Rumor has it that "Doc" is developing a new elastic exerciser, which he guarantees will preserve that perfect form, that glamorous appearance. Ever the scientist at heart, Dwight is proving his exerciser to be perfect in every detail before releasing it to the public and while its construction is secret, we understand it has so far produced all the results he claims for it. For a living example look at "Doc" Myers and you will be convinced—or will you?

Fresh

It takes a lot of people to make up this world, some ordinary, some daring, some foolhardy. The latter group embraces people who look in gun barrels to see if they are loaded, try to pass other automobiles on the right side, talk back to a policeman and the "boss", or make remarks to certain people that may get their ears pinned back.

Take for example, the case of Mary "Butch" Lauer and Carrie Neuenschwander, our candy lady. If you know Mary and Carrie, you will recognize the latent explosive powers stored up in these two if properly mixed. The other day, according to reports, Mary went to the candy cart to buy some cake. Sez Mary to Carrie, "Is this fresh cake?" Replied Carrie, "Almost as fresh as I am." Quoth Mary, "My gosh, not that!"

Which proves that some people can skate on thin ice without getting wet feet.

Hero

Charley Strodel has proved to the world that he is the man of the hour, one of those people who appear in cases of emergency and soon have the situation under control. It seems that the elevator in Bldg. 19 stuck between the third and fourth floor imprisoning numerous fair damsels. Would they be forced to stay there, perhaps for hours? Not with Charley around—in his most dashing manner he dashed to the elevator and exerting his terrific strength (he eats spinach) began lowering the fair sex to safety and never ceased until the last girl was rescued. Remarks Charley, "Think nothing of it, nothing at all." Which proves that each situation produces its hero, usually the modest, unassuming type, even as Charley.

Lost

Most of you folks have heard of Jerry Frye, sayer of wise sayings. When the Apparatus office force moved to Duolo offices, Jerry started out to explore the building and was soon lost in the maze of corridors, rooms and floors of this building. After wandering for some time, entering places he should have stayed out of, he was rescued by a co-worker while attempting to climb into the dumb waiter, and returned to his desk where for an hour he waved his arms and muttered in his beard. Sure is bad to be lost, but worse to be found in a few of the places where Jerry was found.

Must Be the Weather

The other evening June DeWitt and Margaret Brower entered a bus bound for the down-town district. For some reason the gals seemed all a-twitter, could hardly wait to get down town.

When the bus reached Harrison street the girls pulled the stop cord and rushed to the exit, only to observe that this was not the transfer corner. The girls returned to their seats and were their faces red—even Margaret's hair was red. Which proves that if it was not a date that excited the girls it must have been the weather.

Saying of the Week

Jerry Frye remarks: "People say, 'What you don't see, don't hurt you',—did you ever sit on a thumb tack?'"

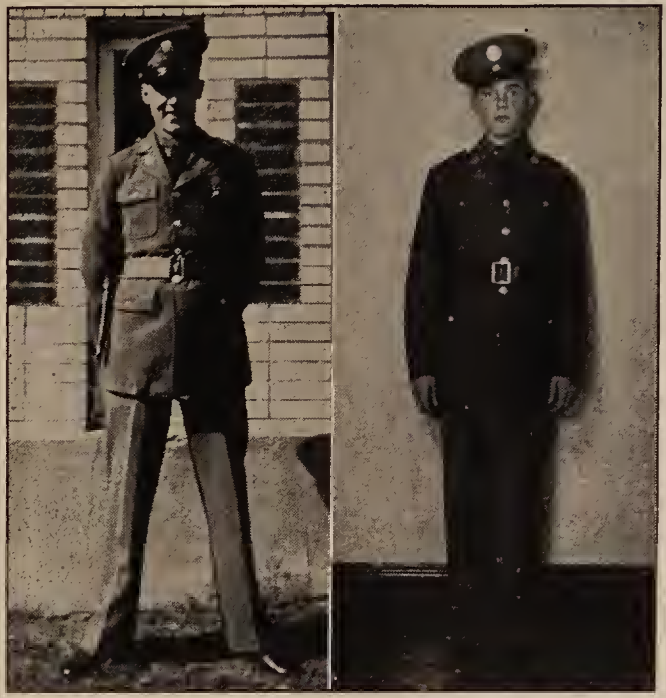
6-4 Magneto Mumblings

Things have come to a pretty pass when a man like Roy Crum begins to woefully lament that "Wedding Bells Are Breaking Up That Old Gang o' Mine". And no wonder, for among others, Paul Bodecker has recently deserted the "Magneto Bachelor Club" to become married. . . . Irene Schultz didn't have to tell us that her one and only had taken leave from his duties to Uncle Sam for a few days to come and see her, we could read it in her eyes. Those two little globes have their own way of revealing happiness. . . . Three cheers for the Magneto Department basketball team! ! ! We don't want to holler too early in the season, but the team does deserve credit for having won its third straight victory. Keep up the good work, fellas. . . . Our sides still ache from laughing at the sight of Ray Ankenbruck patting Bob Jefferson on the head and telling him what a good little boy he was. What Bob didn't know, but soon discovered was that Ray, the little angel, was all the while gently rubbing Persian Blue in Bob's hair. Bob was so "poitoibed" that he got even with Ray, he did. When Ray donned his hat to go home that evening, it was simply reeking with mentholatum. . . . Oh, joyous jingle bells, it's only a few days until the Magneto Department holds its big Christmas party at the Log Cabin. Everyone is going to oe there, including Santa Claus, doody, doody. Anne Perry is responsible for those lovely posters, and Bill Shuler has charge of tickets. . . . Our congratulations are extended to Gayle Stripe who has recently taken over duties as General Foreman in the Magneto Department. Best o' luck to you, Gayle. . . . Anyone reading this column intentionally, accidently, or just to pass the time of day, please take note: Howard Timms is out of matches again, and we would certainly appreciate any matches you might send him. We are getting tired of his eternal query, "Brother, can you spare a match."

The Hoosier Birthday Club of Bldg. 4-3 had a party for Amy Perry and Adeline Rebber at Florence Staniszewski's home, 3417 Bowser Avenue, which consisted of a pot-luck and gifts. The other members present were Kay McCormick, Phyllis Reber, Mary Longenecker, Lois Knepper, Florence Nestor, Grace Brubaker, Hilda Pfefferhorn and Marie Ellert.

Everyone welcome to Bldg. 4-3 skating party, Saturday, December 20, at Bell's Rink. Attendance prize. Organ music. Admission, 30c. Tickets from Florence Stanski, Adeline Rebber, Kay McCormick, Jim McClure.

Dale Is Proud Of Them



We agreed after a glance at the above pictures that Dale Goeltzenleuchter, Bldg. 17-1 has every reason to be proud of his two sons in the service. Richard (left) is a sergeant and Dale, Jr., (right) is a private in the Anti-Tank Co., 148th Infantry at Camp Shelby.

News On The Nose

From Bldg. 4-5

As this week's solemn turn of events ushered into our lives an added sense of the vast importance of our jobs, we found not so much of the old joviality; instead, there is a fierce, new determination born of a united faith and a will to work for American freedom . . . However, in spite of heartaches, sorrow, anxiety, and grief, there is a brave front in the all out for victory production of the loyal General Electric personnel . . . But life must assume its normal channels and from the office and floor in Bldg. 4-5 come these bits of human personalities as seen through the eyes of our guest columnist once more, Miss Gadabout . . . "Speculations" or "As I see it," by U-No-Hoo—

Ed Glusenkamp pays Ed Klomp twenty-five cents for a worthless watch because it has an odd face. . . . Ray Swartzel's mustache never fails to intrigue us. "Soon," he says, I'll be able to braid it." . . . Ed Klomp as Santa Claus at the Department 15 party last night. . . . There's a Brug's bright red polo coat. . . . Ralph Walker's southern accent, the North Carolina variety. . . . Jeanett Saunders formerly of Bldg. 4-5, gracing Bldg. 4-6 with an orchid last Monday. . . . Weaver and Woods, who look so much alike. . . . Jessie Filler's hat with feathers

Personalities set to music—

"I Don't Want to Set the World on Fire"—Andy Lee.

"Everything Happens to Me"—Mary Hull.

"Little Man You've Had a Busy Day"—Wilber Tibbitts.

"My Sister and I"—The Drewett twins.

"I Can't Give You Anything But Love"—Myron Wappas.

"There'll Be Some Changes Made"—Vern Robinson of the Suggestion Committee.

"Jim"—Jim McGill, for "He doesn't bring me pretty flowers."

The Christmas exchange brings back the thought of good old Santa Claus. A few of the many things wanted were as follows: Dorothy Brady says she will be satisfied with Robert Taylor. . . . As for (Tonie) Antoinetti Lause, she says just give me some bath salts, a brooch, or maybe a pretty string of pearls. . . . Now, Esther Hanke said she really needed some stationery. . . . Henry Vance's only desire is a 1942 automobile, and he is sure one will be delivered to him (?) . . . In your letters to Santa will you please tell him to bring Bethel Drake an extra pair of pliers. One pair gets lost so easily. . . . Grace Ewing tells us there is no place like Chicago for a thrill. What was so interesting there, Grace? . . . Congratulations to Paul Hapner for his recent appointment. . . . Also congratulations to Dorothy Brady, whose suggestion brought her fifteen dollars. How do you do it, Dot? Maybe you will get Robert Taylor after all.

Forrest Whonsetler, Bldg. 4-3, has just returned to work after an exciting week spent in the wilds of Northern Indiana in the quest of game. Accompanied by his two trusty Siberian Swamp Hounds, he was able to capture a great variety of game. He tells us that the Siberians did a wonderful job of retrieving. The first day, however, nothing much was accomplished although Forrest did tumble into a creek and returned to the hunting lodge with a hunting coat full of water—nothing else.

Get Warren Hershberger, Bldg. 26-1, to tell you about the diet wild rabbits are using. He has learned that, even though it is November, the rabbits are eating green peas. Probably makes Easter rabbits out of them.

Yep, it's the truth—Flas Howell, Bldg. 4-2, fell for that old gag of buying a G-E washer. Someone better try to sell him some G-E iron.

Bill Fowler, Bldg. 26-4, believes in being prepared. He attended a recent party, at which poultry was given as prizes, carrying a big white duck. Bill had to take to the bleachers to find room for his fair feathered friend.

Uncle McWell Of 26-2

And then there's the one about:

Somehow we have suddenly become very frivolous and full of ancient gags. We are somewhat at a loss to satisfactorily explain just how and why this has come about, unless it is the influence of our midnight owlish friends who always seem to have time "for just one more before we go home," or perhaps it's the vice-versa reaction to Sandy's assumption that we must hai false teeth, being sae old and sae wise. And so, until we can go back off into a quiet corner and decide whether we're insulted or complimented, we'll dedicate our first gag (and it probably will) to our Cost Reduction Sage, Sandy, who is smart enough to know that public opinion is only what people think other people are thinking.

Scotchman: "Lad, are ye going tae be ma caddy?"

Boy: "Yes, sir."

Scotchman: "And are ye gude a' finding lost balls?"

Boy: "Oh, yes, sir!"

Scotchman: "Weel, find one then, sae that we can start the game."

But hang on, brothers, here's a rare example of putting clue and clue together to get more. The story goes that the police had photos of an escaped convict in six different poses, and sent all of the six out across the nation to various police chiefs. Two weeks later, came a wire from a constable in Kentucky. It read:

"Received the pictures of the criminals. Stop. Have captured five of them and am on the trail of the sixth!"

Now that we've got you reeling on the ropes we'll polish off with a story that we are sure has never happened here.

Smoking in the factory was strictly forbidden, but Joe and Harry sneaked away from their machines for a puff or two in the tool house. As they were busy building smoke rings, the supervisor happened to scurry past. He stopped, turned around, sniffed the air, and eyeing two half-smoked cigarettes on the floor, asked:

"Whose cigarettes are those?"

"Yours," smiled Joe. "You saw 'em first!"

Quote for the Week

"Quiet minds cannot be perplexed or frightened, but go in fortune or misfortune at their own private pace, like a clock in a thunderstorm."—Robert Louis Stevenson.

Question and Answer Dept.

Dear Uncle McWell:

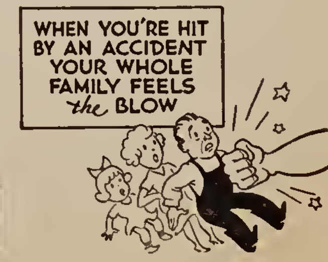
Just before the Production Department's Bill Ver Bryck was married, he was asking me about the problems of handling women. And so I just told him that before I was married I said that I'd be the boss, or know the reason why! Was that all right?

Wayne (Glad to Help) Weimer.

Dear Willing Wayne:

I don't suppose that you forgot to add that you now know the reason why? Mmm??

Uncle (Think Fast) McWell.



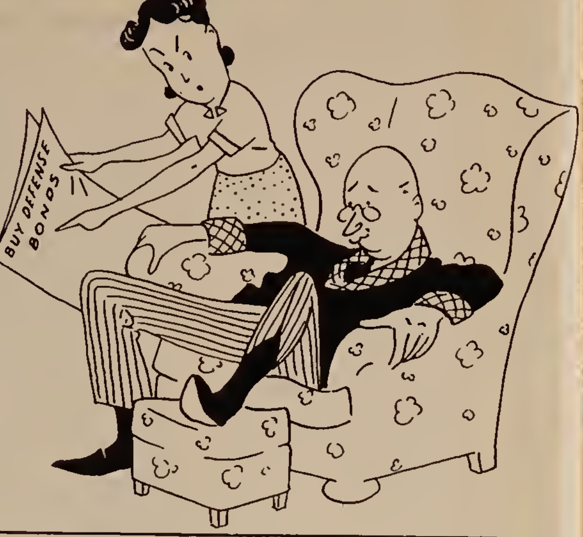
WHEN YOU'RE HIT BY AN ACCIDENT YOUR WHOLE FAMILY FEELS the BLOW

— REMEMBER PEARL HARBOR —

NATIONWIDE DEFENSE BOND CAMPAIGN GETS UNDER WAY

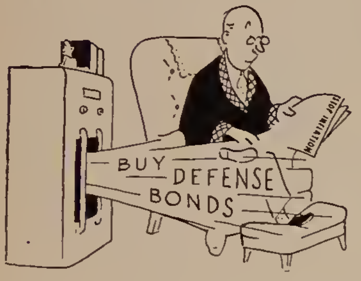
EVER SINCE LAST April we've been hearing appeals to buy Defense Savings Bonds. Every day for the last eight months radio announcers have mixed bond-buying appeals with their descriptions of "tasty-wasty flapjack flour" or "Gilbey's girlish girdles." Magazine ads have made the Concord Minute Man a familiar figure to millions of Americans. Billboards and posters have appealed to our patriotism—newspaper articles have pointed out the "reasons why." And for eight months most of us have agreed wholeheartedly with everything that was being said but have gone blissfully on our way, resolving to buy some Defense Bonds the first time we got around to it.

And so the actual sale of Defense Bonds has been disappointing to the U.S. Treasury Department, and something is being done about it. Full-time regional directors have been established throughout the country, and business firms, civic organizations, schools, and hundreds of other groups are now ready to contact every single person in the country.



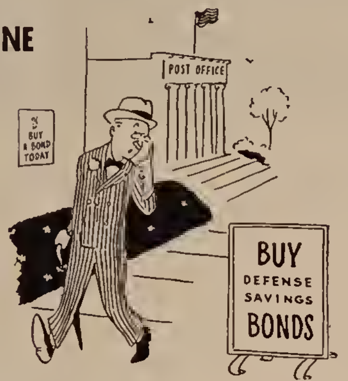
MR. BISBEE BUYS BONDS

APRIL, 1941



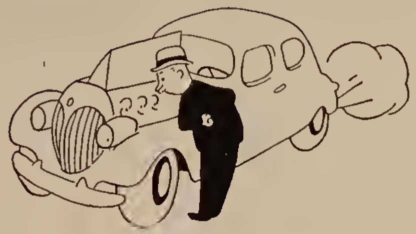
Mr. Bisbee becomes conscious of the Government Defense Savings Bond Campaign. He's glad something's being done to head off inflation.

JUNE



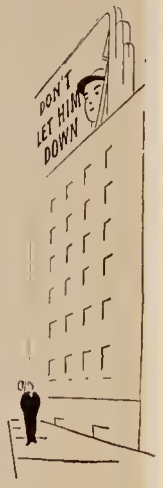
Makes mental note to buy a Defense Savings Bond the next time he's near the post office.

JULY



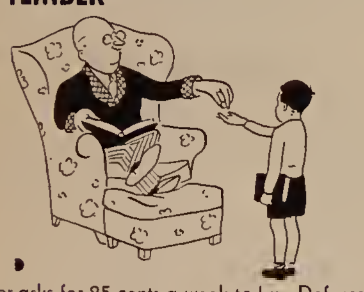
Decides he'd better buy a new car as old one will probably not outlast the emergency. Feels glad that he has not tied up the money in Defense Savings Bonds.

AUGUST



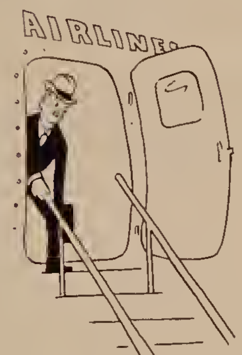
Realizes with sinking feeling that he has neglected to buy Defense Savings Bonds yet. Resolves to do so at first opportunity.

SEPTEMBER



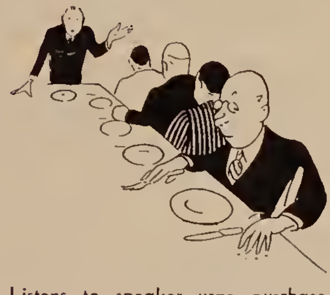
Junior asks for 25 cents a week to buy Defense Savings Stamps at school. Bisbee gives Junior a quarter with feeling of relief that he is at last contributing to defense effort. Is proud of Junior's patriotic spirit.

OCTOBER



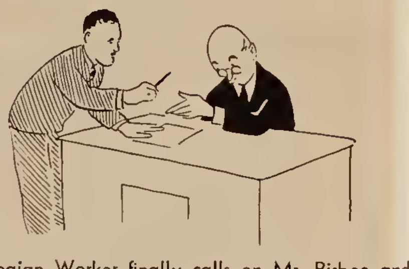
On business trip, he gets off plane in Washington, wondering whether any Government officials will notice that he has not yet bought any Defense Savings Bonds.

NOVEMBER



Listens to speaker urge purchase of Defense Savings Bond at Luncheon Club. Feels slightly bored. Resolves to go to bed early tonight.

DECEMBER, 1941



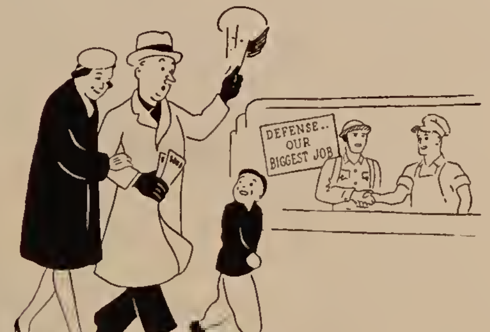
Campaign Worker finally calls on Mr. Bisbee and hands him pen and application blank. Wave of embarrassment sweeps over Mr. Bisbee. He gladly signs up to purchase bonds regularly on payroll deduction plan.

NATIONAL CAMPAIGN EFFORT TO BE MADE IN DECEMBER

The magnitude of this effort can be judged by the number of workers who will be engaged in making personal solicitations. During the "Liberty Loan" campaigns of 1917-1918, a maximum of two million workers were active. Today, the Treasury Department estimates that six times as many people will be working to sell Defense Bonds.

All large and medium-sized companies are being asked to establish payroll deduction plans for the purchase of these bonds. Smaller companies are asked to provide for the sale of Defense Savings Stamps to their employees regularly each payday. Schools are urging students to bring 25 cents or more each week for the purchase of Defense Stamps. Newspaper delivery boys will urge the purchase of stamps as they make their regular weekly collections from door to door. Stores will suggest that customers take their change in Savings Stamps.

AND FOR THE DURATION



Grand and glorious feeling that he is a full-fledged partner in his nation's defense effart. Wife and Junior beam with pride an their band-buying hero.

WHAT G.E. CAN DO DEPENDS ON US

Last April, when the Treasury Department announced the Defense Savings Bond Program, General Electric was among the first to co-operate. A Defense Savings Plan was adopted to make the purchase of Defense Bonds as convenient as possible for all G-E people.

In order to tie in with the U. S. Treasury's present efforts to expand its bond-selling program, General Electric has just announced a revised Defense Savings Plan. One of your fellow employees will soon call on you as a Defense Bond Campaign worker, ready to answer any questions you may have on this program—and to give you an opportunity not only to help defend America, but also to provide for your own future security by making purchases of Defense Savings Bonds by payroll deductions.

NEWS THROUGH THE PLANTS

Plastic Flashes

Joe Halley, former molder and now one of Uncle Sam's boys, wants us to say hello to all his former co-workers. Joe is stationed at Camp Wheeler, Georgia.

Here's wishing luck to Addie. We hope she likes her new job.

Eddie Dickmeyer is going around with a face that long since his favorite molder is gone.

We certainly enjoyed the Elex Christmas party, but Mehitabel was the naughtiest girl; kept trying to get Rubinoff's phone number. Shame, shame, "Hitty", you know what mama told you.

Susie Jones sure is the lucky one. She must know what the lucky numbers are.

Can't you just imagine Mildred Oyer climbing in a window? Next time better tie the key on a ribbon around your neck, Mildred.

It's getting near to Christmas and everyone seems to be writing Santa Claus. Here are a few letters that he'll get.

Dear Santa: Please bring me all the right tips on the "bang tails." Yours, Jim "Betadime" Fleming.

Dear Mr. Claus: I would like for you to bring me a water pistol, also some chomping gum; and if you have anything else you don't want, I'll take it. Yours, Butchie-Wutchie Junk.

Dearest Sandy Claws: If you would be so kind as to bring me Clark Gable, I wil be a good girl all the time. P. Snider.

My Deer S. C.: I no u r a bizzy man, but kud youse drop me off a pr. of brite red suspenders. These green wuns are kinda gettin' dull. Love, Bobby Edger.

Dear Santy: All I'm asking for is one chandelier. Make it a purty gold one. Thank you so much. Your loving friend, Zola Hetrick.

For once it seems the fellows in the tool room have been behaving themselves. Ah, well, news is news when news is new, so next week new news.

Bye, now,

The Tillies.

Kitchen Korner

A fact well worth remembering is that we associate the approach of a new season with a change of food on the market. Autumn reminds us of apple cider, pop-corn, pumpkin and mince-meat pie, etcetera. Well into the winter we find an increase in the use of these favorite fall foodstuffs still in season. Oysters and cranberries are two items noticeably in demand now. They are particularly popular for our holiday festivities, and are available throughout the fall and winter months.

When we were very young, in the long yesteryear, we awaited our first oyster stew with unlimited anticipation. For us this dish possessed all the rudiments of appetite appeal. Never was it necessary for our parents to cajole us into "just try some of the broth." Then, as now, an oyster was an oyster, a delicacy to devour, and we lost little time in doing it.

Nor were we fussy how they were served. Since "variety is the spice of life" we appreciated our mother's efforts to employ various ways of preparing them for edible use. In oyster stew, escalloped, or fried, or if included in dressing, its appearance on the menu marked the dinner as delicious. Yet, we confess to one failing—at no time have we swallowed an oyster in the raw. We recalled many instances when our mother, brother, and sister accomplished this unusual feat, but we list this as "something not to be done."

Reminiscent of our three "R" days is the established fact that oysters are available in any month containing the letter "R", in its spelling. Hence, oysters are "in season" from September to May. Incidentally, this is very convenient for our Lenten period.

Yes, the oyster is a funny fish. We say "fish" because it belongs to the sea-food family. It is known as a shell-fish or mollusk and is generally found in shallow water along the sea-coasts. This oyster has a two-fold contribution to the world's riches—as an excellent source of food, and also, we obtain a rare gem, the pearl, from its shell.

According to history, the search for oysters and its product, the pearl, played an important part, in Columbus' later trips to the new world. At that time, the already wealthy Spain was anxious to have her share of the riches of this new continent. Fabulous tales reached the royalty and even the great admiral was known to have bartered unjustly with the native Indians for these gems.

The learned men of that era differed in their theories about oysters. One trend of thought was that, exposed by the tide, these oysters opened their shells to receive drops of dew from the skies, which eventually solidified into pearls. Still, others expressed the belief that oysters grew on trees, in shallow water, and developed into sea birds if not disturbed.

All in all, we recently read of a phenomenal phase, or an outstanding characteristic of the oyster to change its sex from year to year. Young oysters in their first year are generally males, and, during the second year half of them will become females and some will continue to alternate between one sex and the other.

And, all in all, we had better be on our way.

The Kitchen Kid, Bldg. 16-1.

26-5 Tool Bits

Barney Waldon has taken up the art of broncho riding. He certainly is riding a bucking broncho this week.

Some people are born color-blind while others get that way on certain occasions, but we can't understand how a fellow can walk to work without knowing that his shoes were different colors, besides being unmated. See Scott Click for explanation.

We are wondering what F. Hoffman has on Art Thieme that he just hands over a dollar bill when asked for it. We could give Art the benefit of the doubt and assume the spirit of Christmas has got him.

Hank Wittber has the rotor gang wondering if he is going to give up stamps for stoves. He was recently overheard discussing the merits of Christmas cookies with Otto Backman.

In regards to the fog we have had in the past week, it is through reliable sources we learned that this fog was ordered from our weatherman (demonstrating American hospitality) especially to give the English and Scotch of Bldg. 26-5 that feeling of home.

Things we seldom see:

Bill Schust not chewing.

J. Ebert not talking.

G. Mittermaier satisfied with his gas buggy.

C. Baerman playing euchre.

H. Thiele talking back to C. Clapesattle.

19-4 Spot Jottings

Traffic Sergeant Alvin Powell has his hands full now that there are so many shifts working. He was seen stealing Superman's stuff by lifting cars around in the Lindley Avenue parking lot. . . . Inspectors and Testers, don't forget to get your reservations in for the Inspection and Test Christmas party to be held in the Old Fort Room at the Hotel Indiana December 18 at 6:30. . . . If you are interested in flying see that ace of aces, Otis Clark.

A. Holthaus and Ray Renfrew wearing their clackers.

A. Korte with his hair combed.

F. Morgan selling L. Gage an up-to-date baseball ticket.

The boys in the rotor gang are wondering if Ross Cohagan has any windows in his house and, if he has, are they nailed shut? Maybe you live too close to Wenner's refrigerator, Ross.

As a sink hooker-upper Ross Vaugh is alright, or is he? After connecting said sink, Ross went to the basement and confidently turned on the water. After firing the furnace and sweeping the basement, he started to go upstairs and was met by Niagara Falls in miniature coming down to meet him. Ross says one pipe was too short on one end.

Warning to all pinochle kibitzers, F. Druhot was seen cleaning his old revolver. So evidently he is going to make good his promise.

Henry Wittber has his regrets now-a-days too. Sad, sad is the tale. It seems the boys along the railroad tracks have been reaching through the narrow partitions on the chicken cars parked there and getting free eggs by the dozen, and it so happens that Hank's hands have reached the proportions where he can hardly get them into his pockets. Hence, the loss of those free eggs.

Bill Mills, Bulg. 26-2, is going to have to be a better judge of quantity. Bill heaped up his tray and when the lunch hour was over had plenty left. His imagination is larger than his capacity.

First Boy: "My father is a brave man, he is. He killed five lions and an elephant in Africa, single handed."

Second Boy: "Bosh, that's nothing. My dad bought a new sedan when ma wanted a coupe."

The boys are debating whether it would be cheaper to buy gas masks or furnish Harry Seabold, Bldg. 4-2, with a good pipe and tobacco.

Rita Helmer, Bldg. 26-2, and Ruth Gephart, Bldg. 26-2, had a lot of fun in Chicago. They learned something about high finance, however, when they hired a taxi for $3.90 and returned on the same route by elevated for 13 cents each.

Suggestion Awards

son, Bldg. 4-3; Julia H. Martin, Bldg. 4-3; Charles H. Brown, Bldg. 4-3; Harold J. Bowker, Bldg. 4-3; Clarence E. Schooley, Bldg. 4-3; Dwight M. Frost, Bldg. 17-1.

Louis D. Hopper, Bldg. 10-1; F. F. Elliott, Bldg. 10-1; John F. Fulk, Bldg. 6-B; Clarence Gardt, Bldg. 12-3; W. Wooley, Bldg. 4-1; E. Renbarger, Bldg. 6-B; Ruth C. Papenbrock, Bldg. 4-5; H. J. Wright, Bldg. 6-B; Otto W. Proehl, Bldg. 17-4; Elmer Diemer, Bldg. 4-1; Lela A. Brudi, Bldg. 4-6; Ruth C. Lemert, Bldg. 17-4; Louis Maier, Bldg. 8-1; Edward Krick, Bldg. 6-B.

SPORTS SPOTS

By STAN PRINCE

Inter-department basketball opened with a flurry of well-earned points and many exciting games. Transformer, Small Motor, Main Office, Magneto, Apprentice B, and West Side all tasted victory over Bldg. 4-4, Squares, Wire and Insulation, Messengers, General Service and Apprentice A respectively. Mr. Straub reported that all games went off as scheduled and that this year's league should be the best that ever has appeared before the G-E fans.

The Magneto team from Bldg. 6-4, held the honor of scoring the most points in the opening round of play when they scored 48 points. Main Office was close behind, scoring 41 points against Wire and Insulation. Magneto also had the largest margin of victory as they won over the Messengers by 25 points. Last night the Magneto team met the Main Office five, but as this columnist's deadline is Wednesday, it is too late to get the results. Anyhow, I sure do predict a lot of good battles in the future so be sure to come out and watch the team in action.

Every week we will try to publish the first six scorers of the league but in case we do make a mistake, please notify me and I will certainly make up for my error. This week's big six are: Bruick, Magneto, 19; Bandalier, West Side, 16; Close, Magneto, 13; Kent, Main Office, and Augsberger, Small Motor, 11; and O'Brien, Main Office, 10. These boys really deserve a lot of credit for good basketball handling.

It is altogether too bad that this paper goes to press before the Owl League finishes its first round. We will try to bring you a complete story of all the games as soon as possible. From all advance reports, we hear that Aircraft and the Winders are the strong teams of the league. Good luck, fellows.

Ping-Pong

Ping-pong again claimed many victims but a few of the favorites advanced unscratched. Hitzemann took Sunier in the best match of the day in a real close tussle. Sunier had a load of trouble with his backhand shots, some of which fell off of the table inches short of touching. Curlin remains the favorite, but with Hitzeman, Sunier, and Ponsot in there, anything could happen. Several new players joined and in case a few more are needed, you are invited to come in next Saturday. Four tables will be in use from 1 to 5 in the afternoon.

Bowling

Bowling has taken quite a fancy to the fellows who have just joined the leagues at the G-E alleys. The Steinbacker twins showed up for the first time last Sunday and they really enjoyed it. An exhibition match was staged last Saturday between the Magneto first and second trick and in case anyone is interested in the outcome of the match, just ask Don Bruick or Johnny Leon. It was a hot day for someone at the G-E alleys when he came up with an 802 score. See Ed Yahne for further results.

Basketball

Be sure to come and see the G-E Club team play, because they really are a fine outfit. They defeated Rock Creek and the Kimble Aces last week-end and they have a lot of exhibitions on tap. Let's all come out and boost the team on to victory.

See you next week with more news.

ON-- the Alleys

By Dick Kent

The high spot of the week goes this week to the fairer sex. E. Dietze, bowling in the Elex Monday Night League, rolled a 258 score, which makes most of the male bowlers blush with shame. Incidently this score is second high of all the leagues last week.

In a friendly match Saturday afternoon, Walt Mertz, bowling with Frank Mathews and Bill Glenn, had an 803 count after which Frank and Bill admitted he was too tough, for they averaged over 200 in 9 games.

Ernie Spaulding of the Office League wonders why it is so easy to get the 7 pin twice in the same frame, especially in the tenth, when you have 191 in the ninth.

High series and singles games of all leagues are listed below:

INTER-DEPARTMENT LEAGUE

600 Series

Wm. Doehrman, 190-258-216—664.
W. Mertz, 247-149-258—654.
L. Barney, 210-192-215—617.

200 Games

Buuck, 210; Spath, 212; Hamilton, 202; Daley, 215; Sommers, 204; Burton, 201-203; C. Rose, 215; Zollinger, 202; Ludeman, 202; Schrantz, 221.

G-E MASONIC

600 Series

F. Quinn, 203-183-234—620.
Lindeman, 212-204-189—605.

200 Games

Rapp, 256; Quinn, 234-203; Gidley, 203; Lindeman, 212-204; Mullen, 200; Shollenberg, 202; Ball, 204; Reinhartsen, 210; Kohlenberg, 208.

G-E TOOL ROOM

200 Games

R. Lenz, 222; Welker, 204; Franke, 220; D. Kaiser, 210; Winkelman, 238; Ramsey, 210; Houser, 207.

Remarks

Winkelman's 238 is a new high for this league.

G-E APPARATUS

200 Games

Kallmeyer, 213; Musser, 212; Voltz, 208; Wagner, 202; Perry, 207; Ulmer, 202; Keller, 206; Landis, 204.

SMALL MOTOR LEAGUE

Haugk, 199-224-201—624.
Cetter, 194-221-202—617.
Reese, 238-211-200—649.

200 Games

DeWitt, 204; Cutler, 203; Matthews, 204; Daley, 212; Mullins, 222; Bergman, 212; Patterson, 225; Reffelt, 202; Lindemuth, 211; Proehl, 213; Koch, 219.

G-E OFFICE

600 Series

Townsend, 238-222-167—627.

200 Games

Ulmer, 216-200; Johnson, 212; Hanna, 222; Kilkelly, 200.

G-E OWL NO. 1

600 Series

Walt Mertz, 234-257-157—648.
L. Elward, 179-224-206—209.

200 Games

Masters, 204; Tennison, 218; Marks, 211; Hitzeman, 212; Schlotterback, 206.

ELEX MONDAY NIGHT LEAGUE

High Series

E. Dietze, 169-258-144—571.
L. Bloom, 188-173-124—485.
H. Bleke, 165-158-144—467.

200 Games

E. Dietze, 258; H. Danemeyer, 204; L. Bloom, 188.

Bridget had been discharged.

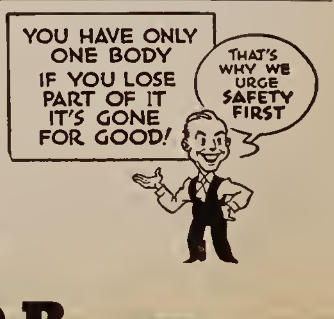
Extracting a $5 bill from her wage roll, she threw it to Fido.

Then the shocked mistress heard her exclaim: "Sure'n I niver fergit a friend. That's fer helpin' me wash the dishes."

Defense Bonds

(Continued from Page 3)

ready to purchase peacetime goods in larger quantities than ever before in order to keep industry busy during the readjustment period. We must save more now so that we can spend more then."



YOU HAVE ONLY ONE BODY IF YOU LOSE PART OF IT IT'S GONE FOR GOOD!

G-E Club Leads In Basketball League

Opens Season With Victories Over St. Joe Athletic Club and Kuhner Packers

The General Electric Club basketball team in the Major City League, after two weeks of play, emerge victorious over the Kuhner Packers and the Saint Joe Athletic Club. This puts the G-E Club in first place with two victories to its credit.

Coach Slack's boys easily defeated the Kuhner Packers on the opening night 37 to 28. G-E held to a 16 to 6 lead at the half and they turned the heat on in the second half to win going away. Krieg and Hanley were high point men for the General Electric team with ten and nine points respectively, while Hobbson was high for Kuhners with six points. In the other games of tbe opening round, International Harvester shaded past Essex Wire 27 to 24 while St. Joe A. C. captured a 23 to 19 thriller from the Zollner Reserve Club.

Last Monday night, the Club team really had a tough battle on their hands as they outfought and outlasted the Saint Joe Athletic Club by a 30 to 28 count in what proved to be the best game of the evening. The G-E Club team started out fast as they hit from all sides to win a 16 to 7 count at the end of the first quarter.

Using a fast break to an advantage in the second quarter, the St. Joe Club pulled to within three points of the G-E team. The half ended in favor of the G-E team 18 to 15. Things went along smooth in the third quarter as each team scored six points. G-E held the ball for the last twenty seconds to win 30 to 28.

As two exhibition games, the G-E team traveled to Flat Rock, Ind., where they emerged victorious 33 to 31. On Sunday afternoon they took the Kimble Aces into camp by a 48 to 21 score. "Red" Braden was high point man in both games, garnering 14 and 13 points respectively.

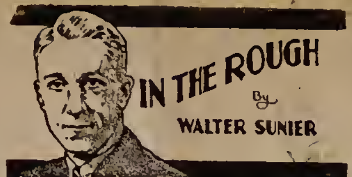
Squares Will Hold Yuletide Gathering

A Yuletide gathering is planned by the G-E Squares and will be held on December 24.

A successful supper dance was held by the organization last Friday evening at the Anthony Hotel. Music was by Paul Dannecker's dance orchestra.

Give "Men and Volts" for Christmas. A book every G-E employee will want to own. Special price to employees. Employees' Store open from 8 a.m. to 5 p.m.



We are moved to a copious outpouring of the ophthalmic glands as the shades of Morpheus draw over the land of tripping assailers of the rubber spheroids. There is a cessation of the activities of homo sapiens again over the land of bunkers and bunk, of greens and long green, of sand traps and gravelly remarks, of holes and holy statements, and of creeks and creaks. The sound of a monody lies over the terra firma. Would that instead it were the sound of a gallopade. This would be much more consentaneous to all golfers, but we fear that even a thaumaturge can not enliven the scene.

These lands which are deserted now were perhaps once trod by troglodytes. Perhaps next year man may not trod them again. We might vaticinate on the probability of a dahabeah coming down the creek with a diplodocus wearing a heaume standing on the front projection. But even the thought of such a thing causes horripilation and vertiginous reactions. Rather than to experience such an horrendous apparition, we would forever abandon the playground to those things which are denroid and arborescent. This might even act to our advantage as we might then escape the diplococcus and an ensuing cessation of heart action.

We can have only sanguine expectations that the succeeding cycle will engender life again. We pray on genuflected knee with fervor and with furor for an entrepeneuer who will some gladsome day blow the reveille and animate again the cavaliers and biological errors who will prance forth on shanks mares properly bedecked with the ostentatious implements which are the obligatory concomitants of the sport. Oh! happy day.

FORT WAYNE G-E CLUB SPORTS

By Dick Kent

Table tennis is like golf. Before you play it you wonder what there is to it. Then when you take your first crack at the ball—and miss—you wonder if maybe you were wrong. Anyhow, the table tennis league is giving us a chance to develop more skill. The G E Club gym is a fine place for this game. No joists for the ball to hit; no pipes for your skull to dent; and plenty of room to run back and get the long drives.

Commers' perfect score cracked under the strain last Saturday, and Curlin moved into first place, after taking Bob Hanna in a fast three-game match. These two boys are really tough. Of course, in order to keep Sunier, Campbell, Fox, Hancher, Myers and Hart off our neck we'll have to mention that they are also hard to beat. Michels, winner of two club tournaments, is in good form this year and will place high in the league. The above named men are the nine highest in the league standings to date.

Next Saturday will be the last meeting of the league until after the holidays.

DECATUR SPORTS

G-E Inter-Department League

The Switches swept the league-leading Maintenance team off their feet as they won all three games in the G-E Inter-department Bowling League despite the fact that Tom Haubold of Maintenance was having one of his good nights. Tom's 209 and 572 led all bowlers in individual scoring.

The Testers stayed up in the running by winning a trio from Assembly.

Production squeezed out two wins over the Rotors.

200 scores included: Haubold, 209; H. Keller, 205.

G-E Industrial League

West End Restaurant increased its lead in the G-E Industrial League with a clean sweep of their three games with G-E Dodgers. Russ Woodhall again led his team with 223 for high single game and 587 for high three-game series.

Mutschlers held on to second place by winning 2 of 3 games from the G-E Ramblers. Herman Lankenau had a 217 for the losing Ramblers.

Burkes retained third place in the league by winning 2 of 3 games from Doc's Place.

200 scores included: R. Woodhall, 223, 218; O. Lankenau, 207; H. Lankenau, 217.

Standings

	W.	L.
West End Restaurant	21	6
Mutschlers	17	10
Burkes	15	12
Doc's Place	12	12
G-E Dodgers	8	19
G-E Ramblers	6	18

Doc's Place and G-E Ramblers will play their three postponed games Tuesday, December 16.

Decatur G-E Defeats McMillens

The G-E Club showed a little better form in last week's engagement with McMillens. However, they were forced to the limit to down the feed boys by a score of 26 to 22. G-E now has won 3 and lost 2 in league competition.

Summary of scoring for G-E:

Name—	Pts.
Baker	4
Jackson	0
Andrews	3
Blythe	6
Hill	4
Heller	4
Chilcote	0
Braden	3
Smith	2

Kindling Orders

Orders for kindling are again being accepted by the Personnel Department, phone 750. The kindling is offered free to employees with a charge of $1 to cover handling charges. This sum must accompany orders.

Add the loveliness of eight favorite hymns as sung by the famous G-E "Hour of Charm" all-girl singing orchestra to your musical library. On sale at the Employees' Store. Store hours from 8 a.m. to 5 p.m.

Inter-Department Cage League In Third Round

Coming into the third round of play, the Inter-department League settles down to some really tough clashes. This league has many good teams and when tournament time rolls around, there will really be a battle for the championship. This coming Tuesday, the Squares meet Wire and Insulation, West Side tackles Transformer, and Messengers tangle with the Apprentice B team. On Thursday night, General Service tangles with Magneto, Bldg. 4-4 comes in contact with the Apprentice A team, while Main Office and Small Motor meet in the final game.

After the second round of play there are still several teams that look very good. The main teams that stand out, both in victory and defeat, are Main Office, West Side, Transformer, Small Motor and Magneto.

Be sure to come cut and boost your team on to victory. The games start at 7 o'clock, so be sure to be there.

All Time High

An all time high for the manufacture and delivery of Diesel-electric locomotives by the Erie works of the General Electric Company was established recently with the delivery of the 200th locomotive so far this year.

A large percentage of the Diesel-electrics already shipped are now engaged in defense operations. Many have gone into arsenals and navy yards. Many more are serving other defense industries.

G-E Club Dance

The regular Saturday evening G-E Club dance will be held tomorrow evening, December 12. All employees and their friends are invited to attend.

Of course there will always be a Santa Claus—give G-E coffee makers for Christmas. Employees' Store open 8 a.m. to 5 p.m.

Employees' Store open 8 a.m. to 5 p.m. until Christmas.

Foreman's Club Enjoys Fun Fest At Uptown Club

By J. V. Johnson

The monthly meeting of the Foreman's Association was held at an uptown club December 3. Florian Korte, our genial president, set a new mark for a short business meeting, after which the fun began. The turnout was very gratifying, proving again that given a place to eat and room to sing, even the most reticent of foremen blossom out in varying degrees of competition to Gene Autry or Bing Crosby.

Going further we must admit that a quartet comprised of I. H. Freeman, Karl Geller, Glen McAtee and you name the fourth really put harmony in the old songs, of which others present were quick to suggest their favorites.

The fair accordionist was given no rest during lunch, but later Ralph Mennewisch and Bill Timme, with a banjo and accordion, joined the party—boy what a pair of accordions and a banjo can do to a pinochle game. Ask Paul Buell or Bill Putt.

We were glad to see such old timers as Henry Lepper, Henry Auman and Salem Bickel on hand.

Arrangements were in charge of Carl Steinbacher and his committee.

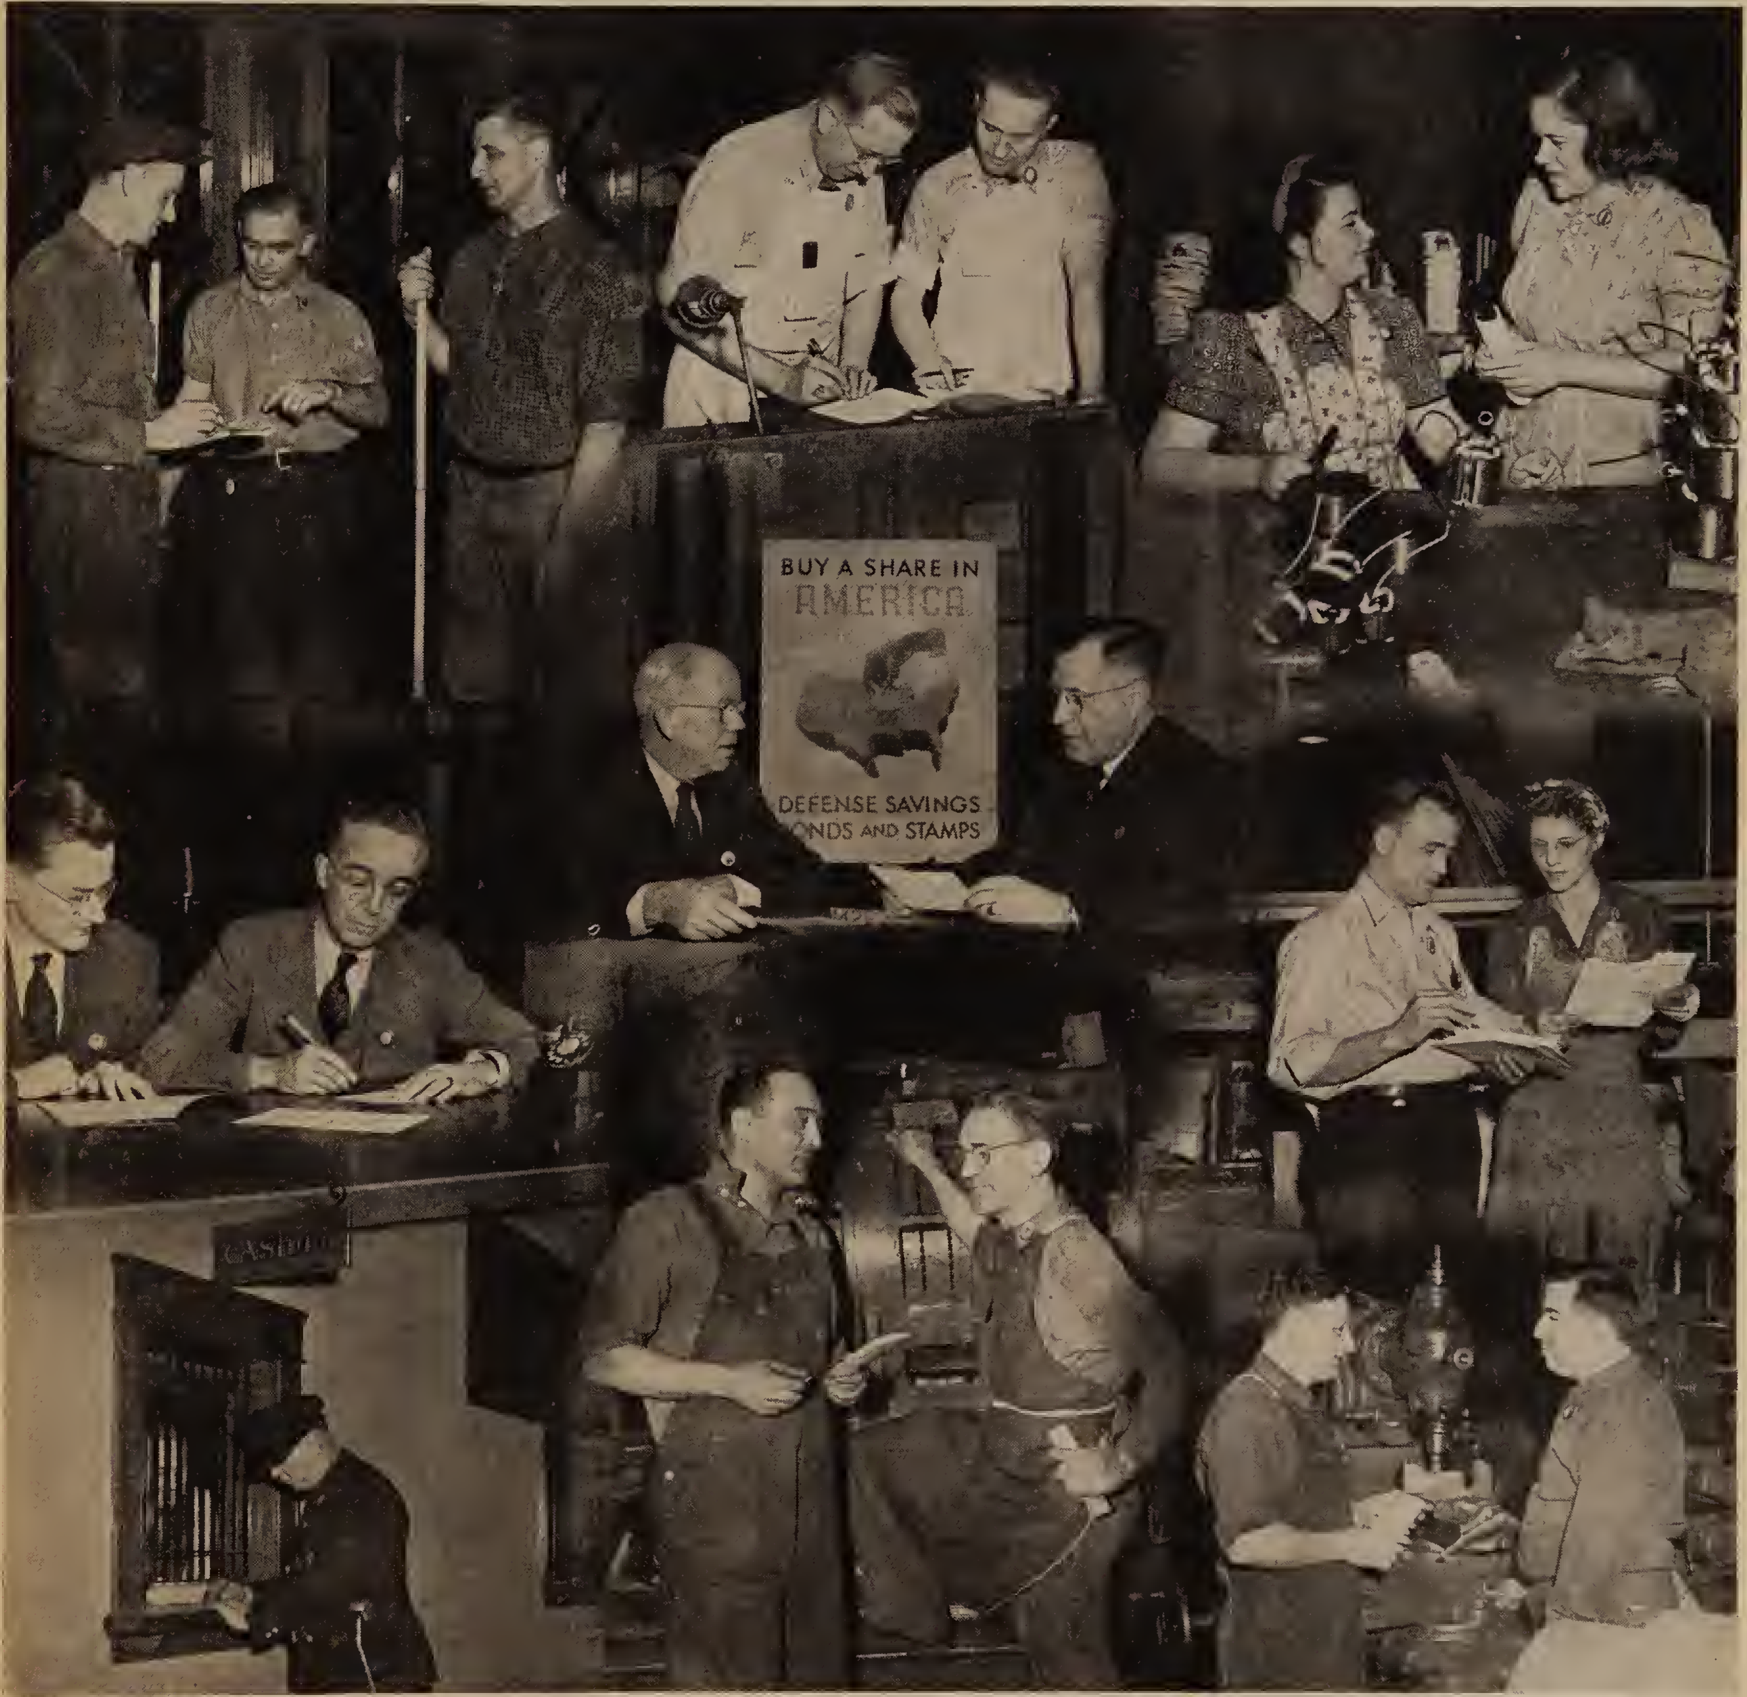
GENERAL ELECTRIC

FORT WAYNE WORKS

Volume 24 FORT WAYNE, NDIANA, DECEMBER 19, 1941 Number 96

Yes — They "Remember Pearl Harbor" . . . .



Throughout our Works employees in every capacity are remembering Pearl Harbor in a substantial way—that is by the purchase of Defense Savings Bonds. A typical representation of bond purchasers at the Fort Wayne Works is shown above. In each instance the question "why are you buying Defense Bonds" brought answers similar to these—"I'm helping the boys on Wake Island"; "We've got to win this war and this is one way to do it"; "Why not, it helps our country, and it's a safe investment."

Shown are, top row, left to right—Earl Dickson and Ralph VanOsdale of the janitor service with salesman Howard Conner; Earl Lenz, Bldg. 26-5 with salesman Carey Baker and Marie Griffin, Bldg. 19-5 with saleslady Clarice Fyock. Second row—George Waldschmidt, Bldg. 18-2 and salesman Jim Craig. Center—Works Manager M. E. Lord who made his purchase from J. W. Crise, executive assistant who is chairman of the campaign; right, Mary Williams, Bldg. 26-2 and salesman Floyd Chilcote.

Lower row—Patrolman Barney subscribing at the cashier's window; Jim Scarbrough, Bldg. 27 and salesman Charles Robinette and W. MacGinnitie and salesman Chester Beck.

• A Memorable Date

If Pearl Harbor has a single important lesson for every American man, woman and child it is to be found in the disclosures this week by Secretary Knox of the Navy. It is the fact that the fifth column in Hawaii, "most effective in this war, with the possible exception of Norway", was in a large measure responsible for the rattlesnake attack upon this outpost of America.

The enemy came from outside the physical defenses of the naval base . . . But it got its directions from its own secret agents among the civilian population. There is evidence that the attack was carefully planned, many weeks before hand . . . while the olive branch of peace was being offered our government.

Since we as a nation are so beset about by a world of sneaks and cutthroats, it behooves every mother's son of us in General Electric to keep our eyes and ears open . . . ever alert and never napping.

REMEMBER PEARL HARBOR . . . and let not such a disaster overtake us in our vital work of giving our Navy the tools to fight back at vicious, brutal and hard-hitting enemies!

BULLETIN

The increasing activities brought about by the national emergency have tremendously increased the telephone calls on the lines connecting our plant with the outside telephone service. These lines are used to service, not only these increased business calls, but also many personal calls by employees. The result is that these telephone lines are much overloaded.

So that we may carry on the highly important business calls of the plant it becomes necessary therefore, to request all employees to help us keep these outside telephone lines open by making only such personal calls as are absolutely essential. Possibly many of these calls may be made from the employee's home.

Time is short!

We believe that if our employees are told of this condition they will aid us to permit this prompt carrying on of important business by telephone, and we hope it will not be necessary to arbitrarily restrict the outside personal calls by 50 to 75 per cent.

Thanks for your cooperation.

M. E. LORD, Works Manager.

NEWS FROM THE CAMPS

We publish herewith with great pleasure extracts of letters sent to us by G-E employees now in government service. Address all communications for this column to the WORKS NEWS editor.

Dear Editor:

We have moved to a new location. It's a large air base here and sure is a nice place. It's sure hard to get used to the blackout as we are not allowed to show any lights of any kind. I sure hope this war does not last as I want to get back. I enjoy the WORKS NEWS very much and hope you keep on sending it. I'm in the band now and enjoy it very much. I had quite a few experiences in Radio and Intelligence but I like the band the best. I don't get much of a chance to write so if you put this in the NEWS I would like to say hello to McKomber, Perry Shober and the boys of the G-E Club band, also my friends at work. We are to give a concert here at the post today, so I should close as I have to get ready. So until later

I remain,

PFC Richard Hoopingarner

Substitute Proves To Be Improvement

Silvered Glass Reflectors Conserve Aluminum And Increase Efficiency Of Luminaires

The General Electric Company has announced that silvered glass reflectors will replace highly polished aluminum reflectors in its pendent shielding-type street lights. This move, according to F. D. Crowther, sales manager of the Lighting Division, will conserve aluminum and produce an average increase of about 10 per cent in the efficiency of the luminaires.

"Other features of the luminaires will remain unchanged," said Mr. Crowther. "These include 'spun-sealed' construction, which makes the reflector and globe one unit and decreases globe breakage; reflector 'offsets,' which eliminate destructive heat concentrations in the luminaires; and simplicity of design for easy maintenance.

"A number of power companies and the Army already have placed orders for luminaires using the new silvered glass reflectors," Mr. Crowther said.

"In one line, the silvered glass reflector will form the upper half of the luminaire. It will be strongly reinforced by a copper-plated backing. Reflector and globe will be manufactured in one piece, either by blowing the globe and reflector as one unit, or by permanently joining the refractor globe and the reflector by a spun-sealed metal ring. The refractor globe in another unit in this line will be attached to the copper-clad silvered glass reflector by means of spring compression support. In another line the silvered glass reflector will merely replace the aluminum reflector in a cast iron casing forming the upper half of the luminaire."

Asked if the increased use of glass would not result in more breakage by mischievous youths, Mr. Crowther explained that experience proved this to be otherwise.

"On the contrary, most globe breakage is due to the chipping of the globe rim when the globe is being handled, either at the warehouse or while relamping the luminaire. These chips, under alternate conditions of heating and cooling, and vibration, extend through the globe and break it. By making the globe an integral part of the reflector on our most popular line we have been able to reduce breakage to less than three per cent per year, on the average. As for the glass reflector, this is strongly reinforced by a copper-plated backing which clings so tightly that even though the reflector is smashed the pieces of glass will not fall. Thousands of our floodlights, using similar backings, are still in service after more than 12 years under more severe operating conditions."

Plastics Jewelry At Employees' Store

The sale of plastics jewelry has been transferred from the Plastics Department to the Employees' Store. The jewelry includes a full line of Parkwood Textolite novelties, made up of very fine flitches of rare woods which have been impregnated with Textolite plastics. A sample board is on display at the Employees' Store from which selections may be made.

United Support Is Given By G-E Family

Incomplete returns from General Electric's first real U. S. Defense Bond Campaign among its 130,000 employees reveal that approximately 26,000 employees have subscribed for a total of $3,532,739 worth of these securities. Only three Works, Pittsfield Plastics, Pittsfield Works, have submitted complete returns. and Bloomfield Works. All the rest are in the midst of their campaigns or are about to finish them. Complete returns will probably be available for next week's WORKS NEWS.

The main Pittsfield Works reports a total of 8450 subscribers for a grand total maturity value of $1,225,000 worth of bonds. Pittsfield plastics came through with 1144 subscribers for a total of $42,425. Bloomfield Works reported 92.1 percent of employees subscribing.

From Philadelphia Works comes word that 85 percent of the plant has subscribed to the sale with a total of 4511 employees signing up.

Incomplete returns from both Lynn Works show that $2,250,000 maturity value in bonds has been subscribed for by 14,315 employees. Erie reports very encouraging progress but with returns not yet complete enough to give accurate figures. The same holds true at Schenectady Works, Fort Wayne and Bridgeport.

Additional Insurance Revision Completed

The semi-annual adjustment of Additional Insurance of employees passing from one classification to another, has heen completed, it is announced hy the Payroll Department. The rate of contribution for an employee passing from one classification to another has also been adjusted, and the revised rate will be effective with pay received December 26.

The official statement follows: "As set forth in Article No. 5 of Booklet GEQ-59A entitled "Group Life Insurance Plan," additional insurance is based upon the employees' annual wage or salary. The amount of additional insurance is automatically adjusted on the first day of January or July next following the date of increase in the employee's rate of annual wage or salary.

"Employees affected by the foregoing will note that premiums will be adjusted in accordance with Article No. 8 and that payroll deductions at the revised rate will start with pay received December 26.

Stage Set For Christmas Party At Club Tomorrow

General Electric Youngsters To Be Guests At Five Programs

Young General Electric will participate tomorrow in a long anticipated event, the annual G-E Club Christmas party. There will be no disappointed youngsters as far as the Club is concerned for not only has an excellent program been arranged but there will be five performances to insure that the children will be able to enjoy the program in comfort.

The performances will be at nine and eleven o'clock in the morning and at one, three and five o'clock in the afternoon. A limited number of tickets will be issued for each performance.

The attention of parents is called to the fact that tickets, as long as they are available, will be issued at the stand in the G-E Club basement preceding each of the programs. To obtain the tickets it will be necessary to present Club family memhership cards.

G-E CLUB TO CLOSE ON HOLIDAYS

The G-E Club will be closed on Christmas Eve, December 24 and Christmas Day and also on New Years Eve, December 31 and New Year's Day. Club activities will be resumed in each instance on the day following the holiday.

Wire-Insulation Maintains Lead In Safety Scores

With the end of 1941 drawing to a close the Wire and Insulation Division continues its effort for a perfect safety score for the year. At the close of the eleventh month the Division stands without a lost-time accident. Thirteen lost-time accidents are recorded in November, bringing the total to 128.

The accident frequency for the Works as a whole is 6.58 and the severity .24. This compares with 4.49 and .28 for the same period last year.

Of the thirteen lost-time accidents last month, three occurred in the Transformer Division; one in the Magneto Division; two in the General Purpose Fr. H.P. Motor Division; three in the Motor-Generator Division; one in the General Service Division and three at the Decatur Works.

Issue Works News On December 24

Next week's issue of the WORKS NEWS will be distributed on Wednesday, December 24. Copy for this issue should be in the hands of the editor, Bldg. 16-3, as early as possible on Monday, December 22.

"I'm An American Citizen"

One of the first responses in the campaign for the sale of Defense Savings Bonds at the Fort Wayne Works came from W. "Pete" Kindt, 84, who retired in 1928 after completing forty years of service. Pete is shown giving his application to Helen Gellert, Bldg. 18-3. Why did Pete buy bonds? He gives the answer—"I'm an American citizen. I'll help all the way through to the best of my ability."

REMEMBER PEARL HARBOR

War Materials Speeded By G-E Sunday Workers

The Fort Wayne Works assumed the appearance of an every day work day last Sunday when approximately 2,500 employees reported for work to help speed manufacture of materials needed by U. S. Navy and Aircraft Ordnance. Two views at the gates are shown upper left. Upper right and center shows the workers relaxing during noon hour. Lower left shows the Motor-Generator crew ringing in and lower right a view of the parking lot on Sunday morning.

American and British Technical Resources Assure Victory, Says G. E. Scientist

Victory for the Allies will be assured by the combined scientific and technical brain power of the thousands of American and British scientists, Dr. C. Guy Suits, assistant to the director of the General Electric Research Laboratory, declared in an address.

He spoke on the General Electric Science Forum on the subject of "A Scientist Looks at the War."

"Scientists in America already are at action stations," Dr. Suits said. "Indeed, scientists were among the first in this country to recognize the deadly threat to our institutions which the Axis powers embodied.

"Scientists saw that freedom could not exist under totalitarian rule, and they knew that freedom was the vital breath of science—freedom of thought, freedom of inquiry, freedom of speech. They saw the truth, the goal which all science seeks, was being debauched in Germany to serve the aims of statecraft.

"Even before the national emergency was declared a year and a half ago, many scientists who clearly saw the approaching peril were chafing under their inability to serve the cause of defense," Dr. Suits continued.

He pointed out that British science played its part in foiling Hitler's plan of softening England for invasion.

"Everyone who reads the newspapers knows how quickly the magnetic mine was overcome," he explained. "A far more difficult problem, that of the bombing plane, has been solved by the radio-locator—a fact made known publicly by Lord Beaverbrook himself.

"And now British scientists are being supported by thousands of American scientists, accurately informed of the multifarious technical problems of this highly mechanized war, are well equipped for attacking those problems," said Dr. Suits.

He mentioned that in the first World War, American research laboratories made important contributions to the successful outcome, and today "there are far more laboratories, bigger and stronger than ever before."

Commenting on the mobilization of university scientists for war, he said that research at American universities is far more extensive and of higher quality than in 1917.

"Just as the combined munitions production of Great Britain and the United States will surely surpass that of the Axis, so our combined scientific and technical brain power will far exceed theirs," Dr. Suits concluded.

Regional Parts Warehouse Party

The Regional Parts Warehouse Association held its Christmas dinner party in the Old Fort Room of the Indiana Hotel last Saturday. About everyone in the department attended, and Mr. and Mrs. Art Vinson were our special guests. Various members of the organization participated in the program. As a special feature, Jimmy Bucheit, the master of ceremonies, presented several of Nell Green's dancing students. Santa Claus, with his gifts, climaxed the program. The party, which ended with games in the dining room and dancing in the cocktail lounge, will be remembered as "tops" for the year.

NEWS THROUGH THE PLANTS

From The Feminine Viewpoint

By Hilda Barthold and Frances Krauskopf

Christmas is so much more a matter of spirit than it is a certain date on the calendar.

Now is the time of year to begin sampling the Christmas fruitcakes which have been ripening in the cellar for almost two months. And along with fruitcake come Christmas cookies, Christmas trees, angels, Santas, stars, covered with icing and sprinkled with dainty pink, blue and red sugar. Or springerlie, hard as a rock, flavored with anise, and with "pictures" on top. And crumbly date and nut bars—lots of nuts for which we went through much mental torture as Sister wielded the hammer, and because of which there is at least one smashed finger among the family fingers.

And what is Christmas without fudge? Divinity, chocolate, caramel, with nuts or without. Seven times we tried our hand at the art of making fudge—and it really is an art! We followed the recipe carefully, word for word, and exactly as it read. Four times we had taffy; twice we had gooey cake icing; once we had fudge. And that once we didn't watch what we were doing, so we'll never know how it happened, or why.

And when the tree is decorated, it never looks like those in the pictures. After five or six people have worked at the poor thing, giving five or six "interpretations of art", can you blame it for looking a trifle tattered? But it was a lot of fun anyway, and that really is the important thing. It wouldn't seem like Christmas either if all the lights burned the first time they were turned on. Or if, when you proudly lead guests in to see "the tree", there would not be a gaping black hole on one side where a burned-out bulb has blacked-out a whole string. Unless, of course, you are progressive and have the new-fangled kind.

When we go Christmas shopping, we spend quite a bit of time watching people: little children around toy counters, completely and blissfully unaware of Mamma's disapproving looks; little boys and girls picking out their first gifts all alone; girls who have reached the stage of development in which they exchange gifts of cosmetics, most of them horrid; boys and young men buying candy for their sweethearts; young women buying luxuries or special household gadgets; blase women looking down their noses at everything that is shown them; women whose hands show the results of years of hard work just looking at things they never can have; women torn between the desire to buy just once something gay and frivolous and the fear of squandering money on useless trinkets; women who must stop to add the cost of each purchase to make sure that the precious Christmas budget will reach, all oblivious to the scorn of the sophisticated girls behind the counters; men who take their youngsters to see Santa; men picking out entirely unsuitable gifts which will mean so much more because the gift plainly shows that the giver has overlooked so much; men trying to get Juniors to concentrate on something they (the Juniors) do not want, usually because the fond fathers think the Juniors should like something else; men at the electric train displays; mothers buying for boys in camp; people buying wreaths for the living and the dead; people buying with a mental eye on what they will get in return; people buying without a thought of receiving anything again. It takes all kinds to make a world, and they come out in droves at Christmas.

And what is Christmas without carols? Carols from the sky, children's choirs, quartets, adult choirs all singing "Silent Night, Holy Night"; the singing of Handel's "Hallelujah Chorus", "Jingle Bells" and all the other songs we hear for such a short time each year.

It's all Christmas, every bit of it. Everyone of us loves it all.

Some of us remember, almost sadly, the Christmases of long ago, the Christmases of sleigh rides and house-to-house caroling, the Christmases when we were children. But everyone in a way lives each past Christmas again in the present, and everybody on Christmas night listens reverently as the angels sing: PEACE ON EARTH, GOOD WILL TO MEN.

Ready To Start Defense Savings Bond Campaign

The above employee group, typical of groups throughout the Works, who are offering Defense Savings Bonds to employees was photographed in Bldg. 17-1 as they were receiving materials and instruction for the campaign. Pictured left to right are P. Lahmon, J. Daley, E. Brown, D. Mosure, E. Tickel, T Brockmeyer, C. Schultz, M. Sprague and E. Kronmiller.

Wire-Insulation Party

The annual Christmas dinner and exchange for the girls in the Wire and Insulation department was held at the Berghoff Gardens last Monday night. Those present were Loretta Gerardot, Lois Hagemann, Margaret Walters, Marie Gehle, Mary Wilson Kelly, Olga Ehlerding, Doris Feuling, Mary Coggeshall and Eileen Spuhler.

Edna Martin, Bldg. 12-B, seems to believe in the old saying "An Apple a day keeps the doctor away." It all happened last Friday morning on the way to work. Imagine, if you can, a big girl like her chasing a big red apple through Linley Avenue gate so she could have her daily apple. Better put it in a sack next time Edna, so you can't lose it.

26-5 Tool Bits

Saturday night must be the "night out" for toolmakers. On the first Sunday work day sleepy eyes, lagging footsteps, and "No Nod" tablets were much in evidence.

The best defense is generally conceded to be a good offense. The Lathe's bowling team is different. The pins they cannot get for themselves they talk away from their opponents.

H. Wittber is thinking of using his influence in having Ross Cohagan elected as Air Raid Warden of Waynedale. The object is to get Ross used to fresh air.

Art Thieme, after spending several hours with the gateman looking for the gift package he purchased, was seen giving Bob Palmer, one of the Apprentice quiz kids, a pep talk on how to label a package so it may find its rightful owner.

It has been rumored that the Company is considering securing Carey Baker's Jazz Band boys for the opening of the roof garden over Bldg. 27. The boys of Bldg. 26-5 highly recommend Carey for the job.

Was Milton Allmindinger regusted and aspiated not to mention himbarrasssed when he couldn't find that ding-busted button with a photographical expression of the one and only Milton of the G-E Tool Department precision plus.

Hank Wittber ought to qualify soon as a tobacco "Humidifier." He gets a *lot of experience* on the proper methods and the correct amount of humidity necessary.

Lowell Welker, having that "Oh! I'm going to die" feeling every Friday morning, blames it on Thursday night's bowling, or eating before going home, or something.

Frank Morgan and that sore thumb! He explains he cut it six weeks ago and had it bandaged so long that the skin all peeled off. So now he can't stand to have a bandage on it or off. Oh me!

Dyna's In The News 26-4

Some of the girls had a potluck and a Christmas exchange at Alice Neuman's house Friday evening. The girls present were Evelyn Edelen, Eulalia Borne, Vesta Scherrer, Ardis Trzynka, Connie Renollet, Betty Jesse, Lois Parkison, and Florence Siebert. Eulalia Borne and Vesta Scherrer were the two lucky prize winners in the games that were played. . . . It's a wonder Minnie Shumaker can find the place for her head and arms when she gets ready to put on her apron. It looks as though Minnie has lent her apron to someone for target practice. The holes are so numerous that if another drop of acid falls it will have a difficult time finding a whole piece of cloth. . . . Pauline Roe, like all of us, has missed the usual weekend. She had a hard time getting to work Sunday morning. It took her a full hour to awake after she did come in late. . . . To change the monotony of wearing dresses Leora McBride thought it would be nice to wear slacks. She didn't want to be the only one wearing them so the other girls at her table said they would wear them also. The next day Leora was the only one wearing slacks. What happened to the other girls?

Deaths

Arlistus A. Karns who retired in 1938 after nineteen years of service died at the Lutheran Hospital. He was formerly employed in Bldg. 27. Funeral services were held on Monday with burial in Lindenwood cemetery.

E. C. Olds, former power plant engineer died on December 9 after a three-week illness. Mr. Olds retired in 1934 upon completion of 40 years of service. Funeral services were held on December 12 with burial in Lindenwood cemetery.

Employees of Bldg. 26-2 extend their sympathy to Howard Shipman in the death of his brother.

SANDY SAYS

A week ago Sunday we were treated royally (a royal rimming) by our former scrap iron customers and producer o' 3rd rate light bulbs and cheap toys. Noo, if their bombs were only as bad as some o' their Christmas tree bulbs, half o' them wouldn't work.

Weel, one thing a Scotsman notices about any war is the cost o' same! Governments spend millions on this and that! Money flows freely and good times seem tae be wi' us. But here we are, going longer between haircuts and about tae go to "margarine" where we ate butter during the depression. Lots o' "jack" but no jell. Oh well, ye can't hai everything,—unless ye own a drug store.

Peculiar, isn't it? All this prosperity, and we're getting worse off.

Weel, here's another peculiar thing. When depressions are here, and there isn't any business, we all think about cost reduction. That's when there isn't any costs tae reduce—nothing tae work on.

But now, when business figures run into the billions, we all get the spending hysteria and forget all about C. R. A good title for this would be, "They'll do it every time."

But let's not do it this time. Let's do some REAL C. R. on the billions.

Better factories, better machinery and conveyor systems, smarter workmen, better metals (all C. R. ideas) will win this war. Planes, tanks, and ships that we're building (and we're building vital parts for "all three" right here) in larger and larger numbers will win. C. R. developments have helped the U. S. to produce planes faster than Germany can right now. C. R. will help us tae produce them entirely too fast to suit G. I. or J.

Weel, as Cousin Colin says (or was it Unc. McWell?), "Be an Eagle, not an Owl. An Eagle is a good scout, but an Owl just doesn't give a hoot."

And remember, Cost Reduction AT HOME WILL HELP JAP REDUCTION IN THE PACIFIC.

Nibbens From 19-4

A Christmas party and exchange is to be held at the home of Magdalen Hook, Bldg. 19-4. Those present will be Rosie Smythe, Ruth Hinkenius, Vera Wells, Violet Kemphues, Mary Roebuck and Limpy Derloshon. . . . Haste makes waste, so found out Edith Roller last Wednesday afternoon. Better reverse your apron, hadn't you Ede? . . . Is Alma Starke afraid of the shortage of "jello". She was really stocking up the other week. . . . We sure miss Rosemarie Kueppers since she was transferred into the other department, but we still see her come chuggin' around here every once in a while. . . . Said Jackie White to the boss: "Have a pickle, puss." How does she get that way? . . . You should see our two latest twins, Dorothy Shipman and Vilena Herbst. They may not look alike, but they dress alike. . . . We wonder who that fellow is that comes up to see Mary Bertch every now and then. . . . The remains of the potluck held by the day girls in Bldg. 19-4 certainly went over big in the afternoon. Peggy, Gladys and Pearl must sure like leftovers.

Sleuthing In 4-6

Congratulations and best wishes to C. J. Monroe, who announced the arrival of a daughter, Faye, last Thursday . . . The girls of the Motor Sales Department had a dinner party and gift exchange at the Berghoff Gardens. The girls all report a very enjoyable time. . . . Jerry Zehendner should, by all means, have a secretary. After inquiring of a number of draftsmen in an attempt to discover who had ordered a certain tracing, he was informed that it had been ordered by someone named Jerry. Only then did he remember that he had ordered it himself. Jerry says it is the Christmas shopping that got him down. We hope it is nothing more serious. . . . Girls, Virginia Selby has presented us with a new problem. She says she has dresses enough for six days of work, but what will she wear on the seventh day? It is something to think about, isn't it? Any good sugges- Jake Sherbondy had better tie a little string around his finger each morning, to remind him to look just before noon to see if his badge is close at hand. It makes it a bit inconvenient when one person has to come in twice just to let another person in once. . . . The younger set of the sub-debs of Bldg. 4-6 held their Christmas dinner and gift exchange at Gardner's Colonial on Monday evening. Nothing was spilled except the information as to who the secret pals were for the past year.

G-E Employees In Action At Camp Shelby

152nd Infantry Photo—L. Anspaugh.

A typical moment in the field exercises for the small unit's training program is caught at Camp Shelby, Miss., as Lieutenant Walter E. Pohler, Adjutant and S-2 of the Headquarters Detachment of the 3rd Battalion, 152nd Infantry (R) radios in a message over the portable "walkie-talkie" radio. Private First Class Warren J. Zelt, the son of Elmer J. Zelt, of the Transformer Drafting Department, records the situation on the map while Private Howard Draper, formerly of the Transformer Cost Department, operates the radio. Lieutenant Pohler was formerly Production Despatcher in the Transformer Department, plant 26-B.

Reflections From Bldg. 4-1

Have you seen?

Betty Shumaker's new "hair-do" which forms a V for victory? We like it!

Taxi?

Max Claud Archbald is having a terrible time in these trying days. He doesn't know whether to continue with his farming or go into the taxi business. Claud overheard in a conversation (as usual) that the taxi business on the Burma Road is a rising and paying proposition. Upon asking him about the chances of an enemy sub coming through the Panama Canal, he replied, "It can't be done unless some one gives them the keys to the lock." I wonder if they make Burma Shave on the Burma Road.

Don't ever let any one tell you that F. Lemper can't play poker, as the boys in Bldg. 4-1 found out differently.

We hope that George Miller recovers rapidly from the grippe germ which has taken hold of him.

Things We Will Never Forget

The speech Al Kissinger made at the Christmas party of December 11.

The perfect Santa Claus at the same party in the person of Ed Klomp, Bldg. 4-5.

The community singing led by Joe Trentadue, Bldg. 4-5.

The D. C. girls of Bldg. 19-2 night shift held their annual formal Christmas dinner and exchange Saturday night at the Hotel Anthony.

Those present were Jerry Bierbaum, Ruth Pretorius, Vera Gahman, Judy Gregory, Katie Felger, Dorothy Julian, Ruby Arnold, Crystal Boyd, Norma Seitz, Wilma Harrod, Sherry Browne and Lillian Browne.

A Word Of Thanks To Elex

The girls of Bldg. 4-6 on behalf of their mothers, as well as for themselves, wish to express their thanks to the Elex Club for a most delightful Christmas party. The mothers were just as thrilled as the daughters at the opportunity of hearing Rubinoff, and they are all very grateful to those who made this treat possible.

Sylvia Bowers of Bldg. 4-3 started a new syndicate known as the Bowers Syndicate, Inc., with a good publicity agent. All went well until Sylvia started receiving a lot of mail and doesn't know from where it comes. She hopes to have the new company working 100 per cent soon.

Do you remember when Harry Parker, Bldg. 4-3, used to be known as "Flicker Parker" of the dear old school days of yore?

Fern Trulove, Bldg. 4-3, is introducing a new smock known as Miss Liberty smock, a real battleship creation.

Thisa And Thata 19-5

We want in this way to wish all who are on our sick list a very Merry Christmas and a glad and prosperous New Year and hope that you will soon be back on the old job! . . . I thought all cars had a gas gauge on them, but evidently Frieda Knoche's new Plymouth doesn't have; she ran out of gas on her way to Chicago and had to hoof it for two miles to get some! I didn't know stations were that far apart between here and Chicago; were you lost or on a back road? . . . Pat Townly had a terrifying dream the other night. Anyway she was climbing a drain pipe to get away from the Germans!

6-B Buzzes

Private Melvin Neville paid a visit to us Monday. Melvin says the snow forced him to leave his motorcycle in Fort Wayne but he'll be back anytime he can get a furlough.

Estel Fortney leaves Thursday to join up with the navy. He is the first of our gang to join this branch of the service—however, we now have six boys in uniform.

We are sorry to hear that Clara Heaston, our leading operator in the winding section is hospitalized—a speedy recovery and return is the hope of all.

Lynn Crawford has returned after spending several weeks in Indianapolis hospital—Lynn is his old self again and he says Lake George will be open next year as usual.

Christmas decorations are up in the Test end of the R & R section. When asked why a waste paper hopper is setting there with the end open Mildred Aker said they expect to catch the Christmas spirit.

We haven't found out just why Bill Walt persistently reminds Ruth Franzdorf that Irwin Homer is leaving for the army very soon. Irwin has been practicing maneuvers on a checker board with Floyd Brown noon hours. Whenever he succeeds in winning two games straight he'll get his diploma.

By the time this is published George Arnold and Lillian Hitzeman of Bldg. 4-3 will be man and wife. Lillian has started her training of George to be a model husband. He was observed last Friday A. M. turning his check over to her. That's the old spirit, Lillian. Start the training early and convince him that women make better home managers than men.

Punch Press 19-5

By Slug

Events have been happening so fast and furious this week that it is rather hard to think of the less serious things in life, but being a true adventurer we shall venture forth as usual to meet our well-known fate.

John Figley started out in the "Parking Lot" business last fall, but so far we have been unable to check the stability of his venture. . . . Walter Griffith threw his doors open to another of these mammoth parties, but being engrossed in a priority job at home, we were unable to attend. According to some of our disciples a glorious time was had by all except Otto Helmrick, who could not have the privacy of the telephone while talking to mama. Mr. Wilson of the night howls gallantly cranked up the blitz wagon and took his departure about 6:30. Well, well, I felt wonderful the next morning. . . . Avery Spayde, always a gambler, bingo or otherwise, gladly reached down in his long pants and pulled out a dime when a fellow asked him to take a chance on a G-E washer—I guess he won it for according to our good friend Bill Wollman, he was presented with an old ½ by 1¼ bent washer, rusty at that; you want to watch them slickers a little bit closer, Avery. . . . "Doctors" Garrison and Jacobs make some interesting diagnoses. Although their advice seems to work pretty well on "Pop" Lindeman, it failed completely on Harry Magner. . . . Have been advised that an expert wash board player is now in the department, no lesser light than Fred Adams himself. We must go out and personally scout him some day, as we are interested in the scientific knowledge of how many jiggers before a tune can make its triumphant appearance. . . . Never having written any poetry, I won't start now, but my hair is just about the right length to make a try at it. So being a modest gent, we'll take the blame, hoping the editor will turn it down, so take a couple of aspirins and continue.

I know of an island, the land of the sap,
They tried to maneuver us into a trap.
The gurgling, murdering, blithering Japs!
We'll never yell "Uncle" to Adolph's clan;
To tell the truth, I wonder who can.
And puffed-up "Moosey" with his pouched out chin,
He's gonna be sorry he poked his nose in.
For soon we'll be wound and start to tick
And the three mistakes will be a pleasure to lick.

Well, yours for classical readin'—
Slug.

During the last World War some of our boys in Bldg. 4-3 served with distinction in the naval forces of our Country. One of them was Harold Hart. Now some of the boys who served in the Army, chief of them Clarence Walterson and A. R. Vegalues, have always kidded Harold saying that the Army always had to do the really big job and that the Navy was secondary. Now that the clouds of war again cast their shadows over our fair land, a war that will require gigantic naval operations, Harold comes back at them with this: Quote—Now you "cootie luggers" can sit back and watch the Navy do a real job.

Seen At The Annual Elex Club Christmas Party

Hundreds of Elex Club members and their guests enjoyed the annual Christmas party held at the G-E Club. Outstanding attraction was the appearance of Rubinoff, famous violinist who gave a program at both the afternoon and evening program. Shown above top left is the reception line, and right the Club members receiving their Christmas gifts. Below left Helen Bleeke is shown with Rubinoff and examining the musician's famed Stradivarius violin. Lower right—Rubinoff and members of the reception committee.

News Around

Kitchen Korner

In tune with our times we find that the current commentary of conversations consist mostly of our country's crisis in this international affair. We are war-conscious; we are wide-awake. Our patriotic pulse beats faster—for the safety of our nation and for all who are dear and near to us. In this military mood, then, we scoop a survey. There are three members of our department whose immediate family is represented in Uncle Sam's services. We are proud to present Ruth Ziegler, the only present-war mother; son Staff Sergeant Byron Ziegler is stationed at Camp Shelby, Mississippi. He is expected home for the holidays. Not so fortunate for furloughs are the two brothers of "Micky Mouse" Marie; Sergeant Alfred Lantz of the Panama Canel Zone and Corporal Henry Lantz, now at Boston. Then, too, Seth Wise has an army brother stationed at Chanute Field, Illinois.

Christmas comes, then, in the not-so-distant future, to a war-torn world. We feel—if for morale only—we should keep the spirit soaring. True—a vast number of people are saddened by the absence of their loved ones; yet for our and our children's undeniable faith in humanity we must pay homage and honor our Prince of Peace and glorify His birthday.

Gathered at a glance are these latest news items: Gone, but not for good, our foreman, Mr. Zimmerman, vacationed the latter half of last week. The Kitchen-Kids were very much aware of his absence and unaware of his whereabouts! . . . Interest in the "male" cost Thelma Johnston all of fifty-five cents to mail a Christmas card to Africa. . . . Irma Schiemann won a "his" and "her" towel set at a bingo party recently. So, if our advice is heeded, a man yet to complete the set, is all that now is needed. . . . Our "gabby gals" were caught gabbing oft of Rubinoff—before and after the Elex party. . . . Seth is a superman. To an inquiry about a new haircut, he, (quote) "merely lowered his ears." Later he admitted it took two trips to the barber to get desired results. Jake, too, looked as if he had a new haircut. . . . And Alyce Tullis and Irma Schiemann now possess new permanents. . . . Gone but for good are Marceil Sloan, Helen Teeters, and Marjorie Keaffaber, three of our serving girls. Marceil returns to Warren; Helen remains in Fort Wayne, and Marjorie is undecided on her future destination.

We return to our little niche along the poet's row with:

Our Christmas Card

The Kitchen Kids at their best
Want you and yours to be fully blessed
Of the Yuletide joy and cheer
This we say, and so be it
What, then, is more appropriate,
"Merry Christmas to you and a Happy New Year."

The Kitchen-Kids.

Hermetic Office 17-2

We hear that since our last writing George Langenberg has been rabbit hunting and has actually produced the rabbit which he promised to Merle. Right now we believe George has fulfilled his promises one hundred per cent except for the fact that for some time he has been talking about how he could bring in some popcorn balls. Personally, we believe the watchman will let him pass, if he leaves a sample.

Tuesday evening the girls in the office along with several of their former associates enjoyed a dinner and Christmas exchange at the Hitching Post. We were glad to have Emma Sherbondy and Helen Buuck with us.

If prizes were given for early risers, we're sure that Violet Ray would win without opposition. Recently she woke her sister, dressed for work, and was ready to start out when she noticed it was only 1 o'clock instead of 6 o'clock. My, my! what time did you go to bed?

Suzy Sleuth.

A letter to Santa from Lawrence Shuster, Bldg. 26-2. "Dear Santa: Please bring me a big knife—that's all I want."

Louie Sordelett, Bldg. 26-2, will have to carry sand in his car on these slippery days. He drove up to the curb and couldn't get away. Those horns are irritating say we.

— REMEMBER PEARL HARBOR —

NEWS THROUGH THE PLANTS

Plastic Flashes

We went peeking over Santa's shoulder again, and these are some of the letters we read:

Dear Santa: Please send me a clay pigeon that will hold still while I shoot at it. Yours truly, Cecil Young.

Dearest Santy: I would appreciate a comb, also a part in my hair. Thank you too much. Clarence (Wild Hair) Favourite.

My Dear Mr. Claus: If you would only send me a deer, I would appreciate it. It doesn't need to have a tail. I got one of those when I went hunting. Yours, J. Sowers.

Dearest S. C.: All I want is a surefire method of staying away from candy, cake, etc. If you give me that, I promise you won't know me next Christmas. Yours for a slimmer year, J. Stucky.

S. Claus: All I need is a small grooved ledge to fasten above my ears so that I can balance my pencils, pens, paint brushes, compass, and other miscellaneous items, better. Yours truly, W. I. Pribble.

My Dear Mr. C.: Please bring me a supply of Bourbon so that when a certain bunch of fellows come to my house and demand it I'll have some. Sincerely yours, Edward F. Fogel.

Dear Claus: Please bring me some nice odoriferous haid oil. I'm in need of a new supply. It's called "Knockemded." Yours, Carl (Shiek) Saaf.

My Dear Santa C.: I've got an awful problem. Now that I've got a kitchen, I need a chef's hat. Otherwise I just don't look professional. If you see an old second-hand hat floating around, please grab it for me. Mrs. D'Agostino's boy, Tony.

Santa Claus: I would appreciate receiving a few drawings with assemblies and more specific details. Little Soapy Summers.

Those are just a few of the letters we read. We hope everyone gets the things they want.

We three little gals had a wonderful time last Friday night. We went to a banquet and had the most wonderful dinner and the nicest entertainment. Oh, why don't we do this more often?

Betty Perry isn't so happy looking nowadays. Jimmy is talking of enlisting in the Navy.

We've been told that Ed Fogel has already got a head start on his New Year's resolutions. He's attempting to reduce "that" waistline.

The girls in Bldg. 12-3 would like to know who is responsible for putting that "twirl" curl in G. Gilbert's hair?

Who's eating limburger cheese about 10 o'clock every morning. Could it be you, Louie Black?

And so from our department to the rest of the plant goes the biggest wish ever for the Merriest Christmas of your life.

G'Bye now, The Tillies.

From 26-4

It wouldn't do for Santa to bring Ann Fisher, Bldg. 26-4 an alarm clock for Christmas, when three of them can't get her up in time now. Better wind up the cat and throw the clock out, Ann! . . . Donna Lindley, Bldg. 26-4, is getting in practice for the holiday season by eating two dinners in one day. How about that diet, Donna? . . . Why the big blush last Wednesday, Carl Satterthwaist, Bldg. 26-4? And girls, was his face red? . . . Maybe Sam and Herb, Bldg. 26-4, can explain about the measuring of foreheads. Does it have something to do with the Army, boys? . . . Glad to see you back with us again, Frieda. Good luck!

Motor Generator Static

Proof

"Curley" Mannan has proven his point. Let us mention in advance that "Curley" is not so named because of an abundance of hair but rather the opposite, part of his scalp is as devoid of hair as the Gobi desert is lacking in vegetation. However, those "hecklers", Berning and Painter, asserted that in their opinion, he never had hair, upon which our hero produced a series of pictures dating from the distant past when he was a cherubic babe up to the present time—a complete pictorial story of the receding hair line—reminded me of a book, "The Rise and Fall of the Roman Empire". However the boys are convinced—he proved his point.

Double-Cross

While this revealing story may be considered by "Doc" Dwight Myers as a double-cross—may even ruin the sale of his "super duper" elastic exerciser (if he ever completes this piece of equipment). We still feel that the public in general and the ladies in particular should be informed of all advances made in the science of producing a "body beautiful". Emilou Allendorph's slogan is, "Why enjoy yourself and grow fat, when you can go hungry and lose weight by our system?" It seems the lady has compiled a series of tables showing how, by eliminating certain parts of your diet and without exercise (you will probably be too weak to exercise) you can lose weight the easy way. Think of the saving in food costs if Emilou's system were universal, two could literally live as cheap as one, this would encourage more weddings and more weddings would mean, well we could write for an indefinite period on the benefits to be derived from this system. And while Dwight may feel he is being "double-crossed", we believe that in the long run he will benefit from this new discovery, for after a certain period of abstinence from food, folks will eat more than ever—thus establishing a new market for his product.

Most Confusing

These modern gadgets are most confusing, you push a button, a bed falls out of the wall, the bathtub rolls out from under the table, the radio plays hot music when the kitchen stove materializes from its inwards and a device begins to prepare the family meal. The Dudlo office has some of these features, for example a cute mail elevator that runs up and down on wires. When Nadine Recht viewed this marvel of science she gasped, "A cricket cage."

Most confusing we say . . . . .

Think We Are Good

In these days the proper utilization of space by industry seems to be an important factor. I used to feel that man was the true arranger, the one best fitted to make layouts and locate equipment with the greatest saving of space. I admit now that I was wrong—the female of the species has far outclassed we men in the ability to pack much in a small space. I happened to hear two ladies discussing what they carried in their purses. Said one, who carried a purse about fourteen inches long, eight inches high and two inches thick, "I have my pay check, change, two pairs gloves, three handkerchiefs, driver's license, one Elex furniture ticket, six fur coat tickets, two mirrors, lipstick, powder, rouge, gum, scrap paper, six pencils, two hair ribbons, comb, nail file, scratch pad, one pair toe rubbers, house key, car key list of 100 best sellers Elex card, G-E Club card, Red Cross card, collection of pins, fountain pen, grocery slips, check stubs, needle and thread."

When she had finished enumerating the items listed above the other lady remarked, "Well, I have more than you, I also have glasses, cigarettes, matches and nail polish in mine plus perfume and a roller skating key. I ducked low in my coat collar and crept away sad and disillusioned. This thought kept running around in my head, "And we men think we are good".

A Welcome Guest

MERRY CHRISTMAS AND A SAFE NEW YEAR

—but not a privileged character when it comes to getting by our gatemen without a button. Still Santa "rates high" when as you see in above picture, a pretty girl is chosen to pin on his button.

Gladys Beverforden is the lucky girl and John Bobay is the observing patrolman.

For several days Santa has been seen at our gates calling our attention to the Christmas greetings of the Safety Committee—"MERRY CHRISTMAS AND A SAFE NEW YEAR" IS THEIR GREETING TO YOU. YOU CAN ADD TO YOUR COMMITTEEMEN'S CHRISTMAS CHEER BY EXTENDING THE SAME GREETING TO HIM.

8-2 News

Gerry Foerster and Margaret Walter were comparing experiences in regard to slippery roads, wrecked cars, lacerations, etc. And hoping that others will profit by their mishaps and drive oh-so-carefully during the winter months.

Here's something mighty ironical. About four months ago the Wire & Insulation office force started a weekly Defense Stamp pool, at the suggestion of that good citizen, Ray Kierspe. Every week the lottery box is shaken round and round and out come two lucky numbers. So far everyone participating has won two, three, or four times . . . except Mr. Kierspe, who has a perfect record of no wins. What's the world coming to when you can't depend on the law of averages? But we all say, "Don't give up hope, Ray."

Give "Men and Volts" for Christmas. A book every G-E employee will want to own. Special price to employees. Employees' Store open from 8 a.m. to 5 p.m.

Gossip From 19-5

Marie Martz is going in for a dash of red these days. Marie was seen looking at dishes the other day. We heard her tell the clerk they just must have a dash of red in them. Did you get what you wanted, Marie? . . . What's the matter with LaVon Campbell? Since she came back from Florida, she was asking where in the world do they keep the WORKS NEWS now? What would you do if you were gone a month? . . . Kathryn Hepker was seen the other Saturday night walking down one street, then another, then she was seen on market (the reason was Kathryn forgot where she parked her car) . . . Mary Lunz is the latest gal to sport a sparkler; from what we hear the big day is Christmas. Congratulations, Mary. . . . The girls in the field section of the Series and Specialty motors gave their annual Christmas party Thursday evening at the Berghoff Gardens. After a delicious dinner gifts were exchanged. Those present were Helen Meese, Helen Clendenen, Henrietta Deck, Martha Scherzinger, Emily Nierman, Kathryn Hepker, Hillis Wearley, Lorinda Beyerlein, Ella Hartnett, Helen Leffler, Doris Kleber, Margaret Reed, Jean Doan, Jane Getty, Constance Deel, Mary Thompson, Thelma Steenman, Mary Maljak, Malinda Gehle, Regmore Engeman, Helen Welsh, and Kathleen Moran.

Since Leo Persing, Bldg. 4-6, realizes by now that he can't sleep all the time, he has seen to it that he is as comfortable as possible while awake. He has a nice green cushion for his chair and soft felt pads for the arm rests.

Uncle McWell Of 26-2

Jingle Bells

We don't suppose that some of the older-dyed-in-the-wool skeptics will believe our story, but we've just returned from a flying trip to visit Santa Claus up at his northern home. In view of world conditions this year, we just wanted to be certain that Mr. Claus still felt that it was worthwhile to do his traditional bit in kindling the warm, inward glow that the reverent pageant of Christmas brings to man. Patient old soul that he is, he's still going to deliver on the route—with only one or two exceptions!

He had only one request to make of us. Somehow a letter from a father to his son at college miscarried, and was delivered to the North Pole by mistake. The original address is now lost and so Santa asked us to reprint the letter, hoping that it would reach the rightful owner:

Dear Son,

I do hope you will come home for the Christmas holidays. Mother and I have arranged everything so that we will be ready to receive you. The cars are going to be overhauled and painted during the vacation so that you will not be able to wreck them. Your brother's bank has been emptied and the money deposited in the bank where you can't get it. My ties, shirts, socks, gloves, tux, etc., have been placed in a strong trunk for which I have the only key. My cigars and cigarettes will not be available as I am also locking them in a humidor. I hope you will come to see us. I know we shall enjoy your visit very much.

Love,
Dad.

P. S.—I also fired the maid.

Do Not Open Till Christmas

We will have to admit that we did peek at the list of presents coming to some of our friends at work, while poking around Mr. C's bewildering workshop.

We can remember only a few—and they are:

"Dutch" (Let That Be a Lesson to Me) Wellman—Half interest in the Bob Inn; and a new, pop-bottle protector, with an attached seat, for his baseball umpiring.

Marie (What now?) Pence—A foolproof system of order cards that will always be where she wants them, when she wants them—and no questions asked.

Charlie (Don't You Believe It) Price—Instead of wasting his tremendous vocal capacity over a telephone, when calling outside vendors, one, heavy duty, reinforced, swivel mounted, speaking tube, that he can merely point in the general direction he wants to talk.

Evelyn (Happy Day) Kruse—Enough dimes to buy an electric recorder in order to capture for posterity the beautiful singing that wafts its way daily across her desk.

Ted (The Hard Way) Kubiniec—One large sled, to replace pair of ice skates purchased, under malicious and cunning pressure, on the assumption that all men are equal, being created thus, with or without practice.

Sandy—More Goods for More People at Less Cost. C. R. plus.

And from Uncle to all of you—A Merry, Merry Christmas!

There will always be a Santa Claus—give G-E coffee makers for Christmas. Employees' Store open 8 a.m. to 5 p.m.

— REMEMBER PEARL HARBOR —

NEWS THROUGH THE PLANTS

Winter Street Rumblings

Johnnie Schwanz usually "opens his mouth and gets his foot caught in it"; nevertheless he has all the traits of a news reporter, the main one being just a little bit too inquisitive at times. Such it was last week. Johnnie saw "Small Fry" sorting something in her desk drawer and this aroused Johnnie's curiosity to such an extent that he finally asked her just what she had or what she was selling.

Dorothy replied in her shy little way that she was selling chances on a washer.

Johnnie insisted that he wanted to take a chance and so after a great deal of persuasion Dorothy finally sold him one for a dime. Lo! and behold: Johnnie won—not a washer like he had pictured in his mind, but a small round steel one.

We're hoping "Marty" is getting lots of help from Johnnie on washdays.

The toolroom is an awfully quiet place since so many of the boys have been lent to the power drive section. Kenny Mettert remembers a time when it was this quiet and it was the time Charley Kensill was off sick. . . . Like all men Dale Weaver has a complaint to make about women drivers. Dale's wife was using the car the other day and while she innocently powdered her nose, another car which was driverless ran into the Weaver's car. It was all because the driver of the driverless car had forgotten to set any kind of a brake while the car was on a grade. . . . Congratulations are in order for "Speed" Rip Watt, who became the proud grandfather of a baby girl, Judith Ann. Rip was walking around minus buttons on his vest for quite some time. . . . The Christmas spirit finally broke loose in the factory office last week when Millie Atherton donated a large fruit cake—at ten cents a piece. Smart gal! . . . That big scratch on Clarence Kreischer's face was not put there by an angry rabbit. He purchased a new pair of pajamas and removed all the pins and hastily crawled into them. The pin that he missed got him right beside the eye. He still thinks that if you can't wear old pajamas, the old-fashioned nightie is still the safest. . . . Generally when you go to a shooting gallery you shoot for the prizes. Marge Scollard revises this. She shoots *at* the prizes and what's more, she hits them and not only hits them, but breaks them. When they finally got the gun away from her, the angry proprietor insisted she pay for the prizes she shot. . . . Ruth English says she can definitely and indubitably prove the efficacy of the new G-E sun lamp. Do they sunburn and how? We haven't noticed her sunburn but she says "never mind, I'm sunburned." . . . Kenny Hand is looking for a summons to the army if his latest feat gets out and it's getting out now. He states he was watching a chicken hawk circling high in the air and he sez to himself, sez Kenny: "I kin hit that critter up thar with my .22 rifle, I kin." So he gets his rifle and takes a shot at it. Was he surprised when the hawk fell to earth dead. He actually hit it, believe it or not. . . . We wonder who Bob Dent is trying to impress. We figured he'd reached the top when he started wearing pink silk shirts but now of all things, he is using *Hollywood Queen* face powder. His latest worry is whether he's using the right shade. . . . Claude Gettys had a little overcoat trouble at the last foreman's party at Gunnar Elliot's. There was only one coat left and that was the one Claude was stuck with. When he discovered the size he figured he had enough for two coats for himself. After a couple of worried days, it finally came to light that Mr. Hart of Broadway was stuck with a coat he couldn't even button. So the two got together. . . . Bernie English realizes at long last that Winter is here. After starting across the street he suddenly realized from the position he had just assumed, that his shoes were on in the wrong place. They weren't doing any good on his feet. . . . E. Smith very graciously offered to drop Catherine Hively off at her home the other afternoon. All he could do was offer as he couldn't get his blank blank car started. So Cath had to use the bus after all. . . . Dorothy couldn't get her coffee hot enough at noon lunch, so she decided she'd carry her lunch and a thermos bottle of coffee. Good idea, but the second day she ate her lunch at 10:30 and forgot the coffee. Now what kind of system is that, anyway?

News On The Nose

From Bldg. 4-5

All out for defense 100%, proudly reports Tom Wilkinson. Every one in the assembly group on Bldg. 4-5 is the purchaser of a defense bond. . . . Because Phyllis Manus felt very lonely working by herself last Sunday, she created a dummy out of packing wool and placed it in Frona Witsche's chair. Then she kept herself amused by carrying on a conversation with the woman who couldn't talk back. . . . Walter Rehling thinks that the General Electric Company should put a third gear on the elevator, so he won't have such a tough time beating the whistle. . . . Louis Hickernell rushed right up to the time clock and rang out with the rest of the girls on the five-of whistle the other day. Tsk, tsk, a fella has to have some privileges. . . . For the information of ye lost and wondering souls, the Bldg. 4-5 tool coop has now been moved to the assembly section under the loving care of Robert Morris. . . . Poor Ila Baumgartner, now Mrs. Ed Matter, tugged three boxes of candy bars to work Tuesday morning over the icy roads only to be reminded at the gate of the new ruling—no packages to be carried within the gates. Oh, You big, bad man! Now how will we get our treat? . . . Wedding bells also mingled with the Christmas chimes for Alberta Meyers, who became the bride of Gotthold Springer on Sunday, December 14. . . . Our best wishes for good luck go with Violet Scott on her way to Hattiesburg, Mississippi, where she will join her husband, who is in the service of the United States Army. . . . Forrest Bunner, like the modern Paul Revere, was seen down town hailing his flock into work for Saturday and Sunday. Several young ladies reported that they were hailed on the street and marshaled into duty as they tried to finish their Christmas shopping. . . . It is reported that Ruth Hess has some difficulty getting used to her new specs. Wait'll you've worn 'em as long as we havé, Ruthie; then it'll be an old story. . . . We are certainly going to miss Bachelor Jim McGill and his unpredictable antics. He's being transferred to Bldg. 4-1, so you'll have to stop threatening Snoopin' Sal. Jim—we don't scare any longer. . . . Besides, Jim did look so cute down on the floor playing with his musical top at the Christmas party. . . . And Fred Campbell was quite content when Pat O'Brien gave him his rubber doll for the baby buggy he received in the gift exchange. . . . We wish to extend all congratulations to Herb Siebold for his good sportsmanship in speaking at the dinner when his voice was so hoarse, he didn't even recognize it himself. . . . With a twinkling eye and a sparkling left hand, Nora Belle Auey is the happiest girl at work. How about it, Nora? . . . Margaret Spaulding says she's going to do better than that. She's going to get both rings at once. . . . What, oh, what did Elizabeth Gay mean when she said she had more trouble than if she had a half dozen kids. Really, we don't intentionally mean to aggravate you, Elizabeth. . . . Poor Mardell Zumbrum has to walk to work since Bethel Drake has chosen to come to work an hour earlier. Maybe she should do like Maggie Slagel, who claims she slid all the way to work Sunday. But we don't know whether to believe her or not. It's a long way to South Whitley, Maggie!

Employees' Store open 8 a.m. to 5 p.m. until Christmas.

Well, it seems that some of our co-workers in Bldg. 4-3 still persist in doing it, that is, forgetting their identification badges. The latest one to fall victim of forgetfulness in this respect is our delightful little lady, Helen Bunnell, who was observed last Monday morning cooling her heels in the gate house while her father was rushing madly to her rescue with said button. We still think that it would be a capital idea to have our identification tattooed upon our arms.

Striped shirts seem to be the vogue with some of our co-workers in Bldg. 4-3; for instance, Art Brandenburger's resembles pillow ticking and is a knock-out. Frank Kimble's, while quite boisterous, is a little more conservative. Iva Bubb is sporting one that is tops with us; Newton Poland has a new one with neat red and black stripes, which he claims is the latest thing for fall and winter. We have often wondered what became of Newt's famous pink shirt. It really was something to talk about.

Add the loveliness of eight favorite hymns as sung by the famous G-E "Hour of Charm" all-girl singing orchestra to your musical library. On sale at the Employees' Store. Store hours from 8 a.m. to 5 p.m.

Fort Wayne Plastics Products Gain Awards At National Meeting

Top left—Ann Fox operating the duplicard and Miss Fox and Viola Yanney examining the clarinet reed on which national awards were given.

The Plastics Department of the Fort Wayne Works gained honors among the country's producers of finished plastics products at the annual plastics products competition conducted recently in New York.

Among the first prizes awarded was one for a clarinet reed not only developed at this Works but also engineered here. Honorable mention was given for the duplicard which is being manufactured here at the present time.

"It's A Joke"

There was little work to be done in the office on Christmas Eve, and nobody felt like doing that little. Four of the men finally wandered into one corner of the office and relaxed. They made themselves comfortable, told stories, and laughed every now and then.

The door opened suddenly and the Big Boss stood before them.

"Gentlemen, gentlemen," he cried, "what's going on here?"

The four men leaped to their feet.

"Is this a time for loud laughter?" the Big Boss went on. "Don't you realize that the rest of the staff is trying to sleep?"

* * *

Passing a fruit stand owned by an old merchant a man was surprised to see a large dog gobbling down the fruit while the proprietor stood idly by. The dog ate a pear, chewed up an apple, and crunched an orange.

"Why do you allow that dog to eat up your fruit?" he asked.

The merchant waved his hands easily—"Oy, what can I do?" he asked. "He's a police dog."

* * *

"Say, waiter, is this an incubator chicken? It tastes like it."

"I don't know, sir."

"It must be. Any chicken that has had a mother could never get as tough as this one."

* * *

Mr.—"But I can't buy this overcoat. I can't wear it. It's three sizes too large for me."

Mrs.—"Remember, dear, it has to go over the car radiator this winter. That's what we must consider first."

* * *

He fondled the big check he had just received, representing the commission on a deal he had closed. "At last, my dear! Now that we have money, I want you to go downtown tomorrow and buy yourself some decent clothes."

"I shall do nothing of the sort," his wife replied, "I'll get the same kind of clothes all the women are wearing."

* * *

The salesmanager dashed into the chief's office, his face purple with rage. "That new salesman is getting too confounded impertinent—look at this letter—he says for me to go jump in the lake and to tell you to go chase yourself."

"Smart guy, eh?"—replied the chief, "well, we fire birds like that. . . . He's been with us three months now—how much business has he done?"

"$300 the first month, $4,100 the second month and $19,000 the third month," replied the S. M. reading from his note book.

"M'm," grunted the chief, scratching his head—"I often think myself I ought to take a little more exercise, and possibly swimming might not do you any harm."

Locals To Meet Ayers Ville Cagers

The Ayers Ville basketball team, from Defiance, Ohio, will meet the General Electric Club Sunday afternoon at 3 o'clock at the Club Gym. The Defiance team captured the Northwestern Gold Medal Independent Tournament last year and they are capable of bringing defeat to the G-E team. A prelim will precede the game. The game will be free and a large crowd is expected to attend.

Micrometer In Use For 70 Years

Probably one of the first micrometers made in this country is one of the proud possessions of W. R. Danford, Bldg. 19-5. The instrument, shown above, was the property of Mr. Danford's father and it still holds within .001 of an inch although it is seventy years old.

SPORTS SPOTS

By STAN PRINCE

Let's start it off this week by reviewing some of the Inter-department League games of the last few nights. In last Tuesday night's games, Apprentice B went down fighting to a band of Messenger boys 24 to 17; Transformer outlasted West Side 38 to 35; and the Wire and Insulation team won a 34 to 24 decision over the Squares. In Thursday's games, Transformer defeated the Squares 42 to 26; Small Motor held a twelve point advantage and managed to win by a 32 to 30 score from Wire and Insulation. In the feature game of the evening, the Main Office team suffered their initial defeat at the hands of the Magneto Ramblers 32 to 26.

Main Office held a two point advantage throughout the first quarter but from then on it was all Magneto as they began to hit the trail. Main Office connected on only four out of twenty foul shots and this was the deciding factor. Bruick was high man for the Magneto bunch with 17 points while Imel was the scorer for Main Office with eight points. The Apprentice B team really has tough breaks as only five men showed up to make the team. What's the matter with the Apprentice boys over in Bldg. 12? Let's boost that team.

The Messengers, a team that walks all day and plays basketball all night, has turned in several good games and before the year is over, they expect to trip all the favorites. Wire and Insulation has a great player by the names of Baals who really can handle himself. Nice going, fellow.

Transformer, West Side and Bldg. 4-4 still keep coming. They are all good teams and are building for the tournament. This week concludes the play for this year and when the teams come back out on the floor on January 6th you will undoubtedly see a lot of difference.

Don Bruick, Magneto forward, retained his scoring lead on the league as he garnered 17 points in the Main Office tussle to run his total to 36 for two games. Bandolier of West Side follows in second place with 26, while Baales of Wile and Insulation has 20 points for third. Joe Close has 19 for fourth and Augsburger 17 for fifth. There is a two-way tie with sixteen points apiece for Langenberg and J. Haas. In case I have missed someone, please let me know and I will try to remedy it in the next issue.

Bowling

Bowling for chickens seems to have caused many of the better bowlers to slip. It seems that chickens are given to the men who make the most pins over their average. Right now, I can name many players who don't even carry their average although it is on the bottom of the list. Good luck, fellows, for this week is the last week of bowling till after the Christmas rush is over.

Basketball

We sometimes wonder just why basketball teams don't start playing at the start of a game instead of waiting till you can practically hear the sound of the gun. Ask Wire and Insulation about that. It's too bad a certain team couldn't win by 20 points for they really missed a tough Zollner game. We wonder also about the way the officials call them. No offense, fellows, just kidding (?).

The G-E Club Team is out in front of the City League and the way it looks, the Club may capture the championship. The team is riding on the crest of a long winning streak and they will be trying to keep it going. Good luck in future competition.

The crowds at these games are quite tremendous; in fact at last Tuesday's game I counted twenty-two people, including the officials and timekeepers watching the ball game. It just seems that if these fellows are playing for the benefit of your department, you should come out and back them. Thanks a lot for your cooperation and I do wish you the best of Season's Greetings.

For publicity in the Works News, please turn in your material, preferably box scores to me before Monday at 3:00 P.M., because that is going to be my new deadline. This includes the Owl League, Ping-Pong, and Volleyball. All material turned in late will be held over and possibly thrown away.

Elex Second Shift Bowling Team

The Elex one o'clock Wednesday Bowling League would like to establish a waiting list for girls who wish to bowl in that League. If any girl is interested, she may contact Sophie Bodigan, Bldg. 4-4, who will add her name to the list.

Notice to Employees' Store Patrons

Word has been received by the Employees' Store that further shipments of General Electric automatic toasters and General Electric mixers cannot be made to the store before Christmas. The announcement is made in view of the considerable number of reservations for these two appliances made by employees who desired them as Christmas gifts.

Volleyball

Volleyball League standings as of December 12, 1941.

Due to remaining schedule and postponements, standings shown are misleading. Winter Street with no remaining games to play in first half may gain lead if one of the two teams yet to play S. M. office can win two games of the six remaining.

Main office coming along strong has three games to play against leaders. Don Porter who has taken over management of Transformer is finding talent in his gym classes and may be expected to strengthen his team in second half.

IN THE ROUGH

By WALTER SUNIER

A short time ago we ran a story about the matches of Edgar and Hemphill versus Allen and Lee. The contests were hotly contested and at the end of three contests they were still all even. We stated that there was a rumor that Allen and Lee finally won. The following week we ran the same story in a garbled fashion without any correcting or editing and just as it came from the typewriter.

It seems as if Allen and Lee are really under the impression that they can beat Edgar and Hemphill. Edgar and Hemphill take exception to this. We have heard also that Allen openly claims he can beat Hemphill and assumes a confident air about it. Whether or not this is because the golf season is a long way off we do not know.

Edgar and Hemphill take violent exception to the implied superiority of the opposing pair. They state that every care must be taken in upholding the tradition of reportorial accuracy when reporting about Allen and Lee when they are on a golf course playing what they call golf. That is the first count. The second count, is the publicity. Edgar and Hemphill did not mind the first story since it was printed in English but they did mind the second printing in Pig Latin because Allen and Lee could easily read it. Now, we are in the middle of this thing on account of the Pig Latin version and generally it is the man in the middle who gets something. We'll take strawberry.

Decatur Gecode Club Christmas Party

One hundred and twenty members of the Decatur Gecode Club, representing the largest attendance on record, attended the annual Yuletide party last Saturday evening at the American Legion Home. A Christmas program was enjoyed.

The season's greetings were extended to club members by Ann Murtaugh, club president, in behalf of the officers. It was reported that club members had responded with a donation of $25.00 for a request for donations to the Good Fellows Club.

The program concluded with a gift exchange with Santa in charge.

The committee included Sana Kunkle, chairman, Fern Passwater, Catherine Weiland, Helen Gerke, Bessie Ward, Revia Stauffer, Annis Mae Merriman, Mary Arnold, Mary Koos, Marie Auman, Esther Strickler, Marcella Bleke and Betty Ross.

Games Postponed

Since the Holiday Seasons are approaching ,there will be no more City Major competition till after the New Year is celebrated. There will be no league play, either major or minor, at the G-E Gym until the new year.

— REMEMBER PEARL HARBOR —

"We Have Been Asked For The Impossible Let Us Do It As Usual" -- President Wilson

Supercharger Pioneer Is Accorded High Honor

Dr. Sanford A. Moss, Lynn River Works and the U. S. Army Air Corps jointly received from Vice-President Henry A. Wallace at Washington Wednesday noon, December 17, the 1940 Collier Aviation trophy for "outstanding success in high altitude flying by the development of the turbosupercharger."

The trophy is awarded annually by the National Aeronautic Association "for the greatest achievement in aviation in America, the value of which has been demonstrated by actual use during the preceding year."

Major General Walter R. Weaver, Acting Chief of the Army Air Corps, represented the Air Corps in the ceremony at the White House. Others present included: Charles E. Wilson, President of the General Electric Company, and Brigadier General Oliver P. Echols of the Air Corps.

The turbosupercharger, which was subject of the award, has been developed over a period of 23 years and is now part of the equipment of the Boeing "Flying Fortress" bombers, the Lockheed P-38 and the Republic "Lancer" and "Thunderbolt" fighter planes and other high-altitude planes.

The trophy, originally donated by the late Robert J. Collier, is the oldest and most widely known aviation trophy. With the exception of the World War years, it has been awarded annually since 1911.

Recipients have included Orville Wright, Glenn H. Curtiss, Elmer A. Sperry, Grover C. Loening, Major E. L. Hoffman, Glenn L. Martin, Donald W. Douglas, Harold F. Pitcairn, Howard Hughes, Pan-American Airways, Capt. Albert F. Hegenberger and others.

Dr. Moss, General Electric engineer, is famous for his pioneer work on airplane superchargers, especially turbosuperchargers, which largely make possible the height, speed and range of modern aircraft. He was born on August 23, 1872, in San Francisco, Calif. At 16, he was apprenticed there as a mechanic in a machine shop making air compressors.

After completing his four-year apprenticeship, he studied mechanical engineering at the University of California. To earn his expenses, he swept the university machine shop, read to a blind student, drove a delivery wagon and corrected examination papers. He received a B. S. degree in 1896 and an M. S. degree in 1900, and was elected to Sigma Xi.

Following work as a draftsman, he went to Cornell University as a graduate student and instructor. A thesis on the gas turbine earned him a Doctor of Philosophy degree in 1903 and a position with General Electric.

He continued to work on this project under the direction of Dr. Charles P. Steinmetz in Schenectady, and then under Prof. Elihu Thomson in West Lynn, Mass. Materials then available, however, were not strong enough to withstand the stresses in the proposed gas turbine but, in the course of his work on it, Dr. Moss developed a number of centrifugal compressors which found wide use in blast furnaces and iron foundries.

Because of the success of his compressors and his gas turbine experience, Dr. Moss was one of the men to whom the National Advisory Committee for Aeronautics turned for a solution of the problem of giving military planes greater power. His answer, worked out in co-operation with the Air Corps, was the now famous turbosupercharger. It is essentially a combination of a compressor and a gas turbine. This arrangement had been proposed in France but had not worked there.

In the turbosupercharger, flaming hot gases exhausted from a combustion engine operate a turbine which drives a compressor for supplying air to the engine. Without appreciable drain on its power, the engine is thus enabled to "breathe" normally in the thin air of high altitudes.

As exhaust gases leave an airplane engine at super-hurricane speed and are destructive to all ferrous metals, dozens of problems in metallurgy and design engineering had to be overcome before the device would operate successfully. It runs at more than 20,000 revolutions per minute, with the turbine red hot at about 1500 F, and the compressor only a few inches away handling atmosphere as cold as 76 degrees below zero.

After ground tests at McCook (now Wright) Field, Dr. Moss, his assistant, Waverly Reeves, and five Army men took a Liberty motor equipped with a turbosupercharger to the top of Pike's Peak in September, 1918. Without the supercharger, the engine which had given 350 horsepower at Dayton at ground level produced only 230 horsepower on the 14,109-foot peak. With the supercharger, the engine actually produced 356 horsepower on the peak.

The Armistice halted most World War research but work on the turbosupercharger continued and on July 12, 1919, Major R. W. Schroeder, chief test pilot of McCook Field, with Lieut. G. W. Elsey, as observer, made the first flight in an airplane, a LePere biplane, so equipped. On August 2, they soared to 18,400 feet and on February 27, 1920, Schroeder flew to 38,180 feet. At this level his oxygen supply was exhausted and he plunged unconscious for five miles, but miraculously regained control of the plane near the ground and landed safely.

On September 29, 1921, Lieut. J. A. Macready took the same plane up to 40,800 feet. Airplanes had never before flown so high. Later Capts. St. Clair Street and Albert W. Stevens set a two-man record with a flight to 37,854 feet to make photographs.

Mechanical advances made successful the gear-driven supercharger around 1926. In this type, the compressor is driven from the shaft of the combustion engine through a speed increasing gearing. It was satisfactory up to about 15,000 feet for most purposes and by 1929, three-fourths of America's airplanes had geared superchargers in engines redesigned by manufacturers in accordance with ideas of Dr. Moss. He also equipped a few automobiles with superchargers and some of them won Indianapolis Speedway races.

Turbosupercharger work, however, continued in co-operation with the Army Air Corps engineers. In 1939, Capts. Pearl Robey and C. S. Irvine set a 1000-kilometer speed record for loaded craft of this type in a Boeing B-17 Flying Fortress so equipped. Another Flying Fortress flew from coast to coast in 9 hours, 14½ minutes.

In 1941, Boeing airplanes of this type saw war service for the first time dropping English bombs from "fantastic" heights on German battleships in French ports. By this time, the Lockheed P-38, the Republic "Lancer," the "Thunderbolt" high altitude interceptor pursuit ships, and other planes were being equipped with turbosuperchargers.

Meanwhile, Dr. Moss in 1938 went into what he thought would be retirement, and was in London the day of the Munich pact. He returned and, at the age of 67, voluntarily resumed his work as a consulting engineer.

Dr. Moss has 45 patents on superchargers, compressors and other mechanical devices. He is a life member of the American Society of Mechanical Engineers, and has participated extensively in the work of other engineering societies and the American Standards Association.

Mrs. Moss is the former Jennie E. Donnelly of San Francisco. They have four children, Donald E. and Dr. Sanford A. Moss, Jr., Mrs. Ross Wilkins, Jr., and Mrs. Sydney Bardgett.

DECATUR SPORTS

A full house at the Lincoln gym saw basketball the way the New York Celtics play it as the world famous professionals turned in a 47-38 win over the Decatur G-E club.

With all respect to the local club, the margin could have been many times over what it was if the smooth-working Celts had wanted to turn on the heat.

Rather than run up a big score, Hickey, Banks & Co. chose to thrill the crowd with an exhibition of their passing game and at times their sniping ability and speed.

The Celts opened with a bang, running the count to 15-3 at the quarter, then they eased up until it was 23-13 at the midway mark. At the third quarter it was 33-23, Celts.

The display of speed, passing and floor work shown by the Celts at times dismayed the locals and the crowd. The aging but still agile Davey Banks played the major portion of the tilt and furnished most of the entertainment with his trick play.

The venerable Nat Hickey did not start but entered the tilt before the halfway mark in response to the "we want Hickey" calls from the crowd. After his entrance into the game he proved that his sniping eye was still as keen as ever by immediately dropping in three from a spot. The towering Pelkington was another of the Celts who furnished the entertainment. The big center easily controlled passes from his pivot post.

Art Baker, G-E club forward, hit six times from the field and a brace of charity tosses to mark up 14 points. The Celts took turns at the scoring spots and as a result their scoring was fairly evenly divided.

In the prelim the Decatur Castings lost a closely-played 21-17 tilt to the Westinghouse five of Lima, Ohio. The score at halftime was 9-all.

G. E. Head Delivers Radio Message To All Employees

"We have been asked for the impossible. Let us do it, as usual", declared President Charles E. Wilson in a stirring mesage to all employees Sunday night, December 14 during General Electric's Hour of Charm program. In this, his second war message to all General Electric employees' Mr. Wilson pointed out that enemies of this country are poor students of history if they fail to recognize the fact that American industry cut its first teeth on the word "impossible". "The electrical industry", he declared "does not recognize the impossibility of any task laid before it, or it would not have been born at all."

Mr. Wilson's complete talk is as follows:

"I am sure that our thousands of friends, who have been listening to the music tonight, will forgive me if I interrupt just long enough to convey an important personal message. During the past week our radio programs, our business days, and the familiar routines of our homelife have been broken into many times, until interruption has become almost the usual thing. By and large these bulletins have not been happy ones, since war is not a very happy affair.

"I have said this message was to be personal, because it is meant primarily for the 125,000 employees of the General Electric Company, wherever they may be throughout the land. Likewise it is important because it concerns a job that all of us have been doing together, and another job that we must tackle tomorrow. We are nevertheless glad that others are listening in, since we have much to be proud of in the record as it stands, and much gain, I suspect, from the understanding and encouragement that you can give us.

Nothing is Impossible

"To my fellow workers I simply want to say that I have come here tonight to ask the impossible—or what we used to regard as the impossible. And, in the same breath let me say that I expect them to do the job, deliver the goods, and prove—once more—that nothing is impossible to a free and courageous people.

"To some these may appear to be just words. Victory is just a word, too, but it is also a flag that we carry with us into battle. Behind us are months of planning which seemed painfully slow in passing. We tried a hundred times before we found the righet way, and all the time, behind us, the clock was ticking and men were dying and the civilized world seemed to be slipping into a long night. Now, looking over the record, with proper regard to the dimensions of time and pressure, we must grant that a good job has been done—and an adequate job, perhaps, but only adequate for yesterday. Tomorrow we must double, triple, and quadruple that job, and already our enemies have said that is impossible. They are poor students of history. American Industry cut its first teeth on the word "impossible." Every step of its growth, every discarded frontier is a monument to our contempt for the term. The planes that streak through the skies, the powerful ships that cut the waters, the radio magic that commands and controls their movements prove that the enemy is wrong who foolishly relies on that poor word to protect him from the wrath of an aroused American nation.

We Have Unity

"The electrical industry does not recognize the impossibility of any task laid before it, or it would never have been born at all. We, in General Electric, know that to be true. We would have been surprised and disappointed if our Government had not seen fit to double its demands upon us for certain products after the events of last Sunday—and that is just what happened. We accept that command—indeed we have already told the Government that you will do whatever is required to win. *In this Company* there has never been the slightest doubt of our unity of purpose—we did not even discuss it. I know that General Electric people would have lost confidence in their management if these new demands upon their strength, and skill and ability had not been forthcoming.

"That is my important, personal message to every General Electric employee—we have been asked for the impossible. Let us do it, as usual. America expects it."

Twenty-One Become Members Of The Quarter Century Club

Twenty-one employees completed twenty-five years of service during the past few weeks and have become members of the Fort Wayne Works chapter of the G-E Quarter Century Club. The new members, left to right, top row, are: Arthur C. Eberwine, W. S.; A. R. Vegalues, George H. Lenz, Bldg. 19-5; Wayne M. Cook, W. S., and Dewey A. Erne, Bldg. 4-4. Second row: William C. Buuck, Bldg. 20-1; Albert R. Spencer, Bldg. 19-2; Alvin C. Hartman, Bldg. 19-5; Arthur M. McNamara, Bldg. 19-4, and Maurice H. Cox, Bldg. 26-2. Third row: Casper W. Halocher, Bldg. 10-1; Kenneth L. McDaniel, Bldg. 19-3; Carl H. Deitsche, Bldg. 26-2; Guy E. Oberlin, Bldg. 2-2; E. A. Rosenberger, W. S. Fourth row: Fernando H. Crick, Bldg. 17-1; Henry B. Sorg, Bldg. 20-1; G. R. McAfee, Bldg. 26-5; Madarus Putt, W. S., and Louis R. Ormiston, Bldg. 26-1. Below: Henry P. Gick, Bldg. 26-5.

General Electric Obtains Injunction Against Improper Use of Name

The Supreme Court of New York County entered an order December 9, 1941 enjoining Albert G. Smith who had been doing business under the trade name of General Electrical Refrigerator Service of Brooklyn from using this name or any other trade name which might be confused with the General Electric Company.

Other similar cases are under investigation, according to Mr. Earle Poorman, district manager of the appliance and merchandise department, General Electric Company. Mr. Poorman stated that many purchasers of General Electric products have been misled by the trade names of some dealers and service shops which are strikingly similar to "General Electric", and that the Company has been taking all necessary steps to stop this practice. He pointed out that a similar decree was obtained from the Supreme Court in June enjoining George S. Montague from trading under the name General Electrical Refrigeration Service Company of Queens or any other name which might have a tendency to mislead the public into the belief that he was a part of the General Electric Company.

B&T

GENERAL ELECTRIC NEWS
FORT WAYNE WORKS

Volume 24 FORT WAYNE, INDIANA, WEDNESDAY, DECEMBER 31, 1941 Number 97

$1,656 Is Paid In Suggestion Awards

Eighty-Three Percent Subscribe For Bonds

Total Matured Value At Close Of Third Week Is $20,141,210

General Electric's Defense Savings Bond campaign at the end of its first three weeks, found 83 percent of the Company's employees subscribing for a total paid in annual value of $15,100,000. This total is increasing daily. This is an average of $150 for each employee. The total matured value of these bonds is $20,141,210.

During and following World War No. 1, the highest participation in all four Liberty Loan drives and in the Victory Loan drive by General Electric employees was attained during the fourth drive when the total reached 90 percent. In all five drives, General Electric employees bought bonds totaling $17,267,750. The highest average subscription per employee was $100, reached during the fourth drive.

KINDLING AVAILABLE

A supply of kindling is again available for employees. Orders may be placed with the Personnel Office in Bldg. 21. No charge is made for the kindling but a handling charge of $1.00 for a full load and 50 cents for a half load must be paid at the time the order is placed.

Private Wires Are Expanded To Speed Victory

G-E Now Has Network of 11,565 Miles—Nearly Half the Distance Around the World

To help speed the handling of victory contracts, the General Electric Company has added 3,796 miles to its private wire communication system since the first of the year. This brings the total of the network to 11,565 miles, or nearly half the distance around the world, company officials announced recently.

General Electric plants and offices in more than 30 key industrial cities in the east and middle west are connected by these leased telegraph and telephone wires that carry about 5,600 messages daily.

The telephone network covers 5,630 miles and serves 17 citics ranging from Lynn, Mass., in the east to Chicago in the west and Washington in the south. It contains 37 individual wires, many of which can be interconnected for greater flexibility and coverage.

The teletype network includes 4,822 miles of full-time and 1,113 miles of part-time circuits. It extends from Lynn in the east to Milwaukee in the west and Philadelphia in the south and serves 31

Red Cross War Fund Campaign

By the President of the United States of America

A PROCLAMATION

Whereas our country has been viciously attacked and forced into a war of vast proportions, which will inevitably bring grief and distress to many and self-sacrifice to all; and

Whereas for more than sixty years the American National Red Cross has played a vital role in binding up the wounds of the injured, in sheltering, feeding, and clothing the homeless, in succoring the distressed, in rebuilding broken lives, and in rehabilitating the victims of catastrophes of nature and of war; and

Whereos in preparation for just such an emergency as we are now facing, the American National Red Cross has been spending funds at the rate of more than one million dollars a month, which is but a small fraction of the amount that the organization now requires in order to carry out effectively its functions as an assential auxiliary of our armed forces, particularly as a friendly liason in welfare between the mon in service and his family at home, and as a key agency in the civil defense plans:

Now, therefore, I, Franklin D. Roosevelt, President of the United States of America, and President of the American National Red Cross, do hereby proclaim the beginning, os of this date, of a Red Cross War Fund Campaign for the raising of a minimum sum of fifty million dollars; and I appeal to the American people to make this campaign an overwhelming success. Realizing the desire of every American to participate in the national war effort, I confidently anticipate an immediate and spontaneous response to this appeal.

In Witness Whereof, I have hereunto set my hand and caused the seal of the United States of America to be affixed.

Done at the City of Washington this twelfth day of Decemher in the year of our Lord nineteen hundred and forty-one, and of the Independence of the United States of America the one hundred and sixty-sixth.

FRANKLIN D. ROOSEVELT

By the President:
CORDELL HULL,
Secretary of Stote.

One Hundred Forty-Two New Ideas Bring Returns

Credit Union Will Elect On January 30

Announcement is made by F. H. Lemper, chairman of the Credit Union, of the appointment of a nominating committee to name candidates to be voted upon at the annual election to be held on January 30.

The committee includes Charles K. Winans, chairman; George Graue, and James V. Johnson. The annual meeting and election of officers will be held at the G-E Club and the meeting will start at 7:30 p.m.

The officers to be elected are six directors, two members for the Credit Committee and three members for the Supervisory Committee.

Fired By Edison

Charles W. Harbeck, fired by Thomas A. Edison 50 years ago when Edison operated the Edison Machine Works, forerunner to General Electric in Schenectady, today is among the few who hold the coveted diamond-studded half-century pin. Harbeck was fired two days after he was hired because Edison did not think he was over 14 years of age. Harbeck says he got back on the payroll a day or two later when he produced "papers from home, showing him of age." He admits, however, he was but 13 years of age at the time.

John O. Staley Leads During Five-Week Period With An Award OF $60.00

A total of $1,656 was distributed to employees as awards for 142 suggestions during a period of five weeks, it is announced by the Suggestion Committee in releasing the latest suggestion list. Leader in the list is John O. Staley, Bldg. 26-B, whose suggestion to send scrap steel compound drums to the salvage department netted him an award of $60.00.

Second place is divided by two Winter Street employees, M. A. Putt and E. H. Hauke, each receiving an award of $55.00. Mr. Hauke suggested that Freon gas lines be shortened to reduce purging gas losses and Mr. Putt suggested the use of small gas charging fittings also, to reduce the losses of purging gas.

An award of $40.00 was made to E. Keith Wolfe, Bldg. 20-2, following adoption of his suggestion for improvements to the signal program system. George W. Cooper, Bldg. 4-3, received an award of $35.00 for his suggestion to provide off-center adopter for capacitor cases, and Earl H. Ealing, Bldg. 12-1, received an award of $25.00 following his suggestion for changes to mold for meter devices.

(Continued on Page 4)

Outlook For 1942

By CHARLES E. WILSON, President General Electric Company

The General Electric Company in 1942 will apply itself wholeheartedly to the task of multiplying and speeding up its already substantial production for all the armed services. Even before the declaration of war, General Electric had undertaken enough work to keep its added personnel and expanded plant facilities operating at full productive capacity throughout the coming year without the addition of a single order, and had laid its plans to produce the needed goods at a rate never before attained.

But the reality of war puts everything in a new perspective, and we now clearly understand that all previous standards of performance must henceforth be considered inadequate. General Electric is not only willing to assume, but is seeking, a greater share of the tremendous additional job which must and will be done. Some of the already heavy requirements placed upon us have just recently been more than doubled, and seven-day-a-week operation on a twenty-four hour basis will be the rule whenever this will result in greater output of the many weapons we are making for those fighting our battles in the front lines.

Inevitably the load of war work will further curtail the production of non-essential consumer goods, but it is not for us to predict the extent to which this will be done. However, it can be forecast that the employees of the General Electric Company, in common with all the people of America, will successfully meet the challenge and will, no matter how great the difficulty, produce the materials, the tools, and the weapons needed to insure a final victory for the democratic world.

• Remember Pearl Harbor

SLAUGHTER of a small garrison of Texans battling for their freedom from Mexico furnished America with a war-cry about a century ago. With the cry of "Remember the Alamo" American troops invaded Mexico, captured Mexico City and forever set free the largest state of the union.

Forty-three years ago an aroused America was furnished another battle-cry. "Remember the Maine" was on the lips of all and with this cry American troops avenged the sinking of the battleship Maine in Havana harbor and the death of 266 fellow-Americans, and ended Spain's dream of world empire.

ONCE again, America has a battle-cry. It is REMEMBER PEARL HARBOR, and the remembrance of the butchery of Americans by a treacherous foe will furnish the added impetus to every last one of us to do our full share in removing forever the danger of enslavement of a free people.

It is with the full horror of Pearl Harbor in our every thought that we rededicate ourselves to the defense of endangered liberty.

REMEMBER PEARL HARBOR—Yes, we'll remember that tragic Sunday, writes Roelif Loveland in the Cleveland Plain Dealer, and we shall be reminded constantly that until this war is over we must have complete alertness and 24-hour-a-day and seven-day-a-week vigilance and that, as Gilbert and Sullivan pointed out, "things are seldom what they seem."

REMEMBER PEARL HARBOR will be for us all the moralizing fables rolled into one; all of Ben Franklin's astute comments on over-confidence in one bitter but therapeutic pill; all of the Bible's injunctions against excessive pride in just three words.

REMEMBER PEARL HARBOR will mean thoughts like these: Sure, we remember the day this war started. It started badly. The Japs did not fold up like wilted poppies. They fought like tricky devils. They hurt us. But when the word got around that they had done these things a divided country was welded into one solid unit by the heat of those exploding bombs. And the mighty giant which is the United States of America wiped the blood from his forehead, rose slowly; rolled back his sleeve and swung.

And the people took the first bad news, but it did not scare them. It made them mad, but it did not frighten them.

Young men and middle-aged men and old men, not already in service, jammed the recruiting offices of all the country's armed services.

"By God", they said with no intent of blasphemy, "wait till we get going."

They did not have to wait long—because our forces got going.

And they are going to keep going.

REMEMBER PEARL HARBOR is a phrase which can be translated in Japanese: "Boy, you're going to get it." It can be translated in German: "You're tough, but we're going to help chop you down and then you'll get it too." It can be translated in Italian: "How long do you think you'll last, duce, when der fuehrer gives up statecraft?"

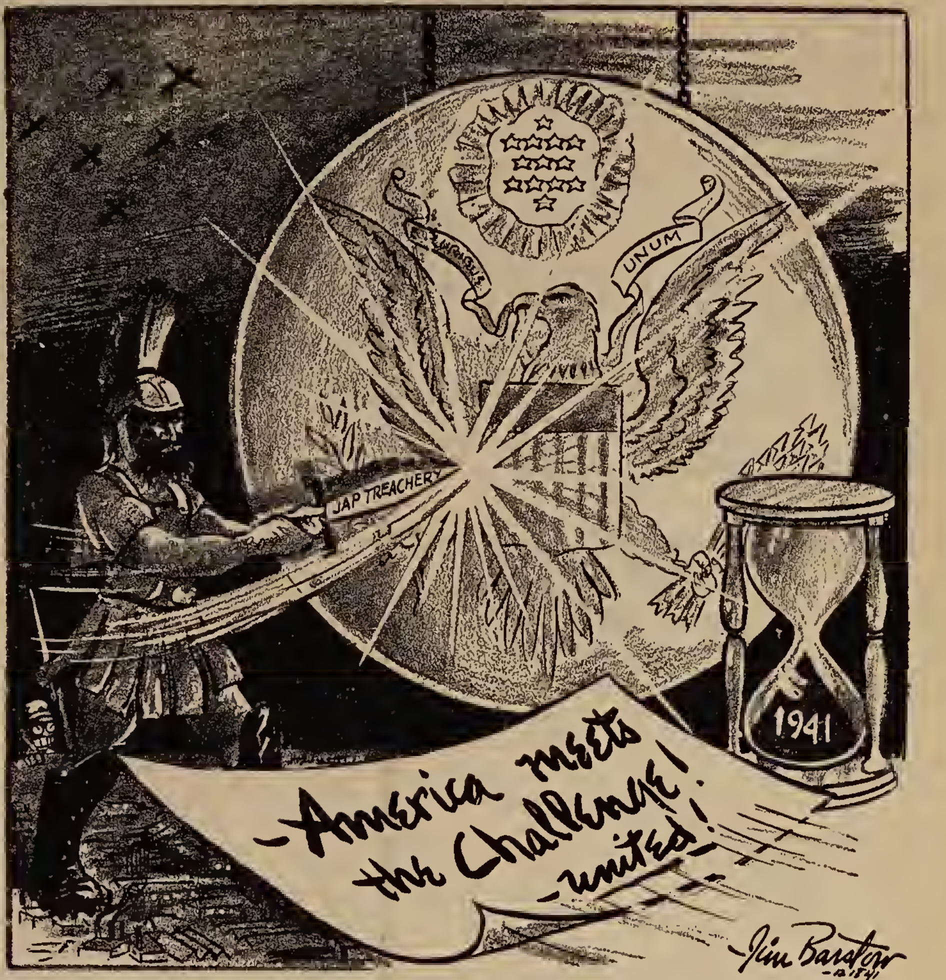
It sums up in three words our hatred for trickery and deceit, necessary adjuncts for the totalitarian way of life.

REMEMBER PEARL HARBOR. Our bullets will write it in the sky, and our shells will supply the necessary punctuation.

REMEMBER PEARL HARBOR! REMEMBER PEARL HARBOR! REMEMBER PEARL HARBOR!

Brother—we ain't forgetting!—*Erie Works News.*

THE HOUR HAS STRUCK!



The New Year starts tomorrow. It will be a fighting year. Already the keynote for the next twelve months has been sounded. The hour has struck and the battle is on—

Be it the resolve of every General Electric man and woman that 1942 will be carried through to its end in the same spirit in which it starts.

Be it the resolve of every General Electric man and woman to give every effort to the production of the materials essential to final victory in this war.

Be it the resolve of every General Electric man and woman to keep physically fit for the job. To live sanely, work safely and be in a position at all times to put forth any extra effort needed.

Be it the resolve of every General Electric man and woman to help win this war as swiftly and efficiently as possible.

The hour has struck and the battle is on—

NEWS FROM THE CAMPS

We publish herewith with great pleasure extracts of letters sent to us by G-E employees now in government service. Address all communications for this column to the WORKS NEWS editor.

Dear Editor:

Thank you for putting my name on your mailing list. I was very glad to receive the NEWS and especially the one with "Remember Pearl Harbor." I found many names that brought back my time I spent at the G-E. I am attending the Air Corps Technical School for Airplane Mechanics and have little time for writing. The address is:

Pvt. Kenneth G. Simmers
5th School Sqd.
Chanute Field, Ill.
Brks. 449

Dear Editor:

I want to thank you for sending me the WORKS NEWS. I will appreciate it very much if you continue to send it to me in the future. I like to read about the weekly happenings back at General Electric and the experiences of other fellows in the service.

I am pretty busy down here. So far we have had mostly foot drill. This week we started classes in radio work. I hope to be a radio operator when I leave here. I think I am going to like this kind of work.

I am glad I am down here when I get letters from home saying you have been getting snow back in Indiana. We have cold nights here, but warm, sunshiny days. It is pretty country down here among the pines. I will be here about five weeks yet for my basic training.

Well, I have some of my equipment to get cleaned up, so will stop and get busy. Again I want to thank you for the WORKS NEWS.

Sincerely yours,
Pvt. Lloyd E. Mason
Battery C, 12th Bn., 4th Regt.
F.A.R.C., Tr. 265,
Fort Bragg, N. C.

Dear Editor:

I've enjoyed reading the G-E NEWS the five months I was at Camp Lee, Virginia, but now since I have been transferred, I would like for you to send it to me here at Baer Field.

I was sent from Camp Lee as a mechanic, worked for a while here as truck driver, but now I'll be a clerk. Quite a variety of occupations for so short a time, but it makes it more interesting.

Baer Field is much nicer than Camp Lee, for here we have grass, no sand flying around, and best of all no soot. I was at Camp Lee for five months, which is two months longer than ordinary, but that was because I was on special duty with the Provost Marshal as a draftsman.

Sincerely yours,
Pvt. Arthur F. Tebbe
Co. B, 30th Q.M. Reg't

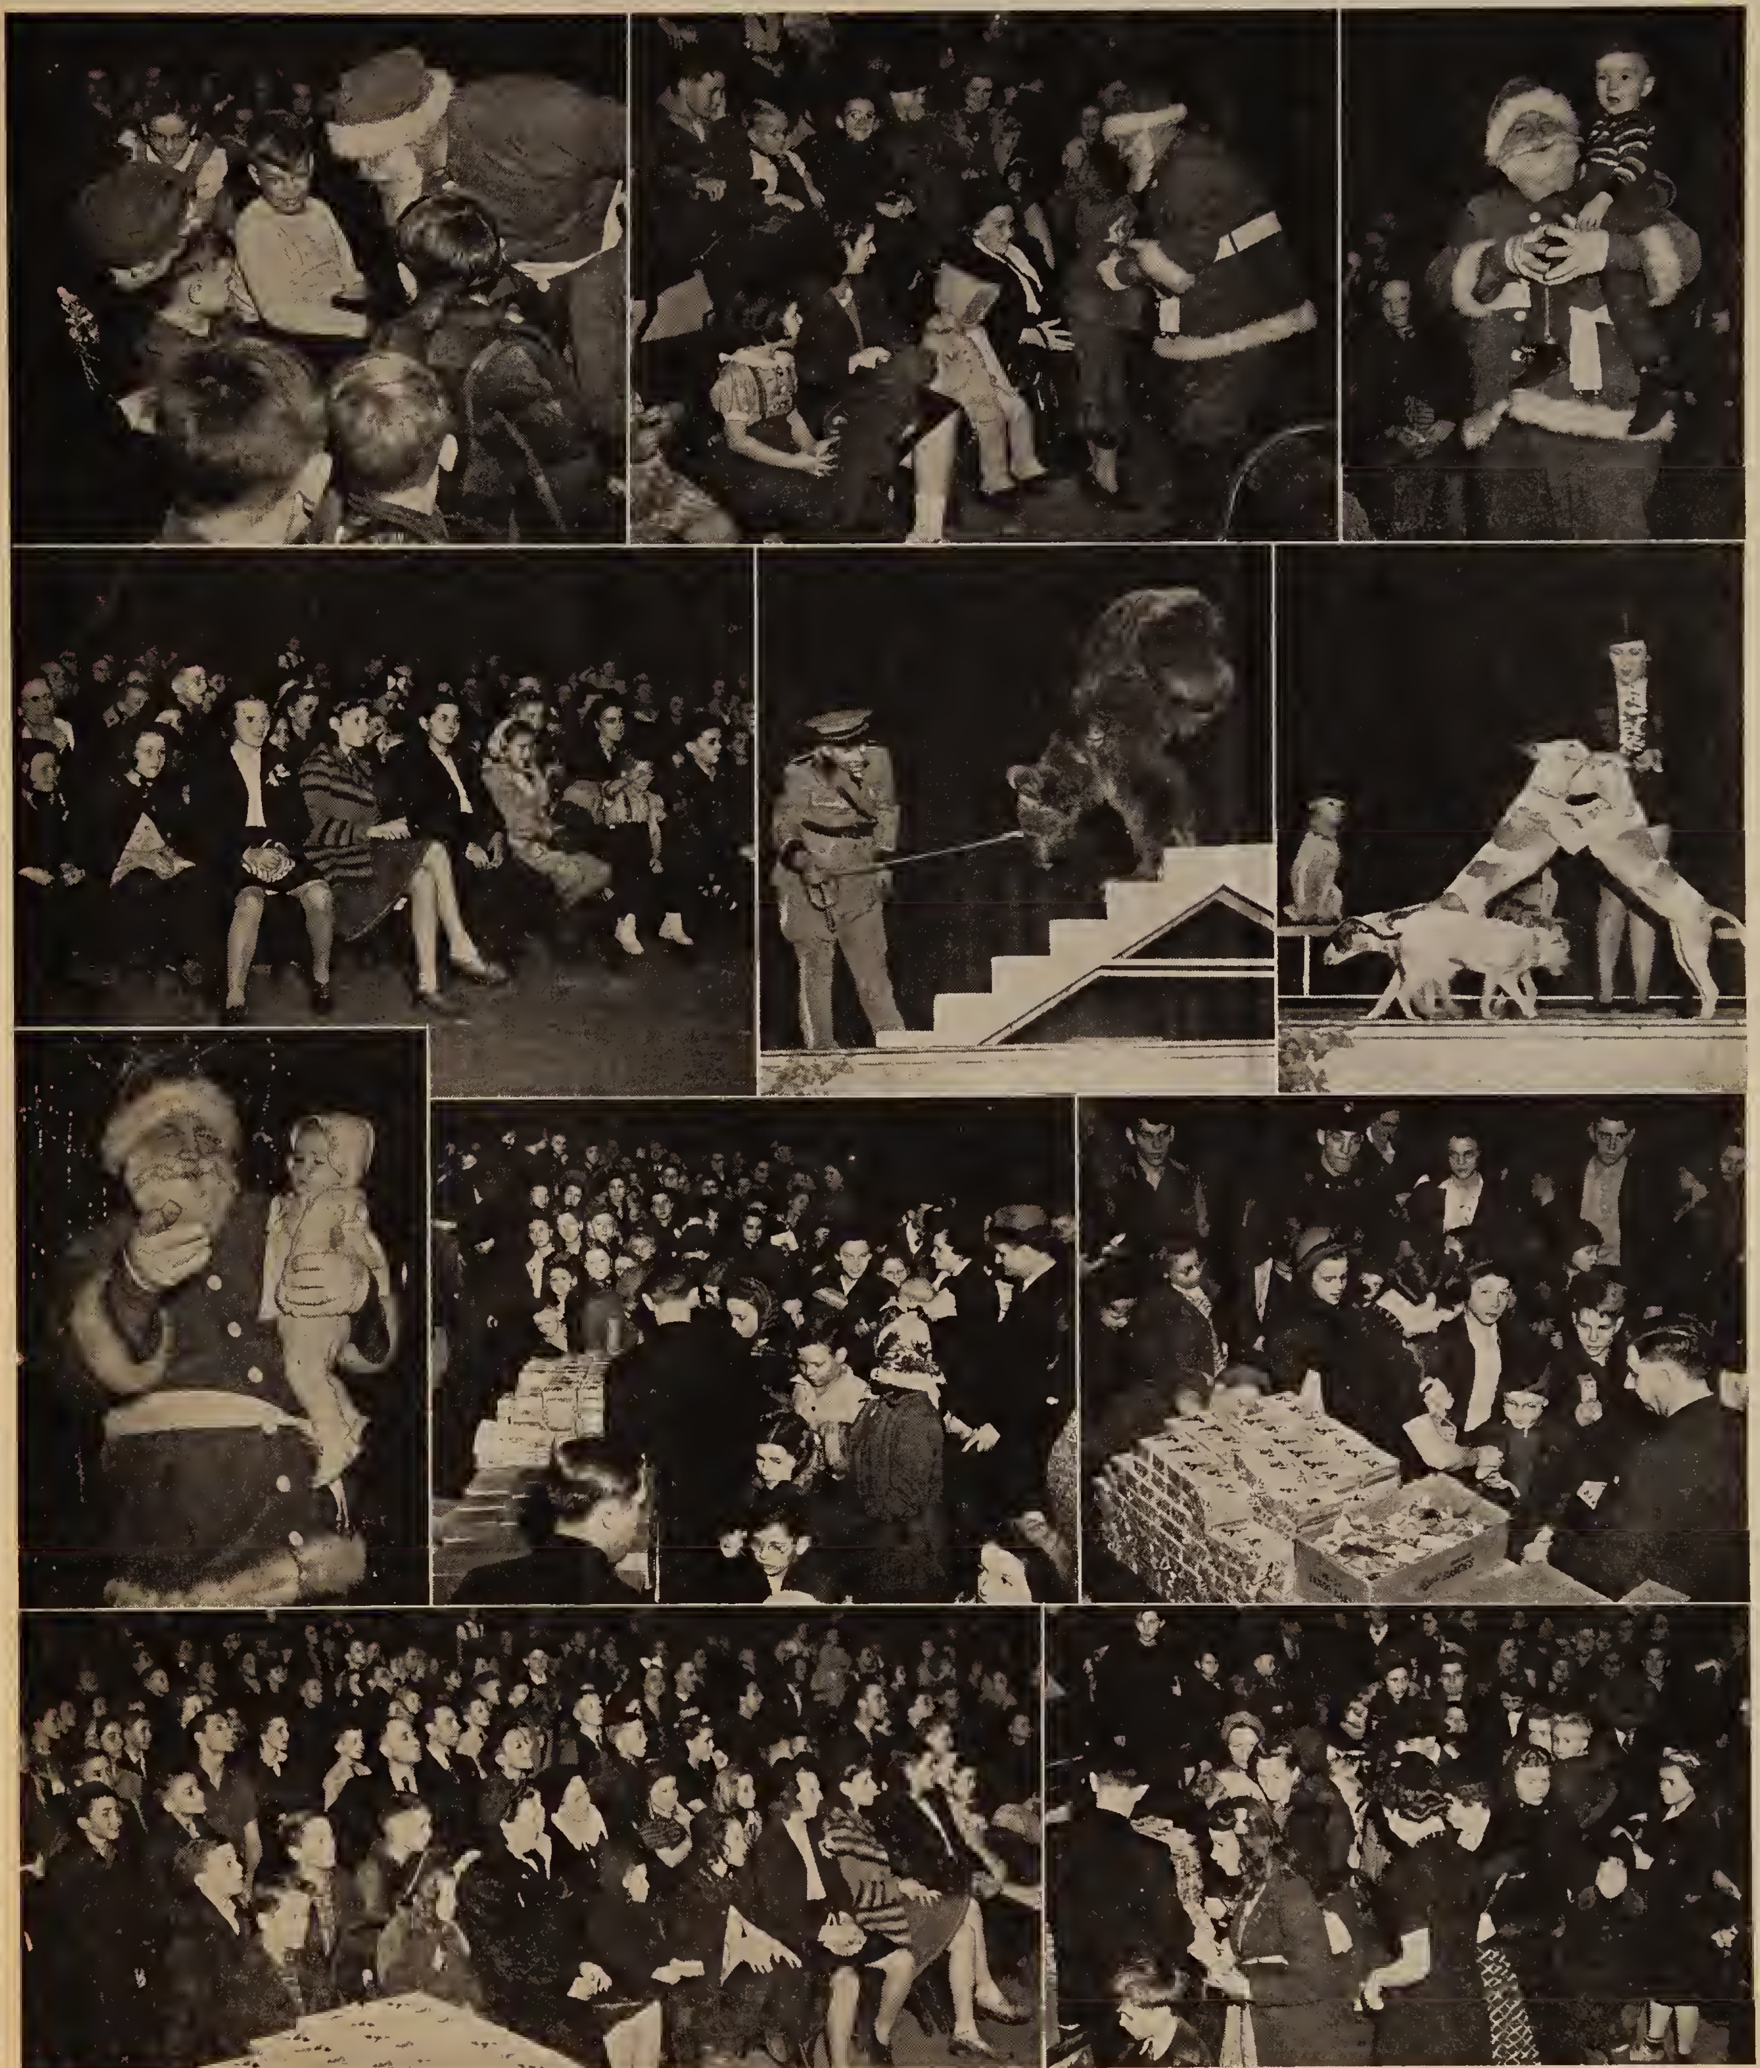
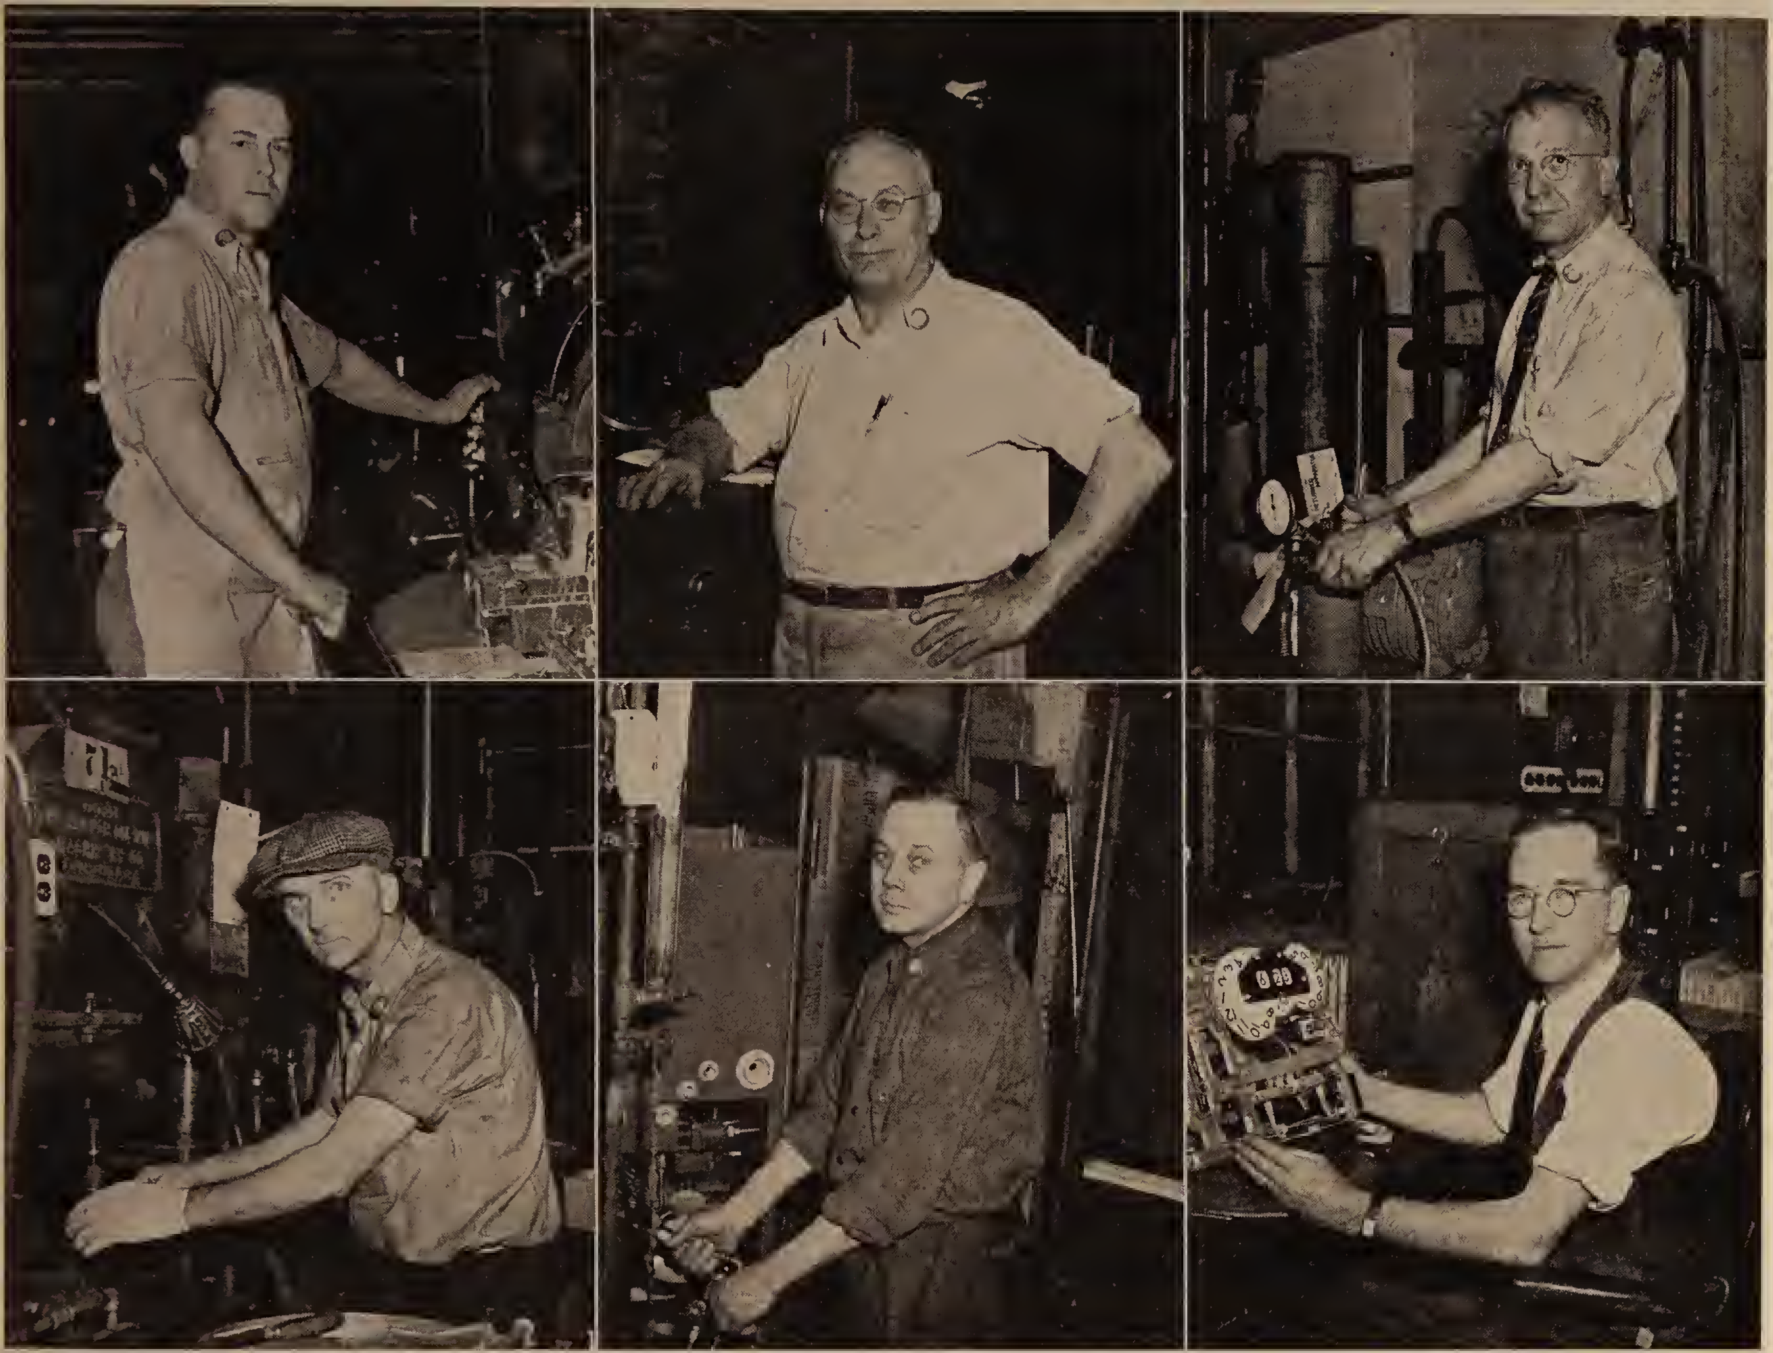
Thousands Of Youngsters Enjoy G-E Club Christmas Party



One of the most successful of annual Christmas parties sponsored by the G-E Club was that of this year as the above pictures illustrate. Top row shows Santa Claus doing his stuff, and very successful he was in doing it. The rapt expression of the audience (second row left) shows approval of the animal acts which formed part of the program. Third row left—Santa and one of his youthful admirers, and right—the youngsters receiving their gifts. Lower row—small sections of the crowds that attended each performance.

— REMEMBER PEARL HARBOR —

They Cashed In On Their Ideas For Substantial Awards



Leaders in the latest suggestion award list are shown above. They are, top row, left to right—George Cooper, Bldg. 4-3; John Staley, Bldg. 26-B; and M. A. Putt, Winter Street. Bottom row, left to right—Earl H. Ealing, Bldg. 12-1; E. H. Hauke, Winter Street; and E. Keith Wolfe, Bldg. 20-2.

Suggestion Awards

(Continued from Page 1)

Other awards ranging from $5.00 to $20.00 were made as follows:

Elton Kiser, Bldg. 4-4; M. D. Warner, Bldg. 4-4; Edwin Rodenbeck, Bldg. 4-5; Eugene LaVine, Bldg. 4-4; Carl W. Scheimann, Bldg. 10-1; Milton E. Roller, Bldg. 6-B; Leonard H. Pequignot, Bldg. 26-2; Louis D. Hopper, Bldg. 10-1; James Harris, Bldg. 4-4; Oscar O. Mize, Bldg. 6-4; Erman E. Johnson, Decatur; Maxine J. Arter, Bldg. 26-3; M. Poffenberger, Bldg. 26-2; Lamar Alwine, Bldg. 10-1; Oma August, Bldg. 4-4.

Katherine L. Bilts, Bldg. 4-4; Henry G. Wichern, Bldg. 17-1; Clayton J. Raquet, Bldg. 6-4; Christian D. Delagrange, Bldg. 4-4; Clarence O. Thomas, Bldg. 20-1; A. W. Pfeiffer, Bldg. 10-1; Clara O. Kindt, Bldg. 4-4.

Carl G. Schlenker, Bldg. 26-5; Paul D. Weaver, Bldg. 26-5; Clara B. Lake, Bldg. 4-4; William R. Kiser, Bldg. 4-4; Waldo D. Martin, Bldg. 4-4; Clyde Hoke, Bldg. 20-1; E. Renbarger, Bldg. 6-B; John C. Miller, Bldg. 4-4; Marjorie C. Telley, Bldg. 26-3.

M. VanHorn, Bldg. 6-1; Delos L. Martin, Bldg. 4-4; James R. Voirol, Bldg. 26-2; V. R. Ayres, Bldg. 6-4; Otto L. Harter, Bldg. 6-4; A. A. VanWormer, Bldg. 26-5; Harold E. Britton, Bldg. 6-4; Clifford Zieg, Jr., Bldg. 6-4; Wm. Wedler, Bldg. 26-5.

Martha Fogwell, Bldg. 6-B; Byron Neumann, Bldg. 6-B; Russell R. Burkholder, Bldg. 6-1; George P. Greene, Jr., Bldg. 4-3; Herman C. Macke, Bldg. 4-3; Joseph E. Kramer, Bldg. 17-1; Gilbert Hutchisson, Bldg. 4-3; Veora L. Habig, Bldg. 17-1.

Floyd Murray, Bldg. 20-1; Genevieve D. Nuttle, Bldg. 4-3; Donald E. Mosure, Bldg. 17-1; Vernon D. Hill, Decatur; Raymond Stout, Bldg. 6-3; Merlin E. Wagner, Bldg. 6-B; Leander B. Jacobs, Bldg. 4-3.

Donald F. Thompson, Bldg. 6-4; Clarence Drake, Decatur; Frank Quinn, Bldg. 17-1; Harold Camp, Bldg. 4-3; H. Eldridge Gillum, Bldg. 6-B; Bernard J. Suelzer, Bldg. 6-B; Violet E. Ray, Bldg. 17-2; Mildred I. Brown, Bldg. 4-4; Chas. K. Winans, Bldg. 6-4; Byron Neumann, Bldg. 6-B.

Raymond Brown, Bldg. 4-5; Chas. H. Gordon, Bldg. 4-2; Louella D. Lahmeyer, Bldg. 26-2; Pauline B. Baker, Bldg. 26-2; Robert L. Kelsey, Bldg. 4-5; Wilbert B. Putt, Bldg. 6-B; L. W. Schuster, Bldg. 26-2.

Russell L. Flaugh, Bldg. 12-B; E. Renbarger, Bldg. 6-B; William Hattendorf, Bldg. 12-B; Bernard Zuber, Bldg. 12-B; Harold Barrick, Bldg. 8-1; Alfred Rudasky, Bldg. 8-1; Edward G. Kerch, Bldg. 2-E; Floyd D. Chilcote, Bldg. 26-3; James A. Johnson, Bldg. 4-1.

Ralph W. Reinking, Bldg. 4-5; Clarence Roth, Bldg. 6-B; Max E. Powers, Bldg. 6-B; Roger R. Crabill, Bldg. 4-2; Arthur W. Weber, Bldg. 4-2; Oris Jon Buckles, Bldg. 4-1; Nolan D. Riley, Bldg. 8-1; H. B. Underwood, Bldg. 20-1.

Wilbur C. Hinton, Bldg. 4-5; Esther Schladenhauffen, Bldg. 4-2; Louis Maier, Bldg. 8-1; Harold Barrick, Bldg. 8-1; Rohland O. Fowler, Bldg. 4-1; Lorene E. Foltz, Bldg. 4-2.

Bernard Suelzer, Bldg. 6-B; Harold Kniffen, Bldg. 20-1; Reinhold Frede, Bldg. 4-1; W. H. Wooley, Bldg. 4-1; Bonnie Gorrell, Bldg. 6-B; Lewis O. Ramsey, Bldg. 17-1.

William Schlup, Bldg. 26-B; Jack E. Welch, Bldg. 26-3; W. O. Bruner, Bldg. 27; Herman Krock, Bldg. 27-1; Fay C. Russell, Bldg. 26-4; John J. Gerbers, Bldg. 27; Albert Mason, Bldg. 22-1; Louis Lee, Bldg. 20-1.

Adrian J. Voirol, Bldg. 19-B; Norbert F. Schmenk, Bldg. 27-1; Floyd Swihart, Bldg. 27-1; Grace Biedrzycki, Bldg. 26-3; W. Earl Jones, Bldg. 27-1; Chas. Druce, Bldg. 26-B; Margaret Sampson, Bldg. 6-B.

— REMEMBER PEARL HARBOR —

NEWS THROUGH THE PLANTS

From The *Feminine Viewpoint*

By Hilda Barthold and Frances Krauskopf

A New Year is beginning, and no thoughtful person can doubt that it will be a critical year in the history of our country. We are involved in a war which the Commander-in-Chief has told us will be long and hard, therefore, every American can do something to help win this war.

There is a shortage of wrapping paper. In this rich country it is hard to realize there can be a shortage of anything, but the pulp from which wrapping paper is made, is also used in the manufacture of the munitions of war. So in the offices, stores and homes paper must be saved. Old newspapers, magazines, wrapping paper of all kinds can be accumulated, tied securely into tight bundles and turned over to the Salvation Army, Red Cross, Boy Scouts, etc., any of these organizations will send your old paper on its way to be converted into needed paper pulp.

For efficient handling all paper must be properly packed, Lay newspapers in piles and stack them, break down cartons and boxes by cutting corners and laying them flat, place mixed wrapping papers in boxes and press them down. Waxed papers need not be saved as they are not of value at the paper mills.

Tin foil is another material to be saved. Of course, manufacturers have already started using substitutes for wrapping their products, but many articles that we use every day still have their tin foil coverings, and these should be removed, cleaned if necessary, folded tightly and turned over to some defense agency.

Old metal of all kinds can be salvaged, so any worn-out or discarded tools, machinery, etc., that may be stored away in cellars or attics should be sold or given to junk dealers. Save typewriter ribbon spools, also kodak film spools, these may be turned in to dealers for re-use, and wire hangers should be returned to the dry cleaners to be used again.

Thru The Window Of 17-3

Once again one of the boys in our department has answered the call of Uncle Sam, this time it was Nick Abbott, and he wishes in this manner to thank his co-workers for the nice pen and pencil set they presented to him. Thumbs up, Nick.

Well we are all a bit dizzy these days, but Violet Brower is just a little more so than some, she gets in the bus and drops a whole quarter in the fare box.

J. Voirol was wearing his apron hackwards all day Friday and everyone thought he was being initiated into something or other, but it proved to be only a hole in the seat of his pants. Hurrah for aprons.

Famous last words:

"Thar she goes," Helen Maxson.

"I don't get it," Virginia Lutz.

Thought for the week: One pound of learning requires ten pounds of common sense to apply it.

Granny.

Rosa Foster, Bldg. 4-3, finally did it. Rosa is one of the married gals now. The lucky man is Mr. Forest Ulrey from Bldg. 26. Good luck, Ulreys!

Punch Press 19-5

The biggest part of this little job is to get started. We just sit around the table in hopes of thinking, but find that too strenuous, we finally just grab up the long handled shovel and begin.

Floyd Wilson took a big chance recently by inviting the gang out for a gala get-together-business-and-pleasure meeting. Not being able to attend in person, the party was covered by the society correspondent who reports a very successful party. After the usual formalities a couple of stanzas of "Pop Goes the Weasel" were sung to insure every one of a bad humor; then chairs were grabbed and placed about the table in such a manner as to leave no doubt the serious business of the evening was about to begin. It is a pleasure to sit through a meeting of this kind, providing of course you do get the right kind; as so happened to "Pinky" Sordelet who, I am told, left the meeting heavily laden with riches. This man Wilson, by the way, is the same man who so ably demonstrated the Old Punch Press Code, namely the one where you should always keep your head until you get it knocked off. The suggestion system has many merits. The biggest fault he can find is that it works too fast. He handed in a suggestion and then sat back to let it generate, but due to the fact he put an unusual amount of cosmic thought on the idea, it got away from him and his name appeared in the WORKS NEWS without his knowledge. Imagine his state of perpendicular perplexity when he laid the NEWS down and Missus picked it up. The moral is: Always rub your eyeballs over these pages before you get home as you might want to do a little personal censoring.

Next week we should hear from our Mexican correspondent; so wishing you a Happy New Year, I remain, as ever (till you catch me).

Slug.

Thisa And Thata 19-5

What is this we hear about Louie Clark having two flat tires, just getting one fixed and the other one goes down. I think you will have to start riding the bus, Louie . . . Frieda, Irma and Edna want to thank everyone for the wonderful gifts they received. They assured me that they intend to keep them as long as possible and they know that it will help them a lot on their new jobs . . . Evelyn Lytle left the employ of the G-E the other day. Heres' wishing her a lot of happiness . . . The only sparker seen around was the one Al Hertel was showing. Congratulations, Al . . . The "ole gang" of the white armature department, Bldg. 19-5, who are now scattered to the four winds, enjoyed their annual Christmas dinner at Miller's English Tea Room. The long table in the dining room was centered with a silver bowl of Yule greens flanked by tall red tapers in silver candelabras. Each place was marked with a little red Santa boot as a favor. The party being a combined Christmas and farewell party honoring Edna Rohrback, Frieda Knoche and Irma Huhn, they were each presented a farewell gift of "Sweet Aroma" from the gang. The presentation was made by Flo Gilmore. A gift exchange also took place. Others present were Luella Schroeder, Maude Ehrhardt, Esther R. Ehle and Hazel Harron.

The news reporters of Bldg. 4-3 wish every one a very Happy and Prosperous New Year.

It Might Have Been —

a tragic experience for Sam Ratcliff, Bldg. 20-1, when a small piece of a broken drill flew in his direction IF his eyes had not been protected by the hardened lens of a prescription goggle. He was using a portable motor drill, drilling a quarter inch hole in a piece of thin steel. The drill broke, causing a number of small particles to fly, one of which struck the lens of his prescription goggles. The lens was slightly cracked but gave his eye 100% protection.

SAM IS ONE OF MANY EMPLOYEES IN THE GENERAL SERVICE DIVISION WHOSE EYES ARE PROTECTED BY PRESCRIPTION GROUND GOGGLES. THE ENTIRE DIVISION CAN, THEREFORE, FEEL THAT THEY ARE BEING JUSTLY AWARDED FOR THEIR EFFORTS IN PROTECTING EYES.

H. L. SMITH, SAFETY ENGINEER.

Gossip From 19-5

After taking one look at their pictures in the WORKS NEWS, Marie Griffin and Clarice Fyock said they should be known as the gruesome twosome, whatever that is. . . . When it comes to dancing, Henrietta Deck sure is a fancy stepper; there's nothing like getting your exercise. . . . Martha Scherzinger said the reason she didn't get up and dance was that the floor wasn't good enough for her. What kind of a floor do you want? . . . Speaking of Martha Scherzinger, some one swiped the cork out of her ink bottle. Anyone seeing an extra cork lying loose please contact Martha. . . . The girls in the Black Armature section enjoyed a Christmas dinner and exchange at Miller's Tea Room recently. Those present were: Bertha Piper, Grace Pussey, Pauline Martin, Kathleen Moran, Gertrude Bender, Melba Flanders, Luella Shroeder, Helga Wickliffe, Emily Nierman, Myrtle Schuelke, Hillis Wearley, Marie Loew, Irene Hern, Grace Montes, Margaret Yagle, Phyllis Guysinger, Mildred Wahle and Arlene Lee. . . . Marie Page has to go over to the Payroll office to really find out what her real name is. Well, did you find out whether it's Marie or Mary or should we start calling you Butch? . . . We wonder what Ella Hartnett will do with the two books she won the night of the Christmas party. Are you going to treat us, Ella?

The dress parade at Harry Parker's (Bldg. 4-3) home was none other than his daughter putting a big red ribbon on Harry's dog, Buck, for the Christmas holidays.

Joan Bobay and Luella Grotrain, Bldg. 26-2, must have asked Santa for a diamond ring for both girls had big sparklers on their fingers the day after Christmas.

Kitchen Korner

Into the discard the Christmas season drifts again and we find its departure marked with less ado than its coming. Yet we hope to maintain the real meaning hehind the Christmas spirit; we would like to hit a new high with the high-spots of humanity and hold on to it.

All of the "kitchen kids" report having had a happy holiday. Most of the members of our department collected a conglommeration of Christmas gifts, and, we're told, an uncontrolled sweet tooth and it's none-too-pleasant after-effects.

We extend "good luck greetings" to Fona Peffley, our co-worker, who returned to work after a two and one-half months' absence; to our congenial Thelma Johnston who pinch-hitted for Fona and who is now transferred to Bldg. 19; also to "Marse" Garrett who underwent a tonsilectomy last Saturday at the St. Joseph's Hospital; and to Mildred Pauline Conley, our serving girl. "Pauline", as she is known to us, decided to devote more time to the course in beauty culture which is her chosen career, in the near future. So—"Good luck, girls"!

To our little niche along the poet's row we send this New Year's greeting:

New Year Note

May this year of Forty-Two
Bring lots of love and luck to you!
And may it be unsurpassed,
For health and wealth,
These things that last:
For freedom in our American way,
For living it day by day—
Untouched by any enemy!
And for all the world to see
A great big V for victory!

The Kitchen Kid

It is reported that Herschel Smith, Bldg. 21, got by easy this Christmas. He saved all his samples of chewing tobacco to hand out to the boys.

Hoot Mon, here we are, putting out a combination Christmas and New Year's WORKS NEWS. I hai a vurra guilty feeling that our Editor has been reading this column and is attempting tae economize. Weel, then, so will I. I'll use some o' the stuff I wrote up last week, instead o' wasting it. Especially onnything about Cost Reduction.

C. R. can be applied to onnything —take Christmas tree lighting, for instance. Years ago ye killed a cow —or shot the bull—then, if she, or he, wasn't too skinny, ye had lots o' tallow for candles. Next ye put the candles on the tree, lighted them, set fire tae the tree, burned down the house, and spent the rest o' the winter wi' relatives.

Now-a-days ye just put on a few strings o' G. E. Mazda lamps and forget 'em. Uncle Angus does. He even forgets tae turn 'em on. But Cousin Colin does better than that. He lives on the corner, and puts his tree in the window. Then he hangs little pieces o' mirror all over it. Then he claims he can see red and green lights all evening—until they turn out the traffic light. Then he gets lit up himself.

Weel, sae much for Christmas. Noo for New Years. And ye will obsairve that I still talk ontirely aboot C. R. For instance, I can save ye the wear and tear o' making up your Resolutions. I furnish them already written, free, just for the asking—and worth it. Here are some samples. (The only catch is that they hai C. R. in them.)

1. (For Frances and Hilda):
   Cost reduction—bet your boots.
   We're getting smaller hathing suits.
2. (For Walter Sunier):
   Hoot, be Garr, I'll use C. R.
   To knock the tar from old man par.
3. (Poison Pen):
   I'll use a lot more C. R. boys 'n
   I'll get more smiles per gal o' poison.
4. (Unk McWell):
   Tae hulp C. R. lads, here's me oath:
   I'll buy nae tires 'till Jan. the Fo'th.
5. (For all the rest o' us which I can't take separately because I'm running out o' poetry. My name isn't Burns, ye ken.)
   We'll wear our tires down to the vamps,
   Or walk tae work and look like tramps
   And spend our dough on honds and stamps.

Motor Generator Parties

The first shift employees in Bldg. 19-2 had their Christmas party, with eats and gifts, at the West Creighton Church Tuesday evening, December 23. Everyone reports a good time and looking forward to another party.

The D. C. night shift of Bldg. 19-2 held a surprise party for Jimmy Rehrer. Two delicious birthday cakes were passed out to the group by Jimmy. Congratulations, Jimmy, and many more happy birthdays.

Elmer Scherrer is one of us again. Elmer is back from the Army and working in Bldg. 4-5. Now we won't be hearing, "Where's Elmer?" Glad to have you back, Elmer.

Dots And Dashes

Specialty Transformer Sales

As Hutcheson departed for a week's vacation deep in Arkansas, he dropped a hint which explains his love for the old-home stamping grounds. It's the "Hutcheson Well", rich in tradition and other things, around which the kinfolk are want to gather and partake of the other things. If there's more you want to know regarding the "activity" of this "well", ask Hutch.

We understand from a reliable source, that the newest addition to our group, John Carr, is going to have to be shown that a good many eastern cities and people have nothing on good ol' Fort Wayne—and the funny part of this is that John doesn't hail from Missouri.

One unsolved mystery! What has become of a certain "fur benny" that used to take Pete to football games? "Fur instance," could it be that the moths got away with it?

A seeming stranger entered our office this week, but upon further investigation, we found him to be no other than Del Roloff hiding behind a pair of specs. You better be careful, Del, or someone will take you for Professor I. Q. who should know all the answers.

Which just reminds us, when bigger and better questions are asked, Jean Hopkins will ask them. She seems to have the unique quality of being able to ask more questions in one minute than the average person can ask in three days—or is it three weeks.

Should any of you folks need a "good" story or after dinner entertainment, please contact Art King—don't rush, the line forms on the right.

Harold Pritchard always thought you had to join the Navy to see the sea. That might be true, Harold, but what do you have to do to see the Navy?

We have noticed that Stoney has purchased his first weekly car pass. He blames it on the "no-new-tire" ban the Government has placed on automobile owners, but we think he is overly pessimistic about being able to "thumb" a ride to work every morning. Why don't you try it out some morning and find out, Cy, or ask Claudette Colbert how it should be done, in which case we are sure you wouldn't get one.

We are wondering what Art King's car has that other cars don't—the pick-up is tremendous here lately.

It seems that Harold Pritchard's Christmas tree was leaning somewhat toward the starboard side, heavily laden with a brand new golf bag complete with matching clubs. That removes one good alibi from your collection for not making a better score, Harold. Think hard for a new one.

G-E Club Dances And Movies Are Resumed

Following the holidays the G-E Club will resume its program of Saturday evening dances and free motion picture programs. All G-E employees and their friends are invited to the dance.

A dance will be held at the Club next Saturday evening, January 3, starting at 9:00 o'clock and continuing until midnight. A free motion picture program will be held on Sunday, January 4 at 2:00 and 4:00 o'clock. Admittance to the programs will be by membership cards.

A Gift From Good Old Santa Claus

This interesting study of expressions was snapped by the Works photographer at the G-E Club Christmas party when one of the guests unwrapped his present from Santa Claus.

Uncle McWell Of 26-2

Confusin' but not amusin'.

It's a crying shame the way that one's fellow workers destroy and debunk the beautiful illusions that make the Christmas season a thing of joy and delight. Last week we reported the occasion of a trip to visit Santa Claus, and now we are gleefully informed that there is no Santa Claus. Either we have been kidded for a long time or else we had better take the pledge again.

But we did bring back with us the memory of some of our favorite advertisements, which we again dish up for inspection:

"Are you a dental cripple? Do your plates shake at the sight of a steak? Try our brand and get a real paste in the mouth!"

"Courtesy If It Kills You—

"Have you ever met up with a Courtesy Cab? You have? And you're still in good health? Take a turn in one of our rigs . . . and get your hair bleached for nothing. Don't tell the driver where you want to go. Let him figure it out for himself and you'll get there twice as quickly . . . what if you do feel only half as well afterwards? Do you want to live forever?"

"If you want a thick, brown taste—we make it. When you get up feeling woozy, with a fife and drum corps still marching inside your noodle, don't you worry; try one teaspoonful of Hurty's Hangover Heck-stract. Why feel normal when our Heck-stract can make you feel lousy for so little?"

"Have you seen the new streamlined, summer edition of Dr. Wilson's silk-lined water wings? If so, please return them to the Doctor, as he wants to go swimming!"

Santa was good to the Bldg. 26-2 gang. Lawrence Rickert received a cameo ring. We don't know whether or not that is what he wanted. Dave Mannix found a beautiful wrist watch in his sock and Wilson Lindsey is resplendent in a new overcoat—just what he ordered. Steve Kelker didn't get an electric train but his daughter did, and that is just the same thing.

Transformer News

A Christmas party was held at Al's Tavern with the following guests present: Martha Costion, Rita Schaefer, Hilda Rebber, Margurite Trulock, Thelma Roberts, Ruth Phillips, Ruby Igney, Alta Duff, Gladys Freeman, Helen Coryell, and Irene Habecker. The girls had a fine time but Irene Habecker ate the most chicken. The count is ten pieces. . . . Ceal Romary would like to be a drummer. Does anyone know where she can buy a cheap drum? It could be a dream—but not a blackout. . . . Lucky, lucky David Mannix. He is reported asking his gal what she wanted for Christmas and receiving the answer "Just some snow and you." Too bad David couldn't oblige with the snow—but that is life for you. . . . Ray Feller wanted an electric train for Christmas and had his wife talked into buying it. However, after the boys put him on he decided mebbe he didn't want one after all. . . . Ed Leitz promised to bring his wedding picture and give the gang a treat but so far he has failed to do so. Do you suppose it is because he was wearing those mourning gloves or because he was seated while the little woman had to stand while the picture was being made.

19-5 Office Chatter

The office girls held their annual confab on a recent evening at the Berghoff Gardens and from all reports "a nice time was had by all" except for those special "E. Post" minutes. Oh well, Ann, what is a salad among friends. Evelyn Parkinson got in the groove when the band played "Elmer's Tune" for the girls. It just comes to me that Alma Witte took a quick look around the other day. . . . Bob Hershey has to get his five-minute nap each noon, but the other day he got to the land of dreams—yes, even to landing a fish when over he went, and did his ears ever light up. . . . The Works News reporters of the Series and Specialty take this means to wish you all a Happy New Year.

Dyna's In The News 26-4

Reba Hofman of Bldg. 26-4, was married to Robert Carnes from Ossian on Monday, December 15. He is employed by the Pennsylvania Railroad. Congratulations and good luck! . . . We want to wish Marge Knoll, Bldg. 26-4, the best of luck and happiness as she is going to stay home and take up her household duties. Good luck, Marge! . . . Your news reporter wants to take this means of wishing everyone a Happy New Year.

Ardis Trzynka doesn't like chewing gum as much as she did before Saturday afternoon. She told the girls that she could chew a package at one time. So the girls fed her the five sticks as fast as she could put them in her mouth. Maybe you should have thought before you told them that one.

The "Dyna Swingers" presented a number of carols to help spread the Christmas spirit among the girls.

Our group Christmas party and exchange was held Saturday evening, December 20, at Gunnar Elliott's. The tables were placed to form the letter "u" and they were decorated in accordance with the Christmas season. Marjorie Ponsot came to Lucinda Fitch's rescue when Lucinda spilled her shrimp cocktail on the tablecloth. Alyce Neumann left the table at the wrong time. She almost lost her dessert.

Gosh! everyone is up and doing it. Vesta Scherrer had a wedding band placed on her finger December 20. Lois Parkison became Mrs. Paul Johnson on Christmas Eve.

Everyone wishes to extend their sympathy to Claradell Cox. Her sister passed away recently.

You should have changed your story a little, Geneva Menze. That old one, but still used, "I forgot to set my alarm clock" is really worn out.

6-4 Magneto Mumblings

We wonder if anyone of you had as eventful a Christmas as did Anne Perry, artistic member of the Magneto Department. Anne rode a big "choo choo" all the way to her home in Pennsylvania, and then discovered that she had lost her round trip ticket to bring her back. Imagine her dismay when she was unable to procure another ticket until one hour before train time. Highlight of her trip was the short acquaintance of two of Uncle Sam's Soldier Boys on board the train. . . . It seems mighty peculiar to us why anyone with a middle name as distinguished sounding as "Bliss" shouldn't be proud of it, but it would take Solomon and all his Glory to get Paul Bliss Alward to answer when addressed by his middle name. . . . Wedding bells rang for Lois Huselenbeck in the romantic atmosphere of Christmas Eve. We wish you all a lot of happiness Lois, and getting married on Christmas Eve was a good idea. Now your husband won't be able to forget wedding anniversaries. . . . The Magneto Department Christmas party was a huge success. Among the many useful gifts received in the Christmas exchange Mrs. H. Braun received a box full of match box covers. (Just a little mix-up. eh Bill?" . . . Joe Close did right well for himself as M.C. of the floor show and Virgie Asher's little daughter, Lucianne, made our hearts happy with her delightful dancing. All in all ,it was a lovely party. . . . Here's just a parting word of praise for the Magneto Department's undefeated basketball team—You're doing yourselves proud, boys, and we're proud of you!

Harold Camp of Bldg. 4-3 entertains himself on Christmas Eve. What he really does is leave his shoes at one place, his cap at another, etc. The real reason is that he just wants to go back again to where he has been.

Deaths

Keller Graves, employed in Bldg. 19-2, died unexpectedly on December 23 after being taken from his home, 1444 Broadway, to the St. Josephs hospital. Funeral services were held Wednesday at Columbia City.

To All Employees Of Plastics

I am sure you must have a feeling of deep satisfaction in the unusual job you have done during the past year. I am equally certain that you are preparing to meet whatever may come next year with this same spirit.

I compliment you and thank you for your efforts in the past. I join with the management staff in wishing you the greetings of the season and know you will join us in extending good wishes to Mr. Shill at this time.

William H. Milton, Jr.

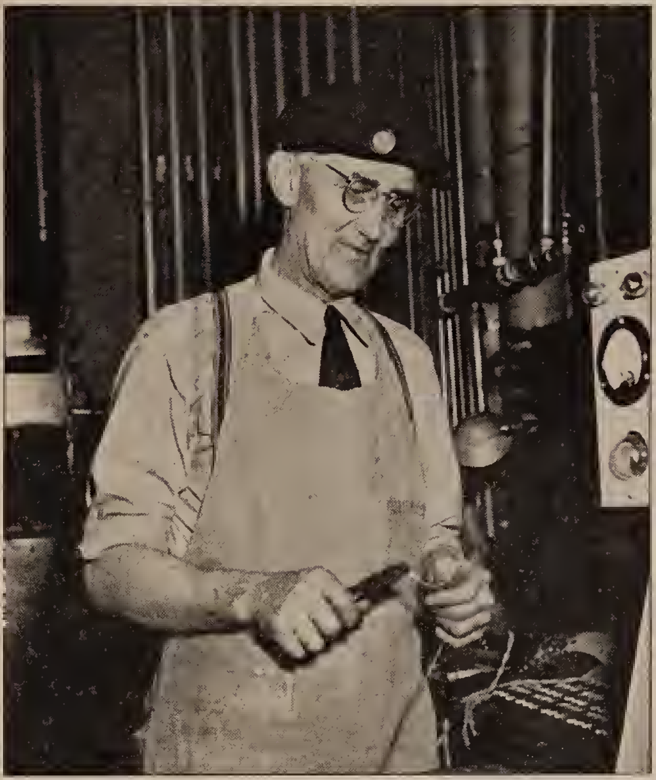
NEWS THROUGH THE PLANTS

Winter Street Rumblings

Fred "Croppie" Ellinger is becoming rather childish. We can understand this as we hear he has fun fishing with the kids at Reservoir Park. As he was signing up for his Defense Bond, he tried to get by by declaring himself under 21 years of age. We all know better than that. . . . Anyone having any dead animals, call Dale Delagrange as he is collecting heads for his trophy room. Our latest report was that he was hauling a frozen chicken hawk around in his car. Gosh, if it only gets warm! . . . "Small-fry" Crawford dashes out to the candy lady for her daily half pint of milk and then sets it down for ten minutes or just long enough for the candy lady to move on. Imagine her surprise when she discovered she had buttermilk. And she can't drink buttermilk. Luckily she was able to unload it. . . . Art Birely reports that poultry is a "fowl" business. Especially when you get neither eggs nor fried chicken. While in deep slumber one cold evening, he was quietly relieved of the responsibility and also of the entire flock of chickens. . . . Vern Gingher is again putting on his yearly acrobatic act. This latest performance was given on Broadway. Both hands in pockets, Vern was nonchalantly strolling when one of his "foots" (the one that has the bad eyes) failed to notice and negotiate a small rise in the pavement. And there he was, flat on his face, and his hands still in his pockets. Some of his friends insist his new mustache getting caught in the wind is throwing him off balance. . . . Does Margaret Morgan like "angel hair"? She must because she did receive a pre-Christmas gift of a little doll with the cutest "angel hair". . . . Kenny Kramer was just about ready to give up driving his Chevvy in cold weather as he just couldn't get it started even though the garages insisted his car was O. K. In his latest trouble he happened to have his wife along. As he was grinding away with no results, the "sweet woman" reached and pulled on one of the buttons on the dash and was Kenny mad. "Ain't I having enough trouble without you pulling things?" So the sweet woman let him have it: "If you'll choke it, Kenny, it'll start awful easy." "Choke! What choke? Why don't people tell me about those blank blank things." From then on the car started perfectly. Kenny is now reading his instruction book. . . . The Miscellaneous Department girls threw a Christmas party at the home of Mina Cleverly in Wayne dale. The main event was a pickle eating contest. Helen Dammeyer and Mary Menzie won it. Margaret Motherwell and Avis Roderman were runnerups. Jane Culverton tried hard to stay in the contest but had no chance. She couldn't even go to sleep until about 3 a.m. Mina Cleverly was the doctor and final judge. A good time was had by all. . . . When people who start begging for a piece of Renown Fruit Cake and who are given a large portion of it and who generously donate a thin dime for the purchase of another cake, then in turn get green around the gills when the word fruit cake is mentioned, shouldn't have a word to say. So speaks Millie Atherton. . . . Ann Adams swears her picture should be in the paper as she was standing on the firing line when pictures were taken at the Labor meeting last week. . . . Women should be helpless and decidedly useless, is the motto of Barbara Curtis. She had her first experience in trimming a small 24 inch Christmas tree. Before it was done every man and boy in or near the factory office was solicited for aid with: "I don't know how to do this; will you help me?" . . . For the long cold winter months, which lie ahead, we suggest that June Fisher go to the nearest drug store and purchase a supply of hair-restorer for her new Mexican *hairless* dog. At the present time "Baldy" is keeping warm in a red knit sweater. This is a third addition to the Fisher canine family: Blondie, Daisy and ? ? ? ? ? ? (We suggest Baldy) . . . The latest engagement and approaching marriage is that of "Mike" Bickel, who is proudly wearing a group of sparklers (in one ring) on third finger, left hand. Congratulations and best wishes from the Winter Street gang. . . . Gayle Griffith certainly has the right idea. Due to cold weather and the Christmas rush, he has enclosed his group of inspectors in a wire cage. . . . The current theme song of the Winter Street Plant is "Any Bonds Today". The salesmen in the factory have been well awarded for their efforts by the great response made by the employees of Winter Street. . . . The next time Helen Bleke orders pancakes in a restaurant, she is going to look around before she calls the waitress and requests syrup. The waitress just politely pointed to a little silver container with a lid and asked: "What's that?" Sure enough, syrup. . . . There seem to be some funny "goings-on" in the screw machine department, especially since Vic Cartwright and Art Haycox were seen with a brand new pitch fork (just the kind Cousin Hiram used on the farm). The mystery was quickly solved as they took it to the screw machine shaving scrap bin. From the way these boys handled that fork, it seems the consensus was that there was a lot of previous experience back along the trail some place.

What's wrong with Johnnie?—It's either Barb Curtis' cookies that made him ill last week or else he's just too too young for those strong cigars men are smoking and handing out these days. Anyway—his fellow co-workers don't mind a bit as long as he keeps them supplied with cigars.

Twenty-Five Years Of Service



ALBERT POWELL

Albert Powell, Bldg. 20-1, is a new member of the Quarter Century Club, having completed twenty-five years of service. The year 1941 saw the biggest enrollment in the club's history.

Decatur News

Mr. and Mrs. Herman L. Braun are the parents of a baby girl born at the Adams County Memorial Hospital. She has been named Karen Ann.

Fern Passwater is enjoying a week's vacation in Florida.

Mr. and Mrs. Jerome W. Meyer are the parents of a baby girl born at the Adams County Memorial Hospital. The baby has been named Jeronda.

Eileen Gemmer, Bldg. 4-3, is flashing a brand new sparkler on her left hand. Marjorie Kavanaugh, Bldg. 4-3, is also displaying a sparkler, and this reporter reports that by March 1 it will have to make room for the other ring.

In Every Home

Jim Smith and Dean Metzner recently attempted to emulate the deeds of "Super Man". Perhaps that job of pushing the car to get it started every morning caused the boys to believe they had attained that state of physical perfection where few things were impossible. (Note—Jim's car is the most contrary critter and sometimes requires a lot of pushing to produce even a sputter). But to go on with our story—You see, Jim lives with Dean and the other day when Mrs. Metzner went out to Ohio to visit relatives, the boys decided to do the family washing. According to reports, the boys bowled Monday night and then went home to perform the operations necessary to restoring the natural color of the family clothing. What happened is more or less a secret. Suffice it to say, the boys arrived next day crippled, unshaven, bleary-eyed and well past the appointed hour. They feel the need of that feminine touch in a home.

Fast Thinking

Al Swift, our eccentric production man who recently made the "NEWS" when he had his identification button delivered to him by taxi, again has the spot light of public attention centered upon him by his latest episode. Vic Rump, sports enthusiast, who usually has season tickets for all our High School basketball games, found himself with passes for two games played the same night, one at North Side, the other at South Side. After considering the merits of the teams to engage in these two encounters, Vic decided that North Side was the one to witness and offered Al his pass for the South Side game. Al was both enthusiastic and jubilant; he liked basketball, and South Side had a swell team, so the ticket was just like manna from the sky to him. We now allow for a two hour lapse of time. The next scene is in the North Side gym, as we see Vic walking around to limber up during the intermission at the half of the game. He suddenly stopped and and stared for sitting directly below him was Al, the guy who was supposed to be at South Side. Asked Vic, "How come you're here? Thought you were going to use my pass." Replied Al, "Doggone, I went home, met my brother and asked him if he wanted to go to the game. "We loaded into my car, drove right pass South Side and came out here. When we came to the door I presented my pass, but the doorkeeper just shook his head and said, 'Sorry Buddy, that ticket is not good here.' So we just paid our way and came in." To which we all say, "Fast thinking, pal."

Isn't It?

The co-workers of Mary Thornberg, who discovered her sitting at her desk the other day, with a pile of wooden blocks in front of her, which she pushed here and there while mumbling to herself, began to wonder as to the cause of this strange phenomenon. Did the gal believe she was still in her childhood, or had old age clamped it's relentless grasp upon her? Friends shook their heads, either condition was difficult to deal with and required the greatest finesse in the process of correction. While they adjourned to the "worry room" (every office should have one) to map out the course of action, someone discovered that the blocks were furnished by the company and were to be used to block up certain sections of her filing rack, thereby preventing small papers from sliding into its depths. So it turns out all right. Mary is happy, her co-workers are happy, we are happy. Great life, isn't it?

Like to Know:

What strange power does she have? "Who?", you ask. Why, Betty Wagner, of course—you have read much of her dad, Elmer, and her sister, Rita, in our news, but I think perhaps this is the first time I have had the pleasure of presenting the adventures of this young lady to you—my public. Just how she does it no one seems to understand, but that gal has some secret power 1 would like to possess. The other evening her "kid" brother borrowed Betty's street car pass and when he returned home placed it upon the radio. The next morning when Betty rushed around preparing to depart for work, Mrs. Wagner admonished her not to forget her "pass". So, as she dashed from the house, our heroine plucked the pass from atop the radio and was soon on a bus headed for our plant. After several transfers she arrived at the office and began her day's labors and in the evening repeated the same performance in reverse. This is the strange fact about our story—all day long she had ridden on the previous week's pass; she had picked up the wrong one in her hurry. What strange power does she have? How does she do it? We would like to know.

Saying of the Week

Jerry Frye remarks, "Though peace and good will seem lost this Christmas season, out of chaos will come peace, out of suffering and sacrifice will come good will.

Thisa And Thata 19-5

My, my, all these Christmas parties! A group from the winding section had a dinner and gift exchange at the Berghoff Gardens and then later went to a party at Mildred Werling's, where Florence Schaffer and Evelyn Archbold joined the rest of the group, who were Berniece Scheuman, Dorothy Kaough, Margaret Wehrle, Thelma Pond, Dorothea Kasner, Dorothy Craig, Jenny Frazier, and Mildred Werling. Another group of winders had a belated dinner at 4:00 at Mrs. Miller's tea room. They also had a gift exchange. Those at that dinner were Anna Ruth Clements, Hilda Seiler, Alma Lehrman, Geneva Warden, Marcile Roemer, Margaret Smith, Lorena Hahn, Cora Rice, Vera Armsby, Frances Smith, Eleanor Gligor and Ruth Reid. . . . A group of placers had a dinner and gift exchange at the Belmont Flagship and later went to the theater. In that group were Veva Healy, Connie Zollinger, Betty Long, Annabelle Dunlap, Avinell Gailey, Helen Engle, Ruth Harsch, Sarah Chelf, Ruth Rosenberry, Ethel Hayes and Margaret Honer. So much for parties. . . . Gertrude Scherer has decided that keeping house is so much more important than working in the factory. Here's hoping you have lots of happiness.

Please send me a Jap;
I'll show up the sap,
His face I'll slap,
His nose I'll rap,
His chin I'll tap.
I'll change his map.
Uncle Red Grepke, Bldg. 19-5.

— REMEMBER PEARL HARBOR —

NEWS THROUGH THE PLANTS

News On The Nose 4-5

Now that Christmas is over and we sleepy people who danced to the strains of Russ Morgan Christmas night have caught up on the eight-hour stint, we still have fond memories. . . . And who was more glowing than Theresa Brug with her first orchid? . . . Oh, yes, what be-oo-tiful memories only too rudely awakened by the realization that tonight we play but tomorrow is another working day—victory, "Arms for the love of America," "Keep 'em flying," and proudly, unregretfully, we return to the work world and our jobs in the civilian lines for victory. . . . Ed (Santa Claus) Klomp has been going around these many past months with his vest straps hanging. In final desperation, Sam Newlin, *Esquire's* strictest disciple, nabbed Ed by said straps and fastened them securely. Next day, same old story. Tsk, Tsk. . . . The boys in the test section hung some mistletoe right where Viola Wyss frequently walks during the day. Then, craftily, Ray Swartzel stood waiting to see who could catch her and other Bldg. 4-5 fair ones. Viola fared more fortunately than did Mary Hull, who didn't discover it until too late. Too late for what? Well, what do you think? . . . We are still laughing with messenger Bill Borcherding, who found that his mistletoe wasn't as potent as he expected. . . . Beatrice Lords, Bldg. 4-5, chose Saturday, December 13, to change her name to Adkisson. . . . Christmas Eve was unlike any previous Christmas Eve in Annabelle Heckber's existence. Witness the sparkler on her left hand. . . . Si Johnston is the lucky man in Barbara Mavity's life. Ditto, the left hand and ditto the date. . . . Johnny Gilter still sleepily protests that Russ Morgan was worth the loss of sleep. . . . Bob Born has a secret for keeping awake. He claims that his loud plaid shirt does the trick since he has been changed to second shift. . . . It seems that the boys prefer to shake dice with Jack Kreitz after last Friday night. Easy come, easy go, Jack. Don't be over confident. . . . One often wonders how Bob Tharp's hair turned curly over night. Could it be his girl's admiration for a wavy mane? . . . It is noticeable that Bill Morris hasn't as much nerve or something as Ray Swartzell, for Ray's crop of misplaced hair (mustache) is doing fine, but Bill has washed his off. Bill says he feels lost already. . . . Betty Stevens should know by now that there is quite a difference between fifteen minutes and two hours. . . . We think Alice Lake would make a dandy Santa; for when buying her exchange gifts, she always buys two in order to make certain the receiver gets what she wants. . . . Please, Merlin Roussey (Shortie), remember it isn't nice to frighten little girls. Your wooden snake will probably cause bad dreams. . . . Is Al Ray going high-hat on us? He's been wearing a tie to work for the last several mornings. . . . Wedding bells rang on December 20 for Cyril P. Poiry of Bldg. 4-5 and Lillian Ellenwood of Bldg. 4-3. . . . As a parting gift Adolph Foellinger was presented with a Defense Bond from a group of his former associates. . . . Bad luck came to Kenneth Young for his tires gave out right after the law prohibiting the sale of tires went into effect. . . . Anyone wishing pointers on how to win a chicken, ask Myron Richards. . . . After seriiously thanking his associates for the beautifully wrapped Christmas gift, Ed Klomp was somewhat abashed to find a ten-cent set of tools resting under all that splendor. . . . Another present, one for Martha Glock was hidden in the waste basket, so said the fellows in the assembly gang. When she trustingly reached into the basket to find the present, she found a live mouse. Gilbert Auth bravely told her it was harmless, until it bit him on the thumb. . . . Christmas bells had a double meaning for Hilda Shears, also, who became the bride of Wayne Glendening on Christmas Eve. . . . And may this coming new year be happy and prosperous and a victory for us all from all the guys and gals in Bldg. 4-5 to all you nice people everywhere.

Sincerely,
Snoopin' Sal.

No doubt many of our co-workers in Bldg. 4-3 will be interested in hearing about the welfare of our former champion flange "duster offer", Charlie Houser, who had the misfortune to have a slight stroke last summer and is still confined to his home on West Leith Street. A delegation of the boys from the flange section called upon him the other evening and presented him with a very nice Christmas gift, which delighted him greatly. They found Charley much improved and able to get around a little. It is a grand spirit, that of making glad the heart of some one and may God grant its continuance. Charley, we all extend to you our best wishes for a speedy and complete recovery.

Ward Grim of Bldg. 4-3 is getting his band all set up for the big housewarming at Adam's cottage at Big Long Lake.

Everett McKee, Bldg. 4-3, has a new hobby. He now is interested in the collection of photos, especially rare ones.

"Young man," said the city merchant severely, "I notice that you are almost invariably from 10 to 20 minutes late in getting to the office."

"I know, sir," replied the youth, "but you seem to set such a small value on my time that I didn't think it mattered much."

Apprentice Graduate

Robert Pequignot

Latest Apprentice School graduate is Robert Pequignot who has completed the machinist-toolmaker course. Mr. Pequignot graduated from South Side High in 1937.

Gossip From 19-5

Emily Post was present at the exchange at Magdalen Hook's house in the person of Rosie Van Smythe. . . . Ed Fiedler turned out to be a second Thomas Edison instead of a clock watcher, as we thought. Last Wednesday when the 11:30 whistle blew, he ran and got his coat and hat on and rang his card out. He was walking out the building when it finally dawned on him that it was the 11:30 whistle that blew instead of the 12:00 and he had to go back and work for another half hour. You didn't get a watch for Christmas by chance, did you, Ed? . . . Betty Frazier and Virginia Kaminitsas came in with such big smiles the day after Christmas, they almost out sparkled the sparklers . . . Magdalene Hook came in on time. Guess it was the new wrist watch she got. . . . Marcelline Girardot is also sportin' a new timekeeper. . . . Edna Braun can hardly wait till Saturday to try out her new sweeper. The young Mrs. Housewife . . . Bet Jean Grant of Bldg. 26-2 spent the day trying to outsing her musical powder box. One thing, though, is Jeannie doesn't have to be wound up . . . Surprise to see so many back to work looking fine after Christmas.

It is very interesting to note some of the ex-activities of our co-workers in Bldg. 4-3; for instance, Joe Cochoit, ex-sheriff of Archangel; Ed Smith, ex-blacksmith; Buck Adams, ex-gaucho; Newt Poland, ex-sharpshooter with Buffalo Bill's Wild West Show; Frank Phillips, ex-patent leather kid; Eldon Mee, ex-ringmaster of a dog and pony show; Ed Kimmel, ex-beau-brummel of the boulevards. Well, we could go on forever, but for this time, adios and more another time.

M.B.A. PATIENTS

Transformer: Warren Reson, 1020 Wilt St.; Evelyn Shipman, 2506 N. Clinton St.

General Purpose Motor: Wm. Schenher, 2905 Lillie St.; Charles Moorse, 3232 So. Lafayette St.; Cellah Lauer, 953 E. Berry St.; Bonnie Jetmore, 2123 Oliver St.; Virgal Guiff, Tampa, Fla.; Stella Fagan, 4421 So. Harrison St.

Apparatus: Marjorie Hickman, St. Joe Hospital, Mary Jane Hohn, 3625 Piqua Ave.

Apprentice: Raymond Finton, 1209 E. Wayne St.; Ralph Miller, 1011 Edgewater Ave.; Howard Opliger, R. R. No. 1, Fort Wayne, Ind.

Series and Specialty: Herbert Bauer, 1224 Third St.; Carl Bollei, Y.M.C.A.; Clark Holmes, 2121 Hoagland Ave.; Myrtle Schuelke, 1105 Wells St.; Harry Todd, R. R. No. 9, Fort Wayne, Ind.

Returned to work: Amelia Yovan, William Crause, Bessie Fleischer, Edward Marschand, Lynn Crawford, Alma Tindall, Evelyn Mileff, Earline Rohlfing, Ed. Dunlay, Robert Benty, Clark Holmes, Elizabeth Taylor, William Ryan.

Left the Hospital: Louis Davis, Arnold Blomberg, Helen Phillips, Stella Fagan, Harriet Gaunt.

Some people have all the luck. Back on the job selling candy and answering questions is Anna M. Gaff, after an eventful trip to Los Angeles—we reported her in Florida in a recent issue. Anna reports that her host and hostess were picking roses in December and that top coats were definitely out. In addition to seeing all the sights in and about Los Angeles she attended a broadcast at KFWB. Anna also took time out to visit our old friend Jim Sivits and see the sights at Long Beach, Signal Hill, etc.

Announcement is made of the marriage of Dorothy Ross, Bldg. 19-5 on December 25. Dorothy is now **Mrs. Merl Newby, Jr.**

Alma Ladig, Bldg. 4-3, surely must have a drag with the U. S. Government. Some one asked her what her social security number was and she replied, "Harrison 00130." Now, how do you suppose she got that title in front of her number. Just ask; maybe she will tell you.

Famous last words:

Alice Pflueger, "What do you think?"

Byrl Miller, "Now, don't lie to papa."

Phil Tilford, "You can't get away with that."

Sleuthing In 4-6

Bob Pfeiffer, formerly of Bldg. 4-6, has informed us in one of his letters, that he now receives the WORKS NEWS. Therefore, we take this means of thanking him for the lovely Christmas greeting which he sent us and assure him of our best wishes for the new year. . . . The unseasonable weather last week evidently did not interfere with Christmas celebrations, judging by the number of parties which were held. The Birthday Club had a dinner and gift exchange at the Aulton House. The girls of Bldg. 4-6 had a luncheon, also at the Aulton House; and the Order Service and Drafting party was held on December 19 at the Log Cabin. If you think they didn't have a good time at that party, just ask any one who attended. . . . Bill Pape left us last Friday. He has enlisted in the Army. Although we are more than sorry to see him leave, we are mighty proud of him for offering his services. The best of luck to you, Bill. . . . Herbert Osborne has an honest-to-goodness Christmas present. He has announced the arrival of a daughter. . . . A deathly stillness prevailed in the east end of Bldg. 4-6. Everyone wondered at the cause of it, until it was discovered that Vera Berning had no voice, due to an attack of laryngitis. Although addressed by a number of people, Vera flatly refused to talk. . . . Bldg. 4-6 should be equipped with those doors which open automatically when some one approaches them. Bruce Curley will welcome this suggestion, since he tried to walk through a closed door. Needless to say, he was not successful. . . . Better sharpen up your pencils, folks, and get some practice in writing "1942." And now that the new year is so close at hand, we wish to take this opportunity to say, "Happy New Year, Everybody!". . . We wonder how many fellows' sentiments are expressed by the following poem, written by one of our Bldg. 4-6 clan:

Christmas Lament

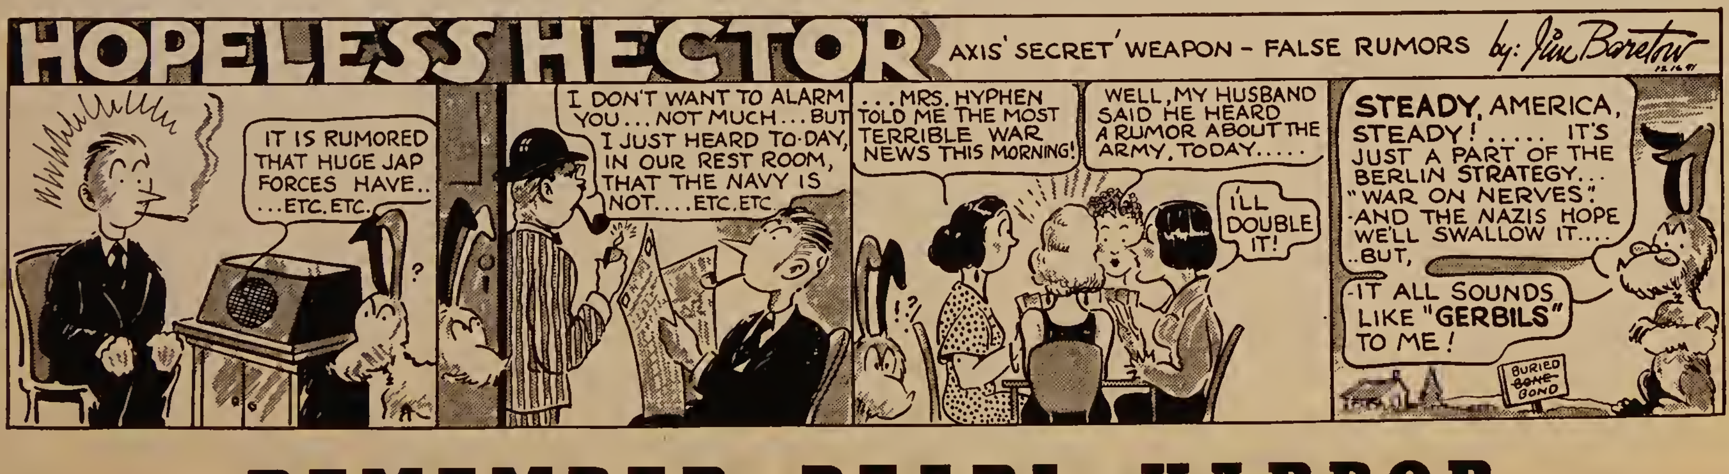
With Christmas now a day of the past,
  I feel a little bit blue.
Again I've failed at something
  That I've never been able to do.

I got right down to business
  And carefully laid a trap;
But all my plans just went for naught.
  I guess I was "The Sap."

I even used such modern things
  As "the beam and the magic eye;"
How come I never get results,
  I just can't figure why.

I'll try again next Christmas
  Using every trick I know.
I'd like to catch one single gal
  B'neath the mistletoe.

What's this we hear about Golda Mentzer, Bldg. 26-2, getting a pair of suspenders at the Christmas exchange. That's as bad as getting a washboard.



HOPELESS HECTOR
AXIS' SECRET WEAPON - FALSE RUMORS
by: Jim Boretz
12-16-41
IT IS RUMORED THAT HUGE JAP FORCES HAVE.. ...ETC. ETC.
?
I DON'T WANT TO ALARM YOU... NOT MUCH... BUT I JUST HEARD TO-DAY, IN OUR REST ROOM, THAT THE NAVY IS NOT.... ETC. ETC.
!?
...MRS. HYPHEN TOLD ME THE MOST TERRIBLE WAR NEWS THIS MORNING!
WELL, MY HUSBAND SAID HE HEARD A RUMOR ABOUT THE ARMY, TODAY.....
I'LL DOUBLE IT!
STEADY, AMERICA, STEADY! ..... IT'S JUST A PART OF THE BERLIN STRATEGY... "WAR ON NERVES": AND THE NAZIS HOPE WE'LL SWALLOW IT.... ..BUT,
IT ALL SOUNDS LIKE "GERBILS" TO ME!

Pay Station At G-E Club Has Been Discontinued

In 1938 many employees were working on restricted schedules of work hours, which did not include Friday, the regular pay day.

As a matter of accommodation, the Payroll Department established a special pay station in the Employment Department so that pay drafts could be distributed to these employees without their having to go to their foremen.

Gradually many second and third shift operators also called at the special pay station for their pay drafts and eventually the special pay station was moved to the G-E Club building to take care of the increased volume.

The problem of insuring a correct distribution of pay drafts to the proper employees has become increasingly difficult.

Recent events have demonstrated that this method of distributing pay drafts is faulty and positive assurance of correct distribution is practically impossible.

Therefore, to protect the employees by insuring positive identification, the special pay station in the G-E Club was discontinued **Friday, December 26, 1941.** Hereafter, each employee will receive his pay draft from his own foreman, while at work.

Employees who are not at work on the regular pay day may contact the Payroll Department, Bldg. 18-2, where, upon being properly identified, they can get their pay drafts.

W. C. WICHMAN,
Works Accountant.

Ghosts In X-Ray Pictures Reveal Movement Of Atoms

Mysterious "ghosts" in x-ray exposures, formerly attributed to faulty technique, actually are able to reveal important and fundamental data about the mechanics of crystals of metals and other substances.

The story of this "ghost hunt," in which various experimenters have participated, was related by Dr. Roman Smoluchowski, of the General Electric Research Laboratory, speaking at the Princeton University Physics Colloquium.

By passing it through a grating made by engraving parallel lines, many thousand to the inch, on glass, a beam of white light may be spread out in a spectrum. This process is called diffraction. X-rays are similar to light, but of much shorter wave-length. They too can be diffracted, if the grating is fine enough.

A crystal forms a natural grating which is sufficiently fine. Arranged in the form of a lattice, the layers of atoms in such a crystal form parallel planes in various directions, very close together, which act as a diffraction grating for x-rays. Thus, the x-ray has become an important scientific tool for studying crystal structure, and has found many practical applications.

When a narrow beam of x-rays is shot through a crystal, and recorded on a photographic plate, most of the rays go straight ahead, to form a dark spot in the center. But some rays are diffracted and form a symmetrical pattern of spots around the center. They are called Laue spots, after the physicist who originated the method.

Some years ago it was found that, in addition to the sharp Laue spots, there were sometimes hazy spots alongside them, which were referred to as "ghosts." It used to be thought that they were due to experimental errors, or to imperfections in the crystal.

Now, said Dr. Smoluchowski, they have been found of great importance. He explained that if the atomic lattice of the crystal is entirely at rest, all scattering of x-rays is by the usual theory, and they form the typical Laue pattern. But at higher temperatures, atoms are set in motion, and they cause a diffuse scattering. The atoms do not move at random, however, for there is enough coupling between them that when one atom moves, adjacent ones move also. The effect, he said, is as if sound waves were travelling back and forth through the crystal in all directions. The atoms momentarily displaced form extra planes, which scatter the rays in abnormal directions and make the ghostly spots.

This interpretation has been confirmed by oscillating the crystal during the exposure. Similar ghosts then appear.

The intensity of the ghosts increases with the temperature of the crystal. Since their intensity depends on the amount that the atoms shift out of their usual position, it can be measured and used to determine the amplitude, or extent of swing, of the vibration waves, declared Dr. Smoluchowski.

From the effects of this diffuse scattering of the x-rays, it is possible to learn more about the fundamental mechanism of crystal structure, he stated. Since commonly used metals and alloys have a crystal structure, this may prove important practically as well as theoretically.

Private Wires

(Continued from Page 1)

cities directly and many others indirectly.

Economics dictate when wires are leased by General Electric. When toll or telegraph expense approximates the cost of a leased wire, such a wire is obtained. Additional traffic can be handled over the leased wire at no additional cost to the Company.

The teletype network, particularly, has proved an important factor in meeting General Electric's communication problems, according to E. I. Hibbard, assistant supervisor of communications for the Company.

"The distance, whether a few feet or a thousand miles, is of no consequence," says Mr. Hibbard. "All points function as if they were under one roof. A message is typed in the office in which it originates, is transmitted automatically to the relay center at Schenectady, and then is relayed automatically to the office of destination. The process requires but one typing of the message which often is delivered to the addressee's desk sooner than he could have been located by telephone."

A special feature of the teletype system is the "Delivery Request" service. A "Delivery Request" message takes precedence over ordinary telegraphic communications. In one test case, a telephone toll call from Schenectady to Fort Wayne cost $9 to get the desired information. The same results were obtained by the "Delivery Request" service in seven minutes at a cost of only 30 cents.

Enter Pledges For Victory Production

Entering pledges of utmost effort of body and brain to the battle of production, members of Locals No. 901 United Electrical Radio and Machine Workers of America and of Local No. 70 International Association of Machinists met recently at mass meetings with Works officials at the Broadway and Winter Street plants. Above Works Manager M. E. Lord is shown addressing the Broadway meeting. On the speakers platform at the right is L. J. Blair, president of Local No. 70, and at the left, Sam C. McAfee, president of Local No. 901, both of whom gave talks.

SCIENCE FORUM – by L. A. Hawkins

Q. What preparation is used for winter window washing to prevent frost and ice from forming on the windows while washing?

A. The preparation that is used extensively is ordinary denatured alcohol and water or propyl alcohol. The concentration is usually about 10 to 15 per cent of alcohol in water.

Q. How is mercury distilled, and at what temperature does it boil?

A. At atmospheric pressure, mercury boils at something like 365 C. When mercury is distilled for the purpose of cleaning it or separating it from impurities, it is not boiled but is held at a lower temperature so that evaporation of the mercury from the surface takes place. It is desirable from a safety standpoint as well as from the standpoint of oxidation to distill mercury in a vacuum at a temperature of about 170 C—the lower the temperature the better.

Q. Are there any common and inexpensive substances that will, when applied to paper or cardboard, make them noncombustible, or at least less subject to combustion?

A. Among the simplest and readily available materials are borax, washing soda, sodium tungstate, and ammonia salts, especially ammonia phosphate. Dissolve as much of the material as possible in water and simply dip the paper or cardboard in the solution, and then allow to dry out.

Q. What can be used to wash bricks to brighten them up?

A. The only thing effective on bricks would be hydrochloric acid if they are to be washed, but this is not advisable to use unless one is experienced in handling acids. Once washed this way, the bricks would have to be very carefully washed again with water to remove the acid. They can be sand blasted the way buildings are sometimes brightened up. If this method is not convenient, a stiff wire brush is as good as anything. The mortar between the bricks could be white-washed.

Q. Is the reading of an inside barometer as accurate as one that is contacting the outside atmosphere?

A. Under ordinary conditions, the air pressures inside and outside the house differ only by a negligible amount. The temperature within the house, however, is more uniform than it is outside so that inasmuch as some barometers are not perfectly compensated for temperature changes, more accurate readings in general are attained from a barometer indoors.

News Around

26-5 Tool Bits

Since H. Wittber has had his name in the paper twice last week and G. Gorrell only rated once, we feel it our duty to keep the green-eyed monster in check. So here you are Gran.

Christmas has passed and we have yet to see that new tool chest that Russel Dunten was telling us he was to receive from Santa. Come on Russel, either 'fess up or show the goods. Don't keep us in doubt so long.

Jack Schemehorn told us that on the 24th of December he had enjoyed ten years of marital bliss, but from the looks of the contributions he received we couldn't tell whether it was a tin or silver anniversary.

The Toolroom office team; Ehresman, G. Glenn, Wagoner, Dolan, Redding, and a 160 pin handicap took three games from the Tool Drafting team Sunday afternoon at the G-E Club alleys. It was a holiday match game and the draftsmen, with nothing at stake except the courthouse, were glad to see the office do so well and promised to give them a few pointers on how to improve their league standing in their next scheduled match.

Best wishes go to Dorothy Aschliman for she became a bride on Christmas day. The office gang had a get together at the Varsity Club and presented her with a gift.

Johnny Neuendorf says, once you machine a piece below given dimensions it can't be replaced. So he says to be sure to leave on a *tenth* of a *tenth* of a thousand. Close work? What?

Congratulations are in order. Russel Mueller and Eileen Goddard walked down the aisle on December 20, 1941.

Art Thieme's gang went 100% in the bond subscriptions and compliments are in order. Nice going, fellows.

Earl Lenz claims his bond subscription came as a result of the barrels of gas he saved last year.

Rufus Niblick regrets very much the postponement of the Machinists' Christmas party for he had that Santa Claus suit all dusted and ready to go.

Christ Kaiser received a nice box of California fruits among his Christmas presents.

Frank Prezbindowski not only soars through the air like a canary bird, but he can sing one to shame, or vice versa. Henry Wittber warbles the chorus, which is so bad that even the sparrows leave home.

Earl Lenz received that much sought after new hunting coat for Christmas, but hasn't decided when he will use it.

Walter Best is back after a week-end in-dis-pos-it-ion.

"I pledge allegiance to the flag of the United States of America and to the Republic for which it stands, one nation indivisible, with liberty and justice for all." So pledged the grinding section, Bldg. 26-5, in unison on the morning of December 18th at which time the Stars and Stripes were hung in a prominent place.

To Herschel Odier goes the credit of taking the initiative of collecting the money for the purchasing of a flag, and to Ralph Steward for making the trip down town to get it.

Our sympathies to Walter Elliot in the loss of his father.

The members of the Small Lot Section, Bldg. 4-3, are in a dilemma as to what to do about Raymond Heck. It seems that Ray is having trouble in selecting a young lady to take to the New Year's dance; but our secret service operative reports to us that Ray has finally made the grade, so everybody is happy.

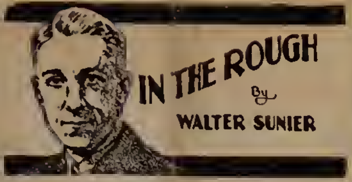
Effie Wyatt surely has something on her mind lately. One day last week she received a tool exchange slip. Now, Effie hurried down the stairs, forgetting to stop at the second floor, and walked out the Fairfield entrance. Upon getting out into the wide open spaces, she thought, "My, how cold that wind is." Then all of a sudden she said to herself, "My goodness, I haven't got a coat on and what in the world am I thinking as I only wanted to go to the second floor?" As a result, Effie can hardly talk out loud. Wouldn't you all like to know what was on her mind?

He: "Do you think this would be a propitious time to ask your father for your hand?"

She: "I think it would. I've just asked him for a new automobile."

Drill sergeant to married recruit: "Button your coat!"

Recruit (absently): "Yes, dear."



IN THE ROUGH

By WALTER SUNIER

Dear Little New Year:

There are lots and lots of things that you could do this year but since you are so terribly busy I am going to mention only two things to which I would like you to pay especial attention.

There are a couple of guys across the pond with the initials of H. and M. I do not want to see their names printed here because they are distinctly not friends of mine nor friends of my friends. So far as I ever heard they never played a game of golf in their lives. When they should have been playing golf and learning something about fair play, sportsmanship and doing something where they could win and still not ruin their opponent, they were playing with guns. When they got enough guns together, they wanted to play cops and robbers but some way or other they couldn't even play this game straight. They wanted to be the cops and the robbers both. Any American kid will tell you that the game isn't played that way. Finally, H. and M. copped so many countries and robbed them that the whole world became involved. Now we are in a mell of a hess.

What I would like to have you do is make up a foursome for a golf game between H., M., John Bull and Uncle Sam. I think Uncle Sam and John Bull would beat them so badly or would keep them so interested that they would forget this fighting business. Anyway you arrange the game and I am definitely sure that the rest of the details will be taken care of to your entire satisfaction.

The other thing is very simple. Since you will get around quite a bit, I think it would be a grand idea if you would continue to broadcast everywhere that supreme Christmas aspiration, "Peace on earth, goodwill toward men."

TABLE TENNIS

The table tennis league will resume play next Saturday, January 3rd. Members will be notified individually when to appear. Any member not receiving his notice will please report at 1:00 P.M.

Is Appointed Foreman

W. L. PAULSON

W. L. Paulson, Bldg. 26-5, has been appointed foreman of the second shift in the General Tool Department it is announced by C. A. Brenner, superintendent. The appointment becomes effective immediately.

Mr. Paulson is an apprentice school graduate, having completed the machinist-toolmaker course in 1926. He was then assigned to tool making in Bldg. 26-5. In 1932 he was made a boring mill operator and the following year was assigned to the second shift where he followed practically all operations of the tool department.

« «It's a Joke» »

"You didn't carry out your plans to elope?"

"No. I found father was planning to move, and I didn't know where we'd find him when we got back."

* * *

Mother: "Dorothy, you have disobeyed mother by racing around and making noise. Now you shan't have that piece of candy."

Father (entering a few minutes later): "Why so quiet, little one?"

Dorothy: "I've been fined for speeding."

* * *

"Darling, I've bought you a simply marvelous washing-up machine. You just press a button and the work's done."

"Uh-hum—and who's going to press the button?"

* * *

Bore: "I don't know how it is, but I feel thoroughly wound up tonight."

Hostess (tired of him): "How strange! And yet you don't seem to go."

* * *

Sailor: "I guess I'm just a little pebble in your life."

Sweetie: "Well, if you feel that way about it, why don't you try becoming a little boulder?"

* * *

Husband (feeling a twinge in the back while he is tuning in the radio): "I believe I'm getting lumbago."

Wife: "What's the use, dear? You won't be able to understand a word they say."

* * *

A gangster rushed into a saloon shooting right and left, yelling, "All you dirty skunks get outta here."

The customers fled in a hail of bullets—all except an Englishman, who stood at the bar calmly finishing his drink. "Well?" snapped the gangster, waving his smoking gun.

"Well," remarked the Englishman, "there certainly were a lot of them, weren't there!"

Rod And Gun Club Opens New Season

With the start of the new year the Rod and Gun Club will open the sale of 1942 memberships. The membership cards have been entirely redesigned and are printed in colors using the club emblem as a background. Application blanks are now available through the officers of the club: A. F. Bowers, president, Dudlo Building; H. Hyndman, vice-president, Bldg. 19-5; E. J. Pion, secretary, Bldg. 4-3. Second shift shooters may enroll through Oral Emrick, Bldg. 19-5, range officer. Membership dues are $1.00 for the calendar year.

Inaugurating the new season, the club announces opening of the Winter session of classes for instructions in shooting. Burl Tillman, Bldg. 27, prominent rifle and pistol shooter, will conduct the course which will be open to all members. Initial classes will start Jan. 7 in the evening at the Armory and will start with primary instructions in rifle marksmanship and continue to include pistol shooting.

All candidates for membership and instructions are urged to be at the Armory Wednesday, January 7. In addition to the regular weekly shooting Wednesday mornings for the second shift men and evenings for the day workers, matches are being arranged through the Club's affiliation with the local Rifle Club's Shooting League.

DECATUR SPORTS

Cloverleaf Again Defeats G.E. In Thriller

The G-E Club lost another thrilling basketball game to Cloverleaf in the City Industrial League. After see-sawing back and forth Cloverleaf edged the local club by 41-37. Cloverleaf led 20-18 at the half; the G-E boys came back and held a 28-26 lead at the three-quarter mark.

The G-E Club played their best ball of the season in a futile effort to beat the league leaders who have not lost a game in league competition this season. Baker won the individual scoring duel from Stapleton of Cloverleaf; Baker scoring 16 points to Stapleton's 14.

Lineup and summary:

Cloverleaf	Points	G-E Club	Points
Wynn	9	Blythe	3
Stapleton	14	Jackson	7
McConnell	5	Braden	1
Strickler	7	Baker	16
Worthman	0	Smith	4
J. Schnepf	6	Andrews	6
K. Schnepf	0		
Johnson	0	Total	37
Total	41		

G.E. Inter-Department Bowling League

Joe Howard came through with a 211 score to cop the high single game of the Inter-Department League and lead the Rotors to 2 out of 3 wins over the Maintenance team.

Production won 2 of 3 from the league leading Testers.

Assembly won 2 of 3 from the Switches.

200 scores included Howard 211, Leitz 201.

STANDINGS

	W	L
Testers	20	10
Maintenance	18	12
Assembly	18	12
Rotors	15	15
Production	11	19
Switches	7	17

G.E. Industrial Bowling League

200 scores were the rule rather than the exception in the G. E. Industrial Bowling League; a total of 17 double centuries were marked up. However, no one was able to reach the coveted 600 series goal.

Oscar Lankenau took over the individual game honors with a rousing 237 as the league leading West End Restaurant copped 2 of 3 from Mutschlers. Fred Hoffman's 226 was best for Mutschlers.

Hez Cochran had a big 231 and E. W. Lankenau a 224; but, in spite of their efforts, the G. E. Dodgers could win but one game from Doc's Place; F. Wolpert's 219 was the best for Doc's Place.

With Al Schneider rolling a 223 and receiving vital assistance from his mates, the G. E. Ramblers won 2 of 3 from Burkes. Adrian Burke came through with a 220 in a vain effort to spur his mates.

200 scores included: O. Lankenau 237; Zelt 208; Appleman 202; Ahr 201; Mutschler 211-200; Hoffman 226; Wolpert 219; Geimer 200; Cochran 231; E. W. Lankenau 224; Burke 220; Keller 211; Lindeman 205; Laurent 211-215; Schneider 223.

Standings—End of First Half

	W	L
West End	24	9
Mutschlers	30	13
Burkes	17	16
Doc's Place	16	17
Ramblers	12	21
Dodgers	10	23
